DISTRIBUTION OF THIS REPORT

According to legal requirement, this biennial report of the State Superintendent of Public Instruction is to be distributed in the several counties. The County Superintendents will act as distributing agents, and it is suggested that these officials supply:

One copy to each school district.

One copy to each newspaper in the county.

The remainder, as may be demanded, to teachers and citizens.

The State Department of Public Instruction reminds school officers that it is their duty to preserve all educational reports, copies of the School Law, and Course of Study, and transmit them in good condition to their successors in office.

The Superintendent regrets that pictures are omitted from the present volume. This has been done in the interest of economy, the fund for the printing of biennial reports having been drawn upon very largely already.

STATE OF COLORADO,
DEPARTMENT OF PUBLIC INSTRUCTION,
Denver.

To His Excellency,
THE HON. JULIUS C. GUNTER,
Governor of the State of Colorado.

Dear Sir—In compliance with the provisions of the law, I have the honor to transmit to you the Twenty-second Biennial Report of the Educational System of the State of Colorado, for the term ending November 30, 1918.

Very truly yours,

Mary C. C. Bradford.

State Superintendent of Public Instruction.

STATE OF COLORADO,
DEPARTMENT OF PUBLIC INSTRUCTION,
Room 127, Capitol, Denver.

OFFICIAL STAFF, 1916-18

MARY C. C. BRADFORD,
State Superintendent of Public Instruction and Ex-Officio
State Librarian.

ALICE BELLE CLARK,
Deputy Superintendent.

ALICE LAMBERT RATHBORNE,
Assistant Librarian.

JENNIE CAWARD JACKSON,
State Teacher of the Adult Blind.

ERNESTINE S. ANDRES,
JEAN RABER,
Stenographers.

HARRIET G. R. WRIGHT,
Clerk.

THE STATE EDUCATIONAL SYSTEM.

The additional experience accruing to two more years of official activity confirms my often-repeated belief that the office of State Superintendent of Public Instruction should be the transmitting medium for the educational life of the State of Colorado, and the realizing agency of Colorado citizens for the welfare of Colorado children.

More and more is this ideal coming into realization. The department has been utilized as a means of communication between the leading school people of the state, and has been the instrumentality for the welding of the uplifting forces of the commonwealth in co-operative action. Its vision has been service through fraternity and unity.

A closer articulation has been effected between the various units of the school administrative forces—school directors, county superintendents, state superintendent and the state institutions of learning. Even though much remains to be accomplished in this direction, yet the advance already made has resulted in great gain, and has made for marked progress in all educational lines, resulting in a large increase in the number of centralized, consolidated and standardized schools.

WHAT THE NATION HAS DONE FOR COLORADO SCHOOLS.

In the beginning, the United States of America gave freely of its largess to the children of the Centennial State, Sections 16 and 36 in every township being set aside for the use of the schools. The natural increase in land values has resulted in creating a great estate and a permanent state school fund, which, at the present time, amounts to nearly five million dollars and in the very near future bids fair to becoming an amazingly rich source of revenue, requiring only a very low rate of local taxation, and, if properly administered, equalizing the opportunities of all the children living under the Colorado flag.

Much of the school land has been proved to be underlaid with coal. Some of these lands have already been developed and have contributed their quota to the maintenance of the schools. A revision of the methods of handling the state school funds would undoubtedly result in much larger returns. About four years ago it was estimated by land experts that the school lands of Colorado have a potential value of nearly two hundred millions of dollars and no longer ago than May, 1918, experts from the Board of Land Commissioners made the financial estimate that a minimum tonnage of \$2,014,740,253.00 of coal from school lands in Routt and Moffat Counties would be available as soon as the Moffat railroad should be sufficiently extended. Jackson County, it is estimated, contains an area that will produce, under similar circumstances a minimum tonnage of 195,700,000,000. These same experts assert that the lands above mentioned contain enough coal to supply the world for three hundred years. These astonishing figures reveal the still more astonishing fact that were the revenue from the school lands belonging to the school children of Colorado invested differently, the entire school system of the Centennial State could be maintained on a much more adequate basis than is at present possible.

