

2008 EAGLE COUNTY PROPERTY ASSESSMENT STUDY

September 15, 2008

Mr. Mike Mauer Director of Research Colorado Legislative Council Room 029, State Capitol Building Denver, Colorado 80203

RE: Final Report for the 2008 Colorado Property Assessment Study for Colorado's sixty four counties

Dear Mr. Mauer:

Rocky Mountain Valuation Specialists LLC is pleased to submit the Final Reports for the 2008 Colorado Property Assessment Study for all sixty four counties that make up the State of Colorado.

These reports represent the result of a two-part analysis and audit for each county: A procedural analysis and a statistical analysis.

The procedural analysis, for each county, included all classes of property and specifically looked at how the assessor developed economic areas, confirmed and qualified their sales, developed their time adjustments, and performed their periodic physical property inspections. The audit also reviewed the procedures for discovering, classifying and valuing agricultural outbuildings, discovering subdivision build-out and subdivision discounting procedures. Valuation methodology for residential properties and commercial properties was examined. Procedures for producing mines, oil and gas leaseholds and lands producing, producing coalmines, producing earth and stone products, severed mineral interests, and non-producing patented mining claims were also reviewed. Starting in 2007, procedural analyses of agricultural outbuildings were performed for each county.

Statistical analysis was also performed, for each county, on vacant land, residential properties, commercial/industrial properties, and agricultural land. A statistical analysis was performed to check for personal property compliance on the top 11 counties: Adams, Arapahoe, Boulder, Denver, Douglas, El Paso, Jefferson, Larimer, Mesa, Pueblo, and Weld. All other counties received a procedural study.

Throughout this project RMVS has remained committed to its belief that for an ad valorem system to be successful, values must be equitable and market-driven in all parts of Colorado. Only then is the taxpayer assured of a fair property tax.

RMVS appreciates the opportunity to be of service to the State of Colorado.

yart A. Jyins

Mark R. Linné **MAI, CAE, ASA, CRE, FRICS** Managing Director *Rocky Mountain Valuation Specialists LLC*

INTRODUCTION

Colorado

The Colorado Constitution directs that each property tax levy shall be uniform upon all real and personal property not exempt from taxation. The constitution goes on to direct that the actual value of all applicable real and personal property shall be determined under general laws, which shall prescribe such methods and regulations as shall secure just and equalized valuations (Colo. Const., Art. X, Sec. 3 (1)(a)).

In order to check that all applicable property has been valued with just and equalized valuations, the Constitution states that commencing in 1983 the general assembly shall cause a valuation for assessment study to be conducted. Such study shall determine whether or not the assessor of each county has complied with the property tax provisions of this constitution and of the statutes in valuing property and has determined the actual value and valuation for assessment of each and every class of taxable real and personal property consistent with such provisions. Such study shall sample at least one percent of each and every class of taxable real and personal property in the county (Colo. Const., Art. X, Sec. 3 (2)(a)).

The State Board of Equalization (SBOE) reviews assessments for conformance to the Constitution. The SBOE will order revaluations for counties whose valuations do not reflect the proper valuation period level of value.

C.R.S. 39-1-104 (16)(a)(b) and (c) outlined how this was to be accomplished by stating that during each property tax year, the director of research of the legislative council shall contract with a private person for a valuation for assessment study to be conducted as set forth in this subsection (16). The study shall be conducted in all counties of the state to determine whether or not the assessor of each county has, in fact, used all manuals, formulas, and other directives required by law to arrive at the valuation for assessment of each and every class of real and personal property in the county. The person conducting the study shall sample each class of property in a statistically valid manner, and the aggregate of such sampling shall equal at least one percent of all properties in each county of the state. The sampling shall show that the various areas, ages of buildings, economic conditions, and uses of properties have been sampled. Such study shall be completed, and a final report of the findings and conclusions thereof shall be submitted to the state board of equalization, by September 15 of the year in which the study is conducted.

The legislative council sets forth two criteria that are the focus of the audit group:

To determine whether each county assessor is applying correctly the constitutional and

statutory provisions, compliance requirements of the State Board of Equalization, and the manuals published by the State Property Tax Administrator to arrive at the actual value of each class of property.

To determine if each assessor is applying correctly the provisions of law to the actual values when arriving at valuations for assessment of all locally valued properties subject to the property tax.

The property assessment audit conducts a two-part analysis: A procedural analysis and a statistical analysis.

The procedural analysis includes all classes of property and specifically looks at how the assessor develops economic areas, confirms and qualifies sales, and develops time adjustments. The audit also examines the procedures for adequately discovering, classifying and valuing agricultural outbuildings, discovering subdivision buildout and subdivision discounting procedures. Valuation methodology for vacant land, improved residential properties and commercial properties is examined. Procedures for producing mines, oil and gas leaseholds and lands producing, producing coal mines, producing earth and stone products, severed mineral interests and nonproducing patented mining claims are also reviewed.

