Colorado General Assembly 200 East Colfax Denver, Colorado 80203

Legislative Audit Committee

Representative Cindy Acree – Chair Representative Angela Williams – Vice Chair Senator Lucia Guzman Representative James Kerr Senator Steve King Representative Joe Miklosi Senator Scott Renfroe Senator Lois Tochtrop

Dianne E. Ray, CPA, Office of the State Auditor 200 East 14th Avenue Denver, Colorado 80203

In accordance with C.R.S. 40-8.7-110 and C.R.S. 39-29-109 (1.9)(g)(IV), Energy Outreach Colorado is pleased to deliver this written report as a summary of its efforts concerning the creation of the Low-Income Energy Assistance Act (Senate Bill 2005-001). This act went into effect September 1, 2006. We are pleased to present this report which covers 2011 in its entirety. This report also includes information from the allocation from the severance tax trust fund (House Bill 2006-1200) received by Energy Outreach Colorado from the Governor's office in April 2011.

As prescribed in statute, this report includes the following information for both the Low-Income Energy Assistance Act and for the Severance Tax Trust Fund:

- 1. An itemized report of moneys received by Energy Outreach Colorado from each utility as a result of the opt-in program created in Senate Bill 2005-001;
- 2. The amount of moneys distributed, the type of assistance provided, the geographic area of the state served, and an itemization of the programs through which the moneys were expended as a result of the opt-in program created in Senate Bill 2005-001 as well as the monies received from the office of the governor from severance tax from HB 06-1200;
- 3. The number of low-income households served, by utility and by the type of assistance provided as a result of the opt-in program created in Senate Bill 2005-001 as well as the monies received from the office of the Governor from severance tax from HB 06-1200;
- 4. An audited financial statement from Energy Outreach Colorado, for the period October 1, 2010 September 30, 2011; and

5. A summary of how the moneys collected (as a result of the opt-in program created in Senate Bill 2005-001 (C.R.S. 40-8.7-101-111)) were generated and the number of customers participating in the program.

This report will be available on Monday, April 2, 2011 for the public to view on Energy Outreach Colorado's website, www.EnergyOutreach.org, and a written copy will be provided to any member of the public upon request.

We appreciate the opportunity to educate and inform all of you on the success of the Low-Income Energy Assistance Act and welcome any questions that you may have after reviewing this report. Please feel free to contact me at 303-226-5050 or via email at sarnold@EnergyOutreach.org.

Respectfully,

Skip Arnold

Executive Director

Note: According to C.R.S. 24-1-136 (9), this report was distributed to the Colorado General Assembly in the following manner:

- One copy of such report in each house of the general assembly,
- Six copies in the joint legislative library, and
- Four copies with the state librarian for the state publications depository and distribution center.
- Electronic notification to the legislators shall include the report or a hyperlink to the web site where the report is located. A legislator may request delivery of a hard copy of any report.

Reference: Exact language from C.R.S 40-8.7-110 – Reports.

- 1) The organization shall submit a written report to the general assembly, the legislative audit committee, and the office of the state auditor on or before March 31 of each year, beginning in 2007, that covers the immediately preceding calendar year. The report shall include:
 - (a) An itemized account of moneys received by the organization from each utility;
- (b) The amount of moneys distributed, the type of assistance provided, the geographic area of the state served, and an itemization of the programs through which the moneys are expended;
- (c) The number of low-income households served, by utility and by type of assistance provided;
 - (d) An audited financial statement from the organization; and
- (e) A summary of how the moneys collected were generated, including the number of customers participating in the program.
- (1.5) To the extent applicable, the organization shall include in the report the information required by paragraphs (b) and (c) of subsection (1) of this section for moneys received from the governor's energy office pursuant to section 40-8.7-112 (2) (a)
 - (2) The report shall be made available to the public for review.

Independent Auditor's Report

Board of Directors Energy Outreach Colorado:

We have audited the accompanying statement of financial position of Energy Outreach Colorado as of September 30, 2011, and the related statements of activities, functional expenses, and cash flows for the year then ended. These financial statements are the responsibility of Energy Outreach's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with U.S. generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Energy Outreach as of September 30, 2011, and the changes in its net assets and its cash flows for the year then ended in conformity with U.S. generally accepted accounting principles.

