EXECUTIVE ORDER

ENTRY PERMITS FOR CATTLE AMENDING PREVIOUS EXECUTIVE ORDER

D0019 79

I, Richard D. Lamm, Governor of the State of Colorado, do hereby amend the resolved clause of the Executive Order, dated the fourteenth day of February, A.D., 1978, which pertains to entry permits for cattle into this State to read as follows:

All cattle consigned to Colorado from any point outside the State of Colorado, be accompanied by an entry permit issued by the Colorado Department of Agriculture. The permit must accompany the shipment in addition to an official health certificate, from the state of origin of the cattle, certifying that the cattle have been officially treated with a scabicide approved by the United States Department of Agriculture within 10 days of shipment; or the cattle may be moved under permit from the Colorado State Veterinarian's office to a certified treatment facility within Colorado for official treatment within 24 hours of arrival or, at the first unloading point, whichever occurs first. Interstate cattle shall not be mixed with or allowed to intermingle with resident cattle upon arrival and prior to official treatment. The only exceptions to this Order are:

1. Cattle consigned directly to a Federal inspected slaughter establishment for immediate slaughter (24 hours) in which case only an entry permit and health certificate are required.
2. Cattle consigned to livestock markets shall be treated prior to leaving the livestock market facilities unless positively identified and consigned directly to a Federally inspected slaughter facility for slaughter within 24 hours or on the next working day; or, moved directly under market scabies release to a purchaser's feedlot premises which have dipping facilities approved by the State Veterinarian to be dipped within 24 hours after arrival and before being mixed with other cattle. Such shipments must either stay on the premises until consigned to slaughter or be redipped at the time of removal from the feedlot. All animals shipped on the truck under this exception must be going to the same premises and be dipped.
3. Lactating dairy cows shall not be intermingled or mixed with any other cattle until a visual inspection by a Colorado Department of Agriculture official shall certify the animal free of scabies by inspection.

FURTHER, I do provide that this Executive Order shall remain in full force and effect until revoked by subsequent Executive Order and shall take effect at 12:01 A.M., Saturday, October 6, 1979.

GIVEN under my hand and the Executive Seal of the State of Colorado, this fifth day of October, A.D., 1979.

Richard D. Lamm
Governor
