Council attended joint convention of Council and House, to receive the Governor, and hear the reading of the Governor's message.

Joint convention organized, President of Council presiding.

Mr. Hill, of the Council, moved that a committee of three be appointed to inform His Excellency, the Governor of Colorado Territory, that the two Houses of the Legislature are in joint session, and ready to receive any communication he might have to make.

Seconded and carried.

Mr. Hill, of the Council, and Webster and Gardner, of the House, were appointed such committee.

The Governor appeared and was presented to the convention.
Reading of the message by the Governor:

Fellow Citizens of the Council and House of Representatives:

Since my last message to your Legislative Body, the Territory has enjoyed a degree of peace, good order, and prosperity, unexampled in our past history. All portions of the Territory have felt the quickening influence of fresh developments and new energy; and through the mercy of a kind Providence we have escaped those calamities which have visited other portions of our common country.

It will be your high privilege during the present session, not only to preserve, by wise legislation, the standard of progress we have reached, but also to still further foster and encourage those agencies which have built up the fortunes and prosperity of our people.

IMMIGRATION.

I desire to call your attention to a recommendation embodied in my last message to the Legislature, suggesting that some provision be made for the publication and dissemination of all statistics relative to our soil, climate and productions, which may be valuable to those seeking information with a view to emigration. I am prepared now to recommend that the Legislature go still further, and immediately provide for the appointment of a Commissioner or Commissioners, whose duty it shall be to make every effort to induce immigration to the Territory, and suitably provide for the immigrants after reaching here. The plan for this organization need not be either a complicated or an expensive one, but no matter what amount of labor and expense may be involved, if the encouragement of immigration has become a necessity, that necessity must be recognized and provided for.

Now, more than ever, do we need an immigrant aid system, thoroughly organized, on such a basis as will attract to our Territory a population that will develop the resources with which nature has so bountifully endowed us; and now, more than heretofore, will it be necessary for us to make every effort to secure our proportion of the emigration seeking new homes in America; for we have earnest and intelligent competitors, not only in the States and Territories of the Northwest, but in those of the South, which, like Virginia and North Caro-

lina, have at last awakened to the necessity for making vigorous and well-directed efforts to induce immigration to their States, and are issuing such influences as they command, to secure a portion of the immigration that has heretofore been exclusively absorbed by the West.

The question of immigration, and how to dispose of the immigrant after reaching our shores, though always important, has, since the last session of your body, become a subject of deep national interest and universal discussion. At a convention held in Indianapolis last winter, in which almost every State and Territory in the Union was represented, and in which I had the honor of representing your Territory as a delegate, measures were inaugurated by which abuses connected with our present immigrant system were brought to the attention of the President and Congress of the United States; and the President has recognized the importance of affording these people additional information and protection, by calling the matter to the attention of Congress, in his recent annual message, and asking for some legislative action in their favor. Should this wise recommendation be acted upon, as it doubtless will be, the result must be a large and immediate increase in the number of immigrants seeking homes in the United States, and unless we make prompt and vigorous efforts now to induce a portion of this immigration to come to us, it will be lost forever; and should the tide once seek another channel, we may never again be able to divert it to our own. No doubt a great deal has been accomplished through the efforts of different colonization societies which have located in the Territory; their growth and prosperity have been almost miraculous, but if we wish to keep pace with the older and more populous communities around us, we must follow their example and inaugurate like systems to those which they have tested and found effective in securing additional population.

The Superintendent of Immigration of the young and vigorous State of Nebraska, informed me recently, that since the passage of a law establishing a board of Immigration Commissioners for that State, their population has increased more than fifty per cent., and was still rapidly increasing. With such energetic and determined competitors as Kansas and Nebraska, between us and the East, we will be compelled to either follow their example or see in future the greater portion of immigrants seeking homes in this part of the West, intercepted and appropriated before they reach our borders.

RAILROADS.

Since the last meeting of the Legislature, four hundred and twenty-two and a half miles of railroad, owned by five different companies, have been completed within the Territory, and are now successfully operated. I am glad to say that the construction of each one of these roads has materially added to the prosperity of the Territory.

The completion of a portion of the narrow-gauge road, and its successful operation for the last two months, has not only consummated a great public good to the people of the country through which it passes, but it has demonstrated the practicability of building a system of railways economical in construction, and peculiarly adapted to the wants of this country; a class of roads that will eventually penetrate to the hearts of all the best counties which constitute the great mineral belt, bringing their base of supplies to the very mouths of the mines, and giving to the whole of what is now a comparatively isolated section, cheap transportation and supplies. It has already annexed the fertile and productive South to the rest of the Territory; and as it is still further pushed forward by its projectors, it will secure to Colorado, against all competitors, the yearly increasing trade of New Mexico and the further Southwest.

It is certainly a source of congratulation that citizens of Colorado have been the pioneers in this novel and most successful enterprise; an enterprise which practically assures the future of all portions of our Territory, should its maturity fulfill the promise of the present.

My attention has been called to the fact that controversies have arisen between some of the county authorities and certain railway companies, in relation to taxes assessed against the lands and other property of these corporations. I hope that legislative wisdom may devise some means by which these differences may be equitably adjusted without involving either the counties or the companies in a protracted and expensive litigation.

FINANCES.

The report of the Territorial Treasurer, dated January 28, 1869, showed the indebtedness and liabilities of the Territory to be at that time over \$10,000. Since then this indebtedness has been paid off, and it gratifies me to be able to state that the Territory is without debt of any character, and at this time has a surplus remaining in the Treasury of \$55,104 32.

I would call your attention to the various suggestions made in the report of the Auditor and Treasurer, and also recommend that some legislation be had which will reconcile the discrepancies existing between the accounts of those two officers, which discrepancies arose in the year 1867, during the administration of one of my predecessors, and have never yet been satisfactorily adjusted. I would recommend that the Governor be authorized to make an examination at any time he may deem necessary for the good of the public service, of the books, papers, accounts, and vouchers of any of these officers.

INDIAN AFFAIRS.

Shortly after the adjournment of the last Legislature, I was relieved, at my own suggestion, from further duty as Superintendent of Indian Affairs; believing, as I did, that both the interests of the people of the Territory, the General Government, and the Indians, would be better subserved by separating the offices of Governor and Superintendent as widely as possible. Some time afterwards, in compliance with instructions received from the Secretary of the Interior, I made a report to the Commissioner of the General Land Office, dated September 9, 1871, in which his attention was called to the fact that twenty-seven million, three hundred and twenty-two thousand, one hundred and seventy and a half acres of the Territorial area was rendered useless to the Government for purposes of sale or settlement, by reason of unadjusted Mexican land grants, and the large area set aside as an Indian reservation. This reservation comprises about nineteen million, seventy-seven thousand, one hundred and twenty acres, or thirty thousand square miles, while the number of Utes who pretend to occupy it will not exceed five or six thousand. You can form a better idea of the magnitude of the public domain within this Territory, from which white settlers are excluded, when I state that it comprises an area larger than the States of Maryland, Delaware, Massachusetts and New Hampshire combined.

I think that it would not be improper to lay this matter before the President, through legislative action, in the shape of a memorial. If the first step towards the civilization of the Indian is to be instruction in those industrial and agricultural pursuits which will to some extent civilize and christianize him, and at the same time relieve the government from the burden of his support, it seems to me that the better way to accomplish this desirable end, would be to limit him to a reservation of reasonable proportions, instead of giving him so much

country to roam over that he will be encouraged to preserve his old nomadic habits, and seek subsistence by war and the chase, rather than through agricultural and pastoral pursuits. Though the numbers of the Ute Tribe are insignificant when compared with that of the other uncivilized tribes, their reservation is the largest on the continent. While they number but about one-fortieth of the Indians under the jurisdiction of the United States, their reservation comprises more than one-fifth of all the lands set aside for the occupation of the different tribes, which would give to each head of a family among the Utes of Colorado, about thirty square miles, or over twenty thousand acres of land for his homestead.

During the past year we have been free from savage incursions, and the Territory has shown the effects of this unusual peace, by a large increase in wealth, population, and prosperity.

The Secretary of the Interior, in his last annual report to the President of the United States, has suggested that all the roving tribes be located upon reservations, within the limits of what is now known as the Indian Territory. Even should this eminently sound recommendation of the honorable Secretary not be adopted as the future policy of the government, I think it possible to secure a new treaty with the Utes, either greatly reducing the vast area of their present reservation, or else providing for their removal further south, and outside of the limits of the Territory, thus opening the whole of their country to white settlement.

Although not a paradise, this reservation is as fertile in soil and genial in climate as any country I have seen west of the Missouri, and once opened to the miner, I think it will prove as rich in gold, silver, coal, copper, and iron, as any other portion of the Territory.

I would again call your attention to the propriety of asking Congress to make some provisions for reimbursing those who have suffered from Indian outrages. No class of our citizens have suffered more deeply, or waited so patiently for redress.

ADJUTANT GENERAL.

I call your attention to the report of the Adjutant General, and some recommendations which he makes. Although a militia law can be found upon the pages of the statute book, it is now, and always has been, a dead letter; and I presume that so long as the Territory is sparsely populated, it will be impossible to perfect any creditable military organization. I would suggest, however, that the military fund now in the treasury, (the amount of which can be ascertained from the report of the

Auditor) and such as may be hereafter collected, be placed at the disposal of the governor, to be disbursed by him for the benefit of any volunteer companies which may hereafter organize and uniform; or be used in the event of any emergency arising, which calls for the presence of troops; the disposition made of such fund to be reported to the Legislature at each session, and accompanied by proper vouchers.

I would also call your attention to the fact that no authentic records are among the archives of the Territory, relating to the Colorado volunteers who served during the war of the rebellion. As a matter of justice to these brave men, full sets of muster rolls should be procured and filed in the office of the Adjutant General.

EDUCATION.

The school law which was passed at the last session of the Legislature has to a great extent answered the expectations of its friends. I refer you to the comprehensive report of the Superintendent of Public Instruction for a detailed statement of its practical working. One objection which has been frequently urged against emigrating to Colorado with families, has been the supposed want of sufficient educational facilities. You may gather from the report of the Territorial Superintendent that Colorado is at least as well and probably better provided in this respect than most of the Western States; and although the system has been in operation but two years, it gives such promise of permanent usefulness as has surprised its warmest advocates. Its success has so far conclusively demonstrated the fact that our people fully appreciate the benefits of a free school system. As the commissioners for some of the counties have neglected or refused to levy the school tax, as provided by law, I would recommend that an act be passed imposing a fine, or such other penalty as your body may deem necessary, upon any County Commissioners who fail to carry out the provisions of the school law to its fullest extent. I would also recommend that the law be so amended as to provide for the apportionment of the school fund in proportion to the actual attendance of scholars at the different schools, and also that the Superintendent of Public Instruction be authorized to appoint County Superintendents wherever County Commissioners fail to fill vacancies.

The commissioners appointed by the third section of "An Act to establish a school of mines," approved February 10 1870, have briefly reported to me that they have received from

the Territorial Treasury the amount appropriated by said act for the erection of a building, and that they have expended the same in the construction of a substantial edifice of brick, which has not been entirely completed for want of funds to finish the same. It is partly occupied, however, by the library, the herbarium, and cabinets of specimens in natural history, together with the philosophical apparatus of the institution. They also express a hope that I will commend the matter to the consideration of the Legislature, and suggest the propriety of a further appropriation for finishing the building and furnishing it with the proper apparatus.

I do not deem it advisable to recommend any further appropriation for this purpose, until the Commissioners may have submitted some definite plan indicating the objects they have in view, accompanied by an estimate of the amount of money possibly required to carry out these objects. Without this the Legislature might be induced to make appropriations from year to year, which may not result in any definite good to the people or the Territory.

I submit a copy of the report of these Commissioners, with the other public documents forwarded to your body.

TERRITORIAL ASSAY OFFICE.

The report of the Territorial Assayer, herewith submitted, contains no statistics whatever in relation to the mining industries of the country, but is confined simply to a statement of the business affairs of his office, and the number of assays made during the past two years. I have, however, obtained from the director of the United States assay office at Denver, statistics showing the actual amount of gold and silver bullion passed through the office since my last message to the Legislature, and also the approximate amount produced by the different mines in the Territory, and shipped through the express companies and other sources, to Europe and the East:

Amount passed through the mint.....	\$2,124,693 25
Amount from all other sources.....	6,213,306 75
Total.....	\$8,338,000 00

Which shows an increase in the mineral production of the Territory of about fifty per cent. over the years 1868-9.

Throughout the whole mining region new discoveries are being made almost daily. In many instances old mines, which had been abandoned for years, have been reopened and are now

successfully and profitably worked. New capital is coming into the country, and fresh enterprises have been projected for the smelting and reduction of our ores. The mining interests of the Territory are more prosperous than ever before; the coming year will show an increase in productiveness, much larger than the increase during any year past, and the experience of the last two years has demonstrated the fact that our mineral wealth of coal, iron, gold, silver, copper and lead, is not exceeded by that of any other State or Territory in the Union.

The development of our agricultural and other industrial interests has kept pace with the mining interests. I would suggest the propriety of offering small premiums for new classes of products, and encouraging by every means in your power the work which has been commenced and so successfully prosecuted, through the instrumentality of the Territorial Agricultural Society. While I would not recommend the appropriation of any large sums of money for this purpose, I yet believe that the future interests of the Territory would be subserved by the pursuits of a policy on the part of the Legislature which will encourage enterprising citizens to make such experiments as may result in the permanent advancement of the agricultural and mining interests of the Territory.

LIBRARY.

Previous to the appointment of the present Librarian, the public library was one of the most discreditable institutions connected with the Territorial government. It was composed, apparently, of a collection of almost everything except books. Since the present incumbent entered upon the discharge of his duties he has done much to make the library at least partially respectable. At present it comprises about two thousand two hundred volumes, composed mostly of that interesting class of literature found in patent office and law reports, congressional journals and legislative journals of the different States. The librarian has entered upon his duties in the true spirit of an officer who desires to discharge his obligations for the public good. I ask at your hands a careful consideration of the recommendations he offers, and would most earnestly recommend that an increased appropriation be made to be expended in the purchase of standard scientific and other works. It is better either to place the library upon a basis that will insure its future public usefulness, or else abandon it altogether. Unless it is the intention of the legislature to make it a permanent institution which will make it a credit alike to the intelligence

and liberality of the Territory, the present expenditure for its support had better be discontinued.

PENITENTIARY.

In compliance with the provisions of an act of congress approved January 10, 1871, and also an act of the Colorado legislature, entitled "an act relating to the penitentiary and persons convicted of crimes, and to provide therefor," approved February 11, 1870, a contract was entered into between the government of the United States, represented by Mark A. Shaffenburg, United States Marshal, on the one part, and Edward M. McCook, Governor, James B. Thompson, auditor, and Marmaduke Green, district attorney of the third judicial district, commissioners on behalf of the Territory, which provided for the maintenance and support by the United States, of all persons convicted of crime in said Territory, and sentenced to imprisonment in the penitentiary; said support to be paid for at the rate of \$7 per week for each person. This was the price fixed by the attorney general of the United States in his instructions to the marshal, and no option was left the commissioners on the part of the Territory, but to enter into a contract for this sum. After this contract had been signed, I issued my proclamation directing the removal to the penitentiary of all persons sentenced to imprisonment therein for crimes against the Territory. There are now confined there twenty-one territorial prisoners. I am unable to furnish the legislature with any information as to the manner in which they are employed, their sanitary condition, or any other facts relating to them, as no report in that connection has been received by me from any source. I would recommend that hereafter the commissioners be authorized to make a thorough examination of the prison at least once a year.

I would also call your attention to the fact that a specific appropriation will be necessary for the amount already due the government of the United States for the maintenance of prisoners, and also for the amount that will become due during the next two years.

In the Appendix marked A, you will find the names of persons pardoned by me since the session of the last Legislature, and the reasons which influenced me in extending to them the executive clemency.

TERRITORIAL OFFICERS.

I would again call your attention to the fact that I regard the compensation of some of the Territorial officers as insuffi-

cient. Neither the Auditor nor the Treasurer receive a compensation at all proportionate to the responsibilities they are called upon to assume, or the labor they are compelled to perform. The fact that the Territory has been so well served by these officers, is the best argument that can be advanced in favor of their being well paid.

I would also request that some law be passed which will definitely confer upon the executive the power to remove officers of his own appointment, for any malfeasance or neglect of official duty. Although the law, as it now stands, may confer this power by implication, yet I would prefer that the intention of the Legislature should be specifically expressed.

I would also ask that the Legislature make an appropriation of a sufficient amount to enable me to employ a clerk or secretary. While Superintendent of Indian affairs, the Superintendent's clerk discharged the duties of secretary to the Governor without any additional compensation. Since then I have been compelled to employ a clerk at my own personal expense. As the amount paid by me for executive office rent, clerk hire, fuel, lights, stationery, and other contingent expenses, much more than exhausts not only the contingent fund of \$1,000 per annum allowed me by the government, but the most of my official salary, I feel justified in asking the Legislature for this appropriation, more particularly as the duties a clerk would be called upon to perform are almost entirely for the benefit of the Territory, and not of the general government.

NEED OF REFORM IN LEGISLATION.

A cursory examination of very many laws in force, will convince you that much of our legislation is of a crude and ill digested character. I am fully aware that laws which have been for a considerable time in force, and attended with results that in the main have been beneficent, should not be hastily changed; and yet I think that experience has demonstrated and the public good requires, that certain alterations in what is known as the "Practice Act," should be made so that proceedings in our courts may be more simplified, expenses of litigation diminished, and the trial of controversies accelerated. It is a fact that will not be questioned, that in the matter of legal improvement we have not kept pace with Great Britain. We have all the harshness, all the technicality, all the hair-splitting of the common law, without any of the reforms that have been grafted on it within the last fifty years in the country where it originated. Is it wise for us to jealously retain all the errors that have been lopped off elsewhere, and reject all

the improvements that have been adopted by others? Notwithstanding the boast that the common law is the perfection of reason, history records the fact that a British Parliament was compelled, no less than twelve times, to interpose statutes of amendments to the "Practice Act," in order to get rid of those subtle chicaneries which crept into the proceedings of their courts of justice.