The Permanent School Fund, at the present time, amounts to \$4,948,492.23 and the Public School Income Fund for the past six months, ready to be apportioned, is \$250,799.49. In addition, there are \$600,900.00 worth of outstanding bonds which will be redeemable to the school fund in 1921. These amounts, it must be remembered, belong to and are used solely for the benefit of the schools of Colorado and are a source of income provided by the United States, transmitted through the State Department and used by the local school authorities in addition to the funds provided by local taxation.

As guardian of the school fund, and chief school officer of the state, these figures quicken my imagination and steel my determination in demanding that the best be provided for the school children of Colorado. Colorado is supremely beautiful, and the almost infinite richness of her resources should guarantee to all her children education in schoolhouses that are sanitary, convenient, adequate, beautiful. Much progress in this direction has already been made, but when this great landed heritage shall have been developed to the uttermost we may expect such buildings,

playgrounds, teacherages, teachers and community activities as at present exist mainly in the constructive imagination of those to whom education is the chief necessity and the supreme glory in a republic.

WHAT THE COLORADO SCHOOL SYSTEM HAS DONE FOR ITSELF.

For the past six years substantial gains have been made toward the realization of an ideal school system and an improved school equipment. In the last two years, particularly, the growth has been tremendous. Where formerly new schoolhouses were erected at a cost of three or four thousand dollars, school boards are now erecting buildings ranging in price from six to twenty thousand dollars and many high schools have been built in the country that have cost from twenty-five to thirty-five thousand, and even as high as fifty and sixty thousand dollars. In the cities of Colorado the new school buildings are meeting the requirements of the new education in a satisfactory manner, while many old buildings have been remodeled and improved. A recent survey made by school experts of national fame paid a magnificent tribute to the teaching force of Denver when the reports said that nowhere in this country had they found a school spirit to equal that of Denver. Of all Colorado's other school districts of the first class it may be said that a similar school attitude and spirit of professional service prevail.

In both city and country schools the professionally trained teacher is more in evidence than ever before. It is a conservative estimate that places the increase of teachers so trained at at least twenty-five per cent over that of four years ago, while the number of college and university graduates among the ranks of the teachers of Colorado has increased about fifteen per cent.

Denver's Opportunity School has become famous the country over. Originated and supported for years by District No. 1, City and County of Denver, it has now been recognized by the United States Government and receives federal aid for teachers in the following subjects: Radio-buzzer service, auto-mechanics, related mechanical drawing and home economics. It can readily be seen that wonderful war service, industrially speaking, was performed by this school. Great as has been the work of the Opportunity School in meeting the manifold educational demands of our complex modern municipal life, its highest function has been its power to develop citizenship.

In Pueblo, Colorado Springs and many of the larger towns of the state, great advance has been made along these lines. In the first class districts, as well as in the country, school garden work has served the double purpose of adding to the Nation's needed store of wealth and developing in the child a love for nature and an illuminating appreciation of a practical scientific study.

In the schools of Colorado close attention is being paid to physical education, the demand being for a trained body as the instrument through which the trained mind and the creative soul can react upon life.

Where about three hundred one-room schools existed, there are now over a hundred adequately equipped centralized schools in Colorado and the twenty-one consolidated schools of two years ago have grown to the encouraging number of sixty-six consolidated schools. The number of standard schools has increased in the last two years from three hundred and thirty-seven to five hundred and six, of which forty belong in the superior class, while sixty-two teacherages guarantee that the districts where these are maintained realize the supreme importance to an efficient school of providing proper living conditions for the teacher.

In round numbers there are six thousand school buildings in the second and third class districts and about two hundred school buildings in first class districts.

In round numbers there are in Colorado, in first class districts, thirty-five high schools, and in second and third class districts, fifty high schools.

In round numbers the school population of Colorado is two hundred and seventy-five thousand.

STATE EDUCATIONAL INSTITUTIONS.

Colorado's state educational institutions have long attracted students from many states, drawn by the double lure of an efficient teaching force and an adequate curriculum, to be enjoyed in the midst of Colorado's matchless scenic and climatic environments.

The last legislature put the University of Colorado at Boulder, the State Teachers' College at Greeley, the State Agricultural College at Fort Collins, the State School of Mines at Golden and the Normal School at Gunnison upon a millage basis, thus affording more ample financial support. As soon as the war restrictions on building shall have been removed this enlarged income will enable the management of the various institutions to develop successfully the splendid building program already outlined. With increased facilities will doubtless come an increased attendance. Colorado is fully justified in looking forward to a future for her state institutions that will place this state in the very forefront of educational centers.

