Section 1: Assessment Data	
Colorado Student Assessment Program (CSAP) Data	4
National Assessment of Educational Progress (NAEP) Data	39
Section 2: State Accountability Data	
About AYP	41
Colorado State AYP Results	42
Colorado 2008 Graduation Rate Data	52
Section 3: District Accountability Data	
District AYP Results	54
NCLB Program Improvement	55
Section 4: School Accountability Data	
School AYP Results	64
School Improvement Results	68
Section 5: Highly Qualified Teacher Data	75

## Introduction

The Colorado Department of Education (CDE) is pleased to present to its constituents the 2010 No Child Left Behind Report Card. This report card details the progress Colorado and its districts and schools are making toward the goals of the federal No Child Left Behind (NCLB) Act. The intent of the NCLB Report Card is to inform parents, teachers, the general public, key policy-makers and other decision makers about the status of education in Colorado in relation to NCLB goals. Specifically, the report includes:

- Assessment Data- the results of the reading and math state content assessments (CSAP, CSAPA and Spanish Lectura)
- Accountability Data- the Adequate Yearly Progress (AYP) results for the state
- Improvement status of Title I districts and schools in the state
- Graduation Rate Data
- Information about teacher qualifications and percentages of classes taught by Highly Qualified teachers

Parents, school/district staff and the general public can also easily access individual school and district performance data on CDE's web portal SchoolView at <http://www.schoolview.org/>.

Some highlights from this year's report include:

- Colorado students performed higher than the national average on the NAEP assessment in grades four and eight in reading.
- The state saw gains from 2009 to 2010 in the percent of districts that made AYP. In 2010, 48 percent of districts in Colorado made AYP (up from 46% in 2009). Seventy-eight percent of districts made at least 90 percent of their targets (same as 2009)
- Eighty-five Colorado school districts have been identified for Program Improvement or Corrective Action.
- Five Title I schools have made AYP for two consecutive years and have been removed from the School Improvement list. Another 54 schools on Improvement made AYP for the first time, and will exit Improvement if they make AYP again next year.

If you have questions about an individual school or district, I encourage you to contact the individual school or district office. Additionally, all districts in the state create an Annual Report to the Public, which contains more information about how the specific district and schools are succeeding. Thank you for your interest in the education of our state's students. For more information, please visit our website at <http://www.cde.state.co.us/FedPrograms>.

