New Medicaid Rates for Orthosis & Prosthesis

The Colorado Medicaid Program is in the process of establishing a new rate schedule for many medical equipment and supply products. The State is moving many items from the by-invoice type of pricing to a fixed rate schedule. The new rates are being implemented in separate and distinct phases. New rates for the Rehabilitation/Wheelchair category went into effect April 1, 2001. This current phase includes the Orthosis & Prosthesis category. Many product codes have been changed from by-invoice reimbursement to a new fixed price. The current rate for other codes has been adjusted either up or down. A few codes have been moved from the fixed rate schedule to by-invoice reimbursement due to the variety of products represented by the code.

Colorado Medicaid and representatives from the Colorado Association of Medical Equipment Suppliers (CAMES) have developed the new rates in the Orthosis & Prosthesis category. Three hundred sixty-two (362) individual products in this category were reviewed. This category includes a wide range of items such as braces, artificial limbs, orthopedic shoes, specialized stockings, and augmentative communication devices. A number of these products have new rates based upon specific recommendations from the CAMES representatives. Other products were priced based upon discounts from the Medicare allowable. A selected group of the items have rates set at 100% of the Medicare allowable. Another group of products includes new rates based on a percentage increase from the current Medicaid rate schedule. **The effective date for the new rates in the Orthosis & Prosthesis category is October 15, 2001.**

The next phase includes a new price schedule for the Medical Supply category. The final phase will be the Oxygen & Oxygen Equipment category. Notification of the rate changes in these categories will be made in future bulletins.

Additional Price Increases

In addition to the O & P rates, there are two other products in the medical equipment/supply area that have had recent price changes.

HCPSC code	Description	Old price	New Price	Effective date
A4215	Sterile needle (without syringe)	\$0.17	\$0.25	04/01/01
E0784	Ambulatory infusion pump	BI	\$5,371.73	07/01/01

On April 1, 2001, new rates were implemented for the DME Rehab/Wheelchair category. These included three HCPCS codes used for repairs and dealer preparation.

E1340**X2230****X2975**

E1340 - General labor associated with DME repairs and always requires prior authorization. It is reimbursed at \$15.50 per unit. 1 unit = 15 minutes. This code has an annual maximum of 480 units or 120 hours of service. This averages out to 40 units or 10 hours of service per month.

X2230 - Dealer's initial preparation of a product and always requires prior authorization. This code should be used just once per item. X2230 should not be used for routine assembly of a product. This type of service is covered by the reimbursement of an item. X2230 should be used to bill for specialized, detailed or complex work in the initial preparation of a product. It is reimbursed at \$15.50 per unit. 1 unit = 15 minutes. This code has an annual maximum of 32 units or 8 hours of service. **Providers should use E1340 for general repairs beyond this initial product preparation.**

X2975 - Quick, minor repairs to DME products and does not require prior authorization. In addition to labor, the costs of minor parts can be included under this code. This service is limited to a maximum reimbursement of \$150.00 every six months.

New Secondary Discount Policy

The Colorado Medicaid Program is revising its policy regarding secondary discounts. These are discounts that DME providers obtain from the manufacturers of their products. Current policy requires providers to pass these discounts along to Colorado Medicaid.

Effective October 1, 2001 the new policy will allow providers to retain secondary discounts. The January 2001 Supply HCFA and Local Codes bulletin reads:

Providers submitting claims for which acquisition costs will be utilized as a basis for reimbursement are subject to the following requirements:

“Billed amounts may not exceed actual acquisition costs, including discounts available, and applied to decrease the provider’s balance due their vendor.”

This will be changed to:

Providers submitting claims for which acquisition costs will be utilized as a basis for reimbursement are subject to the following requirements:

“Billed amounts may not exceed the actual acquisition costs of the item. Actual acquisition costs are defined as the manufacturer’s list price for the item less any standard trade discount applied to lower the actual cost to the provider but excluding any time sensitive or otherwise conditional discounts available to the provider.”

Product Serial Number Requirement

On November 1, 2001, the Colorado Medicaid Program will begin to enforce the long-time policy requiring DME providers to submit the appropriate product serial number for DME repairs. This number must be valid and specific to the product being repaired. When billing HCPCS code E1340, the serial number will be required on both the PAR **and** the claim.

Claims for wheelchair repairs processed on and after November 1, 2001 that do not have a serial number matching the serial number on the approved PAR will be denied. These claims will be denied for claim edit 0607, “The serial number does not match the PAR.” PARs submitted on and after November 1, 2001 with out a serial number will be denied for PAR edit 0666, “No serial number”.
