Foreword

THE first Year Book of the State of Colorado, issued in 1918 by the Colorado Immigration Bureau, was received with favor by those who are interested in having statistical information relating to the state and its political subdivisions carefully tabulated and published so as

to be easily available for the use of those who need it, and conveniently preserved as a permanent state record. Realizing the value of such a record and the necessity for maintaining its continuity, the Twenty-second General Assembly enacted a law requiring the Immigration Bureau to compile and publish the Colorado Year Book annually in the future. The second Year Book was published in compliance with this law in 1919, and it has been published annually since.

In order to make room for the large amount of statistical information now available for the Year Book it became necessary, beginning with 1921, to omit the descriptive county stories which had been included in previous issues. These county stories are now available in other publications issued by the Immigration Bureau. The additional statistical information available is obtained largely under an act passed by the Twenty-second General Assembly, clothing the Immigration Bureau with authority to collect much information it had been unable to obtain before the law was enacted. Additions to and improvements in the Year Book will be made from time to time as the funds available for the Bureau permit.

The Bureau acknowledges with thanks the willing assistance of state, county and city authorities and commercial club executives, to whose co-operation much of the success of this work is to be attributed.

THE COLORADO STATE BOARD OF IMMIGRATION.

Denver, Colorado, June 1, 1924.

Appreciation

Howard D. Sullivan, deputy commissioner and statistician of the Colorado State Board of Immigration, died May 10, 1924, only a few days before this edition of the Colorado Year Book came from the press. Until a short time prior to his death he remained steadfastly at his desk, despite a degree of physical weakness which would have justified him in abandoning all thought of work.

Because of his exceptional personal qualities and the splendid service which he rendered the State, the officers and members of the Immigration Bureau feel that some expression of appreciation of his work in this volume is eminently fitting.

The Colorado Year Book, now accepted and quoted as authority throughout the state, constitutes a veritable monument to his memory. From the first edition, published in 1918, down to the present edition it has been the product of his energy and intelligence. Gifted to an unusual degree with an understanding of the importance of preserving from year to year the outstanding statistical facts which tend to sketch the growth and development of a State and its industries, he developed sources of information which, combined with his insistence upon accuracy, made his work of exceptional value.

It is a privilege, therefore, for the officers and members of the Board of Immigration to give this public expression of their appreciation of the high class of service which Mr. Sullivan gave the State, his devotion to his work and the conscientious manner in which he enlarged and broadened its scope.

The Colorado State Board of Immigration

THE work carried on by the Colorado State Board of Immigration is best described by the statute creating the board, enacted in 1909, which provides that the duties shall be:

"To collect reliable information and statistics regarding agriculture, stock-growing and feeding, horticulture, mining, manufacturing, climate and health in Colorado, and to publish the same with a view to attracting health-seekers, tourists, investors and prospective settlers to the state; to prepare and cause to be circulated books, pamphlets, leaflets and other literature, illustrated or otherwise, regarding Colorado and the various localities of the state; to personally visit the various localities of the state, investigate the resources and possibilities thereof, and stimulate their proper advertising and exploitation; to personally and by deputies and employes visit other states and there distribute advertising matter, call personally upon intending investors, visitors or immigrants, install exhibits of Colorado views and products, give lectures on Colorado and in general further the advertising of Colorado."

Much difficulty has been experienced in the past in obtaining the "reliable information and statistics" referred to in this act, for the reason that the Immigration Bureau was not clothed with any authority to collect them or require their collection. To correct this condition the Twenty-Second General Assembly enacted a law, supplementary to that of 1909, giving the bureau authority to require state, county, city, town, precinct and school district officers, owners, operators and managers of manufacturing, mining and other business establishments and certain other persons to furnish "such information as may be required for properly setting forth the resources of the state and their development." This law also provides for co-operation between the State Board of Immigration and the Division of Crop Estimates of the United States Bureau of Agricultural Economics in the collection and publication of information regarding livestock and acreage, condition and production of all crops, and requires county assessors, when making the annual property assessment, to collect for the bureau a wide variety of information regarding "farm opera-

tions, the principal farm products, agricultural resources and livestock."

Under the authority vested in the board by this act blanks have been furnished annually to all county assessors, and reports have been made for all counties where agriculture is followed. Complete reports for 1923 are published elsewhere in this volume. In the Year Books for 1919 and 1920 acreage figures collected by county assessors for the current year were published, but the volume is now published before assessors' reports are complete and only figures for the past year are used. Acreage figures for 1924 will be published in the monthly crop bulletin as soon as they are available and will be published complete in the 1925 Year Book.

The State Board of Immigration, acting under the authority granted in the act of 1919, has also entered into a contract with the United States Department of Agriculture prescribing the conditions under which the board shall co-operate with the Bureau of Crop Estimates in the publication of agricultural statistics for the state and the several counties. The contract provides for the organization of the Colorado Co-operative Crop Reporting Service, which is now in operation, and which publishes a crop bulletin monthly, using the acreage information collected through county assessors and statistics on condition and production of crops collected through the regular reporters of the Bureau of Crop Estimates and through other channels.

The corrected acreages as reported by assessors for 1923 are found in this volume, together with the production of the principal crops by counties, as determined by the Co-operative Crop Reporting Service. It has been found impracticable to give the production of all crops by counties, but a table will be found in this volume giving the total production of all crops for the state, as determined by the Crop Reporting Service, together with the values of these crops at prices prevailing on or about December 1, 1923. Beginning with the 1921 edition of the Year Book statistics of the acreage and production of all crops are published annually, providing a permanent record of the agricultural development of the state and the various counties, which will be of great value to all who are interested in Colorado's growth.

Colorado—General Description

COLORADO lies in the east-central part of the Rocky Mountain region and contains the most elevated portions of the Rocky mountains in the United States, though there are higher altitudes in both California and Washington, in the Cascade mountains, than are found in Colorado. The United States geological survey, in its latest published reports, assigns to two peaks in Lake county the honor of being the highest points in the state. These are Mount Elbert and Mount Massive, each with an altitude of 14,402 feet. The United States coast and geodetic survey, however, fixes the altitude of Mount Massive at 14,419 and that of Mount Elbert at 14,404 feet. The highest point in the United States is Mount Whitney, California, 14,501 feet. Colorado has the highest mean altitude of any state, only about one-fourth of its area being below 5,000 feet, while approximately two-thirds of it ranges from 6,000 feet to 14,000 feet. It has at least 43 peaks that tower 14,000 feet or higher above sea level, and approximately 1,000 having altitudes of more than 10,000 feet. The eastern two-fifths of the state lies in the Great Plains, and is a level or broken prairie, crossed by the valleys of the Arkansas and South Platte rivers and their numerous tributaries, and rising gradually from the state line westward to the foothills of the Rockies. The main range of the Rocky mountains passes north and south through the central part of the state, with numerous secondary ranges and spurs running in all directions, giving Colorado the greatest extent and widest variety of mountain scenery found in any state. The western part lies in the Pacific water-shed and contains the largest streams in the state. Its surface is much more broken than that of the eastern part, embracing numerous high mesas and fertile, narrow agricultural valleys, and rising to the rugged and wonderfully picturesque San Juan mountains in the southwest. In outline the state is almost a perfect rectangle, having the most regular form of any state in the Union. It ranks seventh in size, with a land area of 66,341,120 acres or 103,656 square miles. Its water area is 290 square miles, making the total area 103,948 square miles. It is more than twelve times as large as the state of Massachusetts, nearly twice as large as Iowa, and about the same size

as New York, Ohio, Connecticut and New Hampshire combined. Its extreme length east and west is about 387 miles, or 37 miles more than the distance from New York City to Portland, Maine, and its width approximately 276 miles, about the same as the distance from Chicago to St. Louis.

Natural Divisions—As a result of its large size and the extreme irregularity of its surface, the state is divided into a number of districts that show considerable variation in topography, soil, climatic conditions, industries and products. The most important of these are the following: The non-irrigated prairie section in the eastern part of the state, popularly referred to as "Eastern Colorado;" the South Platte valley, in the north and northeast; the Arkansas valley, extending through the southern part of the eastern half of the state; the San Luis valley, a vast basin, the bed of an ancient lake, lying in the south-central part of the state, almost wholly surrounded by mountain ranges; the San Juan basin in the southwest; the valleys of the Colorado river and numerous tributary streams in the central-western part; the rugged plateau districts drained by the White and Yampa (Bear) rivers, in the northwest; the mountainous, mineral-bearing districts, extending in a broad, irregular belt across the central part of the state from the Wyoming to the New Mexico line; and the mountain park districts, chief of which are North park, in Jackson county; Middle park, in Grand county; and South park, in Park county. These last are very similar to the San Luis valley, but all have higher average altitudes and consequently enjoy less intensive agricultural development. In topography and climatic conditions the South Platte and Arkansas valleys are very similar to the non-irrigated sections of eastern Colorado, but by reason of the fact that a large supply of water is available in these valleys for irrigation, they enjoy the most extensive agricultural development found in the state and produce a wider range and greater yield of crops than the non-irrigated districts. The San Luis valley has very light rainfall, but an abundant water supply for irrigation is derived from the Rio Grande del Norte and its tributaries. The average altitude is more than 7,500 feet, which limits the range of crops grown;

but the fertile soil, abundant water supply and good climate make this valley one of the finest general farming and stockraising districts in the state. The San Juan basin is a region of from moderate to heavy rainfall, having a considerable area of irrigated land in the river valleys and much good non-irrigated agricultural land on the higher mesas. This is also an excellent stock-raising district. The valleys of the Colorado, Gunnison, Uncompahgre and other rivers and smaller streams of the Colorado river basin contain the principal fruit-growing areas of the state, as well as a large amount of the fine general agricultural land. The rainfall in this area is generally inadequate for farming without irrigation, but the water supply is adequate for all land that can be irrigated, and recently farming without irrigation has been undertaken successfully on some of the higher mesa lands, where rainfall is somewhat heavier than in the valleys. The northwest part of the state is less developed than any other district, chiefly because of lack of transportation facilities, but it contains some of the best agricultural and grazing land in Colorado. The mineral area is very extensive, but the principal producing areas are somewhat restricted and are outlined in tables published elsewhere in this volume.

Early History—That part of Colorado lying east of the Rocky mountains was included in the territory acquired by purchase from France in 1803, usually referred to as the Louisiana Purchase. All the southeastern part of the state, lying south of the Arkansas river, and a narrow strip extending north through the mountain district into Wyoming, was claimed by the state of Texas and became a part of the United States when Texas was annexed in 1845. This included a considerable amount of the territory belonging to the Louisiana Purchase, but the controversy regarding the northern boundary of Texas was settled long before Colorado became a state. The western part of what is now Colorado and an additional strip lying west and south of the Rio Grande del Norte was ceded to the United States by Mexico in 1848, following the war with Mexico. The actual settlement of Colorado began with the discovery of gold in the summer of 1858, at which time most of the eastern half of the state was included in Kansas territory under the name of Arapahoe county. The boundaries of this county were very

imperfectly defined, and the settlers in the new gold camps, moreover, objected to being governed by a set of territorial officials 400 miles away. They appealed to the federal government for the organization of a new state or territorial government, and finally, in February, 1861, the territory of Colorado was organized, about a month after statehood had been conferred upon the territory of Kansas. The boundaries of the territory were substantially the same as are those of the state at present. In 1876 Colorado was admitted to the Union as the thirty-eighth state.

Population—The population of Colorado has increased steadily and rapidly since its actual settlement began immediately following the discovery of gold in 1858. The following table shows its growth from 1860 to the present time, as compared with the growth for the entire country, all figures being taken from census reports:

Year	Population	Pct. of Increase Over Previous Census	Pct. of Increase For United States
1860.....	34,277
1870.....	39,864	16.3	22.6
1880.....	194,327	387.5	30.1
1890.....	413,249	112.7	25.5
1900.....	539,700	30.6	20.7
1910.....	799,024	48.0	21.0
1920.....	939,629	17.6	14.9

During the two decades following 1860, the population was confined largely to the mining districts and to the city of Denver. The cities of Pueblo, Colorado Springs and Trinidad did not make their appearance in the census population statistics until 1880, when the three had a combined population of less than 10,000. During the early 80's the period of agricultural development began and the decade ending with 1890 was in many ways the most important in the history of the state. During that period 24 new counties were organized and scores of new towns were laid out in the agricultural districts. The percentage of increase in population dropped off materially in the succeeding decades, but remained considerably greater than the percentage of increase for the country at large. In 1910 the density of population for the state was 7.7 per square mile, as compared with 30.9 for the United States. Denver county ranked first in this respect, with 3,679, and Dolores and Jackson counties were tied for last place, with 0.6. The 1920 census showed the density of population for the state to be 9.06 per square mile. Denver still holds first place in this

respect, with 4,422.26, and Jackson county ranks last, with 0.81. The rural population in 1910, including all people except those living in incorporated places of 2,500 population or more each, was 394,184, or 49.3 per cent of the total. The rural population as shown by the 1920 census was 486,370, or 51.76 per cent of the total. In 1910 the foreign-born white population was 15.9 per cent of the total, the principal foreign nationalities then being, in the order named, as follows: German, Italian, Russian, Austrian, English, Swedish, Canadian, Irish and Scotch. In 1920 the foreign-born white population was 12.4 per cent of the total, the principal foreign nationalities being Russian, Italian, German, Mexican and Swedish.

Land Classification—A table published elsewhere in this volume gives a classification of the 66,341,120 acres of land in the state as far as is practicable from available records. It is divided into 63 counties, of which Denver county is the smallest, with an area of 37,120 acres, and Las Animas county is the largest, with 3,077,760 acres. The records of the several county assessors showed a total of 33,347,491 acres of patented land on the tax rolls in 1923, including railroad rights of way and town and city lots and not including state land that has been sold but for which patent has not yet been issued. The records of the federal and state governments at the same time showed a total of 24,339,611.18 acres of non-patented land included in the national forests, homestead areas, national parks and monuments, Indian lands and state lands. From these records it is apparent that 50.26 per cent of the state's area consists of patented land, 36.84 per cent of state, federal and Indian land, and the remainder, amounting to 12.9 per cent, is principally unclassified as to ownership. This includes about 750,000 acres of state land that has been sold but not yet fully paid for, and approximately 1,500,000 acres of government land temporarily withdrawn from homestead entry for various reasons. The remaining unclassified area consists principally of homestead land that has been filed upon but not yet proved up and therefore not yet appearing on the tax rolls. In the five years ending with July 1, 1923, something more than 5,500,000 acres of homestead land has been filed upon under the various public land acts, comparatively little of which has been patented. In addition to this some of the land originally

entered more than five years ago has not yet been patented, for the reason that it has been relinquished one or more times and the present holders have not had it long enough to obtain patents. In the mining counties there is some mineral land that has been filed upon under the mineral land laws but not yet patented. In three counties, Archuleta, Hinsdale and Lake, the amount of land shown in the various classifications is slightly more than the areas of these counties, as reported from government surveys. These discrepancies are perhaps due chiefly to inaccuracies in surveys, as considerable portions of the mountainous areas of the state have not yet been accurately surveyed, and all these counties contain mountainous areas. Of the land in private ownership in 1923 over 31,000,000 acres is classified as agricultural land. Of this amount 30,129 acres is producing fruit land, 2,286,592 acres is being farmed under irrigation and 271,988 acres is natural hay land. As all the orchards and most of the natural hay land are irrigated, the total amount of land classified for taxation purposes as irrigated amounts to something more than 2,585,000 acres, though the amount of land in the state for which water is actually available is considerably more than 3,000,000 acres. The non-irrigated farming area of the state is placed by the assessors at 11,167,030 acres, and 18,008,349 acres is classified as grazing land, much of which will eventually be placed under cultivation. These classifications include some waste and desert areas of no real value for agricultural purposes. The remaining privately owned area is principally patented mineral land, railroad rights of way, and town and city lots.

Drainage and Water Supply—Containing, as it does, the most elevated portions of the Rocky mountains, Colorado is quite naturally the source of many of the important streams in the west. The continental divide crosses the west-central part of the state, and the streams in the western part flow to the Pacific, while those in the east find their way to the Gulf of Mexico. The streams of the western slope are all tributaries of the Colorado river, from which this state derives its name. The Colorado (Grand) river, the largest stream in the state, has its source in Grand county. The Green river, which was regarded as one of the two streams forming the Colorado when the upper course of the Colorado was called the Grand river, flows through the north-

western corner of Moffat county. The northwestern corner of the state is drained by tributaries of the Green river, chief of which are the Yampa (Bear) and White rivers. The principal tributary of the Colorado river is the Gunnison, which has its source in Gunnison county and enters the Colorado at the city of Grand Junction. The southwestern corner of the state is drained by the San Juan and Dolores rivers, both tributaries of the Colorado. The south-central part of the state, including the San Luis valley, is drained by the Rio Grande del Norte. The southeastern part is drained by the Arkansas river and its tributaries, and the northeastern part by the South Platte river. The North Platte river has its headwaters in Jackson county and unites with the South Platte in Nebraska to form the Platte river. The Republican river, a tributary of the Kansas, drains a considerable area in the eastern part of the state. These streams have hundreds of small tributaries, most of which have their sources in the mountains where the snowfall is heavy. They furnish the principal water supply for irrigation and for the development of hydro-electric power. Water for domestic purposes is obtained principally from these streams, but in most agricultural sections wells are utilized as a secondary source of domestic water supply. Most of these wells are pumped, but there is a well-defined artesian belt in the San Luis valley, and artesian water is found in numerous other places. There are more than 8,000 artesian wells in the state, fully two-thirds of which are in the San Luis valley.

National Parks and Monuments—

There are two national parks and three national monuments in Colorado. Rocky Mountain national park, with an approximate area of 254,327 acres, lies in Larimer, Boulder and Grand counties, and includes some of the most picturesque portions of the Rocky mountains. It is one of the newest of the national parks, having been created by an act of congress, approved January 26, 1915. Its highest point is Longs peak, 14,225 feet, and there are within its boundaries thirteen other mountain peaks more than 13,000 feet above sea level. It is the most accessible of the large western parks, and this fact, together with its wide range of picturesque mountain scenery and its delightful climate, has made it the most popular of the nation's great public playgrounds. The report of the secretary of the interior places the

number of visitors to this park in 1915 at 31,000. The following year the number had increased to 51,000, and in 1917 it was 117,186. The nearest approach to this was recorded at the Mount Ranier national park, which had 35,568 visitors in 1917. In 1923 the number of visitors in the Rocky Mountain national park was about 218,000. Mesa Verde national park is located in Montezuma county and is especially noted for the ruins of homes and villages of the ancient Cliff Dwellers, supposed to have been the earliest inhabitants of this part of the continent. Travel to this park has increased very materially in the past few years, as the result of the construction of good highways leading to it. It was established by an act of congress June 29, 1906. Its area is 48,966 acres. The Colorado national monument, in Mesa county, near Grand Junction, was established by presidential proclamation on May 24, 1911. Its area is 13,883 acres. The site is in a picturesque canon which has long been a popular scenic feature of that part of Colorado. The formation is similar to that of the Garden of the Gods at Colorado Springs, but it is generally conceded to be much more picturesque. There are many caverns in the monument, several of which have not yet been explored. Wheeler national monument, located in Mineral county, northeast of Creede, was established by presidential proclamation on December 7, 1908. Its area is approximately 490 acres. It is especially noted for its weird and very picturesque rock formation, unlike anything found elsewhere in Colorado. Hovenweep, an Indian name meaning "Deserted Valley," is the third of Colorado's national monuments. It was established by presidential proclamation on March 2, 1923, and is situated on the Colorado-Utah line in western Montezuma county, its area of 285 acres lying partly in Colorado and partly in Utah. It contains four remarkable groups of ruins similar to those found in Mesa Verde park.

Industries—The principal industries of the state are agriculture, stock-raising in its various branches, dairying, bee-keeping, manufacturing, mining, quarrying, lumbering and commerce. These are treated in detail elsewhere.

Climatological Data—As a result of its great size and the extreme irregularity of its surface, the climate of Colorado is wonderfully varied and cannot be described in detail here. Various tables contained in this publi-

cation show the most important climatic data for different sections of the state. The mean annual temperature for the entire state is 44.3 degrees, but it varies from about 31 degrees in some of the higher mountain districts to 52 degrees in parts of the Arkansas valley. The average annual precipitation for the state is 17.54 inches, but there is also a very wide range here in the different sections of the state. The lowest average precipitation is about 6.5 inches, in the San Luis Valley, and the highest above 40 inches, in the San Juan mountains and a few other mountain districts of restricted areas. The delightful and wonderfully healthful qualities of Colorado's climate are well known throughout the country. The tables before referred to show that the rainfall is comparatively light in all sections of the state and the percentage of sunshine is very high. The range of temperature is wide. The amount of moisture in the air is always low, and as a result the unpleasant effects of extremely low or high temperatures are greatly modified. The normal relative humidity ranges from 45 to 60 per cent, being lower than in any other state except Arizona. The high altitude is another important factor in governing climatic conditions in the state. As a result of this high altitude and the correspondingly low atmospheric pressure, impurities in the air are quickly dissipated and the depressing effects common at low altitudes, especially during periods of warm, damp weather, are entirely foreign to this state.

Railroads, Telegraph and Telephone Facilities—There are 31 railroad companies represented in Colorado, operating an aggregate of 5,088.69 miles of main line track. Every county in the state except Baca county has some railroad mileage, though the railroad facilities of some other counties, particularly in the northwestern and southwestern parts of the state, are inadequate. The total value of railroad property in the state, as returned by the state tax commission for the year 1923, was \$160,693,730. The following table shows the main line tracks owned by the several railroad companies:

Road	Mileage
Atchison, Topeka & Santa Fe Railway Company	505.62
Chicago, Burlington & Quincy Railroad Company	395.39
Chicago, Rock Island & Pacific Railroad Company	165.83
Colorado Railway Company	108.49
Colorado-Kansas Railroad Co.	22.20

Road	Mileage
Colorado, Wyoming & Eastern Railway Company	43.88
Colorado & Southern Railroad Co.	729.15
Colorado & Southeastern Railroad Company	6.27
Colorado & Wyoming Railroad Company	42.65
Crystal River Railroad Company ..	20.66
Crystal River & San Juan Co.	7.32
Denver & Inter-Mountain Railroad Company	15.10
Denver & Interurban Railroad Co.	9.48
Denver & Rio Grande Western Railroad Company	1,504.33
Denver & Salt Lake Railroad Co.	252.00
Great Western Railway Company ..	86.84
Greeley Terminal Railway Co.	1.60
Manitou & Pikes Peak Railway Company	8.70
Midland Terminal Railroad Co.	56.30
Missouri Pacific Railroad Co.	152.11
Northwestern Terminal Railway Company	3.18
Rio Grande Junction Railway Co.	62.08
Rio Grande Southern Railroad Company	171.16
San Luis Central Railroad Co.	12.21
San Luis Southern Railway Co.	31.53
Silverton Railroad Company	10.50
Silverton, Gladstone & Northerly Railroad Company	7.30
Silverton Northern Railroad Co.	8.00
Treasury Mountain Railroad Co.	4.00
Utah Railway Company	50.80
Union Pacific Railroad Company ..	582.51

Several of the companies above named operate extensively under leasing arrangements over tracks owned by other companies.

Ninety-seven telephone companies operate in the state, owning an aggregate total of 371,700.52 miles of telephone line. This is an increase of more than 38,000 miles over the amount reported to the tax commission for 1922. The valuation of all property owned by these companies, as returned by the state tax commission for the purposes of taxation in 1923, was \$13,544,500. Most of these companies are small and operate in but one or two counties. The Colorado and Eastern Telephone and Telegraph company operates in fifteen counties in the eastern part of the state, and the Mountain States Telephone and Telegraph company operates its own lines in all but two counties in the state, Baca and Dolores, and has a total of 361,330 miles of line in Colorado. Four telegraph companies operate a total of 27,723.59 miles of line in the state. Five counties, Baca, Hinsdale, Jackson, Moffat and Rio Blanco, had no telegraph lines in operation when reports were made to the tax commission for 1923. A table published elsewhere in this volume shows the mileage of railroad, telephone and telegraph lines in the various counties of the state as returned to the state tax commission for 1923.

Colorado State Land

WHAT is popularly known as state land in Colorado and other western public land states comprises the various areas turned over by the federal government to the state governments under general acts of congress and sundry special statutory grants, to be administered for the particular state interests in those states for which the grants were made. The most important of these grants were made under an act of congress passed in 1875, the year before Colorado became a state, by which the United States gave to each of the public land states an amount of land equal to one-eighteenth of the area of the state, for the benefit of the public schools. This is known as school land and quite generally in public land states all state land is referred to as school land, though various grants were made to the states for purposes in no way connected with the schools. The various grants made to Colorado, with the purposes for which made and the area acquired under each, are as follows:

	Acres
Public Schools	3,757,224.19
Agricultural College	89,991.18
Internal Improvements	499,789.96
Penitentiary	31,345.49
Public buildings	31,904.62
University	45,844.43
Reformatory	520.00
Saline lands	18,830.22
Total.....	4,475,450.09

The original school land grant gave to the state sections 16 and 36 in every township. As there were large Indian reservations and extensive private land holdings in Colorado at the time the grant was made, the state was permitted to select other public lands in lieu of those within these reservations and private holdings. As a result, the state acquired large blocks of land in various localities, sometimes almost entire townships. When the national forests were created the state also exchanged considerable areas of state land within the forest boundaries for government land in other localities. By the terms of the grants from the government the funds derived from the sale of school land constitute a permanent school fund, only the interest and the revenue derived from the administration of unsold land being available for use. The total amount of state land sold up to December 1, 1923, excluding all cancellations, was 1,483,760.91 acres, leaving 2,991,689.18 acres

of state land unsold. Because of the low prices of farm products during the past year or so, the acreage of state land unappropriated is but a little less this year than last, due to cancellations of sales previously made.

The state lands are administered by the state board of land commissioners. State lands are leased and sold under regulations made by the board, which may be obtained from that body upon application. Leases are made for grazing purposes, for agriculture, for oils, minerals, etc. Before state lands can be sold, they must be appraised by representatives of the board and the applicant must agree to pay the price fixed by the appraiser. The land is then sold at public auction, selling at or above the appraised price. No state lands may be sold at less than \$3.50 an acre. Leases are made much in the same way, minimum prices being fixed at which state lands may be leased for various purposes.

Of the 2,991,689.18 acres of state land in Colorado, approximately 473,732 acres is coal land, according to estimates made by the mineral superintendent of the state land board. This is the most valuable asset owned by the state, practically all of which was granted to Colorado by the federal government for the benefit of the public school system. The value of this land is estimated at approximately \$100,000,000. It is distributed through nearly every coal-bearing district in the state as follows:

Canon City District	Total Acres
Fremont county	1,960
Northern Coal Fields	
Adams county	9,600
Arapahoe county	9,080
Boulder county	760
Denver county	1,920
Douglas county	13,180
Filbert county	30,020
El Paso county	44,700
Jefferson county	1,820
Weld county	75,560
Southern Coal Fields	
Huerfano county	11,400
Las Animas county	33,360
Yampa Coal Fields	
Moffat county	120,400
Routt county	69,720
Miscellaneous	
Archuleta county	732
Grand county	2,960
Gunnison county	3,440
Jackson county	25,080
La Plata county	9,960
Montezuma county	4,160
Park county	3,880
Total coal area.....	473,732

The estimates of the acreage and distribution of state coal lands are based on the reports of the United States geological survey. It is assumed that a very large percentage of the coal acreage will not be found to contain workable coal, and the estimates of value are based on this assumption. Government appraisers have placed the value of public coal land in Colorado at from \$100 to \$400 per acre, depending on the character of the deposits and their accessibility. The value of state coal land has been estimated at a little more than \$200 per acre, which is generally conceded to be very conservative.

Only a small amount of state coal land has ever been sold as such by the state board of land commissioners. When state land is sold for agricultural purposes the state reserves all coal that may underlie it. The revenue derived by the school fund from this land comes from rentals on non-operative coal leases and from royalties on producing leases. During the biennial period ending November 30, 1922, there was a total of 17,114.45 acres of coal land leased by the state,

the revenue from which during the period was \$141,306.73. For the purpose of illustrating the development that is being made of state coal lands it may be stated that the revenue derived by the state from rental of and royalties on state coal land during the biennial period ending November 30, 1916, was \$89,865.30, and for the preceding biennial period \$81,088.56. The coal leases are granted for a period of five years and require a minimum royalty of 10 cents a ton run of mine upon at least 1,000 tons annually, whether any coal is mined at all or not, and 10 cents a ton on all coal in excess of an amount sufficient to produce the minimum annual rental.

From the figures given above it will be seen that only a very small percentage of the coal land owned by the state is under lease. This, of course, is due to the fact that most of it lies at a considerable distance from any railroad and cannot be worked profitably under existing conditions. The most important producing leases are located in the Canon City, Northern and Southern coal fields, in Fremont, Las Animas, Huerfano and Weld counties.

Homestead Land

 ON JULY 1, 1923, there was 7,753,129 acres of unappropriated homestead land in Colorado, of which 6,131,339 acres was surveyed and opened to immediate entry. Four years previous the area of homestead land unappropriated was 10,062,078 acres. There was a small amount of withdrawn land restored to entry during the twelve months ending July 1, 1923, and a considerable amount of land applied for in tracts larger than 320 acres under the grazing homestead act, which applications were not allowed. This resulted in a considerable apparent increase in the amount of homestead land during the twelve months, and in a measure accounts for the comparatively small decrease in the amount of homestead land available on July 1, 1923, as compared with July 1, 1922, the actual decrease being only about 200,000 acres. The amount of land actually filed upon during the past twelve months was approximately 500,000 acres, which is considerably less than that filed upon during the preceding year. A considerable amount of land has been restored to entry since July 1, 1920, and a larger amount which was filed upon in tracts larger

than 320 acres has not been classified as open to entry under the grazing homestead act, with the result that filings in excess of 320 acres have been restored to entry.

Nearly one-third of this homestead land lies in two counties in the northwestern part of the state, Moffat and Rio Blanco counties. It is in the Glenwood Springs land district and is classed by the officials of the land office as farming, grazing and mineral land, with no information given as to what portions belong to each of the three classifications. Practically all of it is from 25 to 90 miles from any railroad. Somewhat more than one-third of the homestead land of the state, approximately 3,000,000 acres, lies in the mountainous or semi-mountainous counties, at an altitude above 7,000 feet. Most of this is primarily useful for grazing purposes or for minerals it may contain. Small areas of agricultural land are to be found in the large homestead areas of these mountain counties, but practically all the land suitable for farming that lies within a reasonable distance from a railroad has been filed upon. About 200,000 acres of homestead land

is to be found in the 25 counties lying east of the mountains. Perhaps not to exceed 10 per cent of this amount is suitable for farming, and nearly all of it is very small tracts, much below the size of a government homestead. It is safe to say that a dozen desirable full 320-acre government homesteads could not be found in this section of the state. The remainder of the available homestead land, somewhat less than 3,000,000 acres, is widely scattered over the western part of the state. A considerable amount of it is good farming area, but nearly all of it lies from 15 to 40 miles from any railroad. The rainfall in some sections is not sufficient to produce good crops without irrigation, and no definite plans for its reclamation by the government have been announced.

In addition to these withdrawals, there are a few comparatively small tracts withdrawn under what is known as the Carey act. These tracts are turned over by the federal government to the state and are administered by the state land board pending the construction of irrigation systems. But one Carey act irrigation system has been completed in Colorado, that being a small system watering about 15,000 acres in the neighborhood of Two Buttes, in northern Baca county. The accompanying table shows the amount of homestead land, by counties, open to entry in the various land districts of the state on July 1, 1923:

HOMESTEAD LAND OPEN TO ENTRY JULY 1, 1923

Del Norte Land District

Colorado Water Power

ONE of the most valuable of Colorado's natural resources is water power. Although the volume of water carried in the streams of the state is generally comparatively small, most of these streams have their sources at high altitudes and a vast amount of power is developed as they descend over precipitous courses from the mountain sides to the plains below. The principal river systems having their origin in the state and developing sufficient water power to be utilized commercially are: The Colorado, on the western slope, the principal tributaries of which are the Yampa, White, Grand, Gunnison, Dolores and San Juan; the Rio Grande, in the south, draining the San Luis valley; the Arkansas, in the southeast, and the Platte, in the northeast. These streams have scores of comparatively small tributaries rising in the mountains, which drop from 1,000 to 6,000 feet in their courses. There is considerable variation in the amount of power available in these streams, due to the fact that the volume of water they carry differs widely at different seasons of the year. A maximum development could be obtained only through the storage of water in reservoirs during the flood seasons, so that a uniform flow of water could be obtained through the year. The following figures, taken from reports of the United States geological survey, furnish a good idea of the immense amount of water power available for commercial use in the state:

Minimum horsepower available from direct stream flow.....	828,500
Horsepower available from storage of water.....	2,568,200
Minimum horsepower from direct flow and storage.....	3,396,700
Maximum horsepower available during flood seasons.....	4,241,300

According to the report of the National Conservation commission, made in 1908, the total hydro-electric energy developed in the entire country at the time was 5,356,680 horsepower, and the total development in Colorado was 78,878 horsepower. Since that time the development in some parts of the country has been very marked, but the total horsepower now in use is less than three times the maximum amount available in the state of Colorado. Water power development in this state since 1908 has been slow, due largely

to the withdrawal from entry of many of the best power sites, which are on government land. After working for several years in perfecting it Congress has now passed an act regulating the leasing of government power sites, and development of water power in all sections of the country has been given renewed impetus through the definite settlement of questions of policy relating to the development of water power in navigable streams and interstate streams. In Colorado several new power enterprises have been undertaken since the new law became effective and permits have been granted for a number that have done nothing so far in the way of construction. Further development of water power on the Colorado river, the largest stream in the state, is delayed to some extent by the fact that the compact between the several states interested and the federal government regulating the development of water power and irrigation on this stream, which has been in process of formation for some years, has not yet been fully ratified.