Statistical analysis is performed on vacant land, residential properties, commercial industrial properties, agricultural land, and personal property. The statistical study results are compared with State Board of Equalization compliance requirements and the manuals published by the State Property Tax Administrator.

RMVS has completed the Property Assessment Study for 2008 and is pleased to report its findings for Eagle County in the following report.

REGIONAL/HISTORICAL SKETCH OF EAGLE COUNTY

Regional Information

Eagle County is located in the Western Slope region of Colorado. The Western Slope of Colorado refers to the region of the State of Colorado west of the Rocky Mountains. The region is considered the part of Colorado outside the mountains that are emptied by the Colorado River and its tributaries. The area's climate is similar to that of the Great Basin.

The Western Slope is generally much less populated than the Front Range and has only a few towns with populations over 5,000. The primary economic activity is ranching, mining, and tourism. Fruit farming is also prevalent in many areas along the Colorado and Gunnison rivers, including the Grand Valley. The unofficial capital of the Western Slope is considered to be Grand Junction, located in the Grand Valley.

The Western Slope includes Archuleta, Delta, Dolores, Eagle, Garfield, Grand, Gunnison, Hinsdale, Jackson, La Plata, Mesa, Moffat, Montezuma, Montrose, Ouray, Pitkin, Rio Blanco, Routt, San Juan, San Miguel, and Summit counties.

Historically, the area was the homeland of the Ute people and was the Utah Territory before its inclusion in the Colorado Territory upon organization in 1861. Settlers began arriving in large numbers in the late 1870s and early 1880s.

Historical Information

Eagle County has a population of approximately 49,085 people with 24.7 people per square mile, according to the U.S. Census Bureau's 2006 estimated population data.

The County was established from a portion of Summit County in 1883 with 1,682 square miles in area. The county seat is Eagle which was first called Castle, for nearby Castle Mountain. The name was later changed by the Rio Grande Western Railroad to Rio Aguila which was Spanish for Eagle River and then was changed again to McDonald for the man who owned the town site. The name was changed for the last time by its citizens who named it after the nearby Eagle River. (William Bright, Colorado Place Names, 3rd Edition, Johnson Books, 2004, p. 56)

RATIO ANALYSIS

Methodology

All significant classes of properties were analyzed. Sales were collected for each property class over the appropriate sale period, which was typically defined as the 18-month period between January 2005 and June 2006. Counties with less than 30 sales typically extended the sale period back up to 5 years prior to June 30, 2006 in 6-month increments. If there were still fewer than 30 sales. supplemental appraisals were performed and treated as proxy sales. Residential sales for all counties using this method totaled at least 30 per county. For commercial sales, the total number analyzed was allowed, in some cases, to fall below 30. There were no sale quantity issues for counties requiring vacant land analysis or condominium analysis. Although it was required that we examine the median and coefficient of dispersion for all counties, we also calculated the weighted mean and pricerelated differential for each class of property. Counties were not passed or failed by these latter measures, but were counseled if there were anomalies noted during our analysis. Qualified sales were based on the qualification code used by each county, which were typically coded as either "Q" or "C." The ratio analysis included all sales. The data was trimmed for counties with obvious outliers using IAAO standards for data analysis. In every case, we examined the loss in data from trimming to insure that only true outliers were excluded. Any county with a significant portion of sales excluded by this trimming method were examined further. No county was allowed to pass the audit if more than 5% of the sales were "lost" because of trimming. For the largest 11 counties, the residential ratio statistics were broken down by economic area as well.

Conclusions

For this final analysis report, the minimum acceptable statistical standards allowed by the State Board of Equalization are:

ALLOWABLE STANDARDS RATIO GRID				
Property Class	Unweighted Median Ratio	Coefficient of Dispersion		
Commercial/Industrial	Between .95-1.05	Less than 20.99		
Condominium	Between .95-1.05	Less than 15.99		
Single Family	Between .95-1.05	Less than 15.99		
Vacant Land	Between .95-1.05	Less than 20.99		

The results for Eagle County are:

Eagle County Ratio Grid					
Property Class	Number of Qualified Sales	Unweighted Median Ratio	Price Related Differential	Coefficient of Dispersion	Time Trend Analysis
Commercial/Industrial	177	0.988	1.105	11.9	Compliant
Condominium	1,599	0.984	1.025	8.3	Compliant
Single Family	2,028	0.997	1.019	8.4	Compliant
Vacant Land	361	0.973	1.021	11	Compliant

After applying the above described methodologies, it is concluded from the sales ratios that Eagle County is in compliance with SBOE, DPT, and Colorado State Statute valuation guidelines.

