Validation of Performance Measures

for Foothills Behavioral Health Partners, LLC

Validation Overview

The Colorado State Medicaid agency, the Department of Health Care Policy and Financing (the Department), requires external quality review (EQR) activities as per the Balanced Budget Act of 1997 (BBA), 42 Code of Federal Regulations (CFR) §438.358. One of these activities is the validation of performance measures. The Department has contracted with Health Services Advisory Group, Inc. (HSAG), an external quality review organization (EQRO), to conduct the validation of performance measures for five Colorado behavioral health organizations (BHOs) for the measurement period of July 1, 2011, through June 30, 2012 (fiscal year [FY] 2011–2012). The BHOs provide mental health services to Medicaid-eligible recipients.

The Department identified the performance measures for validation. Some of these measures were calculated by the Department using data submitted by the BHOs; other measures were calculated by the BHOs. The measures came from a number of sources, including claims/encounter and enrollment/eligibility data. HSAG conducted the validation activities as outlined in the Centers for Medicare & Medicaid Services (CMS) publication, *EQR Protocol 2: Validation for Performance Measures Reported by the MCO: A Mandatory Protocol for External Quality Review (EQR)*, Version 2.0, September, 2012 (CMS Performance Measure Validation Protocol). This report uses three sources—the BHO and Department versions of the Information Systems Capabilities Assessment Tool (ISCAT), site reviews, and source code—to tabulate findings for each BHO.

Foothills Behavioral Health Partners, LLC Information

Information about Foothills Behavioral Health Partners, LLC (FBHP) appears in Table 1.

Site Visit Date:	January 16, 2013	

Page 2

Performance Measures for Validation

HSAG validated a set of performance measure indicators that were selected by the Department. These measures represented HEDIS[®]-like measures and measures developed by the Department. The performance measures were calculated on an annual basis. Table 2 lists the performance measure indicators that were validated and who calculated the performance indicator. The indicators in Table 2 are numbered as they appear in the scope document.

Table 2—List of Performance Measure Indicators for Foothills Behavioral Health Partners, LLC		
	Indicator	Calculated by:
1	Hospital Recidivism	ВНО
8–11	Overall Penetration Rates	Department
8–11	Penetration Rates by Service Category	Department
8–11	Penetration Rates by Age Category	Department
8–11	Penetration Rates by Medicaid Eligibility Category	Department
13	Follow-up After Hospitalization for Mental Illness (7- and 30-day follow-up)	ВНО
14	Percent of Members with SMI with a Focal Point of Behavioral Health Care	ВНО
15	Improving Physical Healthcare Access	Department
16	Inpatient Utilization	ВНО
17	Hospital Average Length of Stay	ВНО
18	Emergency Department Utilization	ВНО

Description of Validation Activities

Preaudit Strategy

HSAG conducted the validation activities outlined in the CMS Performance Measure Validation Protocol. The Department provided the performance measure definitions for review by the HSAG validation team (Appendix A). The Department and BHOs worked together to develop this document, which was first used for performance measure validation purposes in FY 2007–2008. The Department and BHOs worked on additional improvements of these measures and the specification document in the Department's Behavioral Health Quality Improvement Committee meeting, and a revised specification document was used for FY 2011–2012 performance measure reporting purposes. Based on the measure definitions and reporting guidelines, HSAG developed the following:

- a. Measure-specific worksheets based on Attachment I of the CMS Performance Measure Validation Protocol.
- b. A documentation request, which consisted of the ISCAT or Appendix Z of the CMS Performance Measure Validation Protocol.
- c. A customized ISCAT to collect the necessary data consistent with Colorado's mental health service delivery model. The ISCAT was forwarded to **FBHP** with a timetable for completion and instructions for submission. HSAG responded to ISCAT-related questions directly from **FBHP** during the pre-on-site phase. HSAG prepared an agenda describing all on-site visit activities and indicating the type of staff needed for each session. The agendas were forwarded to **FBHP** approximately one month prior to the on-site visit.

Validation Team

The HSAG performance measure validation team was assembled based on the full complement of skills required for the validation and requirements of this particular BHO. The team consisted of a lead auditor and validation team members, as described in Table 3.

Table 3—HSAG Validation Team		
Name/Team Position Skills and Expertise		
David Mabb, MS, CHCA Director, Audits Lead Auditor	Auditing expertise, performance measure knowledge, source code review management, statistics, analysis, and source code programming knowledge.	
Judy Yip, Ph.D. Secondary Auditor	Auditor in training.	
Tammy GianFrancisco Project Leader	Health plan and physician organization communications, project coordination, HEDIS and P4P knowledge, scheduling, organization, tracking, and administrative support.	

The HSAG lead auditor and secondary auditor participated in the on-site review at the BHO. The remaining team members conducted their work at their respective HSAG offices.

Technical Methods of Data Collection and Analysis

The CMS Performance Measure Validation Protocol identifies key types of data that should be reviewed as part of the validation process. Below is a list of the types of data collected and how HSAG conducted an analysis of this data:

- Information Systems Capabilities Assessment Tools (ISCATs) were requested and received from each BHO and the Department. Upon receipt by HSAG, the ISCATs were reviewed to ensure that all sections were completed. The ISCATs were then forwarded to the validation team for review. The review identified issues or items that needed further follow-up.
- Source code (programming language) for performance measures was requested and was submitted by the Department and the BHOs. The validation team completed query review and observation of program logic flow to ensure compliance with performance measure definitions during the site visit. Areas of deviation were identified and shared with the lead auditor to evaluate the impact of the deviation on the measure and assess the degree of bias (if any).
- Performance measure reports for FY 2011–2012 were reviewed by the validation team. The team also reviewed previous reports for trends and rate reasonability.
- Supportive documentation included any documentation that provided reviewers with additional
 information to complete the validation process, including policies and procedures, file layouts,
 system flow diagrams, system log files, and data collection process descriptions. All supportive
 documentation was reviewed by the validation team, with issues or clarifications flagged for
 further follow-up.

On-Site Activities

HSAG conducted an on-site visit with both the Department and **FBHP**. HSAG used several methods to collect information, including interviews, system demonstration, review of data output files, primary source verification, observation of data processing, and review of data reports. The on-site visit activities are described below.

- Opening meeting—included introductions of the validation team and key FBHP and Department staff involved in the performance measure activities. The review purpose, required documentation, basic meeting logistics, and queries to be performed were discussed.
- Evaluation of system compliance—included a review of the information systems assessment, focusing on the processing of claims, encounter, member, and provider data. Reviewers performed primary source verification on a random sample of members, validating enrollment and encounter data for a given date of service within both the membership and encounter data systems. Additionally, the review evaluated the processes used to collect and calculate performance measure data, including accurate numerator and denominator identification, and algorithmic compliance to determine if rate calculations were performed correctly.