The time was when this same common law, which is the "perfection of reason," would not allow the prisoner to bring evidence against the witnesses of the crown. Under the same common law the witnesses of the prisoner were not allowed to be examined under oath, nor the prisoner on trial for his life to be heard by counsel, although if the action were civil in its nature, and the amount involved did not exceed five shillings, he could summon witnesses and employ the ablest counsel. In England, happily, one piece of cruelty and folly has given way after another.

Much money has been withheld from investment in Colorado, under the apprehension that here the law's delays were so serious as to hinder the collection of debts. The difficulties, if any exist, are not found in the collection laws, but in the practice act. If an attorney files a declaration on a promissory note and happens to omit some averment which the Court deems material, the other party is entitled to a six months' continuance. This is contrary to good reason and sound policy, and so long as these facilities for obtaining delays exist, not only in the trial of moneyed actions, but in all others, the prosperity of the Territory will be retarded. I would recommend that you pass an act providing that the Court may, at any time, in its discretion, and at any time as may be deemed proper, for the furtherance of justice, direct the name of any party to be added to or struck out of any pleading, or to correct any mistake in name, description, or legal effect; any material allegation to be inserted, struck out, or modified, so as to conform the pleadings to the facts proved, when the amendment does not substantially effect the claim or defense; and to further provide that no amendment of a pleading shall entitle a party to a continuance, unless he file an affidavit distinctly showing in what respect the party asking for the continuance has been prejudiced in his preparation for trial by the amendment. Laws to this effect obtain in almost all the States of the Union, and have been followed by the most beneficial results, and now, at a time when the bars of Pennsylvania and Kentucky, and the press of Illinois are moving in the direction of legal reform, and brushing away the cobwebs that have grown so thickly around the common law, let Colorado move

also to the front, and inaugurate and carry out those changes which will elevate in the public esteem our legal practice, and make our courts temples, where the highest considerations are not the subtle technicalities of black-letter lawyers, but the preservation and advancement of the rights of the people.

Before quitting this subject I desire to call your attention to another topic of kindred character. The present law in reference to changes of venue should be substantially amended. As it now stands it offers too many sweeping opportunities for perjury and abuse. All that is necessary for a party to do in order to obtain a change of venue, is to file an affidavit stating that he believes he cannot obtain a fair trial; he is not required to state any fact, but simply to give his naked belief, and on an affidavit of this character, the Court has no power to refuse the change. The judge may have knowledge that the affidavit is false, and that the application is made for delay, but he is powerless in the premises; he has no discretion whatever, as the statute is imperative. A person charged with crime, and not desiring to be tried, may secure postponement by swearing that he believes he cannot have a fair trial; the court is compelled to send the case to some other county or district, and in the meantime the witness may be spirited away, the public forgets the offense, the district attorney is compelled to enter a *nolle prosequi*, the prisoner is discharged, the law unvindicated, and justice made a farce and a mockery. Is it not time that this thing should be remedied? To suffer it to remain as now is to place honest men at the mercy of knaves.

THE GRAND JURY SYSTEM.

For some time back a feeling has been steadily gaining strength in this country unfriendly to a continuance of the grand jury system. The people are beginning to regard it as hostile to the spirit of our institutions, and are inquiring for a substitute, which, while it will be just as effective, will be much less expensive, and less objectionable. At present, before a person can be condemned of felony, twenty-four men must concur in pronouncing him guilty—twelve grand jurors must concur in finding a presentment—and twelve petit jurors must agree in finding its truth, before the accused can be punished. The method of the investigation, as carried on by a grand jury, is calculated to render it offensive and odious. It suggests too strongly the terrors of the Star Chamber and the Spanish Inquisition; it is secret and one-sided. The law does not permit the witnesses for the accused to be present; in fact the jurors are sworn to keep secret their own counsel and that

of their fellows, and formerly it was deemed felony for any of the grand jury to divulge the names of the persons whom they were about to present. Being armed with power co-extensive with the limits of the county, they can summon before them every citizen, and on mere suspicion, rigorously inquire into the conduct of every man. It not unfrequently happens that individuals, actuated by pique, and eager to gratify personal animosity, prefer charges before this inquest; the machinery of the law is put in motion, witnesses summoned, the investigation prosecuted, and a bill found; a trial in the district court follows, and in very many, probably a majority of cases, the defendant is acquitted. The fact, however, that a grand jury has found a bill of indictment goes far toward convincing some at least those who make the presentment, that the accused is really guilty, and this belief is based on purely *ex parte* testimony. The further fact that a person's conduct is undergoing or has undergone investigation, is well calculated to impair his credit and destroy his standing among his fellows. Notwithstanding the stringency of the oath which witnesses and grand jurors are required to take, the facts, somehow, nearly always leak out; parties are formed, and curbstone discussions as to the probable guilt or innocence of the suspected persons are diligently carried on, and you all know that discussions of this kind are, without exception, fatal to the subject of them.

Independent of these considerations, there are others; first the enormous expense. A grand jury consists generally of twenty-three members; they are entitled to as much *per diem*: add to this the cost of witnesses and attendants, and at every term of court it reaches a respectable amount. Besides, is it not a serious hardship that busy tradesmen and industrious mechanics should be taken from their avocations and detained several days at a time, upon an inquiry, which is followed generally by no useful results to the jurymen themselves, or any person else.

As a substitute for the grand jury system, I would recommend the passage of a law authorizing and empowering the district attorney in all cases of misdemeanor or minor offenses against the Territorial laws, to file in court an information predicated on the affidavit of the prosecuting witness. This would retain every result now realized by an indictment. District attorneys would thus be called upon to take a responsible part in the great judicial drama, and see justice administered in its purest and most enlightened form. Their action would be exposed to the searching scrutiny of their neighbors and the court, and a degree of care heretofore unknown, will be induced in the institution of criminal proceedings; the number of very

petty prosecutions will be decreased, and trial will be had in those cases only where conviction is almost sure to follow the presentment of an information. We will, by this act, be relieved of the burdensome expenses incident to the present system, and at the same time expedite the clearing of the criminal calendar. The legislation I would recommend is no new experiment. In Kansas, some years ago, they inaugurated this reform, and a movement in favor of its adoption is making headway in almost all the States.

In this connection I would further recommend that in all preliminary examinations had before justices of the peace in criminal cases, the justice be required to reduce the evidence of witnesses to writing, and when so taken to certify the correctness of the same, and file it with the clerk of the district court, to be used in the future trial of the case, should the witnesses die or otherwise depart the Territory.

THE DEFENDANT A WITNESS IN HIS OWN BEHALF.

Reforms are said to consist not so much in doing something new, as in undoing something old; not so much in the enactment of new laws, as in the repeal of old ones. Two years ago the Legislature, with commendable wisdom, abrogated the old common law rule which excluded parties in civil suits from testifying, and thereby allowed those who knew most about the case to impart their information to the court and jurors. The conservatism that invested this old rule with peculiar sanctity, has vanished; and public opinion, which is always quick to appreciate salutary reform, is now overwhelmingly in favor of the present practice. That the results of the change have been beneficial, is evidenced by the fact that it has greatly saved the time of the court and of parties litigant; has simplified the trial of causes; has discouraged dishonest litigation, and has promoted the development and elucidation of truth. The time has come, when, in my judgment, another forward step in the path of progress should be taken, and when the defendant in criminal cases should be endowed with the same privileges with which those in civil cases are invested. This is certainly no new doctrine. In no civilized country on the globe, save those where the English language is spoken, is a prisoner accused of crime prohibited from testifying in his own behalf. In all countries except those which boast the superior civilization of the Anglo-Saxon race, the accused is allowed to submit to the tribunal before which he stands for trial, his own version, explanation, or denial, and these are received, considered, and allowed such credit as they are entitled to.

So early as 1859, the State of Maine, ever ready to reap the just advantages of true reform, passed an act enabling the defendant in any criminal prosecution for libel, nuisance, simple assault or assault and battery, to offer himself as a witness; and in 1863 the law as to the admission of testimony was further extended, and it was enacted that "in the trial of any indictments, complaints or other proceedings against persons charged with the commission of crimes or offenses, the persons so charged shall, at his own request, and not otherwise, be deemed a competent witness, the credit to be given to his testimony being left solely to the jury, under the instruction of the court;" and Chief Justice Appleton, a man of large experience and great legal erudition, speaking of the changes effected by those enactments, says: "So far as I can judge, they are favorable to the ascertainment of truth—the great end for which judicial proceedings are instituted. I anticipate from them a greater certainty of correct decisions in criminal proceedings. The guilty will be less likely to escape, and the danger of the unjust conviction of the innocent will be diminished." This reform so happily inaugurated in the State of Maine, has met with a ready adoption in some of the other States. It is to-day the rule in Michigan, and I believe also in California and New York, and why should it not be the rule here? One of the fundamental axioms of the law is, that every man accused of crime shall be presumed innocent until his guilt is established by the judgment of his peers. With this cardinal doctrine forever flaming in our temples of justice, we still persist in an inconsistent practice as heartless and cruel as ever disgraced a savage people. If a party is innocent until adjudged guilty, why seal up his lips? Why deny to the accused the opportunity of explaining his conduct? Why brand him with the mark of infamy and proclaim that simple accusation shall work a forfeiture of all rights, and especially of that highest and most sacred right—the vindication of his character from aspersion and assault? You are ever ready and swift to hear from him a confession of guilt, or any admission that redounds to his injury; why not also be willing to hear from him an avowal of his innocence? How often has it happened, when two are jointly indicted for the same crime, that the prosecutor, finding it impossible to convict either on extraneous evidence, proposes to one that if he will confess the crime and inculpate the other, he shall go free? The love of liberty and the hope of escape are too strong, either for his friendship or his nerves; he yields to the temptation; recounts his evidence; discloses all that the public prosecutor and a jury are willing to accept as facts, and goes free, while his associate, more unfortunate,

but not more criminal, wears his life away in prison, or loses it on the scaffold. Did you ever hear of the prosecutor, or the people, advising a prosecuting witness to give testimony consistent with the innocence of himself or fellows, although in every word or detail that testimony should be true? Never! That would be an innovation on the "sacred common law" which for centuries, to the disgrace of civilization and outrage of humanity, denied to the prisoner the benefit of counsel, and which, to this day, padlocks his lips, when life, liberty, and honor, are at stake.

Is there a citizen or lawyer who can read what is known as the Old State Trials of England, without shuddering and disgust? And why? Because they are the black and dismal records of judicial despotism and legalized outrages; because they represent a period in history when the cramped, narrowed, and fettered condition of the law stripped the accused of all rights and privileges, save those of being dumb on the trial and on the scaffold. Let us have the courage to shake off these relics of a cruel and barbarous age; let us strive to conform our legislation to those high dictates of humanity which best become an enlightened and Christian people, and so act that our children, looking back upon our labors, will find but little to condemn and much to commend.

I sincerely trust that your honorable body will take early action on this subject.

I have sometimes thought that the ends of justice would be subserved if a majority of a jury should be authorized to render verdicts in civil cases. The decisions of the majority govern incorporations, legislatures, Congress, and the Supreme Court of the United States; and I have never yet heard any good reason assigned why the majority of a jury should not be permitted to make up the verdict in civil cases. Certain it is that as the law now stands, one obstinate or corrupt juror can prevent the signing of a verdict, and defeat the ends of justice. I simply call your attention to this subject, without making any special recommendation.

APPEALS FROM JUSTICES' COURTS.

I am informed by those most competent to know, that the manner of appeals from justices courts is one of the crying abuses of our judicial system. Two-thirds of all the appeals from these inferior tribunals are apparently taken for purposes of delay; the result is that the dockets of the district courts are burdened with a great number of small and unimportant cases, and parties are compelled to incur great expense in tak-

ing witnesses there to await trial. I would, therefore, most urgently recommend the passage of an act requiring those who desire to take an appeal, to file, as an indispensable preliminary to this step, an affidavit of merit; and to further swear that they have good cause of action or defense, and that the appeal is not for delay. Many of the abuses which now obtain could be corrected by the passage of a *certiorari* law; cases should then go to the district court in much the same manner as they now reach the supreme court. They would be heard on the record; the attendance of witnesses would be dispensed with, and the judge could dispose of them rapidly. The interests of suitors would, in my judgment, be greatly subserved by a measure of this kind.

Another evil greatly complained of by the courts, and which I believe requires correction, is the exemption from jury service because of membership in fire companies. The number of our "gallant firemen" has become so great that the character of our juries is said to be materially deteriorating; consequently, I would suggest, either that the law granting this exemption be repealed, or the number of firemen be limited so that a few men may be left who are really competent for jury service.

MISCELLANEOUS.

During the last session of our Legislature, fifty-one general laws, twenty-three private acts, and fourteen memorials and joint resolutions, passed that body and were approved by me. Of this number thirty-seven general laws, fifteen private acts, and nine memorials and joint resolutions, were not presented for my signature until the last night of the session. Some of the more important, such as the revenue and school laws, were only placed in my hands within a few minutes of the time fixed for adjournment; thus compelling me to approve those acts without a thorough examination, or else leave the Territory, during the next two years, without either revenue or schools.

I most respectfully submit that a mass of enrolled bills, which in print makes 176 closely printed pages, cannot be satisfactorily examined in an hour or two, even by a Territorial Governor; neither do I believe that bills hurried through during the last impatient hours of an expiring session, are always of a character to bear the close scrutiny of the people.

I hope that you, gentlemen, may be able to complete the more important part of your legislative labors some days before the time fixed by law for your adjournment.

I recommend the repeal of the first and second sections of

“An act to amend chapter twenty-two of the Revised Statutes of Colorado Territory, entitled an act concerning criminal jurisprudence.” Approved February 11, 1870.

I would also recommend the passage of a law which will protect our people against further losses from irresponsible insurance companies. The amount of premiums paid insurance companies during the past year, by the people of Arapahoe county alone, reaches the sum of \$139,950. I have not ascertained the amount paid by other portions of the Territory, neither can I learn what proportion of this money was paid into the treasuries of companies which have since failed, but the sum is large. Some provision can be made by which insurance companies doing business here will be required to deposit with the Territory such securities as will guarantee to our citizens the payment of any losses for which these companies may become liable in the future. This, I believe, is the law in nearly every State of the Union,

I recommend the repeal of section sixty-one of the revenue law, approved February 11, 1870, which makes taxes delinquent after the first day of January each year, and adds a penalty of twenty-five per cent. for non-payment. This penalty is excessive. In fact, all the penalties imposed by the revenue law are exceptionally severe.

I think the time for payment of taxes should be extended to the first of March. Their collection is now enforced at a period of the year when great scarcity of money prevails among all classes except the wealthiest, and during the time elapsing between the first of January and the first of March this tax money might as well be in the pockets of the people as in the vaults of the county and Territorial Treasurers. If belongs to the people, anyhow, and if suffering, or even inconvenience, is caused by forcing them to pay at this particular time of the year, I think it the duty of the Legislature to afford all the relief in their power.

The appropriation made by the last Legislature for the purpose of encouraging agriculture by artesian irrigation, has not been expended. The reasons for this are explained in the report of the board provided for by said act.

Before closing my message I desire to say a word in favor of protecting our game—birds, beasts, and fishes—all of which are being wantonly destroyed, both in and out of season; and unless some law is passed inflicting such severe penalties as will stop this useless and pitiless destruction, the buffalo, elk, deer, antelope, and trout, will soon become extinct, and Colorado be robbed of one among the many attractions she to-day possesses. I have heard persons who oppose the passage of a

game law, say that such an enactment would be useless, because the savage would slaughter the game thus protected. But this assertion is not borne out by facts; on the contrary, the Indian entirely lacks, in this one particular, the wasteful cruelty and unsportsmanlike attributes which seem to characterize the professional hunter, and the orthodox tourist.

I trust that every member of your honorable body will concur with me in the hope that the next Legislative Assembly which meets at the Capitol of Colorado may represent the people of a sovereign State; and should such be your sentiment, I recommend that it be embodied in a proper memorial, and forwarded to our territorial delegate for presentation to the Congress of the United States.

I hope your session will be a harmonious and useful one, and assure you that I will co-operate with your body in every effort to establish the present, and build up the future prosperity of the Territory.

EDWARD M. McCOOK.

Add to Rule 14, "Bills appropriating moneys for the payment of officers of the government, shall be confined to that purpose exclusively; and no law shall embrace more than one subject which shall be expressed in its title.

Rule 15, "No joint rule of the Council and House of Representatives shall be suspended, altered, or amended, without the concurrence of two-thirds of members elected to each house."

And your committee would recommend that the rules of the Council, and joint rules of the Council and House of Representatives, when printed, shall embrace a list of the Standing Committees of both houses.

N. P. HILL,
JAS. MARSHALL PAUL,
ED. C. PAKMELEF,

Mr. Bates moved that the report be adopted and the committee discharged.

Carried.

The President announced that the recommendations contained in the Governor's message, were referred by him to the following committees:

That part relating to Emigration, to the Committee on Emigration.

That part relating to Finance, to the Committee on Finance, Ways and Means.

That part relating to Indians, to the Committee on Indian Affairs.

That part relating to the Adjutant General, to the Committee on Military Affairs.

That part relating to Education, to the Committee on Education.

That part relating to Territorial Assay Office, to the Committee on Mines and Mining.

The part relating to the Library, to the Committee on Territorial Library.

That part relating to the Penitentiary, to the Committee on the Penitentiary.

