Executive Summary

S.B. 19-204 authorized the Local Accountability System Grant Program, which provides funds to local education agencies to pilot the adoption and enhancement of local accountability systems that supplement the state accountability system. This program is also intended to enable the state to learn from innovative practices in the field. Year 1 of the grant focused on the grant application process (November 2019-March 2020) and early implementation (March 2020-June 2020). In March 2020, the State Board of Education approved 11 unique grantee projects. Within these projects, 29 different districts/BOCES and 12 individual schools from across the state engaged in a wide range of initiatives. The Year 1 grantees began implementation just as the Governor issued an Executive Order calling for the suspension of in-person instruction for the remainder of the 2019-20 academic year, and districts shifted to a remote learning approach. With additional flexibility on the grant timeline and with a strong commitment by the grantees, the work continued despite the disruptions.

2022 Local Accountability System Grant Highlights	
10	Grantees Participating
40	Total number of BOCES, Districts and Schools
\$450,000	Total Award Amount per year

Funding for Year 2 of the grant was suspended due to state budget shortfalls related to the pandemic. Grantees committed to moving forward with some timeline adjustments. Flexibilities granted by the state controller (e.g., extended period for Year 1 grant fund expenditures, continuation of related activities into the next fiscal year kept momentum of the grantees. Funding was re-established for the 2021-22 fiscal year, with the 2020-21 year serving as an extension year. Year 2 of the grant took place from July 2021 to June 2022, with 10 grantees participating. Year 3 is currently underway in the 2022-23 school year.

Impact of COVID-19

Districts continue to face disruptions in implementing the grant activities and completing full data collections due to capacity constraints. In 2021, one grantee declined to continue participation in Year 2 of the grant due to competing priorities. A number of grantees have rolled funds forward each year as they prioritize other activities in their districts and have plans to engage in grant activities into Year 3. Most grantees have committed to continuing the grant work and are engaging with CDE for technical assistance and to share their learnings. This has allowed for a strong start on activities, such as stakeholder engagement, measurement validation, and output development.

Grantee System Development Themes

As grantees have progressed in the development of their systems, CDE has encouraged and supported a clear articulation of a theory of action for each project. While honoring local innovation and flexibility, the department identified a common need for articulating stronger underlying structures across all projects. Therefore, grantees were asked to define their local values, how those values are represented in standards or indicators, and then how those areas are measured and reported. Finally, grantees were asked to describe how those reports are used internally for continuous improvement, and externally for community engagement and accountability. Stakeholder input (including local or regional reflection) was integrated within each stage. Each grantee has its own local approach described [in a series of presentations on the grant website](#).

Year 3 Evaluation

As outlined in statute, a full external evaluation of the local accountability systems is currently in progress. This evaluation is being facilitated by an external contractor and managed by CDE. C.R.S.22-11-705 (5)(a). CDE has selected Augenblick, Palaich, and Associates (APA) to conduct the external evaluation. The evaluation includes a qualitative analysis which will develop generalized quality criteria for local accountability systems and assess their success in driving continuous improvement efforts. A quantitative evaluation is planned for next summer (2023) as more state and local data is available to analyze the impact that program participation has had on school outcomes. This study will be more limited, due to the pandemic's impact on longitudinal data at the state and local levels. Finally, this evaluation will include a summary of the learning generated through the duration of the cohort, focused specifically on potential implications for the Colorado state accountability system.

Observations from CU Denver Center for Practice Engaged Education Research (C-PEER)

In anticipation of the end-of-cycle evaluation (Year 3), the department contracted with CU-Denver's Center for Practice Engaged Education Research (C-PEER) to conduct interviews, provide site mappings and lift out high level overarching observations. This is a summary of the overarching themes for the individual grantee projects:

- Local accountability systems allow for mechanisms by which leaders can utilize data and feedback that is actionable, timely, and relevant to their context.
- A variety of evidence has been used to supplement the state's performance frameworks that is both more expansive and more nuanced. These indicators respond to the local context, reflecting the values identified by local communities, characteristics of students they serve, or the model or design of their schools.
- Several sites described their local systems as focusing on the "whole child" or telling a "fuller story" of their students' growth. Examples of additional student-level indicators or outcomes include: social emotional learning; student engagement; student dispositions towards learning; student well-being; and nonacademic outcomes related to being a prepared graduate (e.g., critical thinking, life skills, and accessing learning opportunities).
- Some of these innovations allow for local leaders to reflect on their performance in collaboration with their peers (e.g., networked learning and intra-system accountability) and their stakeholders (public reporting and engagement with families and the community).

Observations from CDE

In addition to the observations from CU Denver C-PEER, the department has found that supporting local accountability systems within BOCES, districts and schools increases enthusiasm and engagement in the continuous improvement process. Technical assistance and networked learning opportunities support the advancement of the work, as well as ensure state and federal requirements are met. Some challenges remain, including local staff turnover or leadership transitions, maintaining annual updates to alternative improvement plans (including format changes, deadline management and department review) and ensuring scalability of supplemental or alternative submissions.

Recommendations from Grantees

Grantees shared specific recommendations for state leaders within their end of year presentations. Recommendations included continued support for local grantee systems including networking opportunities, capacity expansion, and alignment to state assessments. Grantees also provided recommendations for modifications to the state accountability system, collaboration across state agencies, and specific supports from CDE.

