Highly Qualified (HQ) Teacher Data	71

Introduction

The Colorado Department of Education (CDE) is pleased to present to its constituents the *No Child Left Behind 2011 Report Card*. This Report Card details the progress Colorado and its districts and schools are making in reaching the goals of the federal *No Child Left Behind Act (NCLB)*.

Public reporting is a key component of NCLB. Only when information and data become public do they become a catalyst for change. The intent of the NCLB Report Card is to inform parents, teachers, the general public, key policy-makers and other decision-makers about the status of education in Colorado in relation to NCLB goals.

Two of the major goals outlined in No Child Left Behind are:

- 100% of all students proficient in reading and math by 2013–2014
- 100% Highly Qualified Teachers by 2005–2006

Specifically, this report includes:

- Assessment Data—results of the reading and math state content assessments (CSAP, CSAPA and Spanish Lectura)
- Accountability Data—Colorado Adequate Yearly Progress (AYP) results
- Graduation Rate Data
- Federal accountability status of individual school districts
- Title I schools that are on Improvement
- Information about teacher qualifications and percentages of classes taught by highly qualified teachers

Parents, school/district staff and the general public also have easy access to assessment, Adequate Yearly Progress (AYP) and highly qualified (HQ) teacher data for individual schools and districts through SchoolView, on the CDE website at:

<http://www.schoolview.org/performance.asp>

Please explore this site and let us know what other data to include that you believe would be helpful.

Some highlights from this year’s report include:

- Almost 100 percent (99.54%) of core academic classes were taught by highly qualified teachers, including special education teachers.
- Eighty-nine (89) districts have been identified for Program Improvement or Corrective Action status.
- Sixteen (16) Title I schools made AYP for the second consecutive year and were removed from School Improvement, despite raised AYP targets.

If you have questions about an individual school or district, I encourage you to contact the applicable administrative office. Additionally, all Colorado districts create an Annual Report to the Public, which contains more information about how that specific district and its schools are succeeding.

The Colorado Department of Education thanks you for your interest in the education of our students. Working together, we can provide an educational environment where no child will be left behind.

Patrick Chapman, *Executive Director*
Unit of Federal Programs Administration
Colorado Department of Education

Assessment Data

Assessment Data

Every year, Colorado administers the Colorado Student Assessment Program (CSAP) to measure student progress toward proficiency on Colorado's Content Standards. CSAP assesses 3rd–10th grade students in reading, writing and mathematics. Additionally, science content standards are measured by CSAP in 5th, 8th and 10th grades. Lectura (reading) and Escritura (writing) are available to 3rd and 4th grade Spanish speaking students with limited English fluency. Complete CSAP/Lectura/Escritura results can be found at:

<http://www.cde.state.co.us/assessment/CoAssess-DataAndResults.asp>.

Students with significant cognitive disabilities (about 1% of the student population) may be eligible to take the CSAP Alternate (CSAPA), which assesses students on modified state content standards in reading, writing, mathematics (grades 3–10) and science (grades 5, 8 and 10). CSAPA data can be found at:

<http://www.cde.state.co.us/assessment/CoAltAssess-DataAndResults.asp>.

The following graphs represent the percentage of students scoring unsatisfactory, partially proficient, proficient, advanced, and no score on CSAP reading/Lectura and math, and inconclusive, exploring, emerging, developing, novice, and no score on CSAPA reading and math by specific grade and content area. Test booklets are marked “no score” if a student does not take the test or does not complete a minimum number of questions in all test sessions.

The data are disaggregated by race/ethnicity, English learners, students eligible for free or reduced cost lunch, students with disabilities, gender, and migrant status. Any disaggregated groups with fewer than 16 students are not included.

Accountability Data

Accountability Data

The No Child Left Behind Act requires that the Colorado Department of Education determine whether school districts make Adequate Yearly Progress (AYP) every year. Districts, in turn, are required to make AYP determinations for their schools. The state as a whole also must calculate AYP. AYP determinations are based on CSAP, Lectura, CSAPA, and graduation rate data. Scores from all those assessments are aggregated in AYP calculations.

To make AYP, the school/ district/state overall, as well as disaggregated groups of 30 students or more, must:

- 1.) Meet the 95% participation requirement (95% of enrolled students must be assessed with CSAP/Lectura or CSAPA).
- 2.) Meet the math and reading performance targets, or decrease the percent of students scoring non-proficient by 10 percent from the prior year. Targets are set statewide and vary by grade span (elementary, middle and high) and content area (reading and math). Additionally, targets increase every three years in order to meet the goal of 100 percent of students proficient in 2013-2014. Targets increased in 2010–2011 by 5–13 percentage points.
<http://www.cde.state.co.us/FedPrograms/dper/aypprof.asp>
- 3.) Fulfill the “other indicator” requirement, which in 2011 was 1.33 percent of students scoring advanced on reading and math at the elementary and middle school levels. To satisfy the high school graduation rate requirement, the school/district/state must have met the 2010 4-year on-time graduation rate target (63%), or the 5-year (65%) or 6-year (67%) rate targets or demonstrated an increase of two percentage points from the previous year.