Recommendations

None

TIME TRENDING VERIFICATION

Methodology

While we recommend that counties use the inverted ratio regression analysis method to account for market (time) trending, some counties have used other IAAO-approved methods, such as the weighted monthly median approach. We are not auditing the methods used, but rather the results of the methods used. Given this range of methodologies used to account for market trending, we concluded that the best validation method was to examine the sale ratios for each class across the appropriate sale period. To be specific, if a county has considered and adjusted correctly for market trending, then the sale ratios should remain stable (i.e. flat) across the sale period. If a residual market trend is detected, then the county may or may not have addressed market trending adequately,

and a further examination is warranted. This validation methodology also considers the number of sales and the length of the sale period. Counties with few sales across the sale period were carefully examined to determine if the statistical results were valid.

Conclusions

After verification and analysis, it has been determined that Eagle County has complied with the statutory requirements to analyze the effects of time on value in their county. Eagle County has also satisfactorily applied the results of their time trending analysis to arrive at the time adjusted sales price (TASP).

Recommendations

None

SOLD/UNSOLD ANALYSIS

Methodology

Eagle County was tested for the equal treatment of sold and unsold properties to insure that "sales chasing" has not occurred. The auditors employed a multi-step process to determine if sold and unsold properties were valued in a consistent manner.

All qualified residential and commercial class properties were examined using the unit value method, where the actual value per square foot was compared between sold and unsold properties. A class was considered qualified if it met the criteria for the ratio analysis. The median value per square foot for both groups was compared from an appraisal and statistical perspective. If no significant difference was indicated, then we concluded that no further testing was warranted and that the county was in compliance in terms of sold/unsold consistency.

If either residential commercial or differences were significant using the unit value method, or if data limitations made the comparison invalid, then the next step was to perform a ratio analysis comparing the 2006 and 2008 actual values for each qualified class of property. All qualified vacant land classes were tested using this method. The sale property ratios were arrayed using a range of 0.8 to 1.5, which theoretically excluded changes between years that were due to other unrelated changes in the property. These ratios were also stratified at the appropriate level of analysis. Once the percent change was determined for each appropriate class and sub-class, the next step was to select the

unsold sample. This sample was at least 1% of the total population of unsold properties and excluded any sale properties. The unsold sample was filtered based on the attributes of the sold dataset to closely correlate both groups. The ratio analysis was then performed on the unsold properties and stratified. The median and mean ratio distribution was then compared between the sold and unsold group. A nonparametric test such as the Mann-Whitney test for differences between independent samples was undertaken to determine whether any observed differential was significant. If this test determined that the unsold properties were treated in a manner similar to the sold properties, it was concluded that no further testing was warranted and that the county was in compliance.

If a class or sub-class of property was determined to be significantly different by this method, the final step was to perform a multi-variate mass appraisal model that developed ratio statistics from the sold properties that were then applied to the unsold sample. This test compared the central tendency measures of and confidence intervals for the sold properties with the unsold property sample. If this comparison was also determined to be significantly different, then the conclusion was that the county had treated the unsold properties in a different manner than sold properties.

These tests were supported by both tabular and chart presentations, along with saved sold and unsold sample files.

Sold/Unsold Re	esults
Property Class	Results
Commercial/Industrial	Compliant
Condominium	Compliant
Single Family	Compliant
Vacant Land	Compliant

Conclusions

Recommendations

None

After applying the above described methodologies, it is concluded that Eagle County is reasonably treating its sold and unsold properties in the same manner.

AGRICULTURAL LAND STUDY

Agricultural Land

County records were reviewed to determine major land categories such as irrigated farm, dry farm, meadow hay, grazing and other lands. In addition, county records were reviewed in order to determine if: Aerial photographs are available and are being used; soil conservation guidelines have been used to classify lands based on productivity; crop rotations have been documented; typical commodities and vields have been determined: orchard lands have been properly classified and valued; expenses reflect a ten year average and are typical landlord expenses; grazing lands have been properly classified and valued; the number of acres in each class and subclass have been determined; the capitalization rate was properly applied. Also, documentation was required for the valuation methods used and

any locally developed yields, carrying capacities, and expenses. Records were also checked to ensure that the commodity prices and expenses, furnished by the Property Tax Administrator (PTA), were applied properly. (See Assessor Reference Library Volume 3 Chapter 5.)

