HONORABLE DAN THORNTON,
Governor of the State of Colorado
State Capitol
Denver, Colorado

My dear Governor Thornton:

In compliance with the provisions of the law, I have the honor to submit to you the Thirty-seventh Bienniel Report of the State Commissioner of Education.

Most respectfully,
NETTIE S. FREED.

## INTRODUCTION

The biennial period of 1948-1950 reveals a rapid adjustment in all phases of education throughout the state to the normal pattern of growth and development. During the first World War and the years following, the teacher situation was very critical. The issuance of emergency certificates was authorized by the Board of Education in 1942-43. That year 800 such certificates were issued. Each year this number increased until the school year of 1946-1947 when the peak was reached with 2,497 certificates. Beginning with 1947, the emergency certificated teachers were required to take some in-service training. The first year only four quarter hours were required, but since that time teachers who held emergency certificates were required to secure 12 quarter hours of college credit before they became eligible for another certificate. The number of these certificates is being rapidly reduced. For the year 1949-50 only 1635 were issued. It is to be hoped that by 1951 there will be no need to continue emergency certification.

Many needed repairs to school buildings, the purchase of school busses, and the erection of new buildings that were postponed during the war period are rapidly becoming a reality. The school directors of Colorado are to be commended for the emphasis they have placed on the elementary school, not only in a program of building elementary schoolhouses, but in the attention they have given to the improvement of the curriculum and teacher qualifications.

Two of the most far-reaching steps in the promotion of education in Colorado have been initiated and launched. An amendment for reorganization of the State Department of Education was submitted to the people in November, 1948. This was approved by a substantial majority. The text of the amendment follows:

### CONSTITUTIONAL AMENDMENT

Senate Concurrent Resolution No. 6

SUBMITTING TO THE QUALIFIED ELECTORS AN AMENDMENT TO SECTION 1 OF ARTICLE IX OF THE CONSTITUTION OF THE - STATE OF COLORADO, PROVIDING FOR A CHANGE IN THE MEMBERSHIP OF THE STATE BOARD OF EDUCATION, PROVIDING FOR THE ELECTION OF THE MEMBERS THEREOF, CHANGING THE OFFICE OF SUPERINTENDENT OF PUBLIC INSTRUCTION TO THE OFFICE OF COMMISSIONER OF EDUCATION AND PROVIDING THAT SUCH COMMISSIONER SHALL BE APPOINTED BY THE BOARD OF EDUCATION.

Be It Resolved by the Senate of the Thirty-sixth General Assembly, the House of Representatives concurring herein:

SECTION 1. That there shall be submitted to the qualified electors of the State of Colorado, at the next general election for members of the General Assembly, for their approval or rejection, the following amendment to the Constitution of the State of Colorado, which, when approved by a majority of those voting thereon, shall become a part of the Constitution of the State of Colorado, to-wit:

Section 1 of Article IX of the Constitution of the State of Colorado shall be amended to read as follows:

"Section 1. Supervision of Schools—Board of Education. The general supervision of the public schools of the state shall be vested in a Board of Education whose powers and duties shall be as now or hereafter prescribed by law. Said board shall consist of a member from each congressional district of the state and, if the total number of such congressional districts be an even number, one additional member, and said members shall be elected as hereinafter provided. The members of said board shall be elected by the qualified electors of the state, voting at general elections, in such manner and for such terms as may be by law prescribed; provided, that provisons may be made by law for election of a member from each congressional district of the state by the electors of such district; and provided, further, that each member from a congressional district of the state shall be a qualified elector of such district. If the total number of congressional districts of the state be an even number, the additional member of said board shall be elected from the state at large. The members of said board shall serve without compensation, but shall be reimbursed for any necessary expenses incurred by them in performing their duties as members of said board.

From and after the general election of 1948, the office of Superintendent of Public Instruction shall be known as the office of Commissioner of Education, and from and after the expiration of the two-year term of that office next following said general election, such commissioner shall be appointed by said Board of Education and shall not be included in the classified civil service of the state.

The qualifications, tenure, compensation, powers, and duties of said commissioner shall be as prescribed by law, subject to the supervision of said board."

SECTION 2. Each elector voting at said election and desirous of voting for or against said amendment shall deposit in the ballot box a ballot whereon shall be printed the words, "For the amendment of Section 1 of Article IX of the Constitution of the State of Colorado providing for a change in the membership of the State Board of Education, providing for the election of the members thereof, changing the Office of Superintendent of Public Instruction to the office of Commissioner of Education and providing that such Commissioner shall be appointed by the Board of Education," and the words "Against the amendment of Section 1 of Article IX of the Constitution of the State of Colorado providing for a change in

the membership of the State Board of Education, providing for the election of the members thereof, changing the office of Superintendent of Public Instruction to the office of Commissioner of Education and providing that such Commissioner shall be appointed by the Board of Education," and shall indicate his choice by placing a cross (X) opposite one or the other groups of words.

SECTION 3. The votes cast for the adoption or rejection of said amendment shall be counted and canvassed and the result determined in the manner provided by the laws of the State of Colorado for the canvass of votes for Representatives in Congress.

The 1949 Legislature enacted House Bill No. 837 which established the procedure for the election of the State Board of Education and the appointment of a Commissioner of Education. "The State Board of Education shall consist of a member from each congressional district of the state and if the total number of such congressional districts be an even number, one additional member"; since there are four congressional districts in Colorado, there shall be one from each such district and one at large, a total of five. "These members shall be nominated and elected by the qualified electors of the congressional district in the same manner as members of the House of Representatives of the Congress of the United States are nominated and elected."

The law further provides that "the first board shall meet within thirty (30) days after January 1, 1951, for the purpose of organization and otherwise. They shall decide by lot the terms of the four members elected from the congressional districts of the state; two of whom shall serve for two years and two for four years. The member of the board elected for the state at large shall serve for six years. The successors of the members first elected shall be elected for terms of six years. The members of the board shall serve without compensation, but shall be reimbursed for any necessary expenses incurred by them in the performance of their duties as members of the board."

"The State Board of Education is vested with such powers and duties as are necessary for carrying out the responsibility of general supervision of the public schools of the state as provided in Section 1, Article IX of the Colorado State Constitution." One of the duties of the board shall be "to appoint a Commissioner in accordance with qualifications as may be specified by law who shall serve at the pleasure of the board."

"The Commissioner of Education subject to the authorization and approval of the State Board of Education, shall serve as its executive officer and chief administrative officer in the administration of policies, rules and regulations adopted by or vested therein."

This reorganization will place the responsibility for the general supervision of the schools of the state in a State Board of Education elected by the people and not ex-officio members as heretofore. This provides for more democratic representation. The State Department of Education will be in a position to render greater service to the people of the state, particularly the school districts.