In 1919, when the latest detailed inquiry of the census bureau into manufacturing development was made, the factories of Colorado were using but 194,634 horsepower of energy in their operations. Of this amount only about 60,000 horsepower was electric and not all of this was hydro-electric. The total development of hydro-electric energy in the state at this time is probably not in excess of 125,000 horsepower, much of which is being utilized in operating street lighting systems, street railways and traction lines and in furnishing power for the operation of mining machinery in metal and coal mines. Figures from the partial census of manufacturing for 1921 are not yet available.

Much of the electric energy for street lighting in Denver is generated nearly 200 miles from the city, at the town of Shoshone, Garfield county, and is carried across the range by high voltage transmission lines. This example is cited to show the possibilities for the distribution of hydro-electric energy, and should be conclusive evidence that the power generated from the streams in the most remote parts of the state can be utilized profitably in the development of manufacturing and other industries in the cities and more thickly populated rural districts.

The need for further development of water power occasioned by the war demand for greatly increased production from the country's factories has emphasized anew the manufacturing possibilities of the Rocky Mountain west, where raw materials of nearly all kinds are abundant, and where hydroelectric energy can be developed in

large volume, at comparatively small expense. The people of Colorado are keenly alive to the wonderful possibilities in this direction offered in the Centennial state, and there is every indication that considerable investments in the development of water power in the state may be expected in the immediate future.

Irrigation in Colorado

FARMING under irrigation began in Colorado almost as soon as gold mining. Its development was not very rapid in the beginning but it was steady and persistent, and today the value of the annual output of the state's irrigated farms is more than ten times as great as that of its gold mines.

David K. Wall, one of the pioneer agriculturists of the state, farmed a two-acre tract of land at Golden in 1859, which he irrigated by direct flow from one of the small tributaries of Clear creek. His experiment proved so successful that he increased his irrigated area to eight acres the following year. Again he was very successful and the story of his success spread rapidly.

It was not until about 1870, however, that large community irrigation enterprises began to be undertaken. Up to this time only short ditches had been in operation, carrying water directly from the streams to the low lands lying in the narrow creek and river valleys. Most of these pioneer irrigation systems were individual enterprises, watering from 10 to 100 acres each. With the new era of development, large community enterprises were undertaken and ditches were constructed that carried water to the fertile uplands, far back from the narrow valleys. Irrigation on a large scale was first undertaken in the Greeley district, in northern Colorado, the water being taken from the South Platte river and its tributaries. The undertakings were generally successful and other districts immediately followed the example of northern Colorado. In 1889, when the United States census bureau made its first detailed report on irrigation enterprises, Colorado ranked second among the states in irrigation development, with 890,775 acres of land under ditch. California was first at that time, with 1,004,223 acres irrigated.

The two decades following 1889 witnessed Colorado's greatest irrigation development. In 1899 the census bureau found that this state had taken first rank, with 1,611,271 acres of irrigated land, an increase of 80.9 per cent over the acreage irrigated in 1889. California, in the meantime, had shown an increase of but 44 per cent, having a total irrigated area of 1,445,872 acres. In 1909 Colorado still ranked first with 2,792,032 acres under irrigation, and California second, with 2,664,104 acres. In 1919 Colorado ranked second and California first.

Completed irrigation enterprises in this state at present are capable of watering approximately 3,900,000 acres of land, and the total amount spent on all irrigation enterprises to the beginning of 1920 was in excess of \$88,000,000. The accompanying table gives important irrigation statistics as compiled by the United States census bureau for 1919 and 1920:

Irrigation in 1919

Number of farms irrigated in 1919	28,756
Acreage irrigated in 1919.....	3 348,385
Acreage enterprises were capable of irrigating in 1920	3,855,348
Acreage included in irrigation projects in 1920.....	5,220,588
Main ditches—number, 1920....	8,867
Length, miles	19,022
Laterals—Number, 1920	6,185
Length, miles	8,571
Reservoirs—Number, 1920	979
Capacity, acre-feet	2,406,372
Flowing wells—Number, 1920..	476
Capacity, gallons per minute	20,139
Pumped wells—Number, 1920..	527
Capacity, gallons per minute	210,094
Pumping plants — Number, 1920	406
Capacity, gallons per minute	299,726
Average lift, feet.....	23
Cost of irrigation enterprises up to January 1, 1920.....	\$88,302,442
Estimated final cost of existing irrigation enterprises....	\$95,198,423

In 1909 62.7 per cent of the area cultivated in Colorado was irrigated. Since that time there has been a comparatively small increase in the irrigated acreage, but a very large increase in the cultivated acreage of non-irrigated land. In 1919 the irrigated acreage was about 38 per cent of the entire acreage cultivated, and in 1921 it was only about 30 per cent. The percentage is decreasing each year as the acreage of non-irrigated land under cultivation in the state increases. In 1909 the value of crops grown on irrigated land was 79.6 per cent of the value of all crops grown in the state, while in 1919 it was only a little more than 50 per cent.

It will be noted from a comparison of the reports of the census bureau for 1909-10 and for 1919-20 that there was an increase of 19.9 per cent in the acreage of land actually irrigated in the decade between the two reports, but a loss of 3.4 per cent in the acreage completed enterprises were capable of irrigating and a loss of 11.8 per cent in the acreage included in irrigation enterprises. The report for 1910 showed 3,990,166 acres capable of being irrigated in 1910, compared with 3,855,348 acres capable of being irrigated in 1920. This apparent decrease is due very largely to a discovery after irrigation systems had been put into operation that they would not irrigate as many acres of land as they were intended to irrigate when first constructed. In some cases this was due to the fact that less water was available than preliminary estimates indicated and in other cases more water was required for the irrigation of a given acreage than it was thought would be required. It was found that several irrigation enterprises completed before the beginning of 1910 did not have nearly as much water as it was thought they had, this being especially true of enterprises on the east side of the mountains that were built to use flood waters. The same facts account to a certain extent for the decrease in acreage included in irrigation enterprises in 1920 as compared with 1910. The report for 1910 showed 5,917,457 acres of land included in all irrigation enterprises in the state, while that for 1920 showed but 5,220,588 acres. A part of this decrease also was due to the facts that many small enterprises have been abandoned since 1910 and parts of a considerable number of large enterprises have been given up for one reason or another.

The period between 1910 and 1920 was very unfavorable for large irrigation development in Colorado and few new enterprises were undertaken, while many of the older ones were partly or wholly abandoned. A great many enterprises already under way were completed, however, which accounts for the substantial increase in irrigated acreage in 1920 as compared with 1910.

But the acreage irrigated in 1919 was considerably more than the acreage cultivated under irrigation, as shown by the report of the census bureau on cultivated areas in Colorado. This report showed 1,923,950 acres cultivated under irrigation in 1919, exclusive of orchards. Of course there was a considerable amount of irrigated land previously cultivated that was lying fallow that year and a considerable acreage devoted to pasture, which is not listed in the crop acreage report. It is evident, however, that the irrigated acreage reported includes a considerable amount of land that has never been under cultivation. The census bureau reported 1,581,394 acres of land cultivated under irrigation in the state in 1909, exclusive of orchards, and such information as is available indicates that very little more than 2,000,000 acres of irrigated land has ever been cultivated in the state in any one year.

An inquiry made by the immigration department early in 1919 indicated that there is in the state a very considerable acreage of land for which water is available that has never been under cultivation and the census figures bear out this indication. According to the census report there is more than 500,000 acres capable of being irrigated by existing systems to which water has never been supplied, and there also is nearly as large an acreage reported as irrigated that has never been actually placed under cultivation. It also appears that a full development of irrigation in the state, with the use of all available water that can be applied to land without prohibitive expense, will bring the irrigation of practically twice as much land as has ever been actually watered.

A special committee appointed at the suggestion of the Colorado Council of Defense in 1918 reported to the members of the Twenty-second General Assembly that there was special need for some sort of supervision over the financial affairs of many of the irrigation districts organized under the

state irrigation laws. As a result of this report a law was enacted providing for the creation of a commission to co-operate with those financially interested in the various irrigation districts, including bondholders as well as landholders, in an effort to straighten out some of the financial tangles that have interfered with the completion of the irrigation systems undertaken in many of these districts. This commission was appointed and during 1919 and 1920 framed a bill for an amended irrigation district law, which was enacted with some amendments by the Twenty-third General Assembly in 1921. A number of other important irrigation measures were enacted in 1921, among them a series of laws providing for co-operation between Colorado and other states of the Colorado river basin in settling controversies among the states of this basin over the use of its waters for both power and irrigation. Such laws were passed by the other states of the basin and commissioners were appointed to represent each state and the federal government. The commission thus created was organized and has practically completed its work with the submission of an agreement or compact between the states interested and the federal government. The compact has now been ratified by all the states except Arizona. Present indications are that Arizona will persist in its refusal to ratify and it may become necessary to modify the compact somewhat before complete ratification can be obtained.

For the purpose of making it possible to secure comparative statistics of any value concerning the development of irrigation in Colorado, the law relating to the administration of the public waters of the state is in need of material amendment. Under the law as it now stands the state engineer has no authority by which he can compel the commissioners of the various districts to render accurate reports each year on the various phases of irrigation development which are of vital interest to the state and the country at large.

By reason of that condition it is impossible to secure from the biennial reports of the state engineer any authoritative comparative data by which the development of irrigation may be traced. The amount of irrigation and storage water used on the irrigable

land of the state varies materially from year to year, being governed largely by precipitation and other climatic conditions. This information, together with the capacity of ditches and reservoirs, the number of acres irrigated and the number of miles of main and lateral ditches, should be prepared each year by the commissioners and submitted to the state engineer for compilation.

For the purpose of administering the waters, the state is divided into six divisions, each in charge of a division engineer; the divisions in turn are divided into districts, of which there are 69 in the state, each in charge of a water commissioner. The state engineer is appointed by the governor, subject to civil service regulations; the division engineers are appointed by the governor, with the approval of the senate, and the water commissioners are appointed by the governor upon the recommendation of the county commissioners of the counties included in each district, all subject, of course, to civil service regulations prescribed by constitutional amendment and by statute, after the acts designating methods of appointing these officials were passed. As will be seen, the system confers upon the state engineer no authority which he can enforce. Partly as a consequence of this condition the records in the office of the state engineer are of less value than they would be had that official authority to require the collection and compilation of accurate information by each commissioner each year.

Reports of all county assessors for 1923 showed a total of 2,286,592 acres of irrigated farm land in the state and 30,129 acres of orchards, practically all of which are irrigated. In addition to this the same records showed 271,988 acres of natural hay land, a very large percentage of which is irrigated. These figures include approximately all the land that is actually being cultivated under irrigation, though not all for which irrigation water is available. Competent authorities estimate that there has been close to 1,000,000 acres of irrigated land in the state so damaged from over-irrigation, combined with lack of proper drainage, that it is not now producing to anything like its former capacity and much of it is not now being cultivated at all.

Agriculture

FOR more than a quarter of a century following the discovery of gold in the mountains west of where Denver now stands Colorado was known to the industrial world almost exclusively through its metal mines. It was a leader among the states in the production of gold and silver, but its agricultural output was almost negligible. The eastern part of the state was classed as desert land, and the reclamation of the river valleys by means of irrigation was just begun. The natural result is that Colorado is still best known in other parts of the country as a mining state, though the annual value of the output of its farms today, including livestock, poultry and dairy products, is nearly four times that of its mines and quarries.

It is not the purpose of this volume to enter into any extended discussion of the development of agriculture or of any other industry that has grown up in the state. A few figures will be given from census reports, however, for the purpose of illustrating the rapidity with which farming developed in Colorado after it was demonstrated that it could be carried on profitably. The principal crops grown in the state on which acreage reports have been returned to the census bureau each decade, beginning with 1879, are corn, oats, wheat, barley, hay, forage and potatoes. The following table shows the acreage devoted to these crops as returned to the census bureau in five census reports:

Year	Acres
1879	211,936
1889	859,429
1899	1,519,395
1909	2,388,749
1919	4,701,524

From this tabulation it will be seen that the acreage devoted to these crops was more than twenty times as great in 1919 as it was in 1879. In 1923 the area devoted to these same crops was considerably greater than that in 1919. In the past decade, which has been the period of greatest agricultural development in the state's history, the area devoted to these crops has doubled. In addition to this there has been a very substantial increase in the acreage devoted to field peas, sugar beets, field beans, melons, truck and seed crops and a few other crops not included in the above acreage figures.

Under a law enacted by the Twenty-second General Assembly early in 1919 county assessors are required to collect annually for the state immigration department a large amount of information regarding agricultural operation, including the acreage cultivated to all crops each year. The work was first undertaken in 1919, assessors being furnished blanks for obtaining reports on the acreage of all crops planted for the 1919 harvest. These blanks are prepared jointly by the state immigration department, the agricultural statistician for Colorado of the division of livestock and crop estimates of the United States bureau of agricultural economics and the Colorado Agricultural college. All county assessors obtained remarkably complete reports on these schedules in 1919, considering the short time available for preparation, as the law was signed less than a week before the annual property assessment was begun and it requires that all agricultural data be gathered when the property assessment is being made. The reports have shown an improvement each year since 1919.

Tables printed elsewhere in this volume show the acreage devoted to all important crops grown in the state in 1923, by counties, as reported by county assessors, and the production by counties for the most important crops, as calculated by the immigration department for the State Co-operative Crop Reporting Service. It is believed that this information will be found especially valuable to all interested in the production, movement and marketing of farm crops, since it has never before been available by counties except for census years, and then not until more than a year after the crop reported upon had been harvested.

The same law referred to above provides for co-operation between the state immigration department and the division of livestock and crop estimates of the United States bureau of agricultural economics in collecting, compiling and publishing information relating to acreage, condition and production of all crops. Under the authority thus granted the immigration department has entered into a contract with the United States department of agriculture specifying the manner in which this work shall be done and authorizing the establishment of the Colorado

Co operative Crop Reporting Service, which publishes monthly bulletins showing the progress and development of all crops from planting time to harvest.

Through this service accurate information is available showing the production of all important crops by counties and of all farm and orchard crops for the state as a whole. Elsewhere in this volume will be found, in addition to the agricultural tables mentioned above, a table showing the acreage and production of all crops for 1923 and 1922, and the values of these crops, according to prices prevailing on or about December 1 of each year. It is the purpose of the Crop Reporting Service to maintain a uniform set of statistical agricultural production tables from year to year, so that it will be possible in the future to trace the agricultural development of the state and of each county in the state, a thing which has not before been possible in Colorado with available records. In the past accurate statistics of agricultural production were collected only once in ten years, by the census bureau. Reference to these figures will give some idea of the rapidity with which agriculture has been developed in Colorado. The federal census bureau found the value of all crops grown in the state in 1899 to be \$16,970,588. In 1909 the same bureau found the value of all crops grown in the state to be \$50,974,958. The value of all crops grown in the state in 1919, according to reports of the census bureau, was \$181,065,239. The Co-operative Crop Reporting Service estimated the value of crops grown in the state in 1920 at about \$157,000,000, that of 1921 crops at about \$91,000,000, of 1922 crops about \$102,000,000, and that of 1923 crops at about \$130,000,000. These large increases in the value of crops grown in the state in the past two decades are partly the result of increases in prices, but primarily they are due to increases in production. The large decrease for 1921 and 1922 was due chiefly to decreases in prices.

There has been a remarkably rapid increase in the value of farm property in Colorado in the past 40 years, as well as in the number of farms and the acreage of land in farms. The acreage of land cultivated has increased very rapidly in this period, but it is still far below the available area that can be farmed. In past years the immigration department has collected through county assessors figures by counties showing the acreage of

privately owned land capable of cultivation that had not yet been broken. These figures were never complete and for that reason their collection has been discontinued, so they do not appear in the Year Book this year. It is safe to say, however, that less than 40 per cent of the patented land in this state that is capable of being farmed profitably has been broken. There is also a considerable acreage of homestead land and state land in the state capable of producing crops that has never been placed under cultivation.

Complete reports on the results of the agricultural census for 1919 and 1920 are now available. Some of the data were published in the 1921 Year Book and a few census tables were included in the 1922 volume.

The following tabulations, compiled from the census reports for 1890, 1900, 1910 and 1920, show how rapid the increase in farm area and value of farm property has been:

Number of farms: 1890, 16,289; 1900, 24,700; 1910, 46,170; 1920, 59,934.

Land in farms, acres: 1890, 4,598,941; 1900, 9,474,588; 1910, 13,532,113; 1920, 24,462,014.

Average size of farms, acres: 1890, 281; 1900, 384; 1910, 293; 1920, 408.

Value of farm property: 1890, \$110,358,040; 1900, \$161,045,101; 1910, \$491,471,806; 1920, \$1,076,794,749.

The number of farms reported by the census bureau for 1920 is somewhat greater than the number reported by county assessors, the principal reason for this being that county assessors generally report only farms on which land is actually being cultivated, while the census bureau reports all farms. The acreage in farms reported by the census bureau also is much greater than the acreage reported to the state immigration department, chiefly for the same reason. County assessors report for purposes of taxation, however, about 7,000,000 acres more of farm land in the state than is reported by the census bureau for 1920. The average size of farms as reported by the census bureau is much larger than the average size of the farms reported to the immigration department by county assessors. This is due to the fact that most of the pasture and other unimproved farms reported by the census bureau and not reported by the county assessors are much above the average size of improved farms reported. The increase in the average size of farms in the past ten years has been due chiefly to the fact that much

homestead land has been entered during that period, chiefly in tracts of 320 acres or more. A large number of small farms also have been consolidated in the past decade into larger farms, principally in the fruit-raising districts. The value of farm property has grown very rapidly in the past decade, as will be seen from the fig-

ures given, but the 1920 census was taken at a time when farm values were at about their highest. There has been a decrease in prices of nearly all classes of farm property since that time, so that the value of farm property in the state today is considerably lower than that reported by the census bureau.

Stockraising

STOCKRAISING is, next to mining, Colorado's oldest industry. In the territorial days, when perhaps not one person in one hundred who knew anything about Colorado had any confidence in its agricultural possibilities, the stockmen were already establishing themselves on the free range and were pasturing thousands of cattle and sheep on the rich native meadows of the mountain parks and the more favored lowlands. Almost the entire state was open range then and cattle and sheep were pastured at very small expense during the summer and shipped east to be finished for the packers' markets. At first stockraising was confined largely to the mountain valleys and the lowlands near the foothills, but gradually the herds overran the plains of eastern Colorado, where government land was abundant and there was almost no farming.

In the late 70's and early 80's homesteaders began to take up the free range and to restrict somewhat the activities of the stockmen. There was really plenty of land for all, however, and open range stockraising continued to thrive in all parts of the state until far into the 90's. Since that time the settlement of farming lands has been very rapid, and at the present time range pasture is confined largely to the national forests and the government land in the northwestern part of the state. Range regulations within the national forest are strict and are carefully enforced, while the remaining homestead land is being filed upon so rapidly under the grazing homestead act that free government range will become obsolete in Colorado within a very few years.

But the passing of the range has proved a blessing to the stockraising industry in this state. While it has greatly diminished the number of stock cattle marketed, it has made Colorado one of the leading states in the production of high grade fat cattle, hogs and lambs. The production of feeder stock has given place largely to a more intensive industry, that of

producing finished animals of the best grades, ready for selling to the packers at the highest market price. There has also been a very substantial development of the dairying industry in the past two decades. In 1910 74.1 per cent of the farms in the state reported cattle of some kind, and 70.7 per cent of them reported dairy cattle. On January 1, 1920, the census bureau found cattle on 84.3 per cent of the farms in the state, and dairy cattle on 61.9 per cent. Most of the farms which have no cattle at present belong to homesteaders who have not yet found the means to stock them.

A table published elsewhere in this volume gives the number of domestic animals of all kinds in the state, as reported to the county assessors for assessment purposes in 1923. These figures are considerably below the actual number of domestic animals in the state, but they are of great value in showing the distribution of these animals by counties. The following tabulation, taken from reports published by the United States department of agriculture, shows the estimated number of domestic animals in the state on January 1, 1924, and January 1, 1923:

	1923	1924
Horses	408,000	400,000
Mules	33,000	33,000
Milch cows	253,000	261,000
Other cattle	1,361,000	1,279,000
Sheep	2,444,000	2,360,000
Swine	523,000	622,000

The census bureau found the value of all domestic animals sold in the state in 1909 to be \$22,453,959. The value of those slaughtered on farms was placed at \$1,754,216, making a total value of \$24,208,175. This figure includes horses and mules sold, as well as food animals. The census bureau did not collect this information for 1919, but the value of the livestock sold from the farms and ranches of the state that year was close to \$50,000,000, or more than twice as great as that for 1909. While this increase is due partly to increased prices for food animals as well as for horses and

mules, a large part of it resulted from a substantial increase in the number of animals produced and a very pronounced improvement in the quality of the stock marketed.

There has been a substantial increase in the numbers of each class of livestock on farms in the state in the past decade, as shown by the census reports for 1920 and 1910. The following table shows the numbers of each of the principal classes of livestock as reported by the census bureau for the two years:

	1920	1910
Horses	420,704	284,647
Mules	31,125	14,000
Cattle	1,756,616	1,041,536
Sheep	1,813,255	1,305,596
Swine	449,866	179,294

In 1920 and 1921 conditions in the livestock industry were generally unfavorable, and the increase in numbers of livestock in the state did not continue. There was a material decrease in the number of beef cattle and some decrease in the number of sheep, while horses and mules have remained about the same, and milch cows and swine increased somewhat. The temporary depression is apparently passing, and every class of livestock shows a tendency toward price recovery in the early part of 1924, though the advance is very slow.

Detailed information regarding the localities where the various branches of the livestock industry are being followed most extensively cannot be given in this volume, but such information will be found in district booklets published by this department describing the several sections of the state.

In a general way it may be stated here that very large numbers of feeder cattle still are produced on the excellent grazing lands in the national forests, in the mountain park districts and on the open range in the northwestern, western and southwestern parts of the state, while stock-feeding

is most extensively developed in the irrigated districts of the South Platte watershed, the Arkansas valley, the San Luis valley, the western slope and southwest Colorado. Sheep are still kept in large numbers for shearing, principally in southern Colorado, while lambs are fattened for market principally in the South Platte valley, the Arkansas valley and the San Luis valley. The total wool clip for 1919 was found by the federal census bureau to be 9,755,312 pounds, Colorado ranking twelfth among the states in wool production. The following table shows the rank of the state in the number of domestic animals on farms January 1, 1924:

	Rank
Horses	18
Mules	22
Milch cows	28
Other cattle	8
Sheep	8
Hogs	27

Colorado undoubtedly ranks considerably higher in the value of livestock and livestock products marketed annually than these figures would indicate. It is difficult to obtain anything like accurate data showing actual returns from the sale of livestock and livestock products, there being no state department and no single commercial or shipping organization which gathers all the information. The act passed by the Twenty-second General Assembly giving the state board of immigration authority to demand this information from those having it in their possession and providing a penalty for failure to supply such information when it is properly requested will eventually make it possible for the immigration department to collect these statistics annually. At the present time, however, the funds available for the use of the department are not sufficient to meet the expense of gathering and tabulating them, in addition to the other duties imposed by law upon the board.

Dairying

THERE has been very rapid development in the dairying industry in Colorado during the past decades, but the output of dairy products in the state is still considerably short of consumption and there is excellent opportunity in nearly all agricultural districts for further development.

The number of dairy cattle still is increasing steadily each year, especially in the non-irrigated districts, where agricultural development at

present is much more rapid than in the irrigated areas. During the past four years, while there was a decrease in nearly every class of livestock in the state, dairy cattle continued to increase slightly in numbers and the character of dairy stock improved even more rapidly than during more prosperous periods.

The United States department of agriculture estimated the number of dairy cows over one year old in Colo-

rado on January 1, 1924, at 261,000, compared with 253,000 for 1923. The census bureau found the number of milch cows on farms in the state April 1, 1910, to be 144,734. The number of milch cows not on farms at that time was 11,722, making a total for the state of 156,506. Census reports of the 1920 census showed 233,747 dairy cows on the farms of the state on January 1, 1920.

The following statistics, compiled under the direction of the state dairy commissioner, show the number of commercial establishments in the various branches of the dairying industry in the state on July 1, 1923:

Creameries making butter.....	80
Condenseries.....	5
Cheese factories.....	7
Ice cream plants.....	69
Goat cheese factories.....	21
Dried milk plants.....	1

The latest data available showing the amount and value of dairy products manufactured in the state is from the same source. The following figures show the amount and value of dairy products manufactured in the state and certain data on farm production and consumption of dairy products for the year ending July 1, 1923:

	Quantity	Value
Butter, lbs.	15,319,765	\$ 6,587,498.95
Ice cream, gals.	1,768,168	2,033,393.20
Condensed milk, cases	435,848	1,841,028.00
Cheese, lbs.	1,407,073	267,343.87
Ice cream mix, gals.	149,919	151,418.19
Condensed skim.		27,486.00
Powdered and malted milk		261,320.44
Condensed and dried butter-milk, lbs.	602,340	30,919.38
Goat cheese, lbs.	250,00	75,000.00
Buttermilk, gals.	487,767	24,388.35
Other dairy products manufactured		54,680.52
Total value of factory products....		\$11,354,476.90
Estimated value of milk consumed, gals.	48,390,900	\$ 9,238,790.63
Estimated value of farm butter, lbs.	6,406,952	2,754,989.89
Total value of all dairy products....		\$23,348,256.89

At the present time the production of butter in the state is slightly in excess of consumption and some butter is being shipped into surrounding districts where consumption exceeds production. The production of cheese is much below consumption and this branch of the industry offers good opportunities for further development.

There is no strictly authentic record available showing the present distribution of dairy cattle by counties,

there having been considerable change since January, 1920, when the latest census figures were compiled. The reports of the various county assessors on livestock assessed, published elsewhere in this volume, show but 143,163 dairy cows in the state in 1923, as compared with 253,000 reported by the United States department of agriculture, and 233,747 reported by the census bureau for 1920. In this report Weld county leads in the number of milch cows, with El Paso county second, Elbert county third, Logan county fourth, and Adams county fifth. In a general way it may be stated that the most rapid development in the dairy industry during the past decade has been in the non irrigated districts of eastern Colorado. This has been largely the result of a very general change in farming methods in these districts. Forage crops are now being grown extensively and nearly all farmers are keeping a few dairy cattle to consume this forage. Few sections of the country have shown more rapid increase in the number of silos during the last five years than eastern Colorado, and they are being built rather rapidly in all sections of the state, principally to preserve winter feed for dairy cattle. The number of silos in the state is above 4,000. During the past year the increase has been much less rapid than it would have been normally, because of the high cost of construction, the difficulties in obtaining necessary materials and the low prices prevailing for farm products. It is generally conceded that no branch of agriculture offers better opportunities in the state than dairy farming.

The following figures, taken from the reports of county assessors before referred to, are given here, not because they show accurately the number of dairy cattle on hand in the leading dairying counties, but as an indication of where the industry is most extensively developed:

County	Number of Dairy Cows	Value
Weld	15,785	\$663,320
Logan	7,020	280,970
El Paso	6,155	254,330
Adams	6,065	273,690
Elbert	5,872	239,023
Larimer	5,764	299,780
Boulder	5,536	239,620
Mesa	5,338	236,153
Douglas	5,050	260,665
Delta	4,886	199,445
Pueblo	4,481	219,625
Jefferson	4,415	180,700
Arapahoe	4,247	206,615
Morgan	3,999	170,860
Garfield	3,493	152,255
Otero	3,480	134,825
Kit Carson	3,320	133,726
Routt	3,254	138,050

Horticulture

SOIL and climatic conditions in certain sections of Colorado are especially suited for the production of nearly all orchard and small fruits adapted to this latitude. In 1919 the Centennial state ranked twenty-first among the states in the production of apples, eighth in the production of peaches, and twelfth in the production of pears. Other fruits grown rather extensively are cherries, plums, apricots, grapes, strawberries, blackberries, raspberries, loganberries, gooseberries and currants.

While Colorado does not yet rank among the leaders in the amount of fruit produced annually, for the reason that the fruitgrowing districts are of restricted area, it is among the first in the production of high-grade fruits, which always command the best market price. High altitude, an abundance of sunshine, cool nights, and water for irrigation just when it is needed, are the principal conditions that unite to make Colorado fruit of the highest quality in form, color and flavor. The following table shows approximately the amount of fruit produced in the state in 1923 and its market value:

Kind	Quantity	Value
Apples, bu.	3,010,000	\$2,799,300
Peaches, bu.	792,000	1,354,320
Pears, bu.	400,000	624,000
Cherries, tons	5,500	660,000
Other fruits	550,000
		<hr/> \$5,987,620

The most important fruitgrowing districts are the western slope, in the valleys of the Grand and Gunnison rivers and tributary streams, comprising parts of Garfield, Mesa, Delta and Montrose counties; the Canon City district, comprising a part of Fremont county; the Arkansas valley, comprising parts of Crowley, Otero, Pueblo, Bent and Prowers counties; southwestern Colorado, comprising parts of La Plata and Montezuma counties, and comparatively small areas near the foothills along the eastern side of the mountains. The western slope area ranks first in importance from the standpoint of production, with the Canon City district second. Apples, peaches and pears are principal fruit crops in the Grand valley and in the valleys of tributary streams, though practically all fruits grown in the state are produced here. This district produces nearly all the commercial peach

crop of the state and a very large proportion of the apple crop. Southwest Colorado produces as fine a variety of all kinds of fruit as is grown in any part of the state, but lack of adequate transportation facilities has retarded development of the fruitgrowing industry in this district. In the Canon City district, the principal crop is apples, with a considerable production of cherries and small fruits. Some apples, cherries and small fruits are grown in the Arkansas valley, especially in Crowley and Otero counties, and cherries are grown rather extensively in several of the counties just east of the mountains, particularly in Larimer county. Apples have been grown to a considerable extent in this same area for a good many years, but the yield is not so dependable as on the western slope and the quality of the fruit is not so high. In the irrigated district immediately north of Denver, including parts of Boulder, Adams, Larimer and Weld counties, berries and other small fruits are grown successfully and always find a good market in Denver. Routt county is especially famous for its strawberries, which come into market late in the summer, after the berries from most other districts are gone, and for that reason command exceptionally high prices.

In 1919 the federal census bureau found the total production of fruits and nuts in the state to be worth \$8,751,678, compared with \$5,078,978 in 1909. Practically all this is fruits, as nuts are not grown commercially in Colorado. The total production of apples was 3,417,682 bushels, compared with 3,559,094 bushels reported for 1909. Mesa county was the leader, with 969,200 bushels, and other leading counties followed in this order: Delta county, 937,220 bushels; Fremont county, 416,403 bushels; Jefferson county, 195,554 bushels; Larimer county, 175,164 bushels; Garfield county, 125,335 bushels; Crowley county, 110,194 bushels; Otero county, 95,519 bushels; Montezuma county, 89,692 bushels; Boulder county, 73,781 bushels; Montrose county, 67,432 bushels. Montrose county is ordinarily one of the most important apple producing counties in the state, but its crop was almost totally destroyed by the late frosts in 1919. It ranked fourth among the counties in the state in 1909, with a production of 264,769 bushels.

The production of peaches in 1919 was 721,480 bushels, of which Mesa county produced more than one-half, or 486,234 bushels. Other leading peach producing counties that year were: Delta, 204,597 bushels; Montrose, 7,154 bushels; Garfield, 5,996 bushels; Montezuma, 4,439 bushels. The season that year was unfavorable for peaches in Delta and Montrose counties, but especially favorable in Mesa county.

The production of pears in the state in 1919 was 269,465 bushels, of which Mesa county produced 251,924 bushels. Other counties producing more than 1,000 bushels were: Delta, 8,756 bushels; Fremont, 3,029 bushels; Montezuma, 1,560 bushels; Garfield, 1,188 bushels.

There has been little change in the number of fruit trees of bearing age in the various counties since 1919, though the number for the state is increasing gradually. Production in the several counties varies considerably each year, but Mesa county generally leads all in the combined production of all classes of orchard fruits. with Delta county second and Fremont county third.

Some attention has been paid in the past few years to the growing of orchards in the non-irrigated districts

of eastern Colorado, and a few small trees of hardy varieties are being grown on many of the farms. In the irrigated sections of eastern Colorado apples and some other tree fruits are grown successfully. Late spring frosts frequently damage fruits in all sections of the state, but the organization of community forces in the principal fruit-producing districts to heat orchards with specially devised heaters on nights when the temperature falls below the frost point has in a large measure eliminated the danger of loss from this source.

The total number of mature apple trees in the state, as reported by the census bureau for January, 1920, was 1,777,737, compared with 1,688,425 in 1910; peach trees, 446,946, compared with 793,372 in 1910; pear trees, 136,117, compared with 99,989 in 1910; plums and prune trees, 80,027, compared with 143,921 in 1910; cherry trees, 348,832, compared with 203,806 in 1910. It should be noted that the number of young trees indicates a continued increase in bearing apple trees, pear trees and cherry trees, while in the case of peaches the number of young trees is perhaps not more than enough to replace the old trees that are constantly becoming unproductive.