- Review of ISCAT and supportive documentation—included a review of the processes used to collect, store, validate, and report performance measure data. This session was designed to be interactive with key FBHP and Department staff. The goal of this session was to obtain a complete picture of the degree of compliance with written documentation. HSAG used interviews to confirm findings from the documentation review, expand or clarify outstanding issues, and ascertain that written policies and procedures were used and followed in daily practice.
- Overview of data integration and control procedures—included discussion and observation of source code logic and a review of how all data sources were combined. The data file used to report the selected performance measures was produced. HSAG performed primary source verification to further validate the output files, and reviewed backup documentation on data integration. HSAG also addressed data control and security procedures during this session.
- Closing conference—provided a summary of preliminary findings based on the review of the ISCAT and the on-site visit, and a review of the documentation requirements for any post-on-site visit activities.

HSAG conducted several interviews with key **FBHP** and Department staff members involved with performance measure reporting. Table 4 lists the key interviewees for **FBHP**.

Data Integration, Data Control, and Performance Measure Documentation

The calculation of performance measures includes several crucial aspects: data integration, data control, and documentation of performance measure calculations. Each section below describes the validation processes used and the validation findings. For more detailed information, please see Appendix B.

Data Integration

X Acceptable

X Acceptable

Not acceptable

Not acceptable

Accurate data integration is essential to calculating valid performance measures. The steps used to combine various data sources, including encounter data and eligibility data, must be carefully controlled and validated. HSAG validated the data integration process used by the Department and the BHO. This validation included a comparison of source data to warehouse files and a review of file consolidations or extracts, data integration documentation, source code, production activity logs, and linking mechanisms. By evaluating linking mechanisms, HSAG was able to determine how different data sources (i.e., claims data and membership data) interacted with one another and how certain elements were consolidated readily and used efficiently. Overall, the data integration processes used by the Department and the BHO were determined by the audit team to be:

Data Control				
quality assurance pra processing of data, as	frastructure of FBHP ctice and backup productive and backup productive well as provide data productive that the state of	cedure must be sound rotection in the event	d to ensure timely of a disaster. HSAG	and accurate validated the
<u> </u>	s used by FBHP , which, and related policies		•	, I
place at FBHP were d	letermined by the audit	team to be:		•

Performance Measure Documentation

Complete and sufficient documentation is necessary to support validation activities. While interviews and system demonstrations provided supplementary information, the majority of the validation review findings were based on documentation provided by **FBHP** and the Department. HSAG reviewed all related documentation, which included the completed ISCAT, job logs, computer programming code, output files, work flow diagrams, narrative descriptions of performance measure calculations, and other related documentation. Overall, the documentation of performance measure data collection and calculations by **FBHP** and the Department was determined by the audit team to be:

\boxtimes	Acceptable
	Not acceptable

Validation Findings

Through the validation process, the review team identified overall strengths and areas for improvement for **FBHP**. In addition, the team evaluated **FBHP**'s data systems for the processing of each type of data used for reporting the performance measures. **FBHP** contracted with ValueOptions (VO) to process eligibility, enrollment, and claims/encounters, credentialing, provider network management, clinical and utilization management, as well as to calculate rates for the performance measures required by the Department. General findings are indicated below.

Strengths

Similarly to prior years, **FBHP** demonstrated outstanding monitoring of the mental health center (MHC) monthly encounter submissions via a report card format, which included drill-down capabilities for data mining and other activities. The staff members responsible for performance measure calculation and reporting were the same staff as in prior years and continue to be a cohesive team with a high degree of technical expertise.

FBHP also demonstrated good oversight of its MHCs and received all claims/encounter data electronically. **FBHP** had an extra layer of validation and reconciliation processes for encounter data completeness and accuracy. **FBHP** issued a reconciliation report quarterly to MHCs and made sure all encounters sent could be reconciled before submission to the State. Additionally, **FBHP** also reconciled the encounter data between its 837 file submission with the flat file submission to the Department. Furthermore, **FBHP** sent all encounters (Medicaid and non-Medicaid) to VO to ensure that VO had complete data. (This helped for retro-enrollments to ensure that encounters were already submitted.) The amount of encounter data rejection to the Department was very low, indicating **FBHP** has complete and accurate encounter data.

FBHP also participated with the Department and the other BHOs in updating the scope document, which was considerably improved over last year.

Areas for Improvement

FBHP should continue to work with the Department and other BHOs to address and resolve issues identified in the scope document, such as clarifying the type of mental health practitioners required and required diagnoses for select measures.

FBHP should implement a rate validation process to ensure accurate rates. This process should include checking the source data using various data sorts to ensure that proper date ranges and codes are used, as well as ensuring all data for the review period have been included.

FBHP should ensure that the length of stay for same day discharge is accurately calculated in its source code.

Eligibility Data System Findings

HSAG had no concerns with **FBHP**'s process for receipt and processing of eligibility data from the State. There were no major changes in **FBHP** processes compared to last year. **FBHP**'s finance department retrieved the proprietary flat file from the State, which was loaded into the local system monthly. Real-time eligibility was confirmed via the State's portal. Eligibility data were transferred to a Microsoft SQL server for reporting access. Eligibility updates from MHCs were checked against the non-Medicaid files and capitation payment data to ensure eligibility. VO indicated that the issues associated with the 834 eligibility file occurred before the 5010 implementation. No further related issues were reported.

Claims/Encounter Data System Findings

HSAG had no concerns regarding **FBHP**'s process for receiving and reporting claims and encounter data. There were no major changes in the processes compared to last year; the MHCs used either Qualifacts/CareLogic or Profiler as their internal system, and **FBHP** received data from the MHCs in an electronic format. The volumes of monthly encounter files were carefully monitored by both **FBHP** and the MHCs via the data report card. Each MHC received a report card with detailed information on the data **FBHP** received from them. MHCs with low volumes or high error rates were researched and continually corrected. In reviewing the data report card associated with the measurement year, HSAG found that one federally qualified health center (FQHC), Clinica, had a very high non-submittable rate. Further discussion with **FBHP** and VO revealed that this FQHC sent not only the behavioral health claims but also physical health claims and claims for non-Medicaid members and relied on VO to assist with sorting out behavioral health claims/encounters for the Medicaid members. Based on this discussion, HSAG had no concerns with how **FBHP**/VO processed its claims and encounters.

Actions Taken as a Result of the Previous Year's Recommendations

FBHP continued to work on and update its documentation for all encounter file submission processes. **FBHP**/VO implemented more encounter data edits to ensure more accurate data; crosstraining was performed to ensure continuity of reporting.

As mentioned above, **FBHP** participated with the Department and the other BHOs in updating the scope document based on recommendations from last year. The updated scope document was vastly improved over last year.

Performance Measure Specific Findings and Recommendations

Based on all validation activities, the HSAG team determined results for each performance measure. The CMS Performance Measure Validation Protocol identifies four separate validation results for each performance measure, which are defined in Table 5.

Table 5—Validation Results Definitions		
Report (R) Measure was compliant with Department specifications.		
Not Reported (NR)	This designation is assigned to measures for which: (1) the BHO rate was materially biased or (2) the BHO was not required to report.	
No Benefit (NB)	Measure was not reported because the BHO did not offer the benefit required by the measure.	