Patrick Chapman

Colorado Department of Education

## Section 1: Assessment Data

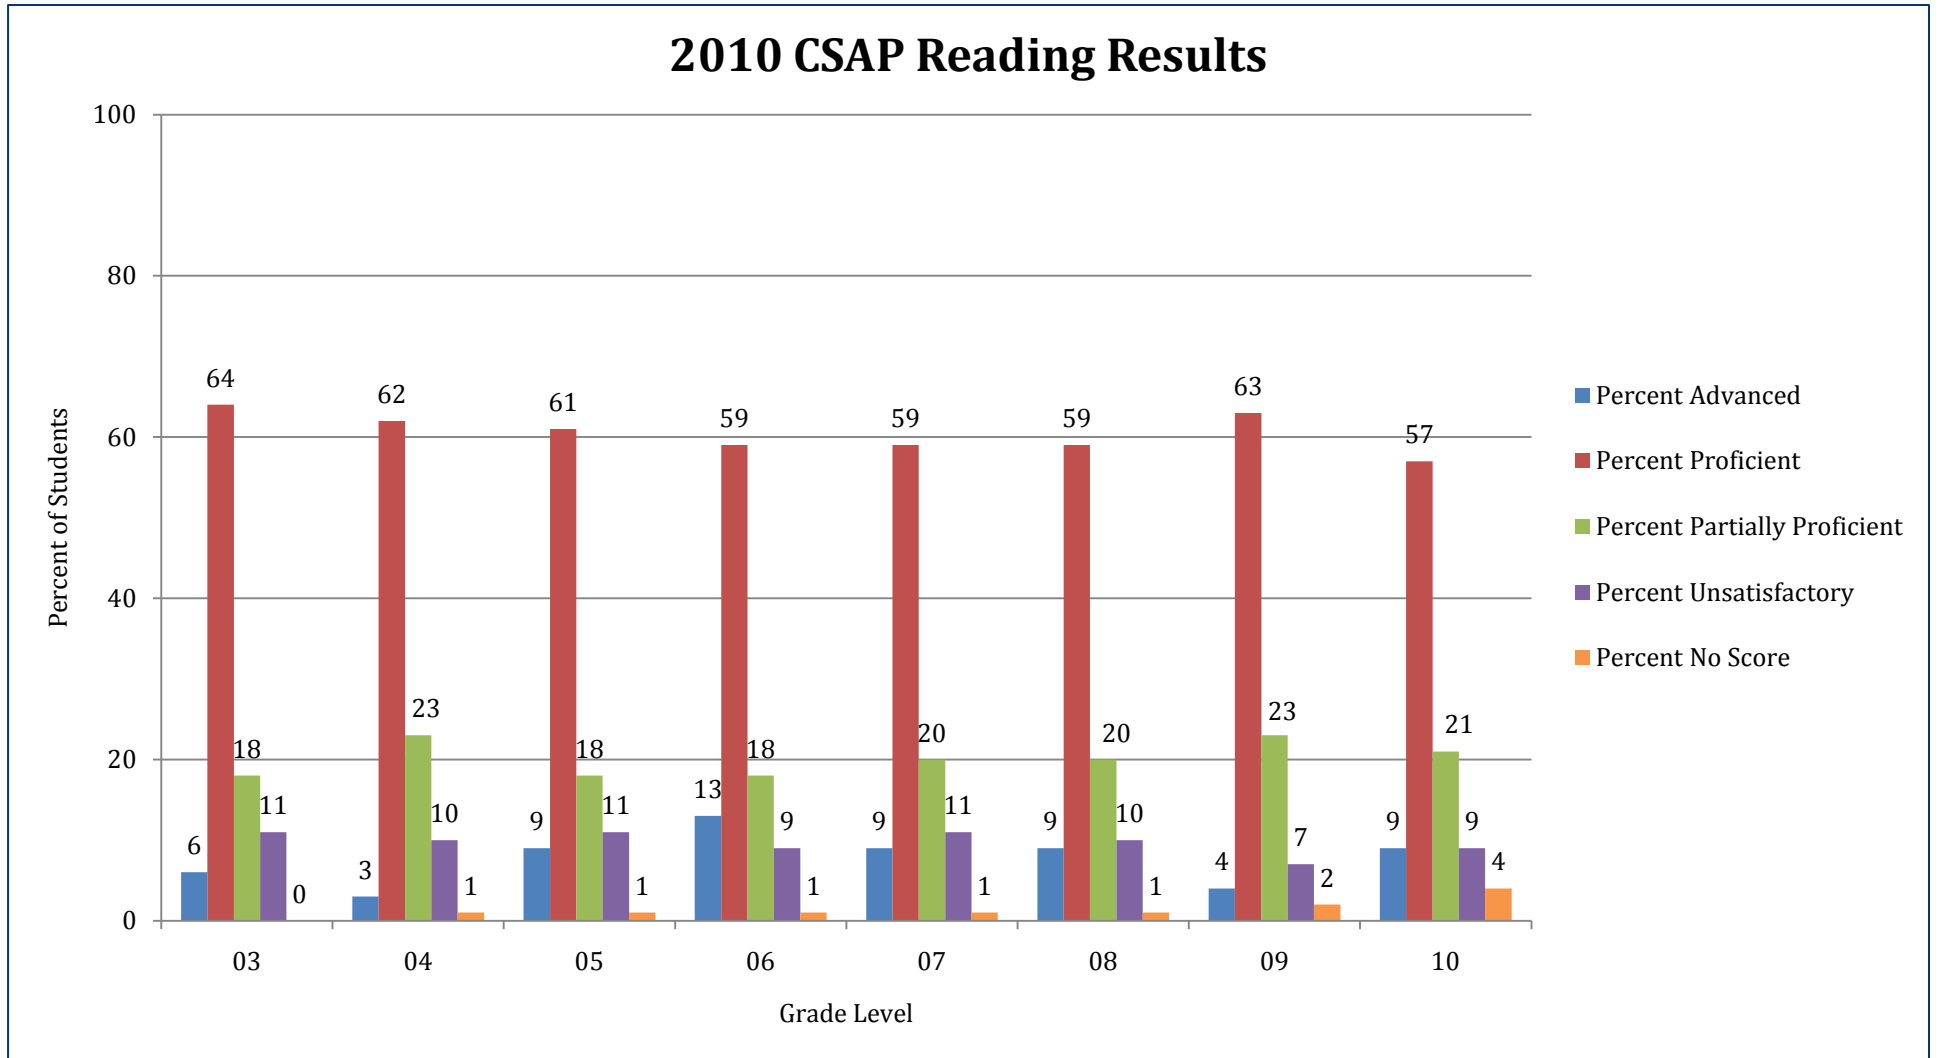

### CSAP Data

Every year the state of Colorado administers the Colorado Student Assessment Program (CSAP) to measure the progress students are making in achieving proficiency in Colorado's Content Standards. The CSAP assesses third through tenth grade students in reading, writing and mathematics. Additionally, science content standards are measured in 5th, 8th and 10th grades. The complete reports of CSAP results can be found at: [http://www.cde.state.co.us/cdeassess/documents/csap/csap\\_summary.html](http://www.cde.state.co.us/cdeassess/documents/csap/csap_summary.html)