Poultry

CLIMATIC conditions are especially favorable for poultry raising in Colorado. Comparatively little rain and an abundance of sunshine make it possible for fowls to spend much of the time out of doors, with the result that disease is less prevalent than in most sections of the country, and young fowls make quick and vigorous growth. Since Colorado is a comparatively new state, however, the poultry interest is not yet extensively developed, and offers exceptional opportunities for good profits in nearly all sections of the state, except the mountain counties, where the climate is too severe. In 1920, when the latest detailed survey of the poultry industry for the entire country was made by the census bureau, Colorado ranked thirtieth in the number of fowls of all kinds on farms reported, with 2,994,347, compared with 1,721,445 in 1910. Of the 59,934 farms in the state at that time, 51,884 reported fowls of some kind on hand, and by far the largest part of fowls reported were found on farms. At that time the lead-

ing poultry-raising counties, with the number of fowls reported in each, were as follows:

Weld	294,948
Yuma	160,114
Washington	137,772
Logan	126,418
El Paso	97,996
Boulder	95,899
Kit Carson	95,279
Pueblo	95,057
Larimer	92,400
Morgan	91,276
Adams	90,062
Mesa	86,643
Baca	86,191
Jefferson	85,841

Reports from the census for 1919 and 1920 give the number of chickens on the farms of the state on January 1, 1920, at 2,874,721, compared with 1,644,471 on April 1, 1910. The number of chickens raised in 1919, according to this report, was 3,880,873, compared with 2,706,945 in 1919. The number of eggs sold during 1919 was 14,172,375 dozen. It will be seen from the figures given above, that there were about 74 per cent more chickens on the farms of the state in 1920 than

in 1910, that about 44 per cent more chickens were raised in 1919 than in 1909, and about 33 per cent more eggs were sold.

Elsewhere in this volume will be found reports by county assessors of the number of poultry assessed in the various counties in 1923, and the number of hens on farms when assessments were made in 1923. The assessment figures are evidently far below the actual number of poultry in the state and the figures showing the number of hens on farms last year are undoubtedly 20 per cent below the actual number. They are of much value, however, as showing the comparative importance of the poultry industry by counties, but are not entirely reliable in this respect, as the reports for some counties are far more nearly complete than for others. It is estimated that the total number of domestic fowls of all kinds on farms at this time is more than 4,000,000, and that the value of poultry and eggs marketed in 1923 was approximately \$7,000,000, or perhaps more. Well in-

formed poultry dealers estimate that at least \$5,000,000 worth of poultry and eggs still are brought into the state annually to supply the local demand.

It will be seen from the tables above referred to that most of the poultry in Colorado is raised in the important agricultural counties. Poultry raising as a separate industry has not been developed extensively, though it is followed to some extent in the neighborhoods of Denver, Colorado Springs and Pueblo. In recent years, special attention has been given to poultry raising in and around Lamar, Prowers county. This locality is now one of the leading poultry raising sections of the state. In all the counties of the non-irrigated section of eastern Colorado, poultry raising is developing very rapidly in connection with farming. In all the irrigated districts considerable poultry has been raised for a good many years, and within the past four or five years the poultry industry has made rapid advances in the northeastern part of the state, where formerly cattle raising was about the only industry followed.

Bees and Honey

IN 1920 Colorado ranked twenty-fifth among the states in the number of colonies of bees reported by the census bureau, compared with a rank of twenty-third in both 1910 and 1900. Since that time there has been an increase in the production of honey per hive of bees, and perhaps in the total production of honey for the state, and a slight increase in the number of colonies of bees.

Final reports of the census for 1920 show that the number of colonies of bees on the farms in the state on January 1 of that year was 63,253, compared with 71,434 on April 1, 1910. The aggregate production of honey reported by the census bureau for 1909 was 2,306,492 pounds, or a little less than 36 pounds for each stand of bees that produced honey. Not all colonies of bees reported in 1910 were producing honey in 1909. In 1919 the production of honey was 2,493,950 pounds, or a little more than 39 pounds per stand reported. While there was a decrease in the number of stands of bees kept by farmers in nearly all sections of the state in the decade from 1910 to 1920, there has been an increase in the number kept by many of the professional honey producers, so that a much

larger percentage of the bees in the state are now in the hands of expert bee keepers than in 1910.

No report is available showing the number of colonies of bees in the state not on farms. In many of the smaller cities and towns bee keeping is followed to a considerable extent and the number of stands of bees in such localities is perhaps much larger than in 1910, so that the total number of stands of bees in the state at the present time is about the same as in 1910. The average amount of honey produced per stand of bees is increasing each year, as the number of stands of bees held by professional honey producers increases in proportion to the total number.

Perhaps 60 per cent of the bees in the state today are in the hands of professional bee keepers, and the percentage is increasing, though a few colonies of bees are being introduced by other than regular commercial producers in the newer agricultural districts. The acreage of alfalfa raised in Colorado has increased very rapidly in the past decade, while sweet clover, field beans and other crops from which bees feed have been introduced in the past ten years. Though there has been a considerable decrease

in the number of colonies of bees kept in the orchard districts since 1910, due chiefly to difficulties arising from the spraying of fruit trees, this loss could have been much more than compensated for in the agricultural districts, where the area of honey producing crops has been greatly increased. The area now devoted to alfalfa in Colorado is in excess of 780,000 acres, compared with 508,892 acres in 1909.

The bee keeping industry is confined largely to the principal alfalfa producing districts and the fruit growing districts, where the bees find an abundance of honey-bearing blossoms from which to harvest their honey. The statistics furnished by reports of county assessors on the number of colonies of bees in the various counties of the state are published elsewhere in this volume. While they are of comparatively little value as showing the actual number of stands of bees in the several counties, they are of much value as showing the distribution. The following figures, taken from the reports of county assessors for 1923, show the relative importance of the leading honey producing counties:

County.	Stands of Bees
Weld	6,846
Delta	5,555
Larimer	4,620
Boulder	4,170
Mesa	4,116
Montrose	3,993
Otero	3,961
Jefferson	3,872
Garfield	3,734
La Plata	2,277
Prowers	2,021

The total number of stands of bees assessed in 1923 was 59,334, compared with 55,582 in 1922. The number assessed in 1920 was considerably below the number reported by the census bureau on farms alone, and inquiries have shown that the census enumeration was in some cases at least 10 per cent too low. During 1921 more than 60 cars of honey was shipped out of the state, and about the same amount in 1922. There is every indication that the number of stands of bees in the state will increase from now on, as the farming districts are more fully developed.

The Co-operative Crop Reporting Service estimated the average surplus production of honey per stand for 1921 at approximately 58 pounds, compared with an average of about 44.2 pounds for the country at large. In 1922 it was estimated at 55 pounds to the stand, but in 1923 it dropped to only 31 pounds on account of the exceptionally heavy rainfall throughout the season. The average surplus production of honey per stand for Colorado is almost always considerably above that for the entire United States, this state ranking well up among the leaders in this respect. No figures are available showing the production of honey in the state by counties, but the Co-operative Crop Reporting Service hopes to begin the collection of statistics of this character in the near future.

Mineral Resources

NO state except California has so wide a variety of mineral resources as Colorado. Nearly every useful mineral produced in the United States is found in the Centennial state and most of them have been mined to some extent. About 250 useful metallic and non-metallic minerals and compounds have been reported in the state, and undoubtedly numerous others are yet to be found. The extreme irregularity of the state's surface and the wide range of geological formations exposed for examination present excellent opportunities for the production of valuable minerals.

METALS

Mining is Colorado's oldest industry. Gold was the first metal produced and has surpassed all others in the total

value of its output. The first important discovery of gold was made in the summer of 1858, and since that time the value of the state's gold output has been more than \$685,000,000. The production of silver began soon after that of gold and the white metal ranks second, the total value of the state's output to date being more than \$515,000,000. At the present time zinc ranks second in the annual volume of its output, only a little way behind gold. The zinc production, on a commercial scale, did not begin, however, until 1902. Copper has been produced steadily since 1870 and lead since 1872. The total value of gold, silver, lead, copper and zinc marketed in Colorado to the beginning of 1924 is approximately \$1,570,000,000.

While these are the principal metals being produced in Colorado, almost every useful metal found in the United States exists here. Tungsten has been produced commercially since 1904, and uranium, vanadium and radium have been produced since 1906. Colorado ranks first in the production of these metals. Molybdenum is also being produced in considerable quantities at the present time and promises soon to take an important place in the statistics of the state's metal output.

There was considerable falling off of metal production in Colorado in 1919 and a further decrease in production in 1920, 1921 and 1922, due very largely to unsatisfactory markets for practically all metals. The total value of gold, silver, copper, lead and zinc produced in the state in 1922 was about \$15,230,000, compared with about \$14,005,500 in 1921. These two years show the lowest values in the production of these five metals since 1899. The output of other metals also was lower in 1921 and 1922 than during the years immediately previous. There has been some increase in the production of silver in certain sections of the state, and a consequent increase in the output of lead and zinc from ores in which silver is found. This increase has been due to the increased price of silver, but the high cost of operation has largely counteracted the increase in the market value of silver and prevented the reopening of many silver properties that might have been opened if production costs had been lower. The price of silver has been decreased again, but prices of zinc and lead have been advanced materially, and there was a substantial increase in the total value of metals produced in the state in 1923 and indications point to further increases in 1924.

The production of metals in Colorado is confined largely to the mountainous counties in the central and western parts of the state. The metals occur usually in compound ores found in well-defined veins or lodes. Up to the present time approximately thirty metals have been produced in commercial quantities. The most important of these, in the order of their annual output at the present time, are gold, zinc, silver, lead and copper.

Free gold is found in numerous widely separated districts and has been mined in the following counties: Chaffee, Clear Creek, Costilla, Eagle, Jefferson, Moffat, Park, Routt, San Miguel and Summit. Free gold is the principal output of the placer mines,

and Summit county has led all other counties in the state for fifty years in the output of its placer mines. There is a wide variety in the gold ores found in Colorado. Among the compound ores from which gold is obtained are amalgam, calaverite, petzite and sylvanite.

Zinc is the predominant metal in many of the ores which carry gold. The principal compound ores carrying zinc are aurichalcite, calamine, chalcophanite, hetaerolite, hydrozincite, nicholsonite, smithsonite and sphalerite.

Silver is found very commonly associated with both zinc and gold as well as with lead. Native silver has been mined in the following counties: Boulder, Clear Creek, Dolores, Gunnison, Hinsdale, Lake, La Plata, Montrose, Pitkin and Teller. The principal compound ores in which silver is found are acanthite, amalgam, calaverite, cosalite, galena, massicot, mimehessite, krennerite, pearceite, petzite, polybasite, proustite, pyrargyrite, stephenite, stromeyerite and sylvanite.

Lead is perhaps more widely distributed than any other metal found in the state, and is often associated with both gold and silver. The principal compound ores from which lead is produced are altaite, anglesite, cerussite, cosalite, galena, massicot, mimetite, minium, plumbojarsite and pyromorphite.

Copper is very widely distributed, but usually occurs in comparatively small quantities. Native copper has been reported in the following counties: Dolores, Jefferson, Mesa, Montrose, Park and Routt. The principal compound ores containing copper are azurite, bornite, brochantite, chalcantite, chalcocite, chalcopyrite, chrysocolla, covellite, cuprite, enargite, malachite, melaconite, stromeyerite, tennantite and tetrahedrite.

The following tabulation gives the principal metals found in Colorado and the counties in which they occur:

Aluminum (alunite, bauxite, cryolite) — Chaffee, Conejos, Custer, El Paso, Fremont, Gunnison, Hinsdale, Lake, Mineral, Ouray, Rio Grande, Saguache.

Antimony (bournonite, polybasite, stibnite) — Boulder, Clear Creek, Dolores, Grand, Gunnison, Ouray, Pitkin, San Juan, San Miguel, Teller.

Arsenic (arsenopyrite) — Gilpin, Gunnison, Pitkin, San Juan, San Miguel.

Barium (barite) — Boulder, Mineral, Pitkin, San Miguel.

Bismuth (beegerite, bismuthinite, bismutite, cosalite, tetradymite) — Boulder, Chaffee, Fremont, Grand, Gunnison, Jefferson, Lake, La Plata, Larimer, Montezuma, Ouray, Park, San Miguel.

Cadmium (greenockite)—Lake.

Cerium (allanite, gadolinite, monazite) — Boulder, Chaffee, Costilla, Douglas, Routt, Washington.

Cobalt (erythrite, smaltite)—Gunnison.

Copper—Archuleta, Baca, Boulder, Chaffee, Clear Creek, Conejos, Custer, Dolores, Eagle, Fremont, Garfield, Gilpin, Grand, Gunnison, Hinsdale, Huerfano, Jackson, Jefferson, Lake, La Plata, Larimer, Mesa, Mineral, Moffat, Montezuma, Montrose, Ouray, Park, Pitkin, Rio Grande, Routt, Saguache, San Juan, San Miguel, Summit, Teller.

Gold—Archuleta, Boulder, Chaffee, Clear Creek, Conejos, Costilla, Custer, Dolores, Douglas, Eagle, Fremont, Garfield, Gilpin, Grand, Gunnison, Hinsdale, Huerfano, Jackson, Jefferson, Lake, La Plata, Mineral, Moffat, Montezuma, Montrose, Ouray, Park, Pitkin, Rio Grande, Routt, Saguache, San Juan, San Miguel, Summit, Teller.

Iron (brown iron ore, hematite, magnetite, marcasite, pyrite, pyrrhotite, siderite)—Chaffee, Costilla, Dolores, Fremont, Gunnison, Hinsdale, Jefferson, Lake, Ouray, Pitkin, Routt, Saguache, San Juan, San Miguel, Summit, Teller.

Pyrite is found in nearly every metal producing county in the state.

Lead—Archuleta, Boulder, Chaffee, Clear Creek, Custer, Dolores, Eagle, Fremont, Gilpin, Gunnison, Hinsdale, Lake, La Plata, Mineral, Montezuma, Ouray, Park, Pitkin, Routt, Saguache, San Juan, San Miguel, Summit, Teller.

Lithium (amblygonite)—Fremont.

Manganese (alabandite, chalcophanite, psilomelane, pyrolusite, rhodochrosite) — Boulder, Chaffee, Custer, Dolores, Eagle, Gunnison, Hinsdale, Lake, Park, Saguache, San Juan, Summit.

Mercury (amalgam, cinnabar, quicksilver)—Boulder, La Plata.

Molybdenum (molybdenite) — Boulder, Chaffee, Clear Creek, Grand, Gunnison, Lake, San Juan, Summit, Teller.

Nickel (annabergite, nicolite)—Custer, Fremont, Gunnison.

Platinum—Clear Creek, Chaffee, Gunnison, Pitkin, Saguache, San Miguel.

Silver—Archuleta, Baca, Boulder, Chaffee, Clear Creek, Conejos, Costilla, Custer, Dolores, Douglas, Eagle, Fremont, Garfield, Gilpin, Grand, Gunnison, Hinsdale, Jackson, Lake, La Plata, Mineral, Moffat, Montezuma, Montrose, Ouray, Park, Pitkin, Rio Grande, Routt, Saguache, San Juan, San Miguel, Summit, Teller.

Tantalum (columbite) — Fremont, Jefferson, Teller.

Tellurium—Boulder, Teller.

Tin (cassiterite)—Garfield.

Titanium (ilmenite, rutile, perovskite) — El Paso, Gunnison.

Tungsten (ferberite, hubernite, scheelite)—Boulder, Chaffee, Clear Creek, Gilpin, Gunnison, Lake, Ouray, San Juan, San Miguel, Summit.

Radium, Uranium, Vanadium (carnotite, pitchblend, volborthite) — Clear Creek, Custer, Dolores, Eagle, Garfield, Huerfano, Jefferson, La Plata, Mesa, Moffat, Montrose, Park, Rio Blanco, San Miguel.

Yttrium (allanite, gadolinite) — Boulder, Douglas, Washington.

Zinc—Archuleta, Chaffee, Clear Creek, Conejos, Dolores, Eagle, Fremont, Gilpin, Hinsdale, Lake, Mineral, Ouray, Park, Pitkin, Saguache, San Juan, San Miguel, Summit.

Zircon—El Paso.

NONMETALS

The range of useful nonmetals found in Colorado is almost as wide as that of the metals, but their production has not been so extensive up to the present time. Coal ranks first among the nonmetals in value of output and, perhaps, in the total value of known deposits. Colorado ranks fourth among the states in available coal supply, and eighth in annual output. According to the United States geological survey, the coal fields of the state cover approximately 19,750,000 acres, and the available coal supply is about 317,500,000,000 short tons. The only states surpassing Colorado in total available coal are North Dakota, Wyoming and Montana. The Colorado state geological survey estimates the area of Colorado's coal fields somewhat below the estimates of the United States geological survey, but places estimated tonnage considerably higher. The following tabulation shows the area of the various fields and the estimated tonnage, according to this authority:

	Area (Square Miles)	Estimated Tonnage
Denver region.....	4,300	13,590,000,000
Durango field.....	1,900	21,428,000,000
North Park.....	500	453,000,000
Trinidad	1,080	24,462,000,000
Uinta region.....	6,000	271,810,000,000
Yampa field.....	3,700	39,639,000,000
Scattered fields....	350	388,000,000
	17,830	371,770,000,000

Colorado coal ranges in quality from black lignite and subbituminous varieties through various grades of bituminous to true anthracite. The bituminous varieties include high-grade coking coal found in the Trinidad district, in the Glenwood Springs area, and in Gunnison county. High-grade bituminous coal is also found in Jackson, Routt, Moffat, Rio Blanco, Mesa, Delta, Montezuma, La Plata, Fremont and Huerfano counties. True anthracite coal is found near Crested Butte, in Gunnison county, and is found in several localities in Routt and Moffat counties.

Although Colorado has never ranked high in petroleum output, it has produced crude oil steadily since 1887. The maximum annual output was recorded in 1892, being 824,000 barrels. The total output of the state to the end of 1923 was in excess of 12,000,000 barrels. The most important producing fields are in Fremont county, in and about the city of Florence, and in Boulder county, near the city of Boulder. There has been some production from Rio Blanco county, near

the town of Rangely; Garfield county, near the Colorado-Utah line, and Mesa county, near DeBeque. Late in 1923 a gas well having a daily capacity of more than 80,000,000 cubic feet of gas was brought in at Wellington, in Larimer county, at a depth a little greater than 4,000 feet. The well began spraying oil before it could be capped, and since it was drilled almost at the peak of the structure in which it was located, oil experts generally were convinced that a strong flow of oil would be encountered lower down on the structure in the same sand. Further drilling of this structure is now under way, and as a result of the discovery in this structure many other structures in Larimer, Weld and Boulder counties are being tested with deep wells, since the Wellington well is the first ever drilled below 4,000 feet in this section of Colorado. Early in 1924 an oil well was brought in near Hamilton, Moffat county, the flow being estimated at about 3,000 barrels daily. This discovery has given an impetus to prospecting in that section of the state and several other wells will be drilled in 1924. The oil sand here was also reached at near the 4,000-foot level. These successes in deep drilling operations have given rise to much deep drilling activity in other parts of the state, and many structures that have been tested previously to moderate depths are now being drilled deeper. Several of the strongest of the operating oil companies are engaged during 1924 in making thorough drilling tests of all structures upon which their geologists have reported favorably and it is confidently expected that important new fields will be opened in the state before the end of the year.

Colorado has immense deposits of oil shale, which promise in the near future to become one of the most important sources of petroleum production in this country. The constantly increasing demand for petroleum products during the past few years has caused both the federal and state governments to make special investigations of the economic possibilities of these shale deposits, and reports have been made which promise much in the direction of speedy and extensive development. Several private companies have been organized for the purpose of extracting petroleum and other valuable products from the Colorado oil shales, but so far as the public is at present informed there is no process developed which will handle

the Colorado shale at sufficiently low cost to justify extensive commercial development.

Colorado's oil shales are found in what is known as the Green River formation, in the western part of the state, chiefly in Mesa, Garfield, Rio Blanco and Moffat counties. They cover an area of perhaps 2,000 square miles, and the various shale strata sometimes attain an aggregate thickness of 100 feet or more. Tests made by the United States geological survey have shown a recovery of from 10 to 68 gallons of petroleum from a ton of shale, and in one case the recovery was 90 gallons per ton. Experts from the geological survey have estimated the amount of petroleum available in Colorado shale at 20,000,000,000 barrels and the amount of ammonium sulphate which should be recovered from the same shales by the same processes, at 300,000,000 tons. The process of distillation by which oil is recovered may also result in the recovery of large quantities of producer gas, dyes and other valuable by-products.

Perhaps no state has a wider variety or greater deposits of high-grade stone than Colorado. Sandstones, granites and basalts are perhaps most abundant, but marbles, lavas, abrasives, limestone, slates and shale are common. Onyx and various gem stones are found in several localities.

Sandstone, granite and marble have been extensively quarried for building purposes and marble and granite have been produced rather extensively for interior decorating and monumental purposes. The most extensive marble deposits are in Gunnison county near the town of Marble. Along the course of Yule creek, in this neighborhood, are said to be the largest deposits of pure white marble in the world. These deposits have been worked extensively, but the company working them is now in the hands of a receiver and it is understood that a reorganization is under way.

Brick clay is found in practically every county in the state and has been dug to some extent in perhaps two-thirds of the counties. Fire clay, plastic clay and kaolin are also rather widely distributed. Many varieties of high-grade pottery are being manufactured at Golden, chiefly from clays mined in Jefferson county, near that city. Colorado pottery is rapidly making for itself a wide reputation, and there are several known deposits of good pottery clay that have not yet been developed.

The accompanying tabulation shows the principal valuable nonmetals found in the state, together with the counties where they have been reported:

Abrasive Stone—Gunnison.
Amber—Boulder.
Asbestos—Boulder, Chaffee, Fremont, Rio Grande.
Asphalt—Garfield, Grand, Jefferson, Mesa, Routt, Rio Blanco.
Basalt—Boulder, Delta, Eagle, Garfield, Grand, Huerfano, Jefferson, Las Animas, Mesa, Rio Blanco.
Cement Materials—Boulder, Chaffee, Fremont and many others.
Corundum—Chaffee, Clear Creek.
Coal—Adams, Arapahoe, Archuleta, Boulder, Delta, Dolores, Douglas, Elbert, El Paso, Fremont, Garfield, Gunnison, Huerfano, Jackson, Jefferson, La Plata, Las Animas, Larimer, Mesa, Moffat, Montezuma, Montrose, Ouray, Park, Pitkin, Rio Blanco, Routt, Weld.
Feldspar—El Paso.
Fire Clay—Bent, Boulder, Custer, Douglas, El Paso, Fremont, Garfield, Gunnison, Huerfano, Jefferson, Larimer, Las Animas, Pueblo.
Fluorspar—Boulder, Chaffee, Clear Creek, Custer, Dolores, Douglas, El Paso, Fremont, Gilpin, Jefferson, Lake, Larimer, Mineral, Montezuma, Montrose, Park, San Juan, Saguache, San Miguel, Teller.
Fuller's Earth—Chaffee, Washington.
Gem Stones—Chaffee, Clear Creek, Eagle, El Paso, Fremont, Hinsdale, Jefferson, Lake, Larimer, Moffat, Park, Saguache, Teller.

Glass Sand—Bent, Fremont, Prowers, Pueblo.

Granite—Archuleta, Boulder, Chaffee, Clear Creek, Conejos, Costilla, Custer, Delta, Dolores, Douglas, Eagle, El Paso, Fremont, Garfield, Gunnison, Jackson, Jefferson, La Plata, Larimer, Las Animas, Mineral, Moffat, Ouray, Park, Pueblo, Rio Blanco, Rio Grande.

Graphite—Chaffee, Gunnison, Las Animas.

Gypsum—Custer, Delta, Dolores, Eagle, El Paso, Fremont, Garfield, Jefferson, Larimer, Montrose.

Kaolin—Boulder, El Paso, Fremont, Huerfano, Jefferson, La Plata, Morgan, Pueblo.

Limestone—Boulder, Chaffee, Douglas, Fremont, Gunnison, Jefferson, La Plata, Larimer, Las Animas, Mesa, Mineral, Ouray, Park, Pueblo, Rio Blanco.

Marble—Boulder, Chaffee, Gunnison, Larimer, Pueblo.

Mica—Clear Creek, Fremont, Larimer, Mesa.

Oil Shale—Garfield, Gunnison, Mesa, Moffat, Montrose, Rio Blanco.

Onyx—Gunnison.

Petroleum—Boulder, Delta, Fremont, Mesa, Montrose, Pueblo, Rio Blanco.

Potash—Costilla, Delta.

Sandstone—Archuleta, Boulder, Chaffee, Conejos, Costilla, Custer, Delta, Dolores, Douglas, Eagle, Elbert, El Paso, Fremont, Garfield, Gunnison, Jackson, La Plata, Larimer, Las Animas, Mesa, Mineral, Ouray, Park, Pueblo, Rio Blanco.

Salts of Sodium—Alamosa, Saguache.

Slate—Gunnison.

Sulphur—Gunnison, Mineral.

Manufacturing in Colorado

THE manufacturing industry in Colorado has developed rapidly in the past 20 years. In the five years ending with 1919 there was a rapid increase in the value of goods manufactured, in the value added by the manufacturing process and in the amount paid for wages and salaries in the industry. From 1914 to 1919, according to reports of the census bureau, the number of factories in the state increased 23.8 per cent, the number of persons engaged in the industry increased 32.7 per cent, the total value of goods manufactured increased 101.3 per cent, value added by the manufacturing processes increased

109.8 per cent and the amount paid as wages in the industry increased 104.4 per cent. In the 20 years ending with 1919, the number of factories in the state just about doubled, capital invested increased about 320 per cent, the number of persons engaged in the industry about doubled, the value of goods manufactured annually increased more than 250 per cent. The value added by manufacturing increased more than 250 per cent. The following table, compiled from final reports of the United States census bureau for 1899, 1909, 1914 and 1919, gives a good idea of the growth of the industry in the past 20 years:

	1919	1914	1909	1899
Number of establishments.....	2,631	2,126	2,034	1,323
Persons engaged	44,731	33,715	34,115	*
Proprietors and firm members	2,234	1,716	1,722	*
Salaried employes	7,241	4,721	4,326	1,870
Wage earners (average number) ..	35,256	27,278	28,067	19,498
Primary horsepower	194,634	162,828	154,615	43,434
Capital invested	\$243,827,000	\$181,776,339	\$162,667,801	\$58,172,865
Salaries paid	13,049,000	6,367,863	5,647,684	2,058,798
Wages paid	41,280,000	20,199,754	19,912,342	11,707,566

* Figures not available.

The increase in value of goods manufactured was much greater during the period from 1914 to 1919, than during any corresponding period in the state's history and the percentage of increase has been greater than for any period of the same length in the past 20 years. The large increase in value of output was due partly to increased output, but very largely to higher prices that prevailed then on account of the World war. The census for 1919 covered the period of highest prices, and the value of the output for 1920 was considerably less than that for the previous year, while that for 1921, though perhaps greater than the 1920 output, fell short of that for 1919 in both volume and value. The census bureau's report on manufacturing for 1921 is not yet complete, but partial reports show rather large decreases in the value of manufactured products for Colorado, as well as for nearly all other states. The total value of manufactured products for this state for 1921 is given in the preliminary figures at \$221,324,285, compared with \$275,622,335 for 1919. The figures for the two years are not strictly comparable, however, since those for 1921 do not include manufacturing establishments with products less than \$5,000 in value, or establishments engaged in automobile repairing, while those for 1919 include such establishments. The value of goods manufactured in the state for 1922 was undoubtedly slightly above that for 1921, while 1923 perhaps showed a slight decrease as compared with 1922.

But Colorado, in spite of the rapid growth as a manufacturing state, still holds only a low rank in manufacturing activity. In 1914 it ranked thirty-second among the states in the value of manufactured products, thirty-sixth in the number of wage earners, and thirty-third in the value added by manufacture. The value of goods manufactured in Colorado in 1914 represented only six-tenths of one per cent of the total value of goods manufactured in the United States. While the increase in the value of goods manufactured here since 1914 has been very substantial, it has not kept pace with the increase in other states where the production of goods needed for the prosecution of the war was carried on more extensively, consequently Colorado ranks perhaps no higher as a manufacturing state now than it did in 1914, and the value of its manufactured goods is no doubt smaller in comparison with the total

value produced in the United States than it was at that time, though exact data are not available. In 1921 the value of goods manufactured in Colorado was five-tenths of one per cent of the total value of goods manufactured in the United States.

The 1914 census showed that the manufacture of beet sugar ranked first among the various branches of the manufacturing industry, the value of the output being \$17,635,556, or 12.9 per cent of the value of all goods manufactured in the state. In the manufacturing census for 1919 the census bureau included the figures for the manufacture of beet sugar with "All other industries," presumably to avoid disclosing individual operations. That branch of the industry apparently still led most others then, however, with an output valued at about \$28,000,000. In 1921 it still took first rank, with an output valued at above \$35,000,000. Production of beet sugar reached a record figure in 1921, though the price of sugar was much below that of 1919. In 1922 the output decreased materially and the price showed a substantial increase. In 1923 the output increased above the 1922 figure, and price also showed some increase.

Slaughtering and meat packing ranked second among the state's manufacturing industries in 1914, the total value of the output being \$12,726,127. Since 1914 there has been some increase in the price of packinghouse products, and a very substantial increase in the output, so that the value of all packinghouse products for the state in 1919, as shown by the census report, was \$41,007,531, this industry holding first rank. The output for 1923 was about the same in value as that for 1919.

Flour and gristmill products ranked third in 1914, with an output valued at \$7,535,633. Since that time there has been a slight increase in the output and a large increase in the market price of the products. The value of flour and gristmill products for 1919 was \$19,954,119. The output for 1923 was greater than that for 1919, but prices were somewhat lower, so that the total value of the output was perhaps about the same.

Among the other manufacturing industries which have shown large increases in the value of their output since 1914 are iron and steel works, rolling mills, and makers of chemicals and explosives. The Colorado Fuel & Iron company, which is the largest steel manufacturing establishment in

the west, was until the latter part of 1920 operating at full capacity and turning out a much larger production than at any time in its history. Since that time it has been almost entirely closed down much of the time, or has operated at far below its normal capacity. In 1923, however, most of the company's several mills operated nearly at capacity, and the output has been large. The price of all steel products increased materially as a result of the heavy demand caused by the war, in consequence of which the annual value of the state's steel products for 1919 was perhaps 100 per cent above that for 1914. Prices have been reduced materially, however, since 1919. Several new chemical factories have been put in operation and old factories are greatly increasing the output as a result of the demands caused by the war, and the needs of the reconstruction period, especially those engaged in the production of acids and dyes.

The census bureau does not segregate manufacturing output completely by counties and it is impossible under present conditions to supply accurate data on these industries showing the comparative ranks of the various counties in all respects. In 1914 there were seven cities in the state having a population of more than 10,000 each, which reported 40.1 per cent of the value of the state's manufactured products. These cities are Boulder, Colorado Springs, Denver, Fort Collins, Greeley, Pueblo and Trinidad. The same cities reported 53 per cent of the total manufactured output of the state in 1919, due principally to the large increase in the city of Denver. From these figures it may be seen that the manufacturing industry is being developed very substantially in the smaller cities and rural districts since they produce about the same percentage of the total manufactured output that is produced in the larger cities. All of the state's 16 sugar factories are located in places having less than 15,000 population and the big steel mills of the Colorado Fuel & Iron company, usually credited to the city of Pueblo, are not located in the city's limits and their output is not assigned by the census bureau to that city.

The butter, cheese and condensed milk industries are growing very rapidly in the rural districts. All of the condenseries and most of the creameries and cheese factories are located in small communities. In 1914 the value of butter, cheese and condensed milk manufactured in the state was

\$3,596,565, while in 1919 it had risen to \$11,906,140. It has shown further increases since 1919.

The Twenty-second General Assembly enacted a law giving the state immigration department authority to call upon manufacturers for data regarding their operations and providing a penalty for refusal to furnish such data when properly requested. The appropriation made to the department, however, was not sufficient to meet the expense of a general manufacturing survey of the state. A partial survey was begun early in 1920, chiefly for the purpose of putting the department in a position to co-operate with the census bureau of the United States department of commerce in future surveys of the industry. Since that time, however, the department of commerce has apparently adopted a permanent policy of making a survey of the manufacturing industry biennially instead of every five years, so that apparently all data regarding output that this department might reasonably expect to collect is now being furnished by the census bureau, though it is not always completed as promptly as might be wished. In the future it is hoped that some plan can be worked out so that, through co-operation between the state and the census bureau, information on manufacturing in Colorado may be obtained somewhat more promptly than is now possible.

Colorado offers exceptional opportunities for the development of manufacturing in a wide variety of lines. It has a great wealth of raw material. Its supply of coal is practically inexhaustible and is so distributed as to be conveniently located to furnish fuel for all of the manufacturing centers of the state.

It has been the hope of this department for the past five years to furnish annually statistics of the manufacturing industries by counties, as a proper basis for aiding the further development of the manufacturing industry in the state. The experienced manufacturer who contemplates entering a new territory always wants a very considerable amount of information regarding this new territory, not the least important of which is accurate data regarding the amount of manufacturing in the line he proposes to establish that is already being done in the territory and something of the success that is attending the operations of those already in the field. It is not difficult to supply information regarding the raw materials available

for manufacturers in this state, but up to the present time it has been difficult to tell what was being done in the manufacturing line in the various counties in the state.

