As an injury epidemiologist who has spent a great deal of the last decade of my career focused on youth concussion surveillance, epidemiology, and prevention I am very aware of the incredibly important work conducted by the Colorado Traumatic Brain Injury Program. As a Professor and former public health department employee I realize such programs rely upon citizen's willingness to serve in roles such as the members of the Colorado TBI Trust Fund Board. I believe my passion for the topic coupled with my respect for the organization's work make me well suited to serve on this board.
