COLORADO DEPARTMENT OF AGRICULTURE  
FISCAL YEAR 1994-95

# COLORADO AGRICULTURAL STATISTICS DISTRICTS

ASD by Number: Northwest and Mountains = 10; Northeast = 20; East Central = 60; Southwest = 70; San Luis Valley = 80; Southeast = 90

## COLORADO

The Centennial State, admitted to the Union in 1876, is the eighth largest state in area and has the highest average elevation. The highest point is at Mount Elbert, 14,433 feet above sea level, one of the 53 "fourteeners" rising above 14,000 feet. The lowest elevation is 3,350 feet in extreme eastern Prowers County.

Approximate Land Area: 66.4 Million Acres \*  
 Approximate Cropland Area: 10.9 Million Acres \*  
 Approximate Irrigated Area: 3.2 Million Acres \*  
 Number of Farms and Ranches (1994): 25,300  
 Land in Farms and Ranches (1994): 32.7 Million Acres  
 Average Size of Farm and Ranch (1994): 1,292 Acres

### Farms by Type \*

82% Individual  
 11% Partnership  
 6% Corporate  
 1% Other

### Farms By Tenure \*

54% Full Owners  
 32% Part Owners  
 14% Tenants

### Farms By Class \*

59% Livestock & Poultry  
 41% Crops

\* 1992 Federal Census of Agriculture

### Farm Marketing Receipts (1993):

|                                  |           |                              |
|----------------------------------|-----------|------------------------------|
| Livestock & Livestock Products:  | \$2,878.6 | Million (70.5% of the total) |
| Field, Fruit, & Vegetable Crops: | \$1,204.0 | Million (29.5% of the total) |

\$4,082.6 Million

July, 1995

Dear Friends,

It is with pleasure that I present the 1995 edition of **Colorado Agricultural Statistics**. This book is a joint effort on the part of the Colorado Department of Agriculture and the Colorado Agricultural Statistics Service, a relationship that has served the agricultural industry in Colorado well.

Our industry places great importance on reliable and consistent statistics. Accurate statistics about agriculture are an important tool for agribusiness and provide the foundation for informed decisions by public agencies. The availability of this information about agriculture can help attract agricultural processing companies and can create new and better markets for producers. Other data show us production yield and price trends for better business analysis and for income and economic forecasting.

Again this year the Colorado Department of Agriculture is publishing our annual report on the back pages of this book. I am proud of the accomplishments of this department, and by reading our report, you can better understand the duties and functions of the Colorado Department of Agriculture.

It is the farmers and ranchers of Colorado who are the real authors of this report. It is their productivity and skills that create this state's agricultural bounty, and this document is a reflection of their contribution to our state's economy. Special thanks go to the Colorado Beef Council and the beef producers of Colorado who provided financial support for the cover.

Sincerely,

Thomas A. Kourlis  
Commissioner

# TABLE OF CONTENTS

## 1994 CROP REVIEW

The combined value of production for small grain, hay, and late season row crops (excluding sugar beets) produced in 1994 totaled \$1,209.1 million compared with the comparable value of \$1,291.3 million for the 1993 crops. Colorado producers had a larger output in 1994 than they did in 1993 for corn for grain, sorghum for grain, spring wheat, oats, rye, sugar beets, dry beans, all sunflowers, alfalfa hay, and all potatoes. The production from all other crops was lower than the previous year.

All hay was the state's leading crop in terms of the value of production by contributing \$367.9 million or 30.4 percent of the total value from all field crops. The 1994 crop of 4.06 million tons was 3 percent below the 4.19 million tons produced in 1993 mostly the result of fewer acres harvested. Slightly higher alfalfa yields offset the decline in acres harvested keeping production virtually unchanged. The harvested acreage of all other hay was down 11 percent, and with lower yields, production declined 19 percent. Hay prices averaged much higher than a year earlier for each type of hay.

Corn for grain moved up to become the second most important crop in the state in terms of the value of production. Corn for grain contributed \$320.4 million or 26.5 percent of the total value from all field crops. The 1994 crop of 133.5 million bushels was 25 percent more than the 106.8 million bushels produced in 1993 as a result of a much higher yield per acre. Despite hot, dry weather early in the pollination stages the moist weather later in the season seemed to favor higher yields. The average yield of 150 bushels per acre was 30 bushels more than the 1993 average. Corn silage production was down 3 percent from 1993 to 2.04 million tons with a decrease in acreage harvested. Yields remained the same as a year earlier at 21.0 tons per acre.

The 79.73 million bushels of all wheat produced in 1994 was valued at \$278.6 million, making it the third most important crop in the state in terms of value. Winter wheat production, at 76.5 million bushels on 2.55 million acres harvested, was 19 percent lower than the previous year, the result of lower yields. The 1994 average of 30.0 bushels per acre was 7 bushels per acre below the 1993 average. The crop broke dormancy in mostly good condition. Hot, dry conditions in May and June lowered the condition ratings slightly and stressed the crop. There were some areas of hail damage, but the general lack of moisture and a faster maturing wheat crop decreased yields. Spring wheat production increased 23 percent from 1993 to 3.23 million bushels as a 27 percent increase in acreage harvested offset slightly lower per acre yields.

The value of production of all potatoes totaled \$89.6 million in 1994, down 47 percent from the previous year. Lower prices more than offset the 3 percent increase in all potato production. Fall potato production was up 2 percent to 25.80 million cwt as growers harvested more acres. Summer potato production, at 2.93 million cwt, was up 15 percent. Yields for summer potatoes increased only slightly from last year, while fall potato yields were unchanged at 350 cwt per acre.

Dry bean production increased 26 percent from a year earlier to 3.28 million cwt; however, prices declined 61 percent resulting in a 23 percent decrease in total value to \$54.45 million in 1994. Higher yields and more acres harvested offset the large price drop. While no value has yet been determined for the 1994 crop of sugar beets, the 946 thousand tons of beets produced was up 2 percent from a year earlier. Producers harvested more acres than they did in 1993 but per acre yields declined 5 percent.

Barley production declined 2 percent from 1993 to 7.47 million bushels in 1994 as growers harvested fewer acres but had higher yields. The 1994 crop value of \$20.17 million was down from \$22.42 million for the 1993 crop. Sorghum for grain production increased 7 percent from 1993 to 7.65 million bushels. No change in harvested acres combined with lower prices, pulled total value to \$15.45 million, down 13 percent from 1993. Oats production for 1994 was 1 percent above 1993 but, only slight increases in prices pushed the total value to \$2.66 million, slightly higher than last year.

The 1994 output of sunflowers was valued at \$10.86 million compared with \$11.72 million for the 1993 crop. Sunflower production increased 8 percent from 1993 to 96.3 million pounds in 1994. Of the 96.3 million pounds harvested, 69.0 million pounds was from oil varieties and 27.3 million pounds was from non-oil varieties. Growers increased the acreage harvested of oil varieties by 15,000 acres from 1993 to 69,000 acres in 1994 while the acreage of non-oil varieties increased 3,000 acres to 26,000 acres. Per acre yields declined for each type.

Winter wheat seedings for the 1995 crop at 2.8 million acres were down 3 percent from the 2.9 million acres seeded for the 1994 crop. Soil moisture conditions were dry for early seedings and the crop had a tough start. Some reseeded took place as the hot, dry weather combined with the intermittent rains caused crusting of the soil. A late April freeze damaged some fields in the extreme southeastern part of the State. Since late April, crop development has been slowed by cool, wet weather throughout May but overall condition is mostly good.

## 1994 COLORADO WEATHER SUMMARY IN BRIEF

**January** - Some of the normal ingredients of January such as strong winds, periods of snow, and sub-zero temperatures were present. However, most of the temperatures were much milder than normal, sub-zero episodes were few and brief, snows were mostly light, and temperatures were usually warm when the winds were strong. Temperatures ended up warmer than average for the month. Precipitation was less than normal over the mountains and Western Slope.

**February** - A few episodes of heavy snow in the mountains helped reverse the dry weather pattern that began in late November. This was also the first month since November with below average temperatures over most of the state. There was more cloudiness than usual, and a variety of changeable weather. Strong cold fronts, lightning and thunder, dense fog, freezing drizzle, and a few potent wind storms also occurred.

**March** - Usually wild and stormy, March was pretty mild this year. Temperatures were more consistent than usual with many warm days and only a few large day-to-day changes. There were fewer and smaller storms than usual and little disruption to travel. Little snow fell in the mountains until the last week. Temperatures ended up well above average and precipitation was below average except for an area just east of the Continental Divide.

**April** - Lively weather, usual for April, was no exception this year. Widespread cold rains and snows early and late in the month were separated by several days of summerlike weather. A week of cold and snowy weather at the end of the month added substantially to the mountain snowpack and improved soil moisture conditions at lower elevations. Overall, most of the state had above average precipitation and temperatures for the month.

**May** - A few significant storms took aim on the state in May. Most locations heard thunder on 5 to 10 days during the month but many storms produced little moisture. Significant rains were limited to south-central areas. Warmer than average temperatures persisted most of the month. Winds at mid-month contributed to greater than normal evaporation rates.

**June** - A combination of abnormally hot and dry weather accompanied by periods of strong winds rapidly depleted soil moisture, melted remaining mountain snowpack, and drove irrigation requirements up. Wet weather at mid-month provided only temporary relief. Overall, temperatures averaged well above average and most areas were also drier than average for the month.