The State Department should be expanded. There is great need for additional staff in the instruction division which has been operating with only one Secondary and one Elementary Supervisor. It is impossible for them to contact all the schools every year in addition to the work of preparing bulletins and courses of study. The division of instruction should be under the guidance of a director of instruction whose duty it shall be to coordinate the work of the elementary and secondary supervisors, the supervisor of special education and other services that may be added in the future, — for example, health and safety, adult education, etc.

Another service that we are confident would be welcomed by the School Directors is that of School Building Planning and Construction. It is hoped that adequate funds will be provided by the 1951 Legislature.

Many districts are planning a building program. Technical and expert advice in this field should be available in the State Department of Education.

An assistant to the Director of Finance and Research is a necessity. It is impossible for one person to direct the research that is in constant demand and to provide assistance to county superintendents and school boards on matters of finance, budgeting and auditing.

The Department is badly in need of additional office space. This request should be considered in the next budget appropriation.

#### Reorganization of School Districts

For many years legislative and school groups interested in providing more state support for schools have been confronted with the problem of the great number of small, unnecessary, inefficient school districts. Various bills have been sponsored from time to time but not until 1949 was any legislation enacted to provide the legal background for a reorganization of school districts. Section 2 of House Bill No. 900 clearly states the purpose of this legislation:

"SECTION 2. The General Assembly hereby declares this Act is passed for the general improvement of the public schools in the State of Colorado; the equalization of the benefits and burdens of education throughout the various counties and communities of the State; to provide for the reorganization of the public school districts in the state, and the alteration of the boundaries of established districts and generally to enlarge the areas of school districts in the state in order to provide for the maintenance of a thorough and uniform system of free public schools throughout the state; to provide for high school education of the citizens of the state of school age who are qualified therefor; to make possible a higher degree of uniformity of school tax rate among school districts and to have a wiser use of public funds expended for the support of the public school system of the state. To these ends this Act shall be liberally construed."

House Bill 900 charged the State Commissioner "with the responsibility of making a thorough study of the school systems in the various states and to make a thorough study of the plan or plans for reorganizations in each county of the state and to make available to the county committees in each county all information, facts, figures and statistics gained through such study and survey."

By the Act the State Board was given the power and authority and responsibility of employing an assistant to the Commissioner to render all reasonable assistance to the county committees. Without delay the necessary steps were taken to elect committees in each county whose duties were the following:

"SECTION 5. The County Committee shall have and perform the following duties:

- (1) The making of a careful study of the public school system in the county;
- (2) To cooperate with the State Board and the Commissioner in arriving at a plan of reorganization of school districts within said county;
- (3) To pass upon and recommend any plan for the reorganization of the school districts in said county, or a portion thereof;
- (4) To call for an election, or elections, to vote upon such plan as provided herein;
  - (5) To make arrangements for such election;
- (6) To assist in the dissemination of information to the electors of the proposed district, or districts, as to the purpose and benefits of any such proposed plan;

- (7) To co-operate with the county committee of adjoining counties in the event districts embracing two or more counties appears advisable;
- (8) To make all certifications and perform all other acts specifically enjoined upon said county committee by this Act;
- (9) In general to do and perform any and all things reasonable or necessary to carry out the intent and purposes of this Act and perfect a reorganization of the school districts within the county in conformity with the spirit of this Act.

The progress that has been made from July 1, 1949, to July 1, 1950, is given in the report of the Assistant on School District Reorganization.

Since the status of the county superintendent has been questioned in a reorganization program, particularly in those cases where the number of districts has been very materially reduced, I think it is fitting that some statement be made to clarify the responsibilities of this important office.

Colorado's Constitution, Article IX, Section 6, specifies, "There shall be a County Superintendent of Schools in each county . . . whose duties, qualifications and compensation shall be prescribed by law. He shall be ex-officio Commissioner of Lands within his county."

Colorado Legislatures have, in accordance with the constitutional provisions stated above, placed upon this office certain responsibilities such as exercising a careful supervision of the schools; to visit each school at least once during each quarter it is in session; to examine the accounts of the district officers to see that they are properly kept; to keep in a good and substantial bound book a record of his official actions; to obey the legal instructions and decisions of the Commissioner of Education; to keep the record books and other books furnished in his county; to hold County Teachers Association meetings whenever in his judgment or the interest of the school work demands it; to serve as ex officio member of the county high school committee (when there is a county high school); to give notice of tree planting and observance of "Good Roads Day"; to see that fines and forfeitures are placed to the credit of the school fund; to handle the apportionment of school funds such as the "Old" General School Fund, the General School Fund, the Minimum Salary Fund; to certify the school census and the distribution of state apportionments to local districts; to keep a record of the boundaries of the school districts; to provide certain necessary blank books, stationery and other supplies; to certify the valuation of school districts to the County Commissioners; to certify the levies of the several school districts to the County Commissioners; to administer oaths and affirmations to school directors. teachers and other persons in official matters relating to schools; and to fill vacancies by appointment on boards of directors. By and large, these duties are clerical and not concerned with the task of exerting leadership in education.

In no instance in other states where school districts have been reorganized has this office been eliminated. Rather, the duties of the office as a secondary unit of administration have been expanded so as to enrich and improve the various school services provided. More specifically, these expanded duties and services include vocational and educational guidance services, transportation services, visual education services, health education services, adult education programs and services, testing services, and up-grading of the teaching school personnel through institutes, lectures, workshops, etc.

In some states the County Superintendent has become an appointed official selected by a County Board of Education. Such action takes the office out of politics and places it on a professional basis.

The reorganization of the over 1,825 school districts in Colorado's sixty-three counties (as of July 10, 1949) promises to reduce the multiplicity of clerical duties in the county superintendent's office and to free that office for improved and expanded services to the schools, as noted

above. Careful study and thought of this problem should result in the determination of policies and responsibilities for this office such as will cause the status of the County Superintendent of Schools in Colorado to be greatly improved, and thereby attract individuals of professional competence, who are capable of educational leadership.

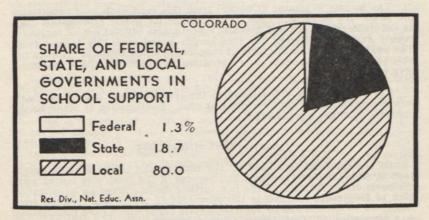

There are those who would discontinue this office when reorganization reduces the number of administrative units within a county to only a few school districts. This point of view reflects a lack of understanding of the needs of the schools and the potentialities for improved education for all the children that is certain to result from expansion and improvement of the county superintendent's office.