In order to be able to furnish this and other information regarding manufacturing development in Colorado by counties, which this department believes is necessary in connection with any campaign to develop the manufacturing industry here, the department will require considerably more money than it has ever had available for the collection of statistical information.

Some data regarding the manufacturing development in the various counties and the raw materials available for further development are given in other publications issued by this department. The following list contains some of the most important raw materials available here for manufacturing purposes: Apples, apricots, alfalfa, asbestos, asphaltum, asphaltic rock, arsenic, aquamarine, aluminum, agate, alunite, anthracite coal, antimony, amethyst, amber, abrasive stone, basalt, barite, bauxite, building sand, beans, bismuth, barley, bitumen, bituminous coal, brick and tile clay, broomcorn, beets, berries, cad-

mium, cattle, celery, cement materials, chalcedony, chalk, copper, cherries, corn, cobalt, coal, coke, clays, corundum, carnotite, cucumbers, diatomaceous earth, dolomite, eggs, elaterite, emmer, earthenware materials, fuller's earth, feldspar, flaxseed, fluorspar, feterita, fire clay, glass sand, graphite, grain sorghum, granite, gold, gypsum, garnet, gilsonite, honey, hogs, horses, hides, hay (many varieties), iron ore, kaolin, kafir corn, lava, lead, limestone, mica, mineral paint, moulding sand, molybdenum, mercury, melons, marble, milo maize, manganese, magnesium, millet, mineral waters, milk, oats, oil shale, opal, onyx, petroleum, potash, plastic clay, producer gas, pyrite, platinum, potatoes, peaches, pears, plums, pumpkins, quartz, radium salts, rutile, rye, road metal, sandstone, salts of sodium, salts of potassium, speltz, shale, slate, silver, sand, sulphur, sheep, sugar beets, tellurium, tantalum, tungsten, timber (pine, cedar, spruce, hemlock, aspen, pinon, cottonwood, etc.), turnips, topaz, tourmaline, trona, turquoise, uranium, vanadium, volcanic ash, vegetables, wheat, wool, wood (see timber), water power (more than 2,000,000 horsepower), wurtzilitz, zinc, zircon.

National Forests

(By H. N. Wheeler, Chief of Public Relations District 2, U. S. Forest Service.)

THE act of congress under which the national forests of the country were created was passed March 3, 1891. The following provision, Section 24 of the act, shows how and for what purpose the forests were created:

"The President of the United States may from time to time set apart and reserve in any state or territory having public land bearing forests, any part of the public lands wholly or in part covered with timber or undergrowth, whether of commercial value or not, as public reservations, and the President shall, by public proclamation, declare the establishment of such reservations and the limits thereof."

The first national forest was created by President Harrison in 1891, under the name of the Yellowstone Park Timberland reserve. Originally all forests established under this act were known as forest reserves, but in 1907 congress changed the official designation to "national forests."

There are at present 146 national forests in the United States, of which 15 lie wholly and two partly within the state of Colorado. The total area within these forests and within the borders of the state is 14,743,283 acres. A considerable amount of land within the forest boundaries has passed into private ownership or has been otherwise withdrawn from the forest area under provisions of the various acts of congress relating to the national forests, leaving a total net national forest area for the state of 13,277,038 acres.

The administrative headquarters for Colorado national forests is located at Denver, the national forests of the state, except the very small part of the La Sal forest located in the extreme western part, being in what is known as the Rocky Mountain district. The chief executive officer of the district is the district forester, and each forest is in charge of a forest supervisor, whose chief headquarters is at

some central place within or near the forest area. The total number of national forest officers in the state at present is about 304. The accompanying table gives the name of each national forest wholly or partly in this state, together with its net area within this state, and the headquarters of the supervisor.

Nat'l Forest	Headquarters	Acres
Arapahoe.....	Hot Sulphur Springs	635,900
Cochetopa.....	Salida	908,335
Colorado.....	Fort Collins	853,641
Grand Mesa.....	Grand Junction	659,863
Gunnison.....	Gunnison	905,303
*Hayden.....	Encampment, Wyo.	65,769
Holy Cross.....	Glenwood Spgs.	1,124,369
-La Sal.....	Moab, Utah	26,631
Leadville.....	Leadville	927,388
Montezuma.....	Mancos	697,141
Pike.....	Colorado Spgs.	1,084,338
Rio Grande.....	Monte Vista	1,135,778
Routt.....	Steamboat Spgs.	742,827
San Isabel.....	Pueblo	598,936
San Juan.....	Durango	1,240,112
Uncompahgre.....	Delta	778,291
White River.....	Glenwood Spgs.	892,416

*Lies principally in Wyoming.

-Lies principally in Utah.

These forests lie almost exclusively in the mountainous districts of the central and western parts of the state. Their boundaries are very irregular and most of them lie in two or more counties, while some of them are made up of two or more separated tracts. The location of the various forests wholly or partly in the state by counties is as follows:

Arapahoe Forest: Grand and Jackson counties.

Cochetopa Forest: Chaffee, Gunnison, Hinsdale and Saguache counties.

Colorado Forest: Boulder, Gilpin, Jackson, Jefferson and Larimer counties.

Grand Mesa Forest: Delta, Garfield, Gunnison and Mesa counties.

Gunnison Forest: Delta, Gunnison and Montrose counties.

Hayden Forest: Jackson county.

Holy Cross Forest: Eagle, Garfield, Gunnison and Pitkin counties.

La Sal Forest: Mesa and Montrose counties.

Leadville Forest: Chaffee, Lake, Park and Summit counties.

Montezuma Forest: Dolores, La Plata, Montezuma and San Miguel counties.

Pike Forest: Park, Clear Creek, Douglas, El Paso, Teller and Jefferson counties.

Rio Grande Forest: Conejos, Hinsdale, La Plata, Mineral, Rio Grande, Saguache and San Juan counties.

Routt Forest: Grand, Jackson, Moffat and Routt counties.

San Isabel Forest: Alamosa, Chaffee, Custer, Fremont, Huerfano, Las Animas, Pueblo and Saguache counties.

San Juan Forest: Archuleta, Conejos, Hinsdale, La Plata, Mineral, Rio Grande and San Juan counties.

Uncompahgre Forest: Gunnison, Hinsdale, Mesa, Montrose, Ouray, San Juan and San Miguel counties.

White River Forest: Eagle, Garfield, Moffat, Rio Blanco and Routt counties.

The national forests are administered by the secretary of the department of agriculture through an official created by act of congress and known as the national forester. The secretary of agriculture is authorized by act of congress to issue from time to time regulations governing the use and occupancy of national forest lands and the use of timber and other national forest resources. These regulations are published in what is known as the "Use Book," which may be obtained by actual or prospective users of the national forests from the national forester at Washington, or from any district forester or forest supervisor.

"National forests have for their objects to insure a perpetual supply of timber, to preserve the forest cover which regulates the flow of streams, and to provide for the use of all resources which the forests contain, in the ways which will make them of largest service. Largest service means greatest good to the greatest number during the longest period of time."

Timber—Colorado has a tremendous resource in her timber. There are over 22½ billion board feet of timber within the national forests of Colorado. The U. S. forest service protects these forests from fires in co-operation with local people and is encouraging their development. With the rapid depletion of other sources of timber, lumbering within the national forests of Colorado promises to become one of her large industries and there are many undeveloped tracts waiting the initiation of the industry. This development, although in its infancy, is already taking place as is witnessed by the sale by the U. S. forest service of some 300 million feet of timber in one body in the southern part of the state. All timber cutting is done under forestry principles and the industry in the state will be permanent rather than transitory, and on account of increased growth obtained through the practice of forestry will increase in size. During the year 1923,

32,557,000 feet, board measure, were cut by commercial operators within the national forests of the state, for which the government received \$85,-862. Twenty-five per cent of this amount is given the state by the federal government. Eight hundred ninety thousand feet were sold to homesteaders and settlers at a nominal cost for the development of their ranches. In addition, free use to homesteaders, ranchers, miners and settlers of dead material was granted. This alone amounted to better than 11 million feet of timber. Three thousand five hundred and four permittees took advantage of the free dead timber that is available to homesteaders and ranchers, etc., by request of the U. S. forest service. The availability of a perpetual supply of timber within the boundaries of the state is becoming increasingly important, and with increased transportation charges Colorado is indeed in a fortunate position in this respect.

Reforestation—During 1923, a total of 908 acres was planted in the state of Colorado. This consisted mostly of Douglas fir and Engelmann spruce, with small quantities of yellow and bristlecone pine. The greater part of the planting was done on the Pike national forest on Ruxton creek above Manitou and adjacent to the Pikes Peak cog road. A small area was planted on the Uncompahgre plateau west of Montrose. During the year a

reconnaissance was made of areas in need of reforestation throughout the state and it was found that there are 891,000 acres either treeless or covered with worthless brush or small tree growth that has no commercial value. Of this amount 463,000 acres is in the Englemann spruce type, 214,000 acres in the Douglas fir type, 119,000 acres in the lodgepole pine type and the remainder in the yellow and bristlecone pine types. The largest areas of land not producing commercial timber are located on Grand mesa in the forest of that name; in the Cochetopa forest west of the San Luis valley; on the Routt forest east and north of Steamboat Springs; on the San Juan forest north of Durango, and on the White River forest. Most of these areas were burned over from 40 to 70 years ago and the denudation was so complete that valuable coniferous forests have not replaced the former stand. Instead there are large areas covered with oak brush or aspen, the greater part of which has no commercial value. In time, as funds are made available by congress, the amount of planting in this state will be greatly increased. Following is a statement showing the investments for logging and manufacturing national forest timber, number of mills drawing all or an important part of timber supply from forests, and number of employes engaged in such work, made up in response to a request from the forester, for the state of Colorado only:

Forest	Estimated Investment	No. of Mills	No. of Employes
Arapahoe	\$132,000	6	125
Cochetopa	170,000	19	140
Colorado	161,250	29	257
Grand Mesa	7,500	6	44
Gunnison	49,000	14	160
Holy Cross	50,000	15	100
Leadville	20,000	2	72
Montezuma	60,000	11	110
Pike	86,150	6	70
Rio Grande	49,550	15	60
Routt	9,000	14	60
San Isabel	16,400	7	60
San Juan	15,000	4	40
Uncompahgre	30,000	6	80
White River	25,000	14	75
Totals for Colorado	\$880,850	168	1,453

Protection—Fifty-nine forest fires occurred during the year 1923 and burned 33 acres of timber land and 57 acres of open and brush land in the national forests. The damage to timber and forage is estimated at \$47. It cost \$1,039 to suppress the fires, though only two covered larger areas than 10 acres each. Twenty-three of these fires were man-caused and, therefore, preventable. The other 36

were set by lightning. Campers still constitute one of the greatest menaces with which the forest officers have to deal. There is need for extreme care on the part of everyone camping in the open and all camp fires must be drowned out with water if the forests are to be properly safeguarded. Careless smokers were responsible for nine of the fires which occurred. There is too little realization of the danger

from tossing away a lighted match or live cigarette butt while traveling by auto, or in emptying pipe ashes, if precaution has not been taken to see that they are dead and, therefore, harmless. The local forest officers take care of the fire problem on most of the forests without the aid of lookout observers. For a number of reasons, however, there are certain parts of the forested region given additional protection in this way. Two such lookout stations are maintained in Colorado, one on Twin Sisters peak, near Estes Park, on the Colorado forest, and the other on the Devils Head, south of Denver, on the Pike forest. These stations are manned during the dry season and much damage is eliminated by the fact that fires are picked up quickly from these points. The greatest asset in fire protection in Colorado is the wonderfully fine spirit of co-operation shown by the large percentage of the resident population. In general, due care and diligence are used in preventive measures. There are many cases where initial action has been taken to suppress fires and no longer is there a delay in promptly reporting fires to forest officers. That there were fewer fires and less damage and cost in 1923 than ever before in the history of the forest service in Colorado is attributed largely to the fact that there was a great excess in precipitation amounting to frequent cloudbursts. The fire record for 1923 is an enviable one and affords a new mark to strive for. With the exercise of proper precaution and care on the part of everyone in the national forests, there is no reason why this record should not be maintained even in years when there is little rain.

Other Resources: Forage—Intermixed with the stands of timber on the forests are many parks or open places covered with a heavy growth of forage. There is also much grass and other forage plant growth in the timber where the tree growth is not too heavy. Most of this forage can be grazed by stock without injury to the timber. Some areas are closed to grazing in order to protect the slopes of streams, which furnish municipal water supplies, and other areas, rock slides, etc., are barren of any forage growth. About ten million acres of the thirteen and one-quarter million acres in the national forests of Colorado is used for pasturage, and feeds for the summer over 25 per cent of the cattle and 40 per cent of the sheep owned in the state. During 1923, this

area supported 332,210 cattle, 6,634 horses and 845,446 sheep grazed under paid permits. The average grazing season for cattle and horses is about five months and the fee for this period is 50 cents per head for cattle and 62 cents for horses. The average season for sheep is about three months and the fee is 8¼ cents per head. Up to the present time, and for the year 1925, the fees have been based on a flat annual rate regardless of variations in character of individual ranges. Intensive appraisal has been conducted which is being considered as a basis for revision of the grazing fees beginning in 1926. This, if put into effect, will result in the revision fees being based upon the worth of the various individual ranges rather than on a flat rate for all ranges. Sheep are grazed in the extremely high portions of the forests, where the snow stays until the latter part of June and begins falling again in September. About 3,400 cattle and 4,400 horses were grazed free under a regulation which provides for grazing free not to exceed ten head of work and milk stock in actual use by settlers, prospectors, etc.

Larkspur Eradication—Certain poisonous plants on the range kill stock, but it has been found that about 90 per cent of this loss can be prevented by digging or grubbing the principal poisonous plant, which is larkspur. During the latter part of 1915 definite grubbing of larkspur was begun in Colorado. Since that time about 5,346 acres has been grubbed, at a cost of approximately \$3.81 per acre. It is estimated that this work effected a saving of \$21,300 to the livestock industry of the state during the past year. Past experience has shown that it can be expected that this amount will be saved annually on the areas where grubbing has been carried on.

Range Improvements—The construction of range improvements that are at present in use on the national forests of Colorado consists of: Fences, 428 miles, value \$57,469; corrals, 46, value \$2,639; improved stock drive ways, 653 miles, value \$19,831; stock bridges, 5, value \$1,313; water developments (improved springs), 157, value \$4,637.

Range Reconnaissance—Intensive range reconnaissance to determine just what forage the forests are growing has been carried on in several places, in order that the range may be stocked to the full carrying capacity

without damage. Over 1,397,000 acres has been covered by this intensive investigation.

Game—Game animals are always interesting and the forest service game census for 1923 shows there are in the national forests of the state approximately 20,914 black-tailed or mule deer and 51 white-tailed deer, 5,610 mountain sheep and 5,837 elk, 507 mountain lions, 103 wolves and 29,585 coyotes, 2,592 black and brown bear, 5,346 lynx and wildcats, 3,467 foxes, 41,594 beaver, 8,450 weasels, 25,460 muskrats, 8,068 marten, 5,907 mink and 3,418 badger. 4,198,000 fish fry were planted by the forest officers in the state in 1923. Twelve of the state game refuges have been established within the national forests of the state, under the following names. The forest service co-operates with the state authorities in the protection of these areas.

Name	Counties where located in whole or part
Cochetopa.....	Saguache
Colorado.....	Larimer and Boulder
Denver Moun- tain Parks.....	Clear Creek, Jefferson, Park
Gunnison.....	Gunnison
North Park.....	Jackson
Ouray.....	Ouray
Pikes Peak.....	Teller and El Paso
Poncha Pass.....	Chaffee, Gunnison, Saguache
Royal Gorge.....	Fremont
Snowmass.....	Pitkin
Spanish Peaks.....	Huerfano and Las Animas
Williams Fork.....	Grand

Agricultural Land—When the boundaries of the national forests originally were established, it was inevitable that some agricultural and non-forest land should be included. The boundaries, however, since have been readjusted from time to time until within the state of Colorado approximately 1,830,722 acres, or about 11 per cent of the original area, has been released; partly because of the agricultural possibilities of the lands and partly because it was not suitable or needed for timber production or other national forest purposes. In addition to this general contraction of the boundaries by eliminations from the outer edges, a total area of 269,642 acres, mostly in small tracts scattered throughout the interior of the forests, has been made available for entry under the forest homestead act of June 11, 1906, which authorized the secretary of agriculture to list with the interior department for entry under the homestead laws such lands in the national forests as in his opinion were chiefly valuable for

agriculture and not needed for public purposes. By an act of congress passed August 10, 1912, the secretary of agriculture was directed to "select, classify and segregate, as soon as practicable, all lands within the boundaries of national forests that may be open to entry under the homestead law." This general classification now has been completed in the national forests of Colorado, and all the lands therein found to be chiefly valuable for agriculture have been listed for entry. The remaining lands were classified as permanently more valuable for national forest purposes, and no further applications for examination and listing are accepted by the forest service. Many of the areas already listed, however, still are vacant and where this is so may be entered by qualified persons upon application to the local land office concerned as in ordinary cases.

Land Exchange—There are 1,466,245 acres of privately owned lands within the exterior boundaries of the Colorado national forests, acquired under the various land laws. Much of this is permanently adapted to the production of timber and is not desired by the owner; in some cases because it was taken up for the merchantable timber which has now been removed; in other cases it was taken up in the hope of making a successful farm and proved to be worthless; in still other cases it is mineral ground which has been worked out or proved to be valueless. Some of it is used for grazing; some not at all. Often a single owner has acquired a number of widely separated tracts. On March 20, 1922, the president approved the land exchange act, which authorizes in general language the exchange of private lands for government lands in the national forests, or authorizes the exchange of private lands for timber of equivalent value. This will make it possible for private owners to consolidate their holdings and to exchange timber producing land for land of greater value for grazing, and will at the same time, permit the government to consolidate its holdings in more compact bodies of timber land, which will be easier of administration and less expensive to protect. Both the private land offered and the government land or timber to be selected must be within the same state and within the exterior boundaries of a national forest. Exchanges not conforming to these requirements cannot be made except where additional authority by special act of congress is secured. Private land

which contains a relatively large proportion of agricultural soils or is distinctly mineral in character will not be accepted in exchange; only lands primarily adapted to timber growing are desired as a rule. Persons interested in making such exchanges should apply to the forest supervisor of the forest concerned or to the nearest forest officer for detailed information as to procedure.

Recreation—Primarily the forests of the United States should be protected and perpetuated because they are the source of the nation's future wood supply, but the forests have other values which justify the interest of the public in their protection. More and more people realize the value of the recreation center as a mighty factor in the development of both the youth and the adult of cities. Recreation grounds grow in importance as population increases. In 1923, 1,580,483 people visited the national forests of the state. There are under license 63 hotels, resorts and club houses and 590 summer residences within the forests of Colorado. Areas intensively used as camping and picnic grounds have been reserved from appropriation for an exclusive use and the convenience and pleasure of the public thereby provided for.

Roads—The forest service participates in building roads in and near the

forests. Some roads it builds alone or in co-operation with the counties, using its own engineering organization, road-building machinery and government funds. During 1923 a total of 123 miles of new road was constructed by the expenditure of \$406,773. The large projects required \$285,765, and the small projects \$121,008. Trails cost \$5,236, 176 miles having been constructed. In constructing roads, the counties and the forest service choose the roads and provide the funds, and the bureau of public roads does the engineering and construction work on the large projects. Trails in the forests are necessary to protect the areas against fire by making it possible to get in with pack train loads of supplies.

Finances—The receipts from the sale of timber, grazing permits, special use permits, etc., during 1923, amounted to \$464,945.74. Of this amount, 35 per cent, or \$162,736.05 was used in the state for roads and schools, 25 per cent being sent the counties in which national forests are located, and 10 per cent spent directly by the forest service for roads. The total spent in operating the district office in Denver, the experiment stations, and the administration of the 15 forests in Colorado, including the amount spent by the forest service on roads, trails, telephone lines, ranger stations, etc., was \$678,492.94.

Tourist Attractions

FOR a good many years there has been a decrease in the value of the output from Colorado's metal mines. Expert mining engineers familiar with mining conditions and operations and with ore supplies in Colorado are agreed that the state's metal supplies are far from exhausted, but the fact remains that less gold and silver and associated metals is being marketed from our mountains than they produced twenty years ago.

But whatever may be the condition of Colorado's metal supplies, there can be no doubt that the state has in its incomparable climate and its wonderful mountain scenery a resource which is returning a larger revenue each succeeding year and which promises more than to offset any further losses that may be suffered from curtailment of metal mining operations. The number of tourists and vacationists from other states and countries who come to Colorado annually is

larger now than it has ever been before and each year is showing a substantial increase over the previous year. Our climate and scenery are permanent resources and the game of our hills and mountain fastnesses and the fish of our streams and lakes are being so replenished and protected that fishing and hunting are now and will continue to be among the state's greatest attractions for visitors.

Switzerland has been more successful than perhaps any other country in capitalizing its mountain scenery for profit. Circumstances have aided nature and the energy and enterprise of the Swiss people in making the scenery of that country return a substantial revenue every year. Before the war Switzerland was for many years on nearly all the direct routes of tourist travel through Europe and few persons who visited the continent failed to spend some time in the Alps and to visit the cities and lakes of

Switzerland that are so familiar to all European travelers. Before the war estimates placed the revenue derived by the Swiss people from tourist travel as high as \$35,000,000 annually.

Yet Colorado is nearly seven times as large as Switzerland, and its mountain area is fully six times as great. Colorado has at least 43 peaks that tower more than 14,000 feet above sea level, while Switzerland has but eight, Colorado has fully 1,000 peaks 10,000 feet high and over, while Switzerland has fewer than one-eighteenth as many. Every peak in Colorado is accessible for any careful and reasonably strong mountain climber entirely to its summit, while the highest peaks in Switzerland are accessible to their summits only for hardy and expert climbers and then only under the direction of experienced guides.

There are thousands of beautiful lakes in the mountains of Colorado, many of them of large size and all of them of wonderful beauty. Some of Colorado's lakes, though far less famous than Lake Lucerne, are not surpassed by it in certain characteristics of natural beauty. If they were surrounded by beautiful villas and hotels scores of Colorado's lakes might soon have almost as many admirers as have the lakes of Switzerland. Some of the more easily accessible of our mountain lakes are beginning to be surrounded by the modern conveniences that many tourists and travelers demand, but there will always be in Colorado hundreds of picturesque lakes where fishing is good and where natural beauty is not too much marred by the art of man.

It is not the purpose of this volume to enumerate, even partially, the important tourist attractions of the state. A much larger volume than this would be required to treat the subject adequately. The intention here is only to give such data as are available regarding the importance of the tourist trade to the state and to show something of its growth in recent years and its prospects for much greater growth in the future. The railroads serving Colorado, the Commercial clubs of the various cities and towns, the Denver tourist bureau and other similar corporations and organizations publish annually hundreds of booklets and leaflets descriptive of the state's tourist attractions, and such literature may be obtained upon application to the various railroads and organizations.

The national parks and monuments located in the state are named and briefly described elsewhere in this volume. Some idea of the rapidly growing importance of the tourist industry in Colorado may be gathered from figures showing the increase in the number of visitors to these parks annually. The Rocky Mountain national park was created by act of congress in 1915. That year the secretary of the department of interior estimated the number of visitors to the park at 31,000. In 1916 the number of visitors was about 51,000 and in 1922 the number of visitors, according to the official records of the secretary of the department of interior, was 219,164. These visitors came from 45 states. During the season 51,112 automobiles were driven into the parks, coming from 40 states. The number of visitors in 1923 was about the same as in 1922. Detailed figures are not available showing the number of visitors annually in the Mesa Verde national park, but within the past four years the number has much more than doubled, due partly to the construction of new automobile highways leading across the state and into the park and partly to the extensive advertising recently given to the remains of habitations of the pre-historic Cliff Dwellers which are found here.

Fifteen national forests lie wholly within Colorado and two lie partly in the state. These forests have an aggregate area of about 13,270,000 acres. They include nearly all the higher mountain peaks not within the national parks and a very large part of the most beautiful scenery in the state lies within their boundaries. The forest service is devoting more attention each year to popularizing these forests as national playgrounds and to improving them with roads, trails, shelter houses and other conveniences for travelers. The forest service estimates that about 1,580,000 people visited the national forests of the state in 1923, some of them remaining in the forest limits only a few hours, some remaining several weeks and some of them making several visits. The average time spent by each of the visitors within the forest limits, according to the records of the forest service, was three days. Most of them spent much more time than this in the state. Of course, a very considerable number of these forest visitors were Colorado people, but some idea of the vast and growing importance of the state's tourist business may be

gathered from the figures here given. A great many of the visitors to the state do not enter the national forest limits except on railroad trains and hence are not counted in the forest service's enumeration. Many of the visitors to Rocky Mountain national park never enter the national forests. If the number of visitors to the state each tourist season is not more than 500,000, and they spend an average of three days each in the state they must leave in Colorado not less than \$15,000,000 annually. The actual number of visitors annually now is perhaps nearly 500,000, but the time these visitors spend in the state averages much more than three days each, so that the actual amount of money spent by tourists and sightseers annually in Colorado is no doubt more than the present annual value of the output of the state's metal mines.

Big game still is found rather abundantly in Colorado, including deer, antelope, bear, elk, mountain lion, gray wolf and coyote. In an article in this book devoted to the national forests of the state will be found approximate estimates of the numbers of various kinds of big game found within the national forests. The numbers found outside the forest boundaries bring the totals considerably above the figures there given, but no accurate survey has been made except within the forests. There is also much small game, including sage hen, grouse, pheasant, dove, wild duck, rabbit, squirrel and other varieties. In recent years the state has exercised strict supervision over the killing of game, and such protective measures as have been adopted and enforced have had the effect of increasing the supply of many kinds of the larger game birds and animals which were in danger of extinction. There is open season on practically all game, and the regulations under which game may be killed may be obtained from the state game and fish commissioner at the state capitol. There are now within the state protected areas in which game may not be killed at any time, except certain predatory animals, which may be trapped or hunted under special permits granted by the state game and fish commissioner. These are known as game refuges, the following having been created by the state legislature in 1921:

The Colorado State game refuge, in Larimer and Boulder counties, surrounding the Rocky Mountain national park on the north, east and

south. Restrictions on hunting and trapping within the national park are even more rigid than in the game refuge. This refuge lies within the borders of the Colorado national forest.

The Pikes Peak game refuge, in El Paso and Teller counties, including much of the area about Pikes peak, and being within the Pike national forest.

The Spanish Peaks game refuge, in the southwestern part of Huerfano county and extending into western Las Animas county, in the San Isabel national forest.

The Denver Mountain Parks game refuge, west of the city of Denver, in Jefferson, Clear Creek and Park counties, including the Denver mountain parks.

The Colorado Antelope refuge, comprising four townships in Larimer and Weld counties, north of Wellington.

Seven additional game refuges were created by the legislature in 1923, the acts creating them not becoming effective until some time in August.

Nothing more important has been done to increase tourist travel to Colorado than the construction of good highways reaching nearly all parts of the state. A decade ago nearly all visitors to Colorado came by rail. It was next to impossible then for an automobile to make a trip across the state east and west, for there were no roads worthy of the name across the mountains. When occasionally an automobile guided by some daring driver made such trip without mishap over such roads as there were his accomplishment was looked upon in the nature of an extraordinary achievement and newspapers gave him something of the same sort of notice they give today to airplane pilots who fly across the continent without stopping.

But in recent years excellent highways have been built into many of the most beautiful mountain districts and many of our most magnificent mountain peaks which were unknown even to most of the people of Colorado are now coming to be almost as well known as Pikes peak, which in the past was practically the only mountain in Colorado known outside the state. Today there are five or more automobile routes across the state east and west and travel is heavy on all of them. More tourists visit Colorado today by automobile than visit it by rail, and automobile travel to the state is increasing much more rapidly than travel by railroad. The amount

of money available for highway construction in the state is increasing each year, and it is fair to assume that the progress made in this direction in the next decade will be more rapid than that of the past decade. Some of the mountain areas that are yet inaccessible because of lack of highways are of exceptional beauty and grandeur and Colorado will for many years be offering each season some new scenic attraction to its visitors. People no longer come to Colorado year after year to see Pikes peak alone, but each year they may visit some new peak, lake or mountain park and none of our visitors of today will live long enough to see all that is worth while in the Colorado Rockies by making one visit to the state each year.

The characteristics of the Colorado climate that make it so attractive to tourists and healthseekers are its dryness, high percentage of sunshine, moderate air movements, and moderate and equable temperatures. The high altitude affects the climate favorably for persons afflicted with pulmonary and similar diseases, the air being rarer, less humid and generally purer than the air in lower altitudes. The average annual precipitation for the state is about 17 inches, ranging from as low as 6 inches in some localities in the San Luis valley to above 30 inches in parts of the San Juan mountains. The humidity of the atmosphere is generally very low in all parts of the state, which renders the climate much less oppressive during periods of high temperature than in districts of lower altitude and high-

er precipitation. Average humidity is lower in Colorado than in any other state except Arizona. Air movements are moderate in all parts of the state, though there is frequently considerable wind in some seasons of the year, cyclones are unknown, and the hot winds that cause great damage to crops in states immediately east and south of Colorado seldom reach into this state.

Colorado is rich in mineral waters, some of them acknowledged to be of high curative qualities. More than 250 mineral springs and wells in the state have been carefully studied and their waters analyzed by the state geological survey, and there are perhaps as many which have not been analyzed. The largest single group of mineral springs in Colorado is found in and about the city of Steamboat Springs, in Routt county. Among other well known groups of mineral springs are those at Glenwood Springs, Idaho Springs, Pagosa Springs, Hot Sulphur Springs, Manitou and Canon City. Many of these places are well known health and tourist resorts, some of them having large bathing pools, sanatoria, hotels and other conveniences. One of the springs at Pagosa Springs has an average flow of about 700 gallons per minute, being one of the largest mineral springs in the United States. The waters of many of the Colorado mineral springs are highly radio-active, comparing favorably with the most notable springs in the world in this respect. Temperatures of the waters vary greatly, the highest being that of the Hortense hot springs, near Mt. Princeton, in Chaffee county.

Colorado Highways

HIGHWAY construction has proceeded more rapidly in Colorado in the past decade than in any other state of the Rocky Mountain group, but not quite so rapidly as in some of the more densely populated states of the east and on the Pacific coast. Survey of highway mileage in the state made by the United States bureau of public roads in 1921 and carefully revised in 1923 shows a total of 67,608 miles of public highways, not including streets and alleys in incorporated cities and towns, and 2,445 miles of streets and alleys in such incorporated places. This is the most complete survey of road mileage ever made in Colorado, showing 28,000 more

miles of public roads in the state than was shown by the survey made by the state highway department in 1916. The increase over the 1916 survey is partly due to an extensive increase in highway mileage since that time, and partly to the fact that the recent survey was much more nearly complete. The total road mileage is divided into 8,923 miles of state highways and 58,685 miles of county roads. The most notable feature in the survey is the rapid increase in improved roads in the state since 1916. At that time there was not a mile of hard surfaced road in Colorado outside the larger cities, while at the present time there is about 170 miles of hard surfaced

road, 3,200 miles of gravel and sand-clay state roads, and 5,013 miles of gravel and sand-clay county roads, 5,303 miles of graded state roads, and 28,606 miles of graded county roads. Practically all of the surfacing and a large part of the grading has been completed since 1916. Every important city and town in the state at the present time may be reached over good automobile roads, while excellent mountain highways make it possible for the tourist and sightseer to visit the most attractive scenic districts in the state and even to drive to the summits of some of the best known mountain peaks. Las Animas county ranks first in total road mileage with 6,000 miles, it being also the largest county in the state. Weld county, which ranks third in area, ranks second in road mileage and first in mileage of improved roads. Hard surfaced roads have been built chiefly near the larger cities in Adams, Arapahoe, Jefferson, Boulder, Larimer, Weld, El Paso, Pueblo, Otero and Mesa counties.

Figures compiled by the United States bureau of roads show that approximately \$11,000,000 was spent for highway construction and maintenance in 1923, exclusive of expenditures for streets and alleys in incorporated cities and towns. Of this amount, \$5,453,466 was spent under the direction of the state highway department and \$4,934,449 by the several counties. The United States forest service during the same period spent approximately \$523,448 on roads within the national forests.

State road funds include contributions to the state from the federal government, which are spent on what is known as federal aid projects, being mainly highway projects approved by the United States bureau of roads. On such approved projects the government pays 56.12 per cent of the cost and the state the remainder. Total expenditures on federal aid projects in the state in 1923 were \$3,407,004. The state also supervises the construction of what is known as state projects, in the cost of which the state and the several counties interested cooperate. On such state projects the expenditures in 1923 were \$1,262,247. The state is also spending more money each year for maintenance, annual expenditures now running close to \$1,000,000.

It is impossible to determine accurately the amount of money available from all sources for highway con-

struction and maintenance in Colorado in 1924. Indications are that state funds will amount to close to \$3,500,000, county funds to about \$4,000,000 and federal funds including federal aid, forest service appropriation and national park expenditures, something over \$2,000,000. The total will be considerably less than that available in 1923, but will be increased by a balance of more than \$2,500,000, left over at the end of 1923 from the funds available that year. This large balance was due in a measure to the fact that unfavorable weather in 1923 prevented the construction of much highway for which contracts were let and appropriations made. The state fund for the year 1924 includes \$1,500,000 of bonds from the \$6,000,000 bond issue approved in 1922. Beginning August 1, 1923, all money due the state highway fund from the registration and licensing of motor vehicles, which is one-half the license and registration fees, must be paid into the fund to meet the interest and amortization charges on these bonds. The state highway department's share of all motor license fees, which have been used in the past for highway construction and maintenance, must now be used to meet fixed charges on the bonds until they are retired.

