

Department of Education Q4 FY2018 Performance Evaluation (July 2018)

Strategic Policy Initiatives

The Department of Education has identified several strategic policy initiatives for FY 2017-18 and beyond. For this performance evaluation, the Department has updated progress on the initiatives identified in the FY2018 Performance Plan that capture the Department's strategic and operational priorities, and reflect the overall direction as identified by Department leadership. The updates reflect data as of July 12, 2018.

Additional detail for these, and other, strategic policy initiatives is available in the Department's Performance Plan, which may be accessed [here](#).

Key Initiative 1: Strong Foundations. Support high quality early learning and literacy for all students.

Research shows that proficiency in reading by the end of third grade enables students to shift from learning how to read to using reading skills to master the more complex subjects in fourth grade and beyond. In fact, students who cannot read by the end of third grade are four times more likely to drop out of high school. By focusing on support for our youngest students and their educators, the department can ensure more students are reading at grade level by the end of third grade and build a strong foundation for continued success in school.

Key Initiative 2: All Means All. Expand access and opportunity for historically underserved students.

In Colorado, students from a number of historically underserved backgrounds – specifically those from economically challenged communities, racial minority groups and students with disabilities – continue to fall short of their academic potential and are missing the skill sets to compete with their peers. By concentrating on equity as a foundational construct of our work at CDE, we will empower schools and districts in their efforts to increase access and opportunity and ultimately reduce the pervasive influence that systemic inequities have on student outcomes.

Key Initiative 3: Quality Schools. Prioritize and maximize support for schools and districts identified for academic improvements.

Schools and districts that are identified for improvement through the state and federal accountability systems all have different needs, based on the context of their communities. By working with districts and schools to understand their needs and invest in strategies to be successful, we will help them progressively improve and maintain their improvement on the state performance frameworks.

Key Initiative 4: More Options. Expand high school options to ensure all students are ready for college and/or living-wage jobs.

Students who graduate and work in Colorado need in-demand skills that meet business, industry and higher education standards. By 2020, three out of four jobs in Colorado will require education or training beyond high school. That adds up to three million jobs. By increasing options for high school students and fostering expansion of successful high school models, we can ensure that at least 66 percent of the class of 2022 go on to earn a postsecondary credential, certificate or degree within five years. When we achieve this goal, we will fuel Colorado's economy with educated students who are prepared for a college education, good paying job or military service.

Key Initiative 5: Educators Matter. Develop a strong pipeline of high-quality teachers and principals and provide deeper support for school and district leaders

Research shows that teachers have a bigger impact on student performance than any other school-based factor. And the number one reason teachers leave is lack of support by a high-quality principal. We can learn from the workforce development approaches of public and private industries that focus on growing talent in a strategic and intentional

way by recruiting, developing and supporting their workforce. By developing, deploying and supporting talent management and human capital development strategies for districts and schools, we can ensure that every classroom has an effective educator and all students are prepared for college, career and life.

Operational Measures

Strong Foundations: Support high quality early learning and literacy for all students.

Strategic Activities: Promote and develop high-quality, evidence-based early learning and literacy strategies; expand professional training and ongoing development of preschool through third-grade educators; strengthen partnerships with state and local agencies, communities, and libraries to support early learning and literacy in preschool through third grade.
