*COLORADO
DEPARTMENT OF
EDUCATION
ORGANIZATIONAL
COMMITMENT*

The Colorado Department of Education dedicates itself to increasing achievement levels for all students through comprehensive programs of education reform involving three interlocking elements:

1) ***High Standards*** for what students must know and be able to do;

2) ***Challenging Assessments*** that honestly measure whether or not students meet standards and tell citizens the truth about how well our schools serve children; and

3) ***Rigorous Accountability Measures*** that tie the *accreditation* of school districts to high student achievement.

Introduction and History of the Colorado Preschool and Kindergarten Program

The Colorado Preschool and Kindergarten Program (CPKP) began as the Colorado Preschool Project in 1988 when it was authorized by the Colorado General Assembly to serve 2,000 four and five year olds in need of language development. The General Assembly created this program in recognition of the need to adequately prepare children with specific at-risk factors to learn. The intent was that helping these children at an early age could result in lower dropout rates, less dependence on public assistance, and less involvement with criminal activities.

CPKP provides funding to establish quality early childhood education programs that serve children eligible to enroll in kindergarten in the following year. A vital component of CPKP is to strengthen families and support them as participants in their child's education.

In 1992 the General Assembly passed Senate Bill 92-189, which resulted in the continuation of the Colorado Preschool and Kindergarten Program as a permanent program. This bill also expanded the target population to not only include children in need of language development, but also children "who lack overall learning readiness due to significant family risk factors" and children being served by Social Services as neglected or dependent children.

The number of children and school districts participating in the Program has increased significantly since the Program began. Current statutes permit 14,360 children to be served by the Program in fiscal year 2006-07. Fifteen percent of the slots funded by CPKP (2,154) can be used to serve children in the second half of their kindergarten day. Because the kindergarten program is part of the Colorado Pre-

school and Kindergarten Program, the requirements established for CPKP also apply to the programs that serve full-day kindergarten children.

Participation in the program is voluntary. That is, school districts do not have to participate in the Program unless they choose to do so. In the program's first year of operation, 32 districts participated. In FY 2006-07, 170 out of the 178 school districts in Colorado will serve preschool age children through the Colorado Preschool and Kindergarten Program.

The number of children who can be served in the Colorado Preschool and Kindergarten Program both at a pre-K level and in kindergarten is capped at a level set by the State Legislature. When the Legislature funds new slots, school districts wanting to participate must submit an application to the Colorado Department of Education. Staff at the Department review each district's application and make a decision on whether districts qualify for CPKP, and the number of Program slots they will receive.

District advisory councils made up of representatives of key stakeholders and service providers manage local CPKP programs. The purpose of this handbook is to assist District advisory council members and others interested in the CPKP to be able to meet statutory guidelines and provide high quality services to young children and their families. It was developed with the input of many people working directly in the field of early childhood care and education. Of most importance was the assistance given by those currently working directly with the Colorado Preschool and Kindergarten Programs across the state.

It is very appropriate to make copies of this handbook for district advisory council members, school district administrators, providers, parents and anyone else interested in the guidelines for the Colorado Preschool and Kindergarten

Program.

On this page are listed the documents that guide the implementation of the Colorado Preschool and Kindergarten Program.

This handbook reflects what is required by CPKP statute, the CPKP rules and regulations and the Colorado Quality Standards for Early Childhood Care and Education Services.

The handbook also contains language meant to convey the intent, or spirit, of the law, as well as information from CPKP programs around the state on what it looks like in their community.

There is also a directory of the school districts participating in CPKP on the CDE website.

Feel free to use the directory to obtain information on what is happening in a specific program.

Readers should access these documents as needed to find the exact language regarding a particular topic.

The Colorado Preschool and Kindergarten Program Act

What is it? The Colorado Preschool and Kindergarten Program Act (22-28-101 through 22-28-110) is the bill which has been approved or "enacted" by both houses of the General Assembly and has become the law which guides the implementation of the Colorado Preschool and Kindergarten Program. The act is published annually in bound volumes, called the Session Laws of Colorado. Acts are also compiled, edited and published in Colorado Revised Statutes.

Where can I find it? The Colorado General Assembly Web Page under Colorado Revised Statutes.

(<http://198.187.128.12/colorado/lpext.dll?f=templates&fn=fs-main.htm&2.0>)

Colorado Preschool and Kindergarten Program Rules and Regulations

What is it? Under Colorado law, the State Board of Education has a duty to promulgate and adopt policies, rules, and regulations concerning educational programs maintained and operated by the Colorado Department of Education. The CPKP Rules and Regulations provide further policy guidance for CPKP.

Where can I find it? The Colorado Department of Education Website under Laws and Regulations. (<http://www.cde.state.co.us/cdeboard/bdcurrent.htm>)

How is it referenced? Citations from the State Board of Education CPKP Rules and Regulations will be referenced with C.C.R. (Code of Colorado Regulations).

Colorado's Quality Standards for Early Childhood Care and Education Services

What is it? The Quality Standards are program standards. In the CPKP Act, the Colorado Department of Education was charged with the responsibility to "establish basic program standards for district preschool programs using nationally accepted standards for preschool programs" 22-28-108 (1) (a) C.R.S. As a result the Quality Standards outlines the program standards for the Colorado Preschool and Kindergarten Program and are used by district advisory councils when monitoring CPKP sites for quality.

Where can I find it? This document is not available electronically. If you do not have a copy, feel free to contact Lori Goodwin Bowers. (303) 866-6783.

The Building Blocks for Reading and Writing and the Building Blocks for Mathematics

What is it? The Building Blocks provide early learning guidelines for young children. Each document begins with a list of the Colorado Content Standards for the K-12 system. Each of these Standards is then coupled with information reflecting the types of experiences and interactions preschool learners need to develop the foundation for attaining the standards.

Where can I find it: These documents are available in both English and Spanish on the CDE website. (<http://www.cde.state.co.us/earlychildhoodconnections/early.htm>)

School District Participation

School district participation in the Colorado Preschool and Kindergarten Program is voluntary. Districts wanting to participate must submit an application to the Colorado Department of Education. Applications are distributed to non-participating school districts when an expansion of the Colorado Preschool and Kindergarten Program is authorized by the legislature. When there is an expansion of CPKP, priority is given in the allocation process to those districts not currently participating in the program.

Criteria for Selecting School Districts for Participation in CPKP:

Need:

The Colorado Preschool and Kindergarten Program is intended to serve children who are at risk for educational failure. National research suggests that about one-quarter of the kindergarten children in the nation are at risk for learning delays. In some cases the percentage of at-risk children in a district could be higher because of certain district-specific factors. Therefore school districts are selected based on:

- dropout rates within the district
- numbers of qualifying, un-served children
- test scores of children in kindergarten and the primary grades within the district
- demographic data
- geographic location of the community

Ability to Collaborate:

It is also the intent of the Colorado General Assembly and the Colorado State Board of Education to fund those districts that demonstrate collaboration within the community in order to assure effective use of resources in the program. Priority is given in the selection process to those districts that can:

- create a full day, quality care and education program through existing resources
- coordinate district preschool programs with family support services
- develop a quality, comprehensive plan for involving families
- collaborate with public and private child care agencies located in the school district
- demonstrate a high degree of community involvement

Emphasis on Quality:

CPKP is based on a belief that quality early childhood programs and services offer children a greater chance of success in school. Programs must demonstrate the capacity to deliver quality services as measured by the Colorado Quality Standards for Early Childhood Care and Education Services.

The number of children who can be served in the Colorado Preschool and Kindergarten Program both at a Pre-K level and in full-day kindergarten is determined by the Colorado State Legislature.

In FY 2006-07, CPKP will be able to serve 14,360 children. This includes 2,154 slots for full-day kindergarten.

CPKP Slot Allocation

Our council has benefited from having parents that have remained council members after their children are out of preschool. At our last registration these parents helped by welcoming the new families, answering questions about the program and its quality, and playing with the children while their parents filled out paperwork.

Plateau Valley #50

Administration of the Colorado Preschool and Kindergarten Program

Each school district is required by statute to establish a “district advisory council.” This district advisory council insures that decisions about the program are made locally and that major stakeholders have opportunity for input

The local school board has final responsibility for the application to participate in CPKP, and for operation and maintenance of CPKP within the school district. No action taken by the council is final until approved by the school board.

The Superintendent of the district appoints members to the district advisory council according to statutory requirements. Members of the district advisory council are appointed for two-year terms and may be reappointed by the superintendent. Members of the school district will elect a chairperson. The chairperson will serve a one-year term and may be reelected for a second year.

The council should meet a minimum of six times per year. If a community already has some type of early childhood care and education council, there is no need to duplicate it. If the membership meets the requirements, the same group may serve as the CPKP district advisory council as well.