A detailed statement of the growth of these institutions would be but duplication, as these reports are made directly to the Governor for transmission to the General Assembly.

SUPERINTENDENTS.

County and district superintendents alike have shown professional zeal and executive ability. They are working together in a spirit of comradeship that deserves all commendation, and that should be developed to a still higher plane if the unification of Colorado school activities is to continue. The Department of Public Instruction finds its most efficient aid in the offices of the county superintendents, whose work is linked directly with that of the state office.

THE TEACHING FORCE AND SCHOOL CHILDREN OF COLORADO.

The teaching force of Colorado has much to congratulate itself upon in the history of the past two years. The teachers of this commonwealth have proved themselves the "second line of defense" in the prosecution of the Great War to End Wars. Every war effort asked of the schools has been responded to most nobly by teachers and pupils alike and this co-operative effort has made a record for Colorado schools that is recognized by the Nation. At least ninety-five per cent of all the school children of Colorado have invested in War Savings Stamps or Liberty Bonds; about sixty per cent of the schools—as schools—have done the same, while food conservation, war and school gardens and Junior Red Cross have been able to enlist the devoted work of almost one hundred per cent of the school children of this state.

THE DEPARTMENT OF PUBLIC INSTRUCTION.

The Department of Public Instruction deems it a privilege to acknowledge its indebtedness to all school workers. It has received appreciation, inspiration, information, loyal friendship and good comradeship from all kinds of workers in the educational field, for which it returns fervent thanks.

SUB-DEPARTMENTS OF THE DEPARTMENTS.

The work of the Department of Public Instruction may be grouped under several heads.

THE PUBLICATION WORK—During the biennial period just ending this department has prepared for publication, had printed and distributed, three million and odd thousand pieces of printed matter, in addition to handling over a million pieces at the request of the United States Government. The state matter includes report blanks of all descriptions, physical examination tests, state courses of study, school laws, etc.

GENERAL CORRESPONDENCE—For the past two years, owing to the demands of war service, about five thousand letters a month have been received, answered and filed.

BOARDS—All the work of the State Board of Education, the State Board of Examiners, the State Reading Circle Board and the State Emergency or Call Fund Board is done in this office, including the recording and keeping of minutes, issuance of certificates, communications with schools and colleges in reference to credentials of applicants for state certificates of all grades, the hearing of appeals and rendering of decisions in all matters of school law and conducting the correspondence incidental to all these branches of work. In addition, the superintendent has sent a personal letter with each certificate that has been granted.

Eight meetings of the State Board of Examiners have been held at which nine hundred and eighteen certificates have been

recommended—an increase of nearly one hundred per cent over the last biennial period. Twenty-three meetings of the State Board of Education have been held, at eight of which the recommendations of the State Board of Examiners have been passed upon and certificates ordered issued. Twelve appeal cases have been heard and decisions rendered by the State Board of Education.

It will readily be seen that these four boards, of each of which the state superintendent is president and the deputy superintendent secretary, involve an immense amount of bookkeeping, record keeping, clerical work and special correspondence.

The above resume of some of the activities of the Department of Public Instruction, carried on with an utterly inadequate clerical force, makes it plain why the assistance rendered by the State Teachers' Association and the management of the Colorado School Journal has been so vitally necessary to the efficiency of the state office.

FINANCIAL AND STATISTICAL REPORT—A detailed financial and statistical report will be found in the proper place of this volume. That portion of the Biennial Report of the Department of Public Instruction is based upon more comprehensive data than any hitherto attempted, and, it is believed, will prove of great interest. Particular attention is called to the statistics relating to the functioning value of the school as an agent for community welfare and state and nation building.

THE STATE SUPERINTENDENT OF PUBLIC INSTRUCTION.

For the biennial period the superintendent has traveled seventy thousand miles in the performance of her official duties, centralizing, consolidating and standardizing schools and visiting educational meetings. In addition to hundreds of school visitations, she has attended two county superintendents' associations, fifteen county associations, two superintendents' sessions of the National Education Association, three state associations and two conventions of the National Education Association. As president of that body, the Colorado state superintendent found it possible to win a large measure of recognition for the Colorado school system and the state at large.