Conclusions

An analysis of the agricultural land data indicates an acceptable appraisal of this property type. Directives, commodity prices and expenses provided by the PTA were properly applied. County yields compared favorably to those published by Colorado Agricultural Statistics. Expenses used by the county were allowable expenses and were in an acceptable range. Grazing lands carrying capacities were in an

acceptable range. The data analyzed resulted in the following ratios:

Eagle County Agricultural Land Ratio Grid						
Abstract Code	Land Class	Number Of Acres	County Value Per Acre	County Assessed Total Value	RMVS Total Value	Ratio
4117	Flood	5,870	102.45	601,406	585,718	1.03
4137	Meadow Hay	12,673	49.39	631,478	631,478	1.00
4147	Grazing	112,320	6.86	94,663	94,663	1.00
4177	Forest	355	27.06	9,598	9,598	1.00
4167	Waste	17,120	1.63	27,955	27,955	1.00
Total/Avg		148,337	9.20	1,365,100	1,349,411	1.01

Recommendations

None

Agricultural Outbuildings

Methodology

A sample of various use types of agricultural outbuildings with varying ages was reviewed to see if the guidelines found in the Assessor's Reference Library (ARL) Volume 3, pages 5.73 through 5.78 were being followed.

Conclusions

Eagle County has developed a written plan for the implementation of the recommended procedures provided by the Division of Property Taxation for the valuation of agricultural outbuildings.

Recommendations

None

SALES VERIFICATION

According to Colorado Revised Statutes:

A representative body of sales is required when considering the market approach to appraisal.

(8) In any case in which sales prices of comparable properties within any class or subclass are utilized when considering the market approach to appraisal in the determination of actual value of any taxable property, the following limitations and conditions shall apply:

(a)(I) Use of the market approach shall require a representative body of sales, including sales by a lender or government, sufficient to set a pattern, and appraisals shall reflect due consideration of the degree of comparability of sales, including the extent of similarities and dissimilarities among properties that are compared for assessment purposes. In order to obtain a reasonable sample and to reduce sudden price changes or fluctuations, all sales shall be included in the sample that reasonably reflect a true or typical sales price during the period specified in section 39-1-104 (10.2). Sales of personal property exempt pursuant to the provisions of sections 39-3-102, 39-3-103, and 39-3-119 to 39-3-122 shall not be included in any such sample.

(b) Each such sale included in the sample shall be coded to indicate a typical, negotiated sale, as screened and verified by the assessor. (39-1-103, C.R.S.)

The assessor is required to use sales of real property only in the valuation process. (8)(f) Such true and typical sales shall include only those sales which have been determined on an individual basis to reflect the selling price of the real property only or which have been adjusted on an individual basis to reflect the selling price of the real property only. (39-1-103, C.R.S.)

Part of the Property Assessment Study is the sales verification analysis. RMVS has used the above-cited statutes as a guide in our study of the county's procedures and practices for verifying sales.

RMVS reviewed the sales verification procedures in 2008 for Eagle County. This study was conducted by checking selected sales from the master sales list for the valuation period. Specifically RMVS selected 38 sales listed as unqualified.

All of the sales in the unqualified sales sample had reasons that were clear and supportable.

Conclusions

Eagle County appears to be doing an excellent job of verifying their sales. RMVS agreed with the county's reason for disqualifying each of the sales selected in the sample. There are no recommendations or suggestions.

Recommendations

None

ECONOMIC AREA REVIEW AND EVALUATION

Methodology

Eagle County has submitted a written narrative describing the economic areas that make up the county's market areas. Eagle County has also submitted a map illustrating these areas. Each of these narratives have been read and analyzed for logic and appraisal sensibility. The maps were also compared to the narrative for consistency between the written description and the map.

Conclusions

After review and analysis, it has been determined that Eagle County has

adequately identified homogeneous economic areas comprised of smaller neighborhoods. Each economic area defined is equally subject to a set of economic forces that impact the value of the properties within that geographic area and this has been adequately addressed. Each economic area defined adequately delineates an area that will give "similar values for similar properties in similar areas."

Recommendations

None

NATURAL RESOURCES

Earth and Stone Products Methodology

Under the guidelines of the Assessor's Reference Library (ARL), Volume 3, Natural Resource Valuation Procedures, the income approach was the primary method applied to find value for production of earth and stone products. The number of tons was multiplied by an economic location factor that represented the landlord's royalty. The landlord's share was multiplied by a recommended Hoskold factor to determine the actual value. The Hoskold factor was determined by the life of the reserves, or the lease. The value was

primarily based on two variables: life and tonnage. The operator determines these since there is no other means to obtain production data through any state or private agency.

Conclusions

County has applied the correct formulas and state guidelines to earth and stone production.