Required Membership of the District Advisory Council:

Appointed members of the district advisory council must include:

- two parents of preschool children in the district preschool program
- two members of the business community
- a representative from the health department
- a representative from the department of social services
- a representative from the county agency involved in job services and training
- a representative from publicly funded early childhood education agencies located in the school district
- a representative from a privately funded child care center located in the school district

These representatives are identified to insure that a comprehensive approach to early childhood care and education services is taken in the administration of the Colorado Preschool and Kindergarten Program in each community.

Responsibilities of the District Advisory Council:

Responsibilities of the district advisory council include:

- Studying and assessing the need for CPKP in the school district.
- Developing and recommending to the local school board eligibility factors specific to the community and a plan for identifying eligible children.
- Developing and distributing requests for proposals to local publicly funded early childhood education agencies and privately funded child care centers to determine who will provide program services, and recommending qualified providers to the local school board. This should be done at least every five years.
- Recommending to the local school board whether its program should be provided by the district or by publicly or privately funded providers, or some combination.
- Participating in the development of proposals to CDE requesting participation in CPKP.
- Providing information and data to CDE for reports on the program.
- Developing a comprehensive plan for the delivery of services. This comprehensive plan is outlined on page 9.

A few final thoughts: The rules and regulations give a framework for the district advisory council's responsibilities. As district advisory councils have developed, how they do what they are asked to do has often become a reflection of their community. Their job is to manage the Colorado Preschool and Kindergarten Program, and as they do this, management styles take on the unique character of the individuals and community involved.

The district advisory council takes on the design and implementation of the program. As is often the case, it is asked to put together a comprehensive, high quality program with limited resources. This means council members must have broad knowledge of the resources available in their community as well as the ability to creatively put the pieces together. While solid local partnerships have always been important, they are now critical to success. When you think of who your potential partners are, be creative and think more broadly than you ever have.

An important part of managing is solving problems. By design, problems that arise within CPKP are best addressed locally. Problems, concerns and questions should all be brought to the district advisory council. A great deal of CPKP policy is set by the district advisory council and can be changed by the council if the policy is no longer productive. Many programs have found that it is important to have a written policy document that reflects the decisions made by their councils. The role of the Colorado Department of Education is to be a resource to district advisory councils and local community members. CDE will provide assistance and support whenever possible.

“Since combining our district advisory council with our accountability committee, we have put all our early childhood programs on the map. Every time something comes up about the school, everyone makes sure the preschool and our other early child care programs get mentioned. This has had a great impact on all of our families and children.”

Byers School

District

Colorado Preschool and Kindergarten Program Coordinator Responsibilities

School districts will need to identify a coordinator to administer the Colorado Preschool and Kindergarten Program. Following are the duties and responsibilities of the CPKP coordinators.

Act as Liaison to Colorado Department of Education:

1. Submit annual Reapplication and Annual Report in the Spring
2. Attend CPKP Regional Meetings
3. Coordinate TA/Monitoring visits from CDE
4. Participate in CPKP listserv
5. Respond to requests for information from CDE

Act as Liaison to School District:

1. Report to school board and school administrators and other personnel
2. Coordinate an accurate reporting of October count
3. Coordinate an accurate reporting of Fund 19
4. Coordinate the development of transition plans to kindergarten or first grade

Facilitate the Enrollment Process:

1. Initiate process to inform families of the availability of the program
2. Coordinate enrollment process with Child Find
3. Organize and implement the CPKP enrollment process
4. Verify children's eligibility for the program
5. Maintain files that meet licensing and CPKP requirements

Facilitate the Work of the District Advisory Council:

1. Recruit members for the district advisory council
2. Establish regular meeting times and locations
3. Oversee process for monitoring quality in classrooms where CPKP children are served
4. Work with district advisory council to prepare and annually update the comprehensive plan
5. Facilitate an RFP process in community at least once every five years

Support the Classrooms where CPKP Children are Served:

1. Identify training needs of CPKP staff
2. Assist in addressing staff training needs
3. Ensure CPKP classrooms are licensed by the CDHS
4. Ensure that Individual Learning Plans are developed for each child

Ensure Family Involvement and Support:

1. Ensure families sign parent agreement
2. Identify family support services
3. Facilitate involvement and support activities

Study, Document and Report Program Effectiveness:

1. Assist in developing a system to measure children's progress in preschool
2. Track children's progress through elementary school
3. Administer parent satisfaction surveys

Comprehensive Plan

What happens in the classroom is only one component of what children, families and programs need to be successful. The Comprehensive Plan addresses five areas that are critical to an early childhood program in achieving immediate as well as long lasting success. These five areas include the quality of the program, staff development, family involvement, family support services, and program evaluation.

The district advisory council must address each of these areas and related questions in their comprehensive plan and it should be discussed and updated by the district advisory council each year. School districts are required to submit a current copy of the Comprehensive Plan with the reapplication and annual report.

Quality of Program:

In general, research shows that the key to an effective preschool program is high quality. The quality of early childhood education is critical in determining whether it helps a child develop a strong foundation for future learning and development. It is not appropriate to have or to contract with a program that does not demonstrate the capacity to deliver high quality, developmentally appropriate services.

In writing the CPKP Comprehensive Plan, district advisory councils should answer the following questions. Does each site in the program use the Colorado Department of Education Quality Standards for Early Childhood Care and Education to guide program evaluation and planning? In what ways do you monitor programs to be assured that they are of high quality? Are the programs accredited or working towards accreditation through the National Association for the Education of Young Children? Have programs received an Early Childhood Environmental Rating Scale (ECERS) rating?

The Colorado Quality Standards were developed as a working document, a framework, a tool to help programs implement their commitment to improving quality. While it was never meant to be used as a checklist to decide who can or cannot provide CPKP services, it does provide the language and concepts necessary to make such difficult decisions.

District advisory councils are required to make at least two on-site visits per year to all individual providers in their district that serve CPKP children. The purpose of these visits is to monitor overall program compliance, and make recommendations for any needed improvements. The council should then follow up with recommendations for improvements and report on their monitoring and evaluation to CDE in the year-end report.

Each year our community programs are evaluated via formal and informal parent surveys, visitation to sites by District advisory council members and assessments by the CPKP Coordinator.

Every three years, the district advisory council contracts with a validated evaluator to administer the Early Childhood Environmental Rating Scale (ECERS) in each preschool classroom. Upon completion of the comprehensive evaluation, each CPKP site submits a two-year school improvement plan based on the strengths and weaknesses identified in the ECERS evaluation. The plan, which is presented to the district advisory council for approval, must include specific strategies to address increasing quality.

A classroom that receives a cumulative score of less than or equal to 3 on the ECERS is required to take immediate action for improvement. A detailed plan for addressing how the program will increase the quality above the minimum requirement must be submitted and implementation of the plan must occur within six weeks.

The CPKP Coordinator monitors the evaluation process and activities and supports all sites in creating and implementing school improvement and/or remediation plans. Annual reports are submitted to the district advisory council regarding the evaluation process and the status of each preschool site.

Moffat County School District Re-1

Studies of individual families show that what the family does is more important to student success than family income or education. This is true whether the families is rich or poor, whether the parents finished high school or not, or whether the child is in preschool or in the upper grades. CPKP requires programs to have a written plan for parent involvement and parents are asked to enter into an agreement with the program that specifies what this involvement looks like. Programs that are able to engage parents in their child's education can strengthen parents' ability to support her children and reinforce the learning that occurs in the classroom. Early childhood programs can break down barriers with families, such as lack of trust in schools and fear of failure, to set a pattern of parent involvement that can be followed through a child's school career.

Comprehensive Plan (cont.)

Staff Development:

What are the training needs of the CPKP staff and how will they be addressed?

In developing this part of the plan, input from teachers concerning their educational needs should be considered, as well as the resources that are available within the community.

Family Involvement:

What are the roles and expectations of parents whose children are served in the CPKP? In order to participate in the program, families must assume responsibilities in the educational program of their child. How programs form agreements with families, based upon the needs and abilities of the family, should be outlined in the comprehensive plan.

Family Support Services:

What other support services are available to families that contribute to the health and well being of the children? These can include:

- special education services
- information on nutrition
- immunizations
- health care
- dental care
- social services
- mental health services
- recreation opportunities
- parenting education and support

Keep in mind that districts do not have to provide all these services, but instead should help families to access the services within the community. District advisory councils should consider how they might partner with other early childhood care and education programs to extend services beyond a half-day, nine-month program.

Comprehensive Plan (cont.)

Program Evaluation:

How well does the program prepare children for success in school, i.e. what gains do children who participate make in their cognitive, motor, behavioral, and social development that encourage success in school? How well does the program prepare families to participate in and support their children's educational experiences? Do the effects of participation in the program last?