KUNDINGER, CORDER : ENGLE, A.C.

Notes to Financial Statements

September 30, 2011

(1) Summary of Significant Accounting Policies

(a) General

Energy Outreach Colorado (Energy Outreach), formerly Colorado Energy Assistance Foundation, was established in 1989 to enable the Colorado Commission on Low-Income Energy Assistance (the Commission) to raise funds for the purpose of providing cash payments to low-income individuals and families to meet the cost of home energy. A significant portion of the funds are distributed through the Colorado Low Income Home Energy Assistance Program (LEAP). In addition to LEAP, Energy Outreach delivers funds and services through a network of agencies in the State of Colorado. Energy Outreach provides funds for creative energy efficiency, educational and housing ventures related to conservation of resources through its Energy Savings Grants and educational grants. Energy Outreach also provides energy efficient upgrades for non-profit agencies throughout the state and the city of Denver through its Nonprofit Energy Efficiency Program (NEEP).

(b) Basis of Accounting

The accompanying financial statements have been prepared on the accrual basis of accounting and, accordingly, reflect all significant receivables, payables, and other liabilities.

(c) Financial Statement Presentation

Information regarding the financial position and activities of Energy Outreach is reported according to three classes of net assets: unrestricted, temporarily restricted, and permanently restricted. There were no permanently restricted net assets at September 30, 2011.

(d) Contributions

Contributions received are recorded as unrestricted, temporarily restricted, or permanently restricted support, depending on the existence or nature of any donor restrictions. All contributions are considered to be available for unrestricted use unless specifically restricted by the donor.

Donor-restricted support is reported as an increase in temporarily or permanently restricted net assets, depending on the nature of the restriction. When a restriction expires (that is, when a stipulated time restriction ends or purpose restriction is accomplished), temporarily restricted net assets are reclassified to unrestricted net assets and reported in the statement of activities as net assets released from restrictions.

(e) Contributions Receivable

Unconditional contributions receivable are recognized as revenue in the period the pledge is received. Contributions receivable are recorded at net realizable value if expected to be collected in one year and at fair value if expected to be collected in more than one year. Conditional contributions receivable are recognized when the conditions on which they depend are substantially met.

Notes to Financial Statements, Continued

(1) Summary of Significant Accounting Policies, Continued

(e) Contributions Receivable, Continued

Energy Outreach uses the allowance method to determine uncollectible contributions receivable. The allowance is based on prior years' experience and management's analysis of specific pledges. At September 30, 2011, Energy Outreach had no allowance for uncollectible contributions receivable.

(f) Donated Goods and Services

Contributed services are recognized as contributions if the services (a) create or enhance nonfinancial assets or (b) require specialized skills, are performed by people with those skills, and would otherwise be purchased by the organization. Accordingly, these are reflected as contributions in the accompanying statements at their estimated values at date of receipt. Contributed goods are recorded as contributions at their estimated fair value at the date of donation. The amounts are recorded as both revenue and expense in the statement of activities.

(g) Cash and Cash Equivalents

Energy Outreach considers all unrestricted highly liquid investments with an initial maturity of three months or less, and which are not held by investment managers as a part of the investments portfolio, to be cash equivalents.

(h) Accounts Receivable

Accounts receivable represent amounts due resulting from the performance of services provided to other organizations and individuals. The allowance for doubtful accounts is based on past experience and on analysis of the collectibility of current accounts receivable. Accounts deemed uncollectible are charged to the allowance in the year they are deemed uncollectible. Accounts receivable are considered to be past due based on contractual terms. Management considers all receivables to be fully collectible at September 30, 2011.

(i) Investments

Investments in marketable securities with readily determinable fair values and all investments in debt securities are stated at their fair values in the statement of financial position. Net unrealized gains and losses are included in the change in net assets in the statement of activities. The market values for alternative investments represent the Energy Outreach's pro-rata interest in the net assets of each investment and are based on financial information determined and reported by investment managers or on the basis of other information evaluated periodically by Energy Outreach. Alternative investments are generally illiquid and may be valued differently should readily available markets exist for such investments. Because of inherent uncertainties of the valuation of alternative investments, the recorded market values of such investments may differ significantly from values that would have been used had a ready market existed.

