STATE OF COLORADO
DEPARTMENT OF PUBLIC INSTRUCTION

Twentieth Biennial Report

OF THE

State Superintendent of Public Instruction

FOR THE

Official Period Ending 1914

MARY C. C. BRADFORD
State Superintendent of Public Instruction

DISTRIBUTION OF THIS REPORT.

According to legal requirement, this biennial report of the State Superintendent of Public Instruction is to be distributed in the several counties. The County Superintendents will act as distributing agents, and it is suggested that these officials supply:

One copy to each school district.

One copy to each newspaper in the county.

The remainder, as may be demanded, to teachers and citizens.

The State Department of Public Instruction reminds school officers that it is their duty to preserve all educational reports, copies of the School Law, and Course of Study, and transmit them in good condition to their successors in office.

STATE OF COLORADO,
DEPARTMENT OF PUBLIC INSTRUCTION,
Denver.

To His Excellency,
THE HONORABLE ELIAS M. AMMONS,
Governor of the State of Colorado.

Dear Sir—In compliance with the provisions of the law, I have the honor to transmit to you the Twentieth Biennial Report of the Educational System of the State of Colorado, for the term ending November 30, 1914.

Very truly yours,

Mary C. C. Bradford.

State Superintendent of Public Instruction.

STATE OF COLORADO,
DEPARTMENT OF PUBLIC INSTRUCTION,
Room 9, Capitol, Denver.

OFFICIAL STAFF, 1912-14.

MARY C. C. BRADFORD,
State Superintendent of Public Instruction and Ex Officio
State Librarian.

ALICE BELL CLARK,
Deputy Superintendent.

ALICE LAMBERT,
Assistant Librarian.

JENNIE CAWARD JACKSON,
State Teacher of the Adult Blind.

IVY L. MATTESON,
Stenographer.

HARRIET G. R. WRIGHT,
Clerk.

MODEL EXHIBIT AT THE STATE TEACHERS' ASSOCIATION

THE STATE EDUCATIONAL SYSTEM.

The Department of Public Instruction should be the clearing house for all the educational activities of Colorado, the means through which its educational aims, hopes, and decisions may be transmitted to every educational unit in the commonwealth, the realizing agency of Colorado citizens for the welfare of Colorado children. In the past two years the department has taken a few steps toward this goal. Its aid has been utilized as a means of communication between the leading school people of the State, and as an instrumentality for the welding of all the uplift forces of the commonwealth in co-operative action. Its vision has been service through fraternity and unity.

And, indeed, the most marked advance in the educational history of Colorado for the triennial period just ending, is the unification of all school interests. Each unit of educational organization is functioning consciously as a part of the educational will of the commonwealth of Colorado. The professional spirit is beginning to quicken the plans, purposes and acts of school directors, and they, in common with the teaching force of the State, are realizing that they are commissioned officers of Colorado, servants of the State, builders of a mighty commonwealth. A spirit of co-operation is everywhere present, the country school house and the State University alike, serving greatly in a common cause.

The working of the minimum salary law has been of vital moment in the production of this sense of closer unity, the state aid given to weak districts under its provisions helping, if ever so little, to render the opportunities enjoyed by country school children more nearly equal to those afforded for city school children. In this way the relation is made clear between the commonwealth as a whole, and the county and the school district as parts of an integral educational system.

PROFESSIONALISM.

The professional spirit is evidenced by the entire teaching force of Colorado as never before. The great increase in the amount of reading circle work done, the revival of interest in an attendance at the Normal Institutes in every normal institute district in the State, the larger number of those working for collegiate and professional degrees, the growth in enthusiasm and attendance at educational meetings, and the raising of the standard of county certificates by means of county examination questions of a higher grade than heretofore, is evidence of this.

REPORTS OF STATE INSTITUTIONS.

The reports of the University of Colorado, State Teachers' College, State Normal School, State School of Mines, State Agricultural College, Colorado School for Deaf and Blind, State Industrial School for Boys, State Industrial School for Girls, State Home for Dependent and Neglected Children, State Home and Training School for Mental Defectives, show cultural development, practical efficiency and skill in administration. This has resulted in growth in the number of students attending these institutions.

SUPERINTENDENTS.

