STATE OF COLORADO
DEPARTMENT OF PUBLIC INSTRUCTION

Twenty-First Biennial Report

OF THE

State Superintendent of Public Instruction

FOR THE

Official Period Ending November 30, 1916

MARY C. C. BRADFORD
State Superintendent of Public Instruction

DENVER, COLORADO
EAMES BROS., STATE PRINTERS
1916

DISTRIBUTION OF THIS REPORT

According to legal requirement, this biennial report of the State Superintendent of Public Instruction is to be distributed in the several counties. The County Superintendents will act as distributing agents, and it is suggested that these officials supply:

One copy to each school district.

One copy to each newspaper in the county.

The remainder, as may be demanded, to teachers and citizens.

The State Department of Public Instruction reminds school officers that it is their duty to preserve all educational reports, copies of the School Law, and Course of Study, and transmit them in good condition to their successors in office.

The Superintendent regrets that pictures are omitted from the present volume. This has been done in the interest of economy, the fund for the printing of biennial reports having been drawn upon very largely already.

STATE OF COLORADO,
DEPARTMENT OF PUBLIC INSTRUCTION,
Denver.

To His Excellency,
THE HON. JULIUS C. GUNTER,
Governor of the State of Colorado.

Dear Sir—In compliance with the provisions of the law, I have the honor to transmit to you the Twenty-first Biennial Report of the Educational System of the State of Colorado, for the term ending November 30, 1916.

Very truly yours,

Mary C. C. Bradford.

State Superintendent of Public Instruction.

STATE OF COLORADO,
DEPARTMENT OF PUBLIC INSTRUCTION,
Room 9, Capitol, Denver. .

OFFICIAL STAFF, 1914-16

MARY C. C. BRADFORD,
State Superintendent of Public Instruction and Ex Officio
State Librarian.

ALICE BELLE CLARK,
Deputy Superintendent.

ALICE LAMBERT,
Assistant Librarian.

JENNIE CAWARD JACKSON,
State Teacher of the Adult Blind.

MAY A. BRADFORD,
ERNESTINE S. ANDRES,
Stenographers.

HARRIET G. R. WRIGHT,
Clerk.

THE STATE EDUCATIONAL SYSTEM

The Department of Public Instruction reaffirms its belief that the office of State Superintendent should be the clearing house for all the educational activities for the State of Colorado, and should have the means by which its educational aims, hopes and decisions may be transmitted to every educational unit in the commonwealth—should be the realizing agency of Colorado citizens for the welfare of Colorado children.

More and more is this ideal coming into realization. The Department has been utilized as a means of communication between the leading school people of the state, and has been the instrumentality for the welding of the uplifting forces of the commonwealth in co-operative action. Its vision has been service through fraternity and unity.

A closer articulation has been effected between the various units of the school administrative forces—school directors, county superintendents, state superintendent and the state institutions of learning. Even though much remains to be accomplished in this direction, yet the advance already made has resulted in great gain, and has made for marked progress in all educational lines, resulting in a large increase in the number of centralized, consolidated and standardized schools.

There are over a hundred centralized schools in Colorado, twenty-one consolidated schools and three hundred and thirty-seven standard schools, of which eighteen are of the "superior class," one hundred and forty "approved" and one hundred and seventy-nine "probationary".

These schools comprise all types, from the one-room to the ten-room building, the latter of which include high school facilities. The point in common, however, is that each of its kind measures up to standard. Each standard school is designated by a tablet of different color, containing the words:

State of Colorado, Standard School, and the Class of the school underneath, as follows:

STATE OF COLORADO STANDARD SCHOOL SUPERIOR CLASS
--

The Colorado Plan of Standardization has already made enviable history, earning the compliment of imitation in seven other states since its adoption here. The State Committee on Standardization, consisting of six County Superintendents and the State Superintendent of Public Instruction, has worked out a method of grading and a score card which, when the requirements are met, means, even in the lowest class of standard school, a moderately efficient school, and in the higher class, an excellent institution.

A feature of the Colorado Plan of Standardization is the annual Standardization Day, which is authorized by a Proclamation, issued by the State Superintendent of Public Instruction to all the second and third class districts in the state, at which time a grading, or re-grading, as the case may be, of the school, takes place. The annual celebration of Standardization Day occurs on the fourth Friday in each February. The first celebration of Standardization Day occurred on the 25th day of February, 1916, and resulted in a stimulating and inspiring civic celebration in nearly five thousand school buildings scattered throughout the state. Interest is so general in the second annual Standardization Day, which will occur in 1917 on the 23rd of February, that it is the hope of the Department that another score of standard schools may be added to the roll of honor already existing.