According to the protocol, the validation finding for each measure is determined by the magnitude of the errors detected for the audit elements, not by the number of audit elements determined to be not compliant. Consequently, it is possible that an error for a single audit element may result in a designation of NR because the impact of the error biased the reported performance measure by more than five percentage points. Conversely, it is also possible that several audit element errors may have little impact on the reported rate, and the measure could be given a designation of R.

Table 6 through Table 16 below display the review findings and key recommendations for **FBHP** for each validated performance measure. For more detailed information, please see Appendix D.

Table 6—Key Review Findings for Foothills Behavioral Health Partners, LLC Performance Indicator 1: Hospital Recidivism

Findings

FBHP calculated this rate. HSAG reviewed **FBHP**'s programming code used for calculation of this rate and identified no concerns. HSAG performed primary source verification for this measure on-site and identified no discrepancies.

Key Recommendations

• **FBHP** should continue to closely monitor the data used to calculate this measure to determine the reasonableness of the data.

Table 7—Key Review Findings for Foothills Behavioral Health Partners, LLC Performance Indicators 8–11: Overall Penetration Rates

Findings

The Department calculated penetration rates based on encounter data received quarterly from **FBHP**. The encounter data used to calculate these rates were submitted in a flat file format. HSAG auditors conducted interviews with key staff members from the Department and **FBHP** and determined that the processes used to collect data from claims and encounters met standards.

Both prior to the site visit and while on-site with **FBHP**, HSAG reviewed the programming code and the member month figures used by the Department to calculate penetration rates; and no issues or concerns were identified.

HSAG noted that specific types of mental health practitioners were not specified in the scope document for Intensive Outpatient and Partial Hospitalization and Outpatient and ED services. This issue was communicated to the Department as a potential recommendation.

- **FBHP** should continue to inspect for accuracy and completeness the encounter data received from the community mental health centers (CMHCs) and providers.
- The Department should provide clarifications on what provider type(s) should be considered as a mental health practitioner in the scope document for this measure.

Table 8—Key Review Findings for Foothills Behavioral Health Partners, LLC Performance Indicators 8–11: Penetration Rates by Service Category

Findings

The Department calculated penetration rates based on encounter data received quarterly from **FBHP**. The encounter data used to calculate these rates were submitted in a flat file format. HSAG auditors conducted interviews with key staff members from the Department and **FBHP** and determined that the processes used to collect data from claims and encounters met standards.

Both prior to the site visit and while on-site with **FBHP**, HSAG reviewed the programming code and the member month figures used by the Department to calculate penetration rates; and no issues or concerns were identified. HSAG noted that specific types of mental health practitioners were not specified in the scope document for Intensive Outpatient and Partial Hospitalization and Outpatient and ED services. This issue was communicated to the Department as a potential recommendation.

Key Recommendations

- **FBHP** should continue to inspect for accuracy and completeness the encounter data received from the CMHCs and providers.
- The Department should provide clarifications on what provider type(s) should be considered as a mental health practitioner in the scope document for this measure.

Table 9—Key Review Findings for Foothills Behavioral Health Partners, LLC Performance Indicators 8–11: Penetration Rates by Age Category

Findings

The Department calculated penetration rates based on encounter data received quarterly from **FBHP**. The encounter data used to calculate these rates were submitted in a flat file format. HSAG auditors conducted interviews with key staff members from the Department and **FBHP** and determined that the processes used to collect data from claims and encounters met standards.

Both prior to the site visit and while on-site with **FBHP**, HSAG reviewed the programming code and the member month figures used by the Department to calculate penetration rates; and no issues or concerns were identified. HSAG noted that specific types of mental health practitioners were not specified in the scope document for Intensive Outpatient and Partial Hospitalization and Outpatient and ED services. This issue was communicated to the Department as a potential recommendation.

- **FBHP** should continue to inspect for accuracy and completeness the encounter data received from the CMHCs and providers.
- The Department should provide clarifications on what provider type(s) should be considered as a mental health practitioner in the scope document for this measure.

Table 10—Key Review Findings for Foothills Behavioral Health Partners, LLC Performance Indicators 8–11: Penetration Rates by Medicaid Eligibility Category

Findings

The Department calculated penetration rates based on encounter data received quarterly from **FBHP**. The encounter data used to calculate these rates were submitted in a flat file format. HSAG auditors conducted interviews with key staff members from the Department and **FBHP**, and determined that the processes used to collect data from claims and encounters met standards.

Both prior to the site visit and while on-site with **FBHP**, HSAG reviewed the programming code and the member month figures used by the Department to calculate penetration rates; and no issues or concerns were identified. HSAG noted that specific types of mental health practitioners were not specified in the scope document for Intensive Outpatient and Partial Hospitalization and Outpatient and ED services. This issue was communicated to the Department as a potential recommendation.

- **FBHP** should continue to inspect for accuracy and completeness the encounter data received from the CMHCs and providers.
- The Department should provide clarifications on what provider type(s) should be considered as a mental health practitioner in the scope document for this measure.

Table 11—Key Review Findings for Foothills Behavioral Health Partners, LLC Performance Indicator 13: Follow-up After Hospitalization for Mental Illness (7- and 30-day follow-up)

Findings

FBHP calculated this rate. HSAG reviewed **FBHP**'s programming code used for calculation of this rate and identified no concerns. HSAG found that certain diagnoses not included in the covered diagnoses were listed as qualifying diagnoses for this measure in the scope document. Since claims submitted with these diagnoses were not paid by **FBHP**, to avoid confusion when developing the programming codes, these non-covered diagnosis codes should be removed from the measure.

While reviewing the programming code, HSAG found that **FBHP** did not include the non-covered diagnoses listed for this measure in its source code. **FBHP** was able to accurately identify the number of members who received at least one service during the measurement period based on paid claims in the BHO transaction system, and the number of consumers with at least one discharge from a hospital episode for treatment of a covered mental health disorder, also based on paid claims in the BHO transaction system. **FBHP** documented the process of validating data entry.

HSAG performed primary source verification for this measure on-site and identified no discrepancies. During the on-site visit, HSAG identified that **FBHP** may not identify the follow-up visits based on the specific types of mental health practitioners according to the HEDIS specifications. However, since the scope document does not provide specific guidelines, this issue was communicated to the Department as a potential recommendation. To ensure that claims/encounters associated with the non-covered diagnoses would not significantly impact the rate, HSAG requested a frequency distribution of claims/encounters with diagnosis code "299" from VO. Query review found that there were a few claims with this diagnosis code. Since the result did not impact more than one percent of the rate, **FBHP/VO** did not need to re-run the source code to generate a new rate.

- **FBHP** should continue to closely monitor the data used to calculate this measure to determine the reasonableness of the data.
- The Department should remove the non-covered diagnoses listed on the measure pages within the scope document
- The Department should provide clarifications on what provider type(s) should be considered as a mental health practitioner in the scope document for this measure.

Table 12—Key Review Findings for Foothills Behavioral Health Partners, LLC Performance Indicator 14: Percent of Members with SMI with a Focal Point of Behavioral Health Care

Findings

FBHP calculated this rate. HSAG reviewed the programming code used for calculation of this rate and identified no issues. HSAG performed primary source verification for this measure on-site and identified no discrepancies.