That part relating to Territorial Affairs, to the Committee on Finance, Ways, and Means.

That part relating to Legislative Reform, included under the several headings, "Reform in Legislation," "Grand Jury System," "The defendant a witness in his own behalf," "Appeals from Justices' Courts," to the Committee on Judiciary.

That part under the head of "Miscellaneous," to each member of the Council.

Mr. Bates offered the following report:

To the Legislative Assembly of Colorado Territory:

The undersigned would respectfully report that they were duly appointed a committee to examine the accounts of the Territorial Auditor and Treasurer, in pursuance of the provisions of chapter nine (9) Revised Statutes.

That your committee assembled at the office of the Auditor in Denver, on the 26th day of December, 1871, and after being duly sworn according to law, entered upon their duties.

Your committee do not deem it necessary to report the separate receipts and disbursements; as they will appear in the reports of the Auditor and Treasurer, which will be laid before your honorable bodies.

Your committee have made a thorough examination of the books, papers, accounts, and vouchers, and official transactions of the Auditor and Treasurer, for the fiscal years of 1870 and 1871, and beg leave to report that they found all the accounts and vouchers presented by the Auditor, correct in every particular; and respectfully wish to commend the Auditor for the manner in which the books have been kept, and for his care in auditing claims against the Territory. We cannot find that any useless expenditure has been made, or any fraudulent or fictitious accounts allowed in the past two fiscal years.

No unlawful warrants have been paid by the Treasurer; and his books and the Auditor's agree, except in such cases as will be found in a statement below.

The Treasurer, upon commencing his duties in the year 1870, opened an entire new set of books, and each and every voucher being entered in detail, your committee have been enabled to perform their work much more readily and easily than they could have done under the old system of book-keeping in the Treasurer's office. The system adopted by the Treasurer is simple and plain.

The difference existing between the Auditor's and Treasurer's books, commenced in the year 1867, and is as follows:

TERRITORIAL TREASURER IN ACCOUNT WITH COLORADO TERRITORY.

To balance in Treasury, as per Treasurer's report.....	\$50,897 42
To Graham's Warrants.....	\$3,580 74
To Assay Office Warrants paid directly by Treas....	625 00
To Discrepancy in acct's.....	4 16
	<hr/>
	\$4,209 90
Contra.	
By Warrant outstanding drawn on newspaper fund	3 00
	<hr/>
	\$4,206 90
Auditor's balance.....	\$55,104 32

Your committee respectfully recommend that a committee from among the members of the present Legislative Assembly be appointed to adjust these differences between the accounts of the Auditor and Treasurer, and to cause the proper entries to be made in their books.

In conclusion, your committee have to congratulate the Territory upon the efficient manner in which the affairs of the Treasury Department have been conducted by the Auditor and Treasurer, during the past two years.

Respectfully submitted,

J. E. BATES,
JOHN G. RANDALL,
J. H. BATCHELLOR,

Mr. De France moved that the Governor's message and all papers and reports accompanying the same, be spread upon the journal.

The following communication from the Secretary of Colorado, was received and read:

SECRETARY'S OFFICE,)
Denver, January 4, 1872. }

To the Honorable, the President of the Council:

Sir: I have the honor to direct your attention, and that of the Honorable Council, to the annexed copy of instructions recently received by me from the Treasury Department of the United States, viz:

1st. "Reports of Territorial officers may be printed, if desired, by the Legislature, but the cost, including paper and binding, must be paid by the Territory. It will not be allowed in your accounts."

2d. "Hereafter the following items heretofore allowed as part of the legislative expenses, will be discontinued, to wit: newspapers and postage stamps for members and officers of the General Assembly."

The Governor's message I am authorized to publish in pamphlet, in numbers to meet the requirements of the Legislature, as also all bills, rules, regulations, etc., etc.; the only exceptions made in this class of printing being memorials, petitions, speeches, and other documents having no necessary connection with the duties of legislation.

"The Denver *Tribune* Association," of this city, has been designated by me to do the printing of the Council during the present session, and will execute promptly all work which your committee, under the proper observance of the foregoing instructions, may order.

The Secretary of the Council is hereby requested to furnish this office with a certified copy of his daily journal, *weekly*, during your session, to be printed at the expense of the United States.

Prior to the receipt of the instructions first indicated respecting the printing of the reports of Territorial officers, under the conviction that the expense of their publication would be defrayed by the General Government, I had made all suitable arrangements for their issuance in pamphlet form, in advance of the session just convened, the Auditor, Treasurer, Librarian, and School Superintendent, having furnished duplicates

for that purpose, and to the end that previous embarrassments in the way of legislation, arising from the detention of these reports in the hands of committees and printers, might be removed. While the work was being done, the supplemental orders above referred to came to hand, but I directed it to be continued to completion, under the belief that the Legislature when the facts governing said action were made known, would provide for the payment of the same.

The reports, as printed, will soon be ready for distribution, and, when received at this office, will at once be transmitted for legislative approval and consideration.

I have the honor to be,

That the second section be stricken out, and the following inserted in lieu thereof:

SEC. 2. Where a party applies for change of venue on account of the prejudice of the judge, it shall be competent for the judge so challenged to set down the cause for trial, on a day fixed, not exceeding, however, ten days from the date of the application, and he may thereupon call upon one of the other judges to try said cause. Before the judge shall call upon any other judge to try such cause, he shall give to the parties or their counsel an opportunity to choose an attorney to hear said cause, and if the parties agree upon an attorney to try said cause, he shall be selected, if willing to serve.

And that the bill be further amended by adding,

SEC. 4. This act shall take effect from and after its passage.

Mr. De France moved that C. B. No. 3, together with the amendment offered, be referred to the Committee on Judiciary, and that Council Bill No. 9 be referred to the same committee with instructions to report at the earliest convenience.

A. H. DE FRANCE,
Chairman.

Mr. Bates offered the report of committee appointed under C. J. R. No. 1.

Report read.

To the Honorable Legislative Assembly of Colorado Territory:

Your committee appointed under Council Joint Resolution No. 1, approved January 16, 1872, to adjust the differences between the accounts of the Auditor and Treasurer of Colorado Territory, and to complete a settlement commenced December 26, 1871, beg leave to make the following report, to wit:

They have directed the Treasurer to credit the assay office fund, and charge the general fund, with the sum of six hundred and twenty-five (625) dollars, being the amount of warrants paid by him in the year 1870, but accounted for in the Auditor's report of 1869. The Treasurer, in opening his new set of books, had taken the Auditor's balances as correct, instead of the Treasurer's; so that, upon payment of said warrants in 1870, it made a difference between the books of

the present Auditor and Treasurer, of six hundred and twenty-five (625) dollars. This amount credited upon the Treasurer's books will make the Auditor and Treasurer agree on the assay fund accoout. Your committee have further directed the Auditor to credit the Treasurer with the sum of thirty-five hundred and eighty dollars and seventy-four cents (\$3,580.74), being the amount paid on the issue of what is known as the "Graham warrants," issued in the year 1867; and they have also directed the Auditor to charge the general revenue fund with the sum of one dollar and sixteen cents (\$1.16), difference of balance existing between the Auditor and Treasurer during the years 1868 and 1869. We have also to report that we have cancelled the warrants issued by the Treasurer during the past fiscal years of 1870 and 1871; we have also caused a copy of this settlement, together with a copy of our report of January 4th, 1872, to be entered in the books of the Auditor and Treasurer.

Respectfully submitted.

JOSEPH E. BATES,

Member of the Council;

JOHN G. RANDALL,

Member of the House of Representatives;

J. H. BATCHELLOR,

Member of the House of Representatives;

That C. B. No. 42 be amended as follows:

Strike out section five (5), and insert the following, to wit:

"No stallion, nor any Texan or Mexican bull, nor any inferior bull, ram, or boar, shall be permitted to run at large, except in the counties of Huerfano, Las Animas, Costilla, and Conejos. The owner or person having the same in charge, may be fined for each offense not less than fifty (50) dollars, nor more than two hundred (200) dollars; and it shall be lawful to castrate any such animal found running at large; provided, that if any person shall castrate such animal or animals, and it shall, on proper evidence before any competent court in said county, be proven to the satisfaction of said court that said animal was not of inferior stock, said party shall be liable for damages to the amount of triple the value of said animal so castrated, and costs of suit."

Strike out sections six (6) and seven (7).

Strike out section ten (10), and insert the following, to wit:

"Animals such as are usually branded, shall be branded on either side with the owner's brand. All county brands shall be recorded in the county where the owners reside. No evidence of ownership by brands shall be permitted in any court in this Territory, unless the brand shall have been recorded as provided in this act. There shall also be a Territorial brand for each county in this Territory, as follows: For the county of Arapahoe the letter A; for the county of Weld, the letter W; for the county of Larimer, the letter L; for the county of Boulder, the letter B; for the county of Jefferson, the letter J; for the county of Gilpin, the letter G; for the county of Clear Creek, the letter C; for the county of Summit, the letter S; for the county of Lake, the letter O; for the county of Park, the letter P; for the county of Saguache, the letter N; for the county of Conejos, the letter U; for the county of Costilla, the letter T; for the county of Huerfano, the letter H; for the county of Las Animas, the letter M; for the county of Pueblo, the letter I; for the county of Fremont, the letter F; for the county of Bent, the letter R; for the county of Greenwood, the letter K; for the county of Douglas, the letter D; for the county of El Paso, the letter E; which brand shall be placed on the shoulder of the same side upon which is placed the owner's brand; provided that nothing in this section shall be so construed as to require the branding of thoroughbred stock, or horses, or cattle, not running at large."

Strike out section eleven (11), and insert the following:

SEC. 11. Any person desiring to use any brand, shall make

and sign a certificate setting forth a fac simile and description of the brand which he desires to use, and shall file the same for record in the office of the county clerk of the county wherein he resides, who shall record the same in a book to be kept by him for that purpose, and from and after the filing of such certificate, the person filing the same, shall, within such county, have the exclusive right to use such brand for the purpose aforesaid.

Strike out section thirteen (13), and insert the following:

SEC. 13. Animals affected with contagious diseases shall be removed by the owner, or person in charge thereof, to some secure inclosure, or they shall be herded ten miles away from any farm, or other herd of cattle or sheep. Every person who shall wilfully neglect or refuse to remove diseased stock, or herd them away from any farm or other herd of cattle, shall be liable for treble the damages sustained by any person whose animals become infected by such contagious disease.

Strike out section fifteen (15) and insert the following:

SEC. 15. When the stock of any person in Colorado shall be driven off its range, against his will, by the drovers of any drove, and the same shall be found among such drove, every person engaged as drovers shall be liable to indictment as for larceny, and may be fined in any sum not exceeding one thousand dollars, and shall be liable for damages to the amount of two hundred (200) dollars for each head so driven off, together with all costs accruing on the trial of said cause, and said herd or stock shall be held liable for the same, or a sufficient number to cover all damages and costs.

Strike out section eighteen (18) and insert the following:

SEC. 18. The said probate judges shall have power, on ample notice given, to order that cattle be gathered together, or rounded-up, at such times and places as shall be convenient and desirable to the stock-owners within the county, and under such rules and regulations as the said judge shall provide, and under his care and supervision; provided that said round-ups shall not occur oftener than twice in each year.

And that with the amendments it do pass; and that it be ordered engrossed as amended, for the third reading.

That H. B. No. 1 be referred to Committee on Agriculture and Stock-growing.

That C. B. No. 38 be referred to the Committee on Judiciary.

Respectfully,

N. P. HILL,
Chairman.

Special order for 10:30 A. M., C. B. No. 11.

The Special Committee on C. B. No. 11 reported the following amendments:

Mr. President:

Your Special Committee appointed to consider Council Bill No. 11, beg leave to report that they have had the same under consideration and respectfully offer the following amendments for the consideration of the Council:

That section one (1) of said bill be amended so as to read as follows:

SEC. 1. There shall be levied and assessed by the Territorial, County, and Municipal authorities in this Territory upon all bank stock or stock in any moneyed corporation, of loan or discount, on each share thereof owned by any individual, body corporate, corporation, or society, a sum equal to but not greater in proportion to the value thereof than is levied and assessed upon other moneyed capital or personal property in

the hands of or owned by individuals in this Territory:

That section two (2) be amended to read as follows, to wit:

SEC. 2. All the bank stock or shares held and owned by any individual, body corporate, corporation, or society in what are known as National banks, or Banking associations organized and doing business under the act of Congress entitled an "Act to provide a National currency secured by a pledge of United States bonds, and to provide for the circulation and redemption thereof, approved June 3d, 1864," shall be included in the valuation of the personal property and effects of every such individual, body corporate, corporation, or society in the levy and assessment of taxes, in the County, City, or Town where such Banking association or Bank is located and not elsewhere, whether such holder or owner thereof reside in such County, City, Town, or not; and it shall be lawful for the Territorial, County, Town, and Municipal authorities to levy and assess upon such stock or each share thereof owned by any such individual, body corporate, corporation, or society, a sum equal to but not greater according to the value thereof, than is levied and assessed upon other moneyed capital or personal property in the hands of individual citizens in this Territory, *Provided*, that the tax so imposed under this act upon the value of shares of said National banks does not exceed the rate imposed upon the value of the shares in any of the Banks or Banking associations organized under the authority of this Territory, *Provided* also, that nothing in this act shall exempt the real estate of such Banking associations from either Territorial, County, or Municipal taxes to the same extent, according to the value, as other real estate is taxed:

That section three (3) shall read as follows to wit:

SEC. 3. The Cashier of the bank whose stock or shares are taxed, shall when the tax so assessed is due, pay to the collector thereof of the authorities so levying and assessing such tax, the amount of tax due on all the stock or shares of the shareholders of such bank:

If such tax be not paid the bank shall be liable for the same with interest thereon at the rate of twenty-five (25) per cent. per annum, from the time such tax shall become delinquent until paid:

That section four (4) shall read as follows, to wit:

SEC. 4. In case such bank shall neglect or refuse to pay such tax or interest if any has accrued, it shall be lawful for the collector of any County, City, or Town to which such tax is due, to sue in his own name for the use of such County, City, or Town, such bank in any court of this Territory having jurisdiction of the amount claimed in an action of

debt for the same, and if judgment is recovered against the banks in any such suit, said bank shall pay the cost. The prosecuting officer of any County, City, or Town shall prosecute such case upon the request of the collector thereof. Any judgment rendered in this class of cases, shall have the same force and effect as a judgment rendered in such actions between individuals:

That section five (5) shall read as follows, to wit:

SEC. 5. *And be it further enacted*, that the provisions of this act, shall apply to stock in all other corporations doing business within this Territory, whether the same be organized under the laws of this Territory, or any other State or Territory in the United States, or in any foreign country.

That House Bill No. 39 do pass.

J. MARSHALL PAUL,

Chairman

Committee on Agriculture reported.

Committee on Highways and Bridges reported as follows:

Your Committee to whom was referred C. B. No. 80, also a petition relating to the same, beg leave to report that they have had the same under consideration and find upon examina-

tion of the various petitions, that a majority of citizens interested in said road are opposed to the passage of such a bill, and in view of the above facts, it is our opinion that said bill should not become a law.

JOSE VICTOR GARCIA,
J. MARSHALL PAUL,
Committee.

And the report was adopted.

The Special Committee on C. B. No. 71 reported as follows:

Mr. President:

Your Special Committee to whom was referred C. B. No. 71 would respectfully submit the following report, to wit:

That as shown by the printed laws, and the enrolled bill now on file in the office of the Secretary of Colorado, of the Legislature of Colorado at its fourth session, an act was passed "to incorporate the Trinidad and Bataan Mountain Wagon Road Company." The bill providing for said act was a House Bill and was numbered thirty-eight (38) as appears by the Journal of the House of that session. It also appears by said Journal that there were different bills of that number introduced in the House at that session. And while it does not appear from said Journal that the said bill entitled as above, was passed by the House, yet it does appear thereby that the same was enrolled and signed by the then acting Governor.

From the Council Journal of that session, it appears that the said bill was defeated in the Council; and it further appears from the said Journals that some mistake was made in reference to the same, a communication having been sent to the House from the Council, requesting that House Bill No. 38 be sent back to the Council for the reason that it had been transmitted to the House by mistake.

Your committee therefore ask permission to return this bill to the Council without recommendation, and to be discharged from a further consideration of the same as a committee.

JESUS MARIA GARCIA,
A. H. DE FRANCE,
M. W. STEWART,
Committee.

And the report was adopted.

Committee on C. B. No. 20 offered Majority and Minority reports as follows:

Mr. President:

Your committee to whom was referred C. B. No. 20 respectfully report the same back to the Council, Mr. De France dissenting, with the recommendation that it do pass.

N. P. HILL,
ED. C. PARMELEE,
Committee.

Minority report.

Mr. President:

The undersigned, one of the Committee to whom was referred C. B. No. 20 would respectfully submit the following Minority report:

The bill referred to your committee, contains two (2) propositions: first, to amend the Election laws; secondly, to repeal the Registry law, and reads as follows:

*An act amendatory of the Election Laws, and to repeal the
Registry Law.*

*Be it enacted by the Council and House of Representatives of
Colorado Territory.*

SEC. 1. No person shall be allowed to vote at any general or special election in this Territory who is not known to the judges of said election to be a legal voter in the precinct in which he offers to vote, unless the person offering to vote shall first make oath, which oath may be administered by either one of said judges, that he has been a resident of this Territory for six months last preceding such election, and of the precinct or ward ten days previous thereto, and that he is entitled to vote at such election, and shall prove by the oath of one or more persons known to such judges to be legal voters of such precinct, that he is a resident of said precinct or ward, and has been for ten days previous to the day of election, which oath may be likewise administered by either one of said judges; and if either of said oaths shall be false, the person making the same shall be deemed guilty of a misdemeanor, and upon conviction thereof, shall be punished by a fine of not less than one hundred dollars nor greater than five hundred dollars, or by imprisonment in the county jail of three months, or by both such fine and imprisonment.