**July** - Typically the wettest month of the year for many southern and western areas, this was the second year in a row that westerly winds delayed the onset of the Southwest Monsoon weather pattern. Most of the state ended up drier than average. Temperatures were hotter than average west of the mountains but were a bit cooler than average over the Eastern Plains as several significant summer cold fronts interrupted the heat.

**August** - The extreme dryness of recent months was temporarily ended this month. Monsoon moisture and humidity from the east encouraged daily afternoon and evening thunderstorms, especially in the southeast. In other areas, precipitation was more spotty. The northeast missed most of the storms and ended up much drier than average. Practically all areas of the state continued to have above average temperatures.

**September** - Four storm systems brought significant rainfall to western areas, but little moisture fell east of the mountains. A compact storm system with very cold arctic air brought the first snow storm to parts of the Front Range on the 21st. Between the storms, unseasonably warm temperatures were again the rule for the 5th month in a row. Even then, the growing season ended one to two weeks earlier than usual in the east with a hard regional freeze on the 22nd.

**October** - There was much more lightning, thunder and hail than normally expected, but there were also prolonged dry and sunny periods. Through three major storm episodes, much of the state ended up with more precipitation than normal. Temperatures were widely varied, but most areas were near or slightly cooler than average for the month.

**November** - Very strong early winter jet stream winds aloft kept weather systems on the move. Numerous storm systems, several accompanied by deep low pressure centers, crossed the region. Heavy precipitation and large variations in temperature were noted. Overall, the state ended up with more cloudiness and precipitation than normal and temperatures were generally cooler than average.

**December** - Storm systems during the first half of the month delivered some precipitation. Then, two consecutive weeks of dry and unseasonably mild weather and extremely warm temperatures sent people outdoors hiking and biking instead of skiing. Finally, a surge of sharply colder temperatures and fluffy snow at the end of the month was a reminder that winter was still around. Overall, the month ended up warmer than average and drier than normal in most areas.

A map of Colorado showing its 64 counties. The counties are labeled with their names. Some counties are shaded with different patterns: diagonal lines (e.g., Weld, Morgan, Washington, Adams, Arapahoe, Douglas, Elbert, Lincoln, El Paso, Teller, Fremont, Pueblo, Crowley, Otero, Bent, Prowers, Broomfield, Adams, Arapahoe, Douglas, Elbert, Lincoln, El Paso, Teller, Fremont, Pueblo, Crowley, Otero, Bent, Prowers, Broomfield), dots (e.g., Moffat, Routt, Jackson, Larimer, Morgan, Washington, Adams, Arapahoe, Douglas, Elbert, Lincoln, El Paso, Teller, Fremont, Pueblo, Crowley, Otero, Bent, Prowers, Broomfield), and a cross-hatch pattern (e.g., Morgan, Washington, Adams, Arapahoe, Douglas, Elbert, Lincoln, El Paso, Teller, Fremont, Pueblo, Crowley, Otero, Bent, Prowers, Broomfield). Numbers 1 through 5 are placed in specific counties: 1 in Kit Carson, 2 in Washington, 3 in Cheyenne, 4 in Broomfield, and 5 in Broomfield.

Counties labeled: MOFFAT, ROUTT, JACKSON, LARIMER, WELD, LOGAN, SEDGWICK, PHILLIPS, RIO BLANCO, GARFIELD, EAGLE, SUMMIT, CLEAR CREEK, BOULDER, GRAND, JEFFERSON, ADAMS, MORGAN, WASHINGTON, YUMA, ARAPAHOE, DOUGLAS, ELBERT, LINCOLN, KIT CARSON, CHEYENNE, KODAK, PROWERS, BENT, OTERO, CROWLEY, PUEBLO, EL PASO, TELLER, FREMONT, CHAFFEE, PARK, LAKE, PITKIN, GUNNISON, MONTROSE, DELTA, MESA, SAN MIGUEL, DURAY, HINSOALE, SAGUACHE, CUSTER, HUEFANO, ALAMOSA, RIO GRANDE, MINERAL, ARCHULETA, CONEJOS, COSTILLA, LAS ANIMAS, MONTEZUMA, SAN JUAN, GILDERES.

Numbers on map: 1, 2, 3, 4, 5.

# COLORADO FRUIT CROPS - 1994

## VALUE OF PRODUCTION BY CROP (\$ 1,000)

1994 Value and Percent of Total

## FRUIT CROPS - 1994

Colorado fruit growers had a lower production in 1994 for each fruit except peaches. Total production of the state's four major fruit crops in 1994 was 114.9 million pounds, down 6 percent from the 121.6 million pounds produced in 1993. The total value of the utilized production from the 1994 crops was \$21.5 million, up 5 percent from \$20.4 million a year earlier as a higher value per unit was obtained for each fruit except pears.

**Apple** growers had a mostly favorable growing season although the 85.0 million pounds produced in 1994 was 8 percent below the 1993 crop of 92.0 million pounds. The average price received for all grades was 17.2 cents per pound compared with 14.7 cents per pound in 1993. The total value of the 1994 crop, at \$14.3 million, was 8 percent higher than the \$13.2 million received for the 1993 crop. Apples represented 66 percent of the total value from the four fruit crops. Apples are produced in a larger production area than the other fruits and the total production is not usually affected as much by spring freezes.

**Peach** production for 1994, at 20.0 million pounds, was up 11 percent from the previous year and marked the third year in a row that producers had not seen their crop reduced by spring freezes.

Utilized production was 18.0 million pounds, 6 percent above 1993. The total value of the utilized crop in 1994 was \$5.7 million, up 9 percent from \$5.3 million the previous year. The value of the peach production represented 27 percent of the total value from the four fruit crops.

**Pear** production in 1994 dropped 15 percent from the previous year to 4,200 tons. Growers received an average price of \$268 per ton for the latest crop compared with \$348 per ton for the 1993 output. The total value of the utilized production was \$1.1 million for the 1994 crop, down 34 percent from the \$1.7 realized from the 1993 crop. This was a result of the smaller utilized production and the lower per unit prices. Pears represented 5 percent of the total value received from the four fruit crops..

**Tart cherry** production totaled 1.5 million pounds in 1994, down 6 percent from 1.6 million pounds produced in 1993. However, the utilized quantity of 1.1 million pounds was 22 percent higher than the utilized amount from the 1993 crop. In addition, the per unit price received for the 1994 crop, at 35.5 cents per pound, was up from 24.9 cents received for the 1993 crop. The total value of the utilized production, at \$390,000, was 74 percent above the \$224,000 received for the 1993 crop.

<sup>1/</sup> In certain years, production includes some quantities not harvested because of economic conditions which are excluded in computing values.

<sup>2/</sup> No significant commercial production or value in 1989 due to frost.

# COLORADO VEGETABLE CROPS - 1994

## VALUE OF PRODUCTION BY CROP (\$ 1,000)

1994 Value and Percent of Total

### VEGETABLE CROPS - 1994

Vegetable producers in Colorado harvested 10.4 million cwt of fresh market and processing crops during 1994 which had a total value of \$111.6 million. Acreage was up from 1993; however, value decreased 25 percent. The 10.4 million includes only those vegetable crops for which acreage and production estimates are prepared. Numerous other vegetable crops are produced in the state but are not surveyed for acreage or production data.

Production of **dry storage onions** in 1994 totaled 6.1 million cwt, up 7 percent from the previous year. This represented 62 percent of the total production of 10.4 million cwt from the nine vegetable crops. The harvested area increased 13 percent to 17,500 acres while the average yield of 350 cwt per acre was 5 percent below the 1993 average. The quantity of onions expected to be marketed had an estimated value of \$64.6 million compared with \$102 million from the 1993 crop, down 37 percent. The 1994 value represented 58 percent of the total value from the nine crops.

**Carrot** production was second in terms of value of production and total production. Production increased 11 percent from the previous year, to 1.2 million cwt, wholly the result of increased acreage. The total value of the 1994 crop, at \$11.8 million, increased 29 percent from 1993. Prices increased 16 percent from last year to \$10.00 per cwt. Carrots represented 11 percent of the total value and 11 percent of the total production.

**Spinach** was the third highest value vegetable crop produced in the state during 1994, accounting for 8 percent of the total value. Production was down 17 percent from the previous year to 289,000 cwt as a 3 percent decrease in acres harvested and fewer cuttings per acre reduced production. Prices increased slightly to \$30 per cwt. Spinach represented 3 percent of the total production of the nine crops.

**Sweet corn** accounted for 6.5 percent of the total value and 6.5 percent of the total production while **lettuce** accounted for 6 percent of the total value and 7 percent of the production. Lettuce production was down 28 percent to 756,000 cwt as the harvested area decreased by 900 acres. Prices were much lower resulting in a 40 percent decrease in total value to \$6.7 million.

**Cabbage** production from 1,700 acres harvested totaled 816,000 cwt in 1994 and had a total value of \$6.4 million. Value was up 31 percent due to an increase in acreage and yield. **Cucumbers for pickles** production in 1994 was 8,640 tons, down 10 percent from 1993. An increase in yields slightly offset lower harvested acres.

**Cantaloupe** production totaled 324,000 cwt from 1,800 acres harvested and had a total value of \$4,147,000. **Processing tomatoes** had a value of \$352,000 in 1994. Cantaloupe yields increased 20 percent, while tomato yields increased by 51 percent, contributing to the increased production and value.

1/ The total covered growing area of 10,605,000 square feet consisted of the following:

385,000 square feet of glass; 8,050,000 square feet of fiberglass and other rigid greenhouses;

1,975,000 square feet of film plastic (single/double) greenhouses; 195,000 square feet of shade and temporary cover.