Introduction

The Colorado legislature authorized the Local Accountability Systems Grant Program through S.B. 19-204, to provide districts with added flexibility to design accountability systems that are a more comprehensive reflection of their local priorities and values. The grants are intended to support districts and schools in piloting the adoption and enhancement of local accountability systems to supplement the state accountability system. In determining student success, grantees have been given flexibility and support to supplement the statewide performance indicators by using additional measures of student success. Per statute, additional indicators may include academic and non-academic student outcomes, such as changes in student engagement, attitudes, and mindsets. A local accountability system is supplemental to the state accountability system and may be designed to:

- a) Fairly and accurately evaluate student success using multiple measures to develop a more comprehensive understanding of each student's success, including additional performance indicators or measures, which may include non-academic student outcomes such as student engagement, attitudes, and dispositions toward learning;
- b) Evaluate the capacity of the public-school systems operated by the local education provider to support student success; and
- c) Use the results obtained from measuring student success and system support for student success as part of a cycle of continuous improvement (C.R.S. 22-11-703).

Local Accountability System Grant Focus Areas

- Public Reporting Dashboards
- Site Visit Protocols & Rubrics
- Non-Academic Indicators
- Stakeholder Values Collections
- Alternative Approaches to Improvement Planning

This program is also intended to enable the state to learn from innovative practices in the field. The Colorado Department of Education (CDE) is expected to evaluate the effectiveness of the local accountability system (after Year 2), as well as convene grantees to facilitate and support learning.

After the legislation was enacted, CDE developed a [competitive grant process](#) in Fall 2019. Applications were due in December 2019 and the review panel recommended 11 applicants for participation in the grant, awarding between \$25,000 and \$75,000 per grantee per year over a three-year period (depending upon grant dollar availability). The total award in Year 1 was \$480,025. The State Board of Education approved all recommended proposals and grant amounts in March 2020.

In response to the pandemic, the State Controller offered a no-cost extension of Year 1 funds into the 2021 fiscal year, giving grantees until June 30, 2021, to expend Year 1 funds. Further, the General Assembly suspended the program as part of its 2020 budget balancing package, resulting in cancellation of Year 2 (July 2020-June 2021) awards. This Year 2 funding included support for the local grants, as well as a 0.5 FTE at the Colorado Department of Education. At the end of the 2020-21 legislative session, the General Assembly reinstated the grant program. The department released Year 2 funding of the grant in July 2021 and funding is available through June 2022. Year 3 of the grant began in July 2022 and is scheduled to end in June 2023.

Grant Membership

The approved grantees include five consortia of districts or schools collaborating to develop their local accountability system and five districts or schools working independently. Seven grantees are working with an Accountability System Partner, including Northwest Evaluation Association (NWEA), University of Colorado (CU)

Boulder, CU Denver, Breezy Strategies, Marzano Academies, Momentum Strategy and Research, Generation Schools, WestEd and Cognia. The grantees represent a wide variety of district and school sizes across the state, and the projects are quite varied. In June 2021, Garfield 16 declined continuation in the grant due to conflicting priorities because of the pandemic. A more detailed list of the grantees and partners can be viewed in Table 1.

Table 1. Summary of Local Accountability Systems Grantees (2021)

PROJECT FOCUS	LEAD APPLICANT	PARTICIPATING SCHOOLS AND DISTRICTS	REGION	ACCOUNTABILITY SYSTEM PARTNER

*Garfield 16 is no longer participating in the grant, due to constraints related to the COVID-19 pandemic. Remaining funds were shared between current grantees, as eligible.

CDE Activities to Support Grantees

During the 2020-21 year 1 extension, CDE and the Colorado Education Initiative (CEI) facilitated a series of grantee convenings in June 2020, October 2020, March 2021, and a culminating May 2021 session to record the Local Accountability System presentations. Each session included [presentations from grantees](#) on their work to date, and networking opportunities to discuss successes and challenges. CEI and CDE also provided technical assistance to grantees upon request. Available topics included a variety of areas, such as measurement development, reporting and visualization, and stakeholder engagement. Surveys of grantees demonstrated that they found the technical assistance opportunities valuable, and greatly appreciated the opportunity to network, troubleshoot and share learnings across grantees.

During the 2021-22 Year 2, CDE facilitated an additional set of grantee convenings in October 2021, March 2022 and May 2022. These convenings included networking, planning, a learning session on local measures presented by the Center for Assessment (NCIEA), and discussions on evaluation planning and grantee mapping. Additionally, CDE and grantees collaboratively presented at the Colorado Association of School Executives (CASE) conferences in February 2022 and July 2022.

Impact of COVID-19

Despite disruptions in budgets, instructional time, availability of assessments and staff capacity due to the pandemic, the majority of grantees have committed to continuing the grant work and are engaging in technical assistance through the state and have participated in periodic convenings to share their learnings. However, the disruptions impacted project timelines and some grantees are not as far along as originally anticipated.

