September 28, 1984

Richard D. Lamm Governor

E. Robert Turner Executive Director

James A. Stroup State Controller

The Honorable Richard D. Lamm Governor State of Colorado

Dear Governor Lamm:

I am pleased to submit Colorado's Annual Financial Report for the year ended June 30, 1984. In accordance with statute section 24-30-204, CRS, we are submitting this report to you and the Legislature by September 30. The report includes the combined financial statements of the General Fund, as well as combined financial statements for all fund types and account groups.

Highlights of the General Fund financial position are as follows:

- o The unrestricted fund balance increased from zero to \$16.0 million in addition to the cash revolving fund being restored to its statutory account of \$15 million.
- o Revenues and transfers-in exceed expenditures and transfers-out by \$32.8 million.
- o Revenues fell short of the final revenue estimate (March 1984) by \$1.4 million.
- o Cash increased by \$88.7 million, from a negative balance of \$89.7 million to a negative balance of \$1.0 million.

Other funds continue to be in good financial condition except for the Major Medical Fund's deficit which increased by \$2.2 million to \$14.9 million. Combined fund equity for other funds totaled \$683.9 million.

Our office will issue a Comprehensive Annual Financial Report in late October. This report will include supplementary data regarding the various funds, graphs and charts, and various statistical data and analysis. A copy of the comprehensive report will be sumbitted to you upon completion.

Sincerely,

James A. Stroup State Controller

## STATE OF COLORADO NOTES TO FINANCIAL STATEMENTS JUNE 30, 1984

#### NOTE I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accounting policies of the State of Colorado conform to generally accepted accounting principles applicable to governmental units.

#### A. REPORTING ENTITY

The National Council on Governmental Accounting has issued Statement 3 which establishes the criteria for determining the activities, organizations, and functions of government to be included in the financial statements of the reporting entity. The basic criterion for inclusion in the financial statements is the exercise of oversight responsibility by the State.

The extent of oversight responsibility was evaluated, based upon several criteria including: selection of governing authority; designation of management; the ability of the State to significantly influence operations; and accountability for fiscal matters including the level of State financing and/or moral or legal responsibility for the long-term debt of the organizations; and materiality of organization to State operations.

The evaluations precluded the inclusion of the following organizations as component units of the State of Colorado entity:

Colorado State Fair Authority
Colorado Housing Finance Authority
Colorado Water Resources and Power Development Authority
Colorado Agricultural Development Authority
Colorado Student Obligation Board Authority
Colorado Post-Secondary Educational Facilities Authority
Colorado Health Facilities Authority
Cumbres and Toltec Scenic Railroad Commission
Public Employees' Retirement Association of Colorado

#### B. FUND STRUCTURE AND BASIS OF ACCOUNTING

The accounts of the State are organized on the basis of funds and account groups, each of which is considered a separate accounting entity. The operations of each fund are accounted for with a separate set of self-balancing accounts that comprise its assets, liabilities, fund equity, revenues, and expenditures, or expenses as appropriate. Government resources are allocated to and accounted for in individual funds based upon the purposes for which they are to be spent and the means by which spending activities are controlled.

For financial statement presentation, like kinds of funds have been combined into seven generic fund types and three broad fund categories. For example, the State may have a number of individual Loan, Endowment, Trust, and Agency funds which are grouped together in the financial statements. Account groups are presented for general fixed assets and general long-term debt.

#### **GOVERNMENTAL FUNDS**

#### General Fund:

The general fund is the principal operating fund in State Government. It includes all those operations financed from the unrestricted general revenues of the State. The general fund includes all the transactions not recorded in other funds.

The fund's primary revenues include general taxes and revenues generated by agency operations that augment State sources such as institutional care and Federal grants and contracts. A significant portion of the fund's expenditures are monies passed through to local elementary and secondary school districts and to colleges and universities. It also includes higher education grants and contracts for specific purposes such as research and sponsored programs accounted for in their current restricted funds.

