Reference: B0400171

This bulletin completely replaces Medical Assistance Program Bulletin B0300152 (3/03)

Bulletin B0300152 should be discarded.

### Practitioner CMS Codes

The Colorado Medical Assistance Program uses the Centers for Medicare and Medicaid Services (CMS), formerly the Health Care Financing Administration's (HCFA), Common Procedural Coding System (HCPCS) to identify Medical Assistance Program services. HCPCS include codes in the *Physicians' Current Procedural Terminology (CPT)*, codes developed by CMS and Medicare.

Effective for services provided on and after January 1, 2004, providers should use the codes listed in this bulletin when billing practitioner services. Keep this bulletin with the Medical Assistance Program Provider Manual for reference.

## Introduction

### Please read the following information carefully:

Colorado Medical Assistance Program claims must be submitted electronically.

Electronically mandated claims submitted on paper are processed, denied, and marked "Electronic Filing Required."

Exceptions to electronic filing include:

- Claims from providers who consistently submit fewer than five claims per month.
- Claims with service dates more than 365 days old.
- Claims that, by federal or state policy or regulation, require attachments.
- Reconsideration claims.

**Electronic claims:** Submit practitioner services on the electronic Colorado 1500 or 837 professional claim format using HCPCS. Submit EPSDT medical screening services on the electronic EPSDT claim format, using HCPCS.

**Paper claims:** If paper claim submission is required, practitioners must submit charges on the Colorado 1500 claim form using HCPCS. EPSDT providers must submit charges on the EPSDT paper claim form, using HCPCS.

HCPCS codes include codes in the current CPT edition and supplemental codes developed by CMS and Medicare. The Medical Assistance program adds and deletes codes as they are published in the current CPT and annual HCPC Level II coding bulletins. Unless otherwise noted, use HCPC Level II codes only when CPT codes are not available.

**Code Column:** HCPC Level II codes consist of a letter followed by four numbers. Read the entire entry to determine the benefit status of the item. Medical Assistance Program authorized codes may not correspond to codes approved for Medicare billing. This list contains Medical Assistance Program approved HCPC Level II codes. Codes that do not appear in CPT or this listing are not benefits of the Colorado Medical Assistance Program.

**Modifiers:** Procedure code modifiers describe circumstances that may alter payment. The following modifiers are valid for use with HCPCS codes in this coding bulletin and must be used when applicable. Modifiers, which affect the way the claim payment is calculated, **must be entered in the first modifier position**. The following reference information identifies the pricing modifiers. Please review the information carefully.

\*\* Indicates that when the modifier is used, it must be entered into the first modifier position on the electronic claim record. If two modifiers are used and both modifiers have \*\*, either modifier may be placed in the first position.

-24	Unrelated evaluation and management service by the same physician during a postoperative period	The physician may need to indicate that an evaluation and management service was performed during a postoperative period for a reason(s) unrelated to the original procedure. This circumstance may be reported by adding the modifier –24 to the appropriate level of E/M service.
-26**	Professional component	Use when the professional component is performed separately.
-TC**	Technical component	Use when the technical component is performed separately.
-47**	Anesthesia by surgeon	Use to identify general or regional anesthesia by the operating surgeon. Allowance for local anesthesia is included in the surgical payment and is not billable separately.
-50**	Bilateral procedure	Unless otherwise identified in CPT, bilateral procedures requiring a separate incision performed at the same operative session are billed by listing the CPT surgical code describing the first procedure on one claim line. The second (bilateral) procedure is identified on a separate claim line by adding modifier -50 to the procedure code.
-51	Multiple procedures	When the same provider performs multiple procedures on the same day or at the same session, other than evaluation and management services, the primary procedure or service may be reported as listed. The additional procedure(s) or service(s) may be identified by appending the modifier –51 to the additional procedure or service code(s).
-62	Two surgeons	The skills of two surgeons may be required in the management of a specific surgical procedure. Under such circumstances, the separate services may be identified by adding the modifier –62 to the procedure number used by each surgeon for reporting his services. <b>Note:</b> No reimbursement for assistant surgeon during operative session by either provider.
-76	Repeat procedure by same physician	When a service is rendered more than once per day by the same provider and billed on separate billing lines, use modifier –76 to identify <u>subsequent</u> occurrences of the same service.
-77	Repeat Procedure by another physician/provider	If a service is provided more than once per day by different rendering providers, use modifier -77 to identify subsequent occurrences of the same service on the same date.
-79	Unrelated procedure or service by the same physician during postop period	Use to identify unrelated procedures and services provided by the operating surgeon during the postoperative period.
-80**	Assistant surgeon	Use to identify assistant surgeon services.