Recommendations

None

VACANT LAND

Subdivision Discounting

In 2008 subdivisions were reviewed in Eagle The review showed that County. subdivisions were discounted pursuant to the Colorado Revised Statutes in Article 39-1-103 (14)and by applying the recommended methodology in ARL Vol 3, Chap 4. Subdivision Discounting in the intervening year was accomlished by reducing the absorption period by one year. In instances where the number of sales within an approved plat was less than the absorption rate per year calculated for the

plat, the absorption period was left unchanged.

Conclusions

Eagle County has implemented proper procedures to adequately estimate absorption periods, discount rates, and lot values for qualifying subdivisions.

Recommendations

None

POSSESSORY INTEREST PROPERTIES

Possessory interest property discovery and valuation is described in the Assessor's Reference Library (ARL) Volume 3 section 7 in accordance with the requirements of 39-1-103 (17)(a) (II) C.R.S. Possessory Interest is defined by the Property Tax Administrator's Publication ARL Volume 3, Section 7: A private property interest in government-owned property or the right to the occupancy and use of any benefit in government-owned property that has been granted under lease, permit, license, concession, contract, or other agreement.

Eagle County has been reviewed for their procedures and adherence to guidelines when assessing and valuing possessory interest properties. The county has also been queried as to their confidence that the possessory interest properties have been discovered and placed on the tax rolls.

Conclusions

Eagle County has implemented a discovery process to place possessory interest properties on the roll. They have also correctly and consistently applied the correct procedures and valuation methods in the valuation of possessory interest properties.

Recommendations

None

PERSONAL PROPERTY AUDIT

Eagle County was studied for its procedural compliance with the personal property assessment outlined in the Assessor's Reference Library (ARL) Volume 5, and in the State Board of Equalization (SBOE) requirements for the assessment of personal property. The SBOE requirements are outlined as follows:

Use ARL Volume 5 including current discovery, classification, and documentation procedures, and including current economic lives table, cost factor tables, depreciation table, and level of value adjustment factor table.

The personal property audit standards narrative must be in place and current. A listing of businesses that have been audited by the assessor within the twelve-month period reflected in the plan is given to the auditor. The audited businesses must be in conformity with those described in the plan.

Aggregate ratio will be determined solely from the personal property accounts that have been physically inspected. The minimum assessment sample is one percent or ten schedules, whichever is greater, and the maximum assessment audit sample is 100 schedules.

For the counties having over 100,000 population, RMVS selected a sample of all personal property schedules to determine whether the assessor is correctly applying the provisions of law and manuals of the Property Tax Administrator in arriving at the assessment levels of such property. This sample was selected from the personal property schedules audited by the assessor. In no event was the sample selected by the contractor less than 30 schedules. The counties to be included in this study are Adams, Arapahoe, Boulder, Denver, Douglas, El Paso, Jefferson, Larimer, Mesa, Pueblo, and Weld. All other counties received a procedural study.

Eagle County is compliant with the guidelines set forth in ARL Volume 5 regarding discovery procedures, using the following methods to discover personal property accounts in the county:

- Public Record Documents
- Local Telephone Directories, Newspapers or Other Local Publications
- Personal Observation, Physical Canvassing or Word of Mouth
- Questionnaires, Letters and/or Phone Calls to Buyer, Seller and/or Realtor

The county uses the Division of Property Taxation (DPT) recommended classification and documentation procedures. The DPT's recommended cost factor tables, depreciation tables and level of value adjustment factor tables are also used.

Eagle County submitted their personal property written audit plan and was current for the 2008 valuation period. The number and listing of businesses audited was also submitted and was in conformance with the written audit plan. The following audit triggers were used by the county to select accounts to be audited:

• Accounts with obvious discrepancies

- Incomplete or inconsistent declarations
- Businesses with no deletions or additions for 2 or more years
- Non-filing Accounts Best Information Available
- Accounts close to the \$2,500 actual value exemption status

Conclusions

Eagle County has employed adequate discovery, classification, documentation, valuation, and auditing procedures for their personal property assessment and is in statistical compliance with SBOE requirements.

APPENDICES

STATISTICAL ANALYSIS EAGLE COUNTY 2008

I. OVERVIEW

Eagle County is located in the central mountain resort region of Colorado. The County has a total of 35,332 real property parcels based on the data submitted by the County Assessor's office in 2008. The breakdown by property type is listed in the table below.

	Frequency	Percent
VACANT LAND	4,045	11.4
RESIDENTIAL	25,752	72.9
COMMERCIAL	3,292	9.3
INDUSTRIAL	8	.0
OTHER	2,235	6.3
Total	35,332	100.0

PROPERTY TYPE

*Note: Parcels with Current Value = 0 were excluded from the analysis.