As long as this office remains political and is concerned with clerical duties alone it will not command the respect of the general public, or attract capable educators. Our democratic traditions demand that this important office in the pattern of public education be made to serve the needs of all the children of all the people in a more comprehensive and effective manner.

### STATE SUPPORT OF PUBLIC SCHOOLS IN COLORADO1

Colorado in 1949 continued the 1947 direct appropriations plan with an additional \$975,000 appropriation to the state school equalization fund for each year of the biennium, 1949-1951.

State funds available to local school districts during 1948-49 amounted to \$8,867,406. This state aid represented about 18.7 percent of the total \$47,000,000 (plus) revenue for all school purposes; 10.7 percent was contributed by the counties; 69.3 percent by the local districts; and 1.3 percent from federal sources. In relation to the current operation expenses of public schools, the state contribution amounted to about 19.5 percent.

#### Sources of State School Revenue

Sources of state school revenue funds furnished by the state and designated for school purposes for 1948-49 were: (1) by appropriations for the state general fund; (2) income from the state permanent school fund.

Legislative appropriations from the state general fund—Appropriations from the general fund together with revenue from the permanent school fund are designated as to purpose in Table 1.

#### TABLE 1. — SOURCES OF STATE SCHOOL REVENUE, 1948-49

|    | Source Amount  | Percent |
|----|--|---------|
| 1. | Legislative appropriations   |         |
|    | a. To "reserve for general county school fund" for replacement of county school tax\$1,886,578 | 21.3    |
|    | b. To "state school equalization fund"   |         |
|    | 1. Equalization distribution 2,088,936   | 23.6    |
|    | 2. Aggregate number of days of attendance 3,911,064  | 44.1    |
|    | c. Education of physically handicapped children 12,500   | 0.1     |
|    | d. Vocational education and rehabilitation 82,364  | 0.9     |
| 2. | Income from permanent school funds   |         |
|    | a. Teachers' minimum salary 857.449  | 9.7     |
|    | b. Census distribution   | 0.3     |
|    | Total\$8,867,406   | 100.0   |

Income from permanent school funds — Under a federal land grant act of 1875, the United States turned over to the state of Colorado public lands equivalent in area to one-eighteenth of the area of the state; these lands to be used for the benefit of public schools. Public school lands may be leased, rented, exchanged, or sold. On June 30, 1949, the school lands consisted of 2,838,184.25 acres, nearly all being under lease.

Proceeds from the sale of school lands, estates that escheat to the state, gifts and grants to the state for educational purposes together with receipts of items of a depletion nature such as timber sales and royalties constitute the principal of a permanent school fund known as the public school permanent fund which is held in trust and administered by the state land board. Since these lands are unappraised, the principal of the permanent school fund on June 30, 1949, was represented by cash, \$263,937.53; bonds, \$14,542,210.07; farm loans, \$86,513.87; and foreclosed lands, \$397,728.44, a total of \$15,290,389.91.

The income of almost \$1,000,000 from this fund each year constitutes the public school income fund. Publications for public information such as Colorado school law and biennial reports, also official school forms for county and school district use may be purchased from this income fund. The next priority is in the form of supplemental aid to those counties not able to meet the minimum salary program for teachers, with a maximum levy of 5 mills.

The remainder is apportioned to the counties upon the census basis less deduction of supplies received at cost. Reallocation is made to the districts upon the census basis.

#### Apportionment of State Aid

Of the total aid furnished by the state to the public schools during 1948-49, \$2,946,385, representing 33.2 percent of the total, was issued upon the basis of equalization. This is a further decline, from an equalization high of 59 percent reached in the year 1946-47, which has resulted from increased valuations and by additional state funds which have materialized as a remainder distributed upon a direct grant basis. A reverse is expected, however, as a result of a further \$975,000 annual appropriation made by the 1949 legislature together with an increase of the minimum educational unit from \$1800 to \$2000. This will materialize as an additional \$1,000,000 distributed upon an equalization basis which, together with losses of equalization toward teachers' minimum salaries, will result in a state program upon the basis of about 39.3 percent of state aid being for equalization for 1949-50.

General aid — The \$2,150,000 appropriation from the state general fund is placed in the reserve for general county school funds and is distributed to counties on the basis of the number of children on the school

census (ages six to twenty-one years). The state treasurer notifies each county treasurer annually as to the amount of aid available to the schools of his county on this basis. When county officials certify that they have reduced the county general school tax levy equivalent to the amount of the revenue from this source, payment is made of this money to the counties to be placed in their general school fund for teachers' salaries only. An exception to the above provides that in case of any county, or city and county, having a population in excess of 250,000 people, all such funds shall be allocated so that 50 percent is allocated for the county, or city and county, and 50 percent allocated to the school district or districts therein; and such funds are to be paid to the county treasurer without the necessity of a sworn statement that there has been a reduction in the mill levy.

Of the total \$2,150,000 distributed in 1948-49, \$526,844 was distributed under this provision. Of this amount school districts received one-half, or \$263,422. The remaining \$263,422 was distributed to counties, or cities and counties, with a population in excess of 250,000 for nonschool purposes, thus accounting for the discrepancy between the total distribution of \$2,150,000 and the amount of school receipts from this distribution (\$1,886,578) as shown in Tables 1 and 2.

The distribution of this fund for 1948-49 amounted to \$7.24 for each of the 296,939 children on the census as of April 10, 1948. The first recent material increase of school census is reflected as of April 10, 1949, with 305,068 school-age children, which results in \$7.05 each from this fund in 1949-50.

The maximum levy for the general school fund of the county is 5 mills. As a result of this program for the reduction of taxes, the highest levy for the tax year 1948 was 4.6941 mills and the lowest levy was 0.3 of a mill.

The law governing the distribution of the public school income fund provides that any balance remaining in that fund, after requirements for supplemental aid to counties wherein 5 mills will not provide the required teachers' minimum salaries, shall be distributed on the census basis. As a result from increased valuations mainly, only thirty-one counties of the sixty-three needed supplemental aid for 1948-49 with the further result that \$28,515 was distributed on the census basis, this being the first such occurrence since 1937. With only twenty-six counties having a need of \$774,399 as supplemental aid for 1949-50, the remainder is anticipated to be \$150,000 for the same year.

Provisions were made by the 1947 legislature that all funds remaining in the state school equalization fund at the end of each fiscal year, after payment of the demands of the minimum educational program, shall be distributed to all school districts of the state upon the basis of aggregate days of attendance of pupils in each district at a rate not to exceed 15 cents per day per pupil. Limitations to participation provided for a school term of at least 140 days and not greater than 180 days, also a local district levy equivalent to at least 6 mills. For 1947-48, \$3,793,061.63 was distributed upon the basis of 30,761,809 aggregate days, providing 12.33 cents per pupil day or approximately \$21.30 per pupil year. For 1948-49, \$3,911,063.57 was distributed upon the basis of 31,783,305.5 aggregate days, providing 12.30 cents per pupil day or approximately \$21.26 per pupil year.