-81**	Minimum assistant surgeon	Adding modifier -81 to the procedure code identifies minimum assistant surgeon services.
-91	Repeat clinical diagnostic laboratory test	When it is necessary to repeat the same laboratory test on the same day to obtain subsequent (multiple) test results, the laboratory test performed can be identified by its usual procedure number and the addition of the modifier “-91”. This modifier may only be used for laboratory test(s) performed more than once on the same day on the same client. <i>Note: This modifier may not be used (a) when the tests are rerun to confirm initial results, (b) due to testing problems with specimens or equipment, (c) for any other reason when a normal, one-time, reportable result is all that is required, or (d) when other code(s) describe a series of test results (e.g., glucose tolerance tests, evocative/suppression testing).</i>
-UB	Invoiced costs	Use when billing more than \$25.00 for procedure code 99070. Include invoice and cost documentation.
-GY	Item or service not meeting the definition of Medicare benefit	Use to identify routine podiatric foot care services that are not covered by Medicare.
-KX	Specific required documentation on file	Specimen handling & conveyance from one laboratory to another. Use to certify that the necessary laboratory equipment was not functioning or that the lab is not certified to perform the test.
-UK	Services provided on behalf of the client to someone other than the client	Inpatient newborn services billed using mother’s state ID & birth date. Use to identify inpatient physician services rendered to newborn infants while mother remains in the hospital.
-55	Post operative management only	Use with eyewear codes to certify eyewear is being provided following eye surgery. Eye surgery may have been performed at any time during the client’s life. Use with each applicable code.

**Narrative column:** A description of the service. When appropriate, the description defines the billing unit. Example: J0120 Injection, Tetracycline, up to 250 mg. One unit represents an injection of 250 mg or less. When billing for a higher dosage than listed, increase the number of units to correspond to the dosage administered. Bill using whole numbers only, no fractions and no decimals.

**Benefit column:** The current benefit status of the item. The notation "Deleted" means that the code is invalid effective the day following the date shown in the "Comments" column. Example: Codes that are deleted effective 12/31/03 are invalid for billing services provided on or after 01/01/04. Newly added codes become effective on the date shown. Example: Codes showing an effective date of 01/01/04 may be submitted for services provided on or after 01/01/04.

**Comments Column:** Expands on the description, identifies required special billing instruction and procedures requiring prior authorization.

**Prior Authorization Requests (PARs) must be approved before claims are submitted. PAR approval does not guarantee Medical Assistance Program payment and does not serve as a timely filing waiver.** PAR approval only assures that the service has been identified as medically necessary. All of the requirements for eligibility and proper claim submission must be met before reimbursement will be made. The provider is responsible for verifying the client's eligibility status on the date of service and securing appropriate primary care physician authorizations and billing information.

Prior authorization does not apply to Medicare X-over claims. If Medicare approves benefits, the Medical Assistance Program does not require prior authorization. If the item is not a Medicare benefit, the claim must meet all Medical Assistance Program billing requirements including prior authorization, if applicable.

*This listing is divided into sections to assist providers who bill for specific types of service. If you have questions about billing or the use of the listing, please contact Medical Assistance Program Provider Services.*

#### Assistant surgeon

The Medical Assistance Program reimburses assistant surgeons' fees for procedures not excluded from assistant surgeon benefits. The Medical Assistance program uses the Commerce Clearing House listing of surgical procedures to determine procedures eligible for assistant surgeon benefits.

Surgical procedures allowing an assistant surgeon are individually reviewed when they are reimbursable under The Medical Assistance Program. Allowable Medicare assistant surgeon benefit information is entered into the procedure code file.

Assistant surgery is not a benefit when the same physician is reimbursed for primary surgical services performed concurrently or consecutively on the same day.

Assistant surgery is not a benefit for non-physician assistants (either physician assistants or surgical assistants), perfusionists, or casting technicians.

Benefit payment is up to 20 percent of the surgeon's maximum fee. Use modifiers -80 or -81 with surgical procedure codes to identify assistant surgeon services.