Vacant Land

The vacant land class of properties has a total of 4,045 parcels. The majority of the parcels are classified as either PUD (400 - 44.5%) or single-family residential (100,1112,1911,1912 - 32%). The remaining vacant parcels are a mix of commercial, multi-family, mobile home, or have a subclass code that is delineated by the acreage of the parcel.

	Frequency	Percent
100 Residential Lots	1,131	28.0
200 Commercial Lots	318	7.9
400 PUD Lots	1,800	44.5
510 Less Than 1.0 ACRES	48	1.2
520 1.0 to 4.99 ACRES	80	2.0
530 5.0 to 9.99 ACRES	91	2.2
540 10.0 to 34.99 ACRES	94	2.3
550 35.0 to 99.99 ACRES	129	3.2
560 100.0 ACRES and Up	19	.5
600 Minor Structures on Vacant Land	2	.0
1112 Single Family Residence Land	182	4.5
1115 Duplexes-Triplexes Land	1	.0
1120 Multi-Units (4-8) Land	2	.0
1135 Manuf Housing (Mobile Homes) Land	125	3.1
1140 Manuf Housing (Land, Park, Etc.) Land	19	.5
1900 Single Family Residence Land	1	.0
1911 Single Family Residence Land	3	.1
Total	4,045	100.0

SUBCLASS CODE

Residential

The residential subclass category has a total of 25,752 parcels. Over 98% of the parcels have a single-family (1112,1212,1912 - 51%) or condominium (1130,1230 - 48%) subclass code. The remaining parcels in this category are multi-unit or mobile homes.

	Frequency	Percent
1112 Single Family Residence*	1,770	6.9
1130 Condominiums Land	11,299	43.9
1212 Single Family Residence	12,257	47.6
1215 Duplexes-Triplexes	82	.3
1220 Multi-Units (4-8)	29	.1
1225 Multi-Units (9 & Up)	6	.0
1230 Condominiums	295	1.1
1235 Manuf Housing (Mobile Homes)	9	.0
1240 Manuf Housing (Land, Park, Etc.)	2	.0
1912 Single Family Residence	3	.0
Total	25,752	100.0

SUBCLASS CODE

*Most of the properties coded 1112 in this grouping are town homes.

2008 Statistical Report: EAGLE COUNTY

Commercial/Industrial

The commercial/industrial subclass category has a total of 3,300 properties. This category represents 9.3% of the total real property inventory. The majority (99%) of these parcels have a commercial use. The breakdown by subclass code is listed below.

	Frequency	Percent
2112 Merchandising	3	.1
2115 Lodging	6	.2
2120 Offices	4	.1
2125 Recreation	75	2.3
2130 Special Purpose	449	13.6
2135 WareHouse/Strg	16	.5
2140 Multi-Use (3+)	2	.1
2145 Recreation Lands (CRS 39-3-112)	12	.4
2212 Merchandising	98	3.0
2215 Lodging	33	1.0
2218 Recreation	1	.0
2220 Offices	88	2.7
2225 Recreation	88	2.7
2230 Special Purpose	84	2.5
2235 WareHouse/Strg	126	3.8
2240 Multi-Use (3+)	33	1.0
2245 Commercial Condo	2,174	65.9
3115 Manuf/Processing	3	.1
3120 Manuf/Milling	1	.0
3212 Contract/Service	1	.0
3215 Manuf/Processing	3	.1
Total	3,300	100.0

SUBCLASS CODE

Other

The remaining 2,235 parcels are a mix of agricultural, natural resource and exempt properties.

II. SALES FILE

The sale file provided by the Eagle County Assessor's Office contained 5,447 real property sales between the dates of January 2005 and June 2006. The breakdown of sales activity by sale month and year is as follows:

Count				
		SALE YEAR		
		2005	2006	Total
SALE	January	201	184	385
MONTH	February	240	182	422
	March	277	235	512
	April	433	252	685
	May	348	309	657
	June	378	314	692
	July	298	0	298
	August	354	0	354
	September	440	0	440
	October	365	0	365
	November	336	0	336
	December	301	0	301
Total		3,971	1,476	5,447

Once the sales were edited to keep the most recent sale, transactions that were coded as unqualified by the County were excluded from the analysis. The following table provides a breakdown of the qualified and unqualified sales.

SALE INVESTIGATION CODE

	Frequency	Percent
MISSING CODE	6	.1
QUALIFIED	4,532	87.4
UNQUALIFIED	649	12.5
Total	5,187	100.0

There were 4,532 sales that were classified as qualified. The breakdown of the sales with the current property type is listed below.