Notes to Financial Statements, Continued

(1) Summary of Significant Accounting Policies, Continued

(i) Investments, Continued

Energy Outreach has an investment policy that permits it to provide additional funding for its on-going programs using a portion of the corpus of its investments. The amount of the additional funding available under that policy would be based on the Yale-Stanford model, which considers both inflation and the value of the investments. During the year ended September 30, 2011, \$603,000 of corpus was utilized for core program activities.

(j) Property and Equipment

Property and equipment are recorded at cost and depreciated using the straight-line method over the estimated useful lives of the assets, which are generally three to five years. Cost of furniture and equipment at September 30, 2011 was \$62,276. Cost of leasehold improvements amounted to \$54,464. At September 30, 2011 all furniture, equipment and leasehold improvements were fully depreciated.

(k) Concentrations of Credit Risk

Financial instruments that potentially subject Energy Outreach to concentrations of credit risk consist principally of investment securities. Energy Outreach places its cash and temporary investments with creditworthy, high quality institutions. A significant portion of the funds are not insured by the FDIC or related institutions. Energy Outreach's investments in fixed income and equity securities are managed by investment advisors who are engaged by the Directors. These investments are subject to the risk of fluctuations in market value but, in the opinion of the Directors, the risk is appropriate in view of the amount and term of the investment funds. Credit risk with respect to receivables is limited due to the number and credit worthiness of the government entities, individuals and organizations from whom the amounts are due.

(l) Income Taxes

Energy Outreach is exempt from federal income taxes on its exempt function income under the provisions of Section 501(c)(3) of the Internal Revenue Code, and qualifies for the charitable contribution deduction. However, income from activities not directly related to the Energy Outreach's tax-exempt purpose is subject to taxation as unrelated business income. During fiscal year 2011, Energy Outreach incurred \$1,756 in federal income tax expense and \$0 in state income tax expense related to unrelated taxable income on its investments.

Energy Outreach adopted the Accounting for Uncertainty in Income Taxes accounting standard which requires Energy Outreach to determine whether a tax position (and the related tax benefit) is more likely than not to be sustained upon examination by the applicable taxing authority, based solely on the technical merits of the position. Energy Outreach believes it has appropriate support for any tax positions taken, and as such, does not have any uncertain tax positions that are significant to the financial statements. Energy Outreach's Returns of Organization Exempt from Income Tax (Forms 990) for the previous three years are subject to examination by the IRS, generally for three years after initial filing.

Notes to Financial Statements, Continued

(1) Summary of Significant Accounting Policies, Continued

(m) Functional Allocation of Expenses

The costs of providing the various programs and other activities have been summarized on a functional basis in the statement of functional expenses. Accordingly, certain costs have been allocated among the programs and supporting services benefited.

(n) Allocation of Joint Costs

During the year ended September 30, 2011, Energy Outreach incurred joint costs of \$35,728 for informational materials that included fund raising appeals. Of these costs, \$22,401 was allocated to program, \$5,600 was allocated to general and administrative, and \$7,727 was allocated to fund raising expense.

(o) Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

(p) Subsequent Events

Management is required to evaluate, through the date the financial statements are issued or available to be issued, events or transactions that may require recognition or disclosure in the financial statements, and to disclose the date through which subsequent events were evaluated. Energy Outreach's financial statements were available to be issued on December 16, 2011, and this is the date through which subsequent events were evaluated. Energy Outreach did not identify any subsequent events requiring disclosure.

(2) State Appropriation

The State of Colorado has appropriated funds from the Severance Tax Trust Fund (the Fund) to the Office of the Governor to be distributed to Energy Outreach Colorado for utility assistance during months when LEAP is not accepting applications for the low income energy assistance program (May 1 through Oct. 31). Depending on the surplus in the Fund for the state fiscal years ending June 30, 2009 through 2013, funding of \$3,250,000 may be appropriated annually, to be distributed April 1 of the following year. In 2011, Energy Outreach received \$3,250,000 in distributions from the Fund. Because the appropriations are conditioned on future surpluses, as well as potential actions by the 2012 Colorado General Assembly, a receivable at September 30, 2011 has not been recorded for any remaining State Appropriation that may be received.