Challenges with Measurement and Validity

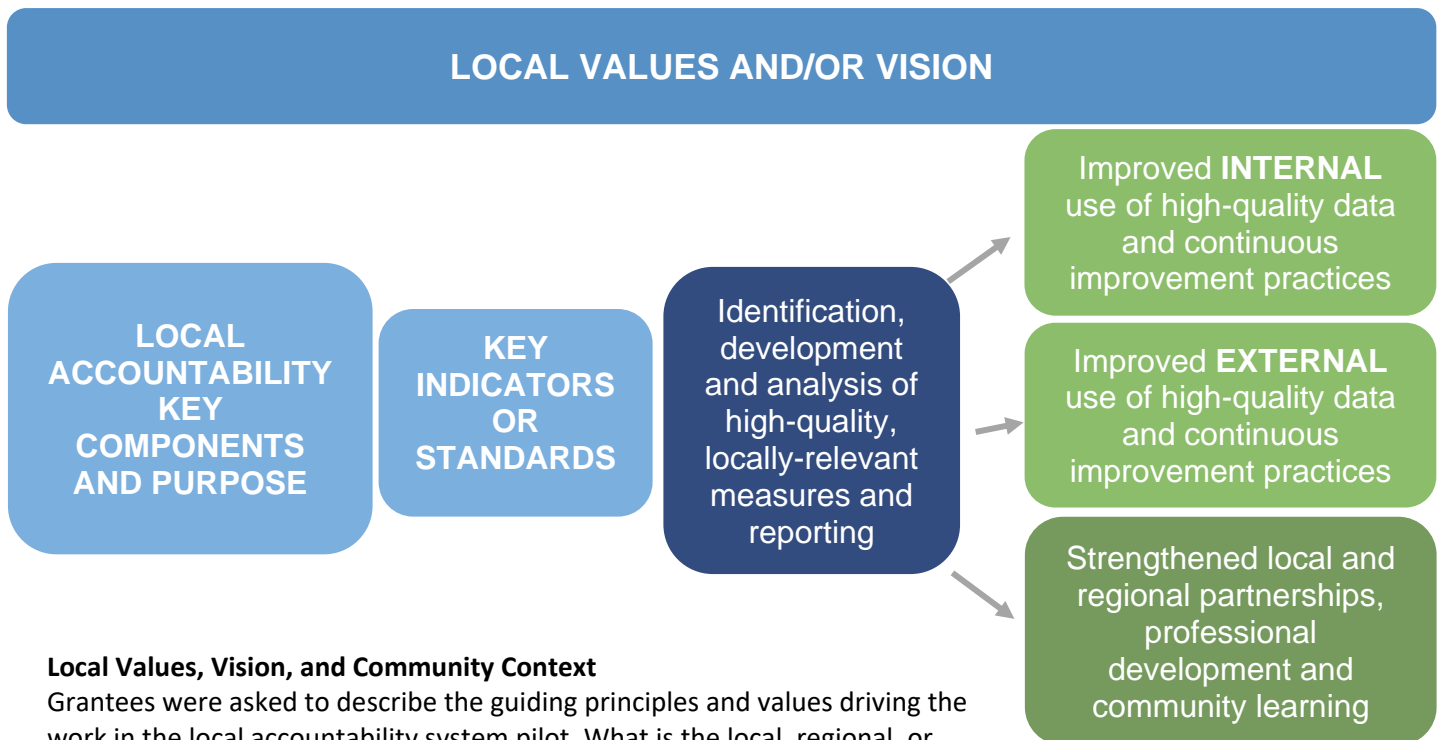

Participating schools and districts have raised concerns about the ability to collect data through existing systems and the need to develop new data collections to appropriately measure the impacts of the program. The cancellation of state assessments in spring 2020; low participation in alternating grades and content areas in 2021; and transitions between remote, hybrid and in-person instruction in the 2019-20 and 2020-21 school years have resulted in inconsistent opportunities to assess students, evaluate systems and/or conduct diagnostic reviews. This has resulted in major setbacks for all grantees in generating norms or setting baseline data, testing new collections, and/or ensuring the validity of existing collections. These challenges will have longer term impacts, as trend data is an important component of continuous improvement and program evaluation.

Time and Capacity

Due to the complexity of managing multiple instructional modalities, responding to new health and safety requirements and general increase in staff demands due to COVID-19, all participating districts reported that timelines for local accountability system grant work have been disrupted over the grant period. The work in multiple districts has been de-prioritized both due to competing staff demands and issues with data collections and validity described in the section above.

Theory of Action

To support grantees in articulating why there is a need for locally developed measures, CDE asked grantees to articulate a logic model to describe how the grantee’s values and vision drive what is prioritized in the district; what is collected, analyzed, and reported; and how those results are used. Usage is split into three categories: internal improvement, external community engagement, and general system improvement through shared learning.

Local Values, Vision, and Community Context

Grantees were asked to describe the guiding principles and values driving the work in the local accountability system pilot. What is the local, regional, or community context represented in this work?

Key Components, Purpose, and Features of the System

What does the system attempt to measure, within areas such as culture and climate, student learning, resources, operations, opportunities?

Key Indicators or Standards

What are the expected outcomes of what the system is measuring? On what areas does the system place value (student, teacher, educational system, community)?

Measures and Reporting

What data sources and measures are incorporated into the model? How are measures shared and summarized? How are results ranked, rated, or weighed?

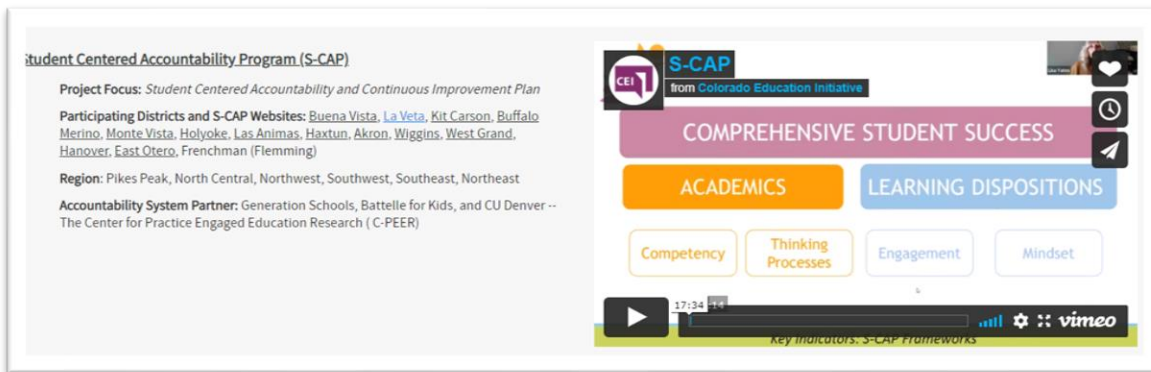

Progress toward Shared Outcomes

- How are the data and reports utilized by consortium, districts, and schools for continuous improvement within the system?
- How are data and reports utilized by families, stakeholders, peer districts or schools, or the broader community?
- How has the system led to strengthened local or regional partnerships, professional development, or community learning?