The 1949 legislature amended the act to make payment upon the basis of average daily attendance with payments not to exceed \$50 per year per pupil with the further amendment that the school term be at least 170 days for participation. The minimum term of 140 days was still effective for 1948-49 wherein the average daily attendance was 185,789.32 upon which basis \$3,885,095.42 was distributed, representing \$20.91 per pupil per year.

Equalization aid — The object of the equalization law is to assist school districts which are unable to maintain a certain classroom unit level. The minimum effort for participation is a basic district levy of 6 mills (1.5 mills for county or union high schools with 4.5 mills for districts within these areas), a pro rata apportionment from the county 1-mill levy

together with the \$75 per teacher month provided by the county for teachers' minimum salaries (which is also supplemented by the state). If the sum of these items do not amount to \$2000 per classroom unit the state pays the difference. The first equalization law, passed in 1943, provided for minimum classroom units of \$1000 in the elementary schools and \$1333 in the high schools. The standard was increased to \$1800 in 1945 for both elementary and high schools and further increased to \$2000 in 1949.

Three-fourths of the amount provided for a classroom unit must be paid as salary to the teacher. This, together with three-fourths of the amount received for average daily attendance payable as salary to teachers, has tended to establish the effective minimum salary in Colorado. This is reflected in a salary analysis for 1948-49 which shows that, inclusive of mainly part-time teachers, only 238 out of a total of 9548 teachers and administrators, receive a salary of less than \$1500. The mean salary being \$2681, the median, \$2497, and the mode, \$1856. These amounts are expected to reflect an increase of \$150 to \$200 for 1949-50 due to increased amounts for classroom units.

For 1947-48, the state paid \$2,206,938.37 to fifty-three counties; for 1948-49, \$2,088,936.43 was paid to fifty-one counties, and for 1949-50 these equalization payments toward the \$2000 basic unit amounted to \$3,089,904.58 paid to fifty-four counties.

It will be observed that the above equalization program is, in some instances, pyramided upon another equalization program last revised in 1945. When a county levy of 5 mills on all assessed valuation is insufficient to pay teachers' minimum salaries of \$75 per month, the state pays the difference from the public school income fund. Any fund remainder is distributed on direct grant as previously described. Supplemental payments to thirty-seven counties amounted to \$834,291.34 for 1947-48; to thirty-one counties amounted to \$857,449.14 for 1948-49; and to twenty-six counties amount to \$774,398.96 for 1949-50. Districts which do not have a basic special levy of at least 3 mills (1 mill for county and union high schools and 2 mills for districts within these areas) may not participate in this supplemental aid from the state altho they may share in the provisions made by the county. This 3-mill requirement is inclusive in the 6-mill requirement for the classroom unit program.

Special aid — The State supplements federal funds to aid school districts in financing the costs of vocational education. Payments of this aid are in the form of reimbursements for expenditures already made. For 1947-48 this amounted to about \$60,000, for 1948-49 it was reported as \$82,364 including expenditures for rehabilitation.

In the special program for the education of physically handicapped children much of the cost is borne by the larger cities; the state aids this program on a reimbursement basis with emphasis on aid to rural areas. Appropriations of \$12,500 for each of the years 1947-48, 1948-49 have been increased to \$17,500 for each year of the biennium 1949-1951. An additional \$25,000 for each year of the 1949-1951 biennium was appropriated for physically and mentally handicapped children.

TABLE 2. — APPORTIONMENT OF STATE AID, 1948-49

# SIXTY-FOURTH ANNUAL MEETING OF COLORADO COUNTY SUPERINTENDENTS' ASSOCIATION

January 31, February 1, 1949 in Denver, Colorado

Executive Committee for the year 1949

President, Miss Martha Savage, Delta County, Delta, Colorado Secretary, Miss Marian Lockwood, Morgan County, Fort Morgan, Colorado Treasurer, Mrs. Esther D. Carson, Elbert County, Kiowa, Colorado

# SIXTY-FIFTH ANNUAL MEETING OF COLORADO COUNTY SUPERINTENDENTS' ASSOCIATION

January 26, 27, 28, 1950

in Greeley, Colorado Executive Committee for the year 1950

President, Mr. Stanley A. Leftwich, Pueblo County, Pueblo, Colorado Vice-President, Mrs. Esther Carson, Elbert County, Kiowa, Colorado Secretary, Miss Marian Lockwood, Morgan County, Fort Morgan, Colorado Treasurer, Mrs. Loretta S. Davis, Teller County, Cripple Creek, Colorado

#### REPORT OF THE SECONDARY DIVISION Of The STATE DEPARTMENT OF EDUCATION July 1, 1948 - June 30, 1950

The Supervisor of Secondary Education is charged with the responsibilities dealing with curricula, courses of study, research, and general supervision of the high schools of the state for the improvement of teaching practices on the secondary level. In addition to the factors relating directly to the public high school, he also must represent the State Department of Education at conferences, meetings, etc., which are connected with the education of youth and adults.

In the Fall of 1948 research on Air-Age Education was completed and the writing of a handbook for teachers was begun. The book, COLORADO'S YOUTH LOOKS TO THE SKIES, was completed and published November, 1949. It has received both national and international recognition.

HIGHWAYS TO HEALTH AND SAFETY, a teacher handbook for health and safety education for secondary schools is completed and ready for publication. This book will be ready for the schools for the 1950 Fall term.

The secondary supervisor has represented the State Department of Education at the following:

The North Central Ass'n. of Colleges and Secondary Schools Audio-Visual Department of the National Education Association

The Denver Film Council

The Rocky Mountain Radio Council

UNESCO

The Denver Adult Education Council The Colorado Adult Education Council

The National Foundation for Christians and Jews

The Coordinating Committee, Colorado Highway Safety Council The Association for Supervision and Curriculum Development

The Public Health Council

Many schools have been assisted with curriculum planning. The supervisor spent several days in each of several schools, working with curriculum committees and making general school surveys.

The majority of the counties have been visited, some several times. During these visits county superintendents, school superintendents and principals were counseled in matters relating to teacher preparation, inservice training, organization, courses of study, curriculum, testing, plant, and many other problems of individual nature.

Many used library books and free materials were distributed to the schools as they were visited.

In July, 1948 two very important conferences were attended. The first was a meeting of the Commission on Teacher Education and Professional Standards held at Bowling Green, Ohio. The meeting lasted a whole week. It was the privilege of the secondary supervisor to write the chapter on "The Professional Training Of The Secondary Teacher" for the Commission's publication.