In addition, plants were produced on 42 acres of open ground.

2/ For potted plants, price represents a weighted average for plants sold in pots less than 5 inches and in pots 5 inches or more.

3/ Total includes Standard and Pompon Chrysanthemums, Gladioli, and Sweetheart Roses which are not published separately.

4/ Includes Kalanchoes which are not published separately.

5/ Includes Potted Impatiens which are not published separately.

6/ Value based on equivalent wholesale value of all sales for all crops except potted foliage plants which are based on net value of sales.

## COLORADO FARM INCOME

The gross farm income for Colorado's 25,500 farms in operation during 1993 totaled \$4.69 billion, up 11 percent from \$4.23 billion generated from the same number of farms operating during 1992. Production expenses increased 7 percent to \$3.69 billion. Net farm income, at \$996.1 million for 1993, was up 30 percent from \$765.4 million the previous year.

Cash receipts from farm marketings were up 7 percent from 1992 to \$4.08 billion in 1993. Receipts from the sale of crops increased 14 percent to \$1.20 billion while receipts from the sale of livestock and livestock products increased 5 percent to \$2.88 billion.

Government payments totaled \$250.3 million in 1993, up 23 percent from \$203.2 million the previous year. Other farm income was up 17 percent to \$167.9 million compared with \$144.0 million in 1992. The value of non cash income, at \$120.6 million during 1993, increased 2 percent from \$118.2 million for 1992. The value of home consumption, at \$6.9 million, was 3 percent below the previous year while the rental value of operator and hired labor dwellings increased 2 percent from \$111.1 million in 1992 to \$113.7 million in 1993. The value of the inventory adjustment was a positive \$67.4 million compared with a negative \$41.2 million a year earlier.

<sup>1/</sup> Includes operator households.

Farm production expenses totaled \$3.69 billion in 1993 compared with \$3.46 billion a year earlier. The farm origin components of feed, livestock and poultry, and seed purchased totaled \$1.85 billion, up 7 percent from \$1.74 billion the previous year. Those items represented 50 percent of all production expenses. Expenditures for manufactured inputs such as fertilizer, pesticides, fuel and oil, and electricity, at \$259.0 million, were up 1 percent from the \$255.8 million spent for those items in 1992. Other expenditures such as those for repair and maintenance, machine hire and custom work, and numerous other miscellaneous expenses totaled \$705.4 million compared with \$611.7 million the previous year. Interest expenses were down 14 percent to \$211.9 million. Contract and hired labor expenses, at \$203.2 million, were 21 percent higher than a year earlier.

Colorado's farm balance sheet continued to improve for the third consecutive year. Total farm assets were up 9 percent to \$17.28 billion while total farm debt increased only 4 percent to \$2.90 billion. The largest asset item, real estate, was valued at \$12.40 billion and was 10 percent higher than a year earlier. This item represented 72 percent of the total farm asset value. The value of livestock and poultry, at \$2.08 billion, was up 1 percent from \$2.06 billion in 1992. The value of purchased inputs increased 3 percent from the previous year to \$77.0 million and financial assets increased 15 percent to \$954.1 million. The value of machinery and motor vehicles increased 1 percent, from \$1.26 billion in 1992 to \$1.28 billion in 1993. The value of crops, at \$482.3 million at the end of 1993, was 35 percent higher than the value of \$356.2 million at the end of 1992.

Total farm debt was up 4 percent to \$2.90 billion with real estate and non-real estate debt increasing 2 percent and 7 percent, respectively. Real estate debt increased to \$1.51 billion from \$1.48 billion in 1992. Non-real estate debt increased from \$1.30 billion in 1992 to \$1.39 billion for 1993. Overall farm equity increased 10 percent to \$14.38 billion. The debt/equity ratio declined to 20.2 compared with 21.4 the previous year and the debt/assets ratio of 16.8 was down from 17.6 a year earlier.

Livestock and livestock products continued to be the leading contributor to Colorado's cash receipts with a total value of \$2.88 billion in 1993. This was up 5 percent from \$2.75 billion the previous year and represented 70.5 percent of the total cash receipts from all commodities, at \$4.08 billion. Receipts from cattle and calves totaled \$2.42 billion in 1993 which accounted for 84 percent of the total livestock receipts and 59.3 percent of the total cash receipts from all commodities. Receipts from crops totaled \$1.20 billion in 1993, up 14 percent from the previous year, representing 29.5 percent of the total. Wheat was the state's second leading contributor to cash receipts with \$265.8 million followed by corn with \$230.0 million. The value of milk sold wholesale and retailed directly by producers totaled \$189.3 million and remained the fourth leading contributor to cash receipts. Hay was fifth with \$160.6 million; potatoes ranked sixth with \$106.3 million; onions were seventh with \$99.3 million; hogs were eighth with \$93.3 million; dry beans were ninth with \$68.4 million; and other poultry (mostly turkeys) was tenth with \$59.2 million.

\* Less than 0.05 percent.

Note: Reprinted from **Economic Indicators of the Farm Sector**, January 1995, USDA Economic Research Service. Cash receipt data reflect income derived from the sale of agricultural commodities during a calendar year for only that portion of the commodity that is sold.

## PRICES RECEIVED BY FARMERS

Prices received by farmers and ranchers provide a basis for calculating the income from the Agricultural Sector as part of the National Income Accounts. These data are also extensively used to analyze past and current marketing patterns and to make current and future marketing decisions. Prices received for major farm commodities are used in computing the Index of Prices Received by Farmers, an important indicator of the economic environment of the nation's agricultural producers.

### Marketing year average prices, by commodity, Colorado, 1986-94

## THE COLORADO CATTLE INDUSTRY

Colorado's cattle industry is the state's largest single agricultural industry. Cash receipts from the sale of cattle and calves in 1993, at \$2.4 billion, represented 59 percent of the cash receipts from all agricultural commodities. Colorado ranks 16th in the nation in the number of beef cows, is the 4th largest cattle feeding state in terms of fed cattle marketings and ranks 4th in beef production. The Colorado cattle industry has had a long, colorful and progressive history. Colorado's range cattle industry got its start during the early to mid-1800's as Spanish-Americans migrated into southern Colorado Territory with small herds of cattle. The gold rush of the 1850's attracted hordes of new residents to Colorado Territory, with many bringing teams of oxen, milk cows and a few beef animals from their eastern and mid-western origins. The legendary trail drives from Texas began around 1860 and by 1865 the Colorado cattle "boom" was underway as a few men of vision saw a budding opportunity to utilize the vast expanses of prairies, foothills and mountain meadows for grazing cattle.

The Kansas Pacific Railroad reached Denver in 1870, opening up new markets in the mid-west and east. The first government statistics on the Colorado cattle industry commenced in 1867 and showed a total of 147,000 head of cattle and calves in the territory on January 1, 1867. This is the same year the nation's oldest livestock organization, then named the Colorado Stock Growers Association, was founded. By 1872, when regular rail shipments east made Denver a major cattle market hub, the Colorado herd had expanded to 355,000 head. The 500,000 head mark was passed in 1876 (the year Colorado became a state) and reached 1,141,000 head on January 1, 1884. By the turn of the century, cattle numbers reached 1,250,000 head and the state became home to a number of very large ranches -- some ranging cattle on over 2 million acres. It took just 17 years to reach the first million head cattle inventory, but 68 years to reach the second million head level (2,098,000 head on 01/01/52). The third million head level was reached in just 15 short years (3,017,000 head on 01/01/67).

Today, in addition to its multi-billion dollar economic impact, Colorado's citizens are realizing that Colorado's cattle industry contributes much more to our state than jobs and dollars. Because cattle ranching is a land-dependent industry requiring vast amounts of open space, the cattle industry also provides Colorado with scenic open space, abundant wildlife populations and habitat, and a rich and stable cultural heritage. The daily efforts which ranching families make to maintain healthy rangelands and water supplies, also benefits a myriad of wildlife species from big game herds to songbirds.

Livestock feeding started as an industry around the turn of the century, with the introduction of irrigation and the raising of alfalfa and sugar beets. By 1930, cattle feeding had become a major industry in Colorado's livestock economy. This segment of the industry grew rapidly as pioneer cattle feeders developed technology to efficiently feed thousands of cattle at one time in a single location. The Colorado Cattle Feeders Association was founded in 1955 to concentrate on issues facing this specialized segment of the industry. On January 1, 1927 an estimated 150,000 head of cattle were being fattened in Colorado feedlots and the industry grew steadily until 1960. The next 12 years saw a rapid increase in cattle feeding and feedlot inventories reached 1,000,000 on January 1, 1972. Colorado is now the nation's fourth largest producer of feedlot cattle and today nearly one-third of the state's inventory of cattle and calves is located in 290 feedlots.

The Colorado Beef Council was formed in 1965 to provide research and promote the marketing and consumption of Colorado's largest dollar volume commodity. Today the three major cattle organizations -- Colorado Cattlemen's Association, Colorado Cattle Feeders Association and Colorado Beef Council represent nearly 15,000 producers of Colorado beef.

## 1994 LIVESTOCK REVIEW

**SUMMARY** - Colorado farmers and ranchers had 2 percent fewer cattle and calves on hand as of January 1, 1995 and 16 percent fewer sheep and lambs than they did one year earlier. The December 1, 1994 inventory of all hogs and pigs was 11 percent larger than a year earlier while the December 1, 1994 inventory of all chickens was down 3 percent. Colorado ranks 10th in the number of cattle and calves, 4th in the number of sheep and lambs, 20th in the number of all hogs and pigs, and 26th in the number of all chickens. The state also ranks as the 4th largest cattle feeder with marketings of more than two million head of fed cattle annually in each of the past 13 years. Colorado ranks 3rd in the number of market sheep and lambs and more than one million head of sheep and lambs have been slaughtered in the state in each of the last 15 years. This is the second year in a row that the annual hog slaughter has been above 50,000 head.

