This table provides a comprehensive overview of population trends from 1998 to 2100. The data is presented in a structured format, with columns representing individual years and rows representing various demographic and economic indicators. The population column shows a steady increase over time, while other indicators reflect broader societal and economic changes. The table is designed to facilitate analysis and comparison of data across different periods and regions.

The data presented in this table and graph is based on current projections and assumptions. It is important to note that population trends can be significantly influenced by various factors such as migration, birth rates, and mortality rates. The projections provide a baseline for understanding future demographic challenges and opportunities. The table and graph are intended to serve as a reference for researchers, policymakers, and the general public.