Presentations on Theory of Action

In Spring 2021, CDE, in partnership with the Colorado Education Initiative (CEI), recorded presentations of grantee progress in their system development. Presentations included an overview of the system’s component parts, as well as lessons learned and recommendations for the state. These recordings are available on the [Local Accountability System Website](#). Some excerpts are included below from the Student Centered Accountability Program, Cañon City, Boulder Valley School District and District 49.

Local Accountability System Grantee Website Video 1

Example Theory of Action Presented by Cañon City

“The Cañon City School District believes by taking an in-depth look at each of its schools on an annual basis, through the lens of what it collectively strives to achieve as an educational system, it will identify opportunities for improvement and growth to assist schools in more effectively reaching their goals.”

Cañon City’s Mission and Vision

The work Cañon City is doing stems from their commitment to innovative opportunities and the focus on specific trait and skill development.

Cañon City Graphic 1 District Vision, Mission and Core Beliefs that drive the Local Accountability System

Our Vision and Mission

The Cañon City School District is future-focused, providing innovative educational opportunities to successfully prepare all students to meet any challenge they may face.

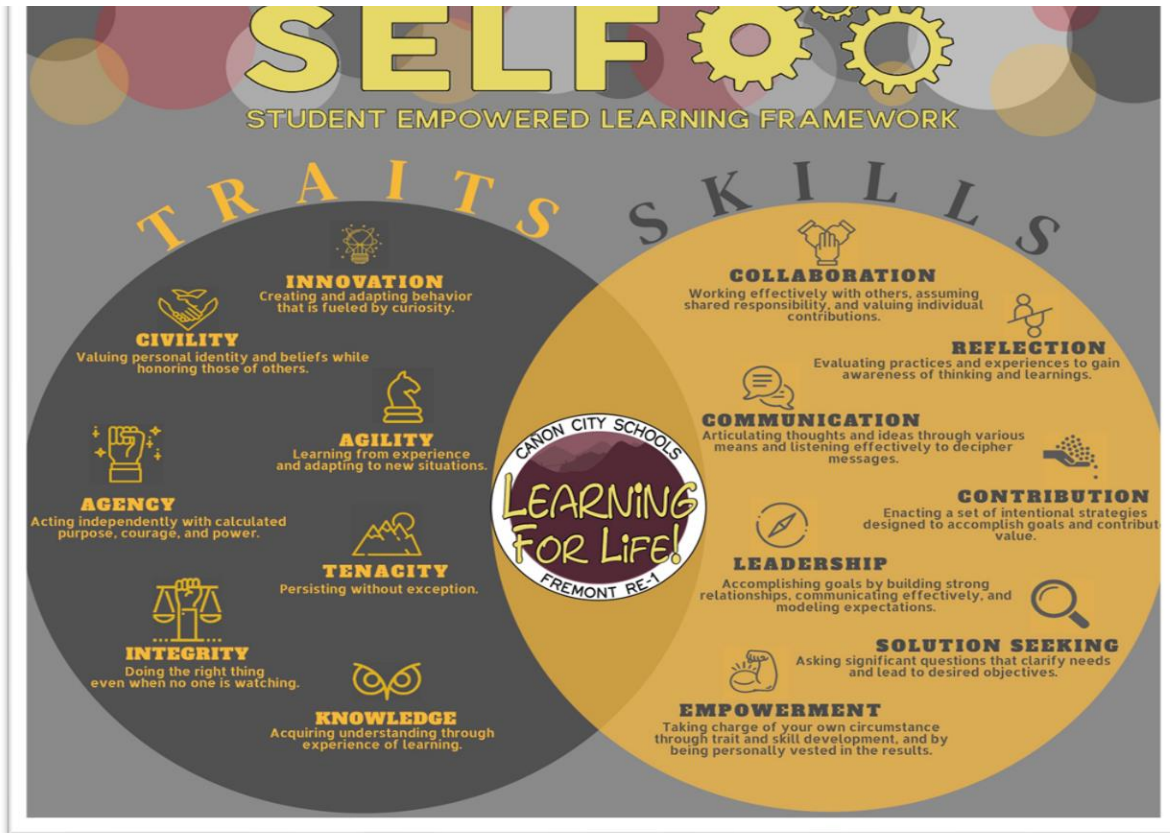

Our Core Beliefs

- We meet the social-emotional needs of all students, putting Maslow’s Hierarchy of Needs before Bloom’s Taxonomy.
- We believe learning growth matters most, requires risk-taking, and the work we do in our schools has the greatest impact on this.
- We’re future-focused, believing the development of certain traits and skills will best prepare our students for ever-changing careers.
- We emphasize what is good for kids over the needs and comfort of adults.

Indicators and Standards

The SELF framework focuses on specific traits (e.g., Civility, Agency, Innovation, Knowledge) and skills (e.g., Collaboration, Leadership, Contribution, Reflection). This becomes the basis for measurement.

Cañon City Graphic 2 – Student Empowered Learning Framework Traits and Skills

Measures and Reporting

Cañon City then uses a district created rubric aligned to the indicators and standards to observe instruction; survey families, students and staff; and evaluate building activities. They then complement the observational and perception data with academic, social-emotional, and behavioral data. All inputs are then deliberated and calibrated at the district level, and a web-based report is shared with staff and each school community.