During the biennial period from November 30, 1914, to November 30, 1916, the administration of the Minimum Salary Fund has made it possible for several hundred children to be furnished with school facilities, who would otherwise have been entirely deprived of any of the advantages of public education. The sum of \$47,180.71 has been appropriated to fifty-nine counties, one hundred and forty-eight districts having received the benefits of this fund. These appropriations have proved to be of incalculable benefit to the state.

PROFESSIONALISM

The professional spirit is in evidence in Colorado's school work at the present time to a most gratifying degree. Reading Circle work has more than doubled, and the manner in which it is being pursued in groups under competent professional instructors, has infinitely raised the value of the work thus performed.

Normal Institute attendance is greatly increased, and the percentage of those working for collegiate and professional degrees is larger than ever before. The necessity for the training of the teacher in service has been recognized, and the extension work of all the state educational institutions is reaching a proportion of the teaching force in Colorado hitherto undreamed of.

REPORTS OF STATE INSTITUTIONS

The reports of the University of Colorado, the State Teachers' College, State Normal School, State School of Mines, State Agricultural College, State School for Deaf and Blind, State Industrial School for Boys, State Industrial School for Girls, State Home for Dependent and Neglected Children, State Home and Training School for Mental Defectives, show growth in cultural development and practical efficiency, as well as in the number of those attending these institutions. These reports having already been submitted to the Governor, any recapitulation of their details is considered unnecessary here.

SUPERINTENDENTS

County and District Superintendents alike, have shown professional zeal and executive ability. They are working together in a spirit of comradeship that deserves all commendation, and that should be developed to a still higher plane if the unification of Colorado school activities is to continue. The Department of Public Instruction finds its most efficient aid in the offices of the County Superintendents, whose work is linked directly with that of the state office.

THE STATE SCHOOL PEOPLE

The school people of Colorado have much to congratulate themselves upon in the history of the past two years. They are learning to stand together for all things that make for the rebuilding of the commonwealth and are nearing a more commanding place in the councils of the state.

THE DEPARTMENT

The Department of Public Instruction deems it a privilege to acknowledge its indebtedness to all school workers. It has received appreciation, inspiration, information, loyal friendship and good comradeship from all kinds of workers in the educational field, for which it returns fervent thanks.

SUB-DEPARTMENTS OF THE DEPARTMENT

The work of the Department of Public Instruction may be grouped under several heads:

The Publication Work—During the biennial period just ending, this department has prepared for publication, had printed and distributed, two million seven hundred and eighty odd thousand pieces of printed matter, including report blanks of all descriptions, physical examination tests, State Courses of Study, Holiday Books, School Laws, etc.

General Correspondence—About three thousand letters a month are received, answered and filed.

Boards—All the work of the State Board of Education, the State Board of Examiners, the State Reading Circle Board, and the State Emergency or Call Fund Board, is done in this office, including the recording and keeping of minutes, issuance of certificates, communications with schools and colleges in reference to credentials of applicants for State certificates of all grades, the hearing of appeals and rendering of decisions in all matters of school law, and conducting the correspondence incidental to all these branches of work. In addition, the Superintendent has sent a personal letter with each certificate that has been granted.

Eight meetings of the State Board of Examiners have been held at which five hundred and fifty-two certificates have been recommended. Twenty-one meetings of the State Board of Education have been held, at eight of which the recommendations of the State Board of Examiners have been passed upon and certificates ordered issued. Thirty appeal cases have been heard and decisions rendered.

It will readily be seen that these four boards, of each of which the State Superintendent is President and the Deputy Superintendent Secretary, and the administration of the weak district fund, involves an immense amount of bookkeeping, record keeping, clerical work and special correspondence.

The above résumé, carried on with an utterly inadequate clerical force, of some of the activities of the Department of Public Instruction, makes it plain why the assistance rendered by the State Teachers' Association and the management of the Colorado School Journal has been so vitally necessary to the efficiency of the State Office.