The work of the County Superintendents during the present administration has been gratifying both from the professional and executive viewpoint. The real authority and dignity of this constitutional office is winning the recognition that it deserves, and the high attainments of many of the Superintendents combined with the consecrated and unremitting service they have given to their part of the school work of this State, is worthy of the highest praise, and must result in greater public appreciation of the important work of this office. City and County Superintendents are working together in a spirit of comradeship that deserves all commendation and that should be developed to a still higher plane if the unification of Colorado school activities is to continue.

THE STATE SCHOOL PEOPLE.

In fact, that great army of soldiers of the common good, known as the school people of Colorado, has marched under the banners of progress in such a way as to be worthy of their past history and to prophesy a period of even greater advancement in the making of citizens, and through that process, the art of State building.

THE DEPARTMENT.

The Department of Public Instruction is delighted to acknowledge its indebtedness to all school workers. It has received appreciation, inspiration, information, loyal friendship and good comradeship from all kinds of workers in the educational field. Particularly to the State Teachers' Association does it owe deep gratitude. The smallness of the office force has made it well nigh impossible to develop ideas into activities, visions into deeds, plans into results. Assistance from the office of the C. S. T. A. has helped materially in lightening the burden and increasing the efficiency of the department.

WILE KICH PHOTO

MODEL EXHIBIT AT STATE TEACHERS' ASSOCIATION

SUB-DEPARTMENTS OF THE DEPARTMENT.

The work of the Department of Public Instruction may be grouped under several heads:

The Publication Work—During the biennial period just ending, this department has prepared for publication, had printed and distributed, two million seven hundred and eighty odd thousand pieces of printed matter, including report blanks of all descriptions, physical examination tests, State Courses of Study, Holiday Books, School Laws, etc.

General Correspondence—About three thousand letters a month are received, answered and filed.

Boards—All the work of the State Board of Education, the State Board of Examiners, and the State Emergency or Call Fund Board, is done in this office, including the recording and keeping of minutes, issuance of certificates, communications with schools and colleges in reference to credentials of applicants for State certificates of all grades, the hearing of appeals and rendering of decisions in all matters of school law, and conducting the correspondence incidental to all these branches of work. In addition, the Superintendent has sent a personal letter with each certificate that has been granted.

Ten meetings of the State Board of Examiners have been held at which five hundred and fifty-two certificates have been recommended. Ten meetings of the State Board of Education have been held at which the recommendations of the State Board of Examiners have been passed upon and certificates ordered issued. Five appeal cases have been heard and decisions rendered. The State Superintendent of Public Instruction is the administrator of the weak district fund, no board having been created by the legislature to have charge of this work. Under the provisions of the minimum salary law, which contains the weak district section, fifteen thousand dollars have been granted to sixty-two districts in twenty-five counties.

It will readily be seen that these three boards, of each of which the State Superintendent is President and the Deputy Superintendent Secretary, and the administration of the weak district fund, involves an immense amount of bookkeeping, record keeping, clerical work and special correspondence.

The department has also laid plans for the standardization of the rural schools, and this task alone means an immense amount of work for the Superintendent, and almost incessant clerical labor.