Key Recommendations

• **FBHP** should continue to closely monitor the data used to calculate this measure to determine the reasonableness of the data.

Table 13—Key Review Findings for Foothills Behavioral Health Partners, LLC Performance Indicator 15: Improving Physical Healthcare Access

Findings

The Department calculated this rate. HSAG reviewed the programming code used for calculation of this rate and revealed no issues of concern. HSAG auditors conducted interviews with key staff members from the Department and **FBHP** and determined that the processes used to collect data from claims and encounters met standards.

HSAG performed primary source verification for this measure on-site and identified no discrepancies.

Key Recommendations

• **FBHP** should continue to inspect for accuracy and completeness the encounter data received from the CMHCs and providers to ensure data used for the denominator are complete.

Table 14—Key Review Findings for Foothills Behavioral Health Partners, LLC Performance Indicator 16: Inpatient Utilization

Findings

FBHP calculated this rate. HSAG reviewed **FBHP**'s programming code used for calculation of this rate and identified no concerns. HSAG performed primary source verification for this measure on-site and identified no discrepancies.

Key Recommendations

• **FBHP** should continue to closely monitor the data used to calculate this measure to determine the reasonableness of the data.

Table 15—Key Review Findings for Foothills Behavioral Health Partners, LLC Performance Indicator 17: Hospital Average Length of Stay

Findings

FBHP calculated this rate. HSAG reviewed **FBHP**'s programming code used for calculation of this rate and found that the source code may yield members with zero lengths of days. Although HSAG did not find any discrepancies in length of stay calculation while conducting primary source verification on-site, HSAG advised **FBHP** to correct this in the code to equal one day when the admission date and discharge date were the same. Despite this issue, the rates were not impacted.

Key Recommendations

• **FBHP** should update its source code for future reporting to ensure that the correct length of stay calculation was applied when the admission date and discharge date were the same.

Table 16—Key Review Findings for Foothills Behavioral Health Partners, LLC Performance Indicator 18: Emergency Department Utilization

Findings

FBHP calculated this rate. HSAG reviewed **FBHP**'s programming code used for calculation of this rate and identified no concerns. HSAG performed primary source verification for this measure on-site and identified no discrepancies.

Key Recommendations

• **FBHP** should continue to closely monitor the data used to calculate this measure to determine the reasonableness of the data.

Table 17 lists the validation result for each validated performance measure indicator for **FBHP**.

	Table 17—Summary of Results	
	Performance Indicator	Validation Result
1	Hospital Recidivism	Report
8–11	Overall Penetration Rates	Report

The Department collaborated with the BHOs to create a scope document that serves as the specifications for the performance measures being validated. The following pages were taken from the FY 2012 BHO-HCPF Annual Performance Measures Scope Document, Version 5, Created: January 13, 2011, Last Updated: August 9, 2012. Please note that the complete scope document is not listed in this appendix. The Table of Contents, Introduction, and Definitions pages and corresponding page numbers have been modified for use in this report; however, the verbiage for the measures validated under the scope of the review is reproduced in its entirety.

FY 2012

BHO-HCPF Annual Performance Measures Scope Document

Version 5 Created: January 13, 2011 Last updated: August 9, 2012

Table of Contents

(Listed According to BHO Contract)

Introduction	A-4
Update Process	A-4
Definitions	A-5
Indicator 1: Hospital readmissions within 7, 30, 90 days post-discharge	A-6
Indicators 8-11: Penetration rates (including breakouts by HEDIS age groups, Medicaid eligibility category, race, and service category)	A-7
Indicator 13: Follow-up appointments within seven (7) and thirty (30) days after hospital discharge	.A-11
Indicator 14: Percent of members with SMI with a focal point of behavioral health care	.A-16
Indicator 15: Improving physical healthcare access	.A-17
Indicator 16: Inpatient utilization (per 1000 members)	.A-19
Indicator 17: Hospital length of stay (LOS)	.A-20
Indicator 18: Emergency department utilization (per 1000 members)	.A-21

Introduction

This document includes the details for calculations of the BHO-HCPF Annual Performance Measures for the five Colorado Behavioral Health Organizations (BHOs). Some of these measures are calculated by HCPF using eligibility data and encounter data submitted by the BHOs, other measures are calculated by the BHOs. With the exception of Penetration Rates, all measures are calculated using paid claims/encounters data. Penetration Rates are calculated using paid and denied claims/encounters data.

Performance Measures Indexed by Agency Responsible for Calculation

Calculated by the BHO:

Indicator 1: Hospital readmissions within 7, 30, 90 days post-discharge	A-6
Indicator 13: Follow-up appointments within seven (7) and thirty (30) days after hospital discharge	A-11
Indicator 14: Percent of members with SMI with a focal point of behavioral health care	A-16
Indicator 16: Inpatient utilization (per 1000 members)	A-19
Indicator 17: Hospital length of stay (LOS)	A-20
Indicator 18: Emergency department utilization (per 1000 members)	A-21
Calculated by HCPF:	
Indicators 8-11: Penetration rates (including breakouts by HEDIS age groups, Medicaid eligibility category, race, and service category)	A-7

Update process:

- 1. Moved Indicator 15, "Improving physical healthcare access" from Calculated by BHO to Calculated by HCPF.
- 2. Indicator 13: Added specific diagnoses codes to be included. Age category in Table 10 changed.
- 3. Indicator 14: Defined SMI, better described Numerator and Denominator. Changed POS codes in Table
- 4. Indicator 15: Clarified that the denominator will be the numerator from the Service Category Penetration Rates measures excluding ED services.

Definitions

<u>Members</u>: Individuals eligible for Medicaid assigned to a specific BHO. Membership is calculated by the number of member months during a 12-month period divided by 12, which gives equivalent members or the average health plan enrollment during the 12-month reporting period.

<u>Covered Mental Health Disorder:</u> The BHO Colorado Medicaid Community Mental Health Services Program contract specifies that certain mental health diagnoses are covered. These specific diagnoses can be found below or in the BHO Medicaid BHO contract Exhibit D. Only those services that cover mental health, with the exception of services related to Assessment, Prevention, and Crisis procedure coding as a diagnosis may have yet to be ascribed, will be included in the calculations of performance measures; however, penetration rates will be calculated using both paid and denied claims/encounters, regardless of the mental health diagnoses.

- 295.00-298.99
- 300.00-301.99
- 307.00-309.99
- 311.00-314.99

<u>Per 1000 members</u> – A measure based on total eligible members per 1000.

Fiscal Year – Based on the State fiscal year July to June

Quarter – Based on fiscal year quarters (Jul-Sep, Oct-Dec, Jan-Mar, Apr-Jun)

<u>Age Category</u> – Based on HEDIS age categories: 0-12 (Child), 13-17 (Adolescent), 18-64 (Adult), and 65+ (Older Adult). Age category determination will be based upon the <u>client's age on the date of service</u> for all performance indicators except for inpatient hospitalization and penetration rates. For inpatient hospitalization, age category determination will be based upon the <u>client's age on the date of discharge</u>. For penetration rates, age category determination will be based upon the <u>age of the client on the last day of the fiscal year</u>.