United States Senate Bill No. 4987, first championed by the Colorado State Superintendent of Public Instruction, will prove of immense benefit to this state, should the measure become enacted into law. The following figures will show the exact results flowing from the passage of this bill and the adoption by the Colorado State Legislature of a bill providing for the reception of this great financial assistance:

EDUCATIONAL EMERGENCY BILL.

(S. B. 4987)

The bill provides for an annual appropriation of \$100,000,000.00, provided that sums equal in amount be appropriated by the several states, for the following purposes:

I. The removal of illiteracy, \$7,500,000.00 annually.

Colorado had in 1910, 8,989 adult illiterates. The Congressional allotment to our state would be \$17,924.07 annually. This would have to be equaled by the state and there would then be available \$35,848.14 each year, or almost \$4.00 for each illiterate.

II. The Americanization of immigrants, \$7,500,000.00 annually.

Colorado has 129,587 immigrants, according to the census of 1910. The Congressional allotment would amount to \$71,920.79. The amount available for Americanization work in the state would be \$143,841.58 annually.

III. The equalization of educational opportunities within the state, \$50,000,000.00 annually.

Colorado has 6,573 teachers and would receive from Congress \$528,074.82. An equal amount by the state for these purposes would make available \$1,156,149.64 for the improvement of our public schools.

IV. Physical and health education, \$20,000,000.00 annually.

Colorado's population in 1910 was 799,024. She would, therefore, receive from Congress for physical and health education \$173,787.72 annually. An equal amount from the state would make available annually \$347,575.44.

V. The preparation of teachers, \$15,000,000.00 annually.

On the basis of 6,573 public school teachers, Colorado would receive \$158,409.30 from the federal government. Doubling this amount would make available a minimum of \$316,818.60 for teacher preparation in her ten supported normal schools and colleges.

The bill also provides for the creation of an executive department of the government to be known as the Department of Education, with a secretary in the President's Cabinet.

Summary of appropriations for Colorado:

I.	The removal of illiteracy.....	\$ 17,924.07
II.	The Americanization of immigrants.....	71,920.79
III.	The equalization of educational opportunities.....	528,074.82
IV.	Physical and health education.....	173,787.72
V.	The preparation of teachers.....	158,409.30
		<hr/>
		\$950,116.70

(Compiled from data issued by the National Education Association.)

RECOMMENDATIONS.

The state superintendent respectfully recommends the passage of a bill which will provide a supervisor of high schools, a supervisor of elementary schools and an educational statistician, these school officers to be attached to the Department of Public Instruction. These three officials are needed in order that the duties and responsibilities of the state office may be effectively performed.

It is also recommended that a new certification law be passed, which will increase the value of Colorado's certificates so that they may not be rejected in neighboring states as at the present time. At present the Colorado county certificates are graded by sixty-three county superintendents. The measure recommended makes it obligatory upon the State Department of Public Instruction to grade and issue county certificates.

It is recommended that the expenses of the State Board of Examiners be paid. The members of this board are rendering an excellent service to the state and should be placed upon a financial par with other state boards.

The re-enactment of the measure extending financial aid to weak districts is recommended. During the time that this fund was in existence, a service was performed that proved of incalculable value to the state—schools were maintained in regions where otherwise children would have had no school facilities whatever, and in others terms were lengthened and the teacher was enabled to earn a living wage. No more beneficent act was ever passed by a Colorado Legislature than this one, and it would seem almost unnecessary to urge its re-enactment upon the Twenty-second General Assembly, in view of the fact that money for the carrying out of its provisions is already in existence and does not have to be raised by taxation.

The raising of the salaries of the deputy state superintendent, the assistant state librarian, and the state teacher for the adult blind is recommended; also the giving of an assistant to the state teacher of the adult blind; and the attention of the Governor and the Legislature is called once more to the fact that the State Superintendent of Public Instruction receives a salary of one thousand dollars less per annum than the lowest paid of the other state executive officers. It is recommended that this discrimination be rectified at the earliest possible moment and the educational office be placed upon a par with that of the Secretary of State and the State Auditor, by increasing the salary to four thousand dollars per annum, the same as that received by those officials.