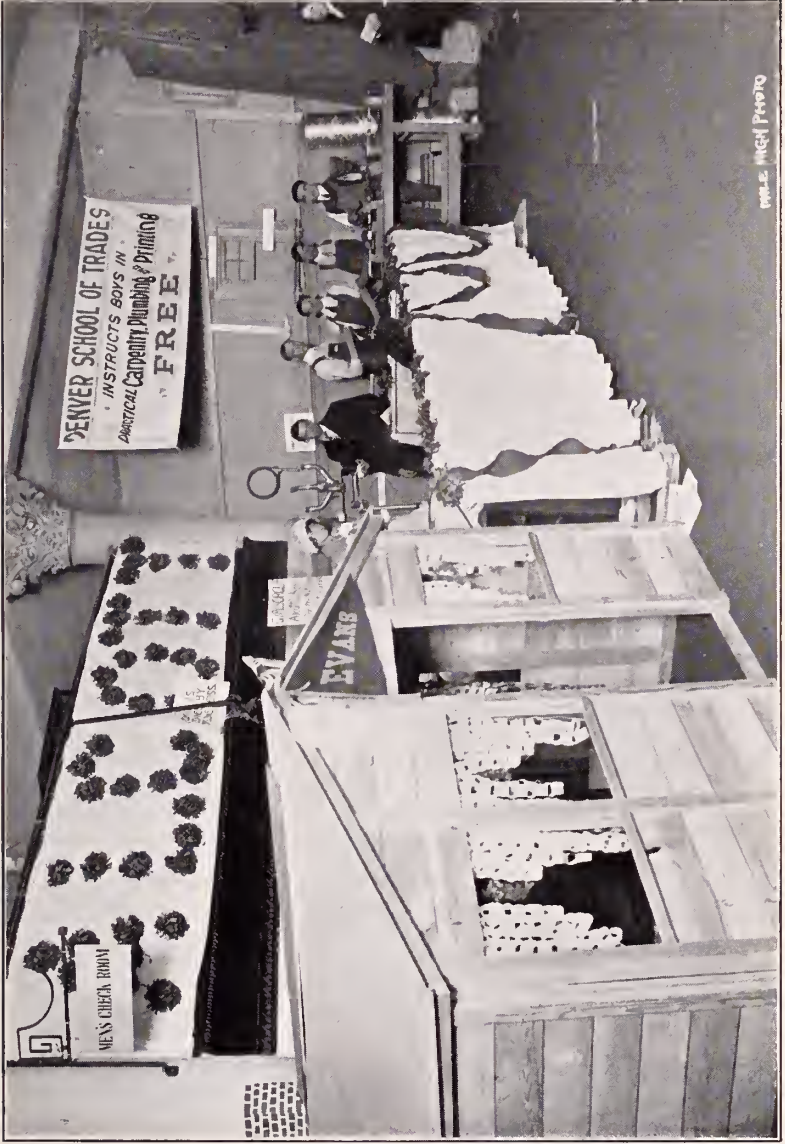

The above resume, carried on with an utterly inadequate clerical force, of some of the activities of the Department of Public Instruction, makes it plain why the assistance rendered by the State Teachers' Association and the management of the Colorado School Journal has been so vitally necessary to the efficiency of the State Office.

The Superintendent has traveled sixteen thousand miles in the performance of her official duties, visited one hundred and fifty schools in thirty-five counties, thirty-two county associations, two county superintendent associations, one superintendent session of the N. E. A., three State Teachers' Associations, and two conventions of the National Education Association. In all these visits she has endeavored to impress upon school people and the citizenry generally, her own profound conviction that "the *chief* business of a republic is education," and she submits this report in the faith that the people of the commonwealth, expressing their will through the legislature, will extend the opportunities for usefulness of the State Department and enrich the educational life of the State by enactments, adding to the power and resources of the Department, to the end that the children of the State may be made the focal point of communal life, their welfare the supreme obligation of the state's public servants.

Respectfully submitted,

Mary C. C. Bradford.

State Superintendent of Public Instruction.

1914-15 High Photo

MODEL EXHIBIT AT THE STATE TEACHERS' ASSOCIATION.

RECOMMENDATIONS TO THE TWENTIETH GENERAL ASSEMBLY.

The school interests of the State require legislation concerning the following improvements in the school system. They are respectfully submitted for the consideration of the Twentieth General Assembly:

1. The improvement of the school election laws of the State.
2. A general revision and reclassification of the rural school organization.
3. Provisions for the standardization of rural schools.
4. Provision for tenure of office of teachers, and amendments to the teachers' pension and minimum salary laws.
5. Provisions for interchange of teachers with other cities in all districts of the first and second class.
6. A revision of the certification law with regard to greater flexibility and a more scientific classification of certificates.
7. Inclusion in the long and short appropriation bills of the following positions, as members of the official staff of the State Superintendent and necessary to the proper conduct of that office:

- (a) One Deputy State Superintendent.
- (b) One statistician (who must also be a competent stenographer).
- (c) One rural school visitor.
- (d) Two stenographers.
- (e) One general clerk.
- (f) One trained library clerk to act as aid to the Assistant Librarian whose position and salary are provided for by statute.

These last recommendations are vitally necessary for the efficient conduct of the State Office in its present undertakings and for the further extension of its usefulness.