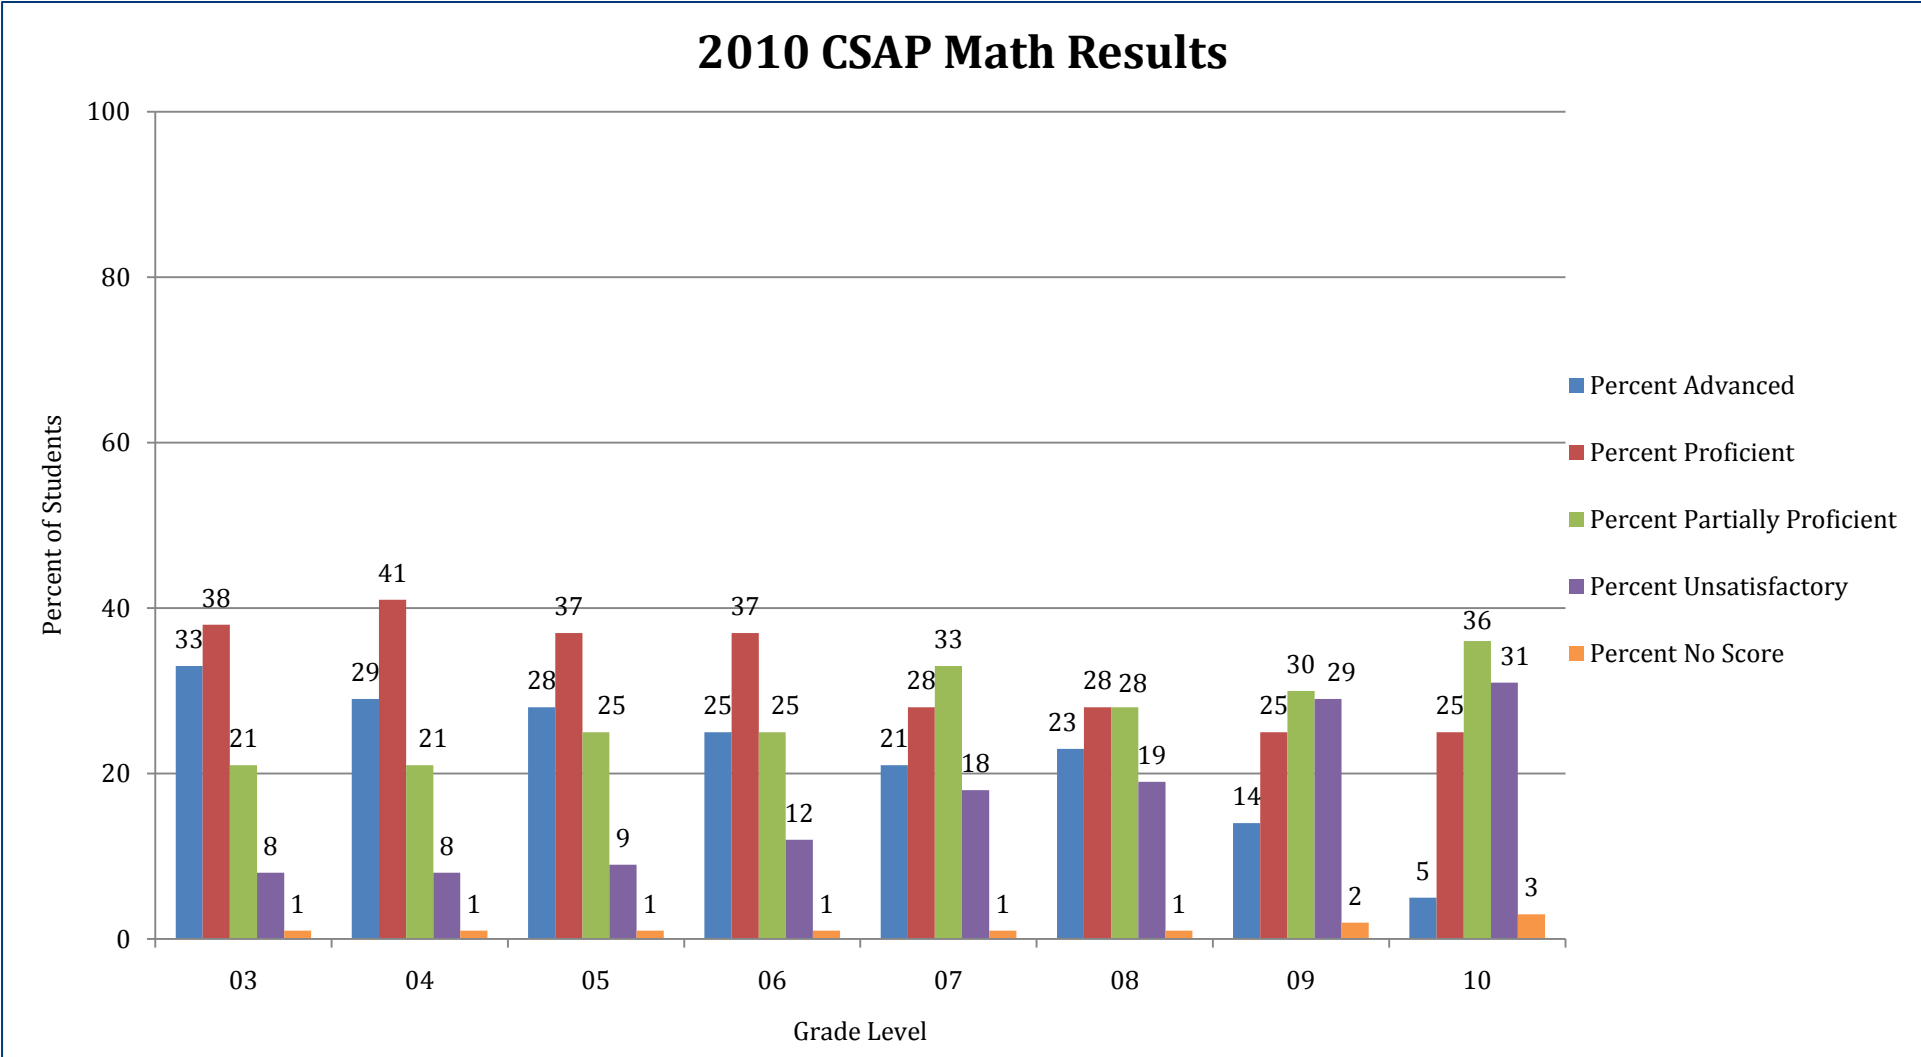

Students with significant cognitive disabilities (about 1% of the student population) may be eligible to take the CSAP Alternate (CSAPA), which assesses students on modified state content standards. CSAPA results are included in the reports that follow. CSAPA data can also be found at: [http://www.cde.state.co.us/cdeassess/documents/csapa/csapa\\_summary.html](http://www.cde.state.co.us/cdeassess/documents/csapa/csapa_summary.html)

The following pages provide an overview of Colorado students' performance on the 2010 CSAP. The graphs on pages 5 and 6 below represent the percentage of students scoring advanced, proficient, partially proficient, unsatisfactory, and no score on the Reading and Math CSAP, while those on page 7 show results for Lectura (a Spanish-language reading test given to qualifying students in 3rd and 4th grades). Graphs on pages 8 and 9 show the percentages of students scoring novice, developing, emerging, exploring, inconclusive, and no score on CSAPA. Tests may receive a "No Score" if a student does not take, or does not complete, the test. Pages 10-38 provide trend tables comparing the performance of disaggregated groups of students from 2009 to 2010.

## NAEP Data

The National Assessment of Educational Progress (NAEP) is the only nationally representative and continuing assessment of what America's students know and can do in different subject areas. NAEP selects a sample of Colorado schools to participate each year. Colorado and its schools selected for NAEP must participate in 4th and 8th grade assessments in reading and mathematics to receive state and district Title I funding. In 2009, approximately 2,920 Colorado students in 154 public schools participated in grade four and approximately 2,755 Colorado students in 121 public schools participated in grade eight. Students across the nation participated in the same assessment for each grade and subject.

The two major goals of the NAEP are to measure student achievement and to report change in performance over time. NAEP provides results for the nation as a whole and for the states separately. Performance is reported by groups of students (e.g., gender, racial and ethnic groups) and by participation in special programs (e.g., free and reduced lunch, limited English proficiency). The results are reported in average scale scores in which the range is zero to 500. The results are also reported in achievement levels defined by the National Assessment Governing Board.

Each of these assessments/studies is based on a representative sample of the student population of the state and the nation and none are designed to produce individual district, school or student data. While participation is required to receive Title I funding, no sanctions or awards are given for performance on the NAEP. However, Colorado's NAEP results are required to be used as confirmatory evidence for any trends identified in CSAP results.

In 2009-10, Colorado students performed higher than the national average in grades four and eight in reading. Seventy-two percent of fourth-grade students and 78 percent of eighth-grade students performed at or above the NAEP Basic level for reading. Nationally, only 66 percent of fourth-grade students and 74 percent of eighth-grade students performed at or above the NAEP Basic level. Basic is defined by the National Assessment Governing Board as demonstrating "prerequisite knowledge and skills that are fundamental for proficient work" at each grade assessed.

Colorado fourth-grade students received an average scale score of 226, and the average scale score for Colorado eighth-grade students was 266.

More information on the Colorado NAEP is available on the CDE website at [http://www.cde.state.co.us/cdeassess/documents/NAEP/index\\_naep.html](http://www.cde.state.co.us/cdeassess/documents/NAEP/index_naep.html).

## Section 2: Accountability Data – State-Level

### About Adequate Yearly Progress

One of NCLB's major goals is for all students to be proficient in reading and math by 2014. Adequate Yearly Progress (AYP) is the federal accountability measure for schools, districts and the state to measure progress towards reaching this goal. CDE sets the guidelines and targets for determining AYP. NCLB requires CDE to determine if school districts make AYP every year. Districts, in turn, are required to make AYP determinations for their schools. The state as a whole must also calculate AYP.