ACHIEVEMENTS AND OPPORTUNITIES.

For the biennial period just ended, education in Colorado has made rapid strides in socializing the schools, readjusting subject matter and method in accordance with the new conditions created by the war, and offering rich opportunity to those who seek a state where education expresses idealism through practical service. Long-time citizens of the Centennial State are proud to recognize the quick and efficient reaction of education in Colorado to the

beginnings of the wonderful future that must inevitably come to this potentially greatest of all states. Newcomers to the commonwealth are assured that they have made no mistake in setting up their household gods in the shadow of the Rockies after they have familiarized themselves with some of Colorado's educational achievements and have learned to recognize the signs of a still richer fruition to be in educational matters, while some of the characteristic developments of the educational life of this state, such as its standardization plan, have attracted critical attention far beyond its borders and acted as inducements to a not inconsiderable number of people to make Colorado their educational Mecca.

For 1919 the schools of Colorado ask that Colorado's citizenry study the school needs of the children of the state. One of the greatest school systems in the world can be built here where nature has given of itself so lavishly in the value of its products and the glorious beauty of mountain and plain. The eternal hills stand sentinel-wise over untold treasure. The Colorado earth asks only a little cultivation to meet all the needs of those who dwell within its borders. Colorado brains are as keen as its own early morning air and the hearts of its people as warm as the sunset crimson of its western skies. Let human brain and heart and nature's wealth combine to provide that noblest of all civic forces—an ideal public school system. Through 1919 and in the years to come, think for the children. Work for the children. Save for the children. Give to the children through educational effort, and Colorado will show the world a product of childhood and youth fit to interpret the strength and the riches of her mountains, the plenty of her plains, the radiance of her skies.

Finally, and to give a resume of the preceding recommendation may I present the following summary of what appeals to me as the absolutely necessary expenditures for the Department of Public Instruction for the biennium upon which we are just entering.

	Per Yr.	2 Yrs.
1. Salary of Superintendent of Public Instruction	\$ 3,000	\$ 6,000
2. Salary of Deputy Superintendent of Public Instruction	2,400	4,800
3. Expenses of Superintendent and Deputy.....	1,200	2,400
4. Salary of High School Supervisor.....	2,400	4,800
5. Salary of Elementary School Supervisor.....	2,400	4,800
6. Expenses of High School and Elementary Supervisors	2,000	4,000
7. Salaries of three Stenographers at \$1,200 a year each	3,600	7,200
8. Salary of Statistician	1,800	3,600
9. Salary of one Clerk.....	1,200	2,400
10. Expense of examining papers and issuing teachers' certificates	3,000	6,000
11. Publications	500	1,000
12. Incidental fund, based upon present appropriation	1,500	3,000
	<hr/>	<hr/>
	\$25,000	\$50,000

All of the above should be made as continuing appropriations, in order that the department may plan to work along substantial and permanent lines. This is a modest request in view of the work that should be done by a state department of education. If the work of which this department has supervision and general direction—the work of the public schools of the state—is not worth twenty-five thousand dollars a year, it is not worth anything to this commonwealth.

I have the honor, my dear sir, to submit the above report and recommendations with the earnest hope that you will approve them in your forthcoming message to the legislature and that the Twenty-second General Assembly may recognize the value to the children of these measures and secure their benefits by putting these provisions upon the statute books of the commonwealth of Colorado.

Very respectfully,

Mary C. C. Bradford.

State Superintendent of Public Instruction.

STATE LIBRARY.

Denver, Colo., Nov. 30, 1918.

Mrs. Mary C. C. Bradford,
State Superintendent of Public Instruction,
Denver, Colorado.

My Dear Mrs. Bradford:

Attached herewith please find a tabulated statement of the expenditures of the State Library during the biennial period just closing.

Fifteen hundred books and periodicals were circulated during these two years, largely among state employees, who are permitted to borrow books from the library without payment of a deposit of twice the value of the material withdrawn.

In addition to this circulation, the embossed print books for the blind, the property of the State Department of Public Instruction, were sent throughout the state at the call of the adult blind, to whom reading material may be sent through the post office without payment of carriage charges.