SEC. 2. All that part of chapter twenty-eight of the Revised

Statutes of Colorado, between sections sixty-three and eighty-four of said chapter, entitled "An act to create and establish a Board of Registry of Electors," approved January 10, 1868, and known as the Registry Law, is hereby repealed, but the repeal hereof shall not be construed so as to revive section twenty-four of said chapter.

SEC. 3. This act shall take effect from and after its passage.

The first section of this bill should in the opinion of the undersigned, if enacted as law, effect everything which the Registry Law now effects. And with the repeal of the said Registry Law, would relieve the people of this Territory of a great burden, trouble and expense unnecessarily imposed upon them. At a fair and reasonable estimate, each general election held in this Territory costs the people for the registration of electors alone, not less than ten thousand dollars, and the Registry Law provides for a much greater expense should the Registry Board continue in session the whole number of days they are allowed to sit under said law. The cost or expense of this system, would not of itself be an objection thereto sufficient to warrant its repeal, if it could be satisfactorily demonstrated, that corresponding advantages flowed therefrom; but in the absence of such proof, it is certainly a serious objection, and one worthy of the due consideration of this honorable body; and especially when the amendment proposed by this bill to the Election Law, as is contemplated thereby, would without doubt, produce all the beneficial results, if any, which can reasonably be claimed for the said Registry law.

But this is not the only objectionable feature in the Registry law.

The experience of mankind is that too much legislation is worse than no legislation; that the fewer and simpler our laws, the more beneficent the results. A plain, simple Election law, containing the necessary provisions to prevent fraudulent and illegal voting, is much better and more preferable than the complicated system of registration in connection therewith.

If a Registry law does any good at all in any place, it is only in large cities where the system of "repeating" is resorted to by unscrupulous voters. In sparsely settled communities where the people are generally known to one another, this practice cannot be carried on without detection. But our present Registry law is very imperfect and would not of itself prevent any such fraud, for any elector can exercise the elective franchise under the same, whether registered or not. It is also prolific of great evil owing to its complication; the same is not complied with in a majority of cases by the Regis-

try Board ; hence contests arise in elections and the choice and will of the people fairly and without fraud expressed, are often, by reason of some informalities, defeated. The voters of one or more precincts, are, by reason of carelessness or ignorance, in those who are appointed to execute the law, completely disfranchised, and for no fault of their own. This is unjust and against the general spirit and fairness of American institutions. But without attempting to enumerate the many objections that might be urged to said law, the minority submits that those mentioned are ample and sufficient to warrant the passage of this bill, and therefore recommends such action by the Council.

A. H. DE FRANCE,
Chairman.

Mr. De France moved the adoption of the minority report.

Lost by the following vote:

Yeas—Messrs. De France, J. M. Garcia, Stewart, Stover, and Suasso—5.

Nays—Messrs. Bates, Gallup, J. V. Garcia, Hill, Parmelee, Paul, Wisebart and Mr. President—8.

Majority report was adopted by the following vote:

Yeas—Messrs. Bates, Gallup, J. V. Garcia, Hill, Parmelee, Paul, Wisebart and Mr. President—8.

Nays—Messrs. De France, J. M. Garcia, Stewart, Stover and Suasso—5.

On motion of Mr. De France, under suspension of the rules, C. B. No. 20 was taken up, read the third time and put on its passage.

Lost by the following vote:

Yeas—Messrs. De France, J. M. Garcia, and Stewart—3.

Nays—Messrs. Bates, Gallup, J. V. Garcia, Hill, Parmelee, Paul, Stewart, Wisebart and Mr. President—9.

Absent—Mr. Suasso.

The following report was presented and adopted :

Mr. President :

Your committee to whom was referred C. B. No. 72, offer the following amendment, viz :

After the words "that the sum of " in line one (1) of section one (1), insert the words "five hundred;" also in line nine (9) of section one (1), after the words "said sum of" insert the words "five hundred."

And with these amendments, Mr. Stover dissenting, recommend that the bill do pass.

N. P. HILL,
J. E. BATES,
Committee.

Minority report of the Finance Committee to whom was referred C. B. No. 63.

Mr. President:

The minority of the Committee on Finance to whom was referred C. B. No. 63, beg leave to make the following report:

That it appears to be the intention of this present Legislature to make such appropriations as may be deemed reasonable and just, and more especially when the appropriation asked for goes directly to the Territory. Such appears to be the case in C. B. No. 63. It is purely a Territorial institution and there is no chance for the Territory to lose anything by making such an appropriation. The bill merely asks for an appropriation to purchase a sufficient amount of lands necessary for said Agricultural College of Colorado. At the last session of the Legislature an act was passed (laws of A. D. eighteen hundred seventy (1870), page one hundred fifty-eight (158) providing for the establishment and location of an Agricultural College of Colorado. Said College has been located near Fort Collins in Larimer county as provided for in said act, (see report of Superintendent of Public Instruction for A. D. 1871, page 119) and as said College has never had nor asked for any appropriation heretofore, and as the citizens in the vicinity of Fort Collins have already made a warranty deed for fifty acres of land and title bonds for one hundred and sixty (160) acres more, making in all, two hundred and ten (210) acres belonging to said Agricultural College, and as this appropriation asked for is to purchase additional lands for the site, which lands are advancing at least at the rate of thirty (30) per cent. per annum, thereby making the appropriation not only a judicious one, but a paying investment for the Territory, should this Territory desire at any future time to dispose of the lands so purchased for the Agricultural College. In view of the above facts, your Minority beg leave to report the same back to the House with the recommendation that it do pass.

W. C. STOVER,

Chairman.

REPORT

OF THE

TERRITORIAL TREASURER,

FOR THE YEARS 1870 AND 1871.

TREASURY DEPARTMENT, COLORADO TERRITORY, }
Treasurer's Office, Dec. 31, 1871. }

To the Legislative Assembly of Colorado Territory :

GENTLEMEN: In compliance with the law defining the duties of Territorial Treasurer, I have the honor to submit for your consideration the accompanying report of the receipts and disbursements of the Treasury Department, for the years 1870 and 1871.

		122,987 77

The statements hereto appended will give a detailed account of the receipts, expenditures, and balances of the several funds.

I would respectfully call the attention of the Legislature to the fact that this office is without furniture of any description. No desk in which to file away any papers or correspondence; no safe in which to keep the books of the office or warrants paid by the Treasurer. The accumulation of books and papers from year to year requires that a safe should be provided for the use of the Treasurer. My predecessor turned over all of the effects of the office to me as follows: One letter-press, one holder and brush, and a paper box of letters, documents, &c., I respectfully ask of the Legislature to make an appropriation sufficient to cover the wants of the office in these particulars.

Very respectfully, your ob't servant,

GEO. T. CLARK, *Ter. Treasurer.*

APPENDIX B.

REPORT OF THE
TERRITORIAL AUDITOR.
FOR THE YEARS 1871 AND 1872.

TREASURY DEPARTMENT, COLORADO,)
Auditor's Office, January 1, 1872. }

To the Legislative Assembly of Colorado Territory:

GENTLEMEN: I have the honor to lay before you my report showing the receipts and disbursements of the Treasury Department for the past two years, and exhibiting the present condition of the finances, resources and revenues, of the Territory.

- You will find embraced in this report the following items:
- First,* A general statement of the condition of the Treasury at this date.
 - Second,* A statement showing the amount expended under each appropriation, and the amount remaining to the credit of each fund.
 - Third,* A general statement of the sources from which revenue has been derived.
 - Fourth,* A statement showing the amount of revenue charged to each county at this date.
 - Fifth,* A statement of the total receipts and disbursement of the Treasury, since the organization of the Territory.
 - Sixth,* A summary of the assessments, by counties, for Territorial purposes for the years 1870 and 1871.
 - Seventh,* Copies of abstracts of assessments as corrected by County Boards of Equalization, and returned to this office by County Clerks, showing amount and nature of taxable property in each county.
 - Eighth,* An estimate of the revenue and expenditures for the two succeeding fiscal years, and the probable amount of revenue derivable from the various sources.

In this report, the transactions of the Treasury Department for the past two years are combined.

No action having been taken by the proper authorities, at the close of the fiscal year intervening sessions of the Legislative Assembly, either toward examining the accounts and official proceedings of the Auditor, or for printing abstracts of his report for that year, I have not deemed it advisable to make a separate exhibit for 1870. The immediate result is a gain to the Treasury, of the amount appropriated for payment of examiners and printers; and the examining committee appointed by the Hon. Secretary of the Territory, will be able to determine whether or not this dereliction has proved detrimental to the financial interests of the Territory.

DISCREPANCY BETWEEN THE BOOKS OF THE TREASURER AND AUDITOR.

By comparing the general "Balance Sheets" of the Treasurer and Auditor, it will be seen that a difference exists of four thousand, two hundred and six dollars and ninety cents, (\$4,206 90) the Auditor's books showing the Treasurer's balance to be the above amount, in excess of the actual amount of cash on hand.

The history of this discrepancy, has been given at length by my predecessor, so far as relates to the sum of thirty-five hundred and eighty dollars and seventy-four cents, (\$3,580 74) and the Governor, in his address to the Eight Legislative Assembly, called attention to the facts, asking the appointment of a Legislative commission, whose duty it should be to adjust this difference

No action was taken on the subject, and, without entering into further detail, I respectfully submit herewith, a tabular statement, which will enable your Honorable Body to understand, at a glance, the present status of this matter; and I trust that your wisdom will devise, and the Finance committee execute, some plan whereby a settlement of the disparity may be effected.

TRANSFER OF FUNDS.

The books of this office show unexpended balances in the funds below enumerated, which only tend to produce confusion in the management of this department; and as simplicity is a desideratum in the keeping of accounts, I would suggest that the Auditor be authorized and required, during the coming year, to transfer the following sums (remaining to the credit of the various funds) from those funds to the general fund; and that when such transfer shall have been made, the Auditor shall certify the same to the Territorial Treasurer, who shall enter the same on the books of his office, viz:

TERRITORIAL BOARD OF EQUALIZATION.

The Statutes provide that this Board shall meet at the office of the Secretary, at the Capital, on the third Monday of July in each year, for the purpose of equalizing the rate of assessment in the different counties.

In compliance with this provision the Board convened in 1870, on the day appointed by law, at which period four (4) abstracts of assessment had been received. An adjournment was made to July 22nd, when fifteen abstracts were on file, whereupon the Board again adjourned to meet July 30th. On the date last mentioned, a quorum being present, and three (3) abstracts being absent, it was determined to adjourn *sine die*. The same, or similar, proceedings were gone through with this year. Eight (8) abstracts reached the Auditor's office on time, the remainder failed to connect. The last of the series did not arrive until September 16th.

As the experience of past years has shown that it is impossible for the proper county officers to make these returns at the time now required by law, I would suggest that the Legislature grant an extension of time for the accommodation of these officials.

WAGON ROAD FUND.

The last Legislative Assembly, by an act entitled "An act for the relief of the Counties of Clear Creek, Summit, Park, Lake, and El Paso," appropriated certain sums of Money, amounting in the aggregate to forty-seven hundred dollars, (\$4,700) to be used in the said counties, for the construction of certain roads and bridges, specified in the act referred to (pp 53, 54, 55, Laws of 1870); and the respective boards of county commissioners are thereby required to report the expenditures of said sums of money to the Auditor. I presume that the intent of the enactment was to require a detailed statement of expenditure, accompanied by the proper vouchers. I have endeavored to obtain such statements, but for want of time to visit the various localities and investigate the internal improvements contemplated, I am compelled to offer for your information, the scanty data vouchsafed by the Commissioners of Park, Lake, and El Paso Counties, together with a communication from the Superintendent of construction of the Georgetown and Snake River Wagon Road.

PRESERVATION OF OFFICIAL RECORDS.

On assuming possession of this office, I found that no provision was made for the preservation of books, vouchers and official correspondence, beyond the security afforded by a pine desk. As soon as the state of the Treasury would allow of the necessary draft upon it, I ordered a fire and burglar proof safe for the purpose, paying for it by warrant drawn on the general contingent fund. I would respectfully ask your approval of this expenditure.

MILITARY SERVICE FUND.

I have the honor to call your attention to the accompanying report of the Commissioner appointed by act of the Legislative Assembly, approved January 10th, 1868, pp 474-5, R. S. "to receive any moneys due the Territory of Colorado from the Government of the United States, for military service"; and to inform you that in compliance with the statutes, I have settled with the said Commissioner; and hold the receipt of the Treasurer of the Territory for the balance unexpended July 23d. 1870, five thousand nine hundred and seventy-seven dollars and forty-two cents, (\$5,977 42) for the disposition of which you are referred to the proper statement.

TERRITORIAL PENITENTIARY.

By act of Congress, approved January 10th, 1871: "The Penitentiary which has been, or may hereafter be, erected by the United States in any organized Territory thereof, shall, when the same is ready for the reception of convicts, be placed under the care and control of the Marshal of the United States, for the Territory or District in which such Penitentiary may be situated." By the second section of the same act, it is made the duty of the "Attorney General of the United States, to prescribe all needful rules and regulations for the government of such Penitentiary." In accordance with the latter provision, the Attorney General of the United States, under date of March 31st, 1871, ordered the United States Marshal for this Territory, to contract with the proper Territorial authorities for the clothing and maintenance of, and medical attendance on, convicts confined in said institution, at the rate of *seven dollars per week* each.

The local act relating to this matter (approved Feb. 11th, 1870,) appoints the Governor, Auditor, and District Attorney of the third judicial district, commissioners on the part of the Territory, with power to contract with the Government of the United States, or any person thereunto authorized, for maintaining, guarding and clothing, prisoners lodged or confined in said Penitentiary. Without quoting further from the act referred to, I would state, for your information, that a contract was made June 1st 1871, according to the terms dictated by the general Government, by and between the Commissioners above named, on behalf of the Territory; and the United States, represented by the United States Marshal: I respectfully refer you to section 9 of the act entitled "An act relating to the Penitentiary and Persons convicted of crimes, and to provide therefor;" and, also, to section 12, article 4, chapter 9, R. S. from which it will be observed that the Legislative Assembly omitted to appropriate any money for liquidating the claims arising under the contract authorized by them, and consequently, no warrants could legitimately be drawn in payment of the accounts presented to the Auditor.

Certificates have been issued under the seal of this office, showing that these claims are correct and just, and the original bills are herewith referred to your Honorable Body, with the suggestion that they be allowed, and that an appropriation be made sufficient to cover this indebtedness and the expenses of the Penitentiary for the next two years, according to the estimate appended.

ASSAY OFFICE.

The expense to the Territory of maintaining this institution for the last two years, as compared with the cost for a like period, ending December 31st, 1869, has been reduced eleven hundred and eighty-four dollars and eighty-nine cents, (\$1-184 89.) You are referred to the exhaustive report of the Territorial Assayer for the necessary statistics, and your consideration of his forcible arguments and valuable suggestions is solicited.

I think there is no need of further argument to show the expediency of continuing this office, as an adjunct to the mining interests of the Territory.

DEFAULTING TREASURERS.

Previous to the time at which the appointments of the present incumbents in the offices of Auditor and Treasurer were made, it was known that the former Treasurer was a defaulter to the Territory to a large amount, the exact sum not having been definitely ascertained at the date on which I assumed the duties of this office. After much solicitation I obtained from the Board of County Commissioners of Gilpin County a statement, properly certified, showing that the said Treasurer withheld, on May 28, 1870, the sum of eleven thousand five hundred and twenty-five dollars and fifty-nine cents (\$11,525 59,) justly due the Territory.

Under the authority vested in me by law, I thereupon directed him to pay into the hands of Geo. T. Clark, then Territorial Treasurer, the said sum of \$11,525 69 so withheld; and upon his failure to comply with this demand, within the time allowed by law, suit was instituted by my direction, in the District Court of the Second Judicial District, sitting in Gilpin County, for the recovery of the amount.

This suit is still pending, and I trust it may be brought to an issue favorable to the public finances, at the next Court term.

DELINQUENT TAXES.

I would especially commend to the thoughtful consideration of the Legislative Assembly, the condition of the accounts of the several counties with the Territory, as shown in the statement accompanying this report; and I would ask that some legislation be had to the end the Auditor's books may be cleared of a mass of charges, under the above caption, that amount to nothing. I do not suppose it possible for county treasurers in this Territory, to collect taxes on personal property strictly according to the levy, for many reasons, chief among which are, the transferable and destructible nature of that species of property, and the nomadic nature of a large class of our citizens. Personal knowledge has satisfied me that a large prortion of this delinquency is unavailable. It seems to me that the oath of the county treasurer, and the certificates of county commissioners to this effect filed with the Auditor, should be considered evidence sufficient to warrant him in cancelling these useless debits.

The able report of the late Auditor contained forms of oath and certificates of this nature, submitted for the Legislative approval, which are so pertinent that I have taken the liberty of reproducing them as indices to my meaniug :

USE OF THE MILITARY POLL TAX FUND.

In answer to numerous inquiries propounded by tax-payers, as to the levy of the above tax, and the use to be made of the same, I would refer to the following provisions of the "Militia Law" of this Territory (to be found on pages 462 and 463, Revised Statutes):

"ARTICLE VI. MILITARY FUND—COMPENSATION.

SECTION 1. For the purpose of carrying into effect the provisions of this chapter, and for creating a territorial military fund, an annual poll-tax of fifty cents shall be and is hereby levied upon each male inhabitant of the Territory, of the age of twenty-one years and upward, to be known as the military poll-tax. which shall be assessed and collected in the same manner and at the same time as is now, or may be, prescribed by law, for the assessment and collection of Territorial poll-taxes.