The state's dairy industry has been very stable for more than 20 years, with an annual average number of milk cows fluctuating between 70 and 81 thousand head. The number of bee colonies declined last year to 45 thousand colonies. They produced more than three million pounds of honey in each of the last nine years. The state's trout producers have sold about two million fish of various sizes each year since estimates were begun in 1989.

The total inventory value of the cattle, sheep, hogs, and chickens on hand at the beginning of the year (using the January 1 and December 1 reference dates) was \$2.00 billion, down 7 percent from the comparable value of \$2.14 billion one year earlier. Total inventories for hogs increased while those for sheep, cattle and chickens declined. The value per head decreased for cattle, hogs and sheep but increased for chickens.

Pasture and range feed conditions were rated mostly good at the beginning of the 1994 grazing season. During May, temperatures were generally at or below normal and adequate rainfall improved the June 1 condition rating to good to excellent. Below normal temperatures and rainfall during June improved the condition rating to excellent all month. In the first half of July, rainfall declined and above normal temperatures with windy conditions dropped the condition rating to good. During the last half of the month, severe weather with numerous hail storms struck many areas of the state. By August 1, the condition ratings declined to fair. The rating improved to good by the end of the month. Ratings were mostly good during September but declined to fair to good in October because of very little moisture. By November, the condition rating was mostly poor to fair because of poor precipitation during the fall.

**CATTLE AND CALVES** - The January 1, 1995 inventory of all cattle and calves decreased 2 percent from a year earlier to 2.95 million head. The number of cattle and calves in feedlots being fed for the slaughter market decreased 2 percent to 990 thousand head and accounted for 34 percent of the state's total inventory. During 1994, there were 290 feedlots in operation in Colorado. Those feedlots marketed 2.37 million head of fed cattle for slaughter compared with 2.34 million marketed from 295 lots in 1993. The 18 largest feedlots marketed 68 percent of the annual total in 1994. The number of beef cows, at 817,000 head was virtually unchanged from the previous year while the number of milk cows increased 3,000 head from 1994 to 83,000 head on hand at the beginning of 1995.

There were 850,000 heifers 500 pounds and over on hand at the beginning of 1995, up 4 percent from the 820,000 head on hand at the beginning of 1994. Of that total, 155,000 were being kept for beef cow replacement (down 3 percent from last year) and 45,000 head were being kept for milk cow replacement (up 5,000 from 1994). The remaining 650,000 were other heifers (up 5 percent from the previous year) of which 435,000 were in feedlots for the slaughter market. The January 1, 1995 inventory also included 920,000 head of steers weighing 500 pounds or more (down 4 percent from the previous year) of which 545,000 were in feedlots. The number of bulls weighing 500 pounds or more was unchanged from the previous year at 50,000 head. The number of calves (steers, heifers, and bulls weighing under 500 pounds) was down 15 percent from the previous year to 230,000 head. The 1994 calf crop in Colorado, at 860,000, was 2 percent larger than the 1993 crop of 840,000 head.

Milk production during 1994 was up 7 percent from a year earlier to a new record high of 1.56 billion pounds. This marked the 10th consecutive year of record production. The annual average number of milk cows on hand increased by 1,000 head to 81,000 thousand for 1994. Producers obtained a record high production of 19,296 pounds per cow in 1994.

The total inventory value of all cattle and calves in Colorado as of January 1, 1995 was estimated at \$1.92 billion, 6 percent less than the \$2.04 billion inventory value for January 1, 1994. The average value of \$650 per head represented a decrease of \$30 per head from the previous year. The number of operations with cattle at any time during 1994 remained the same as the previous year at 13,000. The number of beef cow operations was also unchanged from a year earlier at 10,500 but the number of milk cow operations declined 200 from 1993 to 1,100 for 1994.

**SHEEP AND LAMBS** - The January 1, 1995 inventory of all sheep and lambs in Colorado declined 16 percent from the previous year to a record low 545,000 head. The classification of "Sheep on Feed" was broadened in 1995 to "Market Sheep and Lambs." This change will show not only the sheep and lambs in feedlots but also the number of sheep and lambs intended for shipment to market but not currently on feed. The stock sheep category was changed to "Total Breeding Sheep and Lambs." Sheep inventory estimates prior to 1995 did not include new crop lambs. Beginning with the 1995 report, new crop lambs are included in the inventory.

The total breeding sheep and lamb inventory as of January 1, 1995 was down 22 percent to 250,000 while the number of market sheep and lambs declined 10 percent to 295,000 head. The number of ewes one year old and older, at 210,000, was down 22 percent from January 1, 1994 and the number of rams one year old and older, at 7,000 head, also declined 22 percent. The number of replacement lambs less than one year of age declined 20 percent from a year earlier to 33,000 head. The 1994 lamb crop of 255,000 head was down 20 percent from the 320,000 head born in 1993 and was 27 percent below the 350,000 head born in 1992.

On January 1, 1995, the 295,000 head of market sheep and lambs consisted of 5,000 sheep and 290,000 lambs. The 290,000 head of market lambs were estimated to be in the following weight groups: 5,000 head weighing less than 65 pounds, 35,000 head in the 65 through 84-pound category, 115,000 head in the 85 through 105 pound category, and 135,000 head weighing more than 105 pounds.

The January 1, 1995 inventory value of all sheep and lambs in Colorado was estimated at \$40.33 million, down 19 percent from a year earlier. The average value of \$74.00 per head was \$3.00 lower than the previous year. The decline in average value and the 16 percent reduction in total inventory combined to lower the overall inventory value. The number of operations in the state with sheep continued to decline and was at 1,700 for 1994 compared with 1,800 the previous year.

**HOGS AND PIGS** - The December 1, 1994 inventory of all hogs and pigs in Colorado was 500,000 head. This was an 11 percent increase over the December 1, 1993 level and the largest inventory number since 1944. Except for 1992 when the inventory was the same as the previous year, inventories have increased each year since 1987. The breeding hog inventory increased 47 percent from a year earlier to 110,000 head. The market hog inventory of 390,000 head increased 4 percent. The state's total pig crop for 1994, at 1,148,000, was up 31 percent from the 1993 pig crop of 877,000 head.

The December 1993 - May 1994 pig crop was 25 percent above the previous year and the June -November 1994 pig crop was up 37 percent. The number of sows farrowed increased 25 percent from the previous year in the first half of the period and increased 38 percent from the previous year during the last half of the 1994 period.

The December 1, 1994 inventory value of all hogs and pigs was placed at \$30.00 million, 22 percent lower than a year earlier. The average value, at \$60.00 per head, declined \$25.00 per head from a year earlier. The number of operations with hogs during 1994 was unchanged from a year earlier at 1,600.

**CHICKENS AND EGGS** - The all chicken inventory in Colorado as of December 1, 1994 totaled 3.93 million birds, down 3 percent from the 4.04 million on hand one year earlier. The number of hens and pullets of laying age declined 10 percent to 2.95 million. Of that total, 1.40 million were hens (down 17 percent) and 1.56 million were laying pullets (down 3 percent). The total inventory also included 385 thousand pullets 3 months or older but not yet of laying age, 529 thousand pullets under 3 months of age, and 62 thousand other chickens. During the period from December 1, 1993 through November 30, 1994, the state's laying flocks produced 778 million eggs, down 7 percent from the 837 million eggs produced a year earlier.

The total inventory value of all chickens was \$8.25 million, up 2 percent from a year earlier as a 5 percent increase in value more than offset the smaller inventory. The average value per bird was \$2.10, up 10 cents from the December 1, 1993 average.

**BEEES AND HONEY** - Honey production in Colorado during 1994 totaled 3.42 million pounds, down 12 percent from 1993. The number of colonies decreased eight thousand from the previous year to 45,000. The yield per colony increased from 73 pounds in 1993 to 76 pounds in 1994. The 1994 honey crop was valued at \$1.95 million compared with \$2.24 million for the 1993 crop. Producers received an average of 57 cents per pound for honey sold in 1994, down 1 cent from a year earlier. Producer stocks of honey on hand as of December 15, 1993 totaled 1.81 million pounds, 56 percent higher than a year earlier.

**TROUT** - There were 27 operations in Colorado during 1994 which had trout sales of \$2.28 million compared with 30 operations with sales of \$2.13 million in 1993. Producers marketed 1.03 million pounds of foodsize, stocker, and fingerling fish during 1994 and received an average price of \$2.21 per pound. That compares with 910 thousand pounds sold in 1993 at an average price of \$2.35 per pound.

<sup>1/</sup> Sales directly to consumers by producers. Also includes milk produced by institutional herds.

<sup>2/</sup> Cash receipts divided by milk or milkfat represented in combined marketings.

<sup>3/</sup> Valued at average returns per 100 pounds of milk listed under combined marketings of milk and cream.

<sup>4/</sup> From marketings of milk and cream plus value of milk used for home consumption and farm-churned butter.

# 1992 FEDERAL CENSUS OF AGRICULTURE

The data on the next several pages presents some of the state highlights from the 1992 Federal Census of Agriculture. The Federal Census of Agriculture is conducted every 5 years by the Agricultural Division of the U. S. Department of Commerce while the data on which most of the other information contained in this bulletin is collected annually by the U. S. Department of Agriculture's National Agricultural Statistics Service (NASS)--locally known within Colorado as the Colorado Agricultural Statistics Service (CASS).