District advisory councils can address these questions through:

- portfolio assessments of child progress
- parent satisfaction surveys
- tracking children's progress through elementary school
- reviewing elements of the comprehensive program
- monitoring programs with on-site visits, ECERS evaluations
- reviewing materials prepared for NAEYC accreditation

The district advisory council is required to document its monitoring and evaluation findings as part of its year-end report. For more information about measuring program effectiveness through "Results Matter" go to page 29.

Ideas for Evaluation...and Support

This year, the council has added a site visit "documentation panel" to provide a visual representation of a program's quality. The CPKP Coordinator visits the sites, documents the visit through pictures and words and then conferences with the staff of the preschool. We have found this process to be very effective in helping the staff become more reflective about how they teach and interact with children. This process has also allowed teachers to become mentors. They visit each other's schools and document their observations.

Boulder Valley School District

The "School Readiness Project" funds the *Qualistar Ratings* at the 7 participating CPKP sites in our community. Also the Readiness Grant funds a Learning coach who visits Centers each week and consults with the director and coaches the staff as they work to implement the Quality Improvement Plans.

Canon City RE-1 School District

"As part of the evaluation of the program we use a Child Satisfaction survey developed by our district advisory council. We were interested in finding out how the children feel about school, their teachers, and their friends, since it is our goal to provide a positive foundation for their education."

Widfield School

District #3

To find out the PPOR for a school district go to the

CDE website:

www.cde.state.co.us

- ◆ Click on School Finance
- ◆ Click on Public School Finance Funding and Payment Information
- ◆ Click on 2006-07 District Funding and Calculation Worksheet
- ◆ Row GT7 indicates the school district's PPOR

CPKP Funding and the October 1 Count

The state legislature authorizes the Colorado Preschool and Kindergarten Program as part of the School Finance Act. As a result CPKP funds are calculated and distributed according to the School Finance Formula. Funding is provided at .5 FTE for each child, which is the same level of funding provided for a kindergarten student within that district.

School districts report children funded through CPKP on the October 1 count date. **Children not present during the count period are not funded.**

Total funding to a district is calculated by multiplying the total CPKP FTE included in the count by the school district's per pupil operating revenue (PPOR). Per pupil funding to school districts varies across the state. The variances in funding are based on the school finance formula which recognizes (a) costs of living, (b) personnel costs and (c) size factors. CPKP funding is provided to school districts as part of the K-12 funding. The FTE for CPKP students is calculated into the total FTE and funding for the district.

Law prohibits children receiving state per pupil operating revenues through both the Colorado Preschool and Kindergarten Program and early childhood special education. As a result CPKP children and early childhood special education children are coded with a different funding code in the October count data collection. For more information on what those codes are see the Appendix.

Serving One Child with Two "Slots" to Fund a Full-day of Preschool

HB06-1375 allows school districts to apply to CDE for authorization to serve a single child in preschool using two "slots" to fund a full-day program. Statute specifies that only 5% of the children that CPKP is authorized to serve in preschool may be funded in this way.

If a school district determines that a child has a significant need for full-day services and there is no other funding available (Child Care Assistance Program, tuition, private grants or scholarships, etc.), that district may apply to CDE for the flexibility to serve a child/children in a full-day program. Each child that is approved to be served in a full-day preschool program will use 2 CPKP preschool "slots" out of the school district's total preschool allocation. Under no circumstances will a school district be allowed to exceed their preschool allocation, and CDE will not authorize more than 610 preschool children to be served using double slots.

Duplicate Counts

Duplicate counts were identified within the October count when CDE began assigning SASIDs (State Assigned Student ID Numbers) to students included in the October count.

A number of these duplications occurred in preschool and kindergarten, oftentimes for two reasons:

1. School districts using early childhood alternative count dates. Early childhood alternate count dates of November 1 are available to all school districts. If school districts are using an alternative count date they should not assume that if a child is enrolling in preschool or kindergarten that they have not already been enrolled in another school district.
2. Parents enrolling children concurrently in two different school districts. For example a child was attending a.m. kindergarten in one district and p.m. kindergarten in another district.

A district that counts a child on October 1 will have priority over a district that includes a child in a later alternative count.

If a district wishes to include in a November 1 alternative count a child who has moved from another school district in Colorado since October 1, that district must obtain a completed “Alternative Count Day” form. This form can be obtained at the following website: <https://ade.cde.state.co.us/alternativecountdateform.doc>. This form allows the first district to verify to the second district that the child has not already been included in an October count. This process should be followed not only for preschool and kindergarten children, but for children in all grades

To help reduce duplicate counts, districts may want to indicate in their PK and K enrollment information the following statement:

“If families enroll a child in preschool and/or kindergarten at the same time, in two different school districts, then those families may be responsible for paying tuition to one of those districts.”

November 1 as an Alternate Early Childhood Count

Districts may choose to determine the number of pupils enrolled in early childhood special education (ECSE) and the Colorado Preschool and Kindergarten Program (CPKP) on November 1 rather than on October 1.

- ◆ Use of the November 1 alternate count date is optional
- ◆ The November 1 alternate count date is only applicable to early childhood students.
- ◆ School districts must submit and approve their data by the November 10 deadline.
- ◆ No waivers can be made to the official count date.

When using this alternate count date please consider the following information:

1. When reporting a count, a district must use **either** their October 1 count data **or** their November 1 count data whichever is higher.
2. Even if they are planning to use the alternate November 1 count date, every school district should include their CPKP and early childhood special education count information in their October 1 collection.
3. The alternate count will be on Wednesday, November 1, 2006. Children can only be counted if they are enrolled and in attendance on or before November 1, 2006.
4. When using the alternate count date, districts must still document each child's attendance five school days prior to and five school days following the alternative count date.
5. In order to be eligible to be included in the alternative count, a child in CPKP or early childhood special education must have a schedule, as of the alternative count date of November 1, which provides at least 90 hours of teacher-pupil instruction and teacher-pupil contact in the semester of the alternative count date. (2254-R-5.10 and 5.11, Rules for the Administration of the Public School Finance Act of 1994). *Please note: This is a minimum number of hours of service to qualify a child for these funding sources. It is not intended to set a standard of appropriate service. The hours of educational service provided to preschool aged children should be consistent for any preschool aged child funded through the Public School Finance Act. Exceptions to that standard for child with disabilities should be justified by the Individual Education Program.*
6. In addition, districts using the November 1 count date must still ensure that the number of hours scheduled for the Colorado Preschool and Kindergarten Program should be no less than three hundred sixty hours in the course of the school year.
7. **The deadline for submitting and approving the November 1 count data for 2006 is Friday, November 10.**
8. If a district uses the November 1 alternate count date for either CPKP or early childhood special education, any child who has left the district prior to November 1 cannot be counted.

Alternate Count Date (Cont.)

9. A child cannot be included in a November 1 alternate count if that child has already been counted in another school district on October 1. If a district wishes to include on the November 1 count a child who has moved from another school district in Colorado since October 1, that district must obtain a signed "Alternative Count Day" form from the former school district (<https://ade.cde.state.co.us/2002AlternativeCountDateForm.pdf>). This form allows the first district to verify to the second district that the child has not already been included in an October count. Without the completed Alternate Count Date form, the district counting the child on October 1 will be the only district allowed to count the child.
10. This alternate count date only applies to the early childhood special education and the CPKP funded population. Pre-K children served in programs in schools who are not eligible for these funding streams should be counted on October 1, and identified with the "not eligible for funding" codes.
11. **School districts must use the same count date for both CPKP and early childhood special education students.** If a school district chooses to use the early childhood alternate count date of November 1 then both the CPKP and early childhood special education students must be counted on that date. School districts may not count one child in both CPKP and early childhood special education regardless of the count date.
12. If a district chooses to use the alternate count date of November 1 then they must resubmit data for CPKP and/or early childhood special education for all the children eligible for that funding in their district on November 1. They cannot submit an alternate count for just one school.
13. The ADE system does not accept partial data, so a district that uses a November 1 alternate count date for the pre-K program must submit and approve their PK-12 count data on or before November 10.
14. School districts are encouraged to track changes to their CPKP and ECSE data base on a regular basis from October 1 to November 1, so changes can be made following verification of the November 1 count.
- 15. Finally, if your district is planning on using the alternate count date for either CPKP or early childhood special education, please notify Lori Goodwin Bowers prior to Friday, November 10th by e-mail (bowers_l@cde.state.co.us) or FAX (303-866-6785). I will be submitting a list of those school districts participating in the early childhood alternate count date to the CDE auditors.**

Important Dates to Remember:

Monday, October 2, 2006

Official Count Date

Wednesday, November 1, 2006

Alternate Early Childhood Count Date

Friday, November 10, 2006

Final date for all school districts to submit and approve their PK-12 student files.