* * * * *

SEC. 3. The fund so created shall be applied exclusively for military purposes, for the benefit of the militia, and for fitting out and paying the expenses of Territorial defence, and no

money shall be paid by the county treasurer from such fund, but upon the joint order of the senior officer of each regiment in said county, or if there is no regimental organization in such county, then upon the joint order of the senior officer of each company, countersigned by the brigadier-general commanding the brigade district, and if there be none of the above-named, then by the chairman of the board of commissioners of said county, or upon order of the military board.

SEC. 4. It shall be the duty of the county treasurer in the several counties, to preserve the county military fund, as provided by this chapter, a separate fund, and after paying the company and regimental expenses of the county, as hereinbefore provided, to transmit the balance, annually, to the treasurer of the Territory, along with the Territorial taxes, and the Territorial Treasurer shall keep the same as a Territorial military fund, to be at the disposal of the military board or officers, as provided in section three of this article."

By act of the Eighth Legislative Assembly, (approved February the 11th, 1870, p 44, Laws of 1870,) the Auditor is authorized to draw his warrant on the Treasurer paying from this fund, on the certificate of the proper officers or commissioners, instead of those officers or commissioners drawing directly upon the Territorial Treasurer as under the former statute.

DISTRICT ATTORNEY OF THE THIRD JUDICIAL DISTRICT.

A subject that will probably come before your honorable body for investigation, is the case of Marmaduke Green, late District Attorney of the Third Judicial District, who was chosen to that office in September, 1870, and entered upon his duties November 1, 1870. For the time intervening that date and December 20, 1870, I have issued a warrant for his services, for which a voucher, properly perfected, is on file in this office. Since that time, for some reason unknown to me, the certificate of the Judge rendered necessary by the law, has been withheld; and I have therefore refused to audit the claim of Mr. Green for services from December 10, 1870, to November 17, 1871, the date of his resignation.

CONCLUSION.

I think that the present condition of the Territorial finances should be a source of gratification to every citizen; and the prospect of a diminution of the rate of taxation during the next two years, as a result of this situation, is a consummation at once desirable and probable.

There is no debt hanging over us as a commonwealth, and the resources from whence the revenue is derived are more than sufficient to meet all necessary existing expenses, or any that may with judicious legislation arise.

Our Revenue Law, though defective in some respects, is a good as the average; and I have restricted my recommendations for change therein, because I think that a bad system properly understood and enforced, is better than one ever so good whose provisions are rendered unintelligible to the officers whose province it is to enforce them, by interminable and innumerable acts amendatory. In this connection I desire to compliment the majority of county officers with whom I have had to deal during my term of office, for their efficiency as well as for the exhibition of courtesy and promptness in official communications. I believe that no instance of culpable neglect has occurred except in the matter of returning to the Auditor the duplicate receipts issued by the Territorial Treasurer for revenue from counties. This failure on the part of county treasurers is perhaps the result of ignorance merely, and to such officers I would suggest the propriety of carefully reading that portion of the statute furnished by the Secretary, which pertains to their duties.

Regarding a report of this nature as a compendium of statements and suggestions, which should be as concise and laconic as is consistent with a clear understanding of the affairs of the Treasury Department, I respectfully submit the foregoing to the Legislative Assembly.

The Governor appeared and was presented to the Convention.

Reading of the message by the Governor.

Gentlemen of the Legislative Assembly of the Territory of Colorado:

It becomes my duty to lay before you the condition of Territorial affairs, and suggest needed legislation.

FINANCES.

The reports of the Auditor and Treasurer, which are herewith transmitted, will show you the financial condition of our Territory:

Balance in treasury January 1st, 1872.....	\$ 50,897 4-
Receipts from all sources during the year 1872.....	63,280 55

	\$51,672 89	
Balance in treasury January 1st, 1873.....		\$ 51,286 93
Receipts from all sources during the year 1873.....		9,004 32
		<hr/>
		\$60,291 25
Total disbursements for the year 1873.....		\$43,189 95
Balance in treasury January 1st, 1874.....		18,172 29
Auditor's balance, January 1st, 1874.....	\$17,182 79	
Warrants outstanding.....	989 50	
	<hr/>	
	\$18,172 29	

Notwithstanding there was no levy of tax for the year 1872, and that the tax for 1873 is largely yet uncollected, the reports show an absence of all in debtedness; a decrease of expenditures for the year 1873, as compared with the expenditures of 1872, of \$19,315 13; and a balance in the treasury of \$18,172 29.

These general facts indicate a faithful and economical administration of Territorial finances which, I think, an examination of the reports in detail will confirm, and in which I am certain both you and those you represent can not fail to find great satisfaction.

It is impossible for the Executive to lay before the Legislature the condition of public affairs in a satisfactory manner without a thorough examination of reports of Territorial officials. As the law now stands, the incoming of these reports, and the assembling of the Legislature coincide, leaving time only for a hasty and partial examination. I would, therefore, recommend that the end of the fiscal year be fixed at an earlier date, so as to avoid this difficulty.

The too generally accepted proposition that Territorial and County officers, having given the required bonds for the safe keeping of the public funds, may rightfully loan, or otherwise use them, for personal profit, is radically wrong. The salary of these officers should be sufficiently liberal to compensate them fully for the faithful performance of the duties of their respective offices, and any loan, or other personal use, of the public funds, should be made a penal offense. The law respecting the annual examination and settlement of the accounts of the Auditor and Treasurer should be so amended as to distinctly require the Examining Board to report the amount of cash actually on hand in the treasury and its correspondence or otherwise with the balance shown by the account stated.

IMMIGRATION.

I submit also the report of the Board of Immigration, containing an account of the work done and money expended in this behalf. The report shows a faithful and judicious expenditure of the money appropriated at the last session of the Legislature, and the results have been such as to recommend that a like sum be placed at their disposal for the coming year.

There is every reason to believe that the publications respecting the resources of our Territory, prepared and distributed by the Board, throughout our own and foreign countries, have added largely to our rapidly increasing population, and amply repaid the money expended.

PENITENTIARY.

By a law of Congress, approved January 24th, 1873, it was provided that the care and custody of the penitentiary erected by the general government, at Cañon City, should be transferred to the Territory. As there was no fund at the command of the Executive with which to meet the current expenses of the institution, my predecessor declined to receive it, and it consequently still remains under federal control until such time as the Legislature shall make provision for its reception and management. In the meantime it became necessary to renew the contract for "feeding, maintaining, guarding and clothing" Territorial prisoners under the provisions of the act of February the 11th, 1870, which was accordingly done.

An appropriation should be made to meet this exigency, and a law passed providing for a full and complete system of prison discipline and government. The present building is by no means adequate to the demand. Our county jails are crowded with convicts who should be in the penitentiary, already occupied to its full capacity. This is not ascribable to any disproportionate number of criminals in our community, but to the fact that the accommodations of both the penitentiary and county jails are but limited. An effort should be made to secure an appropriation from Congress for the enlargement of this building.

The matter of prison management and discipline will present a work of no small difficulty and importance. I need not remind you that the earlier history of similar institutions in other States, as a rule, is one of great expense annually recurring and increasing. It will be your duty to protect our Territory from a similar experience. The cost of keeping Territorial prisoners

in the penitentiary for the years 1872 and 1873 was \$28,981. While the State should not make merchandise of crime, or look to its prisons as sources of revenue, I submit that the labor of the convict should be made to defray the expenses of his prosecution, custody, and keeping. Upon this basis many of the older States have succeeded in making their penitentiaries self-sustaining; the labor of the prisoners in some instances, not only meeting all expenses, but yielding an annual surplus. With the successful systems adopted by other States as guides, failure to place our penitentiary on a sound financial footing will be difficult either to explain or excuse.

While the law of imprisonment has for its primary object the protection of society, by the restraint of the prisoner from further violations of law, and his punishment, that others may be deterred from like crimes, the advances of civilization and the teachings of humanity are fast introducing into the prison systems of enlightened nations, a discipline looking to the reform of the prisoner, and his ultimate restoration to society a penitent and better man. The possibility of rescuing prisons from their character as "colleges for crime" and making them schools of reform, has for the last half century interested the statesmanship as well as the philanthropy of all civilized nations, not so much as a matter of sympathy with the criminal, but as a problem affecting the highest interests of society. At first received by the public with discouraging incredulity, the proposition has steadily gained in public estimation, as practical efforts in that direction from year to year have yielded results, which, if not all that were desired or hoped for, are of sufficient importance to encourage the effort and invite the care of the State. Whatever features you may be able to introduce into your prison discipline, looking to the reformation of criminals, will be in harmony with the advanced spirit of the age, and run parallel with the best interests of society and the State.

MILITIA.

An examination of the very able and full report of the Adjutant General of Militia, will show you that this department of Territorial affairs is by no means in a creditable, or satisfactory condition. This is traceable to many causes very fully and clearly set forth in the report. With only fifty serviceable guns at its command, and a few boxes of cartridges, only one out of five of which will explode, the military establishment of Colorado can hardly be regarded as on a war footing. The experience of the last year shows that it is of

the first importance that there should be a number of well organized militia companies in different parts of the Territory. upon which the Executive can call at a moment's notice to meet the contingencies of Indian incursions, riots, and other disturbances of the peace. The difficulty which lies in the way of such organization is want of arms and munitions.

In this behalf I recommend: First, that more efficient provision be made for the levy and collection of the military poll tax, heretofore greatly neglected; and, second, that Congress be memorialized to remit our overdraft for arms and munitions under the Act of 1808, now amounting to about \$18,000.

By reference to the report of the Secretary of War for 1873, you will find that such a memorial would be in harmony with the views of that department, and ought to secure the favorable action of Congress.

I also recommend that provision be made for a full and accurate record, and history of Colorado regiments, and their services.

Justice to over twenty-four hundred brave men, as well as a proper State pride in the record they made on the battlefield, alike demand it.

Our military records are incomplete to a degree that works frequent hardship and injustice. Soldiers are unable to secure a certificate of service, by reason of an absence of all data upon which to issue it, and many are thus unable to avail themselves of the liberal provisions of the Acts of Congress concerning pensions, bounties, and soldiers' homesteads.

INDIAN AFFAIRS.

During the last summer, a treaty was negotiated by Mr. Brunot, of the Indian Commission, with the several bands of the Ute nation, for a portion of their reservation. The boundaries are as follows, viz: "Beginning at a point on the eastern boundary of said reservation, fifteen miles due north of the southern boundary of the Territory of Colorado, and running thence west on a line parallel to the said southern boundary, to a point on said line, twenty miles due east of the western boundary of Colorado Territory, thence north by a line parallel with the western boundary, to a point ten miles north of the point where said line intersects the 38th parallel of north latitude; thence east to the eastern boundary of the Ute reservation, and thence south along said boundary to the place of beginning. *Provided*, that if any part of the Uncompagne Park shall be found to extend south of the north line of said

described country, the same is not intended to be included therein, and is hereby reserved and retained as a portion of the Ute Reservation."

The lands thus treated for, embrace about 3,000,000 acres, and include the San Juan mining region. The treaty, if ratified by the Senate, opens to the enterprise and industry of our citizens, an extensive mining country that gives evidence of a marvelous, and inexhaustible supply of the precious metals. It also allays the disquiet of the Indians, which had been, to some extent, excited by the occupancy of the country by the whites in advance of the treaty, and averts the threatened disturbance of the peace, which has always so creditably characterized our relations with the Ute nation.

The late orders issued by the Indian Bureau, indicate a renewed determination upon the part of the general government to confine the Indians to the limits of their reservations. A policy, which, if persistently adhered to and strictly enforced, will strengthen the guarantees of peace, and relieve our people from much harrassment and annoyance.

The Indian incursions, which so long and so cruelly disturbed the peace, and oppressed the prosperity of our Territory, have comparatively ceased. During the last autumn, a band of about two hundred Cheyennes and Kiowas made an incursion into the southeastern portion of the Territory, and committed many depredations upon the stock and farms in that region. Over one hundred head of cattle were killed, herds were scattered, and the sense of security destroyed among our frontier settlers. Although professedly peaceable, I am satisfied but for the prompt and close pursuit of a volunteer company of our citizens, under the command of Mr. John Hittson, reinforced by troops under command of Col. Oaks, of the Sixth U. S. Cavalry, more extended and serious depredations would have been committed.

Subsequently, with a view of effectually providing against any repetition of these outrages, I proceeded to Leavenworth, and held a personal conference with General Pope, the commander of this department. I was assured, that in the early spring, troops would be stationed at different points on our exposed frontier, so as to cover and effectually protect our outlying settlements, and I have every confidence in both the ability, and earnest desire of the commander of our department, to afford us complete and ample protection from further *friendly* visits of this character. I am glad to believe that the chapter which tells the story of Indian depredations in our Territory is closed, finally and forever. If so, it is matter for sincerest congratulation and profoundest gratitude.

SCHOOLS.

In August last, W. C. Lothrop, Esq., to whom the educational interests of the Territory owe much for faithful and efficient labor as Superintendent of Public Instruction, resigned that position, and I appointed in his stead, for the unexpired term, Professor H. M. Hale, of Gilpin County, who came highly recommended as an educator of ability and experience.

The progress that our Territory has made in matters of education, is both creditable and encouraging :

Number of school districts in the Territory.....	243
Number of schools.....	180
Number of school population.....	15,509
Number in daily attendance.....	7,456
Amount paid teachers for the year 1873.....	\$71,258 28
Value of school property	\$260,183 46
Total school fund (exclusive of proceeds of bonds)..	\$137,557 61

The percentage of increase during the years 1872 and 1873, is as follows :

Schools have increased.....	50 per cent.
School districts increased.....	52 “
School houses increased.....	56 “
School population increased.....	100 “
School attendance increased.....	59 “
Value of school property increased.....	216 “

The report of the Superintendent, which I herewith submit, suggests many valuable amendments to our present school law, to which I call your attention.

It is of importance that the Superintendent should visit the schools in the several counties of the Territory, with a view of looking into their condition, and placing them on a basis of increased efficiency and usefulness. For this reason his compensation should be increased, so as to cover his necessary expenses. Towns and cities now divided into two or more districts, should constitute but one, under the management of one Board of Directors. One-half of the Directors should be elected annually, the other half holding over, thereby securing to each board the service of experienced members.

Upon the subject of education, so much has been said and written, and so often repeated, that vital truths underlying the subject have lost much of their original force and emphasis. It is none the less a duty, however, to urge them again and again, until educational theory and practice shall fully respond to social and political demands. Looking at it exclusively from the standpoint of political economy, the first interests of

the State and society are closely interwoven with the subject. Statistics show that where intelligence is largest, wealth is greatest. National intelligence, and national poverty never co-exist. Raw material, less than the intelligence and skill which gives it some form of use, or shape of beauty, enters into and constitutes the values of commerce, and thus, increased intelligence gives increased annual production of values. With the American people it is peculiarly a question of national safety. In a country where the mind of the people acts so directly on the government, shaping its policies and moulding its laws, education should be co-extensive with citizenship. To be a certain public good, universal suffrage should go hand in hand with universal education. To the extent that you educate your citizens, to that extent you secure safe and fitting depositaries of political franchise. The ballot in the hands of an ignorant and vicious people, is the most dangerous power in the state. It is a certain public good, only to the extent that the voter casting it is intelligent and conscientious. In the habits, thoughts, mind and morals of the youth of to-day, you find the future of your Territory. In every city and hamlet, in every house and home of the country, habits of thought are forming, and opinions are maturing, which in the next quarter of a century will arm either to uphold, or rend assunder. With the free governments of this continent, the appeal of education is an appeal for national safety, and, if it be unheeded, no gift of prophecy is needed to foretell the result. I feel that I cannot urge too earnestly upon your attention the care of your public schools. They are peculiarly the colleges of the state, where it will find largely its wealth, its power and its safety, and where if properly cared for, and fostered, day by day, and year by year, "unresting looms will weave the purple of its greatness."

CENTENNIAL EXHIBITION.

An act of Congress, approved March 3d, 1871, provided for the national celebration of the One Hundredth Anniversary of the Independence of the United States, by the holding of an exhibition of "arts, manufactures and products of the soil, and mine."

The Centennial Commission has entrusted the direction and supervision of the Exhibition to a Director General, who, in a recent communication, says:

"5. To provide for the efficient adjustment of the preliminaries to the Exhibition, and to organize a uniform system to this end throughout the United States, the several States and Terri-

tories are invited and recommended to appoint, as early as possible, State Centennial Managers, not exceeding five in number. They should be selected entirely with regard to their familiarity with the resources, arts and products of their State, their business experience and executive skill. The State Managers, with the United States Commissioner and Alternate Commissioner, shall constitute the State Board of Centennial Managers for each State and Territory.

On the State Board will devolve all the responsibility of organizing its State or Territory, and of securing its thorough representation in the Exhibition. It will have to care for the interests of its own State, and of its citizens in matters relating to the Exhibition; to disseminate information about it; to issue invitations to participate; to receive and pronounce upon applications for space; to apportion the space placed at its disposal among the exhibitors from its State; and to supervise such other details relating to the representation of its citizens in the Exhibition, as may from time to time be delegated to it by the United States Centennial Commission.

It is of extreme importance that the State Boards shall be organized and at work, at the earliest day possible. It is hoped that all may have been appointed before April 1, 1874."

In its patriotic aspects, the object of the convention is arousing the enthusiasm and emulation of the States, and I am certain our people will not be without a patriotic desire to contribute to the interest and the success of the occasion.

It will be your pleasant and patriotic duty, to take the necessary steps to spread before the eyes of the world, upon that interesting occasion, the rich products of your farms and mines. In these two departments of industry there is no reason why Colorado should not compete successfully for supremacy. Aside from its patriotic aspects, the occasion will be one which we should improve to the full measure of our ability, and which it would be most unwise to neglect as an opportunity of displaying to the world the wealth and resources of our Territory.