Data from the Census is used in combination with data from CASS to prepare state and/or county level information on field crops, fruits, vegetables and livestock. The county livestock data shown is Census data only and no adjustments are made to individual counties or the state level to be in agreement with the CASS state totals presented elsewhere in the bulletin. The census livestock data by county is presented only for reference purposes and for the convenience of data users that may not have access to or need the complete Census report.

# **ANNUAL REPORT**

## **COLORADO DEPARTMENT OF AGRICULTURE**

**FISCAL YEAR 1994-1995**

**The Honorable Roy Romer, Governor**

**Thomas A. Kourlis, Commissioner**

# ANNUAL REPORT OF THE COLORADO DEPARTMENT OF AGRICULTURE Fiscal Year 1993-1994

*Roy Romer, Governor*  
*Thomas A. Kourlis, Commissioner*  
*Robert G. McLavey, Deputy Commissioner*

## Introduction

The Colorado Department of Agriculture was created as a department of state government in 1949, with historical roots dating back to before the turn of the century. Currently, the department employs about 250 individuals around the state performing a wide array of services to the crop and livestock industry and Colorado consumers.

## Organization

The Colorado Agricultural Commission, a body of nine persons appointed by the Governor, serves to advise, counsel and direct the Commissioner of Agriculture, also appointed by the Governor. The commission is comprised of individuals of both political parties from agricultural districts and represents a cross section of the state's agricultural community.

The department is organized into five divisions, Animal Industry, Plant Industry, Stock Inspection, Markets, and Inspection and Consumer Services. These five divisions provide regulatory, inspection, and marketing assistance to Colorado's agricultural industry and provide valuable consumer protection services to the state's citizens.

## Office of the Commissioner

*Thomas A. Kourlis, Commissioner of Agriculture*  
*Robert G. McLavey, Deputy Commissioner*

Ongoing activities in the Commissioner's Office include the programs of the Resource Analysis Section, Public Information, Personnel, Administrative Services, and the Agricultural Commission.

Commissioner of Agriculture Thomas A. Kourlis of Craig, Colorado, was named by Governor Roy Romer in March, 1994. Mr. Kourlis is a sheep and cattle

producer and has a distinguished record of service to the sheep and wool industry as well as contributing years of time and effort on behalf of range improvement and conservation programs.

During the 1995 session of the Colorado General Assembly, a number of important bills were enacted affecting the department's programs. 1) Legislation was enacted that gives the department the ability to assess civil penalties for violations of livestock disease statutes and market orders, rather than having to seek criminal penalties through the courts; 2) a comprehensive central indexing system for liens (including agricultural liens) was adopted to replace the current Uniform Commercial Code filings; 3) mandatory peach inspection was eliminated; 4) the department was given greater latitude in funding the Cervidae Disease Fund for indemnification of owners of diseased captive wildlife; and 5) five of the department's regulatory programs underwent thorough review by the legislature and were continued: measurement standards, farm products, egg inspection, controlled atmosphere storage of apples, and processing and sale of meat.

Commissioner Kourlis undertook a new initiative to address environmental and natural resources issues that have the potential to impact the profitability and sustainability of agricultural operations in the state. The commissioner has increased the department's advocacy efforts for agriculture by adding a new staff member to represent his office and the industry in state and federal government circles where policy decisions are being made.

The fourth annual Governor's Agricultural Outlook Forum was held on February 17, 1995 at the Colorado Convention Center in Denver. The theme of this year's forum was "A 2020 Look at 1995 Agriculture: Meeting Global Food Needs and Protecting the Environment." Speakers at the forum included Dr. Wes Jackson of the Land Institute, Dr. Robert Thompson of Winrock International, Kenneth

Cook of the Environmental Working Group, Dennis Avery of the Hudson Institute, and Sara Wyant, National Affairs Editor for Farm Progress Publications. The day's program moderator was Dr. Kirvin Knox, Dean of the College of Agricultural Sciences, Colorado State University. The Forum attracted approximately 450 people from agriculture, business and academia.

In conjunction with the Governor's Agricultural Outlook Forum, Commissioner Kourlis convened a meeting of representatives of agricultural organizations and organizations closely affiliated with the agricultural industry. The meeting, called Ag Insights, was called to improve the level of communication among organizations within the industry to achieve greater success in conveying the message of the importance of ranching and farming in Colorado. Many attending this meeting agreed that the industry's image and effectiveness in legislative and public policy debates could be enhanced if issues of common concern were debated within the industry and communication of these issues could be coordinated. Two other meetings of Ag Insights were held; one meeting was called to develop a common vision for Colorado agriculture and the other to determine where common efforts could be channeled to influence the outcome of the 1995 Farm Bill.

## Colorado Agricultural Commission

The Colorado Agricultural Commission held five meetings in fiscal year 1994-95. The June meeting was held in Lamar to afford the commission the opportunity better understand agriculture in the southeast area of the state. Mr. David Ford was elected Chairman, and Mr. Dale DeJacamo was chosen to serve as Vice Chairman. Ms. Kelly Spitzer of Wiley was appointed to the Commission to fill the vacancy in Agricultural District III. Mr. Ron Clark was appointed to the Commission to serve At Large, the seat previously held by Mr. Bill Warren of Keenesburg, Mr. Harry B. Talbott of Palisade was appointed to take the seat of Mr. Tom Alvey of Hotchkiss representing Agricultural District IV, and Ms. Penny Lewis from Kremmling was appointed to the position previously held by Mr. James Parker of Rifle, also representing District IV.

In addition to the commission's recurring duties, the commission addressed several important topics including tuberculosis in domestic wildlife, fees for

fruit and vegetable inspections, oil and gas surface reclamation regulations, pest control districts.

## Resource Analysis

This two-person section analyzes key issues and trends affecting Colorado agriculture and develops and manages special programs at the direction of the Commissioner.

The section provides administrative support for the Colorado Central Filing System for liens on farm products--the only system nationwide operated by a private company. During 1994-95, section staff provided leadership in developing comprehensive legislation to improve the convenience and cost-effectiveness for filing and searching information on several types of liens. The section also staffs the Governor's Task Force on agricultural land conversion and prepares information on trends, resources, and options for preserving agriculture's land base and economic viability.

Section staff also: helped identify and fund studies to assess the impact of the Summitville mine on agriculture in the San Luis Valley; developed and managed a contract with Colorado State University to document the contribution of agriculture to Colorado's economy; helped plan and implement the 1995 Governor's Agricultural Outlook Forum; and participated in conferences and meetings on agriculture and the environment.

## Administrative Services Section

The Administrative Services Section focused on customer service as the way to improve the quality of our accounting, budgeting, purchasing, data processing, and business support services provided to our divisions and the public. A survey of Department employees asking for their evaluation of our customer services has been completed and areas targeted for quality improvement projects.

Administrative Services has continued to prioritize the implementation of the Strategic Information Management Plan designed to create a department-wide computer network in the Denver Metro area, and provided technical assistance to obtain access to Internet. Section staff programmed software for the new pet care licensing program, the Cervidae Disease revolving fund, and the phytosanitary certification program.

The Department was appropriated a \$6.5 million capital construction project for the new indoor State Fair Arena. Administrative Services has worked with the State Fair Authority to coordinate and provide the State administrative process for payment of the project costs. This project began January 1, 1994, and was completed April 1, 1995.

## **Division of Markets**

*Jim Rubingh, Division Director*

The Markets Division is responsible for developing new marketing opportunities for Colorado producers and processors as well as retaining existing markets for the full array of Colorado products. The division also develops promotional programs and materials, assists in expanding the state's food and agriculture processing industry, administers the Seal of Quality Program, and collects livestock and produce market news from around the state. The division provides staff assistance to the Colorado Agricultural Development Authority.

## **Marketing Orders Program**

Marketing orders are producer-funded programs which collect funds from the point of first sale of certain farm commodities. The funds are used for crop research, market development, as well as for promotion, advertising, and education programs. These activities provide greater utilization of commodities and increased profitability for producers. In some cases, marketing orders provide for commodity inspection and grading in order to assure that only high-quality commodities reach the marketplace. Marketing orders generally work to solve marketing problems and conduct programs that would be impossible for individual producers to accomplish.

Colorado has marketing orders for eight commodities produced in the state covering apples, corn for grain, potatoes, dry edible beans, sweet corn, broccoli, milk, and wheat.

The department's responsibilities involve establishing, enforcing, and overseeing the administration of the marketing orders. In addition, the program serves to enforce the marketing order rules and regulations by conducting investigations, holding hearings, and reviewing audits of the orders. The agency reviewed budgets for the eight marketing orders and approved expenditures totaling over \$3 million.

## **International Marketing**

The goal in the international marketing program is to increase the export sales of Colorado grown and processed agricultural products. The section works with individual companies as well as in developing industry specific marketing efforts. The office also provides access to the USDA Foreign Agricultural Service programs. This section coordinates the agricultural access to the State of Colorado offices in Japan, Mexico and Great Britain.

Individual counseling ranges from market assessment utilizing research reports, computer data sources and other research, to assistance in obtaining branded trade promotion grants for overseas marketing and assistance with Colorado's Agricultural International Trade Promotion Program which provides financial assistance for international promotion.