8. In view of the fact that the following recommendation, should it become a law, can in nowise affect the present incumbent of the office of the State Superintendent, and therefore the motives of that official cannot be misunderstood, the following recommendation of former Superintendent, Helen M. Wixson, is hereby urged upon the consideration of the legislature:

"Our schools are among the best, but there is always room for improvement, and nothing would give a greater impetus to them than a change in the Constitution, providing for a four-year term in the office of State Superintendent of Public Instruction, and the removal of this office from the turmoil of politics."

9. It being equally true that no change in salary could affect the present incumbent of the State Superintendent's office, the

present Superintendent desires to recommend that the salary of the State Superintendent of Public Instruction be made equal to that received by the Attorney General, the Secretary of State, and the Auditor of State. In common with that of all the departments of State, the work of the State Department of Public Instruction has more than doubled since the present salary was fixed. Since that time the salary of the Auditor of State has been raised fifteen hundred dollars, and that of the Attorney General and Secretary of State one thousand dollars. The amount received by each of these officers is now four thousand dollars a year, while that of the Superintendent is three thousand a year. It seems little less than disrespect to the educational office, that its service to the commonwealth should be valued at so much less than the service rendered by these other executive departments.

10. That the Incidental Fund and the Traveling Expense Fund be restored to the amount appropriated before April, 1913.

11. A Publication Fund for the issuance of bulletins, statistics and other vitally necessary means of communication between the State office and the schools of Colorado.

Respectfully submitted,

Mary C. C. Bradford.

State Superintendent of Public Instruction.

STATE LIBRARY.

HON. MARY C. C. BRADFORD,
State Superintendent of Public Instruction,
Denver, Colo.

I herewith submit a report of the activities and expenditures of the Colorado State Library during 1913 and 1914.

In the beginning, let me say that if the Library is to meet in any degree the increasing demands made upon it, at least \$7,800.00 should be allotted for its maintenance during the coming biennium. No Western state does so little for the upkeep of a state library as Colorado. Montana appropriates \$15,000.00 biennially for her state library, Oregon sets aside \$32,000.00 for the same period.

A permanent legislative reference department should be established. Professor William Bethke, at that time Instructor in Political Science of the University of Colorado, with the consent of the incoming and out-going governors, Ammons and Shafroth, was given leave of absence by that institution to perform the work of legislative reference librarian for the Nineteenth General Assembly. With the aid of the material afforded by the State Library along this line, Mr. Bethke performed so valuable a work that there should be no question of the permanency of such a department. A similar arrangement has been entered into this year, and Dr. Arnold G. Lien, Instructor in Political Science of the University, will have charge of it.

Thirty-four states of the Union now maintain such departments. The number of propositions upon which our present-day legislatures is asked to report is too vast for deliberative action. Many bills are complex, involving a hundred different points upon which information is often advisable and desirable. Members need information as to what bills have been introduced along similar lines in other states, and how laws bearing upon the subject under discussion have worked out in sister commonwealths. It is not necessary that Colorado should commit the same legislative mistakes that other states have, if her legislators can be presented with such data at a moment's notice. The mass of material upon any one of the questions to come before the present legislature is multitudinous. It might, however, be boiled down into a single sheet of pros and cons for the guidance of the weary law-makers, who can at best give but a few hours' consideration to the many bills presented for their approval or disapproval.

It has been deemed wise to spend almost all of our small appropriation upon office equipment (of which there was practically none two years ago), and help for partially cataloguing and arranging in order upon the shelves the great mass of material containing valuable information. Miss Corinna Kittleson did very valuable work in less than five months, getting all of the

genealogical, and fully half of the general collection catalogued and classified.

With the assistance of Howard B. McPherrin, the different state reports were gone over and arranged in chronological and alphabetical order, and all duplicate copies eliminated, giving a little more shelf room, of which we are sorely in need. Better lights are another pressing need of the library. The greater part of the above-mentioned work was done gratuitously by Mr. McPherrin, before he entered the service of the state in another capacity. Another valuable piece of work done by Mr. McPherrin was the arrangement of the U. S. public documents in the order of the government checklist.