Notes to Financial Statements, Continued

(3) Investment Securities

Investments are stated in the financial statements at fair value. Fair value is determined as more fully described under the fair value measurements policy below. Energy Outreach's management is responsible for the fair value measurement of investments reported in the financial statements and believes that the reported values are reasonable. Unrealized gains and losses are reported as increases or decreases in unrestricted net assets because the gains and losses are unrestricted. At September 30, 2011, investments consisted of the following:

Equity funds and managed equities	\$ 12,735,826
Fixed income funds	5,893,429
Investment in limited partnership	1,412,108
Money market funds	134,535
	\$ <u>20,175,898</u>

Energy Outreach's investment in limited partnership consists of managed investment funds. Market values are estimated by the management of the limited partnership and are allocated to calculate Energy Outreach's pro rata interest in the net assets of the entity. The partnership is audited by other independent accountants each year, but is not audited as of Energy Outreach's September 30 fiscal year-end. The September 30, 2011 unaudited market value of Energy Outreach's investment in the partnership has been estimated by its management to be \$1,412,108.

Investment income is summarized as follows:

Investment interest and dividend income	\$ 560,062
Realized and unrealized gains on investments	(505,357)
	54,705
Less investment expenses	(53,697)
	\$1,008

(4) Fair Value Measurements

Energy Outreach reports required types of financial instruments in accordance with fair value accounting standards. Fair value is the price that would be received to sell an asset or paid to transfer liability in an orderly transaction between market participants at the measurement date. These standards require an entity to maximize the use of observable inputs (such as quoted prices in active markets) and minimize the use of unobservable inputs (such as appraisals or other valuation techniques) to determine fair value. In addition, Energy Outreach reports certain investments using the net asset value per share as determined by investment managers under the so called "practical expedient." The practical expedient allows net asset value per share to represent fair value for reporting purposes when the criteria for using this method are met. Fair value measurement standards also require Energy Outreach to classify these financial instruments into a three-level hierarchy, based on the priority of inputs to the valuation technique or in accordance with net asset value practical expedient rules, which allow for either Level 2 or Level 3 reporting depending on lock up and notice periods associated with the underlying funds. Instruments measured and reported at fair value are classified and disclosed in one of the following categories:

Notes to Financial Statements, Continued

(4) Fair Value Measurements, Continued

Level 1 – Quoted prices are available in active markets for identical instruments as of the reporting date. Instruments which are generally included in this category include listed equity and debt securities publicly traded on an exchange, listed derivatives, cash and cash equivalents.

Level 2 – Pricing inputs are other than quoted prices in active markets, which are either directly or indirectly observable as of the reporting date, and fair value is determined through the use of models or other valuation methodologies. Investments which are generally included in this category include corporate and government bonds, less liquid and restricted equity securities and certain over-the-counter derivatives. Level 2 also includes practical expedient investments with notice periods for redemption of 90 days or less.

Level 3 – Pricing inputs are unobservable for the instrument and include situations where there is little, if any, market activity for the instrument. The inputs into the determination of fair value require significant management judgment or estimation. Investments that are included in this category generally include limited partnership interests in corporate private equity and real estate funds, funds of hedge funds, and distressed debt. Level 3 also includes practical expedient investments with notice periods for redemption of more than 90 days.

In some instances, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such instances, an instrument's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. These classifications (Level 1, 2 and 3) are intended to reflect the observability of inputs used in the valuation of investments and are not necessarily an indication of risk or liquidity.