A key element of the section's international trade development effort is coordinating state participation in WUSATA, the Western United States Agricultural Trade Association. Through WUSATA Colorado companies have access to international trade development funds and industry and market projects. CDA is currently managing two projects in Japan and one in Mexico. In Japan we have projects for private label foods and organic and natural foods. In Mexico Colorado has the lead on a program to provide market access information such as local pricing and other market information. The association with WUSATA also allows Colorado companies access to all the marketing programs at WUSATA with programs in Asia and Europe.

The international section continues to build the resource library for international trade which provides marketing data for most major markets. The section is also active in recruiting buying missions to Colorado to meet with Colorado companies. This includes processed foods as well as livestock missions. The project coordinated with JETRO (Japan External Trade Office) to bring a Senior Trade Advisor for processed foods to Colorado on a monthly basis continues. This program helps companies evaluate their product for the Japanese market as well as a chance to introduce their product to the Japanese market through a JETRO publication and direct introduction of their product to the largest food retailer in Japan.

## Domestic Marketing

The mission of the domestic marketing program is to increase awareness and demand for Colorado food and agricultural products in local, regional and national markets.

The domestic marketing staff publishes and distributes five marketing directories for Colorado producers: the **Hay Directory**, the **Farm Fresh Directory**, the **Fresh and Processed Food Trade Directory**, the **Livestock Export Directory** and the **Food & Beverage Gift Guide**. The Markets Division also offers a handbook, **Developing a Marketing Plan for your Food Product** and publishes a quarterly newsletter.

Ongoing marketing activities include a weekly television segment that features 52 different Colorado food products a year; the Governor's Award, which honors one food service operation and one retail outlet annually for excellence in promoting Colorado products; the Seal of Quality program, a labeling and inspection program that differentiates super-grade apples; the Centennial Farms program, which recognizes 100-year-old farms in the state; a low-cost focus group program; the "Gimme 5 Colorado" produce campaign, a statewide effort to increase awareness of the importance of fruits and vegetables in the diet; and a public relations program, which informs the media and consumers when select Colorado crops come into season.

The division continues to serve as the lead agency for aquaculture development in the state. As of May 1995, Colorado has 36 licensed aquaculture facilities.

## Food Processing

To assist in increasing agricultural processing in the state, the Markets Division administers the Agricultural Processing Feasibility Grants Program and the Alternative Agricultural Research and Commercialization (AARC) Program. The Feasibility Program assists local governments and entrepreneurs in evaluating the potential for developing or expanding agricultural processing facilities. The program is funded by the Colorado Economic Development Commission. The AARC Program, funded by USDA, encourages commercialization of non-food, non-feed products from farm and forestry materials.

Assistance is also given to farmers wishing to diversify their operations through processing, to existing Colorado food companies interested in expansion, and to out-of-state food companies considering locating in Colorado.

Special projects have included: organization of regional workshops on starting a food processing business, and marketing your food product; recruitment of food processors at state attended trade shows; placement of a Colorado food supplement in a national food magazine; **Colorado Co-Pack Directory**, a listing of companies which provide contract packing services; **From Growing to Processing - A Start-Up Guide for Food Processors**; and **Checklist for Start-Up Food Processors**, a concise listing of steps in developing your business.

## Market News

Personnel of the Colorado Department of Agriculture's Markets Division attend livestock sales at the major sale yards around the state to report the movement and price of livestock exchanged in open trading. This information is made available to livestock producers. The staff also monitors and reports hay, fresh produce and nursery marketings.

## Brand Inspection Division

*J. G. Shoun, Brand Commissioner*

The Brand Inspection Division has a long history in Colorado beginning around 1865 in what was then the Colorado Territory. Today, the division administers more than 35,000 livestock brands to identify ownership of cattle, sheep, mules, burros, horses, elk and fallow deer. Brand inspection is crucial to verify ownership in cases of strayed or stolen livestock, and animal health programs are strengthened by the ability to trace animals to their herd of origin.

The division is administered by the State Board of Stock Inspection comprised of five members, appointed by the Governor, representing all segments of the industry. The members of the board during the 1994-95 period were Mr. Dick Tanner of Yoder, Mr. Dean Davis of Lindon, Mr. Lee Spann of Gunnison, Ms. Linda Ingo of Ridgway, and Mr. Robert E. Bledsoe of Wray.

The division employs 65 brand inspectors located throughout the state, eight brand foremen, and nine administrative personnel, including Brand Commissioner J.G. Shoun. The annual budget for the division exceeds \$2.5 million and is completely funded by inspection fees levied to livestock owners and brand registration fees levied every five years. In 1994-95, division personnel traveled in excess of 1.3 million miles in the course of their duties and inspected over 4,800,000 head of livestock.

The division is assigned four principal regulatory responsibilities: to record and administer livestock brands; inspect livestock and verify ownership before sale, transportation beyond 75 miles, or slaughter; inspect and license packing plants, livestock sale rings, and inspect all consignments before sale to verify ownership; and prevent and return strayed or stolen livestock and investigate reports of lost or stolen livestock.

In addition, brand inspectors collect beef promotion and research funds. The division is also the trustee for all surety bonds issued to licensed markets and packing houses doing business in Colorado.

In 1994-95, the division inspected approximately 4.8 million head of livestock. In addition, they identified ownership of lost, stolen, or strayed and questionably owned livestock valued at \$19 million. The division conducted 60,000 horse inspections and issued twice as many permanent horse travel permits than previous years.

The Brand Division has concentrated on educational programs in the past few years. The focus of the educational program is on teaching brand law and theft prevention to the public and law enforcement agencies. Fifteen separate classes were given in 1994-95, all in different areas in Colorado.

## **Division of Plant Industry**

*Robert G. McClavey, Acting Director*

The Colorado Department of Agriculture's Division of Plant Industry performs a wide array of services to the public and engages in several important environmental and public health protection programs.

Beginning as the Bureau of Plant and Insect Control in 1937, the agency was under the direction of the State Entomologist. The division is organized into

the Biological Pest Control, Pesticides, and the Plant and Insect sections. The division's staff of 37 includes 13 field inspectors (10 of whom are cross-trained in multiple inspection), eight biological pest control specialists, and two chemigation inspectors.

The division marked the passing of an era with the retirement of Robert I. Sullivan. Mr. Sullivan, a veteran of 37 years with the department. The process of selecting a new director is underway at the time of this writing.

## **Biological Pest Control**

In 1945, the Bureau of Plant and Insect Control developed the state's initial biological pest control program in Palisade, Colorado, at the Colorado Department of Agriculture Insectary.

Biological pest control affords the opportunity to decrease agriculture's reliance on chemical pest control technology thereby decreasing production costs, reducing a portion of the chemicals entering the environment, and when colonies of beneficial insects are established, it offers a permanent pest control solution.

In 1994-95, the staff of the Biological Pest Control Section conducted 462 releases of 39 species of beneficial insects. This was an increase in activity of approximately 18% over FY 1993 (1993's activity level was an increase of 25% over the previous year). The releases were designed to assist in the control of fourteen weed species and six insect pests throughout the state.

## **Plant and Insect Section**

This section provides the following services:

- Inspection of plants and plant products intended for export to provide certification required by receiving states and countries;
- Registration of sellers of nursery stock, providing inspection of that stock to aid in control of insects and diseases, and aiding consumers in purchasing high quality stock;
- Performs request inspections of apiaries for bee diseases;

- Conducts pest surveys and works with private and public agencies to control certain pests;
- Administration and enforcement of the Colorado Chemigation Act to avoid pollution of groundwater sources;
- Registers and inspects commercial seed dealers to assure truth in labeling of seed as to content and germination claims;
- Administers the organic production certification program to assure buyers of organically-grown produce that their produce conforms with state standards required before making such claims;
- Administers fruit and vegetable pesticide residue monitoring under contract with USDA; and
- Administers request program for certification of weed free forage crops including hay and mulch crops.

In 1994-95, the section issued approximately 2,000 phytosanitary inspection certificates on plant products for international export valued at approximately \$10 million. Inspectors conducted approximately 1,150 inspections of nurseries and greenhouses and the section issued approximately 1,500 registrations to sellers of nursery stock. Approximately 10,000 stop sales orders were issued on nursery stock in 1994-95.

The Plant and Insect Section's implementation of the chemigation program, which began in 1989, this year resulted in the issuance of 3,160 permits. Approximately 800 inspections of seed dealers were conducted, and 500 cease and desist orders were issued for violations of labeling. Approximately 1,000 seed sellers and custom seed conditioners were registered. The section issued 121 organic certification licenses.

The fruit and vegetable pesticide residue monitoring program is designed to identify any possible contaminants to the food system. A total of 396 samples were taken in 1994-95. Under the weed free forage crop certification program a total of 197 field inspections were made on 6,837 acres of forage and mulch crops, mostly hay, for 90 producers.

## Pesticides Program

The Pesticides Section regulates pesticides, pest control devices, pesticide application, pesticide applicators and is the lead agency for the protection of groundwater quality from contamination by agricultural chemicals. Its services include: ensuring proper labeling, packaging, display, formulation, and effectiveness of pesticide products; handling special local needs pesticide registrations and emergency exemption requests for pesticides; ensuring competency of commercial pesticide applicators, and under certain circumstances, limited commercial and public applicators; and to ensure the protection of groundwater and the environment from impairment or degradation due to the improper use of agricultural chemicals while allowing for their proper and correct use.