Following the Bowling Green Conference the meeting of the National Education Association was attended at Cleveland, Ohio.

In October a conference of school personnel, highway safety specialists, and bus manufacturers was held at Jackson's Mill, West Virginia. At this meeting national standards for school bus drivers and school bus maintenance and operation were developed.

In November, 1948 the State Commissioner created the Colorado Commission for Life Adjustment Education. The secondary school supervisor became secretary of that organization and has so remained to date.

The school bus regulations were revised and published November, 1948.

Assistance was given in the allocation of the articles received on the French Merci Train.

The week of April 24, 1949 was spent touring the state with a panel which discussed the Life Adjustment Education program.

A meeting for secondary school supervisors sponsored by the U. S. Office of Education was held the last week of May and the first week of June, 1949 at Washington, D. C. A similar meeting was held in the spring, 1950. Many helpful ideas were received from these meetings.

Following the 1949 U. S. Office Conference, the President's Highway Safety Conference was attended.

The National Association of Secondary School Principals was held in Kansas City, Missouri, February, 1950. This meeting provided information on trends and practices in secondary schools.

At the request of the Bureau of Standards the high school of Bellview College was visited and evaluated May 18, 1950.

Below is given a summary of meetings attended during the biennium 1948-1950

MARGUERITE R. JUCHEM,
Supervisor of Secondary Education
Colorado State Department of Education

#### REPORT OF THE STATE ELEMENTARY SCHOOL DIVISION

September 1, 1949 to June 30, 1950

Since the position of elementary school supervisor was vacant from September 1, 1948 to September 1, 1949, no report is made for that period.

One of the main projects of the year has been to assist with improvement of elementary education over the state. To this end 48 counties have been visited where conferences have been held with the county superintendents, principals and teachers. Schools were visited in these counties and a detailed report of such visitations including recommendations and observations filed with the state commissioner.

Teaching aids and supplies were given to all counties.

Eleven Denver Schools have also been visited to secure information for the state department in special education, the elementary curriculum, education of Spanish children and the status of the Negro teacher.

Five supervisory bulletins have been mimeographed and sent to all counties as follows:

These were prepared to meet specific needs in the schools.

Talks have been given for 24 groups, three of these being teacher education classes. An estimated 2700 teachers have been contacted in visitations, conferences and groups.

Correspondence in letters and forms received and answered has totaled 1014.

#### Handbook on The Program in Word Analysis

To meet the need for improvement in reading skills 10,000 copies of a 52 page booklet giving in detail The Program in Word Analysis have been printed for Colorado teachers. This book contains principles of teaching word recognition, items to be taught by grades, and a section on teaching procedures with ample illustrations. The department is grateful for the time given by Miss M. Lucile Harrison and Dr. Paul McKee of the Colorado State College of Education as consultants on the handbook.

#### Handbook on Patriotic Education

A book has been prepared for printing entitled So Proudly We Hail—a Handbook on Institutions and Ideals of United States Government. The purpose of this book is to fill a need in the schools for improvement in citizenship and to help students become articulate about their form of government. The book contains usable material for schools on Foundations of Government, Symbols of Our Country, National Songs, Our Nation's Capital, Patriotic and Special Days, Literature, Poetry, Art, Famous Leaders in Freedom, Audio Visual Aids, and facsimiles of the Declaration of Independence and the Constitution.

#### Evaluation of Elementary Schools

A preliminary program in a state-wide evaluation of elementary schools has been started with an advisory committee, designated by Mrs. Nettie S. Freed, State Commissioner, consisting of representatives from the state educational institutions, the county superintendents and the classroom teachers along with the state department members. This evaluation study will have major emphasis for the next few years with the purpose of developing better elementary schools for all of Colorado's children.

#### Conferences and Study Groups

The elementary supervisor has represented the state department at the following meetings:

The Colorado Education Association

The Annual Meeting of County Superintendents

The National Council of State Elementary School Consultants

The National Meeting of the Association for Childhood Education

The National Meeting of the Association for Curriculum and Supervision of the National Education Association

Three of the above groups met in Denver.

Three days were spent at the U. S. Office of Education conferring on problems of state-wide elementary school evaluation, supervision, curriculum, and the handbook on citizenship.

Special time has been given to Audio Visual education through the D.A.V.I. of the N.E.A. and C.E.A. and the supervisor has attended local meetings of the Association for Childhood Education and is now a member of the state board of this association.

It has been a privilege to cooperate with the department of special education and all other departments of the state office and to receive guidance and direction from the state commissioner of education and the deputy commissioner.

LUCILE H. LATTING, State Supervisor of Elementary Education.

#### TEACHER CERTIFICATION

The State Commissioner of Education is empowered to issue certificates in accordance with statutory requirements; the State Board of Examiners has authority to establish certain rules and regulations not in conflict with these statutes. The three state teachers colleges are authorized to issue teaching certificates valid for life upon receipt by the student of his four year college degree with a major in education. Also first class districts are authorized by law to issue teaching certificates to their teachers of special subjects.

There are many faults with our present certification statutes as evidenced by a study of our certification rules and those of other states; it is sincerely desired that the new State Board of Education, established by a bill passed by the State Legislature in 1949, will see the need for changes in the existing statutes; it is hoped they will make recommendations to the Legislature for repeal of existing statutes so they may set up adequate rules and regulations for certifying teachers. The new State Board will be vested with powers and duties to make and adopt rules and regulations for the proper certification of all regular school personnel; however until the present statutes are repealed, such changes may not be made.

It is most desirable to have the sole power for issuing certificates to public school teachers of Colorado vested in the State Department of Education; we desire to establish a uniformity of standards and to raise these standards of certification for teachers of our schools, this to insure that the children receive the best improvement and development possible by such teachers.

Under present certification statutes and rules and regulations the following teaching certificates are issued:

The certificate issued by a 1st class district to teachers of special subjects.

The life certificates issued by the three state teachers colleges, as mentioned above.

The certificates issued by the State Department of Education are the Emergency Certificate or Special Permit; the Elementary Temporary Certificate based on a minimum of 90 quarter hours of acceptable college credit plus 36 months of teaching experience in Colorado on county certificates; the Elementary Life issued to holders of the Elementary Temporary Certificate who present 180 quarter hours of college credit; the Pre-Graduate Permit based on 90 quarter hours of college credit with specific requirements in professional education; the Special Temporary Certificates valid for teaching only the subject specified on the certificate; the Non-Renewable Elementary Temporary Certificate based on 135 quarter hours of college credit with special professional education requirements; the Graduate Temporary Certificate based upon the same professional requirements with the holder having an A.B. Degree or equivalent degree; the Graduate Life Certificate issued to the holder of the Graduate Temporary Certificate who completes 45 months of teaching in Colorado on this certificate; Junior College Certificates issued upon the recommendation of the junior college president.