24 Hour Treatment Facility – A residential facility that has 24-hr professional staffing and a program of treatment services and includes PRTF and TRCCFs. Does not include Nursing Facilities or ACFs (defined as an assisted living residence licensed by the State to provide alternative care services and protective oversight to Medicaid clients).

<u>Hospital Discharge</u> – A discharge from a hospital (non-residential) for an episode of treatment for a covered mental health diagnosis that does not result in a re-hospitalization within 24 hrs (transfer). There can be multiple discharges during the specified fiscal year period. The discharge must result in a paid claim for the hospital episode, except where the discharge is from a State Hospital for ages 21-64. Adult members on the list of discharges from the State hospital who are not eligible at the time of hospital admission should be dropped from the hospital discharge list. Adult members who lose eligibility during the hospital stay may remain on the hospital discharge list.

<u>Hospital Admit</u> – An admission to a hospital (non-residential) for an episode of treatment for a covered mental health diagnosis. There can be multiple admits during the specified fiscal year period. The admission must result in a paid claim for the hospital episode, except where the admission is from a State Hospital for ages 21-64.

<u>HCPF</u>—The Department of Health Care Policy and Financing for the State of Colorado.

HEDIS—Healthcare Effectiveness Data and Information Set

Indicator 1: Hospital readmissions within 7, 30, 90 days post-discharge

<u>Description</u>: Proportion of BHO Member discharges from a hospital episode for treatment of a covered mental health disorder and readmitted for another hospital episode for treatment of a covered mental health diagnosis within 7, 30, 90 days by age group and overall (recidivism rates). Two indicators are provided: 1) **Non-State:** Recidivism rates for member discharges from a non-State hospital episode for treatment of a covered mental health disorder during the specific fiscal year, July 1 through June 30 and 2) **All hospital:** Recidivism rates for member discharges from all hospital episodes for a covered mental health disorder during the specific fiscal year, July 1 through June 30. Age for this indicator is determined at first hospital discharge.

<u>Denominator</u>: Total number of BHO member discharges during the reporting period. The population is based on discharges (e.g., one member can have multiple discharges).

- **Non-State Hospital:** Total number of Member discharges from a non-State hospital during the specified fiscal year
- All Hospitals: Total number of Member discharges from all hospitals during the specified fiscal year

<u>Numerator</u>: Number of BHO member discharges with an admission within 7, 30, and 90 days of the discharge, reported cumulatively.

- Non-State Hospital: Total number of Member discharges from a non-State hospital, during the specified fiscal year, July 1 through June 30, and then admitted to any hospital (non-state or state) 7, 30, and 90 days after the discharge.
- All Hospitals: Total number of Member discharges from all hospitals, during the specified fiscal year, July 1 through June 30, and then admitted to all hospitals 7, 30, and 90 days after the discharge.

<u>Data Source(s)</u>: Denominator: Number of Member discharges, from private hospitals and State hospital, for ages through 20 years and 65+, provided by each BHO based on paid claims in the BHO transaction system. Number of discharges from the State hospital system, ages 21 through 64 years, will be provided by HCPF. Numerator: Admissions from non-State hospitals and State hospital, for ages through 20 years and 65+, provided by each BHO based on paid claims in the BHO transaction system. Admissions from the State hospital system, ages 21 through 64 years, will be provided by the State.

<u>Calculation of Measure</u>: BHO; Calculation (6 ratios): Numerator (7 days, non-state hospital)/Denominator (non-State hospital); Numerator (30 days, non-state hospital)/Denominator (non state hospital), Numerator (90 days, non state hospital)/Denominator (non state hospital); etc

Benchmark: Overall BHOs.

Indicators 8-11: Penetration rates (including breakouts by HEDIS age groups, Medicaid eligibility category, race, and service category)

<u>Description</u>: Percent BHO Members with one contact (paid or denied) in a specified fiscal year (12-month period) by HEDIS age group, Medicaid eligibility category (**refer to Table 7 for eligibility categories**), race (**refer to Table 7 for race/ethnicity categories**), and service category (**refer to Table 8 for HEDIS specs and additional place of service (POS) and service codes**.)

- HEDIS age group is determined by the member's age on the last day of the fiscal year.
- Medicaid eligibility category is the eligibility category on the member's most recent Medicaid eligibility span during the fiscal year.
- Race/ethnic group is the race category on the member's most recent Medicaid eligibility span during the fiscal year.
- Service category is defined any paid or denied MH service grouped as inpatient, intensive outpatient/partial hospital, and ambulatory care in a specified fiscal year 12-month period. POS category 53 will be excluded for the intensive outpatient and partial hospitalization service category.
- Mental health managed care enrollment spans with at least one day of enrollment during the fiscal year are analyzed.
- All enrollment spans identified as: enrollment begin date <= the last date of the fiscal year (6/30) AND enrollment end date >= the first date of the fiscal year (7/1).
- Member months are determined by counting number of clients with an enrollment span covering at least one day in the month, i.e., total member months per month as: enrollment begin date <= last day of the month AND enrollment end date >= first day of the month. Thus, if the client is enrolled for the full month the member month is equal to one and if enrolled for less than the full month the member month is a fraction between 0 and 1.
- BHO Behavioral Health Organization
- FY fiscal year
- FTE full time equivalent
- MM member months
- NOTE: The Data Analysis Section tailors data to specific internal and external customer needs that are
 not met through existing reporting. Thus, calculations may differ from existing published figures due to
 several factors that may include, but are not limited to: the specificity of the request, retroactivity in
 eligibility determination, claims processing and dollar allocation differences between MMIS and
 COFRS.

Denominator: Total BHO membership for the specified fiscal year (12-month period)

<u>Numerator</u>: Members with any MH service in the specified fiscal year (12-month period) in each age group, Medicaid eligibility category, race/ethnic group, and by service category grouped as inpatient, intensive outpatient/partial hospitalization, and ambulatory care.

<u>Data Source(s)</u>: BHO claims/encounter file (both paid and denied claims/encounters will be used).

<u>Calculation of Measure</u>: HCPF (by Overall, HEDIS age, eligibility category, cultural/ethnic [% total missing])

Benchmark: Overall BHO

TABLE 7

Medicaid Eligibility and Race/Ethnicity Categories

Medicaid Eligibility Categories:

Eligibility Type Code	Description
001	OAP-A
002	OAP-B-SSI
003	AND/AB-SSI
004	AFDC/CWP Adults
005	AFDC/CWP CHILDREN
006	FOSTER CARE
007	BC WOMEN
008	BC CHILDREN
020	BCCP-WOMEN BREAST&CERVICAL CAN

Medicaid Race Categories:

Race Code	Description	
1	SPANISH AMERICAN	
2	OTHER – WHITE	
3	BLACK	
4	AMERICAN INDIAN	
5	ORIENTAL	
6	OTHER	
7	UNKNOWN	

TABLE 8

Penetration Rates by Service Category

For calculating the penetration rates by service category performance measure

Description

The number and percentage of members receiving the following mental health services during July 1 and June 30 of the fiscal year.