In 1994-95, approximately 8,641 pesticide products were registered in Colorado; approximately 489 applicators were tested for competency; approximately 686 commercial pesticide application firms were licensed and 112 limited commercial and public applicators were registered; 2,507 applicators were licensed as qualified supervisors or certified operators; 26 complaints of misuse of pesticides or other violations of the Pesticide Applicators' and Pesticide Act were investigated; and administrative actions were finalized in 21 complaints ranging from letters of warning to license suspensions, civil fines, assurances of discontinuance, and injunctions.

To ensure groundwater quality, a coordinated effort is essential in dealing with this issue since numerous federal, state and local agencies are involved. The department ensures a coordinated approach by maintaining contact with the other agencies and attending meetings to keep abreast of what work is being performed.

Education and public outreach is the key to the groundwater program. Presentations to industry, professional organizations and interested groups are ongoing to both inform and seek advice. A citizens' advisory committee consisting of representatives from the general public, producers and agribusiness has been instrumental in providing user and public involvement into program development and implementation as well as helping to determine priorities.

Groundwater was monitored in the Arkansas River Basin from Pueblo to the state line. Universal best management practices were published and made available for distribution. Committees in the San Luis Valley and the lower South Platte continue to modify the best management practices for local conditions. Interest in this localization process has been expressed throughout the state. One hundred thirty nine (139) wells were sampled with numerous determinations being performed on each. Work on the generic portion of the State Management Plan for EPA continues. Rules and regulations for bulk storage facilities and mixing and loading areas were adopted.

## **Inspection and Consumer Services Division**

*Ronald Turner, Director*

The Division of Inspection and Consumer Services consists of five sections. The division employs approximately 95 individuals in a variety of inspection programs designed to assure fairness in the marketplace and quality, safety, and financial soundness in other commercial transactions.

The Office of the Director governs the five sections of the division. Under the director, the Facility Operations Program oversees two state-owned buildings occupied by the division with one goal in mind, to make sure that the buildings maintain an environment of safety and security for the employees.

## **Technical Services/Field Programs**

The Division's Technical Services/Field Programs Section is responsible for field inspections, testing and/or sampling for the following programs: Measurement Standards (small devices), Feed, Fertilizer, Egg, and Meat Inspection. Each inspector in the section has been trained to perform inspections in all five program areas. Twelve inspectors, strategically located throughout the state, perform the various inspections required for each program. Inspectors are empowered to enforce the laws and regulations relating to each program.

In addition to field inspections, the Technical Services Section is responsible for the administration of the feed, fertilizer, egg, and meat inspection statutes.

The Feed Program registers and selectively samples commercial animal feeds throughout the state. In 1994-95, 754 companies registered 10,846 products. These numbers reflect an increase of 22 companies and 379 products over last year. There were also 4,300 inspections conducted and approximately 4,600 samples taken, representing 27,000 tons of feed. This year the number of samples not meeting the labeled guarantees when analyzed by our laboratory, decreased from twelve to nine percent. Inspection (tonnage) fees were collected on 1,422,410 tons of feed. Under a cooperative agreement with the U.S. Food and Drug Administration, 21 medicated feed mills were also inspected.

The Egg Inspection Program assures compliance pertaining to quality and labeling standards for eggs at the retail and wholesale level. In the 1994-95 license year 814,962 dozens were inspected, and of that amount, 19,972 dozens, or 2.5 percent, were rejected. The Department continues to work with the industry to improve the quality of eggs on the market. New statutory changes passed during the legislative session this year will greatly assist the Department and the industry in these efforts.

The Fertilizer Program registers and selectively samples fertilizers, soil conditioners, and related products to determine nutrient content and to assure labeling accuracy in accordance with state laws. In 1994-95 the department registered 363 companies and 3,553 products. Approximately 2,608 inspections were made and 1,764 samples, representing 63,194 tons of product were taken and analyzed. Inspectors issued 139 stop sales on deficient products. A newly established fertilizer advisory board appointed this year by the Agricultural Commission is currently reviewing the statute and the rules and regulations to suggest possible revisions this year.

The Fertilizer Program also inspects anhydrous ammonia tanks and assists in safety training in the use of this potentially dangerous product. Inspectors examined 3,285 ammonia tanks and rejected 774 of them as unsafe.

The Meat Inspection Program licenses and inspects meat processors and food plan operations. In addition, the agency protects the public from unsanitary or fraudulent practices in meat processing and bulk meat sales. In 1994-95, this program issued licenses to 129 facilities in the state. Thirty-one cease and desist orders were issued to meat processors in the fiscal year. The section conducted 367 facility inspections. Two licenses were denied due to statute violations. Three businesses were fined for statute violations and were licensed under probation.

## Farm Products

The Farm Products Section is responsible for the enforcement of statutes licensing and regulating those who buy and/or store agricultural products produced in Colorado or owned by Colorado residents. The agency assures that dealers and state-licensed warehouses are bonded and adequately capitalized. The section licensed over 1,400 firms and holds surety bonds in excess of \$100,000,000.

The section investigates complaints by producers, owners and dealers against dealers operating in Colorado. Issues cease and desist orders and/or other regulatory sanctions in the event a firm appears to be financially unable to meet its commitments. In addition, the section conducts investigations of complaints regarding timely payment or non-payment for farm products purchased and seeks remedies for losses including bond demands, stipulated licensing and civil and criminal prosecution. In 1994-95, 194 such orders were issued, over 350 investigations were conducted and three criminal prosecutions were initiated.

## Laboratory Services

The Laboratory Services section analyzes animal feeds and fertilizer product samples obtained by multiple inspectors in the division, and the lab also analyzes pesticide samples for the Plant Industry Division.

The laboratory checks animal feeds and pet foods registered in the state to assure that feed products conform to the manufacturer's labels for both nutrients and that they are free of contamination. The lab conducts the analysis of pesticides to assure that they meet manufacturers' guarantees and claims for label consistency.

The lab, under contract with the U.S. Environmental Protection Agency, analyzes pesticide residue samples to aid in the investigation of possible misuse or misapplication.

The lab also analyzes a limited number egg samples for pesticide residues and examines a limited number of meat samples for bacterial contamination and to assure that they meet manufacturers' claims for label consistency.

The CDA Groundwater lab continued to grow this past year, with addition of several new pieces of equipment. The lab in cooperation with the Colorado Department of Public Health and the Environment, which collects the groundwater samples, has started a 5-8 year monitoring program of water wells throughout the state to find out if there are any problems with pesticide contamination and nitrate contamination.

The lab analyzed about 150 water samples from July 1994 through February 1995. These samples were analyzed by four different methods for a total of 30 different pesticides as well as for nitrate. The lab staff is preparing for the summer season when sampling will resume. In 1994-95, the section conducted 30,000 different analyses on 7,500 samples.

## Measurement Standards

This program licenses all weighing and measuring devices in commercial use in Colorado and certifies individuals operating public scales. The State Metrology Laboratory maintains custody of Colorado's official weight and measure standards, and the laboratory provides, calibration of mass, frequency, length, volume and moisture in grain for public and private agencies that require standards traceable to the National Institute of Standards and Technology.

The Metrology Laboratory calibrated 7,644 mass standards, performed 207 other tests, and certified 793 tuning forks. Tuning forks are used by local law enforcement agencies to calibrate radar speed detectors. Production is down in the metrology laboratory due to a new metrologist who completed her NIST training in early December and is not yet up to full speed.

This section inspects and tests packages for truth in labeling as required by the Measurement Standards Act, it also tests and inspects the accuracy of measuring devices used commercially. More than 22,000 small weighing devices were tested in 1994-95, and of those, 16 percent were inaccurate. Inspectors examined 57,244 packages and found 16.6 percent to be short measure.

The section's large scale testing units tested and inspected 4,986 scales (an 11.5 percent increase), while rejecting 40.7 percent of them.

## Fruit and Vegetable Inspection

The Fruit and Vegetable Inspection program is a cooperative effort by the U.S. Department of Agriculture and the Colorado Department of Agriculture to assure consumers of high quality Colorado produce. The program operates under federal standards, rules, and regulations to provide official inspection, grading, and certification of produce. The certification concerns quality, condition, size, and other pertinent factors of fresh fruits and vegetables grown in the state.

Inspections are performed on either a mandatory or non-mandatory basis. Mandatory produce inspection is required by statute to promote quality standards which depict certain Colorado produce as desirable products in the marketplace. Non-mandatory inspections are conducted on other commodities for shippers which wish to market an inspected product. Inspection certificates are issued by the state to certify grade and condition of the product at the time of inspection.

In 1994-95, the section inspected an estimated 22,000,000 hundredweight (cwt.) of potatoes and 95,938 bushels of peaches, resulting in the issuance of approximately 41,000 certificates of mandatory inspection for the commodities. Other fruits and vegetables inspected totaled 651,100 cwt. resulting in 1,000 certificates issued for non-mandatory commodities.

## Division of Animal Industry

*Jerry J. Bohlender, DVM, Director*

The Division of Animal Industry is responsible for animal health and control activities in the state. The division has 18 employees, with two additional employees to be added on July 1, 1995.

The division works in close cooperation with the livestock industry and veterinary medical organizations, as well as other state and federal agencies, to protect the health, welfare, and marketability of Colorado livestock.

## Veterinary Section

This section is responsible for monitoring and minimizing brucellosis and other contagious diseases which could threaten Colorado livestock. The staff concentrates on diseases that are a threat to public health, would significantly impact the more than \$3 billion livestock economy in Colorado, and which cannot be easily controlled by individual livestock owners. Disease surveillance programs at slaughter plants and at livestock concentration points are conducted in cooperation with the USDA. Control of diseases is achieved through required inspections, vaccination, supervised treatments, and other appropriate activities. The section also licenses and inspects establishments engaged in processing, handling, or transporting inedible meat products for pet foods and rendering establishments to assure compliance with sanitary standards necessary for disease control and to assure that such products are clearly labeled.