#### Special Revenue Funds:

Special revenue funds account for specific revenues designated to finance specific activities. The individual funds included in this group are:

- o Highway Fund Proceeds from excise taxes on motor fuels, driver and vehicle registration fees, and ton-mile taxes provide the revenues of this fund which are used primarily for the construction and maintenance of public highways in the State.
- o Wildlife Fund Hunting and fishing license fees are used to preserve the State's wildlife and provide outdoor recreational facilities.
- o Employment Fund From funds provided by the Federal Government to provide employment services and pay out unemployment insurance benefits.
- colorado Major Medical Insurance Fund, the Colorado Medical Disaster Insurance Fund, and the Subsequent Injury Fund These funds are designed to provide additional medical, injury, or vocational rehabilitation benefits to those provided by Workmen's Compensation insurers in the State of Colorado. The primary sources of revenue for these funds are taxes on compensation insurance programs and interest on investments.

#### Debt Service Funds:

This fund is used to account for the accumulation of resources for, and the payment of, general long-term debt principal, interest, and related costs and includes the higher education retirement of indebtedness funds.

#### Capital Projects Funds:

The capital projects funds are comprised of what is regularly referred to as the "capital construction fund" and other capital construction funds which include the unexpended plant funds of higher education. The distinction between these two categories within the capital construction funds sub-group is primarily the source of the monies which are used for the acquisition and construction of plant facilities in both instances.

Revenues of the "capital construction fund" consist of the general revenues transferred from the general fund and Federal sources.

The revenues of the "special capital construction fund" are normally special sources, such as donations, fees, or Federal sources.

The source of monies used in the acquisition and construction of plant facilities in the higher education sector is primarily from Federal funds and charges for services.

A combining statement segregating the three capital construction activities is included in the financial statements. The fund balance of each category normally represents amounts remaining unexpended at the reporting date.

All governmental type funds are accounted for on a modified accrual basis of accounting. This means that their revenues are recognized when they become susceptible to accrual, i.e., when they become both measurable and available to finance expenditures of the current period. Each of the primary sources of revenue of the governmental type funds susceptible to accrual are offset by related refund liabilities recorded where appropriate.

Excise taxes such as sales, liquor, cigarette, and use taxes are accrued based on filings received and filings due for filing periods on or before June 30, 1984. Accruals are established from inventories of excise tax filings in process, assessments in various stages of collectibility, and other filings expected to be received for those filing periods. Estimates are based on reliable historical data modified for economic trends and include a reasonable allowance for uncollectible amounts. Amounts expected to be collected after twelve months are recorded as deferred revenue.

Income taxes from individuals, corporations, and trusts are accrued based on current income earned by taxpayers prior to June 30, 1984.

Income earned and taxes due on income are estimated through the use of quarterly filings, withholding statements, and historical data modified for current economic trends. Accrued tax revenue is reduced for amounts estimated to be uncollectible. Amounts expected to be collected after twelve months are recorded as deferred revenue.

Income from licenses, permits, fines, and forfeits is recorded when a court order, billing statement, or other legally enforceable notice of assessment issued.

Investment earnings are recorded in the year when earned.

Revenues earned under the terms of agreements with outside sources (e.g., contracts and grants from the Federal Government or private sources) are recorded at the time the expenditures are made.

Expenditures are recorded at the time liabilities are incurred except:

- o Interest on long-term debt is recorded when due.
- o Accumulated unpaid vacation and sick pay are recorded when paid.

Encumbrance accounting is used during the year for budgetary control purposes. Encumbrances outstanding at year end are charged against the subsequent year's operating budget when liquidated and therefore have no impact on ending fund balance of the current year.

Long-term investments of governmental funds are reported on their balance sheets, in spite of their spending measurement focus. Special reporting treatment is used to indicate, however, that they are not considered "available spendable resources" since they do not represent net current assets. Long-term investments are offset by fund balance reserve accounts.

Special reporting treatment is also applied to governmental fund inventories to indicate that they do not represent "available spendable resources" even though they are a component of net current assets. Such amounts are offset by fund balance reserve.

#### PROPRIETARY FUNDS

#### Enterprise Funds:

This type of fund is used to account for the operations of self-sustaining State agencies rendering services to the general public on a user charge basis, such as the Compensation Insurance Fund.

#### Internal Service Fund:

These funds are established to finance and account for services and commodities furnished by a designated agency to their department of State government on a cost reimbursement basis. Examples of services are: central stores, motor pool, and print shop operations.