CDE uses the Colorado Student Assessment Program (CSAP), Lectura (a Spanish-language reading test given to qualifying students in third and fourth grades), CSAPA (for students with significant cognitive disabilities) and high school graduation rates to provide districts with AYP calculations for all schools. More specifically, AYP is met by:

1. Making the 95 percent participation requirement (95 percent of students enrolled in the school must take a state assessment in both reading and math).
2. Making the math and reading performance targets, or decreasing the number of students scoring unsatisfactory by 10 percent from the prior year (also known as "Safe Harbor").
  - Colorado includes an additional way for schools and districts to make AYP using longitudinal data, called "Matched Safe Harbor." In order to make AYP with Matched Safe Harbor, schools need to show a 10 percent reduction in the number of students scoring unsatisfactory when looking at students who tested two years in a row. Matched Safe Harbor is allowed only if 95 percent of the students also tested at that school/district the prior year.
3. Making the "Other Indicator" requirement. For elementary and middle school levels, this was 1.21 percent of students scoring advanced in reading and math. For high schools, this was a graduation rate of 63 percent or two percentage points above the previous year.

Districts and schools make AYP only when students as a whole and all disaggregated groups of students (by race, income level, English language learners and students with disabilities) meet the targets. Performance targets are the same for all disaggregated groups (there must be 30 or more students in the group before it is accountable). The state also must report scores for male, female, and migrant students. Schools and school districts must reach performance targets in both reading and math to make AYP overall. If a school district or school does not reach all targets in both content areas, it has not made AYP.

## Colorado State AYP Results

AYP performance targets measure the year-to-year changes in the percent of students scoring partially proficient and above on the CSAP and Lectura (or emerging and above on the CSAPA) against an annual target. These targets increase until 2014 when they reach 100 percent. In Colorado, targets are increased every three years. Targets during the 2009-2010 school year were the same as during the 2008-2009 school year.

Colorado did not make AYP as a state in 2010. The state was responsible for 153 targets and made 112 of those targets. Colorado used the safe harbor provision (a 10% reduction in the number of non-proficient students from the previous year) to make an additional 7 targets. Overall, Colorado made 78 percent of its targets for 2010, down from 80 percent in 2009.

### Colorado AYP Targets

Year	Elementary School		Middle School		High School	
	Reading	Math	Reading	Math	Reading	Math
2002 - 2004	76.92	75.86	73.61	59.51	79.65	47.00
2005 - 2007	82.69	81.90	80.21	69.63	84.74	60.25
2008 - 2010	88.46	89.09	86.81	79.75	89.83	73.50
2011 - 2013	94.23	94.54	93.41	89.88	94.92	86.75
2014	100	100	100	100	100	100

### 2010 State AYP Results

	Total # of targets	# of targets met	# met through safe harbor	Total # met	Percent of targets met
2008-2009	153	112	10	122	80%
2009-2010	153	112	7	119	78%

The tables below show the specific targets the state was accountable for and the performance on each. The graphs on pages 46-51 provide a snapshot of Colorado's AYP performance over the past five years broken down by demographic group. The blue line represents the 2005-2007 target while the orange line represents the 2008-2010 target.

## Class of 2009 Graduation Data

The graduation rate for the Class of 2009 was 74.6 percent. This is a 0.7 percentage point increase from the Class of 2008 rate of 73.9 percent and a 0.4 percentage point decrease compared to the Class of 2007 graduation rate of 75 percent. The figure below provides an overview of graduation rate trends from 2007 to 2009, broken down by disaggregated group.

	Class of 2007	Class of 2008	Class of 2009
<b>State Total (all students)</b>	75.0%	73.9%	74.6%
<b>American Indian</b>	58.9%	57.5%	55.9%
<b>Asian</b>	83.5%	82.8%	85.7%
<b>Black</b>	65.4%	64.1%	64.3%
<b>Hispanic</b>	57.1%	55.6%	57.8%
<b>White</b>	82.0%	81.6%	82.3%
<b>Male</b>	71.5%	70.7%	71.4%
<b>Female</b>	78.6%	77.4%	78.0%
<b>Students with Disabilities</b>	63.7%	63.0%	64.3%
<b>Limited English Proficient</b>	55.4%	52.0%	53.3%
<b>Economically Disadvantaged</b>	63.2%	59.3%	61.2%
<b>Migrant</b>	61.1%	58.0%	58.3%

## Graduation Rate Q and A

**What is the graduation rate?** The graduation rate is a cumulative or longitudinal rate which calculates the number of students who actually graduate as a percent of those who were in membership over a four-year period (i.e., from Grades 9-12) and could have graduated with the current graduating class.

A graduation rate is reported for each graduating class. The rate is calculated by dividing the number of graduates by the membership base. The membership base is derived from the number students entering ninth grade four years earlier and adjusted for students who have transferred into or out of the district during the years covering grades 9 through 12.

### The Graduation Rate Calculation

Number of students receiving a regular diploma during the  
2008-2009 school year

---

Number of students finishing 8<sup>th</sup> grade in 2004-2005 +  
Number of transfers in – Number of verified transfers out

**What is meant by the "Class of 2009"?** The Class of 2009 includes students who graduated during the 2008-09 academic year. While most of these graduates are those students who began 9<sup>th</sup> grade four years earlier, the graduating class may include students who completed high school in three years, four years, or longer.

**Do all Colorado school districts have the same requirements for graduation?** No. Each local school board defines graduation requirements for its district. These vary from district to district. The state considers a graduate to be any student who has met the graduation requirements of his or her local school district.

**Are there students who complete 12 years of school and do not graduate?** Yes. Some districts award certificates or other designations of high school completion or attendance to students who do not meet the standard high school graduation requirements. Also, some students who do not meet the traditional high school graduation requirements do successfully achieve a general educational development certificate (GED).

**Under what circumstances is a student reported as a transfer?** A transfer, for the purposes of the graduation and completer rate, is a student who can be verified to be attending another school that awards diplomas or a home-based education program. Adequate documentation of transfer is defined as an official request for academic records from the student's new school or, for home school, a signed form from a parent or legal guardian. Students who enroll in a GED preparation program are not reported as transfers.