These targets also apply to disaggregated groups with 30 students or more. Disaggregated groups include: White, Hispanic, Black, Asian/Pacific Islander, American Indian/Alaskan Native, English learners, economically disadvantaged students, and students with disabilities. The state also must report data separately for males, females, and migrant students.

The following tables and graphs reflect Colorado’s state-level AYP data. School and district AYP results can be found at:

<http://www.cde.state.co.us/FedPrograms/dper/ayp.asp>

and through the SchoolView Data Center at:

<https://edx.cde.state.co.us/SchoolView/DataCenter/reports.jsp>

Colorado did not make state AYP 2011. Colorado made 102 of 153 targets, indicated by 101 blue cells and one gray cell, which denotes use of the safe harbor provision (10% reduction in percent of students scoring non-proficient from the previous year). Colorado did not make 51 targets (white cells). In 2010–2011 Colorado met 67 percent of its targets, less than the 78 percent met in 2010. Target increases between 2010 and 2011 resulted in the drop.

The tables on pages 41–43 show the specific targets for which Colorado was accountable and the performance on each. Male, female, and migrant student disaggregation is included on these tables for reporting purposes only.

The graphs on pages 44–49 show AYP performance trends for each grade span, for reading and math, overall as well as by disaggregated group. The black line represents 2011–2014 AYP performance targets; red indicates 2008–2010 targets; blue denotes 2005–2007 targets; and orange shows where AYP targets first began. Any disaggregated group whose performance fell below the black line did not make the 2011 AYP target, with the exception of middle school Hispanic students, who fulfilled the safe harbor provision for math. Current data (2011) compared to data across the years, beginning in 2002, show trends in performance as well as how targets have increased over time:

Year	ELEMENTARY		MIDDLE		HIGH	
	Reading	Math	Reading	Math	Reading	Math
2002–2004	76.92	75.86	73.61	59.51	79.65	47.00

High Math Performance—AYP Trend Data 2002–2011

District Results

How can districts have different numbers of targets?

Districts are required to make Adequate Yearly Progress (AYP) in reading and math, as is the state and schools. Forty-five (25% of the 182 districts in the state) made all their AYP 2011 targets. Ninety-seven (53%) districts made 90 percent or more of their AYP targets. In 2010, 88 districts (48%) made AYP. Again, this decrease from 2010 to 2011 is due to the fact that the targets needed to make AYP increased in 2011.

The number of targets for which a district is accountable is based on their number of disaggregated groups, which is determined by the number of students in those disaggregated groups. When there are fewer than 30 students in a disaggregated group, the district is not held accountable for that target. Thus, smaller rural districts tend to have fewer targets than large, urban districts.

The following table shows all Colorado districts and whether or not they made AYP, the number of targets they met, the number of targets they were required to meet, the percent of targets met, and the district's Program Improvement Status. Districts are placed on Improvement if they do not make AYP in the same content area, at the same level (elementary, middle, high), for two consecutive years. Most districts are on Improvement for both reading and math; a few districts have missed targets in only one content area.

To see detailed district reports showing exactly which targets districts missed, go to the CDE website at:

<http://www.cde.state.co.us/FedPrograms/dper/aypres.asp>

or to SchoolView at:

<https://edx.cde.state.co.us/SchoolView/DataCenter/reports.jspx>

School Results

Title I schools that do not make AYP targets in the same content area (reading, math) for two consecutive years are identified for Title I School Improvement. Schools can be placed on Improvement for reading, math, or both, depending upon their AYP performance, as well as for graduation rate at the high school level. Schools are removed from Improvement when they make AYP for two consecutive years in the content area(s) that placed them on Improvement. Sixteen Title I schools made AYP 2011 for a second year and no longer are on School Improvement for the 2011–12 academic year:

Antonito High, South Conejos
Avon Elementary, Eagle County
Clifton Elementary, Mesa County Valley
Columbine Elementary, Boulder
Columbine Elementary, St. Vrain
Columbine Elementary, Fort Morgan
Glenwood Springs Elementary, Roaring Fork
Harris Bilingual Elementary, Poudre
Horizon Middle, Falcon
KIPP Sunshine Peak Academy, Denver
Lumberg Elementary, Jefferson County
Ponderosa Elementary, Cherry Creek
Skyline Elementary, Canon City
Slater Elementary, Jefferson County
Spangler Elementary, St. Vrain
University Hill Elementary, Boulder

Among Title I schools, 66 were on School Improvement Year 1 in 2011–12 based on AYP 2011. They had to create School Improvement Plans and their districts had to offer transportation for Public School Choice. Another 64 schools were on School Improvement Year 2. In addition to the first year sanctions, they had to offer students Supplemental Educational Services (SES).