Market price is affected by a number of factors, including the type of instrument and the characteristics specific to the instrument, as well as the effects of market, interest and credit risk. Instruments with readily available active quoted prices or for which fair value can be measured from actively quoted prices generally will have a higher degree of market price observability and a lesser degree of judgment used in measuring fair value. It is reasonably possible that change in values of these instruments will occur in the near term and that such changes could materially affect amounts reported in Energy Outreach's financial statements. The following table summarizes the valuation of Energy Outreach's investments by the above fair value hierarchy levels as of September 30, 2011:

	Fair Value	(Level 1)	(Level 2)	(Level 3)
Fixed income funds	\$ 5,893,429	5,893,429	•	-
Equity funds and				
managed equities	12,735,826	12,735,826	-	_
Money market funds	134,535	134,535	-	_
Investment in limited				
partnership	1,412,108			<u>1,412,108</u>
Total	\$ <u>20,175,898</u>	18,763,790		<u>1,412,108</u>

Notes to Financial Statements, Continued

(4) Fair Value Measurements, Continued

Fair values for the Level 3 investments are determined by using one or more of the following methods: quoted market prices, appraisals and other relevant information generated by market transactions, net asset value per share as determined by investment managers under the so called "practical expedient", and by calculating the present value of future distributions expected to be received

The changes in investments measured at fair value for which Energy Outreach has used Level 3 inputs to determine fair value are as follows:

Balance as of September 30, 2010	\$ 1,335,431
Total realized and unrealized gains	76,677
Balance as of September 30, 2011	\$ <u>1,412,108</u>

The standard also requires disclosure for Level 3 investments of the change in unrealized gain (loss) included in the change in net assets related to investments still held at the reporting date. At September 30, 2011, this was an unrealized gain of \$76,677.

The following table summarizes the significant information required by ASU No. 2009-12 as of September 30, 2011:

	Fair Value	Unfunded Commitments	Redemption Frequency	Redemption Notice Period
Limited Partnership (a)	\$ 1,412,108	None	Semi-annually	95 days

(a) The limited partnership was organized for the purpose of trading and investing in securities and private investment companies. The partnership focuses on managers who use a variety of strategies that are hedged and uncorrelated to the broader markets, including: event-driven investing, credit opportunities, distressed securities, equity market neutral, and relative value multi-strategy.

(5) Unclaimed Utility Deposits and Refunds

Unclaimed utility deposits represent revenue that is available to Energy Outreach as a result of the enactment by the Colorado Legislature in 1990 of a bill which requires utilities to remit to Energy Outreach unclaimed customer and security deposits two or more years old. In addition, the Colorado Legislature passed a bill in 1992, whereby the PUC can order up to 90% of undistributed overcharge refunds to be made available to Energy Outreach on a case-by-case basis. During fiscal year 2011, Energy Outreach received \$158,248 from unclaimed deposits and refunds. Under the Colorado Revised Statutes, any unclaimed deposits and refunds received by Energy Outreach must be forwarded to LEAP, and as such are not included in total revenues of Energy Outreach.

Energy Outreach also received unclaimed LEAP payments of \$74,073 refunded to Energy Outreach by various utility companies.

Notes to Financial Statements, Continued

(6) Significant Contributions

During the year ended September 30, 2011, Xcel made contributions to Energy Outreach totaling \$5,115,886 based on customer late payments. Xcel also provided funding for the non-profit energy efficiency program totaling \$859,779 and remitted \$55,368 representing unclaimed LEAP payments to Energy Outreach. Xcel customers contributed \$1,484,428 to Energy Outreach during the year ended September 30, 2011.

(7) Employee Retirement Plan

Energy Outreach has a retirement plan for employees, which requires Energy Outreach to contribute 8% of an employee's salary to the plan. The contributions are vested over a two-year period. Energy Outreach's contributions to the plan were \$90,373 in 2011. In addition, full-time employees may contribute to a tax deferred annuity plan after they have been employed by Energy Outreach for 90 days.

(8) Restrictions on Net Assets

Temporarily restricted net assets at September 30, 2011 consist of \$16,277 of unexpended funds related to restricted grants. Net assets released from restrictions during 2011 consisted of expenditures totaling \$8,785,328 related to restricted grants and contributions.

(9) Commitment

Energy Outreach is obligated under two operating leases for rental of office space through February 28, 2012. Rent expense for these office space leases was \$99,806 in 2011. Energy Outreach has a separate operating lease agreement for rental of a copier through February 2015. Rent expense under this lease totaled \$4,431 during 2011. Rental commitments remaining under all leases for future years are as follows:

2012	\$ 43,312
2013	2,904
2014	2,904
2015	1,452
	\$ <u>50,572</u>
