They shall cause the Benefit Fund to be so maintained and replenished that each death claim may be paid within twenty days after death proofs are approved. Reserve Division: While the right of extra assessment is retained for both divisions of the society, as required by Statute, the payments for members in the Reserve Division are based on the American Experience Table of Mortality and all new business written by the society is added to this Division. How is the emergency or reserve fund created, and for what purpose and under what circumstances can it be disbursed? (1) The reserve on Reserve Division certificates is created during the period of membership when the payments by the members are in excess of the cost of their protection; (2) To yearly reduce the amount at risk so that in later years the payments will be sufficient to cover the cost of the actual liability outstanding against the society; (3) Upon the payment of each death claim the accumulated reserve is used to assist in the payment of the face amount of the certificate. At the end of the third and subsequent years the reserve may be used to automatically continue the certificate in force in case of non-payment by the member, and be also used to provide for any of the non-forfeiture values contained in the certificate.