Each year school districts are required to submit to CDE a financial report on CPKP revenues and expenditures. This report is part of the ADE Financial Collection system.

It is the district advisory council's responsibility to be clear on what it has defined as direct services and how CPKP money is being spent in its district.

Fund 19

Districts receiving funding from the Colorado Preschool and Kindergarten Program, both for preschool and full day kindergarten, must establish a preschool program fund. The Financial Policies and Procedures Advisory Committee have designated this as Fund 19 in the Chart of Accounts. Within this fund CPKP funded preschool programs should have a 3141 grant code, and CPKP funded kindergarten programs should have a 3142 grant code.

In Fund 19 a budget for CPKP must be provided that is equal to or greater than the district's per pupil operating revenue (PPOR) multiplied by the district's CPKP funded preschool or full day kindergarten enrollment. If districts have other sources of funding that are used to help pay the costs of providing preschool services to children eligible for CPKP, that money may also be deposited in the CPKP fund. However districts are not required to deposit it there.

If all of the money in Fund 19 is not expended by the end of the school year, districts must carry over any remaining moneys in Fund 19 to the next fiscal year.

The Legislature has been very clear that the only appropriate expenditures from the CPKP fund are those that are made to provide services to children and families in CPKP. Allowable expenses can include:

- Teacher and paraprofessional salaries and benefits
- Supplies and materials
- Expenses associated with home visits
- The entire cost of any preschool program contracted services
- Services provided by a district to children enrolled in CPKP or their families
- Associated professional development activities
- Costs that a district would not otherwise have incurred but for the services provided in conjunction with the preschool program.
- A reasonable allocation of district overhead costs, which should not exceed five percent (5%) of the total CPKP funding provided to the district.

In determining overhead costs, districts may use their restricted indirect cost rate as long as it does not exceed 5%. Any overhead costs claimed by a district that exceed CDE's calculation of restricted indirect cost rates for LEA's must be verifiable.

Check Sheet for Colorado Preschool and Kindergarten Program Fund 19

- ◇ A Fund 19 has been established for the Colorado Preschool and Kindergarten Program. (C.R.S. 22-45-103 (1) (g))
- ◇ Direct allocations to the Colorado Preschool and Kindergarten Program fund are identified with 5800 allocation codes. The allocation codes used are as follows:
 - 10.000.00.0000.5819.000.0000 outgoing allocation in General Fund, Fund 10. (Debit entry - expenditure type)
 - 19.000.00.0000.5810.000.0000 incoming allocation in General Fund, Fund 19. (Credit entry - revenue type)
- ◇ Additional fund transfers to support the Colorado Preschool and Kindergarten Program use Source code 5219 in Fund 10 for the outgoing transfer, and source code 5210 in Fund 19 for the incoming transfer.
- ◇ The amount of allocation to Fund 19 equals the amount of one-half of the district's per-pupil operating revenue times the number of CPKP preschool and full time kindergarten slots allocated and used by the district in the school year. (C.R.S. 22-54-105 (4))
- ◇ Grant code 3141 is used to identify the revenues and expenditures for the preschool program funded through the Colorado Preschool and Kindergarten Program. Grant code 3142 is used to identify the revenues and expenditures for the full-day kindergarten program funded through the Colorado Preschool and Kindergarten Program.
- ◇ Expenditures from Fund 19 only include costs that a district would not otherwise have incurred but for the services provided in conjunction with the preschool program. Districts must be able to document that charges to Fund 19 are a direct cost of the Colorado Preschool and Kindergarten Program. For instance if transportation expenses are included in Fund 19, districts must be able to document that bus routes were added or extended to serve CPKP children. Districts may not simply charge a percentage of district's transportation expenses back to Fund 19, because those expenses may have been incurred by the district without operating a CPKP program. (C.R.S. 22-45-103 (1) (g))
- ◇ Overhead costs have been limited to 5% of the CPKP funding. Overhead costs are identified as the 2300,2500, 2800, and 2900 series object codes in the Chart of Accounts. (C.R.S. 22-45-103 (1) (g))
- ◇ When blending funding sources, a school district is able to provide the percentages of students qualifying for each program in the blended classrooms to provide the basis for allocation of expenses to each funding source. **For CPKP purposes, this percentage may be calculated based on the children included in the October count.**
- ◇ Any moneys remaining in Fund 19 at the end of the fiscal year remain in the fund for the following school year. (C.R.S. 22-54-105 (4))

Program Requirements

Programs Must be Licensed through the Division of Child Care, Colorado Department of Human Services:

Every classroom where CPKP preschool services are provided must have a valid license from the Division of Child Care at the Department of Human Services. The only exception is that full-day kindergarten programs funded through CPKP do not have to be licensed.

This license indicates that minimum health and safety standards have been followed. A license is required for any space where CPKP services are delivered, including public school classrooms. If a school moves CPKP to a different place every year, they must insure that each new setting is also licensed.

If a school changes the location of its CPKP, the new space must also be licensed. The Division of Child Care has made staff available to work with you throughout this process.

Specific CPKP Requirements Identified in Legislation (22-28-108 C.R.S.)

True quality goes beyond licensing requirements – these minimum standards are just a beginning. Quality programs attempt to provide the best possible environment for all children. The basic elements of quality that are identified in the Colorado Preschool and Kindergarten Program Act include:

Class size:

There should be a maximum of 15 children per classroom with an adult child ratio of one to eight in both preschool and full day kindergarten programs. One of the primary determinants of quality in early childhood programs is the relationship between children and teachers. It may be difficult for a teacher to develop a close relationship with his/her students if the class size is too large or if the teacher is responsible for too many children.

The relationship between a teacher and child is especially critical when serving children who are at risk for school failure. Multiple opportunities for one-on-one communication are critical for children to develop language, math and self-regulation skills.

Frequency of contact:

For preschool programs the law requires 360 contact hours a year, which is usually 10 hours per week. (22-32-109 C.R.S.) Classes are to be held for four half days, or the equivalent per week. The fifth half day should be used for home visits, staff development, or planning. (22-28-108 C.R.S.)

Program Requirements (Cont.)

All full-day kindergarten students should be scheduled for no fewer than nine hundred hours of planned teacher-pupil instruction and teacher-pupil contact during the school year. (22-32-109)

Learning plans:

Each child should have an individual learning plan which identifies the child's needs in language, cognition, gross and fine motor development, social skills and self-esteem. For more information about individual learning plans see page 30.

Family involvement:

In a quality early childhood program, parents and providers learn how to be partners in a child's education. CPKP requires programs to have a written plan for parent involvement. In addition, parents are asked to enter into an agreement with the program that specifies what this involvement looks like (22-28-110 C.R.S.).

Englewood School District employs two Family Service Providers, one of whom is bilingual. These individuals meet with the child's parent/guardian to initiate the process of developing a Family Partnership Agreement that includes:

- ◇ Identification of family strengths.
- ◇ Identification of partnership opportunities with their child's school
- ◇ Identification of needs and support for a plan to meet those needs.
- ◇ Making families aware of community services that will be of assistance to them
- ◇ Helping families gain access to needed services
- ◇ Helping families to assess progress in getting needs met.

“Our primary goal is to assist parents to gain confidence and resourcefulness in providing for their family. Involvement of parents in the full-day kindergarten and ECE program is achieved through building advisory committees, the District advisory council, parent conferences, home visits and volunteerism. Parents are always welcome to visit district programs and it is our commitment to encourage their participation at whatever level best meets their needs and to develop their comfort level in becoming an active partner in their child's education.”

Englewood School District CPKP Coordinator

Programs are Also Encouraged to Pursue NAEYC Accreditation:

The CPKP rules and regulations encourage all programs receiving money from the Colorado Preschool and Kindergarten Program to become accredited by the National Association for the Education of Young Children (6.03 C.C.R.).

For more information about NAEYC Accreditation visit the NAEYC website:

www.naeyc.org

Qualistar Rating System

More than 83 programs which serve CPKP children have received a Qualistar rating. For more information about Qualistar see their website:

www.qualistar.org

Program requirements identified in the Colorado Quality Standards for Early Childhood Care and Education Services

To further define quality care and education for young children, the Colorado Department of Education was required by law to develop program standards for CPKP (22-28-108 91) (A) C.R.S.). Programs must demonstrate the capacity to deliver quality, developmentally appropriate services as measured by these standards, which are defined in the Colorado Quality Standards for Early Childhood Care and Education Services.

The Quality Standards are based on the National Association for the Education of Young Children's (NAEYC's) Developmentally Appropriate Practices and the Accreditation Criteria and Procedures of the National Academy of Early Childhood Programs. In addition, Head Start Performance Standards were also consulted in the development of this document, among many other resources.