Cañon City Graphic 3 – Rating system for evaluation rubric

I. Focus on Climate, Culture, Vision, and Purpose	IV. Focus on Equity of Opportunity
<p>I = Ineffective (SE) = Somewhat Effective (E) = Effective (H) = Highly Effective</p> <p>I (SE) (E) (H) The culture, vision, and direction of the school are personalized, well-defined and clearly supported by the staff.</p> <p>I (SE) (E) (H) It is evident the staff chosen culture is adhered to and the school climate is positive.</p> <p>I (SE) (E) (H) No matter the personalized direction of the school, support for the district's core beliefs is evident and active.</p> <p>I (SE) (E) (H) Instruction in the development of district identified traits and skills is observable and measurable.</p> <p>I (SE) (E) (H) Student success is well defined, measured, and relevant to what we know about the future.</p> <p>I (SE) (E) (H) School procedures are clear, effectively communicated, and enforced equitably.</p>	<p>I = Ineffective (SE) = Somewhat Effective (E) = Effective (H) = Highly Effective</p> <p>I (SE) (E) (H) It is evident the school rarely tracks or ability groups students and low-track classes have been eliminated where appropriate.</p> <p>I (SE) (E) (H) All students have access to accelerated learning opportunities with appropriate supports.</p> <p>I (SE) (E) (H) All students who wish to take advanced or challenging courses are encouraged and supported in doing so.</p> <p>I (SE) (E) (H) Barriers to participation in educational and enrichment programs are alleviated or eliminated to ensure all student populations have access to them. This includes considerations for transportation, program fees, and purchase of required equipment, supplies and materials.</p> <p>I (SE) (E) (H) There is evidence of a high rate of inclusion of low socio-economic populations in advanced and gifted learning opportunities.</p>

Shared Outcomes

Cañon City worked with community leaders, including the mayor, business counsel, community college dean, and community health administrators to develop the rubric, surveys and site visits. This was done to ensure the community was supportive of the process and outcomes. The system works to create internal and external understanding of the vision, mission, core beliefs, and profile of a graduate. Work with the accountability partner, CU Boulder’s CADRE, and the consortium of Boulder Valley School District, Greeley and Gunnison-Watershed allows for shared learning and system improvements (e.g., rubric review, development of exemplars).

Examples of Stakeholder Engagement

As grantees have progressed toward a comprehensive accountability and continuous improvement system, here are two examples of how grantees have collaborated with stakeholders (including internal and external groups) to gather values, define standards or indicators, and determine appropriate metrics.

Boulder Valley School District has worked with multiple stakeholder groups and their accountability partner, CU Boulder – CADRE, to gather recommendations, iterate and present back to stakeholders on their Opportunity to Learn measures (e.g., enrichment opportunities and enrichment program quality, after-school time offerings, course taking opportunities). The district now has [published metrics](#) connected to their strategic plan on their district website.

Boulder Valley School District Graphic 1 – Overview of stakeholder engagement process, including District Accountability Committee, CU Boulder research, Stakeholder Committees, and Board of Education feedback.

District 49 was directed by their board to report out on community priorities for school performance. This engagement included work with District and School Accountability Committees, community surveys, observed student progress, teacher feedback, staff and student data, and direct supervision. They used a program called Thought Exchange to gather feedback from over 1,000 members of the broader District 49 community. District 49 now This has culminated in [zone based planning and data dashboards](#).

District 49 Graphic 1 –Thought Exchange community feedback on accountability themes and priorities: Student Learning, Safety/Security, and Operations/Leadership were the three highest responses (after unrelated themes)

Grantee Flexibility: Alternative Improvement Plans

Four grantees, [Fountain-Fort Carson](#), [District 49](#), and [S-CAP member districts](#) and a subset of [NE BOCES districts](#) took advantage of the alternative improvement planning format flexibility provided by the grant. CDE reviewed the district templates to ensure that the alternative format met state and federal requirements and State Board of Education rules. District and school plans were submitted and posted on the [CDE website](#) under the link “Alternative Improvement Plan.”

Performance Framework Graphic 1 – CDE Website that includes Frameworks, Improvement Plan or Alternative Improvement Plan

Grantee Flexibility: Supplemental Performance Reports

In response to disruptions created by COVID-19, the Colorado state legislature paused state accountability for a second year (H.B. 21-1161). The department also applied for and received waivers from the U.S. Department of

Education for additional flexibility on federal accountability requirements and use of funds. These policy adjustments paused publishing of state supplemental performance reports or frameworks in 2020 and 2021. In the 2022-23 school year, the [Transition Back to Standard K-12 Accountability” bill \(SB 22-137\)](#) legislation requires the department calculate frameworks in 2022-23, but suspends automatic advancement on the accountability clock.

During this time, the grantees continued to work on their supplemental reports, which were presented as combined, single access point data dashboards, such as:

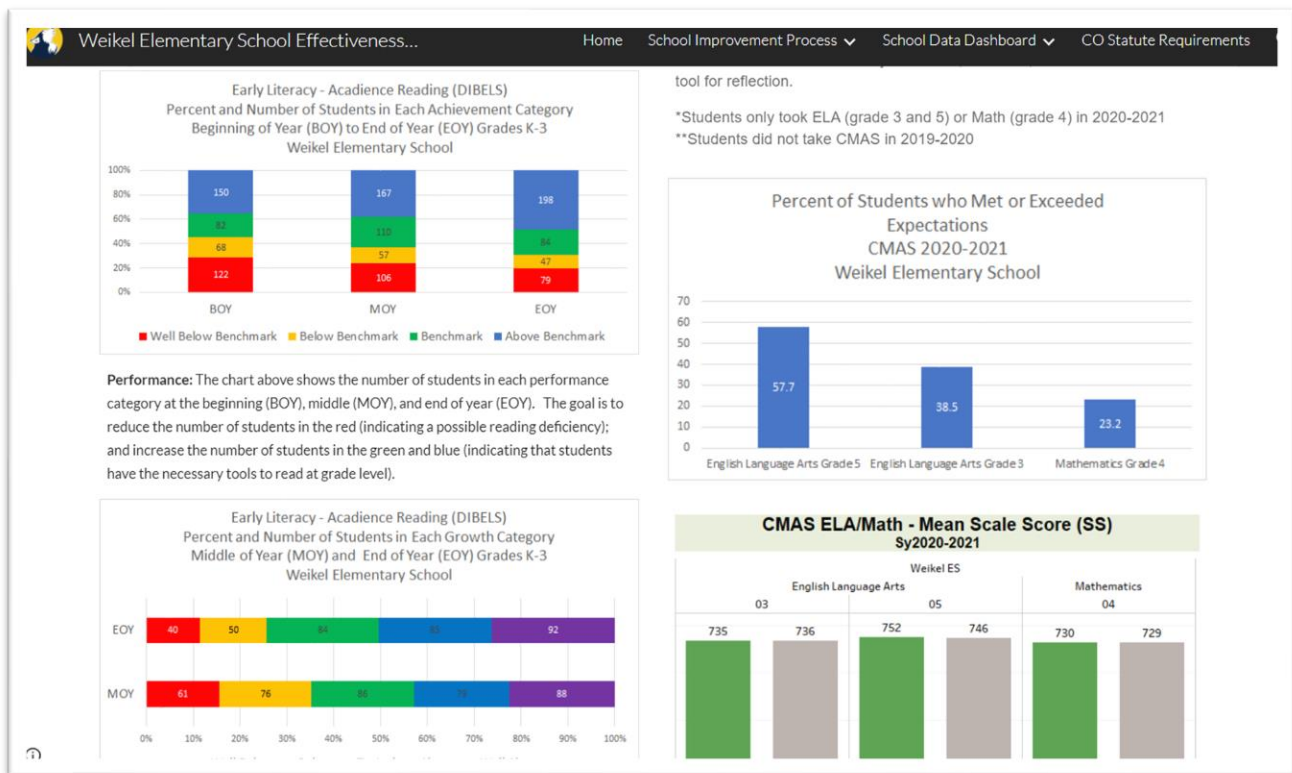

- [Jefferson County’s School Insights](#)
- [Boulder Valley’s strategic planning metrics](#)

Individualized school reports such as:

- The Measuring Opportunites Pilot Program (MOPP) [Supplemental Performance Reports](#)

Or comprehensive websites that include both improvement planning and data reporting dashboards such as:

- S-CAP’s [System Support Review \(SSR\) rubric based dashboards](#), [strategic priorities](#), [academic dashboards](#) and [Learning Disposition dashboards](#).
- Fountain-Fort Carson’s [academic performance page](#) displays district assessments (e.g., DIBELS, Illuminate) while the [culture and community page](#) includes attendance, behavior, student and family perception, and faculty and staff feedback data.

Fountain-Fort Carson Website 1 – Each school has a website that includes the improvement planning process, a school data dashboard, and a review of site visit rubric results.

2022 Southwest Open School END OF YEAR SUPPLEMENTAL ACCOUNTABILITY REPORT

ACCOUNTABILITY DURING COVID

The Measuring Opportunity Pilot Project (MOPP) was created and funded to incorporate innovation in accountability for Colorado AECs. As part of MOPP, a Supplemental Accountability Report was created to allow schools to collect and report data that is not traditionally included in their accountability reporting, but they believe is impactful in serving their students' needs. However, COVID-19 created disruptions in all aspects of our lives, including in education functionality and accountability. Two years ago, the Colorado State Legislature issued an accountability pause for two years due to the pandemic. Last year, the MOPP Project Team wanted to provide our participating schools the option to share any data they were able to collect in 2020-21, and that data went into MOPP 'Progress Reports'.

With accountability and AEC SPFs resuming this year, MOPP is going back to the originally intended MOPP Supplemental Accountability Report (SAR). This report includes data and/or calculations of data not included in AEC SPFs, but that the school believes is essential in telling the story of their school's mission, student population(s), and specific programming.

As a part of MOPP, Southwest Open School (SWOS) has identified measures that are specifically aligned and prioritized to match their mission, and consequently the programming and services most import to SWOS students' lives. Recommendations coming through MOPP's measure alignment process include optional measures that schools are not utilizing or reporting effectively, unique measures to show the performance of specific student populations, and/or participation in the Student-Centered Growth System, a Qualitative Review Cycle, and the AEC SEL Survey.

This Supplemental Accountability Report includes narratives and supporting data for the additional metrics to demonstrate how customized accountability plans strengthen Colorado AECs.

AEC SEL SURVEY

During the MOPP measure alignment process, the Project Team found that every school received a recommendation for and expressed interest in adding a social-emotional optional measure. With schools not finding surveys that fit the needs of their school and students, the MOPP Project Team convened a taskforce of MOPP schools and other AEC leaders to review several social-emotional and school climate surveys and create a survey for use by AECs across the state. The group considered items for clarity/relevance, content, overall survey length, and whether items could be used to track student growth. Ultimately, the selected survey includes content from a few previously developed surveys, which means the surveys have already been validated. The survey includes items regarding social-emotional development (using CASEL's identified 5 pillars of SEL: self-awareness, self-management, social awareness, relationship skills, and responsible decision-making) and school climate.