All proprietary funds are accounted for on the accrual basis of accounting. Their revenues are recognized when they are earned and their

expenses, including depreciation, are recognized when they are incurred. Depreciation has been recorded over the estimated useful lives using the straight line method. The estimated useful lives are as follows:

Buildings - 25 to 40 years Improvements - 10 to 17 years Equipment - 5 to 12 years

#### FIDUCIARY FUNDS

Trust and Agency Funds:

These funds are similar in nature and therefore are combined and reported on as a group. The basic similarity of the funds is the custodianship of monies received.

Loan Funds account for the receipt of trust monies from private sources and Federal student loan assistance programs and the loaning of these monies to students, faculty, and staff. The terms of gift agreements usually specify that the funds operate on a revolving fund basis, i.e., repayments of principal and interest are loaned to other individuals. Loan funds are accounted for on the accrual basis of accounting.

Nonexpendable trust and endowment funds are funds with respect to which donors or other outside agencies have stipulated, as a condition of the gift, that the principal must be retained intact and invested for the purpose of producing present and future income which may either be expended or added to the principal. Nonexpendable trust and endowment funds are accounted for on the accrual basis of accounting.

Expendable trust funds are accounted for on a modified accrual basis essentially in the same manner as governmental funds.

Agency funds are strictly custodial in nature and do not involve measurement of results of operations.

#### ACCOUNT GROUPS

The two account groups are not "funds." They are concerned only with the measurement of financial position. They are not involved with measurement of results of operations.

o Fixed Asset Group of Accounts

Fixed assets used in governmental fund type operations such as land, buildings, other improvements, equipment, and library books are accounted for in the General Fixed Assets Account Group rather than in governmental funds. Generally all items having a cost in excess of \$500 and an estimated useful life of two years or more are capitalized. Investment in plant funds of higher education are

also included. Fixed assets utilized in enterprise, internal service, and trust and agency funds operations are recorded in those funds and depreciation of those assets is charged as an expense of operation in those funds.

Investments in roads, bridges, electrical systems, and similar public domain ("infrastructure") general fixed assets are neither capitalized nor reflected in the financial statements.

All fixed assets are valued at historical cost or estimated historical cost if actual historical cost is not available. Donated fixed assets are valued at their estimated fair value on the date donated. Depreciation of exhaustible fixed assets is recorded only in the proprietary funds.

#### o General Long Term Obligations Group of Accounts

Long-term liabilities expected to be financed from governmental funds are accounted for in the General Long-Term Obligations Account Group, not in the governmental funds. Long-term debt related to higher education investment in plant funds is also included. Amounts due within one year may be recorded in the Debt Service Fund. Debt to be financed from proprietary funds is recorded in those funds.

#### C. BUDGETS AND BUDGETARY ACCOUNTING

The financial operations of the three branches of government are controlled by the annual appropriation made by the State Legislature. This annual appropriation is limited to the unrestricted funds held at the beginning of the year plus the revenues estimated to be generated during the year based on a modified accrual basis. The appropriation controls the expenses of the State at the agency level, predominately by category of expense or program. Appropriation may be shifted from one category to another, increased or decreased in the following session of the legislature by means of a supplemental appropriation. Supplemental legislation was passed during the reported year. A statute allowing the executive to transfer apropriation from one category to another was found to be unconstitutional by a district court at the end of the fiscal year. This ruling is currently under appeal by the Executive branch. An unexpended appropriation lapses at the end of a fiscal year unless executive action is taken to roll-forward a specific unexpended appropriation into the next year. Appropriations which meet the strict criteria for roll-forward are reserved at year-end.

#### D. COMPARATIVE DATA

Comparative total data for the prior year has been presented in the accompanying financial statements where appropriate in order to provide an understanding of changes in the State's financial position and operations.

#### E. ELIMINATIONS

Substantially all the intrafund transactions and balances have been eliminated. Substantially all revenues from interfund transactions have been eliminated in total from the total gross revenues and accordingly have been reclassified to transfers-in in the "Other Financing Sources" (Uses) of the statements. Likewise, the interfund expenditures/expenses have been treated in the same manner and reflected as transfers-out.

#### F. TOTAL COLUMNS ON COMBINED STATEMENTS

Total columns on the Combined Statements are captioned Memorandum Only to indicate that they are presented only to facilitate financial analysis. Data in these columns do not present financial position, results of operations, or changes in financial position in conformity with generally accepted accounting principles. Neither is such data comparable to a consolidation. Interfund eliminations have not been made in the aggregation of this data.

