

**Strategic Policy Initiatives**

The Department of Corrections has identified five strategic policy initiatives for FY 2018-19 and beyond. For this performance evaluation, the Department has updated progress on the initiatives identified in the FY18-19 Performance Plan that capture the Department's strategic and operational priorities, and reflect the overall direction as identified by Department leadership. The updates reflect data as of December 31, 2018.

Additional detail for these, and other, strategic policy initiatives is available in the Department's Performance Plan, which may be accessed [here](#).

**Establish an Offender Mentoring Program Through In-Reach Services**

The Department will establish an offender mentoring program through in-reach services at all level III and above facilities by June 30, 2019. The DOC will utilize mentors to assist offenders through their transition from prison to the community.

**Decrease the Recidivism Rate**

The Department will decrease the rate of recidivism from 50% (actual 49.5%) to 48% by June 30, 2019, thereby reducing the number of offenders who engage in future criminal activity and subsequently supporting the DOC's vision of building a safer Colorado. Recidivism is defined as returning to prison or inmate status for new crimes or technical violations within three years of release.

**Increase the Percentage of Female Offenders Assessed with Women's Risk Needs Assessment (WRNA)**

The Department will increase the percentage of female offenders assessed with the Women's Risk Needs Assessment (WRNA) from 44% to 100% by June 30, 2019, to address the gender responsive risks and needs of female offenders within a correctional setting for successful programming.

**Increase the Percentage of Parolees Who are Employed**

The Department will increase the percentage of parolees who are employed from 81% to 84% by June 30, 2019, to support parolees in their preparation to gain independence and build a successful life in the community.

**Implement a Mental Health Peer Assistant Program**

The Department will implement a mental health peer assistant program in all level III and above general population facilities that house offenders with mental health needs by June 30, 2019. This program will utilize trained offenders as peer assistants to other offenders who may be struggling with thoughts of self-harm or other stressors.

**Operational Measures**

**Establish Offender Mentoring Through In-Reach**

<sup>1</sup> Because the mental health (MH) peer assistant program is new, the DOC selected modest goals. Now that the program is underway, and statistics are being collected, goals were revised in Q1YTD to better illustrate program data.

<sup>2</sup> Data reflects three private prisons that are pursuing the implementation of a MH peer assistant program. The private prisons have been trained, but the program has yet to be formally launched.

<sup>3</sup> The DOC has restructured MH interventions. The term “mental health watches” has been revised to “mental health holds”. The initial measure has been updated to reflect a more significant benchmark. It is anticipated that MH holds in FY18-19, which includes low level interventions like the peer assistant program, will decrease as compared to MH watches in FY17-18.