Following the custom of many up-to-date libraries, the practice of accessioning government documents and state reports has been discontinued. When assistance is available the state reports can be checked off on the checklists issued by various states, thus affording sufficiently complete and accurate records of such material. The monthly government lists and check list which covers all U. S. public documents issued previous to 1909 can be employed in the same way to secure records of this sort of material.

Assistance is needed at once for putting government departmental reports in the most accessible shape. The enormous amount of almost invaluable reference material contained in the government publications is scarcely realized by laymen.

There are at the present time two tables piled high with government documents, waiting to be arranged on the shelves, and four sacks of mail of this kind are still unopened, with the bound volumes of the past two years needing to have serial numbers attached in order to make them as useful as possible to the public.

The assistant librarian has been working at the sorting of this material at odd moments, but it is well-nigh impossible for her to do more than attend to the reference work required, answer correspondence and look after other library matters.

Owing to the advertising of the present resources of the library, more requests are coming in for help through the State than ever before, and this demand is increasing so rapidly that it is fast becoming impossible for the one person to attend to this in addition to the other work of the library to be done. The library is today the university of the people, and the Colorado State Library should serve the commonwealth by sending out material on agricultural questions, debate material, club programs, and what-not, to the remote places from which such requests are constantly coming.

Wisconsin, among other states conducting similar activities, has done a wonderful work in this field of late, and surely Colorado citizens, in this State of big distances, should be served as well.

As far as possible all duplication of the work of other libraries has been avoided during the past two years. On this account, the binding of city and State newspapers has been discontinued, as the State Historical Society has on hand 4,000 bound volumes of State newspapers. Thirty of the daily and weekly newspapers of the State are kept in order each day with the aid of files and racks, and the old issues are preserved in the sub-basement, because the law so requires, but some provision should be made by this legislature, whereby these papers, of historical value, could at least be lent to some library where the field is not covered. This would relieve some of the congestion in the vault, and also afford more shelf room in the library, which is greatly crowded in every department. It is to be hoped that when certain offices of the capitol are transferred to the museum building, we will be given more space.

Mr. D. M. Hamond did a month's excellent work in arranging some of the mass of Colorado duplicate reports stored in the basement, so that other state libraries lacking complete files may have the missing reports, as soon as we can have assistance in sending them out. For many years the reports of other state departments have been sent to the Colorado State Library without receiving those of this State in return, regularly, which have, in most instances, been sent "collect." It would take the services of a competent man for a period of from six to nine months to put the mass of material in the basement in such order that any notion may be formed of what really is there.

Other features of the publicity work connected with the work of the Assistant Librarian have been the giving of talks on the State Library resources at various teachers' meetings, rural schools, libraries and State institutions. Lists of new reference material in government documents were run in the daily papers, and similar lists were furnished to the Colorado School Journal. This innovation received the flattery of imitation, for the United States Government has just issued a pamphlet giving reference material in government publications of use to schools.

The genealogical department, which, small though it be, is the best in the State, has been advertised by sending lists of its books to various patriotic societies and the state convention of the D. A. R.

The attendance of patrons of the State Library has increased twenty per cent during the past year, and the constantly rising standards of efficiency among the employes of the State causes greater demand upon the library.

Finally, the work of the State, Traveling Library and Historical Library work should be unified, saving the taxpayers money, and increasing the efficiency of all three institutions.

FINANCIAL STATEMENT.

	From Transfer of Funds		
	1913	1914	1914
Office supplies	\$ 128.78	\$ 32.15	\$ 8.90
Office assistance	50.00	302.20
Books	77.45	24.05	40.70
Magazines	14.50	38.55	17.59

Total.....	\$7,800.00

Very truly yours,

ALICE LAMBERT,
Assistant State Librarian.

ADULT BLIND.

November 30, 1914.

To The State Board of Education:—

I respectfully submit the following report of my work from November 30, 1912, to November 30, 1914.