#### G. CASH

The State Treasurer acts as a bank for all State agencies. Monies deposited with the Treasurer are invested until the cash is needed. Interest earnings on these investments are credited to the General Fund unless a specific statute directs otherwise. The detailed composition of the cash and investments is shown in the annual Treasurer's Report. The State maintains numerous cash accounts for administrative purposes. The cash reflected on the balance sheet is the composite amount of all accounts although some of the individual accounts may be periodically overdrawn. Any deficit cash balances on a fund basis are shown in the liability section of the balance sheet. This classification also includes all short-term investments such as certificates of deposit and U.S. Treasury Bills, most of which are held by the State Treasurer. These investments are stated at cost at June 30, 1984 which approximates market.

#### H. INVESTMENTS

These are long-term investments, generally stated at cost or amortized cost, which approximates market.

#### I. SECURITIES HELD IN TRUST

Securities are held by the State Treasurer for the Division of Mined Land Reclamation to insure land restoration where permits have been issued to mine operators. In addition, surety bonds in the amount of \$165.7 million are also held for this purpose but are not included in the financial statments.

#### J. TAXES RECEIVABLE

The taxes receivable of \$429.8 million results from recording of self-assessed taxes on the accrual basis. They are collected subsequent to June 30, but are considered earned as of that date.

Tax refunds payable of \$153.4 million recognize the refund liability relating to these self-assessed taxes.

#### K. RECEIVABLES

Included in the receivables is \$8.3 million of interest.

#### L. INVENTORY

The State's inventories consist primarily of consumable items such as office supplies, institutional medical and linen inventories, repair and maintenance items, and vocational shop materials. Also included in the inventory is an immaterial amount of finished goods produced and held for resale by units such as the Department of Corrections.

Inventories are stated at the lower of cost or market utilizing a variety of methods (i.e., lifo, fifo, average), the method remaining consistent from year to year in each specific State agency.

#### M. DEFERRED REVENUE

Summer school tuition revenues collected by institutions of higher education and associated expenditures at June 30, are deferred to the subsequent year.

Revenue collected (by agencies other than Higher Education) from the Federal government and other sponsors is recorded as deferred until such time as expenditures are made. State Compensation Insurance premiums are recognized as earned in the period of coverage.

#### N. FUND EQUITY

The fund balance of the General Fund is made up of restricted and unrestricted amounts. Items are restricted as provided by statute or the State Constitution are otherwise unavailable for expenditure. The old age pension reserve is an example of the former and the reserve for inventories is an example of the latter. Those amounts left unrestricted represent that portion of General Fund equity (net assets less liabilities) available for future use as working capital or as determined by the Legislature. Current year shortfalls in actual revenue have reduced the General Fund balance to zero.

#### O. RESERVES

Reserves for the State of Colorado at June 30. 1984 consist of:

Reserve for Related Assets - These reserves were established to indicate that a portion of fund balance is represented by assets which are not

available, spendable resources even though they are a component of assets. Assets of this type include inventories and long-term investments.

Reserve for General Cash Revolving - This reserve was established for working capital to enable the State to promptly make disbursement of moneys appropriated prior to the receipt of revenues from taxes imposed by law.

Reserve for Oil Shale Purposes - This reserve was established to segregate a portion of fund balance legally restricted for appropriation by the legislature.

Restricted for Agency Appropriation — These reserves are used to segregate a portion of fund balance appropriated prior to the end of the fiscal year or net receipts legally restricted for use by an agency. Because of extenuating circumstances, agencies have been unable to expend their appropriation and executive action has been taken to roll-forward a specific appropriation into the next year.

Reserve for Old Age Pension Stabilization - This reserve was established to segregate a portion of fund balance legally restricted for the payment of old age pension.

Reserve for Other Specific Purposes - These reserves are used to indicate that a portion of fund balance is restricted as to the use of the assets represented. The restriction can be from the donor in the case of fiduciary funds or in the payment of debt principal by debt service funds. It is also possible for the fund balance of a certain fund like higher education's current restricted fund to be fully reserved. A portion of the lottery enterprise fund balance is reserved for statutory distributions.

Reserve for Estimated Benefit Payments - These reserves were established in conjunction with the providing of additional medical, injury or vocational rehabilitation benefits over and above those provided by Workmen's Compensation insurers.