Additional graduation rate and completer rate data and information can be found at:

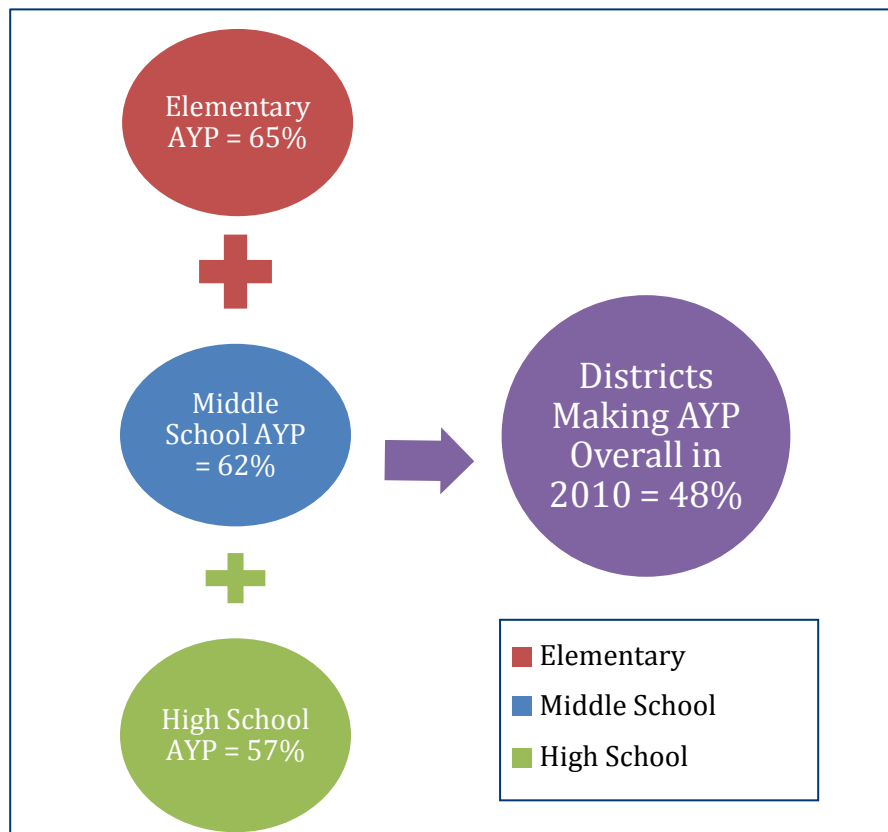

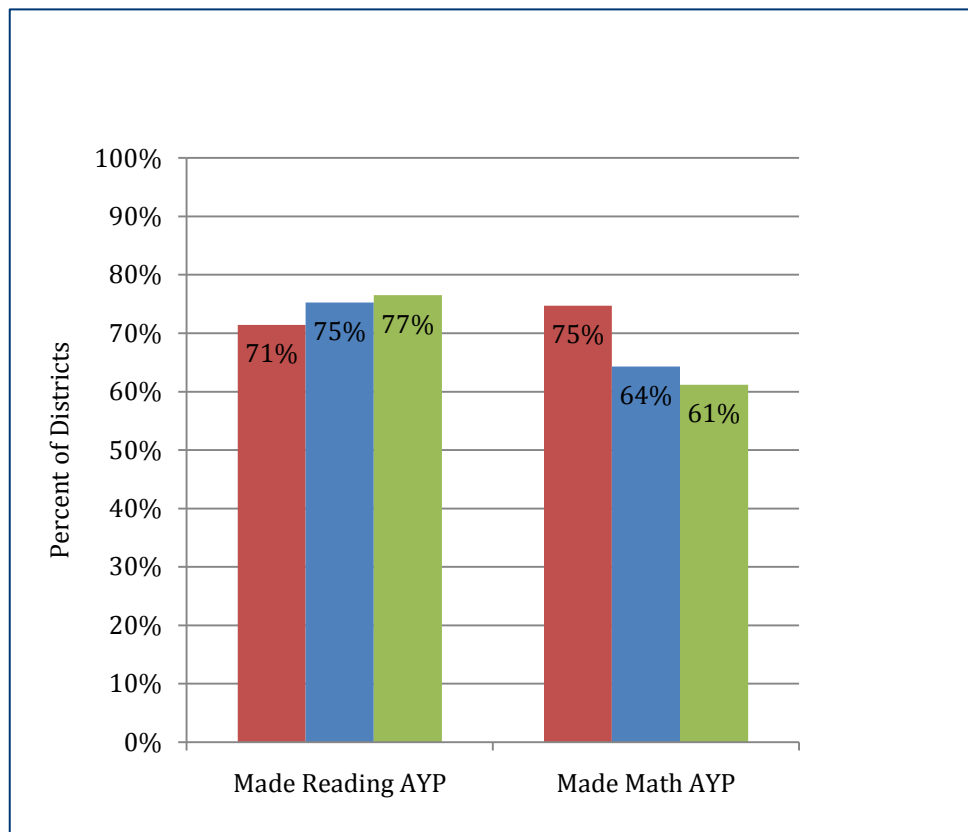

<http://www.cde.state.co.us/cdereval/rv2009GradLinks.htm>.

## Section 3: District Accountability Data

### District AYP Results

In 2010, 48 percent of districts in Colorado made AYP (up from 46% in 2009). Seventy-eight percent of districts made at least 90 percent of their targets (the same as in 2009). As illustrated below, 65 percent of districts made AYP at the elementary level, 62 percent at the middle school level, and 57 percent of districts made AYP at the high school level.

### District AYP Results by Grade Span and Content

## NCLB Program Improvement

Consequences are attached to AYP determinations only if a district receives Title I funds. Title I Districts are identified for Program Improvement if they do not make AYP for two consecutive years at the same grade span (elementary, middle, or high), and in the same content area (reading or math).

The table below provides an overview of the various levels of Program Improvement along with the requirements associated with each. The State is responsible for providing technical assistance to districts identified for Improvement and for taking corrective action for those identified for Corrective Action.