An increasingly large number of patrons daily consult the reference material in the library, which is practically unduplicated in the state, a persistent effort having been made during the incumbency of the assistant librarian to confine the activities of the State Library to fields not the specialties of other libraries under the jurisdiction of the state, except for the purchase of material to keep sets of encyclopedias, dictionaries, year books and a limited collection of standard fiction up-to-date.

The most urgent need of the library, in order that it may fulfill its function as a State Library, is sufficient shelving of fire-proof construction to admit of having the hundreds of volumes of United States public documents removed from sub-basement vault storage and made accessible to state employees for research in their several lines of work, and to allow for the accessions in state reports of all states of the Union, which send their reports in exchange for those of Colorado. Such reports constitute one of the most valuable sources of reference for those interested in legislation and civic betterment.

Part of the expenditure for assistance during the current biennium was for the services of a man to prepare shipments of Colorado reports from the duplicates in the library vault to send to 24 state and university libraries which have sent contributions of theirs to this state.

The maintenance fund allotted to the library should be sufficiently large to admit of regular assistance in caring for the immense amount of valuable free material received, and for exchange work. The assistant librarian (librarian de facto) can find time for little else than attention to patrons' requests for assistance, answering correspondents, etc.

Acknowledgment and thanks are hereby publicly made to all institutions, public and private, and to individuals, the donors of publications to the library (acknowledgment and thanks having been made by letter at the time of receipt of such material).

Respectfully submitted,

Alice Lambert Rathborne,
Assistant State Librarian.

REPORT OF STATE TEACHER OF ADULT BLIND.

November 30, 1918.

To the State Board of Education:

In making this biennial report, I realize that it cannot differ essentially from those of former years. While the number of blind in Denver seems constantly increasing and my waiting list of people in various parts of the state grows longer and longer each year, old Father Time does not give me any more hours in which to work, neither is my capacity for labor multiplied; hence, the amount of work to be reported is not perceptibly greater than that of previous biennial periods.

The more work I do among the blind of the state the larger grows my vision of what could and ought to be done to induce cheerfulness, courage, and self-reliance in them, and to aid them in becoming useful, self-respecting citizens instead of the helpless, hopeless drones which some of them have come to be, because they have had no one to encourage them to be anything else.

"I have taken a new lease upon life." "You have opened a new world to me." These and similar expressions are uttered by my grateful pupils after they have learned to read and have been told that they can do many things which they have thought impossible. To learn what others in the same physical condition are doing is a great stimulus to effort.

The results of the work already accomplished prove so conclusively that it is a valuable and beneficent factor in the lives of the blind, not only increasing their own happiness but that of their families and friends as well, that I most urgently request the State Board of Education to unite in asking the Twenty-second General Assembly to grant an increased appropriation for the work so that a secretary can be employed to relieve the State Teacher for Adult Blind of a large amount of clerical and detail work, thus giving her much more time for teaching and making it possible to reach and instruct a greater number each year.

FROM MY PUPILS

"Do you know I think your coming was a miracle? I said to my sisters several times this summer, 'Oh, if only the dear Lord had let me read my Bible I should not have minded so much about the rest.' Then, to think you came right to my door. I think it was a miracle."

"Yes, I am glad I have learned to read. At first I didn't think much about it, but your visits were agreeable to me and I thought I might as well try."

"I think it is wonderful that you can read and write and do so many things, and, if other people can learn, I ought to."

"Your visit was an inspiration and a great pleasure. We shall look forward to your next visit."

“I was greatly interested in the account of your Leadville activities and I think the amount of work you accomplish is but little short of the wonderful.”

“It was such a pleasure to hear from you. Your letters are always an inspiration to me. I really do not know what would have happened to me if you had not come across my path and smoothed the rough places. It must be a great joy to be able to bring so much sunshine and sweetness into lives which, without your aid, would have been hard and bitter.”

“Christmas—the time of happiness and kind thoughts—has come around again, and if, on this occasion, we extend our good wishes to all our friends, so is it in a special manner to those to whom we are bound to be thankful. Much of my present happiness and contentment is due to the fact that you taught me how to read. It is my sincerest wish that the Lord may bless your mission of kindness and enable you to help others as you have helped me.”

