COLORADO
Department of Agriculture

September 2014

Dear Friends,

I am pleased to introduce the 2014 Colorado Agricultural Statistics Bulletin.

Within these pages is information that can help shape Colorado's future. The Colorado Agricultural Statistics Service (CASS) offers statistics that provide a current snapshot of our agricultural community and will allow you to make decisions based off of solid data.

As a \$40 billion industry, Colorado's ag industry provides a safe, abundant food supply while generating economic activity that is essential to this state's vitality. Tracking this information is important, not only in showing the value of our industry, but to assist in making informed decisions that will affect us all.

The Colorado Department of Agriculture is dedicated to promoting agriculture on the local, state, national, and global level and consider these statistics a valuable resource in that effort.

I would like to thank CASS, the National Agricultural Statistics Service, and all of the farmers and ranchers who make this book possible.

Sincerely,

John T. Salazar
Commissioner

The Colorado Agricultural Statistics publication is compiled by the Colorado Agricultural Statistics Service, which is an agency within the U.S. Department of Agriculture, in cooperation with the Colorado Department of Agriculture.

National Agricultural Statistics Service

September 2014

Dear Friends of Agriculture:

What a difference a year makes. Growing conditions for much of the state were much better in 2014 than last year. Welcome rains and adequate water storage were a vast improvement in many areas compared to 2013. There are still pockets of the state that are suffering from drought which hopefully the cycle will change for them. This year brought better conditions for much of the nation, improving the prospects for a large crop, which has caused pressure on commodity prices. The livestock sector continues to see very good prices, but the cost of production remains high.

In an environment like this year, and in any year, good information is needed to make good decisions. Therefore, I am pleased to present the 2014 Colorado Agricultural Statistics Bulletin made available through the Mountain Regional Field Office of USDA's National Agricultural Statistics Service in cooperation with the Colorado State Department of Agriculture. The estimates available in this bulletin and what we publish throughout the year are valuable tools for the producer and the agricultural industry to make sound decisions. This information is used for marketing decisions, planning, research, insurance and disaster programs, and policy decisions.

Thank you to the farmers and ranchers for taking time out of their busy schedules to provide the data needed to produce these statistics. I also want to thank all the agribusinesses, extension educators and USDA's Farm Service Agency for contributing information for this bulletin and providing support for our programs.

This report would not be possible without the dedicated effort of field and telephone interviewers who collect this data and the office staff that compiles it. I would like to thank Jim Cox of Palisades, CO for the cover photography, and a special thanks to the Colorado Department of Agriculture for covering the costs of printing this bulletin.

Finally, USDA NASS released the 2012 Census of Agriculture last February. The Census of Agriculture is the most comprehensive set of county data in the nation. Please visit www.agcensus.usda.gov to see all the products and information available.

Sincerely,

A handwritten signature in black ink, appearing to read "William Meyer", written over a white background.

COLORADO

The Centennial State, admitted to the Union in 1876, is the eighth largest state in area and has the highest average elevation. The highest point is at Mount Elbert, 14,433 feet above sea level, one of the 53 "fourteeners" rising above 14,000 feet. The lowest elevation is 3,350 feet in extreme eastern Prowers County.

Approximate Land Area: 66.3 Million Acres
 Approximate Cropland Area: 10.6 Million Acres*
 Approximate Irrigated Area: 2.6 Million Acres*
 Number of Farms and Ranches (2013): 35,600
 Average Size of Farm and Ranch (2013): 890 Acres

Farms by Type*

81.2% Individual
 8.9% Partnership
 7.0% Corporate
 2.9% Other

Farms by Tenure*

72% Full Owners
 22% Part Owners
 6% Tenants

Farms by Class*

56.1% Livestock & Poultry
 43.9% Crops

Farm Marketing Receipts (2012): \$7,638,232 Million
 Livestock & Livestock Products: \$4,739,833 Million (62% of the total)
 Field, Fruit & Vegetable Crops: \$2,898,399 Million (38% of the total)

* 2012 Census of Agriculture

^{1/} The seventeen states include: AZ, CA, CO, ID, KS, MT, NE, NV, NM, ND, OK, OR, SD, TX, UT, WA, and WY.

PRICES RECEIVED BY FARMERS

Prices received by farmers and ranchers provide a basis for calculating the income from the Agricultural Sector as part of the National Income Accounts. These data are also extensively used to analyze past and current marketing patterns and to make current and future marketing decisions. Prices received for major farm commodities are used in computing the Index of Prices Received by Farmers, an important indicator of the economic environment of the nation's agricultural producers.

Marketing year average prices, by commodity, Colorado, 2005-2013