- Any services
- Inpatient
- Intensive outpatient or partial hospitalization
- Outpatient or ED

Calculations

Count members who received inpatient, intensive outpatient, partial hospitalization, and outpatient and ED mental health services in each column. Count members only once in each column, regardless of number of visits. Count members in the *Any Services* column for any service during the measurement year.

For members who have had more than one encounter, count in each column only once and report the member in the respective age category as of the last date of the fiscal year (6/30).

Member months

Report all member months during the measurement year for members with the benefit. Refer to *Specific Instructions for Use of Services Tables*. Because some organizations may offer different benefits for inpatient and outpatient mental health services, denominators in the columns of the member months table may vary. The denominator in the *Any* column should include all members with any mental health benefit.

Inpatient

Include inpatient care at either a hospital or treatment facility with a covered mental health disorder as the principal diagnosis: 290.xx, 293-302.xx, 306-316.xx.

Use one of the following criteria to identify inpatient services.

An Inpatient Facility code in conjunction with a covered mental health diagnosis. Include discharges associated with residential care and rehabilitation.

Codes to Identify Inpatient Service

Inpatient Facility codes: 100, 101, 110, 114, 124, 134, 144, 154, 204

Sub-acute codes: 0919

ATU codes: 190, H2013, H0018AT

RTC codes: H2013, 0191, 0192, 0193, H0018, H0019, S5135

MS—DRG

876, 880-887; exclude discharges with ICD-9-CM Principal Diagnosis code 317-319

Codes to Identify Intensive Outpatient and Partial Hospitalization Services:

Codes to Identify Intensive Outpatien	i anu i ai nai mospitanzai	ion servic	Co.
HCPCS UB Revenue			
Visits identified by the following HCPCS, UB Revenue and CPT/POS codes may be with a mental health or non-mental health practitioner (the organization does not need to determine practitioner type).

СРТ			UB Revenue			
Visits identified by the following CPT and UB Revenue codes must be with a mental health practitioner.						
98960-98962, 99078, 99201-99205, 99211-99215, 992 99285, 99341-99345, 99347-99350, 99381-99387, 993 99412, 99420, 99510, 90772, 97535, 97537		045x, 0510, 0 0529, 0762, 0	0515-0517, 0519,-0523, 0526- 0981-0983			

- * POS 53 identifies visits that occur in an outpatient, intensive outpatient or partial hospitalization setting. If the organization elects to use POS 53 for reporting, it must have a system to confirm the visit was in an outpatient setting.
- Note: The specifications presented here for the Penetration Rates by Service Category performance indicator are closely based upon HEDIS 2011 specifications.

Indicator 13: Follow-up appointments within seven (7) and thirty (30) days after hospital discharge

<u>Description</u>: The percentage of member discharges from an inpatient hospital episode for treatment of a covered mental health disorder to the community or a non-24-hour treatment facility and were seen on an outpatient basis (excludes case management) with a mental health provider by age group and overall within 7 or 30 days (follow-up rates). Two indicators are provided: 1) **Non-State:** Follow-up rates for member discharges from a non-State hospital episode for treatment of a covered mental health disorder during the specific fiscal year, July 1 through June 30 and 2) **All hospital:** Follow-up rates for member discharges from all hospital episodes for a covered mental health disorder during the specific fiscal year, July 1 through June 30. Diagnosis codes to be included are 295-299, 300.3, 300.4, 301, 308, 309, 311-314.

<u>Numerators</u>: Total number of discharges with an outpatient service (see Table 10) within 7 and 30 days (the 30 days includes the 7 day number also). For each denominator event (discharge), the follow-up visit must occur after the applicable discharge. An outpatient visit on the date of discharge should be included in the measure. See CPT, UB-92, HCPCS codes in Table 10 for follow-up visit codes allowed.

Non-state Hospital: All discharges from a non-state hospital during the specified fiscal year with an outpatient service within 7 and 30 days.

All Hospitals: All discharges from any inpatient facility for a specified fiscal year with an outpatient service within 7 and 30 days.

<u>Denominators</u>: The population based on discharges during the specified fiscal year July 1 through June 30 (can have multiple discharges for the same individual). Discharges for the whole fiscal year are calculated because the use of 90 day run out data provides the time to collect 30 day follow-up information.

Non-state Hospital: All discharges from a non-state hospital during the specified fiscal year.

All Hospitals: All discharges from any inpatient facility for the specified fiscal year.

Exclusions:

- Exclude those individuals who were readmitted within 30 days to an inpatient setting for all calculations
- Exclude discharges followed by admission to any non-acute treatment facility within 30 days of hospital discharge for any mental health disorder. These discharges are excluded from the measure because readmission or transfer may prevent an outpatient follow-up visit from taking place.
- Refer to HEDIS codes in Table 10 to identify nonacute care. For residential treatment, compare using
 residential treatment per diem code. Due to the fact that residential treatment for Foster Care members
 is paid under fee-for-service, the BHOs cannot easily determine if a Foster Care member was
 discharged to residential treatment. Therefore, prior to official rate reporting, the HCPF Business
 Analysis Section will forward each BHO a list of foster care members who were discharged from an
 inpatient setting to a residential treatment facility, in order to assist the BHOs in removing these
 members from this measure.

<u>Data Source(s)</u>: Denominator: Number of Member discharges, from non-State hospitals, ages 6+, and State hospital, for ages through 20 years and 65+, provided by each BHO based on paid claims in the BHO transaction system. Number of discharges from the State hospital system, ages 21 through 64 years, will be provided by the State. Numerator: An outpatient visit, intensive outpatient encounter or partial hospitalization provided by each BHO based on paid claims in the BHO transaction system.

APPENDIX A. BHO PERFORMANCE MEASURE DEFINITIONS

<u>Calculation of Measure</u>: BHO; Calculation: Includes 4 ratios: Numerator (7 days, non-state hospital)/Denominator (non-State hospital); Numerator (30 days, non-state hospital)/Denominator (non state hospital), Numerator (7 days, all hospital)/Denominator (all hospital), Numerator (30 days, all hospital)/Denominator (all hospital)

Benchmark: HEDIS and all BHOS

TABLE 10

HEDIS Follow-Up After Hospitalization for Mental Illness (FUH)

For calculating Follow-up after hospitalization for mental illness performance measure

Description

The percentage of discharges for members 6 years of age and older who were hospitalized for treatment of a covered mental health disorder and who had an outpatient visit, an intensive outpatient encounter or partial hospitalization with a mental health practitioner. Two rates are reported.