MOPP - Southwest Open School Supplemental Report 1

STUDENT CENTERED GROWTH SYSTEM (SCGS)

Participating in the Student-Centered Growth System was recommended to AECs that want to understand the challenges their students arrive with, document individual student progress while enrolled in the school (often for short periods of time) and communicate these data effectively. The SCGS measures incoming and ongoing individual student progress over three domains: academic standing, academic engagement and participation, and social-emotional well-being and need. The measures selected for each domain are aligned with the school's programming and support services.

Using the SCGS index, a school can identify a student's level of engagement in each of the domains.

STUDENT ENGAGEMENT PHASE	GENERAL DESCRIPTION
Engaged	Little support is needed, student can focus on schoolwork for large chunks of time, and student is close to or at grade level
Emerging	Substantial supports needed, student's focus in an educational setting or on assignments is minimal, and the student is behind grade level
Disengaged	High needs but never attends, will not respond to calls/visits, no caregiver can be reached

SCGS is designed to support schools in (1) using data to identify students' needs, (2) monitoring students' progress over time on more than just academic gains, and (3) providing the opportunity for the school to differentiate goals for student growth and achievement based on each student's highest priority needs. For the 2021-22 school year, Southwest Open School (SWOS) collected data where possible. To help facilitate this process, the MOPP Project Team developed the SCGS Calculator, an Excel document with formulas to help with capacity and analysis at the school level. SWOS selected metrics for the 2022-23 school year can be found below.

Student-Centered Growth System	
Qualifiers	Emerging, Developing, Engaged NWEA MAP Reading NWEA MAP Math NWEA MAP Language Usage Credit accumulation - age and credit based
Academic Standing	Attendance Behavior logs SEL scale - Self-Management: School Work
Academic Engagement and Participation	Number of student challenges/barriers to success SEL scale - Relationship Skills SEL scale - Self-Concept SEL scale - Emotion Regulation
Social-Emotional Well-Being and Need	SEL scale - Responsible Decision Making

Measures, Evidence, Evaluation and Recommendations

Measures and Performance Indicators Included in Each Local System

Grantees are required to report out the measures and indicators utilized to evaluate progress toward implementation of local priorities. These can include summative and formative assessments of student achievement and growth, process, progress, opportunity, participation or perception data, rubric based evaluations, and trend or change information.

Table 3. Measures and Performance Indicators by Project

Evaluation: Evidence Provided by the Grantees of Effectiveness in Measuring Quality

A majority of grantees are currently designing and developing the structure of their systems, including products and deliverables. As outlined in statute, a full external evaluation of the local accountability systems is currently in progress. This evaluation is facilitated by an external contractor and managed by CDE. C.R.S.22-11-705 (5)(a). CDE has selected Augenblick, Palaich, and Associates (APA) to conduct the external evaluation. The evaluation includes a qualitative analysis which will develop generalized quality criteria for local accountability systems and assess their success in driving continuous improvement efforts. A quantitative evaluation is planned for summer of 2023 as more state and local data is available to analyze the impact that program participation has had on school outcomes. Finally, this evaluation will include a summary of the learning generated through the duration of the cohort, focused specifically on potential implications for the Colorado state accountability system.

Additionally, some project participants are further providing local program evaluation by engaging with internal and external audiences to gather feedback. For example, the S-CAP System Support Review and Fountain Fort Carson’s Student Effectiveness Matrix have received positive anecdotal feedback from participating school and district leaders regarding the value of the formal reviews, including leadership development, improvement targets and evaluation.

Preliminary Findings: CU Denver’s Center for Practice Engaged Education Research

To prepare for the year 3 project evaluation outlined in the legislation, the department contracted in year 1 and 2 with C-PEER to conduct grantee interviews, develop descriptive site mappings, and lift out high level overarching observations. This is a summary of the overarching themes for the projects:

- All of the grantees used and supplemented the CDE School and/or District Performance Frameworks (SPF/DPF), a core component of the Colorado state accountability system. The standard SPF and DPF performance indicators (and associated measures) focus exclusively on the *academic outcomes of students*.
- With their local accountability systems, school and district leaders aimed to provide a more comprehensive and, in most cases, a more nuanced story of the performance of their schools to supplement the SPF reports.
- The systems provide feedback to local stakeholders about their schools that includes an expanded set of performance indicators related to the success of their students. Grantees explained that these additional performance indicators respond to their local context -- reflecting values identified by their communities, the characteristics of the students they served, or the model/design of their schools. Several described their local systems as focusing on the “whole child” or telling a “fuller story” of their students’ growth.
 - Examples of additional student-level indicator or outcomes include: social emotional learning; student engagement; student dispositions towards learning; student well-being; and nonacademic outcomes related to being a prepared graduate (e.g., critical thinking, life skills, and accessing learning opportunities).
- The local accountability and improvement systems also include school or district performance indicators that *expanded beyond the academic outcomes* of their students.
 - Examples include the following: School Climate/Culture; Curriculum; Instruction; Leadership and Vision; Professional Learning Business/Community School Partnerships; and the Alignment of Learning Offerings to Student Needs.
 - These systems used a variety of types of evidence to measure these indicators, including for example: student, family, and educator surveys (including expanding the use of TLCC); student, family, and educator focus groups; teacher observations of students; site visitor observations of classrooms; student learning presentations/products; and student participation in advanced courses

Grantee Themes:

- Several of the projects used grant funding to develop or expand comprehensive local accountability and improvement systems (e.g., Cañon City, VCA, Fountain Ft. Carson, MOPP and S-CAP).
- All the systems established mechanisms by which school leaders and staff received feedback that was actionable, timely and relevant for their context.
- Grantees used a variety of different types of evidence, included local leaders reflecting upon and presenting their understanding of their school or district performance as part of their systems and placed significant emphasis on expanded involvement of internal and external (community, parent) involvement in their accountability and improvement processes.
- Several established time and processes for educators and leaders to learn with and from one another (across schools or districts). For example, both MOPP and S-CAP described the schools and districts in their partnership as a networked learning community with built-in time and structures to learn together.