PLACES VISITED.

In 1917—Boulder, Boulder County Farm, Longmont, Ft. Collins, Arvada, Golden, Louisville and vicinity, Durango and Denver. In 1918—Colorado Springs, Pueblo, Canon City, Leadville and Denver. To reach my pupils I have walked many miles, made a number of short trips in automobiles, ridden hundreds of miles in street cars and, at least, 2,787 miles upon the railway. Could I utilize for the giving of lessons the time which I am obliged to spend upon street corners waiting for cars, in railway stations waiting for trains, and in traveling long distances around in order to reach desired locations, several more people could be instructed each year.

Sales—In 1917 a Christmas sale and another in the spring were held in Denver and one was held in the fair at Durango. In 1918 sales were held in Denver in December, in Leadville in September, and in the State Fair at Pueblo in September. These sales realized three hundred and eighty-five dollars and seventy cents, which was paid to the twenty women and ten men who contributed the work. In the sales at Durango, Leadville and Pueblo I received valuable assistance from members of the Woman's Clubs of those places, and, in Denver, was aided by members of the Board of Control of the Adult Blind Home and the Society of United Workers for the Blind of Colorado.

I continue to serve as an executive member of the Board of Control of the Adult Blind Home and as a member of the Legal Committee of the Society of United Workers for the Blind of Colorado, and have assisted, so far as possible, in the work of these two very important organizations.

The Relief Law for the Blind—Discouraged at their failure to get the State Legislature to pass the Relief Law for the Blind, for which I began to work in 1913, the Society of United Workers for the Blind of Colorado decided to initiate the measure. Many friends volunteered to circulate petitions and found little difficulty in obtaining signatures. So enthusiastic were these friends

that they sent in about seven thousand more signatures than were required by law, and, in the general election, November 5, 1918, 131,669 votes were cast for the measure, while only 9,440 voted against it. The many friends who so cheerfully and kindly aided in bringing about this wonderful result deserve and have our sincere gratitude.

This law will give much-needed aid to those of our blind friends who, from age or physical disability, aside from blindness, are unable to support themselves, and the Society of United Workers will now turn its attention to the improving of industrial and business conditions for the blind who are able to work, for labor is sweet and as much to be desired by the blind as by the sighted.

As a result of visits to their homes or personal correspondence with them, I have added the names of seventy-two persons to the register of the blind. Only four of these lost their sight under the age of twenty-one. Eleven lost their sight as the result of explosions in mines and two of explosions elsewhere; ten from atrophy; eight from glaucoma; seventeen from cataract. The remaining number of cases are from causes not easily classified.

Ten have learned to read Moon type.

Fifteen, New York Point reading. Four are still on practice work.

One man who was first instructed in Moon type reading in 1916 is still assisted whenever other work does not prevent. He is not familiar enough with the English language to thoroughly understand what he reads, but he is improving.

Twelve have learned to write New York Point and two have begun to learn.

Nine have been helped in pencil writing.

One in spelling.

Four in crocheting.

Five in beadwork.

Eight in hammock making.

Forty-one in all have learned from one to four lines of work.

Nineteen others received instruction—some for a considerable length of time—and then gave up their work, a number because of physical disability, the rest from indolence.

Of those who learned to read Moon type in 1918, one was eighty-four, one eighty-five, and one eighty-six years of age.

One man learned to read New York Point from lessons prepared and mailed to him. Another is learning to read in the same way.

One learned to write from lessons mailed to him.

More could learn to read and write in this way if they had the courage to try and the determination to persevere, but most people require the personal touch and encouragement of the teacher.

SUMMARY.

Number of business calls made	473
Number of calls made upon blind	1,004
Number of lessons given in reading	586
Number of lessons given in N. Y. Point writing	63
Number of lessons given in pencil writing	12
Number of lessons given in spelling	16
Number of lessons given in crocheting	84
Number of lessons given in knitting	1
Number of lessons given in beadwork	37
Number of lessons given in hammock making	106
Total number of lessons given	905
Number of books sent out	81
Number furnished with supplies	84
Value of supplies sold	\$299.52
Number of people for whom work was sold	30
Value of work sold	\$385.70

	1917	Expenses	1918
Telephone	\$ 29.13		\$ 33.66