- 1. The percentage of members who received follow-up within 30 days of discharge
- 2. The percentage of members who received follow-up within 7 days of discharge

Eligible Population						
Ages	Two age categories are identified, ages 6-20 and 21+.					
Continuous enrollment	Date of discharge through 30 days after discharge.					
Allowable gap	No gaps in enrollment.					
Event/diagnosis	Discharged alive from an acute inpatient setting (including acute care psychiatric facilities) with a covered mental health diagnosis during July1 and June 30 of the fiscal year.					
	The denominator for this measure is based on discharges, not members. Include all discharges for members who have more than one discharge during July1 and June 30 of the fiscal year.					
Mental health readmission or direct transfer to an acute fa any covered mental health disorder within the 30-day follow-up period, co the readmission discharge or the discharge from the facility to which the mass transferred. Although re-hospitalization might not be for a selected mental health disorder, it is probably for a related condition.						
	Exclude both the initial discharge and the readmission/direct transfer discharge if the readmission/direct transfer discharge occurs after June 30 of the fiscal year.					
	Exclude discharges followed by readmission or direct transfer to a <i>nonacute</i> facility for any covered mental health disorder within the 30-day follow-up period. These discharges are excluded from the measure because readmission or transfer may prevent an outpatient follow-up visit from taking place. Refer to the following table for codes to identify nonacute care.					

Codes to Identify Nonacute Care

Description	HCPCS	UB Revenue	UB Type of Bill	POS
Hospice		0115, 0125, 0135, 0145, 0155, 0650, 0656, 0658, 0659	81x, 82x	34
SNF		019x	21x, 22x	31, 32
Hospital transitional care, swing bed or rehabilitation			18x	
Rehabilitation		0118, 0128, 0138, 0148, 0158		
Respite		0655

UB Revenue

The organization does not need to determine practitioner type for follow-up visits identified by the following UB Revenue codes.

0513, 0900-0905, 0907, 0911-0917, 0919

Visits identified by the following Revenue codes must be with a mental health practitioner or in conjunction with any diagnosis code from Table FUH-A.

0510, 0515-0517, 0519-0523, 0526-0529, 0982, 0983

• Note: The specification presented here for the Follow up Post Discharge performance indicator are closely based upon HEDIS 2011 specifications.

Indicator 14: Percent of members with SMI with a focal point of behavioral health care

<u>Description</u>: The percent of members with SMI who have a focal point of care identified and established. For the purpose of this indicator, SMI includes the following: Schizophrenia, Schizoaffective, and Bipolar diagnoses. See Table 11.

<u>Denominator</u>: Total number of unduplicated members meeting the following criteria:

- 21 years of age or older on first day of the measurement period (SFY)
- Continuously enrolled 12 out of 12 months in the same BHO during the measurement period (SFY)
- Identifying outpatient service with an SMI diagnosis- at least one paid BHO outpatient service (refer to **Table 11**) in the first 9 months of the measurement period (SFY) for diagnoses in any position (refer to **Table 11 for SMI diagnoses**).

<u>Numerator</u>: Total number of members in the denominator that meet at least one of the following track criteria (using **Table 11**) with the same billing provider during the measurement period (SFY).

- Identifying outpatient service with an SMI diagnosis- at least one paid BHO outpatient service (refer to **Table 11**) in the first 9 months of the measurement period (SFY) for diagnoses in any position (refer to **Table 11 for SMI diagnoses**).
- Treatment/Recovery Track- At least 3 Treatment/Recovery or Case Management or Med Management visits
- Med Management Track- At least 2 Med Management visits

Data Source(s): BHO transaction system.

Indicator 15: Improving physical healthcare access

<u>Description</u>: The total number of Members who received outpatient mental health treatment during the measurement period and also had a qualifying physical healthcare visit during the measurement period

<u>Denominator</u>: Total number of unduplicated members who had at least one BHO outpatient service claim/encounter during the measurement period. Members must be Medicaid eligible and enrolled at least ten months with the same BHO during the 12-month measurement period. (This is the numerator from the Service Category Penetration Rates measures excluding ED services.)

<u>Numerator</u>: Total number of members in the denominator with at least one preventive or ambulatory medical visit as defined using the service codes in **Table 12** during the measurement period, excluding those services provided by rendering provider type codes identified in **Table 12**.

<u>Data Source(s)</u>: The encounter/claims files (BHO, MCO, Fee for Service) for the fiscal year, including paid claims, provided by HCPF

<u>Calculation of Measure</u>: HCPF

Benchmark: Overall BHO

TABLE 12

Preventive or Ambulatory Medical Visits Table AAP-A: Codes to Identify Preventive/Ambulatory Health Services (HEDIS 2011)

Services (HEDIS 2011)					
Description	CPT	HCPCS	ICD-9-CM Diagnosis	UB Revenue	
Office or other outpatient services	99201-99205, 99211- 99215, 99241-99245			051x, 0520- 0523, 0982, 0983	
Home services	99341-99345, 99347- 99350

Indicator 16: Inpatient utilization (per 1000 members)

<u>Description</u>: The total number of BHO member discharges from a hospital episode for treatment of a covered mental health disorder per 1000 members, by age group (see above for age categories) and total population. The discharge must occur in the period of measurement. Two indicators are provided: 1) Number of member discharges from a non-State hospital and 2) Number of member discharges from all hospitals (non-State and State hospitals). Age for this indicator is determined at hospital discharge. Please note: For members transferred from one hospital to another within 24 hours, only one discharge should be counted and it should be attributed to the hospital with the final discharge.

<u>Denominator</u>: Total number of members during the specified fiscal year (12-month period).

<u>Numerator</u>: All discharges from a hospital episode for treatment of a covered mental health disorder **Non-State Hospitals**: All discharges from a non-State hospital episode for treatment of a covered mental health disorder during the specific fiscal year, July 1 through June 30.

All Hospitals: All discharges from a hospital episode for treatment of a covered mental health disorder during the specific fiscal year, July 1 through June 30.

<u>Data Source(s)</u>: Denominator: Members by BHO provided by HCPF. Numerator: Discharge dates from non-State hospitals and State hospital, for ages through 20 years and 65+, provided by each BHO based on paid claims in the BHO transaction system. Discharge dates from the State hospital system, ages 21 through 64 years, will be provided by the State.

<u>Calculation of Measure</u>: BHO; Calculation: Numerator (non-state hospital)/Denominator x 1000; Numerator (all hospital)/Denominator x 1000

Benchmark: HEDIS for all hospital and Overall BHOs for all hospital and non-State hospital

Indicator 17: Hospital length of stay (LOS)

<u>Description</u>: The average length of stay (in days) for BHO members discharged from a hospital episode for treatment of a covered mental health disorder, by age group and total population. Two indicators are provided: 1) Average length of stay for members discharged from a non-State hospital episode for treatment of a covered mental health disorder during the specific fiscal year, July 1 through June 30 and 2) Average length of stay for members discharged from all hospital episodes for a covered mental health disorder during the specific fiscal year, July 1 through June 30. Age for this indicator is determined at hospital discharge.

Please note: For members transferred from one hospital to another within 24 hours, total length of stay for both hospitals should be attributed to the hospital with the final discharge. For final discharges from a State hospital, all days in the hospital episode will be included if the member was Medicaid eligible at the time of admission.

<u>Denominators</u>: Number of Members discharged from a hospital episode. The discharge day must occur within the specified fiscal year, July 1 through June 30.