The Quality Standards are meant to be comprehensive in scope and cover the full range of components essential to a quality program. They address elements affecting basic classroom environment like curriculum, staffing patterns and interaction among staff and children, as well as elements that address children's broader needs like health and safety, nutrition and family/staff partnership. These Quality Standards are meant to be commonly applied across all programs receiving Colorado Department of Education funds. It is important that the District advisory council and all providers of CPKP use the quality standards document and be familiar with the available supporting resources.

Programs are also Required to Participate in CDE On-Site Visits:

On a regular basis, staff from CDE will visit districts that receive funding from the Colorado Preschool and Kindergarten Program. The purposes of these visits will be to provide technical assistance to districts, as well as to determine if districts are complying with state law in the operation of their program. Areas that CDE staff will review include:

- ◇ The school district's screening process
- ◇ The eligibility criteria used by programs for determining which children will be served by CPKP.
- ◇ The composition of the district advisory council and its work
- ◇ How the quality of the CPKP program is monitored.
- ◇ How the effectiveness of CPKP is evaluated
- ◇ The financial activities regarding the preschool program.

Colorado Preschool and Kindergarten Program Staff Requirements

Teachers' skills and knowledge are the key element to the delivery of the Colorado Preschool and Kindergarten Program services. **All staff that serve CPKP children must meet the Colorado Department of Human Services Licensing Requirements but that is only a minimum level of professional preparation.** The Colorado Preschool and Kindergarten Program Act states, "*In establishing criteria for district preschool programs relating to qualifications for preschool teachers, the department shall not require preschool teachers to be licensed pursuant to article 60.5 of this title but shall allow the district or a head start agency or child care agency to employ a nonlicensed preschool teacher so long as said teacher meets other qualifications established by the department.*" (C.R.S. 22-28-108 (3)) It is important however, that each teacher have the appropriate skills, knowledge and disposition to teach young children.

To insure that the teacher has the appropriate skills to teach young children, the department addresses the preschool teacher qualifications in two ways. Staff qualifications are outlined in the Rules for the Administration of the Colorado Preschool and Kindergarten Program Act and they are also further defined in the Colorado Quality Standards for Early Childhood Care and Education Services.

The Rules for the Administration of the Colorado Preschool and Kindergarten Program Act state that "teachers must be able to show that they have received education credits in the field of early childhood. This can be done through a portfolio that demonstrates knowledge in:

- Early childhood development;
- Applying developmentally appropriate practice in the classroom as defined by the National Association for the Education of Young Children);
- Knowledge of multicultural education;
- Understanding parent partnerships.

The rules further indicate that *if the teacher cannot demonstrate skills in the above areas, they must be supervised by someone who can, and they must be making progress in the areas of need as part of their staff development.*" (2228-R 6.06-.07 C.C.R.)

In addition, each early childhood program participating in the Colorado Preschool and Kindergarten Program must demonstrate the capacity to deliver high quality developmentally appropriate services as defined by the Colorado Quality Standards for Early Childhood Care and Education Services. An important goal in the Quality Standards is that programs are staffed by adults who understand child development and who recognize and provide for children's needs. The Quality Standards in Section D state that:

Staff who are in charge of a group of children should have at least a Child Care Professional Credential (CCP), Child Development Associate Credential (CDA) or an associate degree in Early Childhood Education/Child Development

In cases where staff members do not meet the specified qualifications, a training plan and timeline, both individualized and program-wide, has been developed and is being implemented for those staff members.

An early childhood educator is employed to direct the educational program of children birth through eight. The qualifications of an early childhood educator are a baccalaureate degree in Early Childhood Education/Child Development and at least three years of full-time teaching experience with young children, and/or graduate degree in ECE/CD. This individual may be the classroom teacher, early childhood coordinator, building principal, or center director.

“It is because of the on-going partnership and respectful relationship between the school district and all early childhood programs in our community that we are able to serve more children and not duplicate services.”

*Longmont Community
Early Childhood
Program*

Creating Quality Partnerships

Districts may provide program services in three ways:

- the district may provide all services in school district operated preschools (e.g. usually existing elementary schools). Special education, CPKP, Title 1 funds, private tuition etc., can be blended to operate these schools.
- the district may contract out its entire program to community providers (e.g., Head Start or private child care facilities) with proper support and monitoring
- the district may use a combination of district and community providers.

The CPKP legislation is clear that there is significant value in using existing and established Head Start and community early childhood programs, where available, when deciding where to serve CPKP children. It also gives communities the freedom to decide locally who is best qualified to deliver CPKP services. It is clear that decisions are to be based on a program’s ability to provide quality services. It is also important that a provider be committed to using the Colorado Quality Standards document as a program guide for on-going quality improvement.

As a district advisory council designs a process for choosing and working with contracted providers, it is important to utilize the experience and expertise of existing early childhood programs in the community to the maximum extent possible. Involvement in CPKP can be viewed as a way to enhance the quality of services for all children by expanding the use of Colorado Quality Standards. Every effort should be made to make current providers aware of CPKP and the possibility of their participation. Current licensed providers often have achieved professional accreditation, indicating that they have put a great deal of time and effort into developing high quality services.

Each district that contracts with community providers for program services is responsible for negotiating the rates that it will pay to the providers. The Department is not involved in selecting providers, setting rates, or paying the providers, and the Colorado Preschool Act does not address payments to community providers.

If services are contracted out, it is the responsibility of the district advisory council and school board to ensure that money provided for the Colorado Preschool and Kindergarten Program is used for services connected to CPKP.

In addition to the contracted rate paid monthly to providers, many districts also provide funding to providers for the following direct program services:

- Child Identification/Assessment or developmental screenings,
- Home Language/Literacy materials,
- Professional Development opportunities/Conference registrations/In-service training
- Parent Liaison/Family Support Services/Service coordination for children and families
- Monthly newsletter to families to extend learning activities and parenting ideas into the home
- Classroom equipment and materials.

Request for Proposals (RFPs) to Community Providers

A major responsibility of the district advisory council is to develop a process that allows community early childhood programs to apply for the opportunity to deliver CPKP services. One step in this process is to develop and issue a Request for Proposals (RFP) to the community (4.09). **School districts are required to send out RFPs at least once every five years to assess whether alternative community providers are available.**

RFPs should be issued as early as possible to allow for a process that is accessible to existing programs. Current guidelines state that applicants should have **at least 45 days** from the date the RFP was released in order to prepare and submit a proposal. *The district advisory council reviews proposals and makes funding recommendations to the local school board. The school board then makes the final decision on who will provide CPKP services (4.10 CCR).*

The intention of the law is to establish a fair competitive process in which decisions are made at the local level. The goal is to provide children and their families with the highest quality services available. There are experienced quality early childhood programs already in existence, many using the Colorado Quality Standards. Many are also funded by programs like Head Start, Special Education, Title I, Child Care Assistance Program or other potential CPKP partners. Participation in the CPKP has often served as a catalyst for bringing public and private programs together to offer parents more and better choices. Use of the Quality Standards by community early childhood programs means that the quality of care and education improves for all children.

When developing a RFP process, it is important that district advisory councils keep the following in mind:

- ◇ Providers in contracted sites need sufficient lead time in order to plan with confidence. Ideally district advisory councils would make their decisions and notify contractors before the end of the previous school year. The number of students allocated to each site should match the number requested by that site whenever possible.
- ◇ Parents should be provided with information regarding the number and location of contracted sites, so that their choice can be honored whenever possible. Parents should be encouraged to visit sites before making a decision.
- ◇ All providers, including public schools, must be licensed by the Colorado Department of Human Services.
- ◇ District advisory councils should make every effort to identify sites that are able to provide full-day, full-year services to meet the needs of working parents. This is especially important with welfare reform.

“An early childhood lending library and extensive prop box system has been set up for community programs. The prop boxes contain equipment for all interest centers and are valued between \$500 and \$800. In addition, for all sites we have added large equipment, furniture, art supplies, circle time kits, literacy kits and other assorted toys to help them achieve quality classroom environments.”

Colorado Springs

District #11

“Our council has taken steps to advertise the screening days throughout the communities, especially with the local doctors, as a means of informing parents about child development resources. In addition, all screening days are advertised in the schools and sent home as an informational note to all children in the elementary schools in both English and Spanish”
Weld County RE- 5J

Child Eligibility

The number of children who can be served in the Colorado Preschool and Kindergarten Program is capped at a level set by the State Legislature, both in the preschool program and in the extended kindergarten program. It is the responsibility of the local District advisory council to establish a clear policy for the determination of child eligibility. Because CPKP is capped, it is important to have a well thought out process to ensure that the program serves children with the highest need.