During this period the importance of Home Teaching for the Adult Blind of the State has been more fully demonstrated than before. The eagerness with which some have grasped the opportunity of learning to read has been compared to the ravenous appetite of one long deprived of food; while others, with an appetite less keen, who have been persuaded to learn to read, are now full of gratitude that this benefit was urged upon them. The amount of work done is only limited by my time and strength. The territory is so large and the blind people so scattered that much time is necessarily consumed in traveling; while considerable time must also be given to purchasing and distributing materials, keeping account of and reporting the details of my work, business correspondence, etc. I have visited the towns of Boulder, Longmont, Ft. Morgan, Georgetown, Dumont, Idaho Springs, Central City, Colorado Springs, Colorado City, Pueblo, Rocky Ford, Lajunta, Trinidad, Hoehne, Ludlow, Weston, Starkville, Ouray, Nucla, Lake City, Denver Co. Farm, and four rural homes, going to some more than once; besides doing a great deal of work in Denver, where there is enough to keep me busy all of the time, did I not feel that I owe a part of my time to those outside of the city; have traveled at least 3,316 miles by rail, 247 miles by stage and private conveyance, and many hundred miles by street car; and have called upon more than ninety new blind people, besides visiting and corresponding with many of those whom I had previously known. Everywhere, I have been treated with great kindness; the sighted, as a rule, are interested in my mission and ready to give all necessary assistance; and even those of the blind who are incapable of learning new things, or too indifferent to try, seem to appreciate being hunted up, and many urge me to call again, saying that it cheers their loneliness to have some one come who is interested in them.

I have continued to sell the work of the blind at the State Fair, and at all other times when I could do so without interfering with my teaching; and have also continued to purchase and furnish to the blind, at wholesale prices, such materials as beads, twine for hammocks, paper for N. Y. Point writing, self-threading needles, etc. Some of these supplies are not kept in the retail stores, or are sold at such prices as to reduce the profit upon their products.

As an outgrowth of my work, a Home for Adult Blind was opened in Denver in April, 1913, and The Society of United

PLATE 111111 PHOTO 6

COLORADO'S MODEL CONSOLIDATED SCHOOL

Workers for The Blind of Colorado was organized during the past summer; through these agencies much good work is being done.

Sixty-one people have been instructed in reading, New York Point writing, typewriting, pencil writing, spelling, knitting, crocheting, bead work, hammock and net making, some taking as many as four studies.

Four found that they were incapable of learning, one lost interest, one regained sight through an operation, and six found that circumstances were unfavorable at the time and deferred further lessons until some future time. These pupils range in age from 18 years to 85 years and include a newspaper editor, a contractor for painting and decorating, a real estate dealer, grocers, confectioners, broom makers, canvassers, a dealer in kindling, and several housewives. The ability to read has given new zest to their lives and done more than anything else, perhaps, to relieve the depressing consciousness of blindness, and to give a sense of independence and increased self-respect. My only regret is that I have not yet been able to reach every blind person in the State and offer him this great opportunity. The only way to really rise above the great calamity of blindness is to "Hope and Keep Busy." I try to do this and to help my pupils to do the same.

SUMMARY.

19 have learned to read New York Point,

1 to read American Braille,

7 to read Moon type,

3 are now studying N. Y. Point reading,

2 Moon type reading,

12 have learned N. Y. Point writing,

2 who formerly used a typewriter were encouraged to take it up again and find it of great assistance in their business,

25 have been furnished with grooved cards for pencil writing,

1 is learning to knit,

1 who knitted when she could see was persuaded to try it again, and is now furnishing relatives with her nice wash cloths,

1 has taken up crocheting,

2 have been furnished with new crochet patterns,

5 have learned to make hammocks,

3 are now learning to make hammocks,

10 have been instructed in netting, which includes the making of laundry bags and sweet pea nets. The latter are an invention of one of my pupils, which has proven to be quite practical. A number were sold last season, and it is hoped that the

demand next year will be great enough to furnish employment to several of the blind of the city,

1551 calls have been made,

634 lessons have been given,

57 books have been sent out,

18 have had work sold, amounting to \$168.95, all of which has been paid to the people who made the work,

72 have been furnished with supplies.

The supplies sold amounted to..... \$95.96

Of this sum I paid for—

Postage stamps\$16.48

Postal cards39

Supplies needed in my work..... 79.09

Amount used 371.06

Amount turned back into State Treasury..... 128.94

Orders were placed for Moon type literature amounting to about \$5, hammock twine for \$31.12, and a railroad book for \$30, but the bills were not received in time to be paid out of this year's appropriation.