Non-State Hospital: Total number of Members discharged from a non-State hospital during the specified fiscal year

All Hospitals: Total number of Members discharged from all hospitals during the specified fiscal year.

<u>Numerators</u>: Total days for all hospital episodes resulting in a discharge. Discharge day is not counted. The discharge day must occur within the specified fiscal year, July 1 through June 30. If the admit date and the discharge date are the same then the number of days for the episode is one.

Non-State Hospitals: Total days= Discharge date from the non-State hospital-Admit date **All Hospitals:** Total days=Discharge date from all hospitals-Admit date

<u>Data Source(s)</u>: Denominator: Number of Members discharged, from non-State hospitals and State hospitals, for ages through 20 years and 65+, provided by each BHO based on paid claims in the BHO transaction system. Number of discharges from the State hospital system, ages 21 through 64 years, will be provided by the state hospital data file. Numerator: Hospital days (discharge date – admit date) from private hospitals and State hospital, for ages through 20 years and 65+, provided by each BHO based on paid claims in the BHO transaction system. Hospital days (discharge date – admit date) from the State hospital system, ages 21 through 64 years, will be provided by the State.

<u>Calculation of Measure</u>: BHO; Calculation: Numerator (non-State hospital)/Denominator (non-State hospital); Numerator (all hospital)/Denominator (all hospital)

Benchmark: BHO for all hospital and non-State hospital

Indicator 18: Emergency department utilization (per 1000 members)

<u>Description</u>: Number of BHO Member emergency room visits for a covered mental health disorder per 1,000 Members by age group and overall for the specified fiscal year 12-month period. For this measure include only paid encounters. Age for this indicator is determined on date of service.

<u>Denominator</u>: Total number of Members during the specified fiscal year (12-month period).

<u>Numerator</u>: ED visits that don't result in an inpatient admission within 24 hrs of the day of the ED visit. ED visit codes include: CPT 99281-99285 and 99291-99292; and revenue code 45x.

<u>Data Source(s)</u>: Denominator: HCPF; Numerator: BHO encounter claim file.

Calculation of Measure: BHO; Calculation: Numerator/Denominator x 1,000

Benchmark: Overall BHO

Acc	Data Integration and Control Element curacy of data transfers to assigned performance in	<i>Met</i> neasure	Met data re	N/A pository	Comments v.
•	The Department and the BHO accurately and completely process transfer data from the transaction files (e.g., membership, provider, encounter/claims) into the repository used to keep the data until the calculations of the performance measures have been completed and validated.				
•	Samples of data from the repository are complete and accurate.				
Acc	curacy of file consolidations, extracts, and derivati	ons.			
•	The Department's and the BHO's processes to consolidate diversified files and to extract required information from the performance measure data repository are appropriate.				
•	Actual results of file consolidations or extracts are consistent with results expected from documented algorithms or specifications.				
•	Procedures for coordinating the activities of multiple subcontractors ensure the accurate, timely, and complete integration of data into the performance measure database.				
•	Computer program reports or documentation reflect vendor coordination activities, and no data necessary to performance measure reporting are lost or inappropriately modified during transfer.				

	Data Integration and Control Element	Met	Not Met	N/A	Comments
for	he Department and the BHO use a performance mat facilitate any required programming necessar formance measures.				
•	The repository's design, program flow charts, and source codes enable analyses and reports.				
•	Proper linkage mechanisms have been employed to join data from all necessary sources (e.g., identifying a member with a given disease/condition).				
Ass	urance of effective management of report product	tion and	reporti	ng softv	vare.
•	Documentation governing the production process, including Department and BHO production activity logs and staff review of report runs, is adequate.				
•	Prescribed data cutoff dates are followed.				
•	The Department and the BHO retain copies of files or databases used for performance measure reporting in the event that results need to be reproduced.				
•	The reporting software program is properly documented with respect to every aspect of the performance measure data repository, including building, maintaining, managing, testing, and report production.				
•	The Department's and the BHO's processes and documentation comply with standards associated with reporting program specifications, code review, and testing.

Reviewer:	David Mabb and Judy Yip

	Denominator Elements for Foot	hills B	ehavio	al Hea	Ith Partners, LLC
	Audit Element	Met	Not Met	N/A	Comments
•	For each of the performance measures, all members of the relevant populations identified in the performance measure specifications are included in the population from which the denominator is produced.	Met			For Indicator 13 (follow-up appointments within 7 and 30 days after hospital discharge), while FBHP did not include the non-covered diagnosis codes in its source code in identifying the denominator, these codes listed should be removed from the scope document to avoid confusion.
•	Adequate programming logic or source code exists to appropriately identify all relevant members of the specified denominator population for each of the performance measures.				
•	The Department and the BHO have correctly calculated member months and years, if applicable to the performance measure.	\boxtimes			
•	The Department and the BHO have properly evaluated the completeness and accuracy of any codes used to identify medical events, such as diagnoses, procedures, or prescriptions, and these codes have been appropriately identified and applied as specified in each performance measure.				
•	Parameters required by the specifications of each performance measure are followed (e.g., cutoff dates for data collection, counting 30 calendar days after discharge from a hospital, etc.).				
•	Exclusion criteria included in the performance measure specifications have been followed.				

	Denominator Elements for Foothills Behavioral Health Partners, LLC						
	Audit Element	Met	Not Met	N/A	Comments		
•	Systems or methods used by the Department and the BHO to estimate populations when they cannot be accurately or completely counted (e.g., newborns) are valid.				No populations were estimated.		

	Numerator Elements for Foothills Behavioral Health Partners, LLC						
	Audit Element	Met	Not Met	N/A	Comments		
•	The Department and the BHO have used appropriate data, including linked data from separate data sets, to identify the entire at-risk population.						
•	Qualifying medical events (such as diagnoses, procedures, prescriptions, etc.) are properly identified and confirmed for inclusion in terms of time and services.				Programming code review showed that length of stay calculation yielded zero days when the admission date and the discharge date were the same. Although no members in the analytic file were identified during primary source verification as having this situation for Indicator 17 (Hospital Average Length of Stay), HSAG advised FBHP to update its source code for future reporting.		
•	The Department and the BHO have avoided or eliminated all duplication of counted members or numerator events.						
•	Any nonstandard codes used in determining the numerator have been mapped to a standard coding scheme in a manner that is consistent, complete, and reproducible, as evidenced by a review of the programming logic or a demonstration of the program.				Nonstandard codes were not used.		
•	Parameters required by the specifications of the performance measure are adhered to (e.g., the measured event occurred during the time period specified or defined in the performance measure).				For Indicator 8-11 (penetration rates) and Indicator 13 (follow-up appointments within seven and thirty days after hospital discharge), clarifications on which provider types for mental health practitioners should be provided in the scope document.		

Appendix D. Performance Measure Results Tables

for Foothills Behavioral Health Partners, LLC

Encounter Data

The measurement period for these performance measures is July 1, 2011, through June 30, 2012 (fiscal year [FY] 2011–2012).
