

## Department of Corrections Q2 FY2016 Performance Evaluation (January 2016)

### Strategic Policy Initiatives

The Department of Corrections has identified four strategic policy initiatives for FY 2015-16 and beyond. For this performance evaluation, the Department has updated progress on the initiatives identified in the FY2016 Performance Plan that capture the Department's strategic and operational priorities, and reflect the overall direction as identified by Department leadership. The updates reflect data as of December 31, 2015.

Additional detail for these, and other, strategic policy initiatives is available in the Department's Performance Plan, which may be accessed [here](#).

#### Re-Entry Units/Pods in Correctional Facilities

The Department of Corrections will implement re-entry units/pods in 12 level II, III, and IV state correctional facilities, along with private facilities, by September 1, 2015, to bridge the gap between transition from facilities to the community by providing releasing offenders with tools and resources necessary to facilitate a fluid transition to the community and to promote successful reintegration. The Department will accomplish this by developing collaborative partnerships with governmental and private entities to identify resources that will enable offenders to successfully release back into the community; implementing programs in the re-entry living units/pods to enhance offender motivation, problem solving, and thinking processes; and developing employability screening to ensure offenders are engaged in meaningful employment after release.

#### Technical Parole Violators

The Department of Corrections will reduce the percentage of technical parole violators (TPVs) from 32% to 25% by June 30, 2016, through a proactive approach using case management and intervention skills, which focus on successful outcomes for parolees. The Department will accomplish this by increasing the use of intermediate sanctions for parolees; implementing a parolee positive reinforcement program in conjunction with the Colorado Violation Decision Making Process; and implementing an in-jail Vivitrol program for TPVs, along with providing cognitive behavioral therapy and medicated assisted therapy.

#### Intensive Residential Treatment Beds for Parolees

The Department of Corrections will expand the number of intensive residential treatment (IRT) beds for parolees from 125 beds to a total of 250 beds over the next two fiscal years by opening a minimum of 50 beds by June 30, 2016, and an additional maximum of 75 beds by June 30, 2017. This will provide intensive residential substance abuse treatment and aftercare in a community setting to avoid revocation and to support successful reintegration. The Department will accomplish this by implementing Senate Bill 15-124 fiscal note, which appropriated 48 IRT beds for parolees, along with collaborating with the Division of Criminal Justice on a request for proposal for an additional 48 IRT beds for FY17; and seeking to gain an additional 36 IRT-type beds by exploring alternatives to IRT with different organizations.

#### Parolee Intensive Supervision Program Failures

The Department of Corrections will reduce the percentage of parolee intensive supervision program failures from 22% to 19.5% by June 30, 2016, to improve public safety and re-entry outcomes through a proactive approach using case management and linking incentives with intermediate sanctions. The Department will accomplish this by implementing a parolee positive reinforcement program in conjunction with the Colorado Violation Decision Making Process; linking risk to the appropriate supervision and contact level, also referred to as "dosage"; and implementing a program that provides a pathway for parolees to earn early transition to general parole supervision through ISP program compliance.