The Superintendent has traveled thirty thousand miles in the performance of her official duties—centralizing, consolidating and standardizing schools and visiting educational meetings. She has visited four hundred and fifty-three schools in thirty-seven counties, two county superintendent associations, twenty county associations, one superintendents' session of the N. E. A., three State Associations and two conventions of the National Educational Association. In all these visits the Superintendent has endeavored to impress upon school people and the citizenry, generally, her own profound conviction that "the *chief* business of the republic is education," and she reaffirms her faith that the people of the commonwealth, expressing their will through the legislature, will extend the opportunities for usefulness of the State Department and enrich the educational life of the State by enactments, adding to the power and resources of the Department, to the end that the children of the State may be made the focal point of communal life, their welfare the supreme obligation of the state's public servants.

Respectfully submitted,

Mary C. C. Bradford.

State Superintendent of Public Instruction.

Copy of letter to His Excellency, Julius C. Gunter, Governor of Colorado.

(The following letter contains the recommendations the State Superintendent desires to make as to the needs of her Department for the coming biennium:)

January 27, 1917.

HON. JULIUS C. GUNTER,
Governor of Colorado,
State Capitol, Denver, Colorado.

My Dear Governor Gunter:

In accord with your verbal request, I herewith submit certain facts pertaining to the office of State Superintendent of Public Instruction of Colorado:

1. Other departments of State have grown and developed since the state was admitted to the Union, while the Department of Public Instruction has remained on practically the same plane as when it was first established.

2. The state educational institutions have also grown and developed and have kept pace with the growth and development of the state, while the State Department of Public Instruction has been compelled to mark time owing to lack of financial support. As a consequence, the Department does not hold the commanding position it should hold in the educational councils of this state.

3. As at present organized and supported, the Department does not have an adequate force to keep it in vital touch with the educational work of the State. I am urging the passage of an attached bill, which will provide a Supervisor of High Schools, and a Supervisor of Elementary Schools. These two officials are needed in order that the duties and responsibilities of this office may be effectively performed. Before any sound state educational policies can be formulated for the schools of Colorado, accurate and unbiased information about these schools must be secured; and before any suggestions, rules or regulations of the Department can be made effective in the schools of the State, direct touch with these schools must be established.

4. In this same bill I am asking for a Statistician for the office. I confess to you that it is somewhat humiliating to me, as the chief school officer of this state, to have persons who desire and need accurate statistical information about our schools, appeal in vain to this office for such information. It is a bad condition of affairs which can be corrected only when the officer for which I am asking, is provided by the legislature.

5. At present, our county certificates are graded by sixty-three County Superintendents. As a consequence, there is a variable standard of such certificates, which has caused adjoining states to pass rules and regulations which forbid the recognition of our county certificates in these states. The effect of this action on

the educational standing of Colorado in other states, is not what it should be. I am asking in an attached bill, that all papers, upon which certification is based, be graded by the State Department of Public Instruction, and that all certificates be issued by this department.

6. For a good many years, members of the State Board of Examiners, which consists of prominent educators of the state, have paid their fares to and from meetings of this Board. They are rendering an excellent service to the state, and should be paid a per diem or actual expenses when performing their duties as members of this Board. I attach a bill for this purpose, which I hope may meet with your approval.

7. The salary of the State Superintendent of Public Instruction is now three thousand per year. This is not enough, and is certainly not in keeping with the salaries of heads of other departments of the state government. I attach a bill to make the salary of this office four thousand per annum, which I hope will meet with your approval.

8. Finally, and to give a résumé of the preceding recommendations, may I present the following summary of what appeals to me as the absolutely necessary expenditures for the Department of Public Instruction for the biennium upon which we are just entering:

	Per Yr.	2 Yrs.
1. Salary of Superintendent of Public Instruction	\$ 3,000	\$ 6,000
2. Salary of Deputy Superintendent of Public Instruction	2,400	4,800
3. Expenses of Superintendent and Deputy.....	1,200	2,400
4. Salary of High School Supervisor.....	2,400	4,800
5. Salary of Elementary School Supervisor.....	2,400	4,800
6. Expenses of High School and Elementary Supervisors	2,000	4,000
7. Salaries of three stenographers at \$1,200 a year each	3,600	7,200
8. Salary of Statistician.....	1,800	3,600
9. Salary of one clerk.....	1,200	2,400
10. Expense of examining papers and issuing teachers' certificates.....	3,000	6,000
11. Publications	500	1,000
12. Incidental Fund, based upon present appropriation	1,500	3,000
Totals	\$25,000	\$50,000

All of the above should be made as continuing appropriations, in order that the department may plan to work along substantial and permanent lines. This is a modest request in view of the work

that should be done by a State Department of Education. If the work of which this Department has supervision and general direction—the work of the public schools of the state—is not worth twenty-five thousand dollars a year, it is not worth anything to this commonwealth.