MRS. JENNIE CAWARD JACKSON.

The U. S. Census of 1910 gives the number of blind of all ages, residing in Colorado, as four hundred and four, some claim there are eight hundred; six hundred would be a conservative estimate.

I have not yet been able to make a complete census of the blind of the State, but make the following deductions from the data which I have gathered.

About one-tenth, or possibly one-eighth, of the entire number, are under the age of 21 years. Of the adults, eighty per cent. lost their sight over the age of 21. This eighty per cent. embraces men and women ranging in age from 22 years to 100 years; they comprise a small army of soldiers, soldiers of industry, who have been defeated and blinded in the industrial warfare of life. To many this defeat has come near the close of a long and useful life, after the fires of youth have burned low, and they have not the strength and courage to rally their forces again; to others, it has come in early manhood and womanhood, turning their ambition and hope into darkness and despair. Some of these have struggled back into the line of industrial workers and are holding places there in spite of the odds that are against them, others have been left by the way-side.

Twenty-three and one-half per cent. of the cases of loss of sight in adult life are the direct result of industrial accidents—twelve and one-half per cent. being due to explosions in mines—while many of the numerous cases of atrophy, glaucoma, and cataract are probably due to strain produced by the occupation. Ought not these "soldiers" have some slight recompense for their services to society?

Forty-seven per cent. of the adult blind are unable to work because of old age, ill health, or the maiming of some part of the body in addition to the loss of sight; thirty per cent. are engaged in housework in their own homes or in other occupations, but not all of these earn enough for a meagre support; of the remaining twenty-three per cent. the most, at least, were they given the training and opportunity of doing something for which they have the natural fitness. One of the most pathetic and almost unbearable phases of blindness is the inability of so many to provide for their own needs and possibly the needs of those who by natural ties should be dependent upon them. I so often have this phase revealed to me in my visits upon them that it makes my heart ache, and it makes their situation seem all the harder to know that many of them might now have a competency had they not spent all they had in a desperate effort to regain sight.

One man who lost his sight and received a broken hand in a mine explosion, with money and property gone and no education or early training that would fit him for anything but hard labor, is grieving his life away and questioning the goodness of his God, because he can do so little to help his frail wife, who is supporting themselves and their two little ones by laundry work. Other blind men, unable to work, are being supported by faithful wives who do the hardest kinds of labor, and some of these

wives are themselves growing old and infirm. Children are supporting blind parents in addition to trying to fit themselves for worthy positions in life; and parents are maintaining blind children, although their own strength is fast failing. Ought not the public help these self-sacrificing relatives by providing for a relief fund for the sightless ones, and, at the same time, remove from the sightless the depressing sense of being totally dependent upon those who are not physically or financially able to provide for their needs?

One intelligent, refined lady of middle age, when asked about learning to read by touch, said: "Oh, if you could only tell me how to earn a dollar, I would be interested at once; I will not say that I never will learn to read, for I should enjoy it, but I cannot learn now while my mind is so distracted by financial affairs."

One sightless man, upon hearing of "The Relief Law for the Blind," said, "What a God-send that will be," and many are echoing his cry.

Some of the younger have said to me that they were confident they could fit themselves for some line of work, or undertake some small mercantile business and earn a living, if they only had a small income to help themselves with, but they have not a dollar with which to help themselves.

I estimate that about seventy per cent. of the adult blind would become beneficiaries under this act. The granting of this small benefit would help a larger number of the blind than any other one provision that could be made for them, and would be the most practical and kindest way to fulfil the commandment: "Bear ye one another's burden."

MRS. JENNIE CAWARD JACKSON,
State Teacher of Adult Blind.

There are 11 men and 5 women employed in the Workshop for the Blind.

One man receives a salary of \$2.00 per day; one, \$1.75; and two are getting 75 cents per day.

Seven are working at piece work; one averages 91 cents per day; one, 95 cents per day; one, \$1.25 per day; one, \$1.35 per day; two, \$1.85 per day; one, \$2.04 per day.

One woman is working the required three months with no pay; one has just completed her three months' work with no pay and is now getting 25 cents per day; two are earning 85 cents per day, and one, \$1.00 per day.
