LIVESTOCK SLAUGHTER -- AUGUST 2006

Red meat production in **Colorado** during August 2006 totaled 169.0 million pounds, 1 percent above the 167.3 million pounds produced during August 2005 and 1 percent above the 167.0 million pounds produced during July of this year. **Cattle** kill during August was down 1 percent from the previous year to 195,100 head but the average live weight increased 21 pounds to 1,309 pounds per head. **Hog** slaughter, at 2,000 head, decreased 13 percent from August 2005 and the average live weight decreased 8 pounds to 253. **Accumulated red meat production** for the first eight months of this year now totals 1.26 billion pounds, up 7 percent from the 1.19 billion pounds produced during the comparable period last year.

Commercial red meat production for the United States totaled 4.24 billion pounds in August, up 4 percent from the 4.10 billion pounds produced in August 2005. **Beef production**, at 2.44 billion pounds, was 5 percent above the previous year. Cattle slaughter totaled 3.13 million head, up 5 percent from August 2005. The average live weight was up 9 pounds from the previous year, at 1,275 pounds.

Veal production totaled 14.2 million pounds, 4 percent above August a year ago. Calf slaughter totaled 66,700 head, up 2 percent from August 2005. The average live weight was unchanged from last year, at 347 pounds. **Pork production** totaled 1.77 billion pounds, up 1 percent from the previous year. Hog kill totaled 9.09 million head, 1 percent above August 2005. The average live weight was 1 pound above the previous year, at 263 pounds. **Lamb and mutton production**, at 14.6 million pounds, was down 5 percent from August 2005. Sheep slaughter totaled 227,000 head, 1 percent below last year. The average live weight was 129 pounds, down 5 pounds from August a year ago.

January to August 2006 commercial red meat production was 31.3 billion pounds, up 4 percent from 2005. Accumulated beef production was up 7 percent from last year, veal was down 3 percent, pork was up 2 percent from last year, and lamb and mutton production was up 1 percent.

CATTLE ON FEED -- SEPTEMBER 1, 2006

The number of cattle and calves on feed for the slaughter market in Colorado feedlots with a capacity of 1,000 head or larger was estimated at 960,000 head as of September 1, 2006. The latest inventory was up 2 percent from August 1, 2006, and up 25 percent from the 770,000 on feed on September 1, 2005. Cattle feeders with 1,000 head or larger capacity marketed an estimated 185,000 head of fed cattle during August 2006. This represented a 3 percent increase from the July 2006 marketings, but 7 percent below August marketings one year earlier. An estimated 210,000 cattle and calves were placed on feed during August, up 40 percent from July 2006 placements and 35 percent above a year ago. Of the number placed in August, 24 percent weighed less than 600 pounds, 14 percent weighed from 600 to 699 pounds, 24 percent weighed from 700 to 799 pounds, and 38 percent weighed 800 pounds and greater. Other disappearance for August, at 5,000 head, was down 5,000 from the previous month but unchanged from a year ago.

Cattle and calves on feed for slaughter market in the United States for feedlots with capacity of 1,000 or more head totaled 11.0 million head on September 1, 2006. The inventory was 10 percent above September 1, 2005 and 10 percent above September 1, 2004. This is the highest September 1 inventory since the series began in 1996. Placements in feedlots during August totaled 2.30 million, 15 percent above 2005 and 9 percent above 2004. Net placements were 2.24 million. During August, placements of cattle and calves weighing less than 600 pounds were 680,000, 600-699 pounds were 435,000, 700-799 pounds were 535,000 and 800 pounds and greater were 650,000. Marketings of fed cattle during August totaled 2.08 million, 2 percent above 2005 and 8 percent above 2004. Other disappearance totaled 59,000 during August, 11 percent above 2005 and 5 percent above 2004.

MILK PRODUCTION -- AUGUST 2006

Milk production in **Colorado** during the August 2006 totaled 223 million pounds, up 16 million pounds from the 207 million pounds produced during the same period a year earlier. The average number of milk cows for August of this year was 112,000 head, up 7,000 head from August 2005. Production per cow averaged 1,990 pounds for August, 1 percent above the 1,970 produced a year ago.

Milk production in the 23 major States during August totaled 13.9 billion pounds, up 1.6 percent from August 2005. July revised production, at 13.9 billion pounds, was up 1.5 percent from July 2005. The July revision represented an increase of 6 million pounds from last month's preliminary production estimate. Production per cow in the 23 major States averaged 1,680 pounds for August, 9 pounds above August 2005. The number of milk cows on farms in the 23 major States was 8.25 million head, 88,000 head more than August 2005, but 9,000 head less than July 2006.