I present these requests, Governor, in the interests of the great office of which I happen to be the temporary head. They are measures that are in harmony with the intents and purposes of the proposed educational code, and they will give immediate relief to this office, because they do not require any constitutional changes. I trust that they may appeal to you as measures for the immediate enactment of which you will use your great personal and official influence.

Respectfully submitted,

Mary C. C. Bradford

State Superintendent of Public Instruction.

STATE LIBRARY

MRS. MARY C. C. BRADFORD,
State Superintendent of Public Instruction,
Denver, Colo.

The following report of the activities and expenditures of the Colorado State Library for 1915-16, is respectfully submitted:

A great deal of the work that has been done by me, and under my direction, during my incumbency as Assistant State Librarian, has been undone, owing to the fact that nearly a fourth of our already over-crowded space has been taken from the library, converted into a hearing room for another department and no additional space provided for the library to recompense for that lost through the above arrangement.

Inasmuch as the librarian has no regular assistance, stenographic, or along the lines of trained library help, it is impossible for her to do more than routine library work, such as correspondence, shelving new material, waiting upon patrons, etc., so my chief aim has been to get the material in the library arranged in good order upon the shelves, making the resources of the library fairly accessible.

Practically all of this work was for naught, as far as the minutiae of detail involved in the arrangement was concerned, when the 50,000 books were hurriedly removed from the shelves by janitors to be crowded back into the main room. No trained assistance was given the acting librarian to assist in the necessary re-arrangement, and the work is of necessity, proceeding extremely slow. Thousands of government documents, of which the State Library has the most complete collection in the West, and which constitutes one of the most valuable sources of reference material of any library, are stacked on the floor of the library, making not only these inaccessible, but the books of other character obscured by such piles of volumes.

The government reports received during the past year, comprising, of course, the results of investigations along lines of interest to workers of all classes, are piled in sacks in the sub-basement, waiting for space.

The present library quarters if provided with fireproof stacking extending to the ceiling would allow for the growth of the library for some time, and take care of the present increment. It would not be profitable to attempt repair or reconstruction of the out-of-date wooden stacks now in use.

During the summer of 1915 Miss Isabel Harrington donated her services to the library for nearly two months. During that time she acted as substitute assistant librarian for four weeks. She did a most valuable piece of work in going over the collection of Colorado reports, check-listing them, and supplying numbers of reports that were lacking.

A beginning was made during 1915 at the task of numbering and checking all government reports according to the system of the

check-list issued in 1909. Much of this work will have to be done over when the reports on the floor and in the basement are gathered together.

The services of a man are needed in the sub-basement vault of the library, to arrange the tons of old Colorado reports, many of which are becoming increasingly valuable, and send shipments of part of them to other state libraries that send the reports of their respective states to the Colorado State Library, which has a far more complete collection of such documents than any library in the state.

This collection of reports should be re-arranged and check-listed. No reports are more valuable in legislative reference work.

The collection of patent records of this and other countries, also the most complete and valuable in the West, should be arranged in order, and this will require additional help.

No other Western state library receives so little money for maintenance or salaries. The books in the State Library are worth many thousands of dollars and will form an unusually large nucleus for the splendid State Library that Colorado's growth, wealth and needs warrant.

The effort of the biennial period of 1913-14 to avoid duplication of the fields of work of other libraries receiving state money has been continued. With this plan in mind, the passage of a bill empowering the transference of all the old volumes of state newspapers was secured, and in accordance therewith the University of Colorado received them, thus giving a section of the state hitherto unsupplied with the newspapers which are in many instances the only local history available, a substantial beginning for such a collection. As an exchange courtesy the University supplied the State Library with \$100 worth of new books.

A regular assistant, who is at once a stenographer and typist, as well as cataloguer, should be provided for the assistance of the acting librarian.

Of the \$1,460 allowed by the Twentieth General Assembly for the maintenance of the library, all but a balance of 38 cents was spent in the manner outlined by the appropriation bill of that body.

The assistant state librarian received \$2,000 for her services during the biennium. This salary should be increased.

It is an injustice that the one in charge of many thousands of dollars worth of state property, and one who must of necessity have had special educational and professional qualifications, should receive less than any of the state's employees, except the janitors.