If, after two years of undergoing school improvement, implementing a school improvement plan, and receiving extensive technical assistance, a school still does not make AYP in the content area(s) for which it was on improvement, the district must identify the school for Corrective Action. Identification for Corrective Action signals the district's intention to take greater control of the school's management and to have a more direct hand in its decision-making. The district must continue to offer Public School Choice and Supplemental Educational Services to students of those schools. Colorado had 24 schools on Corrective Action in 2011–12 as a result of AYP 2011.

If AYP still is not made, a Restructuring-Planning year requires the district to prepare a restructuring plan to implement at least one of the following actions;

- 1) Replace all or most of the school staff, which may include the principal, who are relevant to the school's inability to make adequate progress;
- 2) Enter into a contract with an entity such as a private management company, with a demonstrated record of effectiveness, to operate the school as a public school;
- 3) Turn the operation of the school over to the State, if this action is permitted under state law and the State agrees;
- 4) Re-open the school as a public charter school; or
- 5) Implement any other major restructuring of the school's governance that is consistent with the principles of restructuring.

If, in the following year, improvement still is not made, the Restructuring plan must be implemented. Eighteen Colorado schools were in Restructuring-Planning, and 51 were in some stage of Restructuring-Implementation in 2011–12 as a result of AYP 2011.

Additionally, all schools on Improvement are eligible to receive a Title I School Improvement Grant, an opportunity for any school on NCLB Improvement to receive the following:

- 1) School Support Team (SST) review.
- 2) First-year grant (\$50,000) to fund analysis of the SST report and planning for school improvement.
- 3) Second-year grant (\$100,000) for implementing recommendations put forth in the SST report.

Thus, each school is eligible for as much as \$150,000 over a two-year period. This is not a competitive grant, but funds are limited and schools are served on a first-come basis. All schools that requested the grant process have received it. Schools involved with the grant are marked with an asterisk (*) on the following pages.

The following pages list the schools on Improvement. For more information about the improvement process, go to the CDE website at:

<http://www.cde.state.co.us/FedPrograms/ti/sitig.asp>

You can find detailed AYP results for schools on the CDE website at:

<http://www.cde.state.co.us/FedPrograms/dper/aypres.asp>

or to SchoolView at:

<http://www.schoolview.org/performance.asp>

Highly Qualified (HQ) Teacher Data

Highly Qualified (HQ) Teacher Data

NCLB required all teachers of core academic subjects to have been highly qualified (HQ) by the end of the 2005–06 school year. Core academic subject areas are defined as English, reading or language arts; mathematics; science; foreign languages; social studies (civics, government, history, geography, economics); and the arts (visual, drama, music).

In general, to be considered HQ, teachers must hold at least a bachelor's degree and have demonstrated subject knowledge. The following data show the most current status of HQ teachers and classrooms in Colorado. For more information about Colorado's definition of an HQ teacher, go to:

http://www.cde.state.co.us/FedPrograms/tii/a_hqt.asp

School Type	Total Number of Core Academic Classes	Number of Core Academic Classes Taught by HQ Teachers	Percentage of Core Academic Classes Taught by HQ Teachers	Percentage of Core Academic Classes Not Taught by HQ Teachers
All Schools in State	255,028	253,858	99.54%	0.46%
ELEMENTARY LEVEL				
High Poverty Schools	41,242	41,216	99.94%	0.06%
Low Poverty Schools	41,967	41,750	99.48%	0.52%
All Elementary Schools	156,943	156,327	99.61%	0.39%
SECONDARY LEVEL				
High Poverty Schools	19,955	19,859	99.52%	0.48%
Low Poverty Schools	37,349	37,156	99.48%	0.52%
All Secondary Schools	97,941	97,387	99.43%	0.57%

Districts' individual percentages of classes taught by Highly Qualified teachers can be found at:

<http://www.cde.state.co.us/FedPrograms/dper/hqtdata.asp>

as well as on SchoolView at:

<https://edx.cde.state.co.us/SchoolView/DataCenter/reports.jsp>

Educational Level of Teachers in Colorado

The requirement for being Highly Qualified includes holding, at minimum, a bachelor's degree. Of 50,224 Colorado public elementary and secondary school teachers in 2010-2011 (not only core academic class teachers), 46.43 percent held Bachelor's degrees, 52.63 percent had earned Master's degrees, and 0.68 percent had a Ph.D./Ed.D.

Certification of Teachers in Colorado

Colorado teachers may hold either a professional or provisional license to be Highly Qualified. Teachers with alternative licenses may be considered Highly Qualified for the two years during which they hold the license.

Certification	Number of Core Academic Public School Elementary and Secondary Teachers	Percentage of All Teachers
Initial License	7,650	15.23%
Professional License	38,399	76.46%
Alternative License	334	0.67%