**Milk Cows and Milk Production, Colorado and
23 States, August 2005-2006**

1/ Includes dry cows. Excludes heifers not yet fresh.

2/ Excludes milk sucked by calves.

**CROP PRODUCTION -- SEPTEMBER 1, 2006
COLORADO HIGHLIGHTS**

The corn yield forecast is now estimated at 152.0 bushels per acre, 4.0 bushels above last year's final yield, but 2.0 bushels below the August 1 forecast. The forecast for harvested acres was unchanged at 840,000 acres, down 110,000 acres from the area harvested for grain in 2005. Corn production is forecast at 127.7 million bushels, 9 percent less than last year's production.

The sorghum yield is forecast at 32.0 bushels per acre, 2.0 bushels above the August 1 forecast and 1.0 bushel above last year's crop. Growers are expected to harvest 120,000 acres, placing production at 3.8 million bushels, compared with 3.4 million bushels last year.

The summer potato yield forecast was unchanged from July 1 at 370 cwt. per acre, 5 cwt. below last year's average yield. Growers are expected to harvested 4,000 acres, down 900 acres from last year's harvested area. Production is forecast at 1.48 million cwt., down from last year's production of 1.84 million cwt. The sugarbeet yield is forecast at 23.0 tons per acre, unchanged from the August 1 forecast but 1.3 tons below last year's yield. Production is forecast at 881,000 tons from 38,300 harvested acres, up from last year's 833,000 tons from 34,300 acres.

UNITED STATES HIGHLIGHTS

Corn production is forecast at 11.1 billion bushels, up 1 percent from last month and fractionally above 2005. Based on conditions as of September 1, yields are expected to average 154.7 bushels per acre, up 2.5 bushels from August and 6.8 bushels from last year. If realized, yield and production would be the second largest on record, behind 2004. Forecast yields are higher than August across the northern Great Plains and western Corn Belt as moderate to heavy precipitation during the month improved soil moisture levels and crop conditions. Expected yields across the eastern Corn Belt are unchanged from last month. Farmers expect to harvest 71.8 million acres of corn for grain, down 250,000 acres from August and down 4 percent from 2005.

Soybean production is forecast at 3.09 billion bushels, up 6 percent from the August forecast and up slightly from the 2005 crop. If realized, this would be the second highest production on record. Based on September 1 conditions, yields are expected to average 41.8 bushels per acre, up 2.2 bushels from August but down 1.5 bushels from last year's record high yield. Compared with last month, yields are forecast higher across the Corn Belt and most of the northern and central Great Plains. Near or above normal moisture in those areas during August improved crop conditions. In contrast, yields are down or unchanged from the August 1 forecast across the Gulf Coast States and Atlantic Coast States, with the exception of South Carolina.

(Continued from page 2)

All Cotton production is forecast at 20.3 million 480-pound bales, down slightly from last month and down 15 percent from last year's record high production. Yield is expected to average 762 pounds per acre, down 3 pounds from last month and down 69 pounds from last year. The September harvested area is expected to total 12.8 million acres, virtually unchanged from last month but down 7 percent from last year. Lower production forecasts from last month in the Southeast and California were partially offset by higher production in the Southwest and Texas.

California navel orange production for the 2006-07 season is forecast at 33.0 million boxes (1.24 million tons), down 27 percent from last season's revised production of 45.5 million boxes (1.71 million tons). This initial forecast is based on an objective measurement survey conducted in the California Central Valley between July 24 and August 18. This year's long and wet spring has contributed to the lowest fruit set since the 2001-02 season. Fruit sizes are generally small but are reported to have begun increasing in the last month.

COLD STORAGE -- AUGUST 31, 2006

Frozen food stocks in refrigerated warehouses on August 31, 2006 were greater than year earlier levels for butter, beef, eggs, cheese, and chicken.

Butter stocks were down 19 percent from last month, but up 24 percent from a year ago.

Total red meat supplies in freezers were down 1 percent from last month, but up 4 percent from last year. Frozen pork supplies were down 2 percent from both last month and the previous year. Stocks of pork bellies were down 63 percent from last month and down 37 percent from last year.

Total frozen poultry supplies on August 31, 2006 were down 2 percent from the previous month and down 1 percent from a year ago. Total stocks of chicken were down 2 percent from the previous month, but up 1 percent from last year. Total pounds of turkey in freezers were down 2 percent from last month and down 4 percent from August 31, 2005.

Stocks in Storage, United States

Commodity	Aug 31, 2005	July 30, 2006	Aug 31, 2006
	1,000 Pounds