In accordance with the needs of the library outlined above, the following budget for the biennial period, 1917-18, is submitted:

**COLORADO STATE LIBRARY FOR BIENNIAL
PERIOD, 1917-18**

Salary, Assistant State Librarian	\$3,000
Salary, Stenographer and Cataloguer	2,400
Sub-basement work	900
Maintenance of library, purchase of books, newspapers, postage, etc.....	1,000
Total	\$7,300

ALICE LAMBERT, Assistant Librarian.

REPORT OF STATE TEACHER OF ADULT BLIND

November 30, 1916.

To the State Board of Education:

I respectfully submit the following biennial report, covering the period from Nov. 30, 1914, to Nov. 30, 1916.

In preparing this report I am more greatly impressed than ever before with the inadequacy of figures to fully represent a work comprising so large a scope and so many details. Being the only person in the State who is employed for the visitation, education and encouragement of those who have lost their sight in adult life, my field of labor constantly increases and the demands upon my time and effort are many and varied. Single-handed, I have tried to cope with these growing demands, visiting different localities each year and hunting new pupils, besides trying to keep in touch with as many as possible of those who have been visited and taught in previous years, furnishing them with materials, selling their work at public sales, sometimes trying to find them employment, writing them occasional letters of encouragement, giving further instruction, or doing anything which I can to add to their improvement and happiness. The adding of new pupils each year brings a proportionate increase in clerical work and I have found it impossible to be as prompt as I should have been with this part of my work during the past year.

I realize, more and more, the inability of one person to visit and help the 600 or 800 blind adults, scattered as they are, throughout such a large district as the State of Colorado, and I would most strongly urge that the question of providing assistants for the State Teacher for Adult Blind be considered as early as possible. The ability to read by touch or to do some kind of work has wrought a transformation in the lives of many who had sat for years in physical darkness and mental inactivity; their gratitude, together with their improved mental and physical condition, increased the desire to carry this work of love and cheer to every blind person within the State as early as can be done.

SOME ILLUSTRATIONS

A lady who was calling upon a friend in one of the Denver hospitals, met an elderly blind woman who spends much of her time with this mutual friend. After several weeks absence the lady again visited her friend, met the blind woman and was so impressed by the change in her demeanor that she could not refrain from exclaiming, "Why, Grandma, what has happened to you, you seem so changed? When I was here before you appeared so depressed and melancholy, now you seem quite cheerful." Grandma replied, "Oh, don't you know, Mrs. Jackson has been here and taught me to read."

A man of good education, after having been blind for forty years, was persuaded to take up tactile reading; in about a year he

wrote, "As I improve in reading I have a fuller appreciation of your service in inducing me to undertake reading."

A Swiss by birth, who had read seven languages and been a skillful watchmaker in Denver, lost his sight near the close of 1915. June 1, 1916, I began instructing him in New York Point; a few months later he wrote in that type, "I cannot tell you how much pleasure I get out of life since you taught me to read. I will never forget your kindness. Compulsory idleness is, I think, almost as bad as blindness. If we can just find something to do our burden is made much lighter. I hope that later on I will be able to take up some other work and to be again of some use to others."

When visiting a woman of forty-five for the first time, she said: "After I heard you were coming to see me I could hardly wait. I am so eager to learn to read." And she did learn in a short time.

A man of twenty-five who is employed as secretary in one of our educational institutions, met with an accident which left him unable to read, although not destroying all of the vision in one eye. With the help of an assistant he is continuing his work in the institution, doing much of his business writing upon the Royal typewriter. After learning the New York Point system, he told me that he was using the N. Y. Point writing upon the reference cards in his file, that every day opened up new possibilities, that he was putting everything he could into N. Y. P. writing, and he hoped by spring to have all of his work practically at his own command.

An elderly lawyer who had not been able to read for three years, took up the N. Y. Point system, saying, "I do not miss the ability to read so much, as my wife reads to me at home and I have my stenographer at the office to do my business writing and some reading, but I do find it very inconvenient not to be able to make notes for my own reference; since you tell me what use you make of the N. Y. Point writing I think it may serve my purpose and I want to learn it."

The light crafts taught are also valuable factors in this work of releasing human souls from the thralldom of despair, for "Employment is nature's physician and essential to human happiness."