- Many of these local accountability systems incorporated site visits that engaged different school/district stakeholders and colleagues from other schools or districts in providing feedback to leaders about their schools' performance.
- Other projects primarily emphasized enhanced visualization of and support for analyzing and interpreting evidence related to school performance (Jeffco and NE BOCES).

Observations from CDE

The department supports the observations made by CU-Denver C-PEER. In addition, CDE has a few more observations:

- Grantees demonstrate enthusiasm and a sense of ownership of local accountability related improvement efforts as demonstrated by continued engagement with peer grantees, a focus on system evaluation, and willingness to share learnings with the public.
- This work has required a tremendous amount of dedicated time on the part of the participating grantees. As noted in the pandemic impact, some of the work has been deprioritized due to other competing demands.
- Grantees benefit from ongoing convenings and technical assistance to strengthen their theory of action as they complete the complex work of their projects. To date, supports have been provided by their selected technical expert/partner, CDE, the Colorado Education Initiative (CEI) or other grantees.
- Site staff need assistance understanding related state and federal requirements and how to best integrate those requirements within their local innovations. State and federal requirements provide a minimum bar for identification and improvement supports.
- Staff turnover (especially grant leadership) impacts the continuation of local accountability system activities (e.g., assessment transitions, changes to mission and vision). Some sites have been able to re-commit to the work in new ways, but others have struggled to inherit another leader's vision.
- Community/stakeholder engagement is needed at every stage of the identification and continuous improvement cycle to make new local systems responsive and meaningful.
- Local Accountability Systems grantees focused exclusively on internal and external continuous improvement efforts. Interventions and tiered supports have not been a target area.
- Annual maintenance of alternative improvement plans has taken a significant level of effort, including CDE's supervision of plans meeting state and federal requirements, collection, publishing and review.
- School districts may also have challenges maintaining web tools, integrating plans with updated local data, and leveraging reports as both administrative supervision tools and community report outs.
- While CDE has been able to post grantees' reports on the state website, further investigation into processes, systems and capacity (e.g., technology platform) would be needed before considering broader scale-up.

Grantee Recommendations to CDE, Legislature, and State Board of Education (SBE)

As a part of the end-of-year [presentations](#) in 2021, grantees were asked to share emerging recommendations based on their experiences developing local accountability systems. These recommendations are discussed in more detail by grantees within their presentations and have been edited and organized here for clarity. Recommendations will continue to be collected from grantees and this section will be updated after the CU Denver C-PEER mapping and the APA evaluation work is completed in year 3 of the grant.

Grantees' recommendations include:

On the Grant

- Continue funding for innovation in accountability to support longer-term outcomes.
- Encourage and support more districts in defining success locally and creating processes by which they can measure their attainment of that definition.
- Promote non-assessment data for accountability, just as it has been promoted for school improvement.
- Support a network of districts to develop standardized but optional measures for school culture (e.g., 21st century learning, social emotional wellness).

For the Community

- Keep parent engagement at the center of decision-making.
- Ensure that accountability documents and tools are parent friendly.
- Ask parents about their reporting priorities (e.g., one district reports that their parents prioritized information unrelated to achievement and growth).
- Increase collaboration between CDE, the Colorado Department of Higher Education (CDHE), the Colorado Workforce Development Council and the Colorado Department of Human Services (CDHS).

Supports from CDE directed by the SBE or State Legislature

- Create a dedicated state level resource to support local accountability (e.g., FTE at the department, intermediary organizations that can support local accountability conceptually and technically).
- Develop a network of consultants to support post pandemic analytics for improved and appropriate use of data.
- Build capacity for districts to sustain this work.
- Streamline data sharing processes so that support organizations can more easily work with multiple districts, obtaining relevant data from CDE.
- Play a facilitator role in the creation of surveys like the Teaching and Learning Conditions in Colorado (TLCC) survey that can be utilized by any interested districts to better understand learning climate and dispositions.

For State Accountability directed by the SBE or State Legislature

- Provide more options beyond state assessment data for continuous school improvement.
- Build in ways to capture innovations seen at schools within the accountability system.
- Encourage and fund new and innovative ways of measuring success of students.
- Avoid an accountability system that “ranks” based on single or limited academic measures.
- Diversify evidence sources to focus on system improvement efforts.
- Focus on the “whole child,” not just academic performance.
- Support improvement efforts based on evidence of system supports that are directly connected to student success.
- Consider opportunities to increase community understanding of postsecondary and workforce readiness as part of accountability systems to leverage existing trust in data.

For Local Accountability Support from State Policy Makers

- Continue to encourage local ownership of accountability and improvement systems.
- Equip local boards with the tools and skills necessary to monitor and assess system outcomes.
- Tap into the power of peer feedback and reflection – those providing and receiving the feedback benefit.
- Embed effective research with national connections when informing accountability system improvements.

Conclusion

Despite the impacts of COVID-19 disruptions, grantees made a commitment to moving forward with the work with some alterations to the timeline. Focus has been placed on designing strong, evidence-based, scalable, maintainable, and replicable systems. Grantee engagement continues to be high throughout the school year, and grantees reported that grant supports, work with accountability partners, networking, technical assistance and presentation opportunities have led to local system reflections and improvements. With the resumption of the state and federal accountability system in 2022, grantees have been able to pair their supplemental performance reports and alternative improvement planning formats with CDE published reports. CDE will continue to update the legislature and other stakeholders on the progress of grantees through the annual grant program report and through the grant website, as well as the evaluation at the end of Year 3 activities presented in the January 2024 legislative report.