Please note that the existing policy regarding assistant surgeon services will be strictly enforced.

#### Medical care and surgery-Same date of service

Medical care provided on the same date of service as a surgical procedure, and provided by the same rendering provider, shall not be considered reimbursable unless the surgical procedure has zero (0) follow up days.

#### Medicare crossover claims

Medical Assistance Program clients may qualify for Medicare benefits because of age or disability. The Colorado Medical Assistance program administers very specific policies to coordinate benefits for Medicare-covered Medical Assistance Program clients. New HCPCS codes beginning with “C” may be submitted to Medicare and are processed by The Medical Assistance Program on crossover claims **only**. “C” codes are **not** benefits of the Colorado Medical Assistance program.

**Supplies provided by the practitioner****Nonbillable routine supplies and materials - Included in related medical/surgical fees - Do not bill for these supplies**

**Nonbenefit supplies, materials & equipment - Not a benefit when provided by a physician/practitioner**

The following items are not benefits of the Medical Assistance Program when provided by a physician:

Braces	Heel cups	Self-help devices
Exercise equipment	Prosthetics	Orthopedic shoes

**Biologicals, drugs & solutions administered other than orally****Billing information**

With the exception of oral immunizations, the cost of oral medication provided by a physician is included in the medical service payment. Except for chemotherapy agents and immunizations distributed at no cost by the Department of Public Health and Environment for children, the benefit for intramuscular or subcutaneous injections & immunizations covers the cost of medication, associated supplies & administration. Chemotherapy administration is billed separately from chemotherapy drugs & agents. Chemotherapy and intravenous drug therapy supplies may be billed separately. When billing for injections & immunizations, please observe the following:

1. Injections are usually provided in conjunction with an evaluation/management (E/M) service. If an injection is the ONLY service performed, charges for a minimal medical service visit (CPT code 99211) may also be billed. If higher-level E/M services are rendered, the provider should document the reason for care (diagnosis) & appropriate level of service (E/M code) on the claim. Reminder: Level of service identification is the responsibility of the medical professional. Providers are responsible for maintaining records documenting the full nature & extent of the services rendered to Medical Assistance Program clients.
2. Claims submitted using CPT therapeutic or diagnostic injection codes 90782-90799 are denied. Injections/immunizations must be billed using HCPC Level II codes that identify the drug or medication. If a drug or therapeutic agent is not identified by a specific HCPC Level I code, the claim must be submitted on paper using code J3490 & identifying the exact medication and total dosage given in field 30 (Remarks). Claims without complete medication identification are denied.
3. Bill immunizations using CPT codes in the ranges 90281-90399 and 90476-90749. **Note:** 90471-90474 Administration Codes are not a benefit of The Medical Assistance Program and should not be billed.
4. Immunizations provided as part of the EPSDT medical screening service (initial, periodic, partial or interperiodic) should be billed in addition to the EPSDT medical screening code on the EPSDT claim form.
5. Bill for chemotherapy administration using CPT codes in the range 96400-96549. Chemotherapy drugs/agents must be billed using HCPC Level II code(s) from this listing.
6. Medication codes identify a specific dosage or definition of the billing unit. Any dosage up to & including the amount specified represents one billing unit. If the dosage is greater than the dosage listed, increase the number of units accordingly by whole numbers. Example: J0120 Injection, Tetracycline, up to 250 mg. One unit represents an injection of 250 mg or less; more than 250 mg up to 500 mg equals 2 units, etc.
7. *All injectible drugs administered in a physician's office must be provided by the physician. The drugs are considered part of the physician's services and should be billed on the physician's claim form. If an injectible drug is to be administered at a client's home, it must be supplied by the Pharmacy Program.*

**Pricing information for injectible drugs** - Injectible drugs are reimbursed using average wholesale price + 10 percent + \$2.00 administration fee.

**Immunization pricing****1. Immunization reimbursement**

Medically necessary vaccines that are not provided to practitioners at no cost by the VFC or Infant Immunization program, as well as immunizations provided to adults, are reimbursed using the following formula: Average wholesale price (cost) of vaccine + 10 percent + \$2.00 for administration.