At the request of the Commissioner of Education there are a number of committees composed of members of the teaching profession working on recommendations for changes of certification requirements, such recommendations to be presented at a feasible time to the new State Board of Education for consideration.

There is an extreme shortage of teachers in the elementary field due to many factors; we have had an increased birth rate in the past ten years which is still high; this naturally gives us an increased school enrollment; we have experienced loss of teachers to other fields due to inadequate salaries and poor living conditions; there has been a lack of proper guidance of future teachers by college officials resulting in an oversupply in the secondary field resulting in further shortages in the elementary field. For this reason the State Department of Education has found it necessary to continue with the issuance of the Emergency Certificate since the war; however each emergency teacher has been required to improve her preparation by presenting 12 quarter hours of credit earned since the issuance of her last Emergency Certificate—the additional credit is required until the teacher can qualify for a regular certificate. It is hoped that these sub-standard certificates may be discontinued in the near future when the supply of the qualified teachers holding the regular certificate is sufficient. Between 1947 and 1948 there was a decrease of 602 Emergency Certificates issued.

Interstate reciprocity in teacher certification would encourage the free movement of qualified teachers into our state and would tend to alleviate the shortage of elementary teachers. However the main factor hindering Colorado's participation is our low requirements as set up by Colorado statutes in certification requirements; we find that other State Departments of Education will not accept our degree teachers in return and there is no basis for agreement between their requirements and ours at this time. Our department has been working closely with other State Departments of Education at regularly scheduled study conferences in the hope that we would soon be in a position to participate in interstate reciprocity on teacher certification.

The certificates issued by this department for the 1948-49 and the 1949-50 fiscal year were as follows:

|                                     | 1948-49 | 1949-50 |
|-------------------------------------|---------|---------|
| Graduate Temporary                  | 1232    | 1391    |
| Graduate Life                       | 131     | 176     |
| Non-Renewable Elementary Temporary. | 226     | 243     |
| Elementary Temporary                | . 50    | 54      |
| Elementary Life                     | 8       | 10      |
| Special Temporary                   | 10      | 6       |

|                     | 1948-49 | 1949-50 |
|---------------------|---------|---------|
| Special Life        | 1       |         |
| Pre-Graduate Permit | 50      | 48      |
| Junior College      | 39      | 54      |
| Renewals            | 105     | 87      |
| Duplicates          | 32      | 35      |
| Emergency           | 1776    | 1636    |

ELEANOR CASEBOLT

Supervisor of Certification

#### COLORADO STATE LIBRARY Bienniel Report 1948-1950

During the 1948-50 biennium, the services and resources of the Colorado State Library developed and expanded to a greater degree than during any other two-year period in its history, and statistics for the biennium indicate that use of the facilities offered has increased sharply. In one phase of the work of the Library—the popular Direct Loan Service—to cite but a single example, circulation figures increased over the previous biennium by 72 percent, from 246,317 to 424,735. Use of other facilities—reference, counseling and advisory, bookmobile demonstration, etc.—by the public has increased at approximately the same ratio. An improved program of public relations and publicity is to some extent responsible for the progress, but larger holdings and additional personnel are also significant factors in the development of the Library. Requests for assistance of all types still exceed resources and manpower, and it is hoped that in the future, sufficiently large budgets will be allowed so that patrons will always be able to secure the help they need. The 37th General Assembly increased the 1949-51 appropriation by approximately 20 percent.

An important trend in the Direct Loan Service is the increase in the number of individual patrons—rural borrowers who live in lonely and isolated sections of the State, retarded juvenile readers who are slow in their school work, and invalids. A gain of more than 100 percent has been observed in the registration of this type of borrower.

#### Public Library Service Demonstration Bill

During the first half of 1950, a federal program for which librarians and library patrons had been working for several years collapsed when the Public Library Service Demonstration Bill was defeated by the narrow margin of three votes in the House of Representatives in Washington. The bill, had it been enacted into law by Congress, would have provided federal moneys to the forty-eight states for library purposes. Funds would have been used to set up demonstration libraries under the supervision of state library agencies, in order to encourage local governmental units to organize and operate adequate libraries of their own. It was drawn up as a temporary measure, to terminate at the end of five years, and would have provided a strong incentive to state libraries and extension agencies to put forth more vigorous efforts to improve and expand their own facilities. Extensive plans for the careful expenditure of federal funds in Colorado were perfected, after numerous revisions by the State Library Advisory Board, and the defeat of the worthwhile measure came as a great disappointment.

#### Counseling and Advisory Service

Heavy use of this service, which for many years has been neglected due to inadequate funds, resulted in the organization of a number of new libraries throughout the State. It was also responsible for much-needed improvement in technical procedures in libraries of all types, and brought about the reorganization of weak and inadequate systems in several instances. The following examples indicate the scope and general intent of the service.

The State Librarian met with the County Commissioners in Saguache County and assisted a group of citizens to secure a tax levy for the establishment of a county library. A professional assistant was assigned to the Lamar Junior College to supervise the organization of the college library. Classification and cataloguing procedures were modernized or set up from the beginning in several public libraries by a skilled State Library cataloguer, and a school library specialist devoted many days of her time in helping reorganize public school libraries according to accepted standards. In addition to numerous assignments of this type, all of the public libraries were visited at least once by the State Librarian on routine field trips, designed to strengthen and consolidate the public library situation in Colorado.

#### Bookmobile Demonstration Program

September 1, 1948, the Library inaugurated a new program which, during the past two years, has become one of the most important of its several services. On that date, its recently-acquired bookmobile and approximately 2,000 books were loaned to Pueblo County for a six-month demonstration period. The bookmobile operated in the rural areas of Pueblo County, making regularly scheduled stops at the schools. It also visited many small towns and settlements in order to serve adult patrons. The first six months of the demonstration were so successful that the loan of the vehicle was extended for another six-month period, and when the program was completed, September 1, 1949, the citizens of the County found that mobile library service was indispensable, and a new bookmobile was purchased out of county funds. In the fall of 1949, the bookmobile was awarded to Otero County for a second demonstration, and it is anticipated that the county commissioners will authorize the purchase of a similar unit for the County when the experiment is completed. The Demonstration Bookmobile will operate in Las Animas County beginning in the fall of 1950. Here it will meet its most severe test, since it will be covering the largest county in the State. Sponsored by the County Superintendent of Schools, it will make 8 adult stops and visit 18 schools. In 1951, the State Library hopes to have ready for operation a second mobile unit, a gift of the Colorado Federation of Women's Clubs, which will be known as the "Grace Guard Bookmobile." An attractive bookmobile brochure has been issued by the Library in order to inform the people of the State concerning the most effective medium for the distribution of library materials in rural areas.