In one of our coal camps I found an Italian who had been deprived of sight and had one hand injured, twelve years before in a mine catastrophe. His wife was dressmaking to earn a living for themselves and a son who was in school. Their little home was as neat and shiny as a new pin. The husband's easy chair sat in a corner near the sewing machine and there he spent the most of his time—in idleness, for he had nothing to do. When asked to learn hammock work he feared he could not on account of his crippled hand, but we tried, and he succeeded, soon forgetting his injured hand and doing his work very neatly indeed. When he realized his success he said to his interested wife, "Now, I have something to do as well as you." When he had completed his second laundry bag I said to him, "Are you not proud of yourself? I am proud of you." And he laughed a happy little laugh. Besides the pleasure he gets from being able to do something to break the monotony of

his life, I have been able to sell several dollars' worth of his hammocks, laundry, shopping and school bags, in our sales during the past year.

In another place I was told of a German of sixty-five, who was threatened with insanity from brooding over ill-health, loss of sight, and the poverty which resulted. For thirteen years he had sat in darkness with nothing to do but think, think. When being instructed in hammock work, he said pathetically: "I do want to learn this for I want something to do."

A comparatively young woman who had learned to read in a School for Blind in another state, after learning several crochet stitches and finishing an edge for a doily, which was very creditably done, remarked proudly, "I used to want to crochet, but so many told me I could not learn, but now I have."

I have been quite anxious to take up basketry with a number of my pupils, believing that it would be a pleasant occupation and might be made of profit by some of them. There are other lines of work which might be taught to advantage, but I feel that the teaching of reading is of the first importance until all within the State have had an opportunity of learning that, and I have found it impossible to assume any more work than I have been doing.

A very large per cent of our blind people have become so in adult life, many of them were bread-winners, some of them heads of families, to be thrown, perhaps suddenly, from active life into helpless dependence, which produces a mental condition bordering upon insanity or suicide. This is especially true of the uneducated. Their lives have always been very narrow: they have never known any of the pleasures which come through mental culture; their only enjoyment has been in their work and some of the things which appeal to the sense of sight—deprived of these their condition is most pitiable. The kindest and speediest way of relieving the mental distress of both the educated and uneducated blind is to help them to "Get busy." Employed they again become contented, self-respecting citizens.

SALES

During 1915 and 1916 sales of the work made by the blind have been held at the State Fair in Pueblo, the Larimer Co. Fair in Loveland, the Boulder Co. Fair in Longmont, in stores in Cripple Creek, Canon City and Florence, and four have been held in Denver, where the United Workers for the Blind assisted. The proceeds from these sales, \$224.30, were distributed among the fifteen contributors. I have purchased a showcase and had it placed in the Home for Adult Blind, where some of the work will be kept for sale.

PLACES VISITED

I have visited blind in Holden, Denver, Victor, Cripple Creek, Anaconda, Colorado City, Colorado Springs, Florence, Williamsburg, Rockvale, Coal Creek, Canon City, Fremont Co. Farm, Pueblo, Boulder, Boulder Co. Farm, Longmont, Berthoud, Loveland, Ft. Collins, and Platteville, traveling several hundred miles by street

car, at least 219 miles by automobile and team, and 3,999 miles by rail.

I have added sixty-six new names to the Register of the Blind. Six of these lost their sight under the age of twenty-one. They range in age from 23 to 81. I have given instruction to 57,—30 men and 27 women—7 of these were physically or mentally incapable of learning and 6 were too indifferent. 7 have not yet finished the line of work undertaken, leaving 37 who have completed from one to three studies. 26 have learned to read—19 the New York Point and 7 the Moon type; 14 of these have also learned N. Y. Point writing; 10 have taken up hammock work, but 3 have not yet finished; 7 have been assisted in crocheting; 1 in bead work.

SUMMARY

Number of business calls made in the interest of the blind.....	530
Number of calls made upon blind	960
Number of lessons given in reading	490
Number of lessons given in N. Y. Point writing	63
Number of lessons given in pencil writing	13
Number of lessons given in typewriting	3
Number of lessons given in crocheting	30
Number of lessons given in bead work	12
Number of lessons given in hammock making	102
Number of books sent out	103
Number furnished with supplies	54
Value of supplies sold	\$105.75
Work sold for	15
To the amount of	\$224.30

EXPENSES, NOV. 30, 1914-NOV. 30, 1915

Telephone	\$ 27.55
Tramway tickets	76.50
Railway fare	70.90
Automobile service	5.70
Cartage	12.25
Board and room	88.90
Postage	11.25
Books	62.41
Supplies	113.17
Total	\$468.63
Appropriation, 1915	\$500.00
Balance left over	\$ 39.37