INCREASE OF THE JUDICIARY.

In the event of a failure of our admission as a State, Congress should, by amendment of our organic act, provide for the appointment of at least two additional judges. As at present constituted, our judiciary is inadequate to meet the wants of our people. Our court dockets are crowded with the litigation of a rapidly increased trade and commerce. Our judges are overworked, and litigants are delayed, and harrassed by

the necessary continuance of their cases, for want of time to hear them. With our increased population, and our correspondingly increased litigation, there is abundant work for five judges. Cases would be sooner and more carefully tried, and business enterprise would no longer be impeded and embarrassed by the impossibility of having its rights speedily adjudicated and determined. A memorial to Congress on this subject is desirable.

FEEES.

While it is desirable that those holding places of trust and responsibility should be amply compensated, with a view of securing both ability and integrity in the public service, care should be taken that the emoluments of office do not exceed reasonable limits. Under our present system, and rate of fees, I am led to believe that the compensation of some of the county officers, in the more populous counties, might be reduced with great justice to the public, and without injustice to the present incumbents.

PRESERVATION AND GROWTH OF TIMBER.

The annual destruction of timber in our mountains by fire, is a serious evil that ought, if possible, to be averted. Our home supply is so limited, and our distance from other markets so great, that our timber has, to some extent, the value of gold. The carelessness or maliciousness, by which entire districts of timber are fired and destroyed, should be visited by penalties far more severe than those now provided by statute, and there should be a standing reward for the apprehension and conviction of all who violate the law in this particular.

The question of the encouragement of forest culture will also present itself to you as one of importance. Statistics show, that the timber supply of the United States will be comparatively exhausted within the next quarter of a century. The supply in our Territory will be exhausted in a much less time. In view of these facts, forest culture presents itself as one of the economical questions of the day, which a wise forecast of coming necessities demands that you consider. In this connection, I call your attention to the Act of Congress, approved March 3, 1873: "An Act to encourage the growth of timber on western prairies," with a view to the two-fold inquiry, in what respect should the act be liberalized by Congress, and what additional encouragement can be given by Territorial legislation?

AGRICULTURAL AND OTHER STATISTICS.

It would be of great value and interest if, with additional compensation, assessors, in addition to their existing duties, should be required, by law, to make collection and returns of the agricultural, horticultural, mineral, manufacturing and stock statistics of their several counties. It would constitute an annual census, showing the resources and industries of each county of the Territory, and their annual development and growth. Several of the States have similar laws that have been productive of the most satisfactory results.

STOCK RAISING.

The rapid increase, and general prosperity of the stock interest in the Territory, confirms its character of peculiar attractiveness and adaptability for the successful pursuit of this industry. The mildness of its climate and the nutritious character of its native grasses, not only tend to the highest development and perfection of breeds, but enables the stock owner to meet the expense of long transportation and compete in the distant markets of Chicago and New York with cattle growing regions more accessible to market, but less favored in conditions of climate, and vast extent of native and inexpensive pasturage. With the advantages which these two conditions of climate and food so abundantly offer, stock raising is destined to continue, as it is now, one of the leading industries of the Territory and a prominent element in its wealth.

In this connection I desire to call your attention to a conflict which has arisen between cattle and sheep owners. During the last autumn I received a communication from certain owners of sheep in the county of Huerfano, representing that they had been disturbed in the quiet and peaceable possession and enjoyment of their homes and property; that parties had attacked and killed, or scattered their flocks with the proclaimed purpose of driving the sheep owners with their property from the county.

As it was a matter exclusively for the courts, I addressed a communication to Chief Justice Hallett, calling his attention to the alleged infractions of the law within his district. As his reply points out some difficulties in the way of the due administration of the law, and suggests some amendatory legislation, I deem it proper to submit it for your consideration.

The admitted fact that sheep practically destroy the range for cattle, lies at the basis of the difficulty, and presents a

conflict which it is all important to reconcile. There is no clearer proposition, than that every citizen has the right to take his property peaceably, and under the law, into any and all parts of the Territory, and there keep and enjoy it free from molestation or violence from any one whomsoever. I therefore recommend such legislation as will secure this right in all its integrity, and protect each industry, as far as possible, from hardship or oppression.

MINES.

I submit herewith the reports of the several assayers, provision for the appointment of whom was made by the last Assembly. These reports contain much valuable information respecting our mines, and the offices thus established have proven of great use and convenience to those engaged in mining and prospecting, affording them convenient and trustworthy sources of information respecting their mining properties.

In view of the rapid settlement and development of the San Juan mining region, I would recommend the establishment of an assay office at some point convenient to that district for the benefit of those engaged in mining.

While the law of Congress, providing for a title, in fee simple, to mines, was an advance in the right direction, the tenure and peaceable occupancy of mining properties is still, practically embarrassed, to a degree and in a manner that calls for legislation. The practice of what is termed "jumping" mines on a pretended claim of ownership, as soon as they are proven valuable, has grown to be a serious evil in some of our mining districts, leading to extensive and protracted litigation, and not infrequently to bloodshed. This not only works individual hardship, but injury to the entire mining interest. Capital seeks investment where its rights are settled, known and absolute, unincumbered by uncertainties of tenure or embarrassments of litigation.

Additional safeguards should be thrown around the "possession" of mining properties, and heavy penalties visited upon all who attempt to disturb it by force or violence. These penalties should not only reach those who are guilty of the overt act, but all who instigate or connive at it. A law providing a remedy for this evil is much needed, and will relieve the mining interests of the Territory from a great embarrassment.

Aside from this, a careful survey of the condition and prospects of this most important industry of our Territory, warrants satisfaction and encouragement to a degree justified at no previous period of our history. The yield of bullion for the

past year is safely estimated at over \$5,000,000. This is an increase over the yield of 1872, and coming largely from the older mining districts, and from mines long worked, confirms the faith of previous years that our mines are practically inexhaustible. This is no unimportant fact, for as year by year adds its confirmatory evidence upon this point, the value of mining properties will be established and enhanced, and capital and labor in the light of uniform results, will no longer hesitate to explore the depths of your mountains. Whilst old and established mines have continued to lay their wealth at our feet, the preparation for new and extensive mining operations in districts both old and new, are far greater than at any former period, and not only show established faith in the richness of our mines, but augmented vitality in mining as a permanent and remunerative industry. Since the Legislature of Colorado last convened, new mining districts have been discovered, and occupied, of such extent and richness, that of themselves they would place our Territory in no secondary position as a gold and silver region. These present new and attractive fields for capital and labor upon which new communities are rapidly concentrating, soon to grow into prosperous and populous gold and silver producing centers, augmenting the bullion product of the country annually and indefinitely. Thus, the old mining districts of Gilpin, Boulder, Clear Creek, Park, Lake and Summit counties, with their regular annual yield are reinforced by the San Juan and other new discoveries with their marvelous promise.

Co-existent and in harmony with this increase in mining area, is increase of mining knowledge and skill, evidenced in improved methods of reduction and separation. Smelting works have been erected at Denver, Golden City, Boulder, Black Hawk, Georgetown and Fairplay, and are successfully supplying a long felt economical want. The treatment and manipulation of ores has become a separate and distinct industry, in which science and skill are forcing the doors of chemical combination, and compelling hitherto refractory ores to a full surrender of whatever treasure they may possess.

Increased mining production ; increased mining operations ; increased mining area ; increased mining skill ; increased mining facilities ; increased energy and vitality, constitute a summary of the present condition and prosperity of our mines, whose reported wealth tempted the footsteps of the pioneer of 1859, and whose known wealth has supplied the struggles of intervening years with courage and faith in the ultimate destiny of our Territory. To foster our mining interests by wise legislation, to guard it, if possible, against unwise legislation on

the part of the Federal government, is a duty the importance of which will earnestly urge its faithful discharge.

COINAGE.

In this connection I desire to call your attention to the Branch Mint at Denver. If it could be made a mint for coinage, its usefulness would be greatly enlarged and the prosperity of the country increased. The expense and risk of shipping our bullion to eastern markets for coinage, and the consequent delay in receiving returns, is an onerous tax on our mining industry, and affects injuriously the entire business of the Territory. The power to convert the products of our mines into coin at home, would remove this burden, and its beneficial effects would be felt in all the departments of industrial life. An earnest appeal to Congress in this behalf should be made at an early day.

AGRICULTURE.

The cultivation of the soil in our Territory has been attended by such unexpected and rich results, that agriculture comes to the front as one of the most important elements of our wealth and prosperity.

The agriculture of Colorado has proven two things: first, that our soil, when irrigated, is equal to the best agricultural lands of the continent; second, that agriculture by irrigation has advantages that make it the most successful method of husbandry.

The following have been determined as about the average crops throughout the Territory:

Wheat.....	28 bushels per acre.
Oats.....	55 " " "
Barley.....	40 " " "
Corn.....	35 " " "
Potatoes.....	200 " " "
Onions.....	250 " " "

But these figures are far below what may be produced with extra care and labor. For three successive years the premium crops of wheat, exhibited at the Territorial fair, ranged from sixty-seven to seventy-three bushels per acre. In one year two fields of corn were sworn to as having yielded over two hundred bushels per acre. Potatoes have given from four hundred to six hundred bushels per acre. Onions have reached one thousand bushels per acre. A cabbage of eighty-two pounds weight, has been sold in the Denver market. Those of forty

to sixty pounds each are plentiful at every annual fair. Car loads have been shipped away in which the closely trimmed heads averaged throughout twenty-three pounds apiece.

The necessity of irrigation, as an appliance of agriculture, demands a carefully prepared system of laws upon the subject. While as a matter of legislation, the subject is one of exceeding difficulty, intricacy and concern, so long as the entire matter is subject to State control and management, there is no just ground for apprehending any serious mistake or permanent hardship. However imperfect the first legislation upon the subject may prove, the Legislature of the Territory or State from year to year will correct errors, supply deficiencies, reconcile conflicting provisions and provide for new wants, until a full and complete code of irrigation laws will be secured and enjoyed. There are a few general propositions that present themselves as fundamental:

First—That to the State should belong the water of its streams and the control of its distribution among canal owners. From this it would follow that no one would be allowed to divert the water from the natural bed of the stream to the injury of those having previously acquired and vested rights.

Second—The control and management of canals should be, as far as possible, local, and by those immediately interested; and in this view I would suggest that each considerable stream, with its system of canals, should constitute a district of itself, and should be under the control and direction of a board of canal commissioners elected by the people of the district. The powers and duties of this board should be ample and clearly defined, and should include the powers of a board of arbitration, with a view of avoiding tedious and costly litigation and of giving to those interested an inexpensive tribunal before which the manifold questions which would arise could be, if they desired, primarily brought and adjudicated.

During the past year the propriety of asking the general government for aid in constructing a general system of irrigation for the arid country west of the Missouri river has been much discussed, not only in Colorado, but in all the States and Territories interested in the reclamation of arid lands within their borders.

There are many facts and interests that press the subject upon our attention, and first among these is the fact that to secure a farm in Colorado accessible to water, at government prices, is a matter of no inconsiderable difficulty. The tides of immigration have flowed along the valleys of our rivers and smaller streams; the immediate bottom lands have been possessed and brought under cultivation by means of easily con-

structed and comparatively inexpensive irrigating canals. But agriculture, spreading from the river side to the rim of the higher plateaux, has been arrested by reason of the greater difficulty and expense of irrigation. In other words, the agriculture of this region will soon have reached its limits by the ordinary means under the control, or within the power of the farmer. The emigrant from the east, seeking a home, sees before him vast undulating plains, stretching leagues away, with a soil which experience has abundantly proven is marvelous in its productive capabilities when irrigated. To turn the mighty river and lead it by canals along the commanding slopes that flank its natural course, is far beyond the limits of his purse, and he turns away disheartened and seeks other lands or other employments. Not a few have thus turned away from Colorado during the last year, baffled in their efforts to secure a home within our borders. Such is the situation. The great annual tides of emigration from the east seeking homes under the beneficent provisions of our land laws, are halted on the verge of thousands of square miles of arid country, which irrigated, are capable of supporting the densest populations of the continent. To open up a way out of this complication, to overcome and subdue this physical fact which fetters their growth and limits their future, is the great problem which to-day confronts the people of the trans-Missouri region. There is but one remedy, namely, a general and comprehensive system of irrigation that shall utilize the entire water supply of the arid region. The amount of water supply does not figure in the question beyond the admitted fact that there is sufficient water to reclaim and make fruitful thousands of square miles of what are now arid lands. According to different estimates, Colorado has a water supply sufficient to irrigate from two to six millions of acres. Accepting the lowest estimate as correct, it is sufficient to furnish food for a million of population in your mines and as many more in your fields and factories. That it is both desirable and just we should receive aid from the general government in this behalf I submit as unquestionable. The policy of the government has always been one of liberality towards internal improvements. The last Congress appropriated over \$6,000,000 for river and harbor improvements for the States east of the Mississippi. Annually, from the foundation of the government, these States have been, and will continue to be, the recipients of the bounty of the general government; so that, in both asking and receiving, we will be in the line of long established precedent. But there are other reasons why this is peculiarly a work belonging to the general government.

First—The government is the great land owner in the region to be benefitted. Unless these lands are reclaimed by irrigation they will remain unsold and useless in the hands of the government. Homesteads and pre-emptions under those beneficent laws will be unknown, except along the immediate line of the water courses, where the expense of irrigation will be small and within the compass of the financial ability of the poor man. The vast areas of intermediate lands will remain unsold, uninhabited and uninhabitable. What will it avail the general government to hold lands which it cannot sell or utilize for its citizens? With what equity can it ask the State or Territory, or private enterprise, to construct a system of canals giving its lands value and then sell them at a price which they command by reason of the work done?

Second—Its power is alone equal to any comprehensive and complete system that shall in its extent and completeness meet the want. It is beyond the limit of private enterprise or individual adventure, and requires the aid and countenance of the nation. Even if this were not the case, the ownership and exclusive control by the general government of the great body of the lands to be benefitted, stands conclusively and fatally in the path of private enterprise. The agricultural domain of the United States, outside of this district, subject to the operation of the homestead and pre-emption laws, is comparatively exhausted. It is true there are large areas of agricultural lands still unoccupied, but they have passed from the ownership of the government and cannot be had only at advanced prices. The annual tides of emigration westward are as certain and regular as the tides of the ocean. A large per cent. of such emigration is in search of lands to cultivate. Can the general government afford to let such a domain lie waste in the presence of such a demand? Is not its duty in the premises, clearly defined by all maxims which lie at the foundation of the relation which exists between the government and its citizens? Does it not owe it to the thousands of its citizens, who are and will be for years to come, seeking homes and farms, to place these rich plains within their reach? The question also appeals to us from a financial standpoint. Estimate the annual product of such a region brought under cultivation. Estimate the vast populations it would support. Estimate the product of the thousand forces of industrial life it would evoke and employ, and you will count the added wealth of the nation by millions. And in this connection comes another consideration which must have no unimportant place in any argument on this subject. If there were no other argument in behalf of government aid, we would find one of first

importance in the fact that this region is the great metalliferous area of the republic. While it vies with the east in coal, iron, copper and all the baser metals, it is pre-eminently the gold and silver region of the continent. The amount of gold and silver coin among a people is largely the measure of their prosperity. To produce the precious metals is of first importance with every great nation. The point I make is, that the mining interest is dependant on local agriculture. You can not work your mines profitably on imported bread. The thousands who now, and will hereafter delve in these mountains and lift their glittering treasures to the sunlight, must draw their sustenance from the fertile valleys that lie enveloped in their arms and stretch away from their feet. And until this condition of things is compassed, your mines will never be economically or successfully worked. Until the plain shall send to the mountain its gift of bread, the mountain will withhold from the nation its gift of gold. In your mountains there is remunerative work for a million of men; on these plains there should be an agriculture to feed them, and manufactories to clothe them. The duty of the government; the interest of the government; the practice of the government, all run parallel with our want. It is not alone a matter of interest to the husbandman; the miner, the manufacturer, the merchant, the mechanic, the laboring man in every department of industry is equally concerned. It is not alone a matter of interest to the one hundred and twenty-five thousand people now here, but of vital concern to the thousands who will annually and indefinitely augment your population, and to whom the richness of your soil, the wealth of your mines, and the charm of your skies, extend a perpetual invitation to come and to prosper.

On the 15th of October last a convention of trans-Missouri States and Territories, assembled at Denver, and passed a memorial asking for a grant of lands in this behalf. Now, as then, I think the prayer should be for a direct appropriation of money or the proceeds of the sales of public lands, and not for the lands themselves. It would better meet the views of Congress, and would keep the lands subject to the operation of the homestead and pre-emption laws, properly amended, and thus without the grasp of monied monopolies, and within the reach of the actual settler. Whatever aid is given, should be given to the Territory, and not to private corporations, and should be under the sole and exclusive control and direction of the Legislature; then, if it be mismanaged or squandered, the people will know whom to hold accountable.

I therefore urge upon you a memorial to Congress upon the subject, to which their attention has already been directed by the interest which the Chief Executive of the nation feels in our young and prosperous Territory.

ADMISSION.

Self-government is the highest aspiration of a free and intelligent people. It is the surest guaranty of inestimable rights; the most trustworthy guardian of material interests.

The time has come when, under the spirit of our institutions and the practice of our government, we can properly apply for admission as a State into the Federal Union, and I accordingly recommend a memorial to that end.