A law enacted by the Twenty-third General Assembly provided for a tax of one cent a gallon on gasoline and other petroleum products, the proceeds of which are to be divided equally between the state highway department and the several counties and to be used exclusively on highway work. The Twenty-fourth General Assembly amended the law to make this tax two cents a gallon, the proceeds to be divided as before. It also repealed the half-mill tax levy for road purposes levied by an act of the General Assembly in 1919, the theory being that the additional one cent per gallon tax on gasoline will provide the revenue lost to the road funds through the repeal of the half-mill levy and will place the tax directly upon the people who make use of the roads. However, the amount of money collected under the additional one cent gasoline tax, though increasing each year, is not yet so large as that formerly collected under the one-half mill levy.

The Twenty-third General Assembly enacted a new law for the managing and regulation of the state highway department, providing for an advisory commission of seven members, and a chief highway executive, to be appoint-

ed by the governor, and known as the state highway engineer. Under this act the highway department has been entirely reorganized, being now composed of four main divisions, known as the accounting, engineering, maintenance, and purchase and traffic divisions. The four men at the head of these divisions, acting under the direction of the state highway engineer and the assistant highway engineer, are the executive officers of the department.

Certain main trunk highways, designed to connect all sections of the state and to reach all county seats and important cities, laid out by the state highway engineer with the advice of the commission and the concurrence of the governor, are designated as state highways and state funds are expended only on such highways. The state highway budget is made up annually in the same way the state highways are designated. The law provides that no state highway funds may be used within the limits of any incorporated city or town, with certain exceptions affecting smaller towns.

The boards of county commissioners of the several counties have general supervision over the construction and maintenance of roads and bridges within their respective counties. They have absolute jurisdiction over county roads, and they co-operate with the state highway department in all work on highways within their respective counties. All work on county roads and bridges is paid for from county funds, derived from special tax levies and from other less important sources. Federal aid money is now expended upon a definite system of federal aid highways, equal to seven per cent of the total highway mileage of the state.

The state highway fund, the expenditure of which is directed by the state highway department upon state highways exclusively, is derived: (1) From a special half-mill tax levy authorized by vote of the people in the general election in November, 1914, and until 1924 from an additional half mill levy authorized by the Twenty-second General Assembly, but repealed by the Twenty-fourth. (2) From such funds as may be appropriated by the state legislature to the state highway fund. (3) From all funds now in and hereafter to be paid into the internal improvement income fund, derived from the sale and administration of land granted by the federal government to the state for internal improvements. (4) One-half

the revenue arising from the licensing of motor vehicles, from chauffeurs' licenses and from fines and penalties for violation of vehicle and road regulations. (This revenue, as above stated, must be used to pay interest and sinking fund on the \$6,000,000 road bond issue of 1923 until the issue is retired.)

(5) One-half the revenue arising from a tax of two cents a gallon on gasoline and other petroleum products authorized by the Twenty-fourth General Assembly. (6) All public donations, including allotments made by the federal government to the state for highway purposes. Such federal allotments, however, are administered partly under the direction of the federal government and cannot be paid out until federal highway engineers have approved preliminary engineering on the project on which they are to be expended, and cannot be paid over until government agents approve the work done. (7) The proceeds of the sale of the \$6,000,000 bond issue authorized by the vote of the people in November, 1922, such bonds to be sold at the rate of \$1,500,000 annually for four years, beginning with 1923. (8) Interest from the investment of highway funds.

The national forest service does considerable road construction work within the national forests or near their borders, partly in co-operation with the state highway department and partly in co-operation with the several counties. The federal bureau of roads also co-operates with the forest service in some of this work and furnishes a part of the funds. The amount being spent on roads and trails within the forest boundaries is being increased each year and some of the state's finest highways are in the national forests.

It is only within recent years that Colorado's highway program has been financed in such a way that a definite plan of road construction and maintenance could be established and carried into effect, but since highway finances have been put on a sound basis and large federal funds have been made available a great program of improvement has been put under way and is being pushed rapidly. Before many years the principal roads leading through the state from north to south and east to west will be paved for the greater part of their distance if not in their entirety, and while that work is being done all other main roads are being surfaced and maintained with the joint aid of federal, state and county funds.

Colorado's Educational System

COLORADO'S public school system compares favorably with the best state public school systems in the country. It is being enlarged and expanded rather rapidly to meet the needs of a growing population, there being few states in which the percentage of increase in the number of school buildings and in the number of teachers employed has been greater in the past decade. In recent years the number of schools has been decreasing instead of increasing, however, due to the large number of Consolidated schools, which provide much better educational facilities than the smaller schools they replaced. At present there are 1,944 school districts in the state, according to the records of the state superintendent of schools, with 3,230 schools, including 3,622 school buildings. In these there were employed during the school year ending June 30, 1923, 8,599 teachers, of whom 7,263 were females and 1,336 males. Tabulations found elsewhere in this volume show the number of school buildings and school teachers employed in the various counties of the state for the school year ending June 30, 1923, the figures being taken from the records of the state superintendent of schools.

There are approximately 80 consolidated schools in the state and the number is increasing gradually each year. There are more than 50 centralized schools and many joint schools, in which two or more counties are interested. The school population of the state for the school year ending June 30, 1923, was 287,318, compared with 272,693 for the previous year. The total enrollment in the public schools of the state during the same school year, including enrollment in the county high schools, was 249,813, and the average daily attendance, including attendance in county high schools, was 174,484. Enrollment during the previous school year was 243,004, while the average daily attendance that year was 170,426. Total public school revenues for the year ending June 30, 1923, including special revenues of county high schools, were \$27,070,684, compared with \$22,151,541 for the preceding year. Public school revenues in Colorado have increased very rapidly in recent years, due chiefly to the levying of higher school district taxes. A considerable part of the increase for the past three years has been called for to pay increased salaries of teach-

ers, due to the fact that the legislature in 1921 enacted a law providing for a minimum salary of \$75 per month for all public school teachers in Colorado. The fund necessary to provide this increase has been provided partly by increased district levies and partly by increased county levies. The law was revised by the legislature in 1923, but the minimum salary remains the same. Average salaries paid teachers in all classes of public schools have increased substantially, as may be seen by consulting tables published elsewhere in this volume and in previous issues of the Colorado Year Book. For the school year ending June 30, 1923, the average monthly salary paid women teachers in high schools of the state was \$136.11, and men teachers, \$177.87. These averages are slightly lower than the averages for the previous year, but the general average of salaries paid all teachers in the state is perhaps higher now than ever before. The lowest average salary now paid is to women teachers in schools employing only one teacher, being \$94.32.

The state has a large and growing permanent school fund derived from the sale of land granted by the federal government for the benefit of the public schools and popularly known as state school land. On November 30, 1922, according to the state board of land commissioners, there was \$7,235,268.78 in the permanent school fund. The increase since that time has been considerable, but the exact figures at the present time are not available. This permanent fund is invested in farm mortgages, state bonds, state warrants and other securities, and the interest is turned into the public school income fund, which is distributed semi-annually among the various counties of the state for the benefit of their schools in proportion to the school population of the several counties. On November 30, 1922, deferred payments and accrued interest on all state land sold and not fully paid for amounted to \$7,207,406.77. This total has decreased somewhat since that date, on account of the fact that sales of public land have been few and cancellations of previous sales have been rather large. A small amount of the total does not belong to the school fund, being due for the payment of other state land, but the amount due the school fund from this

fund is only a little short of \$7,000,000. Payments on the purchase price of this land are all turned into the permanent school fund, while payments of interest go into the income fund and are distributed among the counties. Income derived from the administration of the unsold school lands and the mineral rights reserved on school lands that have been sold also is turned into the school income fund, which fund now provides more than \$8,000 annually for distribution among the various public schools of the state. This amount is increasing steadily, both as a result of the increased interest accruing from the permanent fund each year and the increased revenue derived from the administration of the unsold land and the mineral rights. On November 30, 1923, there was 2,991,689 acres of state land remaining unsold, nearly all of which is school land and most of which is under lease and bringing in a revenue to the school fund. This land is valued at approximately \$33,000,000, while the mineral rights on school land, which are always retained for the benefit of the school fund, are conservatively valued at \$100,000,000.

By far the largest part of the revenue of the public schools is from direct taxation. Special county tax levies are made for school purposes, these levies having increased materially in 1921 and succeeding years to meet the requirements of the teachers' minimum wage law. In addition to the county levies each school district has its own tax levy, these district levies producing considerably more than one-half of the revenue of the public schools. The following table, compiled from the records of the state superintendent of schools, gives the total revenue of the public schools from all sources for the school year ending June 30, 1923:

County	Total Receipts
Adams	\$ 441,927.74
Alamosa	170,180.48
Arapahoe	315,545.55
Archuleta	65,203.99
Baca	203,075.73
Bent	158,420.44
Boulder	700,128.50
Chaffee	249,394.23
Cheyenne	198,480.49
Clear Creek	64,501.46
Conejos	164,231.25
Costilla	86,909.92
Crowley	219,508.49
Custer	25,259.21
Delta	291,576.25
Denver	774,798.90
Dolores	
Douglas	80,204.25
Eagle	87,566.72
Elbert	206,326.67
El Paso	1,438,908.64
Fremont	408,109.34

County	Total Receipts
Garfield	222,725.30
Gilpin	38,457.99
Grand	43,541.58
Gunnison	102,818.45
Hinsdale	13,609.73
Huerfano	317,219.80
Jackson	20,091.15
Jefferson	425,521.21
Kiowa	214,534.22
Kit Carson	349,864.83
Lake	120,179.03
La Plata	286,821.00

The expense of administering the state public school system has been increased substantially in the past eight years by the issuance of large amounts of bonds, chiefly for the construction of new school buildings. On January 1, 1924, there was outstanding \$20,373,120 in bonds issued by school districts, in addition to over \$700,000 issued by counties for the purpose of county high schools. The interest on this large bonded debt amounts to more than \$1,000,000 annually, while sinking fund charges are increasing gradually each year. A very large amount of the proceeds of bond issues in rural districts has been used for the construction and equipment of consolidated and centralized schools, furnishing greatly improved school facilities for nearly all counties in the state.

Institutions of higher education supported by the state are: State Agricultural college at Fort Collins, with a branch school at Fort Lewis, near Hesperus, La Plata county; Western State college, formerly State Normal school, at Gunnison; State Teachers' college, at Greeley; State School of Mines, at

Golden, and University of Colorado, at Boulder. All these are practically supported by legislative appropriations and by substantial tax levies. The Agricultural college and the University also derive some revenue from the sale and administration of special grants of land made by the federal government for their benefit, these lands being administered through the State Board of Land Commissioners in the same manner as the public school lands.

Besides the educational institutions previously mentioned there are the State Industrial School for Boys, at Golden; the State Industrial School

for Girls, at Morrison; the State School for Deaf and Blind, at Colorado Springs; the State Home and School for Dependent and Neglected Children, at Denver, and the State Home and School for Mental Defectives, at Grand Junction. These institutions are supported by special legislative appropriations from general revenue.

In addition to the public schools and institutions of higher learning supported by the state there are numerous private and sectarian schools and colleges and many business, trade and professional schools, which cannot be described or enumerated in this volume.

Colorado—Brief Land History

THE territory now included in the state of Colorado did not all become the property of the United States at the same time, nor was it all conveyed in the same manner or by the same nation. Parts of it have at times belonged to the territories of Kansas, Nebraska, New Mexico and Utah, and a very considerable section of it was claimed by the Republic of Texas when that enterprising little nation won its freedom from Mexico.

The Louisiana Purchase, a vast tract of land acquired by the United States from France in 1803, extended, in a general way, westward from the Mississippi river to the Rocky mountains. About half of the land now comprising the state of Colorado was included in this purchase, the entire cost of which was about \$27,250,000.

The area south of the Arkansas river and west of the Rocky mountains was first claimed by Spain and later by Mexico. When Texas, after winning its independence from Mexico, was admitted to the Union in 1845, it claimed that part of what is now Colorado lying south of the Arkansas river, and in addition a rectangular strip extending north through the mountains into Wyoming, lying between the 106th and the 108th meridians. By reference to the map it will be seen that a considerable part of this territory claimed by Texas was included in the Louisiana Purchase, but the controversy over the northern boundary of Texas was amicably settled before Colorado territory was organized.

The western part of Colorado and the territory in the south lying west and south of the Rio Grande del Norte

was included in the immense tract of land ceded to the United States by Mexico in 1848 following the war with that country. The eastern boundary of this ceded land was at about the 108th meridian, except on the south, where its boundary, as before stated, was the Rio Grande del Norte.

The territory of Utah was organized in 1850. It extended east to the main range of the Rocky mountains, including nearly one-half of what is now Colorado. In 1854 the territories of Kansas and Nebraska were created by the famous Kansas-Nebraska act. Kansas territory then extended west to the territory of Utah, the southern boundary being the territory of New Mexico, which at that time extended north to the Arkansas river, and the northern boundary being at the 40th parallel, which passes near the present site of the city of Brighton. That part of what is now Colorado, lying north of this parallel and extending west to the boundary of Utah territory, was included in Nebraska territory.

In 1855 that part of Colorado then included in Kansas territory was organized into Arapahoe county, and Allen P. Tibbitts, Levi Mitchell and Jonathan Atwood were named as commissioners to locate the county-seat of the new county, which was to be called Mountain City. They were likewise to act as commissioners for the new county, but there is no record available showing that they ever assumed their duties. In 1856 an election was held in Arapahoe county, K. T., and Benjamin F. Simmons was chosen as the first representative from this county in the Kansas territorial legislature.

But the people in the new towns and mining camps, dissatisfied with a government the seat of which was several hundred miles away, and could be reached only after a week's hard travel, soon started a movement for the organization of a new territory, to include that part of Kansas territory known as Arapahoe county. This movement gained strength rapidly, and some of the more ambitious conceived the idea that the creation of a new state was the proper procedure. They spent some months working on the plan and finally agreed that the new state should be called Jefferson and should extend north far into what is now Wyoming. An election held late in 1859 showed that a majority of the voters were in favor of trying a territorial government before attempting statehood, and Robert W. Steele was elected as the first governor of "Jefferson Territory." The following counties were provided for in the organization of the so-called "Jefferson Territory:" Arapahoe, Cheyenne, El Paso, Fountain, Jackson, Jefferson, Mountain, North Park, Saratoga, Steele and St. Vrain.

In the meantime, however, steps were being taken at Washington to bring about the organization of a territory through the regularly constituted legislative channels. In February, 1861, Colorado Territory was regularly organized, its boundaries being substantially the same as those of the state today. On June 6, 1861, Mr. Steele formally abdicated as governor of "Jefferson Territory," and that unique political subdivision passed into history.

The organization of Colorado territory did not settle the numerous controversies regarding land titles that existed when the territory was organized. Within the area formerly claimed by the state of Texas, as well as that ceded by Mexico, there were numerous land grants, made by the Spanish and Mexican governments, all of which were confirmed by the United States when this area became a part of the Union. A special land court was created for the examination and adjudication of these titles, and in all cases where the records showed that the grants were properly made they were formally approved by this court. In addition to these old grants there were large tracts of land which had been set apart for Indian tribes who had long claimed this territory as their own. Those who are familiar with the

early history of the state will know that the controversies with these Indians were not settled without many bloody battles, which resulted in heavy loss of life among both the Indians and the pioneer settlers. In 1861 the federal government entered into a treaty with the Cheyenne and Arapahoe Indians, under which the Indians ceded to the government their lands in eastern Colorado. The Indians did not abide by this treaty, however, and they waged vigorous warfare against the white settlers for several years with a view to driving them from the plains of eastern Colorado. On October 28, 1867, they signed another treaty with the United States, ceding all their lands between the Platte and Arkansas rivers, and agreeing to their removal to Indian Territory.

In the western part of the state settlers came in contact with the Ute Indians. In 1868 a treaty had been made between these Indians and the government by which the government confirmed their title to a large tract of land in the southern and western parts of the state. After the discovery of rich metal deposits in the San Juan district, white settlers began to come in rapidly, and steps were taken to recover the land that had been confirmed by the government as the property of the Utes. The Indians were strongly opposed to giving it up, but in 1873, largely through the influence of Chief Ouray, one of the most illustrious leaders of the red men in Colorado, a treaty was signed by which the Utes ceded to the government the mineral lands in the San Juan district.

They still retained, however, more than 15,500,000 acres of land on the western slope. Numerous encounters occurred between these Indians and the white men during the early settlement of the agricultural lands in this territory, and it was not until 1881 that the Indians in this region, usually known as the Uncompahgre Utes, were removed to the Uintah reservation, in eastern Utah.

An Indian reservation also was established in southwestern Colorado and northwestern New Mexico, to which most of the southern Utes were removed. This is the only Indian reservation in Colorado at present, though there is some Indian land in La Plata county, belonging to Ute Indians.

Statistical Tables

THE statistical tables and charts found on pages 50 to 175, inclusive, have been compiled from various official sources, the authority for the data usually being given in connection with the title of the table. The agricultural tables and charts found on pages 50 to 145, inclusive, have been compiled chiefly from reports of the county assessors to the State Immigration department in compliance with the law enacted in 1919, with the exception of the tables showing average yields, assessment figures and some other data, which have been compiled from the reports of the division of crop and livestock estimates of the United States department of agriculture and other sources. Other tables contain information from various other official sources, both state and federal, proper credit being given in each instance. All reports by counties on acreage of crops, number of farms, farm tenure, farms reporting various crops and the like are from assessors' reports and are given by counties just as reported by the several assessors, though total acreage for the state as used in the table on page 52 has been increased somewhat for each crop because of the incompleteness of some of the assessors' reports.

Average yields per acre of the principal crops for 1923, as determined by the Co-Operative Crop Reporting Service, are given for each county, and the total production by counties, based on the acreages reported by the county assessors and these yields, have been calculated for corn, winter wheat, spring wheat, oats, barley and potatoes, and are found on pages 53, 59, 60, 65, 66, 67 and 70. Average yields by counties have not been computed for other crops because of lack of sufficient information from some counties. The average yields per acre of the principal crops above referred to, by counties, are found in the table on page 85, while on page 86 are found the average yields of the same crops for the five years ending with 1923, which is the entire period in which the Co-Operative Crop Reporting Service has been making estimates of average yields by counties.

On page 52 is a table giving the estimated acreage and production and the value of all crops for 1922 and

1923. In the preparation of this table the total acreage planted to each crop was first arrived at, the process in most cases involving the addition of a slight percentage to the acreage reported by county assessors, the additions being made because of the incompleteness of assessors' reports from some of the counties. Only the estimated acreage harvested is given in this report, which was arrived at by deducting from the acreage planted in each a certain acreage that was abandoned on account of crop failure, change of plans by individual farmers after reporting their acreage in April or for other reasons. The acreage so abandoned was determined by the bureau of livestock and crop estimates from reports received from its several hundred volunteer reporters. In the case of barley and oats much of the acreage that matures is harvested for hay instead of for grain, and the estimated acreage so harvested is deducted from the acreage planted in determining the acreage harvested for grain, but is used in the acreage of small grains cut for hay. The entire acreage of corn and grain sorghum except that abandoned or cut for silage is treated as harvested for grain, though much of it is in reality harvested for forage or pastured in the field. In the case of field beans and sweet sorghums only that actually harvested for beans in the one case or for seed in the other is used in calculating the production of beans and sorghum seed, the remaining acreage being included in dry forage and crops pastured. These facts are given here to explain the several seeming discrepancies to be found between the acreage and production figures as shown in this table and in the several county tables on pages 53, 59, 60, 65, 66, 67 and 70, and in the table of crop values shown on pages 50 and 51.

County assessors reported on 51,589 farms in 1923, which is perhaps slightly below the actual number of farms operated during the 1923 crop season, and it is because of this apparent shortage in reports that additions were made to the assessors' figures. The census bureau reported 59,934 farms in the state in 1920, but a very considerable number of these farms were homesteads and pasture farms, on which no crops ever had been

raised. The county assessors in 1922 reported on 54,664 farms, approximately 3,000 more than the number reported for 1923. While the 1923 total probably is not wholly accurate, there was considerable abandonment of farms in some of the non-irrigated sections, due to the low prices paid for farm products and the exceptionally unfavorable season for small grains and some other crops in 1922, and the total number of farms operated in 1923 was probably somewhat below the total operated in the preceding year.

The charts showing distribution of acreage of the various crops by counties, found on pages 55, 61, 68, 71, 77, 79, 80, 81 and 82, are based upon reports of county assessors to the State Immigration department. They are not at all comparable with one another, for the reason that the same unit of comparison has not been used in all. The number of acres represented by each symbol is given in connection with the title of each of the charts. The maps showing the distribution of livestock, found on pages 102 and 103, are based wholly upon the reports of the county assessors.

While it has been found impracticable to make corrections in the acreage and production of the leading crops by counties, some idea of the completeness or incompleteness of the reports from the several counties may be obtained by comparing the total number of farms reported by each county assessor, found in the table on page 93 of this Year Book, with the total number reported for the same county by the census bureau, found on page 76 of the Year Book for 1921 and found in the census reports. It will be noted that in a few counties assessors reported more farms than were found by the census bureau, while in a few other counties the numbers reported by the two agencies are approximately the same. In most counties, however, the census bureau reported considerably more farms than were found by the assessors, and while these discrepancies may be accounted for in part by the fact that the farms reported by the census bureau are not all being farmed, this will not account for all of the shortages. While the larger number of the agricultural counties of the state are reported very fully by the assessors, there are still a number in which agricultural activity and progress are not adequately reported. The failure of an assessor in such

a county to do justice to the agricultural industry reflects seriously on the county, as his report does not show the true progress which agriculture is making.

Special attention is again called to the tables showing the percentages of the various crops grown with irrigation and without, as shown in the tables on pages 91 and 92, and the tables showing average yields of the leading crops, both irrigated and non-irrigated, shown on pages 85 and 86. The rapid increase in the acreage of non-irrigated land cultivated in Colorado in recent years has been the most important factor in reducing general average yields per acre of wheat, oats, barley, corn, rye and similar crops. In 1909 more than 50 per cent of the wheat grown in Colorado was irrigated, but in 1923, as will be seen from the table on page 64, only 15.45 per cent of it was irrigated. Yields on irrigated land in this state are as high now as they were a decade ago, and in many cases higher, but yields on non-irrigated land are much lower than on the irrigated lands, so a lowering of the general average yield per acre has been inevitable. A rapid increase in the acreage of crops grown without irrigation and a relatively small increase in the acreage of crops grown under irrigation has resulted in an apparent lowering of the average yield for the entire state, despite the fact that irrigated yields are as high as ever, if not higher. It will be noted from the county tables that counties where most of the crops are grown under irrigation will show high average yields.

From the tables of values shown on pages 50 and 51 and on page 52 (the discrepancies in which have been explained in this introduction) it will be seen that the total value of farm crops for 1923 was considerably above the total for 1922, which in turn was above the 1921 total. This was due in some instances to a larger acreage in 1923 than was harvested in the two years preceding, but in more instances it was due to a more favorable farming season and to a general increase in the prices paid for farm products. In this connection it must be noted that the values given in these tables do not represent the actual receipts from the sale of these crops, but that they reflect the hypothetical values of the various crops, based upon the prices commanded by such crops as were actually sold.

FARM VALUE OF CROPS FOR 1923

The crop values found in this table are based upon acreage reports by county assessors, average yields as estimated by the Co-operative Crop Reporting Service or the Immigration Department, and average prices prevailing about December 1 or at market time, as reported by competent authorities in the various counties. The total values for the various crops differ materially from the values of the same crops given in the production table found on page 52, being less in nearly all cases. The total value for all crops in the state in this table is more than \$6,000,000 less than that in the general table on page 52. These discrepancies are due to different methods used in arriving at the values given in the two tables. In the general production table acreages reported by county assessors have been increased materially because of incompleteness of assessors' returns, while in this table only comparatively small increases are made from assessors' reports. The result is that values for nearly all crops and total values for all crops in nearly all counties in this table are slightly below actual values.

CROP ACREAGE PRODUCTION AND VALUE, 1923 AND 1922

KIND OF CROPS	1923			1922

*This includes the entire acreage of corn harvested in every way and the value estimated as if it were all harvested for grain. For purposes of information corn for silage, forage and pasture are included under those items in the table, but their acreages and values are not included in the totals. See text for details.

†The varieties of tame hay with the estimated acreage of each variety for 1923 are as follows: Alfalfa, 780,000; timothy, 44,000; red clover, 5,000; timothy and clover mixed, 122,000; sweet clover, 18,000; sudan grass, 25,000; millet, 75,000; other tame grasses, 22,000; field peas, 9,000; grains cut green, 103,000; total, 1,203,000 acres. For 1922: Alfalfa, 765,000; timothy, 45,000; red clover, 5,000; timothy and clover mixed, 124,000; sweet clover, 16,000; sudan grass, 19,000; millet, 47,000; other tame grasses, 21,000; field peas, 14,000; grains cut green, 135,000; total, 1,191,000 acres.

**The estimated number of farm gardens is here given instead of the acreage. This figure is not included in the totals.

‡This acreage is all accounted for in the acreage of sugar beets harvested and is not included in the total acreage figure.

See also for reconciliation with preceding table footnote on page 51.

ACREAGE OF CORN, 1923

Each dot represents 2,000 acres. The cross (X) is used in counties reporting less than 1,000 acres.

ACREAGE OF SORGHUMS, 1923

Each dot represents 1,000 acres. The cross (X) is used in counties reporting less than 500 acres.

ACREAGE OF FIELD PEAS, 1923

The largest triangle represents 23,133 acres. The dot represents less than 200 acres.

ACREAGE OF ONIONS, 1923

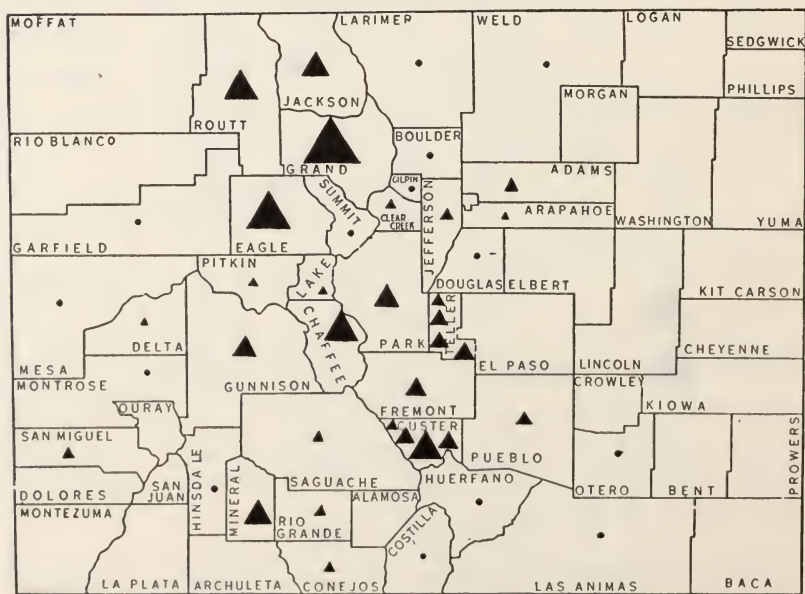

The largest triangle represents 919 acres. The dot represents less than 9 acres.

ACREAGE OF CABBAGE, 1923

The largest triangle represents 3,291 acres. The dot represents less than 25 acres.

ACREAGE OF LETTUCE, 1923

The largest triangle represents 1,507 acres. The dot represents less than 10 acres.

**DISTRIBUTION OF APPLE TREES AS REPORTED BY
THE CENSUS BUREAU**

The largest circle represents 447,800 trees. The cross (X) represents fewer than 2,500 trees.

**DISTRIBUTION OF PEACH TREES AS REPORTED BY
THE CENSUS BUREAU**

The largest circle represents 242,200 trees. The cross (X) represents fewer than 1,000 trees.

**DISTRIBUTION OF PEAR TREES AS REPORTED BY
THE CENSUS BUREAU**

The largest circle represents 115,525 trees. The cross (X) represents fewer than 500 trees.

**DISTRIBUTION OF CHERRY TREES AS REPORTED BY
THE CENSUS BUREAU**

The largest circle represents 73,169 trees. The cross (X) represents fewer than 500 trees.

Relative Average Values per Head of Livestock in Colorado as Determined by the U. S. Department of Agriculture.

Note—This chart, which is not based on any tabulations appearing in this volume, but which traces accurately the range of livestock values commencing with 1913, as calculated by the Department of Agriculture, is included here for the purpose of providing a comparison between the range of values fixed for assessment purposes from year to year and actual values as shown by the Department of Agriculture.

ASSESSED VALUE OF LIVESTOCK IN COLORADO, 1923

Relative Acreages and Average Assessed Values per acre of Agricultural Land in Colorado.

Note—The tabulations showing the acreages of the various classes of farm land reported by the assessors each year from 1913 to 1923, indicated by the dotted lines in this chart, appear on pages 130-141, both inclusive, while the tabulation showing range in average assessed value from year to year for the same period, indicated by the solid lines, appears on pages 142 and 143. It will be noted that the increase in acreage of dry farming and natural hay land was so great that the lines go entirely out of the chart. The values fixed in 1913 and the acreages reported for that year are the basic figures and are indicated by 100.

ASSESSED VALUE OF FARM PROPERTY IN COLORADO, 1923
(Compiled from Records of State Tax Commission)

NOTE—This table, which constitutes the first tabulation of the bonded public debt of all of the tax-levying subdivisions of Colorado, was prepared by the State Board of Immigration with the co-operation of county and city and town clerks and treasurers, and is believed to be complete in all respects. The outstanding bonded debt of the state as of June 1, 1924, which is not included in the above total, was \$10,536,500, and at the same time there were large amounts outstanding in two large legally created districts—the Moffat Tunnel district and the Pueblo Conservancy district. In the former district, which was formed for the purpose of financing construction of a railroad tunnel to improve transportation facilities in northwestern Colorado, the total authorized issue of \$6,700,000 has been sold and is outstanding, and in the latter district the authorized issue of \$3,600,000, floated for the purpose of financing flood protection works and bearing date of January 1, 1924, is outstanding. The tabulation does not include irrigation and drainage district bonds for the reason that these are not general public debts but are more in the nature of business debts. Municipals, by which is meant city and town bonds, do not include floating debt such as outstanding warrants and the like, but do include bonds issued by local improvement districts.

*Crowley county was created in 1911, Alamosa county in 1913, and Moffat county in 1911.

Colorado Cities and Towns

INCORPORATED municipalities in Colorado include towns, cities of the second class and cities of the first class. All incorporated places with populations not exceeding 2,000 are towns. When a town achieves a population of 2,000 or more and furnishes satisfactory proof of same, such as a state or federal census report or the findings of a special census authorized by its board of trustees, it may become a city of the second class; and when its population reaches the 15,000 mark it is entitled to the dignity of rank as a city of the first class.

The following list includes municipalities against which taxes were assessed for municipal purposes in 1924. It is made up of three cities of the first class, 28 cities of the second class and 184 towns. But the classification is by no means constant. Leadville, now a comparatively small city of the second class, was once an ambitious and growing city of the first class, and Creede, now a town of 500, was once a thriving city of the second class. All over the state, but more numerous in the metal mining districts, are the sites of ghost towns, once incorporated places, but now only postoffices and in some cases barren land only, with no trace of the buildings that once housed their populations. The list here given includes only active municipal corporations.

The date of incorporation given is the date on which the people of the community voted to make it a municipal corporation, this being the only process by which a municipal corporation could be established in Colorado after statehood was conferred, in 1876. Previous to that towns were incorporated in several ways. Data have not yet been completed showing the dates of incorporation for the cities and towns organized before Colorado became a state.

Only municipal utilities are mentioned here. It may be said, however, that almost every municipality in this list has an electric light system and electric current available for power, though it is not mentioned specifically unless it is operated by the municipality. It is also possible that a few municipalities have privately owned water systems, though the number is very small. Bank deposits here given are as of January 1, 1924, and assessed valuations and tax levies are for 1923,

fixing taxes to be paid in 1924. Bonds are given as of January 1, 1924.

Key to pronunciation—The simplest possible system of pronunciation has been adopted here, with full realization that it fails in indicating certain shades of sound and stress.

āte, āt, ārm, dāta, saw.
mē, met, mēge.
mīte, mit.
nōte, not, nōrth.
tōō, look.
hūe, hūt.
out, thin, the.

Aguilar (ă'gwā'lar)—Town in Las Animas county; on D. & R. G. W. railroad; incorporated 11-13-1893; population—1920 census, 1,236; 1924 estimate, 1,520; altitude, 6,700 feet; assessed valuation, \$640,426; municipal tax levy, 22.5 mills; has municipal water system; bank deposits, \$206,420. Bonds issued—Water works, \$81,000; all outstanding.

Akron (ăk'rūn)—Town, countyseat of Washington county; on Burlington railroad; incorporated 8-2-1887; population—1920 census, 1,401; 1924 estimate, 1,480; altitude, 4,300 feet; assessed valuation, \$1,425,512; municipal tax levy, 11 mills; has municipal water system, sanitary sewer system and light system; bank deposits, \$500,180. Bonds issued—Water works, \$60,000; sanitary sewer, \$50,000. Total bonds issued, \$110,000; redeemed, \$9,500; outstanding, \$100,500.