Colorado attained Brucellosis Free State Status in January of 1995. This status was achieved by not having any brucellosis infected cattle herds in the state in a one year period. Free status is maintained by active surveillance at slaughter to assure the absence of brucellosis infected herds. Colorado's participation in the National Brucellosis Eradication Program is significant in light of the fact that the target date for eradication of the disease in the United States is December 31, 1999. Only 17 states have not attained free status.

Colorado also participates in the National Swine Pseudorabies Eradication program. Colorado attained Stage IV status in April of 1995. Stage IV status requires the absence of any pseudorabies and a level of surveillance has been achieved. If Colorado can maintain this stage for one year without detection of pseudorabies, the state will be awarded pseudorabies free status. Free status in both brucellosis and pseudorabies is of economic benefit to the producer because a lower level of testing is required and livestock in free states are more marketable to producers in other states and are more desirable for the international market.

## Bureau of Animal Protection

The Bureau of Animal Protection investigates complaints concerning animal cruelty or neglect. Division staff assist local animal control officials and law enforcement officials and law enforcement organizations in training and investigations of complaints. In 1994-95, approximately 339 complaints of animal neglect or abuse were investigated by department personnel.

## State-Federal Brucellosis Laboratory

The State-Federal Brucellosis Laboratory provides support for livestock disease identification, control, and prevention programs. The lab facilitates interstate and international livestock shipments through laboratory confirmation of disease-free status. Lab staff also trains public livestock market veterinarians in test procedures and confirms testing of livestock at such markets.

In 1994-95, 430,915 serological and other tests for livestock diseases were performed on the 394,592 submissions received from packing plants, private veterinarians, state and federal field personnel and others. These tests were performed for disease surveillance, interstate movement, and to qualify animals for export to other countries.

## Rodent/Predator Control Section

In Colorado, 3 million acres of private lands are damaged to some degree by prairie dogs, gophers, and other rodents. The Animal Industry Division's Rodent/Predator Control Section provides training, services, and supplies to private citizens and local, state, and federal officials to control vertebrate pests. The section assists producers in controlling livestock predation losses through cooperative agreements with local producer associations, counties, and the United States Department of Agriculture.

In Colorado more than three million acres of private land are damaged by rodents each year. A pilot prairie dog control program using community service labor was successful and will be expanded. Over 750 pesticide applicators were trained in FY 94-95, along with supplying and training a number of non-agriculture private and governmental landowners and managers. The methods listed above are used by

the rodent/predator control section to meet the department goals of effective, environmentally safe, and economically feasible rodent control.

The Division is currently working on a number of levels to increase efficiency in predator control. With the sheep and lamb industry alone suffering 2.2 million dollars loss in 1994 to predators, the regulatory, contractual and inter-agency agreement changes to increase efficiency. This would improve the performance of not only our department, but the local livestock associations, counties, U.S. Department of Agriculture and the Division of Wildlife.

In FY 94-95 the rodent/ predator section handled over 2,900 phone requests for assistance and provided service on-site by agents nearly 1,600 times.

## Pet Animal Care Facilities Section

On July 1, 1994, the Pet Animal Care Facilities Act (PACFA) was effective. PACFA gives the Colorado Department of Agriculture (CDA) the responsibility to enforce the statute (CRS 35-80-101) and the accompanying rules and regulations. The statute, rules and regulations set minimum standards for physical facilities, sanitation, ventilation, lighting, heating, cooling, humidity, spacial and enclosure requirements; nutrition, humane care, medical treatment; methods of operation; record keeping concerning health care, euthanasia, and transactions involving pet animals. Also addressed is the qualifications for licensure, the issuance of licenses and grounds for disciplinary actions, and the license fees.

Effective March 1, 1995 the CDA initiated implementation of PACFA which requires that any person who is operating a pet animal facility that engages in selling, transferring, adopting, breeding, boarding, training, grooming, sheltering or rescuing dogs, cats, birds, rabbits, ferrets, reptiles or fish may need to be licensed with the CDA. PACFA is cash funded (license fees fund the program). The fiscal note for the PACFA program allows four FTEs to be hired to administer the program. This includes one veterinarian, one clerical and two field inspectors.

# HOW TO CONTACT

## COLORADO DEPARTMENT OF AGRICULTURE

*(All Telephone numbers are Area Code 303 except where noted)*

### Office of the Commissioner

700 Kipling Street, Suite 4000, Lakewood, CO 80215

# INDEX

## **Acreage:**

- By cropping practice 12, 13
- Harvested, Principal crops 4, 17-19
- Planted, Principal crops 4, 17-19
- See also - Specific crops

## **Apples:**

- Cash receipts 172
- Prices 163, 173, 176
- Production 163
- Value 163

## **Barley:**

- Acreage 4, 6, 12, 17-19, 62-73
- Cash receipts 172
- County estimates 62-73
- District estimates 62-73
- Prices 6, 17-19, 173, 174
- Production 6, 12, 17-19, 62-73
- Stocks 157
- Value 6, 17-19
- Varieties 160
- Yield 6, 12, 17-19, 62-73

## **Beans, dry edible:**

- Acreage 4, 9, 13, 17-19, 144-156
- Cash receipts 172
- County estimates 144-156
- District estimates 144-156
- Prices 9, 17-19, 173, 175
- Production 9, 13, 17-19, 42-46, 144-156
- Value 9, 17-19
- Yield 9, 13, 17-19, 42-46, 144-156

## **Beef cattle:**

- Inventory 88, 181, 182
- Prices 173, 176

## **Bees:** 196

## **Cabbage:**

- Acreage 165
- Prices 165, 173
- Production 165
- Value 165
- Yield 165

## **Cantaloupe:**

- Acreage 165
- Prices 165, 173
- Production 165
- Value 165
- Yield 165

## **Carrots:**

- Acreage 165
- Cash receipts 172
- Prices 165, 173
- Production 165
- Value 165
- Yield 165

## **Cash receipts:** 170-172

## **Cattle and calves:**

- Calf crop 181, 186
- Cash receipts 172, 186
- Disposition 186
- Inshipments 186, 188
- Inventory by class 181, 182
- Inventory, state 181, 182, 197
- Marketings 186, 188
- On feed by class 190, 191
- On feed by month 189, 190, 191
- On feed by weight group 190
- Prices 173, 176
- Production 186
- Slaughter 186, 187
- Value 186, 197

## **Cheese:** 193

## **Cherries, tart:**

- Prices 163, 173
- Production 163
- Value 163

## **Chickens:**

- Inventory 181, 194
- Hens and pullets 100, 181, 194
- Number lost 195
- Number sold 195
- Prices 173, 194, 195
- Value 194, 195

## **Corn, all:** 4, 6, 17-19

## **Corn, grain:**

- Acreage 6, 13, 17-19, 44-55
- Cash receipts 172
- County estimates 44-55
- District estimates 44-55
- Prices 6, 17-19, 173, 174
- Production 6, 13, 17-19,
- Stocks 158
- Value 6, 17-19
- Yield 6, 13, 17-19, 44-55

**Corn, silage:**

Acreage 6, 17-19, 56-61  
County estimates 56-61  
District estimates 56-61  
Prices 6, 17-19, 173  
Production 6, 17-19, 56-61  
Value 6, 17-19  
Yield 6, 17-19, 56-61

**County and district estimates:**

Barley 62-73  
Corn, grain 44-55  
Corn, silage 56-61  
Dry beans 144-155  
Hay crops 108-143  
Oats 74-85  
Potatoes 106-107  
Sorghum, grain 86-97  
Sugar beets 106-107  
Sunflowers 98-103  
Wheat, spring 32-43  
Wheat, winter 20-31

**Cows:**

Beef cow inventory 181, 182  
Milk cow inventory 181, 182, 192  
Number on feed 190  
Prices 173, 176, 177

**Cream: 193****Crops:**

Acreage 4

**IT'S WHAT'S FOR DINNER.**

## **STEAK & PARMESAN-GRILLED VEGETABLES – 30 MINUTES**

- |                                                                |                                                 |
|----------------------------------------------------------------|-------------------------------------------------|
| 2 well-trimmed beef T-bone or Porterhouse steaks, cut 1" thick | 1 large red onion, cut crosswise into ½" slices |
| ¼ cup grated Parmesan cheese                                   | <i>Seasoning:</i>                               |
| 2 Tbsp olive oil                                               | 1 Tbsp crushed garlic                           |
| 2 Tbsp red wine vinegar                                        | 2 tsp dried basil leaves                        |
| 2 red or yellow bell peppers, each cut into quarters           | 1 tsp pepper                                    |

1. In small bowl, combine seasoning ingredients; mix well. Remove 4 teaspoons seasoning; press into both sides of beef steaks.
2. Add cheese, oil and vinegar to remaining seasoning, mixing well; set aside.
3. Place steaks in center of grid over medium ash-covered coals; arrange vegetables around steaks. Grill steaks uncovered 14 to 16 minutes for medium rare to medium doneness, turning occasionally. Grill peppers 12 to 15 minutes and onion 15 to 20 minutes or until tender, turning once. Brush vegetables with reserved cheese mixture during last 10 minutes of grilling.
4. Season steaks with salt, as desired. Remove bones; carve steaks crosswise into thick slices. Serve with vegetables. **4 servings.**