#### Advisory Board

In order to strengthen public relations and secure an active group of lay citizens to participate in the program of the State Library, an unofficial library board of key people, representing all sections of the State, was created in October of 1948. The Advisory Board functions in a manner similar to that of official library boards, appointed by county commissioners and city councils, and is called upon by the State Librarian and Deputy State Librarian to assist in matters of legislation, finance, professional standards, policy, and cooperation with other libraries. It is composed of the following members: Mrs. Vance Kirkland, Denver, President; Mrs. Idelia Baumgarten, Kremmling; Luther Bean, Alamosa; Mrs. E. A. Bloomquist, Pueblo; B. F. Coen, Ft. Collins; F. W. Cloyd, Salida; Miss Harriet E. Howe, Colorado Springs; Mrs. Violet Noll Johnson, Kremmling: Miss Claire K. Knox, Pueblo; Miss Marian Lockwood, Ft. Morgan; Mrs. Emma Vance, Akron; Mrs. Bessie Wilson, Burlington; and Dr. Horace Wubben, Grand Junction. Meetings are held two or three times each year in Denver, and members pay their own traveling expenses. The Advisory Board is at present preparing manuals of standards for public and school libraries, and certification recommendations for Colorado librarians.

#### **Public Documents**

In September of 1949, a large-scale disposal program of duplicate state documents and state materials not considered important in the Library's holdings was undertaken. In connection with this program, the entire documents section of the library has been reorganized. Material is being reclassified, and an elaborate system of subject headings set up, in order to make the collection more readily available for research work. Because of the lack of shelving and storage space in the library proper and the vault, the acquisition of new official publications of the several states and the federal government has been cut back sharply. Several tons of documents which have never been used and which can be secured for patrons through inter-library loan if needed, were sold for waste paper when the states where they originated did not want them returned.

#### Cooperation With Other Libraries

Due to a marked increase in requests for expensive and unusual books, inter-library loans were used to good advantage during the biennium. Hundreds of volumes were borrowed from the Denver Public Library, the University of Denver and other libraries in the region. The State Library collection was also used heavily by libraries in the Rocky Mountain states in filling requests from non-resident patrons for specific titles. In 1949, for the first time, the State Library became a member of the Bibliographic Center for Research, Rocky Mountain Region, at a cost of \$200.00 per year, and thus gained access to a large and excellent collection of bibliographic tools and a union catalog of the holdings of all of the important libraries in the region. The services of expert researchers were also made available to the Library through membership in the Center.

#### State Reading Circle Program

State Library personnel contributed extensively to the success of the State Reading Circle programs for 1948-49 and 1949-50. As a member of the Colorado Education Association committee handling the important reading program, Mrs. Nettie S. Freed, Commissioner of Education, delegated to the Library the work of selecting new children's titles for the annual lists and reviewing them in the Colorado School Journal. Committee meetings for the final selections of books to be included in the lists were held in the Library where all titles were available for examination, and reviews at hand for checking. Articles in the Journal appeared under the banner, "Reading Circle Roundup" and proved a popular feature with readers.

#### State Plan For Library Development

A new proposal to decentralize the State Library through the establishment of five regional branches, close to the bookless areas of the State and within easy access of points which need assistance in matters of procedure and professional techniques, is being formulated by the staff with the assistance of the Advisory Board. The plan, which calls for financial assistance from the State to local libraries in need of additional revenue, will incorporate ideas from states such as New Mexico, Illinois and Missouri where regional systems are operating efficiently today. It will require the purchase of five bookmobiles and increase the staff of the Library, but is considered the most efficient and economical pattern for complete state-wide service yet developed in Colorado, where the ultimate goal of the State Library is to achieve 100 percent library coverage, equalize service among communities, and provide free reading privileges for all of the approximately 290,000 rural residents who today have no libraries.

#### SPECIAL EDUCATION IN COLORADO FOR THE BIENNIUM 1948-50

- The nature and purpose of Special Education as it is related to the focus of the White House Conference.
  - A. The purpose of Special Education in Colorado may be most concisely expressed by that phrase in the aim of the White House Conference which refers to the "development in children of the mental, emotional, and spiritual qualities essential to individual happiness and to responsive citizenship."

Our object is to prepare the exceptional child to use his abilities to the highest degree of which he is capable. We plan to help this type of child to overcome any feeling of inadequacy or insecurity. The purpose of Special Education is to help each child minimize his handicaps so that he may be free to develop into a well-adjusted, contributing member of our society.

II. Essential information concerning incidence of the various handicapping conditions and the extent of the problem they present. A. Incidence of various handicapping conditions. (The following enumeration is a compilation of the cases enrolled in the Special Education programs listed in Section B below. It does not include children in the State School for the Deaf and Blind, nor the State Mental Institutions.)

| 1.  | Poliomyelitis                            | 85   |
|-----|--|------|
| 2.  | Cerebral Palsy                           | 131  |
| 3.  | Other Orthopedic Disorders               | 68   |
| 4.  | Post Rheumatic Fever & Cardiac Disorders | 185  |
| 5.  | Tuberculosis                             | 27   |
| 6.  | Epilepsy                                 | 15   |
| 7.  | Nervous Disorders                        | 14   |
| 8.  | Nephritis                                | 16   |
| 9.  | Acoustical handicap                      | 75   |
| 10. | Visual handicap                          | 30   |
| 11. | Speech disorders                         | 180  |
| 12. | Mental retardation                       | 234  |
| 13. | Miscellaneous                            | 45   |
|     | Total                                    | 1105 |

#### B. Existing Special Education facilities and programs.

#### 1. Types Of Programs

- a. Visiting Teachers: Colorado's population is predominantly rural. Because of the resultant scattered incidence of handicapped children, the transportation problem, etc., a system of visiting teachers seems to be the most practical approach to the problem of education of the atypical child in this state. During the school year of 1949-1950 approximately 80 teachers have been working with 430 homebound children.
- b. Schools of Special Education in Denver
  - Boettcher School: Elementary and high school for physically handicapped children.
  - (2) Evans School: Elementary unit in a regular school for the training of acoustically and of visually handicapped children. Another unit in this school is set up for the mentally retarded.
  - (3) Morey School: Junior High School unit in a regular school for the training of the acoustically handicapped.
  - (4) South High School: High School unit in a regular school for the training of acoustically handicapped children.
  - (5) Wyman School: Elementary unit in a regular school for mentally retarded children.
  - (6) University of Denver Speech Schools: A speech correction school which has an enrollment of 75 children, some of whom are maintained in the school's boarding home.
  - (7) Cerebral Palsy Preschool: A school for younger children with Cerebral Palsy.
  - (8) Three private schools for mentally retarded children.
- c. Special Education Classes: Five towns or counties in the State have established in their regular school, units for educating the handicapped children in their areas.
- d. Hospital Classes: Special Education is provided in several Colorado hospitals, including the National Jewish Hospital, Colorado General Hospital, Denver, and St. Francis Hospital, in Colorado Springs.
- Location Of Children Served: Both urban and rural areas provide Special Education. However, the children served in Colorado are predominantly in rural areas.