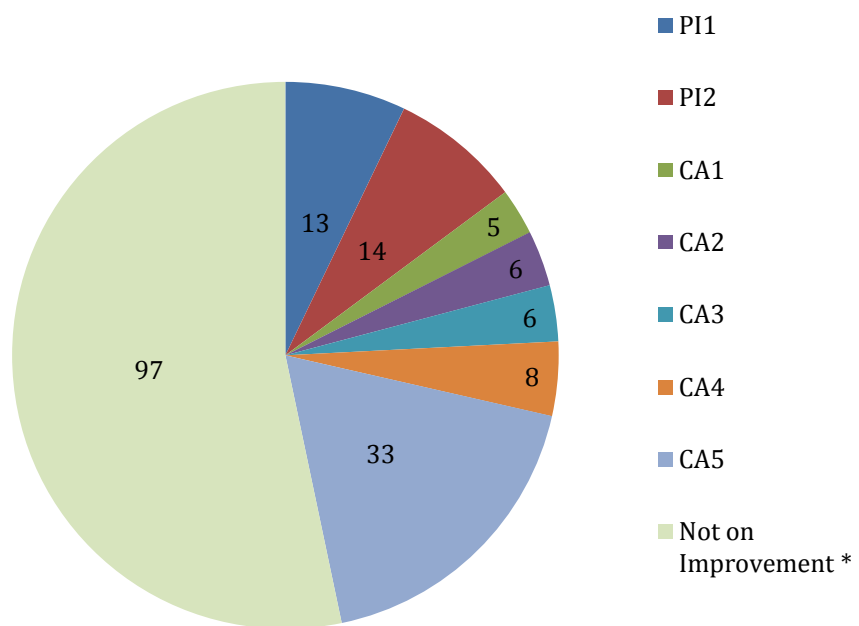

### Levels of Improvement

Years Missing AYP Targets*	District Status	Intervention
0	N/A	N/A
1	Potential**	N/A
2	Program Improvement Year 1 (PI1)	Develop and implement Program Improvement (PI) Plan. 10% of Title I funds must go to Professional Development.
3	Program Improvement Year 2 (PI2)	Continue to implement PI plan - amend or update as needed. 10% of Title I funds must continue to go to PD.
4	Corrective Action Year 1 (CA1)	Develop and implement Corrective Action (CA) plan. 10% of Title I funds may be set aside to support plan.
5	Corrective Action Year 2 (CA2)	Continue to implement CA plan - amend or update as needed. 10% of Title I funds may be set aside to support plan.
6	Corrective Action Year 3 (CA3)	Continue to implement CA plan - amend or update as needed. 10% of Title I funds may be set aside to support plan.
7	Corrective Action Year 4 (CA4)	Continue to implement CA plan - amend or update as needed. 10% of Title I funds may be set aside to support plan.
8	Corrective Action Year 5 (CA5)	Continue to implement CA plan - amend or update as needed. 10% of Title I funds may be set aside to support plan.

\* In the same content area in the same grade span  
 \*\* If the district misses AYP in the same content area in the same grade span next year, they will go on program improvement

The figures below show the districts on Improvement by level and content area. Currently, 85 Colorado school districts are on Program Improvement or Corrective Action. Of those, 27 are on Program Improvement (13 in Year 1, 14 in Year 2) and 58 are on Corrective Action (5 in Year 1, 6 in Year 2, 6 in Year 3, 8 in Year 4, and 33 in Year 5). Of these 85 districts, 34 percent are on Improvement for both reading and math, 10 percent of districts are on Improvement for math only, and 2 percent for reading only. A complete list of the Improvement status and AYP results for all Colorado districts is provided on the following pages.