**2. Pricing information for Medicare crossover claims**

For Medicare crossover claims, The Medical Assistance Program pays the Medicare deductible and coinsurance OR, the Medical Assistance Program-allowed benefit minus the Medicare payment, whichever amount is less. If Medicare's payment for immunization services is the same or greater than the Medical Assistance Program allowable benefit, no additional payment is available. If Medicare pays 100 percent of the Medicare allowable, no additional Medical Assistance Program payment is available.

**3. Public health clinics – Administration, Recordkeeping, and Tracking (ART) fees**

Public health clinics are eligible to receive vaccines at no cost from the Colorado Department of Public Health and Environment (CDPHE), for administration to eligible children from birth through age 20 years. The clinic may bill and be reimbursed \$2.00 for the ART fee for each immunization.

**4. Private practitioners and Facility-based clinics – Administration, Recordkeeping, and Tracking (ART) fees**

Practitioners billing for immunizations to EPSDT-eligible children (newborn through age 20) where vaccine is available at no cost from the CDPHE are paid an ART fee of \$6.50 for each immunization.

**Psychiatry**

*This section applies to fee for service clients only. Local Mental Health Assessment and Services Agencies (MHASAs) provide all other mental health benefits. MHASA benefits are not billable to the Colorado Medical Assistance program. For Community Mental Health Centers or Clinics, please refer to the bottom of this section.*

**Note:** Providers of psychiatric services are instructed to use the 2004 Current Procedural Terminology (CPT) codes: 90801, 90804-90807, 90816-90819, 90862, 90887, and 96100. These codes should be billed utilizing time units and provider types in accordance with their narrative guidelines. Prior authorization is required for outpatient services that exceed 35 visits for CPT codes 90804-90807. For inpatient mental health hospital services in which the consumer remains 24 hours a day in a facility licensed as a hospital by the State, services are limited to forty-five (45) days per State fiscal year, except as otherwise required by EPSDT as described in 10 C.C.R. 2505-10, Section 8.282.

**Billing & benefit information**

Benefits are available for face-to-face patient services only. Case Management is not a covered mental health benefit.

Please refer to the Medical Assistance Program Medical/Surgical portion of the Specialty Manuals section of the Medical Assistance Program Provider Manual for psychiatric benefit limitations.

Services provided by non-physicians must be ordered by a licensed physician & provided under the direct supervision of a physician. The supervising physician must submit the claims. Payment is made to the physician. Licensed psychologists may not serve as supervisors of treatment services provided by other non-physician providers.

Procedural Coding: Claims for services provided by non-physician mental health practitioners must be submitted using Current Procedural Terminology (CPT) codes that correctly correspond to the educational level of the individual actually rendering the service. Example of modifiers: Clinical psychologist – AH, Clinical social worker – AJ, Masters degree level – HO, Doctoral level – HP.

Certified Community Mental Health Centers:

Psychiatric benefit services are also available through a state certified community mental health center. The following coding information applies to services provided by employees of certified Community Mental Health Centers. Services provided in a certified community mental health center must be billed by the mental health center using specially designated HCPCS codes. Payment is made to the mental health center.

## Laboratory

### Billing information

The provider who actually performs the laboratory test is the only one who is eligible to bill & receive payment. Physicians may only bill for tests actually performed in their office or clinic. Testing performed by independent laboratories or hospital outpatient laboratories must be billed by the laboratory. To receive Medical Assistance Program payment, all providers of laboratory services must be CLIA certified & Medical Assistance Program enrolled. Laboratory services performed at a hospital or services contracted out by a hospital must be paid by the hospital. These services cannot be billed to the client.

CPT lists tests that can be & frequently are done as groups & combinations (profiles) on automated multichannel equipment. For organ or disease oriented panels (check CPT narrative), use the appropriate code in the range 80048-80076. These tests are not to be performed or billed separately when ordered in a group/combination. Procedures must be billed with one unit of service.

In accordance with Section 1903(i)(7) of the Social Security Act, Medicaid shall not expend funds for clinical diagnostic laboratory services in excess of the amount that would be recognized under Medicare. Providers therefore may not bill the Medicaid Program for specific tests for which a claim for the same test, inclusive in a panel or multichannel test, has been or will be submitted. Reimbursement received as a result of incorrect billing is subject to recovery.

### Family Planning

To report family planning service procedures, use Current Procedural Terminology (CPT) evaluation and management (E&M) codes 99201-99215. The physician must determine the level of code to bill and document accordingly.