#### Problems in Special Education

a. General Problems

- (1) Closer reciprocity between services of the Division of Special Education, United States Office of Education, State Divisions of Special Education, County Administrators and District Educators.
- (2) Closer cooperation and interaction between public and volunteer agencies.
- (3) Increased support and stimulation of research projects both on a national and a local level. Example: The State of Colorado ranks high in the incidence of rheumatic fever. Approximately one-third of our homebound children are rheumatic cases. The current study of rheumatic fever by the clinic here should prove important and helpful to our office.

b. The Child and the Educative Unit.

(1) A paramount problem is that of accurate, extensive enumeration of each type of physically and mentally handicapped child.

(2) In a rural State such as Colorado, the transportation difficulties are great.

(3) The school curriculum needs to be adjusted to meet the educational needs of the child—it must be a functional, extensive, individualy-formulated curriculum.

(4) The curriculum also needs to be adjusted to the physical abilities of the child. How can we prevent children of lowered vitality and of irregular attendance from becoming average and socially unadjusted in the class?

(5) The Special Education program must be so planned as to help the child adjust to his handicap and so to make an adequate social adjustment.

(6) The atypical child needs help with the problem of discovering areas of compensation. (A mentally dull child may find outlets in manual dexterity.)

(7) Provision must be made for adequately trained teachers and other personnel.

(8) Adequate physical plants and equipment must be provided—this is particularly difficult in rural areas.

(9) Regular classroom teachers and other personnel need in-service training in order to be alert to the possibility of handicapped children in their classrooms. Early referral may prevent the need for prolonged Special Education in many cases.

c. The Home and the Educative Unit.

- (1) We are charged with the problem of helping parents realize the need for Special Education through better understanding of their child's limitations and of his abilities.
- (2) The Special Education Program has a responsibility in helping parents adjust to the handicapped child. Help is needed also in fitting the exceptional child into his proper place in the family unit.

(3) Perhaps one of our greatest obligations is to enlist the aid and interest of parents in the whole scope of Special Education—their help in legislation, etc. is needed.

d. Recommendations Concerning the Solution of Problems.

(1) Several recommendations are included in the other sections of this paper.

(2) Many of our problems cannot be alleviated without larger State appropriations and larger local "investments" in Special Education.

(3) We need to publicize further the facilities of Special Education. Too often parents, teachers, doctors, and others say they did not know facilities were available to them.

#### C. Gap Between Existing Services And Needs For Services

- Implications with regard to professional training, policies, and programs.
  - a. Needs and Recommendations in Teacher Training.
    - An increase in the available college courses in special education is needed.
    - (2) An over-all course in Special Education should be a requirement for every teacher's certificate.
    - (3) Better standards of salary are needed to compensate for added training necessary for special teachers.
    - (4) We need adjustment of Special Education training courses to more adequately meet the needs in different areas. A Special Education teacher in a rural State needs different training than one in an urban State.
    - (5) In-service training in Special Education for both regular and special class teachers.

(Items III and IV in outline are included elsewhere in this paper.)

#### Relationship of Special Education With Other Organizations and Coordinating Groups.

- A. Education is but one part of the developmental program for the handicapped child. In every case medical services should be made available to the child before education is provided. In many cases of course, the medical services will be concurrent with the special teaching services. More and more hospitals are adjusting their routines to allow for schooling for the patients. We have repeated calls from doctors of children with rheumatic fever requesting the teaching services as a definite part of the recovery program for the child. Doctors and other medical workers seem to be increasingly aware of the therapeutic value of special education.
- B. To educate a handicapped child academically and socially through the highest level of his abilities and then neglect vocational guidance and training is a frequent occurrence. This must be remedied. It can in many cases be remedied by a closer cooperation and referral system between the educative unit and the vocational training unit.
- C. Greater interaction and dove-tailing of activities between the public agencies and the private and volunteer agencies is needed if each child is to be best served.

#### IV. Additional Information Not Elicited by Previous Questions Which in Your Opinion Is Essential to a Grasp of the Purposes and Achievements of Special Education.

A. If the purpose of Special Education is to help each child minimize his handicaps so that he may be free to develop into a well-adjusted, contributing member of society, a definite clear-cut follow-up system is needed.

When a child leaves a special school or class, or when he is able to discontinue home classes and return to a regular classroom, he faces a terrific adjustment period. It is part of the obligation of Special Education to follow the child until he has made the transition. Many of our special cases are dropped only to reappear at a later time. This could be prevented in many cases by a good follow-up system in the schools and in the medical and other interested agencies.

Denver, Colorado June 27, 1950

CAREY J. DOWNING,

Supervisor of Special Education

#### SCHOOL LUNCH

Biennial Report Covering the Fiscal Years 1948-49, 1949-50 School Lunch

The National School Lunch Act (Public Law 396, June, 1946) made possible a grant-in-aid program to assist the states in the "establishment, maintenance, operation, and expansion of a non-profit school lunch program."

The State Department of Education, through the School Lunch Division, administers the program within the state under an agreement with the United States Department of Agriculture.

Certain minimum requirements of the Federal Government must be met by the State and by participating schools.

Participation in the lunch program is limited to public schools of high school grade or under that have the facilities to serve a lunch and can establish need for Federal assistance. The maximum rate of .09c for a complete meal with milk, allowed under Federal regulations, was not paid in Colorado due to the insufficiency of Federal funds.

Federal funds are made available by an annual appropriation and pro-rated to the states on the basis of the number of children of school age within the state. Federal funds are used entirely to reimburse participating schools, and State funds are provided for administration only. Federal funds must be matched on a dollar for dollar basis. Payment for lunches by participants is the chief source of matching funds, with some funds being contributed by the school districts.

In addition to the cash reimbursement, schools receive donated agricultural commodities from the Department of Agriculture which is distributed to the schools by the State Department of Welfare.

| Amount and Source of Funds                                      | 1948-49     | 1949-50        |