### Number of Districts on Improvement by Level

\* 1 district is not identified because it declines funds

### Districts on Improvement by Content Area

\* 1 district is not identified because it declines funds

\*\* 1 district is identified for missing graduation rate target only

## Section 4: School Accountability Data

### School AYP Results

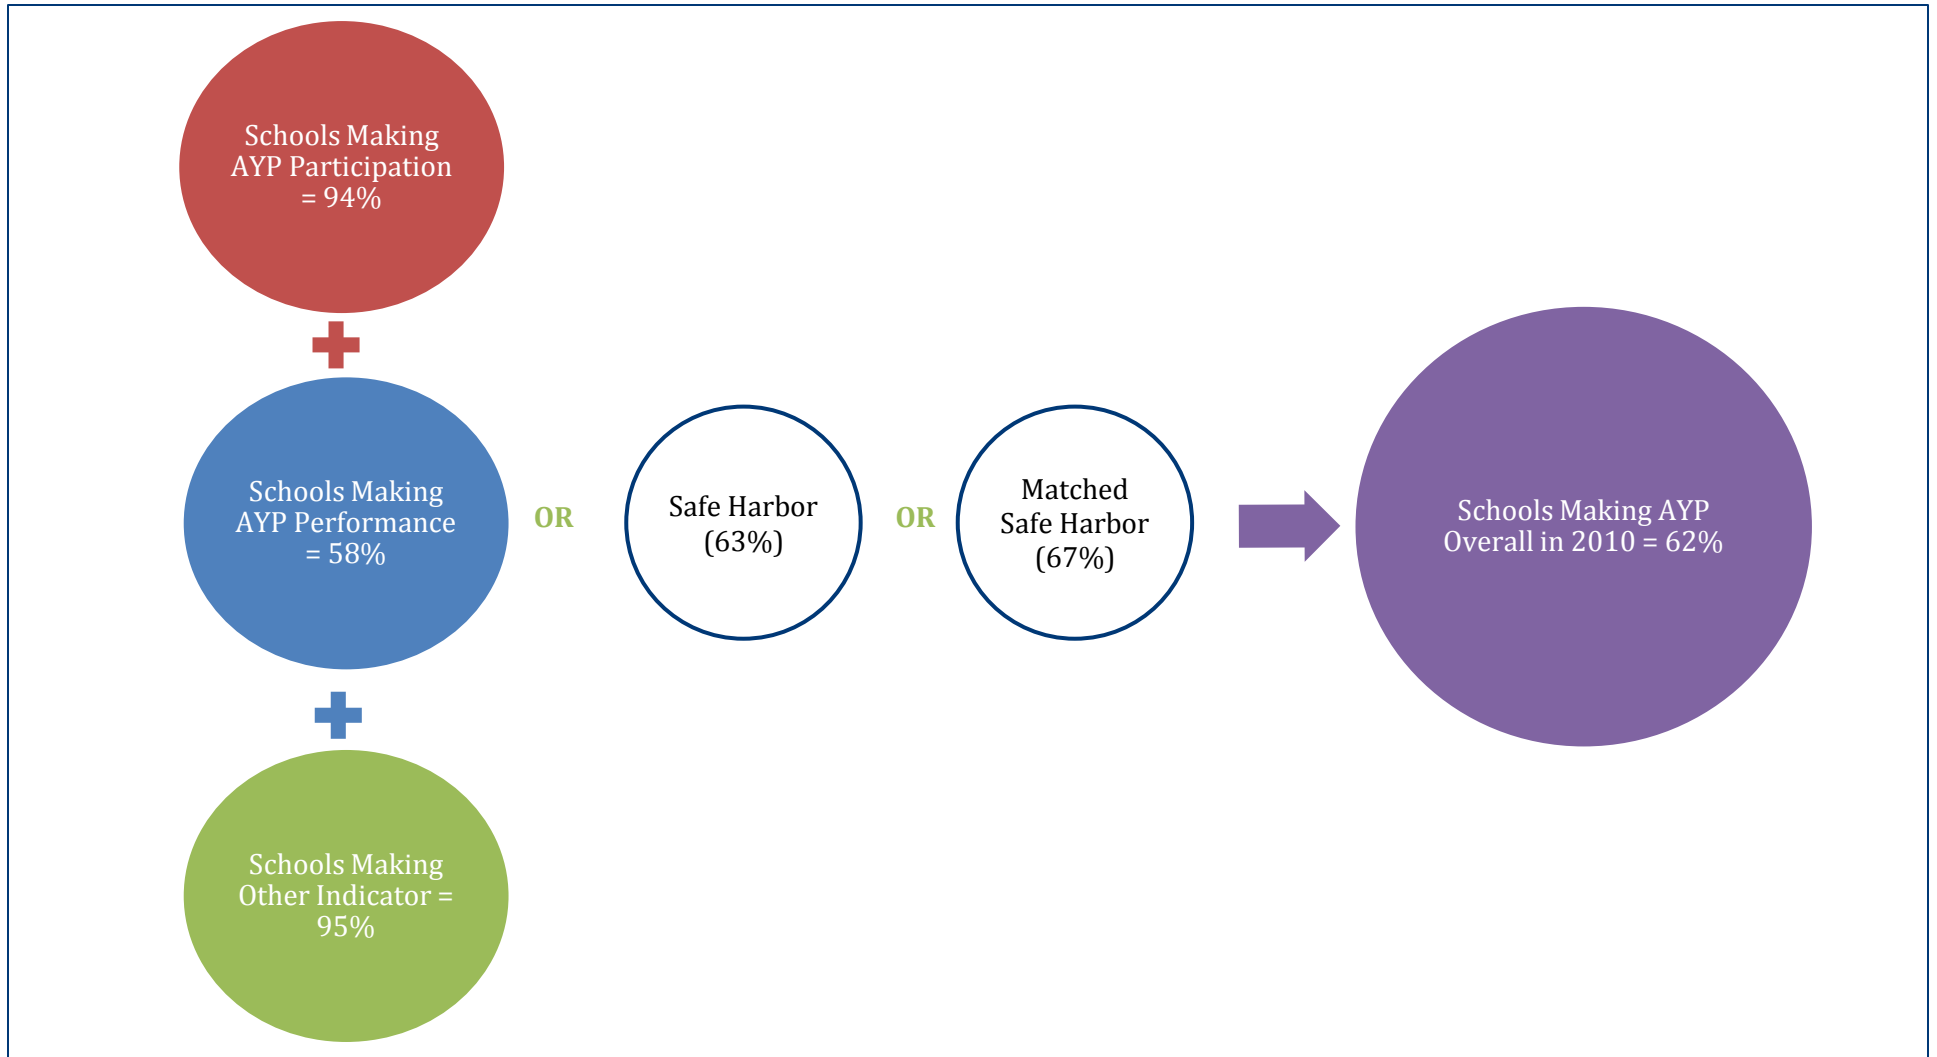

Sixty-two percent of schools in Colorado made AYP overall in 2010, up from sixty percent in 2009. Seventy-five percent of schools made AYP targets in reading while only 70 percent made AYP in math. The graph below shows the percent of schools that made all components of AYP. Most schools made participation and other indicator targets. The reading and math performance targets are the most challenging aspect to making AYP overall. The figure on the next page displays the various components that go into making AYP overall.