The advantages of a State over a Territorial government are patent, and admitted. The only questions to be considered are the two of population and wealth. The election in September last shows a voting population of over twenty thousand. This vote, in the light of the facts that the interest of a general election was wanting to call out a full vote—that the registered vote at the time was about twenty-five thousand, and that the emigration arriving after the 13th of March were not voters, and consequently not included in either the vote or registration—warrants us in estimating our present population at one hundred and twenty-five thousand; and, if admitted, by the time our representatives would take their seats in Congress, the emigration of another year will have augmented it to one hundred and fifty thousand people, who, in their energy, industry, education, and civilization will compare favorably with the best communities of the East. Under the rule of representation, or the uniform practice of the government, no valid objection can be urged to our admission on the score of population. In the matter of both present and prospective wealth, the showing also justifies our admission:

It shows that in the four years last past, taxable property has increased \$18,799,483.50, or if the estimate of the Treasurer be taken it has increased \$33,221,995. In that time the counties of Boulder, Bent, Jefferson, Larimer, Huerfano and Las Animas have nearly or quite doubled their wealth. The counties of Arapahoe, Weld, Douglas, Park, Fremont and Saguache, have nearly or quite trebled their wealth.

While I see in a State government an additional burden, I also see represented in these facts and figures the strength that will support it. That Colorado has all the elements of a great and prosperous State, is not the language of exaggeration, but the clear and distinct utterance of statistics; the unequivocal testimony of achieved results. Asking for the benefits of the Union, she brings with overflowing hands, reciprocal gifts. Asking for the flag of the Union, she recognizes that for which she has already battled. Asking for a participation in the glories of the Union, she adds the lustre of a new star, rising over a new field of human thought and endeavor.

Councilmen and Representatives: With these recommendations my duties cease, and yours begin. The demands upon you are of no ordinary character. Our Territory is just entering upon what, we hope, will be a no limited career. In its

present there is everything to inspire patriotism, enthusiasm, courage and faith. To foresee its destiny, we need no prophecy of genius or vision of seer. The first fruits of her soil, and the broken seals of her mountain coffers, reveal the possibilities of the future. In the purple of its dawn stand a young and vigorous people, eager for the conquests at hand. Imbued with the spirit of our institutions they seek victory on fields where victory is grandest. Around and about us, upon this hand and upon that, in the hum of contending industries, are heard the first notes of the opening battle. Their appeal to you is not for sword, or bayonet, or cannon, but for the mightier helps of good laws and good government. To this end they have committed to your keeping, for a time, the sacred ark of their laws. The economies of trade; the conservation of material interests; the rights of man; the duties of citizenship; the truths of political economy; the nature and methods of constitutional liberty and constitutional government, are the vital questions with which you must deal. To successfully mould and direct them, as agencies ministering to the strength and intelligence, the broad purpose and high endeavor of this people—is the achievement of that noblest of human labors, the establishment of a State, where law and liberty co-exist, and mutually conserve the highest interests of man. To this end, upon your labors I invoke the blessing of God.

Mr. Hall presented the following report :

To the Legislative Assembly of Colorado Territory :

The undersigned, appointed a committee by the Honorable Secretary of the Territory to examine the accounts of the Auditor and Treasurer in pursuance of chapter nine (9) of the Revised Statutes, would respectfully report :

That your committee assembled at the office of the Auditor in Denver, January 1st, 1874, and after being duly sworn according to law entered upon their duties.

Your committee do not consider it necessary to report the separate receipts and disbursements, as they will appear in detail in the complete and exhaustive reports of the Auditor and Treasurer which will be laid before your honorable bodies.

Your committee have made a thorough examination of all the books, papers, accounts and vouchers, and official transactions of the Auditor and Treasurer for the fiscal years of 1872

and 1873, and beg leave to report that they find all of the accounts, warrants and vouchers presented by these officers correct in every particular. We can not find that any useless expenditure has been made or any fraudulent or fictitious accounts allowed or any unlawful warrants paid. The committee would most especially commend these officers for their correct and simple system of keeping the public accounts of the Territory.

Your committee find the balance in the Treasury

to be \$17,182 79.....	\$17,182 79
Outstanding warrants unpaid December 31, 1873....	989 50

Making the Treasurer's balance.....\$18,172 29

In conclusion your committee have to congratulate the Territory upon the satisfactory manner in which the affairs of the Treasury Department have been conducted.

Respectfully submitted,

JAIRUS W. HALL,

Member of the Legislative Council.

WILLIAM H. MEYER,

Member of the House of Representatives,

J. A. J. VALDEZ,

Member of the House of Representatives,

The following communication from the honorable the Secretary of Colorado Territory was received and read :

TERRITORY OF COLORADO,
SECRETARY'S OFFICE,
DENVER, January 7, 1874. }

To the Honorable the President of the Council :

SIR : I have the honor to submit the following information for the consideration of the honorable Council :

First. I am instructed by the Treasury Department of the United States to exclude from my accounts the expense of printing the Reports of Territorial officers.

Second. That the items of newspapers and postage stamps for officers and members of the General Assembly, heretofore allowed, are now discontinued.

Third. I am authorized to publish the Governor's Message in pamphlet form, in numbers to meet the orders of the Legislature. This document is already in type. Two thousand copies will be published and placed at the disposal of the Council and House at an early day. The expense of printing and binding the same will be paid by the United States, as also that for the Laws and Journals.

Fourth. I am not authorized to print any part of your proceedings in the Spanish language.

Fifth. All incidental printing must be done at one office.

Sixth. In accordance with these instructions, I have designated Wm. N. Byers, proprietor of the *Rocky Mountain News*, Public Printer for both branches of the Assembly during the present session. All work which your committee on Printing with due regard to the foregoing instructions, may order, will be promptly executed. Heretofore the amount to be expended under this head has been left wholly within my personal discretion, but the Act of Congress, approved May 8th, 1872, prescribes certain limits which I am not permitted to exceed.

It has been the custom to publish all bills, rules, regulations, roll call, etc., etc., at the expense of the general government, but for reasons already given the practice must now, to a very considerable extent, be discontinued. It would be well, therefore, for the honorable members of the Council to proceed upon the assumption that the entire cost of this work is to be met from the Territorial treasury, for, until my expense accounts shall have been made up, it will be impossible to determine whether any part of it can be paid from the fund in my charge.

With the view of adjusting these matters to the satisfaction of all concerned, I would respectfully ask for a conference with your committee on Printing, at their earliest convenience.

By the Act of Congress approved January 23, 1873, it is provided that the members of each branch of the Legislature shall receive a compensation of six dollars per day during the sessions, and such mileage as is now provided by law, that is to say, three dollars for every twenty miles traveled from their places of residence to the Capitol and return; the presiding officer of each house is allowed the sum of ten dollars per day. The additional officers named in this act are a Chief Clerk, whose compensation shall be eight dollars per day; one Assistant Clerk, one Enrolling Clerk, one Engrossing Clerk, one Sergeant-at-Arms, one Door-keeper, one Messenger, and one Watchman, who shall each receive a compensation of five dollars per day during the session.

The Secretary of the Council is respectfully requested to furnish this office with a full and carefully written copy of his daily journal at least once each week.

The report of the Superintendent of Public Instruction, together with those of the Territorial Auditor and Treasurer, have been some days in the hands of the printer, and will soon be ready for distribution, duplicate copies of these manuscripts having been provided in advance of the session, in order that their publication might be had for legislative advisement, as soon as practicable after the organization.

The manuscript reports of the Board of Immigration, the Adjutant General's, Territorial Assayers', Librarian, Golden School of Mines, the committee appointed by his Excellency the Governor, to investigate the condition of the Penitentiary at Cañon City, with the letter of Chief Justice Hallett concerning disturbances in Huerfano County, have this day been transmitted to the honorable the Speaker of the House of Representatives, for consideration and action.

Very respectfully,

Your obedient servant,

FRANK HALL,

Secretary of Colorado.

TERRITORY OF COLORADO,
OFFICE SUP'T PUBLIC INSTRUCTION,
Denver, January 10, 1874. }

To the Honorable the President of the Council:

SIR: The resolution adopted by your honorable body, "That the Superintendent of Public Instruction be requested to furnish this body with a copy of his report as required by law," is before me.

I beg leave to state that a complete report of this department was submitted to the Governor of the Territory before the 20th day of December last, as required by law, (Eighth Session Laws, page 132, Sec. 3.)

Inasmuch as the report is quite voluminous, and a detailed transcript would involve great labor, and is not required by the statute, it was deemed to be unnecessary to make it. A summary thereof was therefore furnished the Governor and the original manuscript placed in the hands of the printer by the Honorable Secretary of the Territory, with the expectation that it would be ready for distribution among the members of your body on the first day of your session, and thus be avoided the hindrance to school legislation which was experienced by the last Legislature. In this we have been disappointed. The printed report, however, is nearly ready for distribution.

Regretting exceedingly this delay, yet feeling that I have complied with the law, and begging your indulgence yet a few days,

I am, very respectfully,

Your humble servant,

HORACE M. HALE,
Sup't Public Instruction.

Mr. Butler, Chairman of the Judiciary committee, reported back C. B. No. 2 and C. B. No. 3, with the recommendation that they be referred to the committee on Elections.

Also, that section 4 be amended by adding to the end of said section the words "but no ballot shall be thrown out for not showing the time the several persons voted for shall serve."

Also, that section 9 be amended by adding to the end of said section the following: "Such bond shall in no case be for a less amount than forty thousand dollars, and the sureties shall be owners of unincumbered real estate equal in aggregate value to double the amount or penalty thereof.

Also, that section 10 be amended by inserting after the word "nor," in line 13, the following: "by virtue thereof;" also, that section 13 be amended by striking out the word "Council," in line 2, and inserting after the word "Denver" the words "for use of schools;" also, by striking out the word "the" before "city" on third line and inserting the word "said" in lieu thereof; also, by striking out on line four (4) the word "and" and inserting the word "said."

Also, that the bill be amended by inserting the following section, and that the same be numbered 15:

Sec. 15. All taxes required by law to be levied on the taxable property of any district, hitherto existing within the limits of the district hereby created, for the payment of interest on or redemption of any bonds heretofore issued by such former district, under any law of this Territory heretofore or now in force, shall continue to be levied upon the taxable property of the same territory covered by the former district which issued such bonds and upon none other; and said Board of Education

shall by proper order regulate the manner in which the assessment of such tax shall be made, so as to levy the same on the real estate included within the bounds of such former district and the personal property of the residents within said bounds.

Also, that the remaining sections of said bill be numbered 16, 17, 18 and 19 respectively; that section 18 be amended by inserting after the word "Mayor," on line 3, the words "or other chief officer, by authority of the city or town council or board of trustees," and that the words "or other chief officer" be inserted after the word "Mayor" on line 4, and that the last four words of section 18 be stricken out, and that the bill as amended be ordered engrossed for third reading.

Respectfully submitted,

HUGH BUTLER,
Chairman.

OFFICE COLORADO STOCK GROWERS' ASSOCIATION, }
 . Denver, January 19, 1874. }

To the Honorable the President of the Council:

DEAR SIR: I take pleasure in extending an invitation to the members of the Council to attend the meeting of the Stock Growers' Association, at the Exchange Rooms, American House, commencing at 10 o'clock a. m. to-morrow, Jan. 20th.

I am, very respectfully,

J. L. BAILEY,
 President.

Mr. President appointed Messrs. Head and McCammon a committee on Enrollment.

The following report was read:

Mr. President:

Your committee to whom was referred H. J. M. No. 5, beg leave to submit the following report:

Add after the word "thousand," in line 45, the following: "Under these circumstances, the Legislature at its present session finds itself laboring strenuously to effect in part a reform in the state of the laws at present in force, but, owing to the shortness of time allowed by law for the setting of these bodies, we find that it will be impossible to deal with many subjects which are of vital importance to our people and demand prompt attention.

Your memorialists are satisfied that under the existing law it will be impossible for our people to secure needed legislation,

and unless our session be extended by act of your bodies, many important interests must continue to suffer."

Respectfully submitted,

HUGH BUTLER,
Chairman.

Special order H. B. No. 67 and report of Special committee thereon.

Mr. Bromwell presented the following minority report.

Mr. President:

Your committee to whom was referred H. B. No. 67, respectfully report that they have had the same under consideration, and report the same back with an amendment, in accordance with instructions, which amendment is as follows:

Provided, That the foregoing provisions shall not take effect until the question of removing the said Capital has been submitted to a vote of the people of the Territory, at the general election to be held in September, 1874, and a majority of the legal voters of the Territory shall vote in favor of such removal. Said vote shall be taken by each voter placing on his ballot the words "For removal," or the words "Against removal," and all ballots having on them the words "For removal" shall be held and counted in favor of the above provisions going into effect. And if, upon the canvass, a majority shall be for the removal, the Governor shall, within ten days from the said canvass, issue his proclamation announcing the result of said canvass, and thereupon this act and all the provisions thereof shall be in full force and effect."

H. P. H. BROMWELL,
of Special committee.

The following majority report was read :

To the Honorable the President of the Council :

Your Special committee, to whom was referred H. B. No. 67, for the removal of the Capital of the Territory of Colorado from Denver to the City of Pueblo, with instructions to examine and report for information of the Council, what amount of land and lots have been conveyed to the Territory of Colorado for the purposes of a Capitol site and buildings at the City of Denver, together with the status of title thereto and approximate value thereof, beg leave to report that they have made strict and careful examination as to said matters, and find by abstracts furnished by the Clerk and Recorder of Arapahoe county, that, first, Henry C. Brown has conveyed a tract of land containing ten acres, situate within the city limits of Denver, and being a part of the N. W. $\frac{1}{4}$ of the N. E. $\frac{1}{4}$ of section 3 in township 4 south of range 68 west, and the granting clause in the deed being in the words and figures following, to wit : "Said land being so conveyed to said Territory in pursuance of the act entitled 'An act to locate the seat of government of the Territory of Colorado, approved Dec. 9th, 1867,' so as to vest the title to the same *absolutely and in fee simple* in said Territory, and to remain the property of said Territory for the purpose of erecting a Capitol and other public buildings thereon only."

Second. It appears from the records that Alfred H. Clements has conveyed 15 lots, being lots from 1 to 16 inclusive in block 320 of Clement's addition to the City of Denver, upon condition express that the Capitol of Colorado shall be located and built upon the grounds of Henry C. Brown in East Denver.

Third. Daniel Witter has deeded to the Territory, upon the same express conditions as the foregoing, ten lots, being numbered from 26 to 35 in block 56 of Witter's addition. Upon the margin of this abstract is noted the following words : "Error.—No block 56 in Witter's addition as now filed."

Fourth. Richard E. Whitsitt has deeded, with like condition, 20 lots, being from 36 to 55 inclusive in block 55 in Witter's addition, and the following words are noted upon the abstract : "Error.—No grantee in the deed, and no block 55 in Witter's addition as map is now recorded."

Fifth. Samuel E. Brown and Mary E. Brown deed to the Territory *one acre* of ground in section 2 of the township aforesaid, and the following words are noted on the abstract : "I think error exists in this deed, as the land conveyed takes a part of land *previously sold* to and now in Horr's addition."

Sixth. I. W. Smith deeds to the Territory, conditioned as above, block 81, in Brown, Smith & Porter's addition, and the following clause follows the description of the property, to wit: "as by reference to the map of said addition will more fully and at large appear." To this conveyance the following is noted: "Error.—There being no map of Brown, Smith & Porter's addition."

Seventh. Henry M. Porter conveys to the Territory, with like conditions, block 78 in Brown, Smith & Porter's addition, and refers to the map thereof, and the same note is appended as the foregoing, to wit: "Error.—There is no map of Brown, Smith & Porter's addition."

Eighth. John Evans and Simeon Whiteley deed to the Territory, conditioned like the foregoing, the west half of block 24 in Whiteley's addition to the City of Denver, and as to this conveyance the following note is appended, to wit: "Error.—We have no Whiteley's addition to Denver."

The foregoing described property is all that has been conveyed or purported to be conveyed to the Territory in consideration of the location of the Capital at Denver, and from this exhibit of the title thereto it appears that the ten acres tract conveyed by H. C. Brown for the Capitol site, instead of being conditionally deeded so as to revert to the grantor in case the seat of government should be afterwards removed, is conveyed to the Territory *absolutely and in fee simple*, so as to vest the title in the Territory irrevocably and without reversion; the terms of the grant being absolute by express words, and the subsequent clause referring to the use of the said land by the public is not in any legal sense such a condition or limitation as would forfeit or alter the absolute character of the grant, and although it may possibly operate to prevent the Territory of Colorado from ever alienating the land, yet it clearly appears that the grantor has divested himself of all title thereto, and that it must forever remain the property of the Territory for the use of public buildings thereon.

With respect to the other property purporting to have been conveyed to the Territory for the alleged purpose of aiding in the erection of Capitol buildings, and the value of which has been stated by those who are opposed to the removal of the seat of government of the Territory to be from \$50,000 to \$75,000, your committee find from the records of title as above shown that only *fifteen* lots are owned by the Territory, to wit: the 15 lots deeded by Clements, the title to all the other lots and parcels *pretended* to have been conveyed by Witter, Whittitt, S. E. Brown and wife, Smith, Porter and Evans not being worth the paper it was written upon, and the property so pre-

tended to be donated not being worth a single dollar to the Territory.

Your committee would remark upon this point that the singular circumstances here shown of six persons making six separate deeds for donations of land to the Territory for a purpose which was expected to add thousands of dollars in value to their adjoining lands, when at the same time these pretended donations to the public were for lands which had either been previously deeded away or were described to be in "additions" and blocks which never had an existence.

In conclusion, your committee have to report that should the bill under consideration pass the Council, and become effective in the location of the seat of government of Colorado at the City of Pueblo, the Territory would lose only fifteen lots in the City of Denver, worth altogether not to exceed \$3,000; that, on the other hand, in addition to the ten acres in the City of Denver, which the Territory would retain for the use of public buildings, your committee is assured that grounds at the City of Pueblo for Capitol purposes can be secured by donations to the extent of forty acres and worth from \$30,000 to \$40,000 at the present time, and with a perfect title thereto; so that, instead of a loss, as has been alleged under a false impression, the Territory would, by the passage of the pending bill, gain at least \$30,000, and more than double this amount taking into consideration the public uses to which the ten acres could be put in the City of Denver.