Alamosa (ăl'a mō'sa)—City of second class, countyseat of Alamosa county; on D. & R. G. W. railroad; incorporated, 7-20-1878; population—1920 census, 3,171; 1924 estimate, 3,550; altitude, 7,500 feet; assessed valuation, \$2,177,690; municipal tax levy, 17.5 mills; has municipal water system and light system; bank deposits, \$1,324,230. Bonds issued—Water works, \$120,000; sanitary sewers, \$13,000. Total bonds issued, \$133,000, all outstanding.

Animas City (ăn'īmās)—Town in La Plata county; on D. & R. G. W. railroad; incorporated, 9-5-1878; population—1920 census, 250; 1924 estimate, 210; altitude, 6,500 feet; assessed valuation, \$166,065; municipal tax levy, 17 mills. Bonds issued—Water works, \$25,000; redeemed, \$3,000; outstanding, \$22,000.

Antonito (ăn tō nē' tō)—Town in Conejos county; on D. & R. G. W. railroad; incorporated, 11-2-1889; population—1920 census, 946; 1924 estimate, 1,050; altitude, 7,888 feet; assessed valuation, \$524,610; municipal tax levy, 11 mills; has municipal water system and sanitary sewer system; bank deposits, \$278,946. Bonds issued—Refunding warrants, \$15,000; water works, \$65,000; sanitary sewer, \$3,000. Total bonds issued, \$83,000, all outstanding.

Arvada (ăr vā'da)—Town in Jefferson county; on C. & S., Denver & Salt Lake railroads and Interurban electric; incorporated, 7-26-1904; population—1920 census, 915; 1924 estimate, 1,150; altitude, 5,300 feet; assessed valuation, \$916,375; municipal tax levy, 14 mills; has municipal water system and sanitary sewer system; bank deposits, \$485,960. Bonds issued—Water works, \$56,000; sanitary

sewer, \$68,000; streets and alleys, \$32,715. Total bonds issued, \$156,715; redeemed, \$17,500; outstanding, \$139,215.

Aspen (äs' pen)—Town, countyseat of Pitkin county; on D. & R. G. W. railroad; incorporated, 2-5-1881; population—1920 census, 1,265; 1924 estimate, 1,330; altitude, 7,850 feet; assessed valuation, \$440,365; municipal tax levy, 20.23 mills; bank deposits, \$436,681. Bonds issued—Miscellaneous, \$85,800, all outstanding.

Ault (awlt)—Town in Weld county; on U. P. railroad; incorporated, 3-21-1904; population—1920 census, 769; 1924 estimate, 820; altitude, 4,940 feet; assessed valuation, \$557,860; municipal tax levy, 16.5 mills; has municipal water system; bank deposits, \$411,974. Bonds issued—Water works, \$44,000; parks, \$5,000. Total bonds issued, \$49,000; redeemed, \$6,000; outstanding, \$43,000.

Aurora (aw rō' ra)—Town in Adams and Arapahoe counties; incorporated, under name of Fletcher, 4-21-1891; name changed to Aurora, 2-25-1907; population—1920 census, 983; 1924 estimate, 1,050; altitude, 5,400 feet; assessed valuation, \$1,245,230; municipal tax levy, 45 mills; has municipal water system; bank deposits, \$527,219. Bonds issued—Water works, \$400,000, all outstanding.

Basalt (bä' sawlt or bā sawlt')—Town in Eagle county; on D. & R. G. railroad; incorporated, 8-12-1901; population—1920 census, 185; 1924 estimate, 205; altitude, 6,600 feet; assessed valuation, \$50,102; municipal tax levy, 4.4 mills. No bonded debt.

Bayfield (bä' fēld)—Town in La Plata county; on D. & R. G. W. railroad; incorporated, 7-13-1906; population—1920 census, 267; 1924 estimate, 310; altitude, 6,500 feet; assessed valuation, \$115,630; municipal tax levy, 11 mills. Bonds issued—Miscellaneous, \$17,000, all outstanding.

Berthoud (bēr' thōōd)—Town in Larimer county; on C. & S. railroad; incorporated, 7-17-1888; population—1920 census, 852; 1924 estimate, 900; altitude, 5,240 feet; assessed valuation, \$969,140; municipal tax levy, 8.8 mills; has municipal water and light systems; bank deposits, \$446,019. Bonds issued—Water works, \$30,000; redeemed, \$24,000; outstanding, \$6,000.

Blanca (blän' ka)—Town in Costilla county; on D. & R. G. W. railroad; incorporated, 10-25-1909; population—1920 census, 380; 1924 estimate, 365; altitude, 7,870 feet; assessed valuation, \$308,555; municipal tax levy, 10 mills; bank deposits, \$53,606. No bonded debt.

Bonanza (bō nän' za)—Town in Saguache county; incorporated, 1-3-1881; population—1920 census, 91; 1924 estimate, 130; altitude, 8,000 feet; assessed valuation, \$28,967; municipal tax levy, 10 mills. No bonded debt.

Boulder (bōl' dēr)—City of second class, countyseat of Boulder county; on C. & S. railroad and Interurban electric; incorporated,; population—1920 census, 11,006; 1924 estimate, 12,400; altitude, 5,350 feet; assessed valuation, \$12,338,274; municipal tax levy, 10.3 mills; has municipal water and light systems and sanitary sewer system; bank deposits, \$4,785,085. Bonds issued—Water works, \$640,000; bridges and viaducts, \$75,000; sanitary sewer, \$114,700;

storm sewer, \$147,100; streets and alleys, \$793,700; miscellaneous, \$4,000. Total bonds issued, \$1,774,500; redeemed, \$49,000; outstanding, \$1,725,500.

Breckenridge (brēk' en rīj) — Town, countyseat of Summit county; on C. & S. railroad; incorporated, 2-4-1880; population—1920 census, 796; 1924 estimate, 580; altitude, 9,579; assessed valuation, \$477,261; municipal tax levy, 13 mills; has municipal water and light systems; bank deposits, \$212,493. Bonds issued—Water works, \$17,000, all outstanding.

Brighton (brī' tūn) — City of second class, countyseat of Adams county; on U. P. railroad; incorporated 6-11-1887; population—1920 census, 2,715; 1924 estimate, 3,350; altitude, 4,979; assessed valuation, \$2,446,930; municipal tax levy, 12.5 mills; has municipal water and light systems; bank deposits, \$1,048,022. Bonds issued—Water works, \$200,000; sanitary sewer \$80,000; streets and alleys, \$117,000. Total bonds issued, \$397,000, all outstanding.

Branson (brän' sūn)—Town in Las Animas county; on C. & S. railroad; incorporated, 6-3-1920; population—1924 estimate, 400; altitude, 6,000 feet; assessed valuation, \$183,871; municipal tax levy, 23 mills; has municipal light plant; bank deposits, \$50,127. Bonds issued—Water works, \$35,000, all outstanding.

Brush (brūsh)—Town in Morgan county; on Burlington railroad; incorporated, 10-18-1884; population—1920 census, 2,103; 1924 estimate, 2,560; altitude, 4,280 feet; assessed valuation, \$1,535,684; municipal tax levy, 15.5 mills; has municipal water system, sanitary sewer system, municipal light system; bank deposits, \$1,153,470. Buena Vista (bū' na vis' ta) — Town, countyseat of Chaffee county; on D. & R. G. W. railroad; incorporated, 10-28-1879; population—1920 census, 903; 1924 estimate, 1,085; altitude, 7,800 feet; assessed valuation, \$517,551; municipal tax levy, 11 mills; has municipal water system; bank deposits, \$159,246. Bonds issued—Water works, \$30,000; redeemed, \$18,500; outstanding, \$11,500.

Burlington (bēr' ling tūn) — Town, countyseat of Kit Carson county; on Rock Island railroad; incorporated, 5-15-1888; population—1920 census, 991; 1924 estimate, 1,200; altitude, 4,250 feet; assessed valuation, \$1,353,934; municipal tax levy, 20.45 mills; has municipal water system, sanitary sewer system; bank deposits, \$363,248. Bond issue—Water works, \$170,000; miscellaneous, \$63,200. Total bonds issued, \$233,200, all outstanding.

Calhan (käl' hān) — Town in El Paso county; on Rock Island railroad; incorporated, 4-22-1919; population—1924 estimate, 400; altitude, 6,508 feet; assessed valuation, \$315,130; municipal tax levy, 6 mills; bank deposits, \$308,856. No bonded debt.

Canon City (kän'yūn)—City of second class, countyseat of Fremont county; on D. & R. G. W. railroad; incorporated,; population—1920 census, 4,551; 1924 estimate, 5,000; altitude, 5,333 feet; assessed valuation, \$4,425,498; municipal tax levy, 11 mills; has municipal water system, sanitary sewer system, and electric light system; bank deposits, \$2,752,-

394. Bonds issued—General municipal, \$40,000; water works, \$350,000; electric lights, \$30,000; streets and alleys, \$80,050. Total bonds issued, \$500,050; redeemed, \$57,600; outstanding, \$442,450.

Carbondale (kär' būn dāl) — Town in Garfield county; on D. & R. G. W. railroad; incorporated, 1-30-1888; population 1920 census, 310; 1924 estimate, 360; altitude, 6,000 feet; assessed valuation, \$386,621; municipal tax levy, 14.2 mills; has municipal water system; bank deposits, \$213,360. Bonds issued—Water works, \$37,500; redeemed, \$7,500; outstanding, \$30,000.

Castle Rock (kāsł) — Town, countyseat of Douglas county; on A. T. & S. F. and D. & R. G. W. railroads; incorporated, 4-14-1881; population—1920 census, 461; 1924 estimate, 500; altitude, 6,000 feet; assessed valuation, \$565,225; municipal tax levy, 20.5 mills; has municipal water system, sanitary sewer system; bank deposits, \$530,753. Bonds issued—Water works, \$75,000; redeemed, \$3,000; outstanding, \$72,000.

Cedaredge (sē' dēre j) — Town in Delta county; incorporated, 2-12-1907; population—1920 census, 455; 1924 estimate, 485; altitude, 6,100 feet; assessed valuation, \$275,730; municipal tax levy, 13 mills; has municipal water system; bank deposits, \$165,732. Bonds issued—Miscellaneous, \$43,700; redeemed, \$500; outstanding, \$43,200.

Center (sen tēr) — Town in Saguache county; on San Luis Central railroad; incorporated, 9-1-1906; population—1920 census, 547; 1924 estimate, 680; altitude, 7,641 feet; assessed valuation, \$47,369; municipal tax levy, 11.55 mills; has municipal water system; bank deposits, \$141,566. Bonds issued—Water works, \$35,000, all outstanding.

Central City (sen' trāl) — Town, county seat of Gilpin county; on C. & S. railroad; incorporated,; population, 1920 census, 552; 1924 estimate, 490; altitude, 8,560 feet; assessed valuation, \$486,465; municipal tax levy, 23 mills; has municipal water system; bank deposits, \$262,688. Bonds issued—Water works, \$95,000; redeemed, \$10,500; outstanding, \$84,500.

Cheraw (chē raw') — Town in Otero county; on A. T. & S. F. railroad; incorporated, 3-12-1917; population—1920 census, 186; 1924 estimate, 250, altitude, 4,600 feet; assessed valuation, \$177,483; municipal tax levy, 13.5 mills; has municipal water system; bank deposits, \$84,476. Bonds issued—Water works, \$12,000, all outstanding.

Cheyenne Wells (shī'en) — Town, countyseat of Cheyenne county; on U. P. railroad; incorporated, 5-3-1890; population—1920 census, 508; 1924 estimate, 690; altitude, 4,282 feet; assessed valuation, \$868,140; municipal tax levy, 12.8 mills; has municipal water system, sanitary sewer system; bank deposits, \$182,905. Bonds issued—Water works, \$94,000, all outstanding.

Coal Creek (kōl) — Town in Fremont county; incorporated, 1-10-1882; population—1920 census, 618; 1924 estimate, 615; altitude, 5,600 feet; assessed valuation, \$79,111; municipal tax levy, 26 mills. No bonded debt.

Collbran (kōl' brān) — Town in Mesa county; incorporated, 6-23-1908; popu-

lation—1920 census, 286; 1924 estimate, 295; altitude, 6,000 feet; assessed valuation, \$157,959; municipal tax levy, 16 mills; has municipal water system; bank deposits, \$166,147. Bonds issued—Water works, \$14,500, all outstanding.

Colorado Springs — City of first class, countyseat of El Paso county; on four railroads; incorporated,; population—1920 census, 30,105; 1924 estimate, 33,600; altitude, 5,900 feet; assessed valuation, \$39,929,430; municipal tax levy, 14.5 mills; has municipal water system, sanitary sewer system, and municipal light system; bank deposits, \$16,643,314. Bonds issued—Public building, \$500,000; water works, \$1,145,000; sanitary sewers, \$16,000; storm sewers, \$111,000; streets and alleys, \$1,104,000. Total bonds issued, \$2,876,000, all outstanding.

Cortez (kōr tez') — Town, countyseat of Montezuma county; incorporated, 9-27-1902; population—1920 census, 541; 1924 estimate, 670; altitude, 6,198 feet; assessed valuation, \$424,045; municipal tax levy, 19 mills; has municipal water system; bank deposits, \$305,503. Bonds issued—Water works, \$61,000, all outstanding.

Craig (krāg) — Town, county seat of Moffat county; on Denver & Salt Lake railroad; incorporated, 4-21-1908; population—1920 census, 1,297; 1924 estimate, 1,500; altitude, 6,200 feet; assessed valuation, \$834,370; municipal tax levy, 20 mills; has municipal water system, sanitary sewer system; bank deposits, \$534,305. Bonds issued—Water works, \$52,000; sanitary sewer, \$38,000. Total bonds issued, \$90,000; redeemed, \$16,000; outstanding, \$74,000.

Crawford (kraw' fōrd) — Town in Delta county; incorporated, 10-11-1910; population—1920 census, 149; 1924 estimate, 150; altitude, 6,800 feet; assessed valuation, \$61,335; municipal tax levy, 6 mills; bank deposits, \$86,807. No bonded debt.

Creed (krēd) — Town, countyseat of Mineral county; on D. & R. G. W. railroad; incorporated, 3-19-1892; population—1920 census, 500; 1924 estimate, 515; altitude, 8,854 feet; assessed valuation, \$265,400; municipal tax levy, 25 mills; has municipal water system, sanitary sewer system; bank deposits, \$99,191. No bonded debt.

Crested Butte (krest' ed būt) — Town in Gunnison county; on D. & R. G. W. railroad; incorporated, 6-24-1880; population—1920 census, 1,213; 1924 estimate, 1,225; altitude, 9,000 feet; assessed valuation, \$408,545; municipal tax levy, 13.5 mills; bank deposits, \$219,475. Bonds issued—Miscellaneous, \$10,000; redeemed, \$600; outstanding, \$9,400.

Crestone (kres' tōn) — Town in Saguache county; on D. & R. G. W. railroad; incorporated, 3-29-1901; population—1920 census, 74; 1924 estimate, 90; altitude, 7,500 feet; assessed valuation, \$32,410; municipal tax levy, 11 mills. No bonded debt.

Cripple Creek (kripl) — City of second class, countyseat of Teller county; incorporated, 5-28-1892; population—1920 census, 2,325; 1924 estimate, 2,350; altitude, 9,375 feet; assessed valuation, \$748,150; municipal tax levy, 50 mills; bank deposits, \$1,415,865. Bonds issued—General municipal, \$123,000; redeemed, \$42,000; outstanding, \$81,000.

Crook (krook)—Town in Logan county; on U. P. railroad; incorporated, 9-3-1918; population—1920 census, 232; 1924 estimate, 260; altitude, 3,700 feet; assessed valuation, \$185,238; municipal tax levy, 23 mills; has municipal water system, municipal light system; bank deposits, \$85,649. Bonds issued—Water works, \$28,000, electric lights, \$6,000. Total bonds issued, \$34,000, all outstanding.

Crowley (krou'li)—Town in Crowley county; on Missouri Pacific railroad; incorporated, 9-20-21; population—1920 census, 224; 1924 estimate, 290; altitude, 4,275 feet; assessed valuation, \$196,380; municipal tax levy, 10.7 mills; bank deposits, \$32,761. No bonded debt.

Dacono (dā ko'no)—Town in Weld county; on U. P. railroad; incorporated, 1-8-1908; population—1920 census, 172; 1924 estimate, 275; altitude, 4,500 feet; assessed valuation, \$61,490; municipal tax levy, 15.8 mills; has municipal water system. No bonded debt.

DeBeque (dē bek')—Town in Mesa county; on D. & R. G. W. railroad; incorporated, 11-13-1889; population—1920 census, 292; 1924 estimate, 385; altitude, 4,800 feet; assessed valuation, \$217,452; municipal tax levy, 17.7 mills; has municipal water system; bank deposits, \$89,443. Bonds issued—Water works, \$77,000, all outstanding.

Deer Trail (dēr trāl)—Town in Arapahoe county; on U. P. railroad; incorporated, 1-5-1920; population—1924 estimate, 330; altitude 5,183 feet; assessed valuation, \$276,685; municipal tax levy, 23 mills; has municipal water system; bank deposits, \$227,247. Bonds issued—Water works, \$40,000, all outstanding.

Del Norte (del nōrt)—Town, countyseat of Rio Grande county; on D. & R. G. W. railroad; incorporated,; population—1920 census, 1,007; 1924 estimate, 995; altitude, 7,778 feet; assessed valuation, \$509,550; municipal tax levy, 16 mills; has municipal water system, sanitary sewer system, municipal light system; bank deposits, \$331,827. Bonds issued—Water works, \$52,500; miscellaneous, \$8,500. Total bonds issued, \$61,000; redeemed, \$1,500; outstanding, \$59,500.

Delagua (de lä' wā)—Town in Las Animas county; on C. & S. railroad; incorporated, 11-13-1889; population—1920 census, 1,035; 1924 estimate, 1,200; altitude, 6,700 feet. No bonded debt.

Delta (del' ta)—City or second class, countyseat of Delta county; on D. & R. G. W. railroad; incorporated, 10-12-1882; population—1920 census, 2,623; 1924 estimate, 2,800; altitude, 4,980 feet; assessed valuation, \$2,822,155; municipal tax levy, 13.5 mills; has municipal water system and sanitary sewer system; bank deposits, \$1,210,699. Bonds issued—Water works, \$115,000; miscellaneous, \$198,000. Total bonds issued, \$313,000, all outstanding.

Denver (den' vēr)—City of first class, countyseat of Denver county; all railroads; incorporated,; population—1920 census, 256,491; 1924 estimate, 277,215; altitude, 5,280 feet; assessed valuation, \$383,610,170; municipal tax levy, 9.59 mills; has municipal water system and sanitary sewer system; bank deposits, \$164,019,652. Bonds issued—Water works, \$14,523,600; bridges and viaducts, \$260,000; parks, \$445,700; sanitary sewers, \$242,800; storm sewers, \$780,100; streets and alleys, \$2,443,400. Total bonds issued, \$18,695,600, all outstanding.

Dillon (dil' ūn)—Town in Summit county; on C. & S. railroad; incorporated, 12-16-1882; population—1920 census, 126; 1924 estimate, 75; altitude, 8,600 feet; assessed valuation, \$99,914; municipal tax levy, 8 mills. No bonded debt.

Dolores (dōl ō' rez)—Town in Montezuma county; on Rio Grande Southern railroad; incorporated, 7-7-1900; population—1920 census, 465; 1924 estimate, 460; altitude, 6,957 feet; assessed valuation, \$381,475; municipal tax levy, 16 mills; has municipal water system; bank deposits, \$400,778. Bonds issued—Water works, \$45,000; redeemed, \$32,500; outstanding, \$12,500.

Durango (dōō rān' gō)—City of second class, countyseat of La Plata county; on D. & R. G. W. railroad; incorporated, 4-9-1881; population—1920 census, 4,116; 1924 estimate, 4,650; altitude, 6,505 feet; assessed valuation, \$4,280,107; municipal tax levy, 12 mills; has municipal water system and sanitary sewer system; bank deposits, \$1,668,594. Bonds issued—Water works, \$230,700; miscellaneous, \$11,000. Total bonds issued, \$241,700; redeemed, \$28,400; outstanding, \$213,300.

Eads (ēdz)—Town, countyseat of Kiowa county; on Missouri Pacific railroad; incorporated, 1-4-1916; population—1920 census, 406; 1924 estimate, 450; altitude, 4,262 feet; assessed valuation, \$400,460; municipal tax levy, 20 mills; has municipal water system and sanitary sewer system; bank deposits, \$304,668. Bonds issued—Water works, \$71,000; electric lights, \$5,000. Total bonds issued, \$76,000, all outstanding.

Eagle (ē' gl)—Town, countyseat of Eagle county; on D. & R. G. W. railroad; incorporated, 11-2-1920; population—1920 census, 358; 1924 estimate, 430; altitude, 6,602 feet; assessed valuation, \$294,874; municipal tax levy, 17.4 mills; has municipal water system and sanitary sewer system; bank deposits, \$260,780. Bonds issued—Sanitary sewer, \$25,000, all outstanding.

Eaton (ē' tūn)—Town in Weld county; on U. P. railroad; incorporated, 10-26-1892; population—1920 census, 1,289; 1924 estimate, 1,560; altitude, 4,750; assessed valuation, \$1,426,280; municipal tax levy, 12 mills; has municipal water system; bank deposits, \$615,104. Bonds issued—Water works, \$13,000, all outstanding.

Eckley (ek' li)—Town in Yuma county; on Burlington railroad; incorporated, 3-16-1920; population—1920 census, 332; 1924 estimate, 360; altitude, 3,890 feet; assessed valuation, \$253,440; municipal tax levy, 25 mills; has municipal water and light systems; bank deposits, \$67,238. Bonds issued—Water works, \$40,000; electric lights, \$9,500. Total bonds issued, \$49,500, all outstanding.

Edgewater (ej' wā tēr)—Town in Jefferson county; suburb of Denver; incorporated, 8-17-1901; population—1920 census, 664; 1924 estimate, 815; altitude, 5,353 feet; assessed valuation, \$489,460; municipal tax levy, 15 mills; has municipal water system and sanitary sewer system. Bonds issued—Water works, \$40,000; sanitary sewers, \$37,500; streets and alleys, \$300. Total bonds issued, \$77,800; redeemed, \$7,500; outstanding, \$70,300.

Eldora (el dō' ra)—Town in Boulder county; incorporated, 3-9-1898; population—1920 census, 35; 1924 estimate, 60; altitude, 8,700 feet; assessed valuation,

\$39,897; municipal tax levy, 20 mills. Bonds issued—General municipal, \$7,880; redeemed, \$3,780; outstanding, \$4,100.

Elizabeth (ē liz' ā beth)—Town in Elbert county; on C. & S. railroad; incorporated, 8-30-1890; population—1920 census, 230; 1924 estimate, 250; altitude, 6,400 feet; assessed valuation, \$195,492; municipal tax levy, 4.6 mills; has sanitary sewer system; bank deposits, \$168,459. Bonds issued—Sanitary sewers, \$5,500; redeemed, \$3,000; outstanding, \$2,500.

Empire (em' pīr)—Town in Clear Creek county; on C. & S. railroad; incorporated population—1920 census, 105; 1924 estimate, 100; altitude, 8,603 feet; assessed valuation, \$49,145; municipal tax levy, 5 mills; has municipal water system. No bonded debt.

Englewood (en' gel wood)—City of second class, in Arapahoe county; suburb of Denver; incorporated, 5-12-1893; population—1920 census, 4,356; 1924 estimate, 5,500; altitude, 5,200 feet; assessed valuation, \$2,800,210; municipal tax levy, 12 mills; has sanitary sewer system; bank deposits, \$899,272. Bonds issued—Sanitary sewers, \$271,000; streets and alleys, \$103,000. Total bonds issued, \$374,000; redeemed, \$24,000; outstanding, \$350,000.

Erie (ē' ri)—Town in Weld county; on Burlington railroad; incorporated; population—1920 census, 697; 1924 estimate, 780; altitude, 5,000 feet; assessed valuation, \$232,930; municipal tax levy, 24 mills; has municipal water system; bank deposits, \$231,952. Bonds issued—Water works, \$48,000; redeemed, \$8,000; outstanding, \$40,000.

Estes Park (es' tēz)—Town in Larimer county; incorporated, 4-3-1917; population—1924 estimate, 640; altitude, 7,500 feet; assessed valuation, \$707,020; municipal tax levy, 10.5 mills; has sanitary sewer system; bank deposits, \$215,426. Bonds issued—Sanitary sewers, \$6,800, all outstanding.

Eureka (ū rē' ka)—Town in San Juan county; on D. & R. G. W. railroad; incorporated, 11-6-1883; population—1920 census, 160; 1924 estimate, 105; altitude, 9,800 feet; assessed valuation, \$38,677; municipal tax levy, 15 mills. No bonded debt.

Evans (ev' ānz)—Town in Weld county; on U. P. railroad; incorporated; population—1920 census, 505; 1924 estimate, 560; altitude, 4,647 feet; assessed valuation, \$269,980; municipal tax levy, 20 mills; has municipal water system; bank deposits, \$36,179. No bonded debt.

Fairplay (fā' plā)—Town, countyseat of Park county; on C. & S. railroad; incorporated; population—1920 census, 183; 1924 estimate, 200; altitude, 9,964 feet; assessed valuation, \$287,930; municipal tax levy, 5 mills; has municipal water system; bank deposits, \$144,349. No bonded debt.

Firestone (fir' stōn)—Town in Weld county; on U. P. railroad; incorporated, 2-12-1908; population—1920 census, 214; 1924 estimate, 280; altitude, 5,280 feet; assessed valuation, \$64,160; municipal tax levy, 18 mills; has municipal water and light systems. Bonds issued—Water works, \$15,000, all outstanding.

Flagler (flāg' lēr)—Town in Kit Carson county; on Rock Island railroad; incorporated, 10-17-1916; population—1920 census, 544; 1924 estimate, 650; altitude,

4,920 feet; assessed valuation, \$633,736; municipal tax levy, 20 mills; has municipal water and light systems; bank deposits, \$231,397. Bonds issued—Water works, \$120,000, all outstanding.

Fleming (flem' ing)—Town in Logan county; on Burlington railroad; incorporated, 4-16-1917; population—1920 census, 518; 1924 estimate, 590; altitude, 3,900 feet; assessed valuation, \$425,564; municipal tax levy, 22 mills; has municipal water and light systems; bank deposits, \$104,309. Bonds issued—Water works, \$80,000; electric lights, \$12,500. Total bonds issued, \$92,500, all outstanding.

Florence (flōr' ens)—City of second class, in Fremont county; on D. & R. G. W. railroad; incorporated, 6-6-1887; population—1920 census, 2,629; 1924 estimate, 2,860; altitude, 5,187 feet; assessed valuation, \$2,716,326; municipal tax levy, 14 mills; has municipal water system and sanitary sewer system; bank deposits, \$1,397,455. Bonds issued—Water works, \$85,000; streets and alleys, \$53,677. Total bonds issued, \$138,677; redeemed, \$87,177; outstanding, \$51,500.

Florissant (flōr' is ānt)—Town in Teller county; incorporated, 6-27-1891; population—1920 census, 48; 1924 estimate, 40; altitude, 8,193 feet. No bonded debt.

Fort Collins (kol' lins)—City of second class, county seat of Larimer county; on C. & S. and U. P. railroads; incorporated;; population—1920 census, 8,755; 1924 estimate, 11,500; altitude, 5,100 feet; assessed valuation, \$9,053,840; municipal tax levy, 12.9 mills; has municipal water system and sanitary sewer system; bank deposits, \$4,687,743. Pagosa Springs (pā gō'sa)—Town, countyseat of Archuleta county; on D. & R. G. W. railroad; incorporated, 2-28-1891; population—1920 census, 1,032; 1924 estimate, 1,120; altitude, 7,077 feet; assessed valuation, \$581,105; municipal tax levy, 13.5 mills; has municipal water system; bank deposits, \$317,930. Bonds issued—Water works, \$17,500; all outstanding.

Palisades (pālisād'z)—Town in Mesa county; on D. & R. G. W. railroad; incorporated, 4-4-1904; population—1920 census, 855; 1924 estimate, 965; altitude, 4,740; assessed valuation, \$615,648; municipal tax levy, 22 mills; has municipal water system; bank deposits, \$431,572. Bonds issued—Water works, \$75,000; parks, \$5,000. Total bonds issued, \$80,000; redeemed, \$11,250; outstanding, \$68,750.

Palmer Lake (pām'ēr)—Town in El Paso county; on D. & R. G. W. and A. T. & S. F. railroads; incorporated, 2-23-1889; population—1920 census, 160; 1924 estimate, 160; altitude, 6,237; assessed valuation, \$478,260; municipal tax levy, 8 mills; has municipal water system. Bonds issued—Water works, \$20,500, all outstanding.

Paonia (pā ōn'ya)—Town in Delta county; on D. & R. G. W. railroad; incorporated, 7-14-1902; population—1920 census, 925; 1924 estimate, 1,020; altitude, 5,696 feet; assessed valuation, \$710,910; municipal tax levy, 10.9 mills; has municipal water and light systems and sanitary sewer system; bank deposits, \$596,786. Bonds issued—Water works, \$45,000; electric lights, \$4,500; sanitary sewers, \$53,000. Total bonds issued, \$102,500; redeemed, \$1,000; outstanding, \$101,500.

Peetz (pēt'z)—Town in Logan county; on Burlington railroad; incorporated, 4-9-1917; population—1920 census, 322; 1924 estimate, 350; altitude, 4,300 feet; assessed valuation, \$316,998; municipal tax levy, 21.2 mills; has municipal water and light systems; bank deposits, \$103,195. Bonds issued—Water works, \$93,500, all outstanding.

Pierce—Town in Weld county; on U. P. railroad; incorporated, 5-10-1918; population—1920 census, 327; 1924 estimate, 350; altitude, 5,041 feet; assessed valuation, \$205,660; municipal tax levy, 17.5 mills; has municipal water system. Bonds issued—Water works, \$43,000, all outstanding.

Pitkin (pit'kin)—Town in Gunnison county; on D. & R. G. W. railroad; incorporated, 8-11-1879; population—1920 census, 165; 1924 estimate, 160; altitude, 9,200 feet; assessed valuation, \$98,505; municipal tax levy, 8 mills. No bonded debt.

Platteville (plāt'vil)—Town in Weld county; on U. P. railroad; incorporated by reorganization under the general incorporation laws, 3-21-1885; population—1920 census, 479; 1924 estimate, 500; altitude, 4,820 feet; assessed valuation, \$380,980; municipal tax levy, 17 mills; has municipal water system and sanitary sewer system; bank deposits, \$258,826. Bonds issued—Water works, \$35,000, all outstanding.

Poncha Springs (pon'cha)—Town in Chaffee county; on D. & R. G. W. railroad; incorporated, 12-31-1880; population—1920 census, 37; 1924 estimate, 50; altitude, 7,500 feet; assessed valuation, \$71,616; municipal tax levy, 4.5 mills. No bonded debt.

Pueblo (pweb'lō)—City of first class, county seat of Pueblo county; on D. & R. G. W. and A. T. & S. F. railroads; incorporated,; population—1920 census, 43,050; 1924 estimate, 45,000; altitude, 4,700 feet; assessed valuation, \$69,829,451; municipal tax levy, 24.6 mills; has municipal water system and sanitary sewer system; bank deposits, \$18,154,576. Bonds issued—Public buildings, \$300,000; water works, \$1,216,000; parks, \$334,000; streets and alleys, \$1,948,300; miscellaneous, \$560,000. Total bonds issued, \$4,358,300, all outstanding.

Raymer (rā'mēr)—Town in Weld county; on Burlington railroad; incorporated, 3-14-1919; population—1920 census, 267; 1924 estimate, 250; altitude, 4,779 feet; assessed valuation, \$229,790; municipal tax levy, 9.5 mills; has municipal water system. Bonds issued—Water works, \$20,000, all outstanding.

Red Cliff—Town in Eagle county; on D. & R. G. W. railroad; incorporated, 7-29-1880; population—1920 census, 347; 1924 estimate, 350; altitude, 9,608 feet; assessed valuation, \$158,860; municipal tax levy, 27.6 mills; has municipal water system; bank deposits, \$120,996. Bonds issued—Water works, \$20,000; redeemed, \$2,500; outstanding, \$17,500.

Rico (rē'kō)—Town, countyseat of Dolores county; on Rio Grande Southern; incorporated, 7-29-1880; population—1920 census, 326; 1924 estimate, 245; altitude, 8,900 feet; assessed valuation, \$143,056; municipal tax levy, 17 mills; has municipal water system. Bonds issued—Water works, \$10,000; redeemed, \$4,000; outstanding, \$6,000.

Ridgway (rij'wā)—Town in Ouray county; on D. & R. G. W. railroad; incorporated, 2-28-1891; population—1920 census, 400; 1924 estimate, 425; altitude, 6,770 feet; assessed valuation, \$218,510; municipal tax levy, 17 mills; has municipal water system; bank deposits, \$123,758. Bonds issued—Water works, \$30,000; redeemed, \$20,000; outstanding, \$10,000.