Section 22-28-106 of the Colorado Revised Statutes defines the eligibility criteria for children who may be served in CPKP. These guidelines include:

Children must be 3, 4 or 5 years old. Children funded in CPKP must be 3, 4, or 5 by October 1, 2006.

If a child is served as a 4 or 5 year old, the child must be eligible for kindergarten the next year and may only participate in CPKP for one year. (Please note: Children attending kindergarten must turn 5 by October 1.)

If a child is served as a 3 year old, the child must have 3 significant risk factors in their life that put him or her at risk of school failure. A child may participate in CPKP for a second year if he or she continues to have risk factors present in his or her life.

Significant family risk factors that affect overall learning readiness must be present in a child’s life. Significant family risk factors is defined by the legislature to mean any of the following:

- ◇ The child is eligible to receive free or reduced-cost lunch pursuant to the provisions of the Federal “National School Lunch Act.”
- ◇ Homelessness of the child’s family
- ◇ An abusive adult residing in the home of the child
- ◇ Drug or alcohol abuse in the child’s family
- ◇ Either parent of the child was less than eighteen years of age and unmarried at the time of the birth of the child.
- ◇ The child’s parent or guardian has not successfully completed a high school education or its equivalent
- ◇ Frequent relocation by the child’s family to new residences
- ◇ Poor social skills of the child

Child Eligibility (cont.)

- ◇ Children are also eligible if they are in need of language development, including but not limited to the ability to speak English.
- ◇ Children are automatically eligible if they are receiving services from the State Department of Social Services as neglected or dependent children.

The parent(s) or legal guardian must enter into an agreement with the program regarding their involvement in their child's education.

If a child has an Individual Education Plan (IEP) and qualifies for state PPR funding from special education, that child cannot be funded under CPKP.

District advisory councils can define and expand the list of risk factors in their community. However, in doing so, those district advisory councils must be able to clearly demonstrate how those risk factors affect a child's ability to be successful in school.

The children funded for the second half of their kindergarten day through CPKP must also meet the eligibility requirements.

How does a district advisory council determine eligibility?

Multiple methods should be used to determine a child's eligibility, and qualified personnel should conduct all assessments. These comprehensive assessments should include a combination of approaches. These can include:

- ◇ parent interviews,
- ◇ observations of children in natural settings,
- ◇ collection of demographic data
- ◇ standardized developmental screenings

Many communities use the same screening tools for all children. Then they use the results to determine eligibility for a variety programs, such as CPKP, Title I, and Head Start. A good screening process will also identify children who should be referred to Child Find for possible evaluation.

District advisory councils should use the information gathered through their child screening process, as well as any other sources available, to determine which risk factors are present in their community and are having the greatest effect on young children and their families.

The children who are learning English as a second language and have the opportunity to participate in CPKP are noticeably more prepared for kindergarten and make much easier transitions, than other children learning English as a second language. Our family agreements and child development plans involve parents in their children's education and add to their knowledge and parenting skills. Families and preschools continue to express gratitude and recognize the benefits of quality preschool education made possible by CPKP funding.

Telluride R-1

CPKP Eligibility Factors

Risk Factors	Significance of Risk Factor	How it May Be Measured
<p>In need of language development, including but not limited to the ability to speak English.</p>	<p>Having parents who only speak a language other than English in the home has been repeatedly associated with educational outcomes, such as low achievement test scores, grade repetition, suspension or expulsion, and dropping out of high school.</p> <p>Studies show that children who have specific language problems (that means language problems in the absence of mental retardation and other cognitive factors) often have difficulty learning to read. The ability to distinguish speech sounds early predicts their later language and reading abilities. *</p>	<p>Speech evaluation; referral/consultation with speech therapist</p> <p>Physician referral</p> <p>Teacher observation/referral</p> <p>Parental concern or report</p>
<p>Receiving services from the State Department of Social Services as neglected or dependent children.</p>	<p>Neglect is significantly related to reported behavior problems, and cognitive development is significantly impaired. Victims of child maltreatment experience poor school performance, learning disorders, poor peer relations and antisocial behavior.</p> <p>Children in foster care are more likely than other children to exhibit high levels of behavioral and emotional problems. They are also more likely to be suspended or expelled from school and to exhibit low levels of school engagement and involvement with extracurricular activities. Children in foster care are also more likely to have received mental health services in the past year, to have a limiting physical, learning, or mental health condition, or to be in poor or fair health. *</p>	<p>Social service or agency referral</p>
<p><i>Significant Family Risk Factors that Affect Overall Learning Readiness</i></p>		
<p>The child is eligible to receive free or reduced-cost lunch pursuant to the provisions of the Federal "National School Lunch Act."</p>	<p>The free and reduced lunch rate is a proxy for poverty, because it is linked to a family's income and family size. Average scores for reading, mathematics and writing achievement are statistically lower for children who are eligible for the school lunch program compared to ineligible children. This achievement gap continues throughout the school years. Children in poor families score lower on standardized tests of verbal ability and have lower cognitive skills such as reading number skills, problem solving, creativity, and memory than children in families above the poverty line. Poverty in young children (before age 5) is particularly detrimental for children and is associated with fewer total years of schooling, school failure, and dropout; more physical health problems and lower nutrition.</p> <p>Kindergartners in the lowest fifth of socioeconomic status watch 40% more television per week, own one third of the books, and are less likely to own a computer, compared with their more economically advantaged peers. *</p>	<p>Income verification form</p> <p>Report from school district nutrition office</p>

* The bibliography for this research is included in the Appendix * Factors written in red are also identified as School Readiness Indicators

CPKP Eligibility Factors (cont.)

Risk Factors	Significance of Risk Factor	How it May Be Measured
Homelessness of the child's family.	<p>Students who are without a home may be absent from school more days than children with homes. According to the U.S. Department of Education statistics, 45 percent of homeless students in kindergarten through 12th grade were not attending school regularly during the time they were homeless, missing 15 or more days of school in a three-month period.</p> <p>Children in unstable housing situations are at higher risk for poor nutrition and chronic health problems. Homeless children are more than twice as likely as other children to exhibit signs of anxiety, depression and withdrawal. *</p>	<p>Address records</p> <p>Parent report</p> <p>Social Services or agency referral</p>
An abusive adult residing in the home of the child	<p>Child abuse and neglect is linked to many short term and long term negative outcomes, including: language deficits; reduced cognitive functioning; attention deficit disorders; lower grades, lower standardized test scores, and lower rates of grade promotion; learning impairments; impaired moral reasoning; as well as shortfalls in physical health, including failure to thrive, somatic complaints, and high mortality.</p> <p>Children who have been exposed to domestic violence are more likely to experience difficulties in school and to score lower on assessments of verbal motor, and cognitive skills. Also they are more likely than other children to exhibit aggressive and antisocial behavior. *</p>	<p>Medical report</p> <p>Social services or agency referral</p> <p>Parent report</p> <p>Court or police report</p>
Drug or alcohol abuse in the child's family	<p>Substance abuse and addiction dangerously compromise or destroy the ability of parents to provide a safe and nurturing home for children. *</p>	<p>Social services or agency referral</p> <p>Parent report</p>
Either parent of the child was less than eighteen years of age and unmarried at the time of the birth of the child.	<p>There are positive correlations between parental education and young, unwed mothers and poverty. Parental educational attainment is linked with the home literacy environment. *</p>	<p>Birth certificate</p> <p>Parent report</p>
The child's parent or guardian has not successfully completed a high school education or its equivalent	<p>A key set of risk factors has been repeatedly associated with educational outcomes, such as low achievement test scores, grade repetition, suspension or expulsion, and dropping out of high school. These risk factors include having parents who have not completed high school.</p> <p>Children whose mothers have higher levels of education, do better in specific reading and mathematics areas, are more likely to often or very often accept peer ideas, in play, make friends, and comfort others and they are more likely to persist at tasks, seem eager to learn and pay attention. *</p>	<p>Parent report</p> <p>School report or referral</p>

* The bibliography for this research is included in the Appendix * Factors written in red are also identified as School Readiness Indicators

CPKP Eligibility Factors (cont.)