All of which is respectfully submitted.

LAFAYETTE HEAD,
GEO. M. CHILCOTT,
Majority of Special committee.

The following message was received from the House:

Absent—Messrs. Butler, Hall and McCammon—3.

The following message from His Excellency, the Governor, was received and read:

TERRITORY OF COLORADO, EXECUTIVE DEPARTMENT, }
Denver, February 13, 1874. }

To the Honorable, the President of the Council:

SIR: I return you herewith Council Bill No. 44, viz: "An act to repeal sections 52, 53, 54 and 55, of chapter 18, of the

Revised Statutes of Colorado Territory," without my approval.

My reasons are briefly as follows:

Many of the counties of the Territory have already, under the provisions of the law repealed, issued bonds in aid of Railroads which have been negotiated and are in the hands of innocent holders.

The law repealed contains the only power whereby a tax can be levied to meet the principal and the annual interest due on such bonds, and if repealed, the several counties that have issued bonds, as aforesaid, will be without authority or power to meet in any way such outstanding obligations.

While it may be desirable to prohibit by Statute any further issue of bonds for such purposes, I submit that legislation which affects so injuriously what has already been done in this behalf would be most unwise and impolitic.

In my view, the repeal of this law is practically repudiation of existing obligations, and as such, contrary to all well established maxims of law, justice and sound policy.

I therefore return your honorable body the bill unapproved.

Very respectfully your obedient serv't,

S. H. ELBERT,
Governor of Colorado.

Mr. Clark moved to reconsider the vote on the passage of H. B. No. 152.

Carried.

APPENDIX.

REPORT OF JOINT COMMITTEE OF THE COUNCIL AND HOUSE OF REPRESENTATIVES OF COLORADO TERRITORY, ON THE CONDITION OF THE TERRITORIAL PRISONERS.

To the Council and House of Representatives of the Territory of Colorado, in Legislature Assembled :

Your Committee appointed under House Concurrent Resolution No. 1, to examine into the condition of the Territorial prisoners in the Penitentiary at Cañon City; to take testimony concerning alleged abuses, and to report upon the propriety of receiving the Penitentiary from the general government, beg leave to inform your honorable bodies that they have discharged the duty imposed upon them, and do submit for your consideration the following report, which embodies the results of their observations and inquiries, and such suggestions as they deem pertinent in the premises :

We would call your attention to the fact that there is now existing a contract with the United States, which requires this Territory to pay for the "feeding, maintaining, guarding and clothing" Territorial convicts at the rate of seven dollars a week each, and, by reference to the Message of the Governor, it can be seen that this item of expenditure amounted to \$28,981, in the past two years. The labor of the convicts does not revert, when utilized, to the credit of the Territory, but their support is a continual drain upon its treasury.

Immediately upon our arrival at Cañon City, on the 4th day of February, 1874, we visited the Penitentiary where we met C. J. Reed, Esq., the Warden, and explained to him the object of our visit. This gentleman expressed his willingness to give us any information in his power, and in reply to interrogatories propounded by members of the committee, made the following statement:

"I have had charge of the Penitentiary since July 7, 1874. The labor of the convicts has been utilized to some extent in making brick, getting out rock, and getting wood. If there were workshops in connection with the institution, the convict labor would be remunerative; as it is now, there is little or nothing for prisoners to do during the winter.

There are now twenty convicts under sentence to the Penitentiary in county jails, who cannot be received because there is no room to accommodate them.

The Territory receives nothing for the labor of the convicts, and in my opinion it would be the wisest and cheapest plan for the Territory to take charge of the institution.

The labor compensation is held subject to the United States. Not much profit is derived from the labor of convicts who work off the grounds, as the salary of the guards absorbs the earnings. During the summer, when the convicts are off the grounds at work, a guard is sent out with every gang of fifteen or twenty.

Marshal Shaffenburg comes down about once or twice every three months to visit the Penitentiary. There is now on hand, the property of the United States, about two hundred thousand brick, made last summer and paid for by convict labor. The house I live in was built of brick paid for by convict labor. Since I have had charge, the amount of convict labor hired out has been about \$1,500, and counting the labor at the same rate—one dollar a day—nearly the same amount has been expended in improvement of the prison grounds.

Hardly a day passes without convicts being sent to get water or wood, but a guard is sent with them. Wood costs, for the winter months, about \$75 to \$80 per month.

When a prisoner's time has nearly expired, there is no inducement for him to run away, even if the opportunity is offered, because when captured the time he has served counts for naught, and the original term of sentence must be served out from the date of capture.* Another fact which operates in favor of preventing attempts at escape, with those convicts whose conduct has been good, is the hope of ultimate pardon and restoration to citizenship.

There are forty acres of ground connected with the Penitentiary, a good deal of which is tillable. All the vegetables required for the prison could be raised by convict labor.

The pay of the warden is \$150 a month, that of the guards \$115 each."

In response to a question from the committee, Mr. Reed furnished the following list of rations drawn and purchased for the subsistence of 39 prisoners three months:

- 60 sacks Flour, 100 pounds each.
- 25 sacks Corn Meal 100 pounds each.
- 2,500 pounds of Potatoes.
- 4,500 pounds of Beef, bought at Cañon City at 5 cts.
- 400 pounds of Cabbages, bought at Cañon City at 5 cts.
- 1 barrel of Pease.
- 1 barrel of Hominy.
- 1 barrel of Beans.
- 1 barrel of Salt.
- 150 pounds of Coffee.
- 25 pounds of Tea.
- 200 pounds of Bacon.
- 75 pounds of Rice.
- 83 pounds of Lard.
- 15 pounds of Baking Powder.
- 60 pounds of Tobacco.
- 10 pounds of Pepper.
- 10 pounds of Hops.
- 150 pounds of Barley.
- 25 gallons of Molasses.
- 1 keg of Vinegar.
- 4 boxes of Soap.
- 2 boxes of Candles.
- 2 boxes of Matches.
- 2 dozen Brooms.
- 1 dozen Scrub Brushes.
- 75 gallons of Coal Oil.
- Stationery and Stamps, \$20.

* Your committee would report that after diligent inquiry, they can find no law justifying this regulation.

This supply of stores struck your committee as being much larger in some particulars, than necessary for the subsistence of thirty-nine men three months, and the Warden, in reply to a question as to what was done with any surplus remaining at the end of the quarter, stated, in general terms, that an allowance would be made in the next requisition. A close investigation into this matter, being foreign to the duties of the committee, except so far as it might have a bearing upon the determining of the cost of boarding convicts, was not pressed, the Warden having placed the actual cost at 40 cents per day, in the following memoranda:

“Total receipts for convict labor from July 7, 1871	
to Dec. 30, 1873.....	\$4,000.00
Total expenditure on labor account, same time,.....	3,585.00

COST OF RUNNING THE PENITENTIARY ONE YEAR.

Salaries of warden and three guards,.....	\$5,840
Fuel,.....	600
Medical attendance, (including medicines),.....	500
Lights,.....	175
Clothing, (39 convicts \$45 a year),.....	1,755
Subsistence, (estimated at 40 cents a day),.....	5,016
Tin, iron-ware etc.....	300.”

The Committee would call your special attention to the fact that the sum total of the cost of running the Penitentiary one year, according to the above figures furnished by Mr. Reed, amounts to \$13,486, or \$1,004.50 less than the amount paid by the Territory for subsistence of convicts.

Mr. Duber, one of the prison guards, stated before the committee, that he had been employed in the prison since the beginning of its occupancy, that it had not been conducted as it should have been—convicts were allowed too much liberty—before Mr. Reed took charge.

The Penitentiary building is located in the Western portion of Cañon City, in proximity to a steep, massive ledge of rock, known as a “hog back.” It is constructed of stone, of which unlimited quantities can be quarried immediately in the rear of the institution. In shape it is a parallelogram, and being surmounted by a mansard roof, and without either wall or fence, it presents, externally, no appearance of a prison, except the net work of iron bars encasing the lower windows. Convict labor has been made use of to build a foundation wall along the front of the Prison, which forms one side of a level plat

that has been made by excavating rock and earth from a limestone hill near the North line of the grounds and filling up the inequalities of the surface.

In addition to the prison building there are upon the grounds belonging to the Penitentiary, a wooden structure close to the front end of the prison, which is occupied as an office, store-room and cook house, and a substantial brick house, about 200 yards from the prison, occupied as a residence by the warden.

More than half the forty acres belonging to the prison is rich alluvial bottom land, lying under ditch, and susceptible of a high degree of cultivation.

Upon entering the prison we found every portion of it very clean, orderly and well arranged. The cells, which are large and well ventilated, occupy the centre of the building and are constructed in two rows, with doors facing the side walls of the prison, thus receiving abundance of light from the large windows. There are seven cells in a row, and three tiers, making fourteen cells in each tier, or a total of forty-two cells. A wide corridor surrounds the cells, and an iron stairway connects the floor with galleries that surround the second and third tiers. One cell in each tier is used as a bath room, being supplied for this purpose with a bath tub and abundance of water, which is furnished by means of a force pump in the building. These cells are also used for the purpose of storage of the clothing of which the convicts are divested when they put on the prison garb. This clothing is washed and then stored away, properly labeled, to be restored to the owner when he is discharged.

We found some of the convicts engaged in the cook room, others washing clothes, and were informed that a female life convict was employed in doing housework at the wardens residence. All other prisoners were found in their cells. The convicts appear to be robust, hearty and in excellent sanitary condition, with the exception of two, who were under medical treatment. Dr. Prentiss, the attending physician, assured the committee that there has been but little need of medical attendance among the convicts, except in cases of disease contracted before admission. The first death that has ever occurred among the prisoners took place the latter part of Jan. of the present year, a convict named Hill, having died of organic disease of the heart. One of the two prisoners now on the sick list, is Wm. H. Henderson, who has yet eight months to serve, and we were informed by Dr. Prentiss, that if he should be kept in confinement until the expiration of his term of service, the probabilities are, he will be hopelessly insane.

The following is submitted as a list of the prisoners now on

the Register of the Penitentiary, showing the county from which they were sent, and the time yet to serve.

The above list shows a total period of service due from convicts, at the beginning of the present month, exclusive of U. S. and life convicts, of about 61 years.

Your committee having submitted for your consideration the foregoing, will now call your attention to sundry statements made to them under oath, by credible witnesses, as they believe, citizens of Cañon City, said testimony having been taken on the 5th day of February, 1874.

George P. Smith, sworn: I went over to prison to get some convicts who were working at Catlin's brick yard, was going over with them. When I got there Mr. Hines had a convict named Jans tied up by the wrists to the brackets inside the prison. Jans had escaped and had been caught. I saw Hines pull down the prisoners breeches, and pull up his shirt to the shoulders. He then whipped him with willow rods, which wrapped around him and drew blood all round to the navel: I think twenty licks were given at least, Hines said he gave twenty-five. I was told that Jans was whipped because he ran away. At the time he and another prisoner escaped. Mr. Reed had them at work at a carpenter bench, I believe, back of the cook house, in care of the convict Lottis, while Reed went to the Post Office. Mr. Duber told me not to give these men an inch, and had cautioned me and Reed not to lose sight of them anywhere. I have seen two or three, and as high as four convicts away from the prison without guard, but not within six weeks. Before Mr. Reed came in they were out often and late. Have seen convicts out after 10 o'clock at night without guard, since Reed took charge. Some of these were acting as domestics, others were not, one, a Mexican, ran all over.

W. C. Catlin sworn: I reside in Cañon. Have stock and also make brick. I think since Mr. Reed came in the conduct of the Penitentiary has been favorable. Have found Mr. Reed straight and a gentleman. The prison was not conducted so well before. Think Reed does as well as could be under the circumstances. Prisoners are always under guard when at work at my brick-yard, except when I become responsible for three or four. Since the 15th of July last I have made 700,000 brick. Paid one dollar a day for convict labor. They earned \$2,300. They stopped the men occasionally or I could have used more of the convict labor.

Jacob Dibold sworn: Jans was caught and the flogging took place the next day or day after, I think. Came over after men that I had guard over. Saw him tied up and a man flogging him. Mr. Reed, Mr. Duber, Mr. Redfield and Mr. Hines were all present. Blood running down Jans' back. I saw it. I felt bad over it but couldn't help it. This occurred since Mr. Reed has had charge of the prison. The prisoners were all guarded at the brick-yard. Have never seen prisoners out at

night. Have seen one convict, a Mexican, running around town without a guard. I know the convicts Hoover, Mitchell and Patterson, but never saw them out without a guard.

Alex. Redfield sworn: I know the convicts Hoover, Mitchell and Patterson. Their cells have been empty four or five nights at a time, and the prison officers told me they were burning brick at Catlin's, and would not be in for several days. I saw Jans whipped. Don't recollect the exact time but think it was the latter part of September last. Reed, Duber, G. P. Smith and Jake Dibold were present besides myself. Hines did the whipping. The flogging was done on the prisoner's naked back with willows as big at the butt as my finger. They were used one at a time. About twenty-five blows were struck. Saw blood. Every lick cut, and Jans' back was cut up badly. I was a guard at the Penitentiary from the 1st of September to the 16th of December, 1873. I was night-watch. The latest hour at which I have let prisoners in was 2 o'clock in the morning. The bell tapped and prison closed at 8 p. m. The convicts let in late had generally been employed at Warden's house. Have let in the Mexican, Antonio, in a state of intoxication without a guard. Mr. Hines went out on a pleasure trip last November in a carriage with a lady, and had a prisoner, Edward Albritton, along on horseback. He was gone all day. The convict followed along behind and managed his own horse. Mr. Reed told me when I was tired to put on prisoners as guards and then go to sleep. He always told me what prisoners to put on. I had full confidence in them. They were a good set of men. I know James Hines. Have known him to be drunk on the streets of Cañon City during Reed's administration, but do not think that Reed knew of it at the time. Once I took him to my house at 2 p. m., and he did not go to the Penitentiary until the night of the next day after dark. The reason I took him to my house was because I asked Murray (the barkeeper) to let me put him up stairs, but he refused, saying he didn't want any drunken men there. As I was leading him along he fell down. I know Duber. Have known him to be in bed asleep when he should have been on duty, at 8 p. m., the prison keys in his drawer, and five or six prisoners having a good time in the kitchen. I have let them into the prison without Duber knowing it, I think. I do not say he was drunk. There was part of a bottle of whiskey on the table. This was in September. For two weeks have not seen prisoners down town without guard.

C. H. Buttolph sworn: Have seen a prisoner out all day Sunday fishing, without guard, two and a half or three miles from the prison. Have known prisoners to come in as late as 12

o'clock at night without guard—life prisoners. The above has happened since the first of July last. Before Mr. Reed took charge the prisoners drove teams and ran all over.

George W. Seidmore sworn: I know that during the last two months Hill, since dead, a life prisoner, and two others, Lottis and Kelley, came into the prison at 11 o'clock at night. There had been a party at Reed's, and these prisoners had been waiting on the party. I was standing guard for Redfield, who was at the party. The prisoners rattled at the door and I let them in. The negro convict was out all night. Have seen Hines out riding with a lady and the negro convict following on horseback, sometimes half a mile behind. There was another carriage in the rear of Hines', but did not go as far as Hines did. Since Mr. Reed has been in charge I have seen two prisoners three miles from the prison hauling wood. At one time I saw two prisoners burning brick-kilns alone at night, no guard in sight. Have seen Mr. Hines acting as if drunk on the street—like men do when they are drunk. Was building a house, and had two prisoners five days at a dollar a day. Paid or am to account to Reed for the work. When I say Mr. Hines acted as if drunk I mean that he was walking crooked. At one time Duber was supporting him; at another time Mr. Redfield was.

Dr. Thomas H. Craven and Samuel H. Boyd, Esq., were called before the committee, and certified that they were acquainted with all the foregoing named witnesses except Mr. Buttolph, and that they were men whose statements under oath are to be believed.

The witnesses were examined separately.

Your committee, in view of all the facts elicited by their visit to Cañon City, would suggest that they consider it a matter of economy and prudence, if not a necessity, for the Territory to take charge of the prison, for the following among other reasons:

1. The prison does not now furnish accommodation for the needs of the Territory, and there is no probability that, while it remains under control of the general government, its capacity will be enlarged.

2. The mere item of boarding our prisoners amounts to a larger sum than the entire cost of maintaining the Penitentiary, according to the figures given by the Warden, and the Territory receives no benefit for the labor that is demanded from the convicts.

3. If the prison were under control of the Territory, the labor of convicts could be utilized for several years to profit and advantage in the following directions:

Erecting necessary buildings to enable the Territory to take care of all its convicts. By employing two competent masons for overseers, whose wages could be paid in part by hiring out convicts, the work could nearly all be done by prison labor.

Building a substantial stone wall around the prison.

Planting shade trees and otherwise improving the remainder of the prison grounds.

Enlarging the ditch by which water is conveyed to the grounds from the Arkansas River, and which can be made to supply an unlimited amount of water power at all seasons of the year.

4. If the Territory had direct control of the prison such discipline could be enforced as might be deemed more in accord with the views of the people than the regulations which may be adopted for the prison's government by U. S. authorities, over which the Territory can exercise no supervision, and against the adoption of which we have no remedy except what may be secured through petition and by protest.

5. We recommend, further, that a joint memorial be adopted, asking Congress to appropriate the sum of twenty thousand dollars (\$20,000), in order to enable the Territory to properly utilize convict labor, and place the Penitentiary upon a self-sustaining basis at as early a day as possible.

Respectfully submitted,

J. W. HALL, Council Committee.

L. HARSII, Chairman House Committee.

WM. A. AMSBURY, of House Committee.
