SCHOOL HEALTH SERVICES PROGRAM FISCAL YEAR 2004-2005 ANNUAL REPORT

I. EXECUTIVE SUMMARY

This report is presented to the Joint Budget Committee (JBC) of the Colorado General Assembly in response to footnote 46 of Senate Bill 05-209. Footnote 46 asks for an annual report on the School Health Services Program. This program allows Colorado public school districts, Boards of Cooperative Education and the Colorado School for the Deaf and the Blind (herein after referred to as districts) to access federal Medicaid funds for health services delivered to eligible clients. The footnote requests information in four areas:

The types of services delivered

Three types of Medicaid benefit services are delivered in school districts: Direct Services that are Early and Periodic Screening, Diagnostic, and Treatment (EPSDT) services and therapies, Targeted Case Management and Transportation Services.

How those services meet the definition of medical necessity

In order for a school district to claim for delivering a Medicaid benefit, except Targeted Case Management, the service must meet the EPSDT definition of medical necessity. Determination of medical necessity is made through the referral and authorization process. Technical assistance provided to districts and program oversight monitoring ensure that districts comply with the requirement.

The total amount of federal dollars distributed to each school under the program

Federal reimbursement funds totaling \$8,466,308¹ have been distributed to 139 Colorado school districts for providing Medicaid benefit services to children in fiscal year 2004-2005, including those districts represented by seven Boards of Cooperative Education Services, and the Colorado School for the Deaf and Blind.

How many children were served under the program

Medicaid benefit services were provided for 22,801 eligible children in fiscal year 2004-2005.

In the fiscal year 2004-2005, school district participation in the School Health Services Program resulted in Medicaid claims of \$16,932,615. Reimbursed funds totaling \$8,656,660² were made available to deliver new and expanded primary and preventative health services for Colorado's public school children.

¹ Data Source: BOA query for payments through October 4, 2005 for dates of service from July 1, 2004 through June 30, 2005. Data Analysis Section, Colorado Department of Health Care Policy and Financing. October 4, 2005.

² This figure represents the total funds dispersed to districts in FY 2004-2005 to deliver new and expanded health services and includes funds paid to districts in FY 2004-2005 for Medicaid services provided in FY 2004-2005, as well as funds paid to districts in FY 2004-2005 for services provided before July 1, 2004.

School Health Services Program Annual Report FY 2004-2005 November 1, 2005 Page 2 of 32

II. INTRODUCTION

This report is presented to the Joint Budget Committee (JBC) of the Colorado General Assembly in response to footnote 46 of Senate Bill 05-209, which states:

Department of Health Care Policy and Financing, Other Medical Services, S.B. 97-101 Public School Health Services--The department is requested to submit a report by November 1 of each year to the joint budget committee on the services that receive reimbursement from the federal government under S.B. 97 - 101 public school health services program. The report should include information on the type of services, how those services meet the definition of medical necessity, and the total amount of federal dollars that was distributed to each school under the program. The report should also include information on how many children were served by the program.

III. PROGRAM OVERVIEW

The School Health Services Program, Section 26-4-531, C.R.S. (2005), allows public schools, Boards of Cooperative Education Services (BOCES), and state K-12 educational institutions (hereinafter collectively referred to as "districts") to receive federal Medicaid funds for amounts spent providing health services through the public schools to students who are Medicaid eligible. Districts are required to use the Medicaid funds received pursuant to this program only to offset costs incurred for the provision of student health services by the districts or to cash fund student health services.

Each public school district that chooses to participate in the School Health Services Program is required to conduct a health needs assessment of its uninsured and under insured students to determine the types of health services needed in the district. Together with community members, the district develops a Local Services Plan that identifies the types of services needed by students within the school district and the services it anticipates providing. The Local Services Plan is submitted to the Department of Education for technical assistance evaluation and the Department of Health Care Policy and Financing for approval. Once the Local Services Plan is approved, the district is awarded a contract to participate in the program.

Since its inception in 1997, through the fiscal year 2004-2005, school districts spent more than \$96 million delivering Medicaid reimbursable health services for children in public schools. The School Health Services Program has allowed districts to effectively leverage those funds to bring more than \$47 million in reimbursed Medicaid funds for new and expanded health care services for Colorado public school children.

In fiscal year 2004-2005, participation by 139 school districts³, resulted in Medicaid claims of \$16,932,615. The federal share of costs for these claims was \$8,466,308.

³This total includes individually participating districts, districts represented by seven participating Boards of Cooperative Education Services and the Colorado School for the Deaf and Blind.

In FY 2004-2005, federal reimbursement funds totaling \$8,656,660 were dispersed to districts to deliver new and expanded primary and preventative health services for Colorado's public school children. Because the Department has moved to cash accounting, this figure varies from the federal share total because it represents the amount paid to districts during the fiscal year rather than the amount of federal reimbursement claimed for services delivered in FY 2004-2005. The figure includes funds paid to districts in FY 2004-2005 for Medicaid services provided in FY 2004-2005, as well as funds paid to districts in FY 2004-2005 for Medicaid services provided before July 1, 2004. In addition, the state's costs to administer the program are paid out of the federal reimbursement paid to districts during the fiscal year. For FY 2004-2005, total state administrative costs were \$443,169.