Risk Factors	Significance of Risk Factor	How it May Be Measured
Frequent relocation by the child's family to new residences	<p>Many children change schools because of unstable living conditions (such as moving frequently). These children are at greater risk for grade repetition and lower educational attainment.</p> <p>Mobile students are more likely to act out or get in trouble. Students who change schools frequently score lower on standardized tests . It takes 4-6 months to recover academically after changing schools.*</p>	<p>Address records</p> <p>Parent report</p> <p>Social services referral</p>
Poor social skills of the child.	<p>Early learning and early social and emotional development are connected. A child's emotional status affects early school performance, which in turn, predicts later school outcomes. Emotional and behavioral problems in young children can lead to school failure, child abuse, delinquency, and mental illness.</p> <p>Social development is an important, often over-looked factor in children's transition to kindergarten. A child who is socially ready for school should be able to make friends, get along with peers, and communicate well with peers and teachers. Children who arrive at kindergarten with social competencies generally have an easier time forming relationships with their peers and better school outcomes.*</p>	<p>Exclusion from other pre-school/child care programs</p> <p>Social services or medical referrals</p> <p>Parent interview questions/report</p> <p>Staff documentation on home visits or developmental assessments</p>

- ◆ *The bibliography for this research is included in the Appendix.*
- ◆ *Factors written in red are also identified as School Readiness Indicators*

Thoughts from RE-1 Valley School District:

At this time, we have not prioritized our risk factor list. It is felt that each individual situation must be considered as part of the acceptance process. For example, a teen parent with no support system is a high risk situation. However, some teen parents are very mature, have a strong family support system, and are very informed in their parenting practices. In this case, this individual may not be as needy as an involuntary unemployed parent with several children, and no supports in place.

Currently, each anonymous application is read and the number of needs considered along with any other contributing information. If needs are present but not enough to qualify the child for immediate enrollment in the CPKP program, the name is placed on a waiting list. As children move out of the CPKP program, the waiting list is used to fill the space.

The Importance of Verifying Income Eligibility

Each year CPKP is asked to provide information to the Department of Human Services and the Governor's Office, regarding how many children funded in CPKP are eligible for free and reduced price meals. This information on funding is then used to "draw down" additional Federal revenue to serve children and families, or it can be identified for the purpose of meeting the State's Maintenance of Effort (MOE) requirements for Colorado's Temporary Assistance for Need Families (TANF) program.

When verifying children's eligibility for free and reduced price meals, CPKP coordinators should ensure that this information is also recorded in the school district's October count.

U.S. Citizenship

The Supreme Court ruled in *Plyler v. Doe* that local school districts cannot deny admission to students who are not legally admitted into the United States. The court noted that such actions would impose a "lifetime of hardship on a discrete class of children not accountable for their disabling status. The stigma of illiteracy will mark them for the rest of their lives. By denying these children a basic education, we deny them the ability to live within the structure of our civic institutions, and foreclose any realistic possibility that they will contribute in even the smallest way to the progress of our Nation (457 U.S. 202) (1982)."

As a result of this Supreme court decision and state statutory provisions, the Commissioner of Education has determined that students who are residents of a Colorado school district may not be denied admission to the public schools based on their lawful or unlawful immigration status.

"Determination of legality of a student's immigration status is not a duty of the local school district nor is it necessary in determining the residency of a child. Undocumented children have the same right to attend public schools as do U.S. citizens and permanent residents. (Letter to Superintendents of Schools, Directors of BOCES, School Principals, and Other Interested Persons, January 1999)."

Who is Homeless?

According to the McKinney Act, a homeless individual is one who lacks a fixed, regular and adequate nighttime residence which includes children and families who:

- ◆ Share housing with friends or other families due to loss of housing, economic hardship or a similar reason
- ◆ Live in motels, hotels, or campgrounds because they have no permanent housing
- ◆ Live in emergency or transitional shelters like safehouses
- ◆ Live on the streets, in parks, in abandoned buildings or other accommodations unfit for habitation.

“The McClave Preschool District advisory council utilizes parent surveys, parent comments and concerns, and on-site observations to formulate their annual evaluation. Additionally, in an effort to further ensure that the preschool meets CPKP requirements, the Council reviews individual learning plans to ensure child progress.”

McClave RE-2

Individualized Learning Plans

CPKP Rules and Regulations (C.C.R. 6.04) states that each child must have an individualized learning plan. The plan should include identification of the child’s needs in the following areas: language, cognition, gross motor, fine motor, and social skills/self-esteem.

The *Colorado Quality Standards for Early Childhood Care and Education Services*, (Section B-2), explain that such an individualized learning plan should be developed by a collaborative team, which includes teaching staff, family members, specialists and/or others requested by the family or program. The plan should address priorities applicable to the child’s total day across a variety of settings (home, neighborhood school, community preschool, and/or child care center).

In order for a child’s activities to be purposeful, a plan which has specific, individualized goals for that child should be developed with the family ideally, at the same time as the child’s enrollment, but certainly within the first two weeks of attendance. An optimum means of developing such a plan is through a home-visit or other informal family contact, prior to the beginning of the school year. Families and teaching staff should revisit the individualized learning plan, with progress updated based on ongoing evaluation, at least twice during the course of the school year.

More Ideas from Programs Across Colorado:

Johnstown– Milliken:

“We are presently meeting as a CPKP District advisory council, however, our goal is to become an Early Childhood Council which will include private for-profit preschool programs, Head Start and the school district’s preschool program. We are developing a kindergarten transition report which will be used by all preschools in the area and will hopefully help parents and the receiving kindergarten teacher feel more comfortable meeting the needs of the children.”

Lewis-Palmer 38:

“We have a part-time family advocate, who is continually assisting our families in meeting their goals and empowering them to advocate for themselves and their children. This year two of the families have been able to secure employment with the help of CPKP and two additional families have enrolled in CHP.”

Children's Files

State regulations require that districts be able to verify that children participating in CPKP are eligible. Therefore districts should keep screening records on all the children who are participating. In addition, districts must include a child's Individual Learning Plan, information required by the Department of Human Services, and information required by their own district in a child's files.

Licensing Requirements:

All preschool sites providing CPKP early childhood care and education services must be licensed by the Division of Child Care in the Colorado Department of Human Services. In the Rules Regulating Child Care Centers it specifically outlines information that should be recorded on each child every year.

CPKP Requirements:

1. Verification of child's eligibility factors: *"When programs are monitored for compliance, local educational agencies shall be able to justify children being counted for funding as meeting the criteria."* (5.04 C.C.R.)
 - ◇ Screening information (actual screening documents)
 - ◇ Demographic information
 - ◇ Hearing/Vision test results
 - ◇ Parental intake forms
2. Individual Learning Plan

Your School District Requirements:

Other Items to Consider:

- ◇ Enrollment forms
- ◇ Examples of children's work
- ◇ Copies of communications with parents
- ◇ Other forms of authentic assessment

Because a qualifying risk factor for CPKP is free or reduced price meal eligibility CDE has developed a prototype Family Economic Data Survey form that your district advisory council could adopt and use as an alternate data collection instrument in schools that are not participating in the federal National School Lunch or School Breakfast programs.

The form is posted on the following website address:

<http://www.cde.state.co.us/cdenutritran/download/word/FamilyEconomicforms.doc>

The Terrific Transitions website was developed jointly by the SERVE Center and the National Head Start Association. This new tool provides early childhood educators with resources for creating and supporting a successful transition into kindergarten and includes helpful information for many different persons involved in the transition process - families, preschool and kindergarten teachers and administrators, Head Start staff, and community partners. Visit the site at www.terrifictransitions.org.

Transitions

The CPKP Rules and Regulations (6.01 C.C.R) states that programs providing services for children funded through the Colorado Preschool and Kindergarten Program must demonstrate the capacity to deliver high quality developmentally appropriate services, as measured by the *Colorado Quality Standards for Early Childhood Care and Education Services*.

The “Quality Standards”, (Section E-15), identify transition (the movement or change of children from one program to another) as an important part of quality services. Additionally, federal guidelines require that the transition of preschool children with disabilities, as well as the transition of all preschoolers who are entering Title I schools, must be addressed. The focus of current transition efforts has changed from bridging the gap between different types of programs to the provision of continuity in the key elements that characterize all good early childhood programs: *developmentally appropriate practices, family partnerships, and supportive services*.

The process of transition, whether it is from a preschool program into kindergarten, or from full-day kindergarten into first grade should be planned. The planning should begin at least six to nine months prior to placement of the child in the new setting and should involve families and the teaching team from the child’s current, future or past programs.

Preschool Transition Idea from Boulder Valley School District:

In the fall, all incoming CPKP families are invited to meet with the CPKP Coordinator and Parent Liaison at the beginning of the school year. This meeting is held at the local libraries. The librarians at these libraries have already committed to taking the parents on a tour of the library and holding a story hour for the children while we meet with parents.

Kindergarten Transition Idea from Bishop Elementary School in Englewood:

We are developing as many avenues as possible to help parents, who may have had a negative school experiences or little school experience, feel comfortable in school. For next year’s kindergartners, we have Cub Club once a month. This is a time for the four year olds to spend 30 minutes in the school with next year’s teachers, while parents listen to speakers present on a variety of topics.

Colorado Preschool and Kindergarten Program Effectiveness

Colorado Preschool and Kindergarten Program District advisory council's are required to select methods for measuring and reporting child progress and parent involvement in the Colorado Preschool and Kindergarten Program (CPKP). Results from these methods must be submitted annually to the Colorado Department of Education in the annual reapplication for CPKP. This information is then compiled and reported each year to the General Assembly.