	Frequency	Percent
VACANT	361	8.0
VACANT SALE WITH NON-VACANT LAND SUBCLASS	346	7.6
RESIDENTIAL	3,632	80.1
COMM/IND	177	3.9
IMPROVED SALE WITH VACANT SUBCLASS	3	.1
OTHER	13	.3
Total	4,532	100.0

SALE TYPE

III. RESIDENTIAL SALES RESULTS

For the residential analysis, 3,632 sales between the dates of January 2005 and June 2006 were analyzed. A breakdown of the sales by subclass is listed below.

	Frequency	Percent
1112 Single Family Residence	413	11.4
1130 Condominiums	1,560	43.0
1212 Single Family Residence	1,615	44.5
1215 Duplexes-Triplexes	4	.1
1220 Multi-Units (4-8)	1	.0
1230 Condominiums	39	1.1
Total	3,632	100.0

SUBCLASS CODE

These sales were used to perform a sales ratio analysis to determine whether the statutory guidelines for the level and quality of the assessments have been satisfied. In order to perform a sales ratio analysis all sales must reflect market conditions as of June 30, 2006.

Based on an examination of the sales file, the County applied time adjustments to the sales during this time period. The following graphs illustrate the various time adjustment factors applied to the residential and condo sales.

EAGLE COUNTY RESIDENTIAL TIME ADJUSTMENT FACTORS

EAGLE COUNTY CONDO TIME ADJUSTMENT FACTORS

The following table outlines sales ratio statistics for all residential and condo properties in Eagle County.

Ratio	Statistics
-------	------------

	SALE		Weighted	Price Related	Coefficient of
Group	COUNT	Median	Mean	Differential	Dispersion
NON-CONDO	2028	.997	.972	1.019	.084
CONDO	1599	.984	.948	1.025	.083
Overall	3,627	.992	.962	1.021	.084

RATIO = CURRENT ASMT / TASP

*Note: 2 sales with a sale ratio < .30 were excluded from the above analysis.

The residential and condo sale ratios are in compliance with the standards set forth by the Colorado State Board of Equalization (SBOE) for the overall sales. The following graphical exhibits describe further the sales ratio distribution for all of these properties:

The above graphs indicate that the distribution of the sale ratios are within state mandated limits, and that there are no significant price related differential issues.

Residential Market Trend Analysis

We verified that market trending was accounted for in the residential and condo valuations by analyzing the sale ratios over the 18 month time period. Although the residential sale ratios illustrate a slight declining monthly median sale ratio, the ratios for both residential and condo fall well within the median target assessment level of .95-1.05 for the entire study period.

MEDIAN SALE RATIO BY MONTHS

Sold/Unsold Analysis

For the 2007 revaluation year audit, an analysis was performed that confirmed that the median assessed value per square foot for sold and unsold residential and condo properties were similar. Since tax year 2008 is the intervening year, this relationship should not change. If there is no change in either category, the conclusions from the 2007 audit would also be applicable to the current year.

2007 - 2008 PERCENT CHANGE

CHANGE			
RESIDENTIAL TYPE	CATEGORY	Median	Ν
NON-CONDO	SOLD	.0000	2,030
	UNSOLD	.0000	12,042
CONDO	SOLD	.0000	1,599
	UNSOLD	.0000	9,872

The median percent change table of sold and unsold residential and condo properties indicates that there is no change in either category. Therefore, we can conclude that the analysis performed for the 2007 audit is also applicable for the 2008 tax year.

IV. COMMERCIAL/INDUSTRIAL SALES RESULTS

For the commercial/industrial analysis, 177 sales between the dates of January 2005 and June 2006 were analyzed. A breakdown of the sales by subclass is as follows:

	Frequency	Percent
2115 Lodging	1	.6
2130 Special Purpose	25	14.1
2212 Merchandising	2	1.1
2215 Lodging	4	2.3
2220 Offices	9	5.1
2230 Special Purpose	4	2.3
2235 WareHouse/Strg	11	6.2
2240 Multi-Use (3+)	1	.6
2245 Commercial Condo	120	67.8
Total	177	100.0

SUBCLASS CODE

In order to perform a sales ratio analysis all commercial/industrial sales must reflect market conditions as of June 30, 2006. Based on an examination of the sales file, the County did not apply time adjustments to the sales during this time period.

The following table outlines sales ratio statistics for commercial and industrial properties in Eagle County.

Ratio Statistics

Mean	.956
Median	.988
Weighted Mean	.865
Price Related Differential	1.105
Coefficient of Dispersion	.119

RATIO = CURRENT ASMT / TASP

The above ratios are in compliance with the standards set forth by the Colorado State Board of Equalization (SBOE) for the overall sales. The following graphical exhibits describe further the sales ratio distribution for all of these properties:

Commercial Market Trend Analysis

The "Sales Ratio by Months" graph describes the sales ratios over the 18 month time period. Although there is a slight decline in the sale ratios during the first 9 months, the target ratio level of .95-1.05 is maintained throughout the entire study period.