Rife—Town in Garfield county; on D. & R. G. W. railroad; incorporated, 8-7-1905; population—1920 census, 885; 1924 estimate, 980; altitude, 5,332 feet; assessed valuation, \$725,652; municipal tax levy, 12.5 mills; has municipal water and sanitary sewer systems; bank deposits, \$545,192. Bonds issued—Water works, \$60,000; sanitary sewers, \$7,088; streets and alleys, \$52,000. Total bonds issued, \$119,088; redeemed, \$21,000; outstanding, \$98,088.

Rockvale (rok'vāl)—Town in Fremont county; on D. & R. G. W. railroad; incorporated, 8-28-1886; population—1920 census, 1,249; 1924 estimate, 1,350; altitude, 5,260 feet; assessed valuation, \$181,654; municipal tax levy, 13 mills; has municipal water system. No bonded debt.

Rocky Ford—City of second class, in Otero county; on A. T. & S. F. railroad; incorporated, 8-6-1887; population—1920 census, 3,746; 1924 estimate, 4,280; altitude, 4,250 feet; assessed valuation, \$2,987,040; municipal tax levy, 19.1 mills; has municipal water and sanitary sewer systems; bank deposits, \$900,600. Bonds issued—Water works, \$165,000; storm sewers, \$143,543; streets and alleys, \$201,950. Total bonds issued, \$510,494; redeemed, \$100,000; outstanding, \$410,494.

Saguache (sa wäch')—Town, county-seat of Saguache county; incorporated,; population—1920 census, 948; 1924 estimate, 1,030; altitude, 7,800 feet; assessed valuation, \$552,427; municipal tax levy, 24.4 mills; has municipal light system; bank deposits, \$396,196. Bonds issued—Public buildings, \$3,900; electric lights, \$10,000; miscellaneous, \$3,200. Total bonds issued, \$17,100, all outstanding.

Salida (sā lī' da)—City of second class, in Chaffee county; on D. & R. G. W. railroad; incorporated, 10-4-1880; population—1920 census, 4,689; 1924 estimate, 4,750; altitude, 7,050 feet; assessed valuation, \$3,317,344; municipal tax levy, 10 mills; has municipal water and sanitary sewer systems; bank deposits, \$1,401,733. Bonds issued—Water works, \$40,000; redeemed, \$39,000; outstanding, \$1,000.

Sanford (săn' fōrd)—Town in Conejos county; incorporated,; population—1920 census, 555; 1924 estimate, 580; altitude, 7,560 feet; assessed valuation, \$132,155; municipal tax levy, 4 mills. No bonded debt.

Sawpit (saw' pit)—Town in San Miguel county; on D. & R. G. W. railroad; incorporated 5-5-1896; population, 121; 1924 estimate, 90; altitude, 7,400 feet. No bonded debt.

Sedgwick (sej' wik)—Town in Sedgwick county; on U. P. railroad; incorporated, 1-15-1918; population—1920 census, 380; 1924 estimate, 450; altitude, 3,500 feet; assessed valuation, \$333,145; municipal tax levy, 22 mills; has municipal water and light systems; bank deposits, \$218,365. Bonds issued—Water works, \$71,000; all outstanding.

Seibert (sē' bērt)—Town in Kit Carson county; on Rock Island railroad; incorporated, 3-16-1917; population—1920 census, 311; 1924 estimate, 360; altitude, 4,705 feet; assessed valuation, \$356,050; municipal tax levy, 15 mills; has municipal water and light systems; bank deposits, \$88,931. Bonds issued—Water works, \$50,000; electric lights, \$6,000. Total bonds issued, \$56,000, all outstanding.

Sheridan (shēr' idăn)—Town in Arapahoe county; on A. T. & S. F. and D. & R. G. W. railroads; incorporated, 2-18-1890; population—1920 census, 455; 1924 estimate, 610; altitude, 5,394 feet; assessed valuation, \$493,640; municipal tax levy, 6 mills. No bonded debt.

Silt (silt)—Town in Garfield county; on D. & R. G. W. railroad; incorporated,; population—1920 census, 165; 1924 estimate, 170; altitude, 5,338 feet; assessed valuation, \$119,588; municipal tax levy, 15.2 mills; has municipal water system; bank deposits, \$118,669. Bonds issued—Refunding warrants, \$3,000; water works, \$3,000. Total bonds issued, \$6,000, all outstanding.

Silver Cliff—Town, countyseat of Custer county; on D. & R. G. W. railroad; incorporated, 12-30-1878; population—1920 census, 241; 1924 estimate, 270; altitude, 8,000 feet; assessed valuation, \$25,594; municipal tax levy, 12.5 mills; has municipal water system. No bonded debt.

Silver Plume (plōōm)—Town in Clear Creek county; on C. & S. railroad; incorporated, 8-16-1880; population—1920 census, 272; 1924 estimate, 230; altitude, 9,175 feet; assessed valuation, \$150,415; municipal tax levy, 12.75 mills; has municipal water system. Bonds issued—Water works, \$500, all outstanding.

Silverton (sil' vēr tūn)—Town, county-seat of San Juan county; on D. & R. G. W. railroad; incorporated,; population—1920 census, 1,150; 1924 estimate, 1,015; altitude, 9,302 feet; assessed valuation, \$705,106; municipal tax levy, 10 mills; has municipal water and light systems; bank deposits, \$433,374. Bonds issued—Water works, \$20,000; redeemed, \$4,000; outstanding, \$16,000.

Simla (sim' la)—Town in Elbert county; on Rock Island railroad; incorporated, 12-28-1911; population—1920 census, 387; 1924 estimate, 495; altitude, 6,090 feet; assessed valuation, \$284,934; municipal tax levy, 28.37 mills; has municipal water and light systems; bank deposits, \$90,565. Bonds issued—Water works, \$41,000; electric lights, \$19,600. Total bonds issued, \$60,600, all outstanding.

Springfield—Town, countyseat of Baca county; incorporated, 1-7-1890; population—1920 census, 295; 1924 estimate, 580; altitude, 4,400 feet; assessed valuation, \$315,500; municipal tax levy, 6 mills; bank deposits, \$240,388. No bonded debt.

Steamboat Springs—Town, countyseat of Routt county; on Denver & Salt Lake railroad; incorporated, 7-17-1900; population—1920 census, 1,249; 1924 estimate, 1,490; altitude, 6,762 feet; assessed valuation, \$1,171,100; municipal tax levy, 14.5 mills; has municipal water and sanitary sewer systems; bank deposits, \$734,506. Bonds issued—Water works, \$84,000; sanitary sewers, \$70,552.38; streets and alleys, \$32,500. Total bonds issued, \$187,052.38; redeemed, \$53,000; outstanding, \$134,052.38.

St. Elmo (el' mō)—Town in Chaffee county; on C. & S. railroad; incorporated, 10-30-1880; population—1920 census, 37; 1924 estimate, 25; altitude, 10,000 feet; assessed valuation, \$11,295; municipal tax levy, 20 mills; has municipal water system. No bonded debt.

Sterling (stēr' ling)—City of second class, countyseat of Logan county; on U. P. railroad; incorporated, 11-8-1884; population—1920 census, 6,415; 1924 estimate, 7,250; altitude, 3,947 feet; assessed valuation, \$6,206,642; municipal tax levy, 14 mills; has municipal water and sanitary sewer systems; bank deposits, \$2,010,899. Bonds issued—Water works, \$520,000; sanitary sewers, \$114,000; streets and alleys, \$479,500. Total bonds issued, \$1,113,500; redeemed, \$80,500; outstanding, \$1,033,000.

Stratton (strāt' ūn)—Town in Kit Carson county; on Rock Island railroad; incorporated, 3-18-1919; population—1920 census, 421; 1924 estimate, 530; altitude, 4,404 feet; assessed valuation, \$677,026; municipal tax levy, 10 mills; has municipal water and light systems; bank deposits, \$97,260. Bonds issued—Water works, \$75,000, all outstanding.

Sugar City—Town in Crowley county; on Missouri Pacific railroad; incorporated, 5-31-1900; population—1920 census, 836; 1924 estimate, 840; altitude, 4,325 feet; assessed valuation, \$350,435; municipal tax levy, 18 mills; has municipal water and sanitary sewer systems; bank deposits, \$103,735. Bonds issued—Water works, \$20,000; sanitary sewers, \$12,981; miscellaneous, \$16,000. Total bonds issued, \$48,981; redeemed, \$14,781; outstanding, \$34,200.

Superior (sōō pē' ri or)—Town in Boulder county; on C. & S. railroad; incorporated, 4-5-1904; population—1920 census, 233; 1924 estimate, 295; altitude, 5,512 feet; assessed valuation, \$49,680; municipal tax levy, 22 mills. No bonded debt.

Swink (swink)—Town in Otero county; on A. T. & S. F. railroad; incorporated, 5-19-1906; population—1920 census, 465; 1924 estimate, 425; altitude, 4,000 feet; assessed valuation, \$252,490; municipal tax levy, 13.6 mills; has municipal water system; bank deposits, \$103,154. Bonds issued—Water works, \$10,000, all outstanding.

Telluride (tel' ū rid)—Town, countyseat of San Miguel county; on D. & R. G. W. railroad; incorporated,; population—1920 census, 1,618; 1924 estimate, 1,510; altitude, 8,500 feet; assessed valuation, \$1,351,830; municipal tax levy, 8 mills; has municipal water system and sanitary sewer system; bank deposits, \$1,111,635. No bonded debt.

Timnath (tim' nāth)—Town in Larimer county; on C. & S. railroad; incorporated, 6-22-1920; population—1924 estimate, 215; altitude, 4,875; assessed valuation, \$158,380; municipal tax levy, 8 mills; has municipal water system; bank deposits, \$37,766. Bonds issued—Water works, \$14,000, all outstanding.

Trinidad (trin' idād)—City of second class, county seat of Las Animas county; on four railroads; incorporated,; population—1920 census, 10,906; 1924 estimate, 12,100; altitude, 5,999 feet; assessed valuation, \$10,704,813; municipal tax levy, 18 mills; has municipal water system and sanitary sewer system; bank deposits, \$8,009,104. Bonds issued—Water works, \$1,171,000; bridges and viaducts, \$69,700; sanitary sewers, \$30,000; streets and alleys, \$961,000. Total bonds issued, \$2,231,700; redeemed, \$283,800; outstanding, \$1,947,900.

Two Buttes (būtē)—Town in Baca county; incorporated, 8-1-1911; population—1920 census, 93; 1924 estimate, 100; altitude, 4,075 feet; assessed valuation, \$95,600; municipal tax levy, 2 mills; has municipal water system; bank deposits, \$59,264. No bonded debt.

Victor (vik' tēr)—Town in Teller county; incorporated, 5-15-1894; population—1920 census, 1,777; 1924 estimate, 1,450; altitude, 9,900 feet; assessed valuation, \$507,680; municipal tax levy, 50 mills; bank deposits, \$1,227,187. Bonds issued—Water works refunding, \$384,000; warrant refunding, \$139,100. Total bonds issued, \$523,100; redeemed, \$17,500; outstanding, \$505,600.

Vona (vō' na)—Town in Kit Carson county; on Rock Island railroad; incorporated 6-9-1919; population—1920 census, 268; 1924 estimate, 215; altitude, 4,494; assessed valuation, \$209,761; municipal tax levy, 5.37 mills; has municipal water system; bank deposits, \$45,086. No bonded debt.

Walden (wāl' den)—Town, countyseat of Jackson county; on Colorado & Wyoming railroad; incorporated, 8-6-1890; population—1920 census, 260; 1924 estimate, 265; altitude, 8,300 feet; assessed valuation, \$266,970; municipal tax levy, 13 mills; has municipal water system and light system; bank deposits, \$314,541. Bonds issued—Water works, \$20,000; redeemed, \$900.00; outstanding, \$19,100.

Walsenburg (wāl' sen bērg)—City of second class, countyseat of Huerfano county; on D. & R. G. W. and C. & S.

railroads; incorporated,; population—1920 census, 3,565; 1924 estimate, 4,054; altitude, 6,200 feet; assessed valuation, \$2,797,957; municipal tax levy, 14 mills; has municipal water and sanitary sewer systems; bank deposits, \$2,368,091. Bonds issued—Water works, \$353,500; streets and alleys, \$465,000. Total bonds issued, \$818,500; redeemed, \$39,500; outstanding, \$779,000.

Ward—Town in Boulder county; incorporated, 5-20-1896; population—1920 census, 74; 1924 estimate, 35; altitude, 9,350; assessed valuation, \$27,966; municipal tax levy, 15 mills; has municipal water and light systems. No bonded debt.

Wellington (wel' ing tūn)—Town in Larimer county; on C. & S. railroad; incorporated, 10-24-1905; population—1920 census, 439; 1924 estimate, 950; altitude, 5,000 feet; assessed valuation, \$431,410; municipal tax levy, 10 mills; has municipal water system; bank deposits, \$155,055. Bonds issued—Public buildings, \$2,900; water works, \$40,000. Total bonds issued, \$42,900; all outstanding.

Westcliffe (west' klif)—Town in Custer county; on D. & R. G. W. railroad; incorporated, 6-2-1887; population—1920 census, 338; 1924 estimate, 350; altitude, 7,800 feet; assessed valuation, \$263,627; municipal tax levy, 10 mills; has municipal water system; bank deposits, \$197,821. No bonded debt.

Westminster (west' min stēr)—Town in Adams county; on C. & S. railroad; incorporated, 4-4-1911; population—1920 census, 235; 1924 estimate, 360; altitude, 5,280 feet; assessed valuation, \$392,940; municipal tax levy, 14.25 mills; has municipal water system. Bonds issued—Water works, \$28,000, all outstanding.

Wiley (wī' li)—Town in Prowers county; on A. T. & S. F. railroad; incorporated, 6-3-1908; population—1920 census, 565; 1924 estimate, 570; altitude, 3,100 feet; assessed valuation, \$303,815; municipal tax levy, 14.2 mills; has municipal water system; bank deposits, \$109,851. Bonds issued—Water works, \$32,000; redeemed, \$1,000; outstanding, \$31,000.

Williamsburg (wil' yānz bērg)—Town in Fremont county; on D. & R. G. W. railroad; incorporated, 3-29-1888; population—1920 census, 402; 1924 estimate, 305; altitude, 5,250 feet; assessed valuation, \$66,262; municipal tax levy, 21 mills; has municipal water system. Bonds issued—Water works, \$3,500; redeemed, \$2,000; outstanding, \$1,500.

Windsor (wind' sēr)—Town in Weld county; on C. & S. railroad; incorporated, 4-1-1890; population—1920 census, 1,290; 1924 estimate, 1,350; altitude, 4,900 feet; assessed valuation, \$1,149,220; municipal tax levy, 13.5 mills; has municipal water and sanitary sewer systems; bank deposits, \$515,465. Bonds issued—Public buildings, \$3,500; water works, \$32,500; streets and alleys, \$24,000. Total bonds issued, \$60,000; redeemed, \$2,500; outstanding, \$57,500.

Wray (rā)—Town, countyseat of Yuma county; on Burlington railroad; incorporated, 12-29-1888; population—1920 census, 1,538; 1924 estimate, 1,795; altitude, 3,500 feet; assessed valuation, \$1,510,040; municipal tax levy, 19.5 mills; has municipal water system, sanitary sewer system, municipal light system; bank deposits, \$682,153. Bonds issued—Water works, \$110,000; electric lights,

\$27,000; sanitary sewers, \$71,300. Total bonds issued, \$208,300; redeemed, \$10,000; outstanding, \$198,300.

Yampa (yām'pa)—Town in Routt county; on Denver & Salt Lake railroad; incorporated, 4-17-1906; population—1920 census, 200; 1924 estimate, 285; altitude, 7,884 feet; assessed valuation, \$142,250; municipal tax levy, 16.5 mills; has municipal water system; bank deposits, \$173,547. Bonds issued—Water works, \$10,000; redeemed, \$2,000; outstanding, \$8,000.

Yuma (ū'ma)—Town in Yuma county; on Burlington railroad; incorporated, 2-19-1887; population—1920 census, 1,177; 1924 estimate, 1,260; altitude, 4,128 feet; assessed valuation, \$1,194,020; municipal tax levy, 15.6 mills; has municipal water and light systems and sanitary sewer system; bank deposits, \$596,005. Bonds issued—Water works, \$141,000; electric lights, \$2,900; sanitary sewers, \$85,000. Total bonds issued, \$228,900; redeemed, \$8,000; outstanding, \$220,900.

Railway Distances From Denver

IN the accompanying list only incorporated towns are given, and only distances from Denver, but by reference to the map accompanying this volume, it will not be difficult to determine the railroad distances between nearly all important places in the state. The railroad given is the road on which the town is located or the nearest road. If it is on more than one road, only one is named in most cases, being that over which the distance from Denver is the shortest. Which of these towns are countyseats may be determined from the table on page 163. The following abbreviations are used:

Burlington, Chicago, Burlington & Quincy; C. & S., Colorado & Southern; C. C. Short Line, Colorado Springs & Cripple Creek District; D. & R. G., Denver & Rio Grande Western; D. & S. L., Denver & Salt Lake; Midland, Colorado Midland; M. P., Missouri Pacific; R. I., Chicago, Rock Island & Pacific; Santa Fe, Atchison, Topeka & Santa Fe; U. P., Union Pacific; C. W. & E., Colorado, Wyoming and Eastern.

Portions of the Colorado Midland railroad have been temporarily abandoned, and several points formerly reached over this road now must be reached over the Denver & Rio Grande Western, the distance being somewhat greater.

* Not directly on a railroad. The road given is the nearest.

† The Colorado & Southern, Denver & Rio Grande Western and Santa Fe railroads serve towns between Denver and Pueblo, and the distance is about the same by all lines. The two first named roads have direct lines from Denver to Trinidad, and the Santa Fe route is by way of La Junta.

‡ No railroad approaches nearer than 22 miles of Estes Park, which lies near the east entrance to the Rocky Mountain national park. The distance given is by way of Lyons.

This list includes only some of the more important lakes and reservoirs in the state. There are hundreds of small lakes in the mountains, many of which have no names. On Battlement mesa and Grand mesa, in Delta and Mesa counties there are more than a hundred comparatively small lakes lying at an altitude above 8,000 feet, all well stocked with trout.

Colorado Commercial Organizations

ACTIVE commercial organizations in all parts of the state are doing excellent work toward building up their respective communities and developing the rich resources of the entire state. There is now scarcely a county in Colorado without one or more active commercial organizations and the aggregate number is increasing steadily. A number of state commercial organizations have been in operation in Colorado from time to time, through which it has generally been intended that all local commercial bodies should co-operate in movements of general state development. There is such an organization in existence at present, but its activities so far are very limited. Greater Colorado, Incorporated, with headquarters at Colorado Springs, was organized for the purpose of coordinating the efforts of the business and professional men of the state, through the regular weekly luncheon clubs of the various cities and towns, in further advertising the resources of Colorado and developing its resources. One special object undertaken by this organization is the preparation and publication of school text books on the history, geography, geology, natural resources, etc., of the state. A text book on history has been prepared and is now in process of publication. Harry L. McGinnis of Buena Vista is president, Earl C. Romine of Colorado Springs is secretary and treasurer, and A. W. Luce of Colorado Springs is field representative and organizer. The Colorado Manufacturers' association, with headquarters in Denver, was organized to represent the manufacturing interests of the entire state and its membership comes from all parts

of the state. W. J. H. Doran of Denver is president and E. C. Dawson is executive secretary. Its headquarters is in Denver. There are numerous organizations of statewide scope that concern themselves with furthering the interests of special industries, but this volume makes no effort to catalogue them. Since new local commercial bodies are being formed at frequent intervals it is more than possible that a few active organizations have not reported to this department and are therefore not included in the following list.

ADAMS COUNTY

Aurora—Aurora Improvement association; president, John McMillan; secretary, L. J. Mehl; covers Aurora and vicinity.

Bennett—Commercial Club of Bennett; president, J. H. Skinner; secretary, A. O. Westerman; covers Bennett and vicinity.

Brighton—Brighton Commercial club; president, H. A. Harbeck, Jr.; secretary, B. Galen Gaunt; covers Brighton and vicinity.

ALAMOSA COUNTY

Alamosa—Alamosa County Chamber of Commerce; president, Albert L. Moses; secretary, A. F. Bethman; covers San Luis valley.

ARAPAHOE COUNTY

Deer Trail—Deer Trail Chamber of Commerce; president, Hugh Anderson; secretary, George Crowe; covers Deer Trail and vicinity.

Englewood—Englewood Chamber of Commerce; president, A. E. Ferguson; secretary, J. J. Mackin; covers city of Englewood.

BACA COUNTY

Two Buttes—Two Buttes Commercial club; president, H. D. Gaiter; secretary, R. C. Best; covers Two Buttes and vicinity.

BENT COUNTY

Las Animas—Las Animas Commercial club; president, A. C. Johnson; secretary, H. E. Gilliland; covers Las Animas and vicinity.

BOULDER COUNTY

Boulder—Boulder Chamber of Commerce; president, J. A. Hunter; secretary, Chas. R. Streamer; covers Boulder and vicinity.

Boulder—Boulder County Metal Mining association; president, John R. Wolff; secretary, E. D. Hill; covers Boulder county.

Lafayette—Lafayette Commercial association; president, Geo. E. Bermont; secretary, B. J. Radford; covers Lafayette and vicinity.

Longmont—Longmont Commercial association; president, Fred E. Tankell; secretary, C. D. Rue; covers Longmont and vicinity.

Louisville—Louisville Commercial Association; president, J. J. Steinbaugh; secretary, Edward Affolter; covers Louisville and vicinity.

Lyons—Lyons Commercial association; president, M. W. Turner; secretary, O. J. Ramey; covers Lyons and vicinity.

CHAFFEE COUNTY

Buena Vista—Buena Vista Board of Trade; president, G. K. Hartenstein; secretary, A. E. Smith; covers Buena Vista and vicinity.

Salida—Salida Chamber of Commerce; president, George H. Curfman; secretary, B. B. Basere; covers Salida and vicinity.

CHEYENNE COUNTY

Cheyenne Wells—Cheyenne Wells Commercial club; president, F. E. Miller; secretary, A. A. Martin; covers Cheyenne Wells and vicinity.

CLEAR CREEK COUNTY

Empire—Empire Commercial association; president, G. H. Anderson; secretary, E. E. Koch; covers Empire and vicinity.

Idaho Springs—Idaho Springs Bureau of Mines and Commerce; president, Harry E. Thompson; secretary, Chas. L. Harrington; covers Clear Creek county.

Georgetown—Georgetown Board of Mines and Commerce; president, H. S. Bushnell; secretary, George D. Criley; covers Georgetown and vicinity.

CONEJOS COUNTY

Antonito—Antonito Commercial club; president, J. D. Frazey; secretary, Riley W. Emmons; covers Antonito and vicinity.

La Jara—La Jara Commercial club; president, F. D. Calkins; secretary, Milo E. Harrah; covers La Jara and vicinity.

Manassa—Manassa-Romeo Commercial club; president, Leonard M. Haynie; secretary, Harry McCarroll; covers Manassa and Romeo and vicinity.

CROWLEY COUNTY

Ordway—Lions club; president, J. C. Hoffman; secretary, M. H. Hasstedt; covers Ordway and vicinity.

Sugar City—Sugar City Chamber of Commerce; president, L. A. Richards; secretary, R. A. Hamilton; covers Sugar City and vicinity.

CUSTER COUNTY

Westcliffe—Custer County Chamber of Commerce; president, George Phillips; secretary, Rev. Edw. Berkemeyer; covers Custer county.

DELTA COUNTY

Cedaredge—Cedaredge Commercial club; president, B. F. Elhart; secretary, E. G. Hammock; covers Cedaredge.

Delta—Delta Chamber of Commerce, president, H. W. Robinson; secretary, F. J. Harding; covers Delta and vicinity.

Hotchkiss—Hotchkiss Business Men's association; president, T. L. Blackwell; secretary, Fred R. Foster; covers Hotchkiss and vicinity.

Paonia—Paonia Lyons Club; president, Ed. Curtis; secretary, Norval Bruce.

DENVER COUNTY

Denver—Denver Civic and Commercial association; president, L. Ward Bannister; secretary, George E. Collison; covers city and county of Denver. This organization includes the following bureaus, most of which formerly were independent organizations: Advertising bureau—chairman, A. U. Mayfield; Agricultural and Livestock bureau—chairman, A. J. Simonson; Business and Professional Women—chairman, Mrs. Helen B. Bell; Civic and Legislative bureau—chairman, H. O. Bosworth; Electrical bureau—chairman, William C. Sterne; Insurance bureau—chairman, J. Stanley Edwards; Jobbers' bureau—chairman, Thomas Aurelius; Manufacturers' bureau—chairman, H. Brown Cannon; Membership bureau—chairman, M. M. Schayer; Mining bureau—chairman, H. L. Sinclair; Realtors' bureau—chairman, L. C. Fulenwider; Retail Merchants' bureau—chairman, H. M. Stoll; Salesmanship bureau—chairman, Ellis H. Porter; Tourist and Publicity bureau—chairman, Fred F. Syman; secretary, Harry N. Burhans; Transportation bureau—chairman, Burt Coldren.

DOUGLAS COUNTY

Castle Rock—Lions Club of Castle Rock; president, Willard L. Fales; secretary, F. B. Rose; covers Douglas county.

EAGLE COUNTY

Eagle—Eagle Valley Commercial and Improvement association; president, W. J. Meehan; secretary, J. D. Allen; covers Eagle and vicinity.

ELBERT COUNTY

Elizabeth—Elizabeth Commercial association; president, C. W. Reed; secretary, Peter Blumer; covers Elizabeth and vicinity.

Simla—Simla Commercial club; president, E. E. Gray; secretary, O. M. King; covers Simla and vicinity.

EL PASO COUNTY

Colorado Springs—Colorado Springs Chamber of Commerce; president, F. L. Crissey; secretary, E. E. Jackson; covers Pikes Peak region.

Fountain—Fountain Commercial club; president, Geo. V. Johnson; secretary, C. W. Riddoch; covers Fountain and vicinity.

FREMONT COUNTY

Canon City—Canon City Chamber of Commerce; president, C. A. Linkins; secretary, David L. Robinson; covers Canon City and vicinity.

Florence—Florence Chamber of Commerce; president, J. M. Dodson; secretary, Jackson Taylor, Jr.; covers eastern part of Fremont county.

GARFIELD COUNTY

Carbondale—Carbondale District Community club; president, W. A. E. DeBeque; secretary, E. D. Tandy; covers Carbondale and vicinity.

Glenwood Springs—Glenwood Springs Chamber of Commerce; president, J. E. Miller; secretary, C. L. Hubbard; covers Glenwood Springs.

Grand Valley—Grand Valley Commercial club; president, Elmer E. Wheatley; covers Grand Valley and vicinity.

New Castle—Wide Awake club; president, J. P. Davis; secretary, U. S. Youmans; covers New Castle and vicinity.

Rife—Rife Community club; president, Q. Hutton; secretary, C. A. Graham; covers Rife and Silt and vicinity.

GILPIN COUNTY

Central City—Gilpin County Metal Mining association; president, Chas. O. Richards; secretary, Henry J. Stahl; covers Gilpin county.

GRAND COUNTY

Hot Sulphur Springs—Grand County Commercial Club; president, N. C. Huffaker; secretary, Mrs. W. C. Glass; covers Grand county.

Kremmling—Kremmling District Commercial club; president, H. O. Gray; secretary, C. C. Eastin; covers western part of Grand county.

GUNNISON COUNTY

Gunnison—Gunnison Chamber of Commerce; president, O. E. Winslow; secretary, Leonard D. Gladstone; covers Gunnison county.

HUERFANO COUNTY

La Veta—La Veta Commercial club; president, W. A. Campbell; secretary, C. C. Webster; covers La Veta and vicinity.

Walsenburg—Walsenburg Chamber of Commerce; president, Robert Young; secretary, Edward W. Melville; covers Huerfano county.

JACKSON COUNTY

Walden—Jackson County Commercial association; president, Dr. R. B. Slater; secretary, A. A. Hunter; covers Jackson county.

JEFFERSON COUNTY

Arvada—Arvada Community club; president, Newt. Olson; secretary, Ralph W. Smith; covers Arvada, Wheatridge and vicinity.

Golden—Golden Chamber of Commerce; president, A. J. Treffeisen; secretary, O. A. Goetze; covers Golden and vicinity.

KIOWA COUNTY

Eads—Eads Commercial club; president, A. T. Cherry; secretary, H. H. Becker; covers Eads and vicinity.

Haswell—Haswell Commerce club; president, R. L. Gilchrist; secretary, F. P. January; covers Haswell and vicinity.

KIT CARSON COUNTY

Burlington—Burlington Chamber of Commerce; president, C. D. Reed; secretary, Parke Guthrie; covers Burlington and vicinity.

Flagler—Flagler Commercial club; president, R. M. Farquhar; secretary, Gust. Westman; covers Flagler and vicinity.

LAKE COUNTY

Leadville—Leadville Chamber of Commerce; president, John Cortellini; secretary, Mrs. Alice McCaughan; covers Lake county.

LA PLATA COUNTY

Durango—Durango Exchange; president, J. A. Clay; secretary, Chas. E. Hall; covers the San Juan basin.

Ignacio—Ignacio Commercial club; secretary, Wm. J. Horther; covers Ignacio and vicinity.

LARIMER COUNTY

Berthoud—Berthoud Chamber of Commerce; president, Jas. Jensen; secretary, P. D. Nelson; covers southern Larimer county.

Estes Park—Estes Park Chamber of Commerce; president, C. E. Verry; secretary, Geo. R. Patterson; covers Estes-Rocky Mountain National Park.

Fort Collins—Fort Collins Chamber of Commerce; president, E. H. Warner; secretary, J. W. Rainey; covers city of Fort Collins and vicinity.

Loveland—Loveland Civic association; president, L. J. Vissey; secretary, Charlotte R. Crowell; covers Loveland and vicinity.

Wellington—Wellington Commercial club; president, E. A. Shinn; secretary, G. A. Etter; covers northern part of Larimer county.

LAS ANIMAS COUNTY

Kim—Kim Community club; president, W. C. Byers; secretary, Victor L. Waters; covers eastern part of Las Animas county.

Trinidad—Trinidad-Las Animas County Chamber of Commerce; president, L. A. Hanawald; secretary, William E. Inglis; covers Trinidad and Las Animas county.

LINCOLN COUNTY

Arriba—Business Men's organization; president, John Freely; secretary, A. A. Marquardt; covers Arriba and vicinity.

Hugo—Hugo Commercial club; president, M. C. Jones; secretary, J. P. Iseman; covers Hugo and vicinity.

Limon—Limon Commercial club; president, D. W. Wells; secretary, E. Lockyear; covers Limon and vicinity.

LOGAN COUNTY

Fleming—Fleming Community association; president, H. M. Gauber; secretary, Mike O'Leary; covers Fleming and vicinity.

Merino—Merino Progress club; president, C. E. Peterson; secretary, A. M. Brown; covers Merino and vicinity.

Peeetz—Peeetz Commercial club; president, I. J. Palmer; secretary, M. A. Shipman, Jr.; covers Peeetz and vicinity.

Sterling—Sterling Chamber of Commerce; president, W. Mabry King; secretary, H. M. Harms; covers Sterling and vicinity.

MESA COUNTY

Collbran—Collbran Chamber of Commerce; president, W. M. Porter; secretary, S. D. Lieurance; covers Collbran and eastern part of Plateau valley.

DeBeque—DeBeque Chamber of Commerce; president, H. A. Hansen; secretary, F. H. Lischke; covers DeBeque and vicinity.

Fruita—Fruita Chamber of Commerce; president, D. M. Brumbaugh; secretary, A. V. Sharpe; covers Fruita and vicinity.

Grand Junction—Grand Junction Chamber of Commerce; president, F. C. Hogue; secretary, W. M. Wood; covers Mesa county.

Palisades—Palisades Chamber of Commerce; president, A. G. Tilton; secretary, F. P. Weyandt; covers Palisades and vicinity.

MINERAL COUNTY

Creede—Mineral County Business Men's association; president, A. H. Wasson; secretary, A. H. Major; covers Mineral county.

MOFFAT COUNTY

Craig—Craig Commercial club; president, Lee H. Jones; secretary, F. R. Cowan; corresponding secretary, W. P. Finley; covers Moffat county.

MONTEZUMA COUNTY

Cortez—Cortez Chamber of Commerce; president, F. L. Miller; secretary, George B. Bowra; covers Montezuma county.

Dolores—Dolores Commercial club; president, R. S. S. Fox; secretary, Chas. Bear; covers Dolores and northern part of Montezuma county.

Mancos—Mancos-Mesa Verde club; president, W. E. Faris; secretary, F. M. Shideler; covers Mancos and Mesa Verde National Park.

MONTROSE COUNTY

Montrose—Montrose Chamber of Commerce; president, William L. Knous; secretary, H. D. Reeves; covers Montrose and vicinity.

MORGAN COUNTY

Brush—Brush Commercial club; president, Dr. W. E. Turner; secretary, C. P. Schmidt; covers eastern part of Morgan county.

Fort Morgan—Fort Morgan Commercial club; president, U. J. Warren; secretary, Willard Reid; covers Fort Morgan and vicinity.

Hillrose—Hillrose Commercial club; president, R. A. Towne; secretary, R. E. Tebon; covers Hillrose and vicinity.

Wiggins—Wiggins Commercial club; secretary, Fred Hamilton; covers town of Wiggins.

OTERO COUNTY

Cheraw—Cheraw Commercial club; president, Rev. Geo. F. Gordon; secretary, N. N. Basinger; covers Cheraw.