In statute, CDE has been authorized to request from districts the information and data necessary to make these reports (22-28-112 C.R.S). In the future, information requested on the benefits of children's participation in preschool will be aligned with the work CDE is doing in "Results Matter". The development of this assessment system is currently being supported through a Federal Grant (GSEG) provided to CDE to measure outcomes of early childhood programs.

Purpose of the "Results Matter" Program

To positively influence the lives of children and families by using *ongoing assessment, program evaluation and stakeholder input* to:

- ▶ Identify feasible (and defensible) measurement and reporting approaches
- ▶ Describe and value child progress over time
- ▶ Inform and influence day-to-day interactions and interventions provided by the adults in a child's life
- ▶ Build capacity to use data for program improvement.
- ▶ Demonstrate program efficacy

What Influenced the Development of Results Matter?

- ◆ Review of the early childhood assessment and outcomes literature
- ◆ Reviewed work in other states
- ◆ Studied Colorado's K-12 assessment work
- ◆ Survey and review of existing assessment systems
- ◆ Interviews and surveys with local stakeholders regarding their current practices, successes and lessons learned

Who Will Participate in Results Matter?

- Early Childhood Connections (Part C)
- Colorado Preschool Program
- Preschool Special Education
- Even Start
- Migrant Education Even Start

Results Matter

Partners:

Colorado Department of Education

Colorado Department of Human Services

Early Childhood Outcomes Center

US Department of Education - OSEP

Principles Guiding the Development of Results Matter:

The child outcome measures should:

- ☆ Be based on sound theory and research
- ☆ Be contextualized, naturalistic, and authentic
- ☆ Be culturally and linguistically sensitive
- ☆ Gather information over time
- ☆ Utilize information from primary caregivers including families

The assessment system should:

- ☆ Positively influence the lives of children and families
- ☆ Be inclusive of all children
- ☆ Represent a birth to five model
- ☆ Be multi-dimensional
- ☆ Serve multiple purposes on the community, state and federal level
- ☆ Respect local efforts

Components of the “Results Matter” System

Short Term Child Progress Data

The Ounce Scale, or
The Work Sampling System, or
High/Scope Child Observation Record, or
Creative Curriculum Developmental Continuum, and
Parent Perception of Progress Survey, and
Kindergarten Teacher Perception of Readiness

Longitudinal Study

Percent of Students on Individual Literacy Plans
Colorado State Assessment Program Results
Special Education Exit and Re-entrance Rates
Retention Rates
Graduation and Formal Transition Rates

Program Quality Measures

Infant/Toddler Environmental Rating Scale, or
Early Childhood Environmental Rating Scale, or
Family Day Care Environmental Rating Scale, and
Parent Satisfaction Quality Standard Survey, and
Early Language and Literacy Classroom Observation
NAEYC Accreditation Rates
Qualistar Rating System Results

A Note on Measuring the Effectiveness of CPKP Funded Full-Day Kindergarten:

There will be elements of “Results Matter” that will be used to measure the effectiveness of CPKP Funded Full-Day Kindergarten. In addition, school districts that have CPKP funded full-day kindergarten slots have agreed to collect the following data:

1. Third grade CSAP scores of children who participate in the full-day program.
2. Attendance records through the primary grades
3. Number of children placed on ILP’s in later grades
4. Parent satisfaction surveys
5. Pre- and Post scores on an assessment given during the kindergarten year. This assessment could be identified by the district and should meet the requirements of the Colorado Literacy Act, which districts are complying with already.

Frequently Asked Questions

How can I subscribe to the CPKP listserve?

It is important to subscribe to the CPKP listserve, especially for CPKP coordinators. Membership on the listserve is open to any interested individuals. CDE uses the CPKP list-serve as a primary source of communication. If you have not subscribed to this list, please do so as soon as possible.

To subscribe:

Send an e-mail message to:

lyris@web.cde.state.co.us

In the subject line type: subscribe CPKPlist John Doe (or whatever your name is) and then just click send and you will be added to the list.

To send a message to the listserve:

CPKPlist@web.cde.state.co.us

What is an RFP?

RFP is an abbreviation for Request for Proposal. District advisory councils are required to send out RFPs at least once every five years to assess whether alternative community providers are available to provide CPKP services within a community. If you need examples of RFP's and contracts that have been developed by other school districts please contact Lori Goodwin Bowers at CDE.

Where can I find more information about the assessment tools used for Results Matter?

On the Results Matter website, <http://www.cde.state.co.us/resultsmatter/links.htm>, there are links to each of the tools as well as a number of resources on early childhood assessment.

Where can I find more information on the ECERS or the Early Childhood Environment Rating Scale?

Many CPKP programs are using the Early Childhood Environment Rating Scale as one measure of a program's quality. The ECERS is published through Teachers College Press (<http://store.tcpspress.com>) and is available through a number of distributors.

“The district advisory council started their work this year with a “back-to-school” repair day. Members, spouses and families helped with sanding, painting, planting new trees, adding pea gravel, erecting a large new sandbox, and making sure the facility was safe and ready for a new year.”

Idalia RJ-3 School
District

Frequently Asked Questions (cont.)

What does “developmentally appropriate mean”?

The phrase ‘developmentally appropriate’ is based on the understanding that there are some predictable, universal developmental stages that young children go through that are physical, social, emotional and cognitive. Knowledge of such child development helps insure that the learning environment and experiences are appropriate for the age of the child. Developmental appropriateness also acknowledges that each child is a unique individual. The curriculum, environment and experiences should be responsive to individual differences. ‘Developmentally appropriate practices’ should match a child’s development while challenging a child’s interest and understanding.

Does each school district have to have its own district advisory council?

Not necessarily. Some smaller communities that are geographically connected have chosen to share a common district advisory council. As the need for quality early childhood programs continues to grow and be recognized, there is sometimes an advantage to having a council focus on a single community.

Can we contract with a church based program?

Sections 7 and 8 of Article IX of the Constitution of the State of Colorado address the subject. Section 7 provides as follows:

“Neither the general assembly, nor any county, city, town, township, school district or other public corporation, shall ever make any appropriation, or pay from any public fund or monies whatever, anything in aid of any church or sectarian society, or for any sectarian purpose, or to help support or sustain any school, academy, seminary, college, university or other literary or scientific institution, controlled by any church or sectarian denomination whatsoever; nor shall any grant or donation of land, money or other personal property ever be made by the state, or any such public corporation to any church, for any sectarian purpose.”

Section 8 of Article IX provides in part as follows: “No sectarian tenets or doctrines shall ever be taught in the public school...”

If you have questions after reading the language of the Constitution, show this to your attorney for a professional interpretation.

By increasing representation from the medical community on our district advisory council we have opened new lines of communication. Our district is now beginning to receive referrals from doctors that in the past did not recognize the early intervention services that the district provides. Members have been willing to post child find information in their medical offices. This is important progress toward collaboration and the ability to better serve our community families.

District

Frequently Asked Questions (cont.)

Can my child attend any preschool?

The district advisory council has identified certain preschools that have demonstrated an ability to provide a quality preschool program. As a parent you would be expected to choose one of these. If you have another program you would prefer using, you should contact your district advisory council to see what your options

Can a child be counted and funded in the October 1 count in both CPKP and early childhood special education?

No, this is one area where the law is very clear. CPKP and Special Education in the October 1 count are both funded out of school finance dollars. It would be like paying for kindergarten one half day in one school and a half-day in another, or counting the same child for both first and second grade. If a child qualifies for preschool and therapeutic services through special education, it is important that he/she be identified and begins receiving the appropriate services as soon as possible.

Can we blend funds?

Many communities have been working on ways to blend funding for the past few years. There are several sources of funds including Head Start and early childhood special education that are currently being put together to provide full day, full year services to better meet the needs of working parents and their children. In blending funding it is important that two different funding sources do not pay for the same services. As local communities continue to identify the barriers to effective blended funding, state agencies have tried to address the policy changes necessary.

The Appendix contains a Cost Blending Allocation Plan that assists programs in allocating costs when delivering early childhood services across program areas.

Can a school district charge tuition for a preschool program?

Yes, school districts are not mandated to provide a preschool program, and CPKP and early childhood special education (ECSE) can only fund the children eligible for those programs. In many communities where there are no other options for attending preschool, school districts will charge tuition so that children not eligible for CPKP or ECSE may still have an opportunity to participate in preschool.

Students who encounter difficulties in the CPKP program may be referred for evaluations based on pre-referral procedures, which includes discussing the case with special education staff and appropriate related service personnel. After permission is given for evaluations, the evaluation process will occur within mandated timeframes as outlined through federal law.