SALE RATIOS BY MONTHS

Sold/Unsold Analysis

For the 2007 revaluation year audit, an analysis was performed that confirmed that the median change in value for sold and unsold commercial/industrial property was similar. Since tax year 2008 is the intervening year, this relationship should not change. If there is no change in either category, the conclusions from the 2007 audit would also be applicable to the current year.

2007 - 2008 PERCENT CHANGE

CHANGE		
CATEGORY	Median	Ν
SOLD	.0000	177
UNSOLD	.0000	3,081
Total	.0000	3,258

The median percent change table of sold and unsold commercial/industrial property indicates that there is no change in either category. Therefore, we can conclude that the analysis performed for the 2007 audit is also applicable for the 2008 tax year.

V. VACANT LAND SALE RESULTS

For the vacant land analysis, 707 sales between the dates of January 2005 and June 2006 were analyzed. A breakdown of the sales by current property type is listed below.

	Frequency	Percent
VACANT LAND	361	51.1
RESIDENTIAL	340	48.1
COMMERCIAL	4	.6
OTHER	2	.3
Total	707	100.0

PROPERTY TYPE

Sales that were coded as vacant (361) were used in the vacant land sale ratio study. The remaining sales were excluded from the analysis.

In order to perform a sales ratio analysis all vacant land sales must reflect market conditions as of June 30, 2006. Based on an examination of the sales file, the County applied time adjustments to the sales during this time period. The following graph illustrates the various time adjustment factors that were applied to the vacant land sales.

EAGLE COUNTY VACANT LAND TIME ADJUSTMENT FACTORS

The following table outlines sales ratio statistics for vacant land properties in Eagle County.

Ratio Statistics			
Mean	.965		
Median	.973		
Weighted Mean	.945		
Price Related Differential	1.021		
Coefficient of Dispersion .110			

RATIO = CURRENT LAND VALUE / TASF

The sales ratios are in compliance with the standards set forth by the Colorado State Board of Equalization (SBOE) for the overall sales. The following graphical exhibits describe further the sales ratio distribution for all of these properties:

2008 Statistical Report: EAGLE COUNTY

The above graphs indicate that the distribution of the sale ratios are within state mandated limits, and that there are no significant price related differential issues.

Vacant Land Market Trend Analysis

The "Sales Ratio by Months" graph describes the sales ratios over the 18 month time period. The graph illustrates that there is no significant trend in the sale ratios and the target ratio level of .95-1.05 is maintained throughout the entire study period.

SALE RATIOS BY MONTHS

Sold/Unsold Analysis

For the 2007 revaluation year audit, an analysis was performed that confirmed that the median change in value between sold and unsold land was consistent. This analysis was performed on a subdivision level for subdivisions that had a minimum of 6 sales. Since tax year 2008 is the intervening year, this relationship should not change. If there is no change in either category, the conclusions from the 2007 audit would also be applicable for the current year.

2007 - 2008 PERCENT CHANGE

CHANGE			
SubdivNum	CATEGORY	Median	Ν
1187.00	SOLD	.0000	7
	UNSOLD	.0000	29
1280.00	SOLD	.0000	7
	UNSOLD	.0000	15
1294.00	SOLD	.0000	8
	UNSOLD	.0000	17
1361.00	SOLD	.0000	16
	UNSOLD	.0000	18
1421.00	SOLD	.0000	6
	UNSOLD	.0000	21
1583.00	SOLD	.0000	10
	UNSOLD	.0000	44
1709.00	SOLD	.0000	7
	UNSOLD	.0000	12
1768.00	SOLD	.0000	17
	UNSOLD	.0000	20
1823.00	SOLD	.0000	8
	UNSOLD	.0000	7
1824.00	SOLD	.2185	6
	UNSOLD	.2185	14
1930.00	SOLD	.0000	29
1936.00	SOLD	.0000	9
	UNSOLD	.0000	97
1959.00	SOLD	.0000	39
	UNSOLD	.0000	5

The above median percent change table of sold and unsold vacant land indicates that there is no change in either category. Therefore, we can conclude that the analysis performed for the 2007 audit is also applicable for the 2008 tax year.

VI. AGRICULTURAL IMPROVEMENTS ANALYSIS

The final statistical verification concerned the assigned actual values for agricultural residential improvements; based on the parameters developed for the 2008 audit. Eagle County was exempt from this analysis.

VII. CONCLUSIONS

Based on this statistical analysis, there were no intervening year compliance issues concluded for Eagle County.

2008 Statistical Report: EAGLE COUNTY