La Junta—La Junta Chamber of Commerce; president, Chas. E. Sabin; secretary, W. C. Sporleder; covers La Junta and Otero county.

Rocky Ford—Arkansas Valley Fair association; president, Lewis Swink; secretary, J. L. Miller; covers Otero county.

Swink—Swink Commercial club; secretary, J. M. Powers; covers Swink and vicinity.

OURAY COUNTY

Ouray—Ouray Recreation association; president, W. F. Wheeler; secretary, Earnest Miller; covers Ouray county.

Ridgway—Ridgway Commercial association; president, C. A. McLean; secretary, G. C. Huffnagle; covers Ridgway and vicinity.

PARK COUNTY

Fairplay—Fairplay Commercial club; president, L. M. Gwinn; covers Park county.

PHILLIPS COUNTY

Haxtun—Haxtun Chamber of Commerce; president, E. A. Reagan; secretary, T. C. Christ; covers Haxtun and vicinity.

PITKIN COUNTY

Aspen—Pitkin County Chamber of Commerce; president, Fred Light; secretary, F. D. Willoughby; covers Pitkin county.

PROWERS COUNTY

Holly—Holly Commercial club; president, E. G. Thayer; secretary, R. E. Wood; covers Holly and vicinity.

Lamar—Lamar Chamber of Commerce; president, M. R. Sunday; secretary, J. R. Mayfield; covers Lamar and vicinity.

Wiley—Wiley Commercial club; president, Guy Hudson; secretary, L. H. Minehouse; covers Wiley and vicinity.

PUEBLO COUNTY

Pueblo—Pueblo Commerce club; president, F. S. Hoag; secretary, P. A. Gray; covers Pueblo county.

RIO BLANCO COUNTY

Meeker—Rio Blanco Commercial club; president, L. B. Walbridge; secretary, F. A. Carstens; covers Rio Blanco county.

RIO GRANDE COUNTY

Monte Vista—Monte Vista Commercial club; president, W. R. Wilson; secretary, M. T. Hancock; covers Rio Grande county.

ROUTT COUNTY

Hayden—Hayden Commercial club; president, J. B. Sibley; secretary, Chas. M. Birkett; covers Hayden and vicinity.

Oak Creek—Oak Creek Commercial club; president, R. I. Gwillam; secretary, Edward Bell; covers Oak Creek and vicinity.

Steamboat Springs—Steamboat Commercial club; president, C. H. Leckenby; secretary, G. E. Steele; covers Steamboat Springs and northwestern Colorado.

Yampa—Yampa Commercial club; president, E. H. Godfrey; covers southern part of Routt county.

SAGUACHE COUNTY

Saguache—Saguache Commercial club; president, O. P. Shippey; secretary, William Fellers; covers Saguache county.

SAN JUAN COUNTY

Silverton—Silverton Commercial club; president, E. W. Walter; secretary, James Pilling; covers San Juan county.

SAN MIGUEL COUNTY

Telluride—Telluride Lions club; president, E. B. Adams; secretary, A. C. Elskamp; covers San Miguel county.

SEDGWICK COUNTY

Julesburg—Julesburg Community club; president, P. R. McDowell; secretary, B. H. Achenbach; covers Sedgwick county.

SUMMIT COUNTY

Breckenridge—Breckenridge Commercial club; president, George Robinson; secretary, O. N. Bribach; covers Summit county.

TELLER COUNTY

Cripple Creek—Cripple Creek Motor and Commercial club; president, C. W. Seales; secretary, E. F. Nickel; covers western part of Teller county.

Victor—Victor Commercial club; president, Erick Johnson, Jr.; secretary, Wm. F. Jones, Jr.; covers Victor and vicinity.

WASHINGTON COUNTY

Akron—Washington County Chamber of Commerce; president, E. P. Cooley; secretary, C. M. Cockrum; covers Washington county.

Otis—Lion Tamers club; president, Frank Vanderhoof; secretary, T. F. Musson; covers Otis and vicinity.

WELD COUNTY

Ault—Ault Agricultural and Commercial club; president, J. W. Campbell; secretary, C. L. Neisler; covers Ault and vicinity.

Eaton—Business Men's Luncheon club; president, A. A. Tinn; secretary, W. W. Watson; covers Eaton and vicinity.

Elected State Officials

THE accompanying list gives the names of all governors of Colorado since the creation of Colorado territory in 1861. The lists of other state officials include only the names of those elected to the various offices since the admission of Colorado into the Union as a state, in 1876, and the time each served.

Territorial Governor

William Gilpin	1861-1862
John Evans	1862-1865
Alexander Cummings	1865-1867
A. C. Hunt	1867-1869
Edward McCook	1869-1873
Samuel H. Elbert	1873-1875
John L. Routt	1875-1876

State Governor

John L. Routt	1876-1879
Frederick R. Pitkin	1879-1883
James B. Grant	1883-1885
Benjamin H. Eaton	1885-1887
Alva Adams	1887-1889
Job A. Cooper	1889-1891
John L. Routt	1891-1893
Davis H. Waite	1893-1895
Albert W. McIntire	1895-1897
Alva Adams	1897-1899
Charles S. Thomas	1899-1901
James B. Orman	1901-1903
James H. Peabody	1903-1905
Alva Adams	1905—
James H. Peabody	1905—
Jesse F. McDonald	1905-1907
Henry A. Buchtel	1907-1909
John F. Shafroth	1909-1913
Ellas M. Ammons	1913-1915
George A. Carlson	1915-1917
Julius C. Gunter	1917-1919
Oliver H. Shoup	1919-1921
Oliver H. Shoup	1921-1923
William E. Sweet	1923—

Lieutenant Governor

Lafayette Head	1877-1879
Horace A. W. Tabor	1879-1881
Horace A. W. Tabor	1881-1883
William H. Meyers	1883-1885
Peter W. Breene	1885-1887
Norman H. Meldrum	1887-1889
William G. Smith	1889-1891
William Story	1891-1893
David H. Nichols	1893-1895
Jared L. Brush	1895-1897
Jared L. Brush	1897-1899
Francis Carney	1899-1901
David C. Coates	1901-1903
Warren A. Haggott	1903-1905
Arthur Cornforth	1905-1907
E. R. Harper	1907-1909
Stephen R. Fitzgerald	1909-1911
Stephen R. Fitzgerald	1911-1913
Stephen R. Fitzgerald	1913-1915
Moses E. Lewis	1915-1917
James E. Pulliam	1917-1919
George Stephan	1919-1921
Earl Cooley	1921-1923
Robert F. Rockwell	1923—

Secretary of State

William M. Clark	1877-1879
Norman H. Meldrum	1879-1881
Norman H. Meldrum	1881-1883
Melvin Edwards	1883-1885
Melvin Edwards	1885-1887
James Rice	1887-1889
James Rice	1889-1891
Edwin J. Eaton	1891-1893
Nelson O. McClees	1893-1895
Albert B. McGaffey	1895-1897
Charles H. S. Whipple	1897-1899
Elmer F. Beckwith	1899-1901
David F. Mills	1901-1903
James Cowie	1903-1905
James Cowie	1905-1907
Timothy O'Connor	1907-1909
James B. Pearce	1909-1911
James B. Pearce	1911-1913
James B. Pearce	1913-1915
John B. Ramer	1915-1917

James R. Noland.....	1917-1919

* Attorney General Fleming died December 25, 1923.

Town and City Officials

THE following is a list of the incorporated cities and towns in Colorado, with the names of their mayors and clerks for the current year. The first name in each case is that of the mayor and the second that of the clerk. Blanks occur after the names of those towns from which the Immigration Department received no report.

Aguilar—A. I. Lindsay, Jos. I. McGinn.
Akron—Raymond R. Hayes, D. H. Sis-son.
Alamosa—Herman Emperius, George E. Lake.
Alma—G. F. Galloway, J. F. Singleton.
Animas City—
Antonito—Lute Reidel, W. D. Carroll.
Arriba—Chas. J. Stahl, W. E. Kliever.
Arvada—F. C. Murchison, Hazel M. Garlick.
Aspen — Charles Wagner, Charles Dailey.

Ault—M. E. Smith, Ralph R. Bowman.
Aurora—John McMillan, G. E. Ballard.

Basalt—E. H. Gray, M. P. Sloss.
Bayfield—Andrew F. Hopper, Mrs. Cecil B. Van Dusen.
Berthoud—M. L. Fairbairn, Ruth Peterson.
Blackhawk—Charles R. Niccum, Zack T. MacNey.
Blanca—Freda E. Weaver, A. M. Weaver.
Bonanza—Ralph Gray (Geo. R. Gray), C. M. Buck.
Boulder—J. O. Billig, Mayme Graliam.
Breckenridge — Trevor B. Thomas, Thomas Tarkington.
Branson—Frank W. Roddy, L. M. Readshaw.
Brighton—H. H. Johnston, D. G. Woodard.
Brookside—
Brush—Harry T. Carroll, A. C. Har-ness.

Buena Vista—George M. Pyle, H. C. McLean.
Burlington—F. W. Kukuk, H. G. Hoskin.

Calhan—J. A. Lamb, Fred C. Wagoner.
Canon City—A. J. Turner, H. C. Webster.

Carbondale—W. D. Moore, E. W. Hampton.

Castle Rock—C. M. Hulbert, Daniel N. Ball.

Cedaredge—Frank J. Stewart, G. W. Hall.

Central City—H. H. Lake, G. F. Moody.
Center—M. M. Lutley, R. A. Allison.
Cheraw—Ray B. Hoskins, N. N. Basinger.

Cheyenne Wells—J. E. Hayes, D. H. Zuck.

Coal Creek—Frank Falciglie, Anton Morganstein.

Collbran—E. F. Collins, Elsie D. Walkup.

Colorado Springs—Ira Harris, S. E. Nichols.

Cortez—G. O. Harrison, May Clark.

Craig—J. G. Clayton, P. R. Keiser.

Crawford—Frank M. Drexel, W. C. Simmons.

Creede—Wm. C. Sloan, H. D. Barnhart.

Crested Butte—Fred Gulliford, John L. Byouk.

Crestone—C. S. Bonham, W. J. Hutchinson.

Cripple Creek—E. P. Arthur, Jr., W. C. McKelvey.

Crook—L. R. Gillett, Fred Stake.

Crowley—A. W. Green, O. P. Adkinson.

Dacono—Don Ball, F. G. Gerhard.

DeBeque—Volney W. Derush, Arthur Holmes.

Deer Trail—J. F. Coleman, R. L. Bloss.

Delegua—James Struthers, Ralph Gagliardi.

Del Norte—Barclay E. Newlin, C. D. Voris.

Delta—A. E. Penley, N. J. Bradley.

Denver—B. F. Stapleton.

Dillon—Norman Ashlock, Joseph Arduer.

Dolores—A. S. Miller, C. L. Flanders.

Durango—Chas. Stillwell, W. W. Parrshall.

Eads—F. L. Pyles, J. R. Wood.

Eagle—Carl Mayer, L. R. Thomas.

Eaton—R. C. Wykert, W. F. Willis.

Eckley—Harvey C. Catchpole, Elmer Smith.

Edgewater—Wm. W. Cormack, Stephen Higgs.

Eldora—W. T. Harpel, Sr., Evalyn Lilly.

Elizabeth—Frank Garland, Peter Blumer.

Empire—Fred Nelson, E. E. Koch.

Englewood—Aven Aldridge, E. E. Anderson.

Erie—William Whiles, Charles Knowles.

Estes Park—A. D. Lewis, Chas. F. Hix.

Eureka—A. B. Marquard, H. B. Wagerchleffer.

Evans—

Fleming—Dr. R. C. McCormick, Hugh Boyd.

Florence—George Wilson, Leona Dexter.

Florissant—Wm. C. Allen, S. M. Allen.

Fort Collins—Frank R. Montgomery, A. J. Rosenow.

Fort Lupton—Ora N. Putnam, Herman Funk.

Fort Morgan—Mark B. Gill, J. B. Farnsworth.

Fountain—R. E. Love, George I. Phillips.

Fowler—Andrew Waddington, W. T. Barnard.

Frederick—Newton Nicholson, Alice La Roche.

Fruita—Frank C. Merriell, Jennie Phillips.

Frisco—Gus Levene, L. A. Wildhack.

Georgetown—Edward Butts, M. S. McFarland.

Gilcrest—W. K. Gilcrest, R. H. P. Keller.

Glenwood Springs—W. G. McDonald, May McReavy.

Golden—Dr. D. E. Garvin, H. T. Curry.

Goldfield—John S. Beckman, Gertrude M. Tucker.

Granada—F. A. Barge, L. H. Kelso.

Granby—C. H. Nuckolls, L. G. Davis.

Grand Junction—W. G. Hiron, Fred A. Peck.

Grand Valley—J. E. Sipprelle, Phil Waterman.

Greeley—Walter S. Hayden, W. A. Hotchkiss.

Green Mountain Falls—Rex Brown, R. F. Balthis.

Grover—D. H. Williamson, H. L. Peterson.

Gunnison—F. W. Zugelder, Carlton T. Sills.

Gypsum—O. F. Tracy, Mayme Stremme.

Hartman—H. M. Lowe, W. J. Dicklebower.

Hastings—W. E. Miller, J. H. Helm.

Haswell—George W. Robinson, W. P. Lawrence.

Haxtun—J. A. Brooks, Floyd W. Gipple.

Hayden—John I. Birkett, A. Anderson.

Hillrose—B. P. Wind, D. E. Wind.

Holly—G. W. Smeltzer, T. G. Demaray.

Holyoke—Dr. P. S. Struble, W. E. Heg-
inbotham.

Hooper, M. B. Chrisman, D. E. McIntosh.

Hot Sulphur Springs—J. N. Pettingell, Harriet A. M. Huntington.

Hotchkiss—D. L. Blakley, Wilson L. Allen.

Hudson—E. R. Ensor, Dr. J. E. Hotchkiss.

Hugo—W. D. Owen, J. C. Piburn.

Idaho Springs—Chas. L. Harrington, John R. White.

Ignacio—Wm. Bryan, H. C. Biggs.

Iliff—H. L. Oldfather, George B. Holmes.

Jamestown—E. O. Kemptner, Asa C. Hempsted.

Johnstown—H. A. Clingenpeel, Fred A. Harsh.

Julesburg—C. W. White, C. P. Greene.

Keenesburg—Virgil M. Porter, Ernestine V. L. Beggs.

Keota—E. M. Singer, C. L. Stanley.

Kersey—L. R. Mondt, E. J. Meikel.

Kiowa—Ed. P. Wott, Carl Nache.

Fairplay—A. F. Willmarth, Harold C. Moyer.

Firestone—Daniel McHugh, Luther King.

Flagler—Dr. H. L. Williams, Wm. Knies.

Kokomo—H. A. Recena, J. M. Armstrong.
Kremmling—F. A. McQueary, C. C. Eastin.

Lafayette—Lee Baker, Ruth A. Richards.
La Jara—Franklin D. Calkins, J. C. Jensik.
La Junta—John G. Washburn, Robert B. Miller.

Lake City—
Lamar—Charles Maxwell, C. A. Lacy.
La Salle—Charles Hall, J. T. Kidd.
Las Animas—C. N. Troup, Lizzie C. Collett.

La Veta—Dr. L. W. Lee, J. P. Stranger.
Leadville—Joseph E. Cummings.
Louise T. Stewart.

Limon—J. T. Osborne, A. C. Moschel.
Littleton—Dr. W. C. Cryslar, J. Clyde Hoskin.

Longmont—J. F. Hays, George H. Stonex.

Louisville—Wm. McColloch, N. E. Rockley.

Loveland—W. E. Banks, J. B. Sella.
Lyons—R. W. Epley, Henry Bohn.

Manassa—A. E. Mortensen, James A. Holman.

Mancos—J. L. Martin, E. E. Humiston.
Manitou—L. K. Van Horne, W. H. Williams.

Manzanola—H. B. Dyer, A. R. Stover.
Marble—Edward C. Hanley, John A. Williams.

Mead—T. H. Hill, C. N. Brust.
Meeker—W. B. McWilliams, Herbert Gordon.

Merino—D. W. B. Lutes, S. J. Neely.
Milliken—E. J. Elam, L. W. Defenbaugh.

Minturn—Chas. A. Wilcox, Walter Guire.

Moffat—D. W. Crabtree, J. F. Devina.

Monte Vista—H. E. Lague, George B. Boutwell.

Montrose—J. J. Gatschet, Doris Wittmeyer.

Monument—W. E. Higby, Andrew Curry.

Morrison—William J. Lukens, Otis A. Pike.

Nederland—William T. Todd, Edward G. Lawrence.

Nevadaville—No Mayor; John B. Doran, Clerk.

New Castle—J. Ritter, A. E. Westley.

New Raymer—C. L. Snyder, E. W. Schweizer.

Norwood—R. M. White, F. E. Rice.

Nucla—G. Chrisman, Albrecht Schroeder.

Nunn—A. P. Hart, U. E. Madden.

Oak Creek—G. F. Watt, B. F. Snyder.

Olathe—Chas. E. Lockwood, G. C. Hoadley.

Olney Springs—S. T. Hussen, R. B. Milhollin.

Ophir—
Ordway—D. J. Mooney, John B. Estes.

Otis—Lon Felkey, Alice Clement.

Ouray—Thomas V. Canavan, Mary S. Powell.

Pagosa Springs—S. H. Dickerson, J. L. Giger.

Palisade—J. D. Secor, J. W. Hoke.

Palmer Lake—N. E. Medlock, Alice A. Wills.

Paonia—Abner S. McKee, W. R. Osboldstone

Peetz—C. M. Kitchell, M. A. Shipman, Jr.

Pierce—Jesse Ogden, R. M. Jones.

Pitkin—W. S. Henderson, R. T. Heffter.

Platteville—L. S. Birkle, J. F. Gleason.

Poncha Springs—E. G. Holman, Mary T. Smith.

Pueblo—John M. Jackson, J. W. Carpenter.

Raymer—
Red Cliff—J. M. Dismant, Mrs. J. May Hart.

Rico—Robert L. Pellet, G. M. Mullins.

Ridgway—R. E. Israel, C. M. Standwood.

Rifle—R. F. Magor, John I. Buckles.

Rockvale—Fred C. Dyer, James Williams.

Rocky Ford—A. S. Kitch, J. A. Johnson.

Saguache—Horace B. Means, W. L. Hammond.

Salida—W. S. Buchanan, Bertie Roney.

Sanford—James P. Jensen, Fred Bentley.

Sawpit—J. H. Hughes, J. W. Osborn.

Sedgwick—C. R. Stockham, J. C. Davis.

Selbert—S. W. Abbott, M. D. Haynes.

Silt—Roy Howard, C. W. Hamilton.

Silver Cliff—J. T. Stroehle, A. H. Henning.

Silver Plume—Fred M. Coughlin, C. E. Stanton.

Silverton—B. B. Allen, Wm. Brayden.

Simla—N. S. Eddy, John L. Bartsch.

Springfield—Earl C. Denney, Charles L. Doughty.

Steamboat Springs—F. E. Willet, T. W. Poulson.

St. Elmo—Daniel Clark, S. L. Taber.

Sterling—H. B. Swedlund, H. M. Krull.

Sugar City—J. M. Cravens, F. M. Putnam.

Superior—Jerry Meevis, James J. Kerr.

Stratton—Roy T. Wingfield, W. M. Long.

Swink—O. I. Blake, F. H. Farless.

Telluride—James F. Quine, Clara J. Rogers.

Timnath—E. W. Stevens, E. A. Russell.

Trinidad—George Mason, Mrs. Mattie H. Butler.

Two Buttes—A. M. Lucas, Gaither.

Victor—Dr. C. E. Elliott, Violet Bluette.

Vona—E. B. Wilson, L. N. Scheidegger.

Walden—K. J. MacCallum, W. E. Viner.

Walsenburg—H. D. Mustain, C. Victor Mazzone.

Ward—William T. Schmoll, George B. Holden.

Wellington—Arthur J. Piatt, I. H. Wallen.

Westcliffe—George B. Beardsley, Grover Falkenberg.

Westminster—J. W. Martin, H. T. Buswell.

Wiley—F. E. Durham, Carl H. Davis.

Williamsburg—Arthur McShane, John Frew, Sr.

Windor—Roy Ray, U. L. Carleton.

Woodland Park—H. D. Hackman, Mrs. S. E. Mulinix.

Wray—J. G. Jones, Sam Williams.

Yampa—Chas. J. Wheeler, Charles R. Simon.

Yuma—C. H. Hatcher, Lulu P. Miller.

County Commissioners

- Adams—H. G. Tiffany, H. C. Flanders, H. G. Nunemaker.
- Alamosa—S. P. Long, John Fultz, Herman Emperius.
- Arapahoe—E. F. Burden, P. Y. Ancell, Raman A. Miller.
- Archuleta—C. O. Dunagan, Thos. S. Reavis, G. T. Howe.
- Baca—J. M. Graft, Albert Peterson, Jno. M. Johnston.
- Bent—J. L. Thompson, Dan Carl, John C. Peper.
- Boulder—E. B. Hill, S. D. Buster, Guy Miller.
- Chaffee—J. H. Habenicht, Mell DeWitt, G. F. Snell.
- Cheyenne—Anton I. Johnson, J. W. Shy, W. C. Schultz.
- Clear Creek—George H. Curnow, Louis V. Crist, John W. Green.
- Conejos—Frank A. Espinoza, C. P. Jensen, Asisclo Gonzales.
- Costilla—S. N. Smith, Jerry L. Morris, A. Lopez.
- Crowley—W. F. Tarbox, J. E. Downey, S. S. Spillars.
- Custer—Wm. Kettle, Clarence Pond, E. W. Vickerman.
- Delta—J. E. Beckley, W. T. McMurray, W. G. Balch.
- Dolores—George E. Moore, Edward Baer, George W. Snyder.
- Douglas—C. H. Lowell, Andy Sealburg, J. T. Berry.
- Eagle—C. L. Hartman, G. D. Roberts, J. H. Heyer.
- Elbert—E. T. Evans, Jack Wood, W. J. Park.
- El Paso—J. Oscar Cell, W. H. Bartell, Frank F. Lyons.
- Fremont—Frank Stienmier, Charles A. Somerville, Sanford G. Kelso.
- Garfield—Z. B. Kiggins, R. P. Coulter, John L. Heuschkel.
- Gilpin—Richard I. Hughes, Thomas P. Atkinson, John L. Robins.
- Grand—Simon Olson, Thos. J. Mitchell, Fount McQueary.
- Gunnison—Ted Knowles, Geo. Sullivan, W. U. Mergelman.
- Hinsdale—W. E. Christe, D. C. Baker, John H. Hammond.
- Huerfano—G. A. Goemmer, T. A. Martinez, George S. Neibuhr.
- Jackson—Harry Green, Owen S. Case, C. B. Harmon.
- Jefferson—O. N. Evans, E. L. West, Fred Blackmer.
- Kiowa—Wirt Bailey, John Rebel, J. O. Walker.
- Kit Carson—G. W. Huntley, I. D. Messenger, C. J. Buchanan.
- Lake—Daniel Colahan, Morgan Walsh, George Bennett.
- La Plata—Wm. E. Tyner, John A. Bell, J. H. McHolland.
- Larimer—Harris Akin, J. W. McMullen, F. E. Baxter.
- Las Animas—Joseph Ray, Hal Barnes, Higinio Cordova.
- Lincoln—R. R. Lucore, J. D. Peyton, Chas. Giles.
- Logan—C. M. Morris, S. A. Richerson, J. P. Dillon.
- Mesa—Gus J. Johnson, Chas. S. Jones, Chas. A. Wallace.
- Mineral—B. C. Hossekus, L. G. Carpenter, Jas. H. Soward.
- Moffat—Emery Ehret, Frank C. Barnes, Jr., Henry Phibbs.
- Montezuma—H. L. Crawford, F. C. Hallar, E. S. Porter.
- Montrose—H. P. Steel, F. J. Hartman, John Howell.
- Morgan—James Hurley, O. B. Schooley, M. S. Richeson.
- Otero—George Barr, J. E. Stubbs, J. C. Vaughn.
- Ouray—Geo. B. Croft, W. H. Brown, C. H. Rowley.
- Park—J. F. Rhodes, G. S. Singleton, J. T. Witcher.
- Phillips—Ralph L. Anderson, Clithro Barkey, Roy E. Owens.
- Pitkin—J. R. Williams, G. B. Brown, C. M. Reed.
- Prowers—A. P. Knuckey, Ray McGrath, Henry Masser.
- Pueblo—W. L. Rees, O. G. Smith, Hurb H. Wilson.
- Rio Blanco—Dennis Murray, Fred A. Nichols, Frank M. Green.
- Rio Grande—O. A. Lindstrom, R. A. Chisholm, T. J. Hawkins.
- Routt—A. H. Poppen, A. H. Chivington, Alva Jones.
- Saguache—D. S. Jones, Geo. Woodard, Ed Clark.
- San Juan—Edw. Meyer, J. Ernest Shaw, H. Clay Johnston.
- San Miguel—Fred Anderson, T. B. McMahon, A. T. Woods.
- Sedgwick—Gustav Sprick, Geo. R. Sellers, John C. Wagner.
- Summit—Andrew Lindstrom, Ben F. Rich, William H. Briggie.
- Teller—Matt Edwards, R. Quinn, J. B. Wild.
- Washington—R. M. Buckmaster, J. B. White, Terrence McAloon.
- Weld—Chas. A. Hewitt, Dan C. Straight, Forrest L. Powars.
- Yuma—Alex Shaw, Harry F. Strangeways, H. H. Brand.

Land (continued)

classification by percentages.....	121
Colorado land history	46-47
detailed acreage, 1913-1923.....	130-139
homestead land	12-13, 120A
patented land, percentage.....	98, 121
relative acreage and valuation	
1913-1923, chart	144
state land	11-12

Lead

distribution by counties	28
production, 1922	170
production to end of 1922.....	171

Lettuce

distribution chart	80
value and acreage	52, 74

Libraries of Colorado

Livestock, (see animals by name)

av. assessed values, 1914-1923.....	107-113
assessed value, by counties.....	116, 145
beef cattle dist., chart.....	102
dairy cattle dist. chart.....	102
livestock on farms	100-101
numbers reported, 1920-1923.....	104-106
on national forests	36
progress of industry	20-21
sheep distribution chart	103
slaughtering and packing.....	31
swine distribution chart	103
values, relative, charts	114-115

M

Manufacturing

dairy products	22
general discussion	30-33
lumbering	35
raw materials in Colorado.....	33
slaughtering	20, 100

Melons, value and acreage

Metal production (see, Mines)

Millet, acreage	76
Mineral waters	41

Mines and minerals

distribution of metals	27-28
history and progress	26-27
metal production, 1922.....	170
mineral land assessed	120A
non-metals	28
production to end of 1922.....	171

Monuments, national, (see National parks)

Motor vehicles

license numbers, 1924.....	172-173
registration and fees, 1923.....	174
revenues from	160
taxes, general	42

Mountain passes

location and altitudes	194
------------------------------	-----

Mountains

location and altitudes.....	6, 190-192
-----------------------------	------------

Mules, (see Livestock)

assessed value by counties.....	116
average value, 1914-1923.....	107
number on farms	20-21, 101
number reported, 1920-1923	104

N

National forests

area	120A
general description	33 38
per cent of state area.....	121
roads in	43
visitors to	39-40

National parks and monuments

area	120A
general description	9
number of visitors	39

O

Oats

acreage and valuation.....	50-52
acreage, 1920-1923	69
av. no. acres per farm	89-90
average yield, 1923.....	85
average yield, 5 years	86
distribution chart.....	68
irrigated and non-irrigated.....	66-92
number of farms reporting.....	87
per cent of farms reporting.....	88
per cent of cultivated area	83

Officials, elected

county	210-212
state	206-207
town and city	207-209

Oil and oil shale, (see Petroleum)

Onions

distribution chart	79
value and acreage	52, 75

P

Parks, (see National parks)

Patented land, (see Land)

area assessed	120A
percentage chart	98
per cent of total area.....	121

Peaches, (see Horticulture)

distribution chart	81
production and value	23-24, 52

Pears, (see Horticulture)

distribution chart	82
production and value	23-24, 52

Peas

field, acreage and value.....	52, 73
field, distribution chart.....	79
garden, acreage	74

Per capita statistics

assessed values, taxes and	
bank deposits	153
cost of education, 1920-1923.....	165

of area cultivated, 1920-1923.....	84
of area cultivated, chart.....	98
of area in principal crops.....	83
of barley irrigated and non-irr....	92
of beans irrigated and non-irr....	92
of classes of land.....	120 121
of corn irr. and non-irr.....	91
of farms reporting livestock.....	20
of farms rep. principal crops.....	88
of farm tenures	94
of irrigated and non-irr. land.....	16

Percentage (continued)

of oats irr. and non-irr.....	92
of patented land	8
of patented land, chart	98
of population increase	7
of potatoes, irr. and non-irr.....	91
of sorghums, grain and sweet....	58
of sorghums, irr. and non-irr....	92
of wheat, spring and winter....	63
of wheat, irr. and non-irr.....	64

Petroleum

development and distribution	28-29
------------------------------	-------

Population

density	7, 153
of counties	153
of county seats, 1910-1920.....	163
of state, increase of	7
of towns and cities	176-189
racial characteristics	8
rank of counties in	175
school	44, 164

Postoffices of Colorado.....197-202

Potatoes

acreage and value	50-52
acreage, 1920-1923.....	72
acreage, distribution chart.....	71
av. number acres per farm	89-90
average yield, 1923	85
average yield, 5 years	86
irrigated and non-irrigated.....	70
number of farms reporting.....	87
per cent of farms reporting.....	88
per cent irr. and non-irr.....	91

Poultry

assessed value	145
hens on farms	100-101
progress of industry	24-25

R

Railroads

assessment by counties.....	146 147
mileage by counties	148
mileage by roads	10
right of way assessments	120A

Rainfall, (see Climatological data)

Revenue, (see Taxation)

Rivers of Colorado

Roads, (see Highways)

Root crops, acreage and value.....52, 73

Rye

acreage and value	50-52, 73
acreage, 1920-1923	54
acreage spring and winter.....	65
av. number acres per farm.....	89-90
number farms reporting	87
per cent of farms reporting.....	88
per cent of cultivated area.....	83

S

School land, (see State land)

Schools, (see Education)

Shale, oil

Sheep, (see Livestock)

distribution chart	103
number on farms	20-21, 101
number reported, 1920-1923.....	106
value, assessed, 1914-1923	111
value by counties	116
values, relative, charts	114-115

Silos, number, 1920-1923..... 99

Silver

distribution by counties	28
production, 1922	170
production to end of 1922.....	171

Size of farms, (see Farms)

Sorghums

acreage and value	50-52, 56
acreage, 1920-1923	57
acreage, distribution chart	55
av. number acres per farm.....	89-90
number of farms reporting.....	87
per cent of farms reporting	88
per cent of cultivated area.....	83
per cent grain and sweet	58
per cent irr. and non-irr.....	92

State, (see Colorado)

State land

acreage and description.....	11-12, 120A
assessed value of equities in.....	145
per cent of total area	121
school revenue from	44-45

State officials, elected.....206-207

Statistical tables, explanation.....48-49

Steel, manufacture of.....31-32

Stockraising, (see Livestock)

Stone deposits

Sudan grass, acreage

Sugar beets, (See Beets)

Sunflowers, acreage

Swine, (see Livestock)

brood sows on farms	100
distribution chart	103
hogs slaughtered	100
number on farms	20-21, 101
number reported, 1920-1923.....	106
value, assessed	116
value, average 1914-1923.....	112
value, relative, charts.....	114-115

T

Taxation

assessed valuations, levies	
and taxes by counties.....	152
distribution by counties	150-151
for highway purposes	42, 160
for schools	45
motor vehicles	174
municipal levies	176-189
per capita	153

Telephone and telegraph companies

assessed value by counties.....	146-147
mileage, by counties	148
mileage, general	10

Temperature, (see Climatological data)

Tenure, farm

Timber	
in national forests	34-35
timber lands assessed	120A
Timothy acreage	76
Tomatoes, acreage and value.....	52, 74
Towns and cities	
(see Postoffices, County seats)	
area assessed	120A
county seats	163
distances from Denver	189-190
distribution of taxes.....	150-151
gazeteer of individual towns	
and cities	176-189
Tractors on farms, 1920 1923.....	99
Transportation, (see Railroads)	

V

Value, (see Assessed valuations)	
of coal on state lands.....	11-12
of dairy products	22
of farm crops	19, 48-52
of farm lands, chart	144
of farm property	19
of flour	31
of fruits	23
of irrigation works	15
of livestock, charts	114-115
of manufactured products.....	30-32
of mineral output	26, 170-171
of slaughtered livestock	20, 31
of state land	45

W

Water power	14
Waters, mineral	41
Wheat	
acreage and value	50-52
acreage irr. and non-irr.....	59-60, 64
acreage, 1920-1923	62
acreage, yield, production.....	65
average yield, 1923.....	85
average yield, 5 years	86
av. number acres per farm	89-90
distribution chart	61
number farms reporting	87
per cent of farms reporting	88
per cent spring and winter.....	63
per cent irr. and non-irr.	91
per cent of cultivated area	83

Y

Yield	
(see individual crops by name)	
av. yields of principal crops.....	85
5-year average yields	86

Z

Zinc	
distribution by counties.....	28
production, 1922	170
production to end of 1922.....	171