IV. FOOTNOTE 46 REQUESTS FOR INFORMATION

A. Types of Health Services Delivered

Under the Individuals with Disabilities Education Act, Section 504 of the Rehabilitation Act of 1973, and C.R.S. Title 22, districts are required to provide certain medical services for public school children. Additionally, districts provide health screening, nursing services and other medical support services for students. When delivered to a Medicaid eligible student, some of these services qualify for Medicaid reimbursement. Table 1 below summarizes the types of services for which districts have received federal funds and the amount of funds distributed in fiscal year 2004-2005.

TABLE 1 Fiscal Year 2004-2005 Federal Funds Distributed by Medicaid Service Type

Type of Medicaid Service	Federal Funds
Direct Services Audiology, Counseling, Diagnostic and Evaluation Services, Nursing, Occupational Therapy, Orientation and Mobility Services, Physical Therapy, Psychology, Social Work, Speech Therapy, Delegated Nursing Services	\$5,319,390.63
Targeted Case Management Benefit Individualized Needs Assessment, Needs-based Service Planning, Service Plan Review, Crisis Assistance Planning, Service Coordination Monitoring, and Advocacy	\$2,134,198.79
Special Transportation	\$1,012,718.24
TOTAL	\$8,466,307.66

Data Source: BOA query for payments through October 4, 2005 for dates of service from July 1, 2004 through June 30, 2005. Data Analysis Section, Colorado Department of Health Care Policy and Financing. October 4, 2005.

Table 2 below provides more detail about the Medicaid services delivered by districts to public school students.

TABLE 2

Transportation	\$1,012,718.24	11.96%
Total	\$8,466,307.66	100.00%

Data Source: BOA query for payments through October 4, 2005 for dates of service from July 1, 2004 through June 30, 2005. Data Analysis Section, Colorado Department of Health Care Policy and Financing. October 4, 2005.

B. How Services Meet the Definition of Medical Necessity

Districts apply the Medicaid definition of medical necessity when identifying services for which they intend to claim reimbursement. Colorado Medicaid's Early and Periodic Screening, Diagnostic, and Treatment Program defines a medically necessary service at 10 CCR 2505-10, Section 8.280.6, as a service necessary to

... prevent, diagnose, cure, correct, reduce or ameliorate the pain and suffering, or the physical, mental, cognitive or developmental effects of an illness, injury or disability; and for which there is no other equally effective or substantially less costly course of treatment suitable for the child's needs.

Medical necessity is determined through the referral and authorization process. Where required by the Medicaid regulations, a qualified practitioner of the healing arts must refer a child for services. Individualized plans such as the Individualized Education Plan or an Individualized Health Services Plan, when developed according to the Colorado Department of Education procedures, serve as authorizing documents. Technical assistance is provided for district providers to identify those services delivered at schools that meet the definition of medical necessity. Finally, medical file reviews and quality assurance monitoring ensure that district providers comply with Medicaid requirements.

C. Federal Dollars Distribution to School Districts

For Medicaid benefit services provided to children during fiscal year 2004-2005, the School Health Services Program distributed a total of \$8,656,660⁴ in federal funds to participating district providers in four categories: Individual school districts, Boards of Cooperative Educations Services (BOCES), a combination of BOCES and member districts, and the Colorado School for the Deaf and Blind.

Details of the Federal funds reimbursed to districts for fiscal year 2004-2005 Medicaid benefit service claims are found in Exhibit A - Federal Funds Distribution to Districts and in Exhibit B - Federal Funds Distribution to Districts by Service.

D. Number of Children Served

School districts received federal funds distribution for providing medical services, targeted case management, and transportation services for 22,801 Medicaid eligible children during fiscal year 2004-2005. The number of children receiving Medicaid services decreased in fiscal year 2004-2005. This decrease was the result of a change in district claiming patterns after the release of new Federal Medicaid guidelines clarified the free care exemption for school-based claiming. A summary of the number of children receiving services by type of Medicaid service is shown below in Table 3.

⁴ This figure represents the total funds dispersed to districts in FY 2004-2005 to deliver new and expanded health services and includes funds paid to districts in FY 2004-2005 for Medicaid services provided in FY 2004-2005, as well as funds paid to districts in FY 2004-2005 for services provided before July 1, 2004.

TABLE 3

V. SUMMARY

The School Health Services Program is entering a seventh year of operations. After experiencing steady growth in the first five years, district participation levels have begun to stabilize. However, district participation is still less than 100%. The Program continues to deliver additional health services to Colorado public school children each year without additional state General Fund expenditures. Using the disbursed federal funds through the Local Services Plan health service delivery process, districts have been able to address some of the health care needs unique to their communities. Additionally, the program has helped improve learning environments by providing students increased access to health care services and improving the quality of school health services. Program funds have been expended to deliver services in the areas of greatest need to:

- Increase school nursing services,
- Improve and enhance the quality of school health services,
- Increase access to health care services for the uninsured and underinsured and
- Provide health services where none were previously available.