All claims for family planning services must include one of the following family planning diagnosis codes as a primary diagnosis from the ICD9: V25.1- V25.9.

Effective January 1, 2003, family planning services by Certified Family Planning Clinics shall be billed on a fee-for-service methodology. Physician's offices, clinics, certified health agencies, certified family planning clinics, and non-physician practice groups must use the modifier (FP) with the CPT procedure code when billing The Medical Assistance Program for family planning services. An example of such is "99201-FP". If the FP modifier does not appear with the procedure code, the claim will not be recognized as a family planning service and would therefore be subject to recovery of reimbursement if identified in an audit.

Clinics certified as a family planning clinic or non-physician practitioner group for the purposes of providing family planning services may dispense birth control pills directly to the client if they are licensed as an outlet pharmacy. Birth control pills will be reimbursed at \$14.00 per monthly supply. For more costly oral contraceptives the clinics may choose to write a prescription to be filled by a pharmacist. All other practitioners must prescribe oral contraceptives thru a pharmacy.

**Prosthetics & Orthotics**

Prostheses and orthoses are a covered Medical Assistance Program benefit for the adult Medical Assistance Program population. The benefit includes such items as braces, artificial limbs, augmentative communication devices, and orthopedic shoes for diabetic clients. These items must be prescribed by the client’s physician and prior authorized before services are rendered.

**Vision eyewear**

**Billing & benefit information. Please review this information carefully before referencing CPT. Use CPT codes only if there is no HCPC Level II code to appropriately describe the service performed.**

The Colorado Medical Assistance Program provides benefit for medically necessary ophthalmological refractions as a component of general ophthalmological services (CPT codes 92002 - 92014). There is no additional or separate benefit for procedure code 92015 when billing a general ophthalmological examination for adults or children.

For children and adolescents, through the age of 20, determination of the refractive state only, using code 92015, is allowable as a partial vision screening. The code may not be billed with general ophthalmological examinations or other evaluation and management codes. Separate or "stand-alone" charges for refractions are not billable to Medical Assistance Program clients as non-benefit services.

**Benefits for clients age 21 and over:** Medically necessary eye examinations are benefits for Medical Assistance Program clients age 21 and over. Use CPT codes to submit claims for eye exams.

Medically necessary glasses & contact lenses are benefits for clients over age 20 **following eye surgery only** & do not require prior authorization. Each procedure code must be billed with modifier -55 to identify surgery related eyewear.

**Billing information**

**Modifier –55 Use with each vision correction procedure code to identify eyewear services provided to a client with a history of eye surgery. Benefits are related to procedures only affecting vision correction. Such procedures would include surgeries on the eyeball, and supporting musculature and nerve tissue.**

Modifier –55 is used with one of the procedures listed below, if the service is related to a prior eye surgery. The use of modifier –55 with the following procedures removes all prior authorization requirements for clients age 20 and under and allows surgery-related vision services for clients age 21 and over.

**Benefits for clients age 20 and under:** The EPSDT Program provides the following vision benefits for clients age 20 and under:

- Standard eye glasses (one or two single or multifocal clear glass lenses with one standard frame). The Medical Assistance Program provides payment for a standard frame.
- Glasses dispensed by an optician are a benefit when ordered by an ophthalmologist or optometrist.
- Replacement or repair of frames or lenses (standard eye glasses), not to exceed the cost of replacement.
- Contact lenses are a benefit if medically necessary & prior authorized, or when billed with modifier –55 to identify surgery-related services.
- Contact lens supplies & contact lens insurance are not benefits.
- Ocular prosthetics are a benefit if services are prior authorized. A statement of medical necessity must accompany the prior authorization request.
- There is no yearly maximum for eye exams or glasses.

Claims: Ophthalmologists, optometrists, and opticians bill on the Colorado 1500 or 837 professional claim format.

Lens materials: Materials must be billed using HCPC Level II codes from this bulletin. CPT codes 92390-92396 will be denied. One unit of service represents one lens. If two lenses of the same strength are provided, complete one billing line; enter units of service as 2 & charges as the total charge for both lenses. Lenses of different strengths are billed on separate claim lines.

Lens Dispensing: A dispensing fee is allowed for each lens. Use CPT codes in the range 92340-92355. For two lenses, complete one claim line with two units of service & charges for both lenses. Frame dispensing is NOT a separate benefit.