### 2010 Colorado School AYP Results

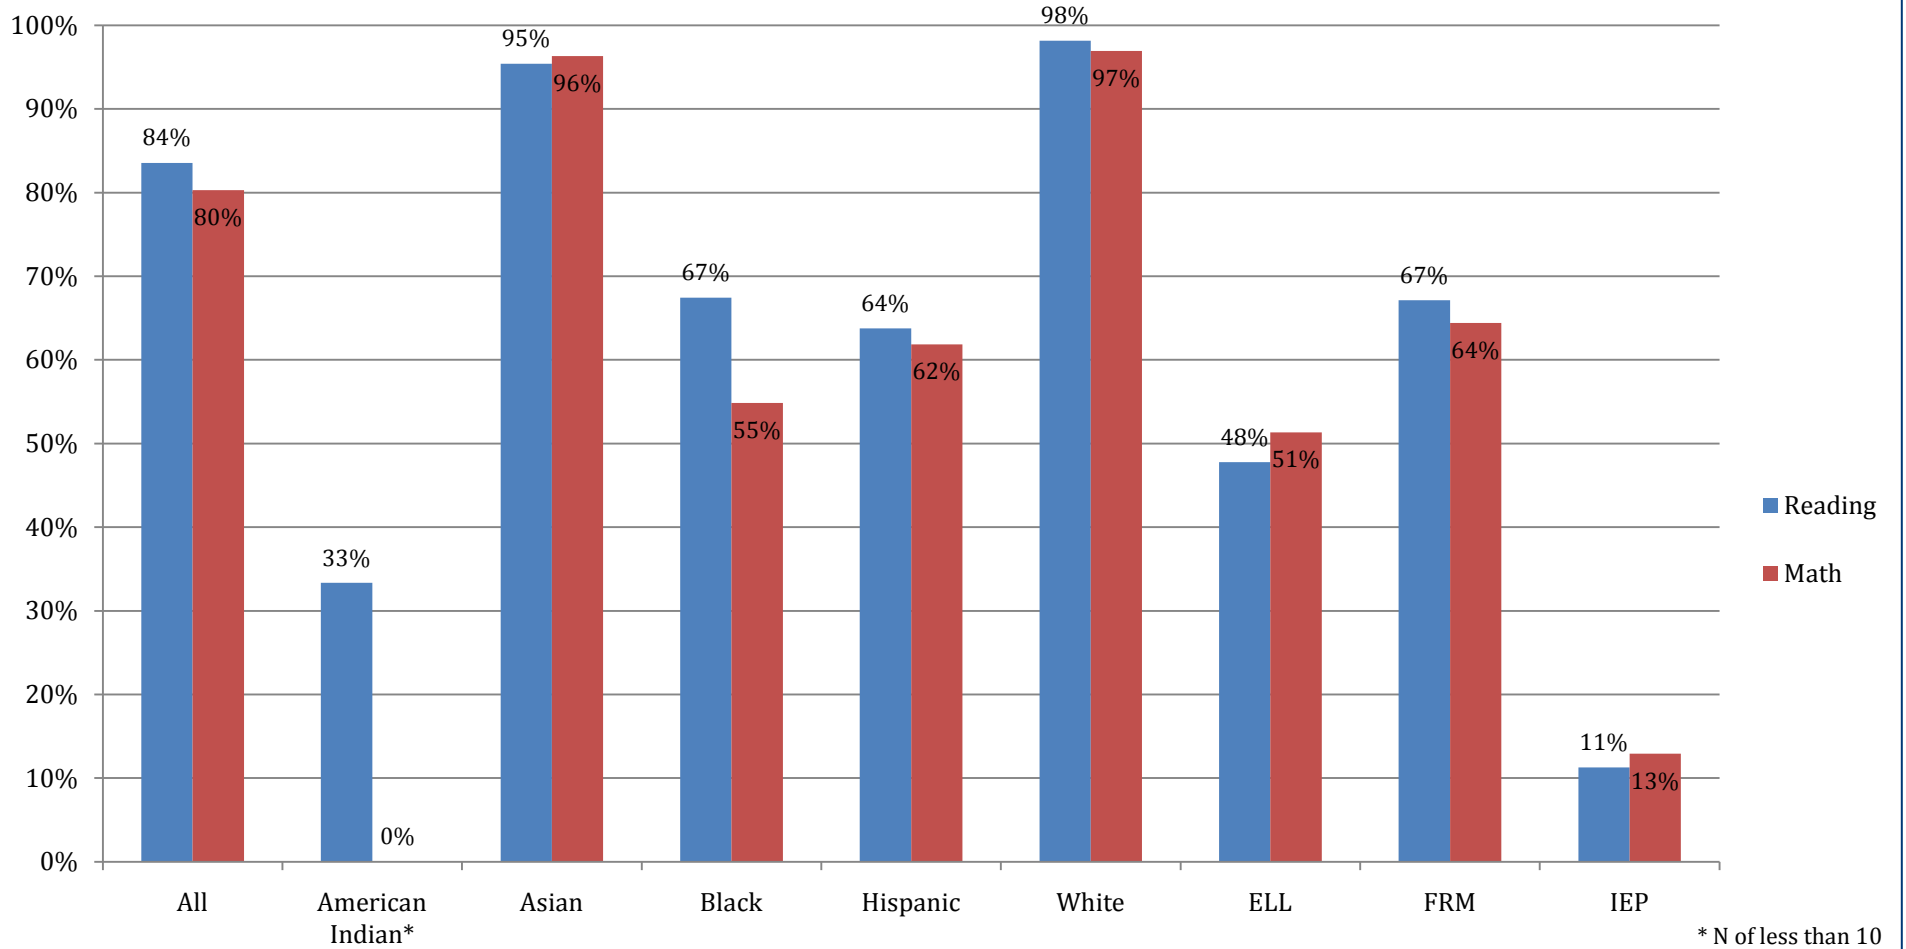

## Components of AYP

## Percent of Schools Making Performance Targets by Demographic Group

## Percent of Schools Making AYP by Grade Level

## NCLB School Improvement

Consequences are attached to AYP determinations only for schools that receive Title I funds. A Title I school that does not make AYP for two consecutive years in the same content area (reading or math) is placed on first year School Improvement. For each subsequent year on Improvement, schools must meet a series of requirements that bring resources to the school or provide parents with more alternatives. The district bears the primary responsibility for ensuring that a school in improvement, corrective action or restructuring receives technical assistance as it develops or revises its school plan and throughout the plan's implementation. The table below outlines the levels of School Improvement along with the requirements associated with them.

### School Improvement Levels

School Status	Requirements
School Improvement Year 1 (SI1)	Schools must develop School Improvement plans, offer public school choice to their students, and provide transportation to those schools of choice.
School Improvement Year 2 (SI2)	Schools must provide supplemental educational tutoring services (SES) in addition to the requirements listed above.
Corrective Action (CA)	Schools must continue to meet requirements listed above. They also must revise their School Improvement plans. The district must take corrective steps.
Restructuring, Planning (RP)	Districts must develop plans to restructure the schools.
Restructuring, Implementation (RI1-RI5)	Schools must implement their restructuring plans.

In 2010, 201 schools have been identified for School Improvement. Of those, 83 schools are in Year 1 of School Improvement, 39 schools are in Year 2 of School Improvement, 19 schools are on Corrective Action, 13 schools are designated as Restructuring, Planning, and 47 schools are designated as Restructuring, Implementation. A list of all schools on Improvement is included on pages 70-74.

Five schools showed substantial academic progress in 2010 and have been removed from the list of Schools on Improvement. These five schools removed from the 2010 Improvement list are listed in the table below. An additional 54 schools on Improvement made AYP for the first year in 2010 (only 17 schools made similar strides last year). If these schools make AYP again next year, they will be removed from School Improvement.

### Colorado Schools Removed from Improvement in 2010 - 2011

District Name	School Name	District Name	School Name
Brighton	North Elementary School in	Garfield Re-2	Highland Elementary School in
Centennial School District	Centennial High School in	Mapleton	Adventure Elementary in

## Section 5: Highly Qualified Teacher Data

NCLB requires that all teachers of core academic subjects be Highly Qualified (HQ) in their assignment. The core academic subject areas are defined as English, reading or language arts; mathematics; science; foreign languages; social studies (civics, government, history, geography, economics); and the arts (visual arts, drama, music). In general, to be considered HQ, teachers must hold at least a bachelor's degree and have demonstrated subject knowledge. The table below provides an overview of the most current status of Highly Qualified teachers and classrooms in Colorado.

### Core Academic Classes Taught by Highly Qualified Teachers (HQT)

School Type	Total # of Classes	# of Classes HQT	% of Classes HQT	# of Classes Not HQT	% of Classes Not HQT
<b>All Schools in State</b>	257,785	255,281	99.0%	2,504	1.0%
<b>Elementary</b>					
High Poverty Schools	47,350	47,031	99.3		
Low Poverty Schools	44,014	43,817	99.6		
<b>All Elementary Schools</b>	159,142	157,938	99.2	1,204	0.8
<b>Secondary</b>					
High Poverty Schools	15,527	15,289	98.5		
Low Poverty Schools	37,013	36,735	99.2		
<b>All Secondary Schools</b>	98,643	97,343	98.7	1,300	1.3

More information about Colorado's definition of a Highly Qualified teacher is available on our website at [http://www.cde.state.co.us/FedPrograms/tii/a\\_hqt.asp](http://www.cde.state.co.us/FedPrograms/tii/a_hqt.asp). Districts' individual percentages of HQ teachers can be found on the District and School Performance Reports at <http://www.cde.state.co.us/FedPrograms/danda/hqtdata.asp>.

### Educational Level of Teachers in Colorado

To meet Highly Qualified requirements, all teachers must hold, at minimum, a bachelor's degree. The table below shows the highest level of education held by Colorado teachers.

### Professional Qualifications of Teachers in Colorado

	Bachelor's Degree	Masters Degree	Ph.D./Ed. D
<b># of Teachers</b>	24,066	26,079	415
<b>% of Teachers</b>	47.46%	51.42%	0.82%

### Certification of Teachers in Colorado

Teachers may either hold a professional or initial license to be HQ in Colorado.

### Certification of Teachers in Colorado

	Emergency License	Initial License	Professional License
<b># of Teachers</b>	30	6,072	42,580
<b>% of Teachers</b>	.06%	12.0%	84.2%
