
COLORADO COMMISSION ON

HIGHER EDUCATION

ACCESS TO HIGH-QUALITY, AFFORDABLE EDUCATION FOR ALL COLORADANS

2007 LEGISLATIVE REPORT ON REMEDIAL EDUCATION

January 18, 2008

1380 Lawrence Street, Suite 1200 • Denver, Colorado 80204 • (303) 866-2723

DAVID E. SKAGGS, EXECUTIVE DIRECTOR

I. INTRODUCTION

This report documents actions taken and data gathered by the Colorado Department of Higher Education (DHE) as required by statute to report annually on students taking basic skills courses at Colorado's public higher education institutions. DHE has prepared this report which summarizes: 1) actions by DHE and the Commission on Higher Education (Commission) since adopting the Remedial Policy in 2000, and 2) data on assessed and remediated students collected from Colorado public higher education institutions; data on students enrolled in college basic skills courses; and data on the remedial needs of first-time enrolling students from Colorado public high schools. The report will be submitted to the Education Committees of the Senate and House of Representatives, the Joint Budget Committee, the Colorado Department of Education, and each Colorado public school district superintendent.

C.R.S. 23-1-113.3 defines five areas of responsibility for the Commission with regard to remedial education:

- 1) adopt and implement a remedial policy; develop funding policies for remediation appropriate to institutional roles and missions;
- 2) design a reporting system that provides the General Assembly with information on the number, type, and costs of remediation;
- 3) establish comparability of placement or assessment tests; and
- 4) ensure each student identified as needing remediation is provided with written notification regarding cost and availability of remedial courses.

II. CCHE POLICIES RELATED TO REMEDIATION

A. Remedial Policy

In August 2000, the Commission adopted a remedial policy intended to ensure that:

- All enrolled first-time undergraduate students are prepared to succeed in college-level courses.
- Students assessed as needing remedial instruction have accurate information regarding course availability and options to achieve college entry-level competencies.
- Colorado public high schools are informed about the level of college readiness of their recent high school graduates.

The policy applies to all state-supported institutions of higher education (i.e., four-year and two-year colleges), and governing boards and institutions of the public system of higher education in Colorado are required to follow the policies set by the Commission within the authorities delegated to it by C.R.S. 23-1-113.3.

B. FTE Policy

The Commission revised its FTE Policy in March 2001, clearly identifying the public institutions that may claim state support for remedial education – Colorado community colleges, Adams State College, and Mesa State College – and the circumstances under which it may be claimed. A separate FTE reporting form was added to enable monitoring of state costs associated with the delivery of basic skills courses.

C. Revised Remedial Policy

The Commission revised its Remedial Policy again in 2003, effective for fiscal year 2005 to clarify: 1) a minimum passing score for placement in college-level mathematics; 2) determining concordances for scores between different types of assessment tests; 3) specifying the undergraduate student population to be assessed, and if necessary remediated; and 4) clarifying when institutions are required to enforce mandatory remediation.

III. REVISED REMEDIAL PLANS

Beginning in fiscal year 2005, institutions submitted course and student registration data files to DHE that served as the basis for Colorado-specific evaluation of cut scores and the study of remediated student success in courses.

Another change in fiscal year 2005 was the additional assessment, and where necessary remediation, of non-degree-seeking recent high school graduates, in addition to those converting to degree seeking status. The original undergraduate student population subject to entry-level assessment and possible remediation were first-time degree-seeking undergraduates and non-degree seeking undergraduates changing to degree-seeking status.

DHE staff continued to identify recent high school graduates in the SURDS files using year of high school graduation. When the year of high school graduation is not provided by institutions, date of birth is used to calculate a student's age as of September 15 of the specified year, and those students with a calculated age of 17, 18, or 19 years of age will be included in the frequencies. In fiscal year 2007, DHE staff added students with a calculated age of 16 to the frequencies.

The final component of the revised remedial plans outlined how institutions were to advise students with academic deficiencies about options for meeting their responsibility to enroll in appropriate developmental coursework. Effective fiscal year 2005, assessed students not meeting the specific minimum cut score were to be placed in college-level courses provided that a student's transcript(s) or secondary level assessment justifies such placement. Institutions were also required to implement mandatory advising of students with 30 hours of course work if the student still has unmet basic skills deficiencies.

IV. EVALUATION OF REMEDIAL POLICY

In FY 2008, DHE staff will continue to evaluate the remedial policy to determine whether the policy is effective.

V. DATA ON ASSESSMENT AND REMEDIATION

During FY 2001, DHE staff and representatives from governing boards developed a reporting system to provide the General Assembly with information on remediated students and the type of remediation needed. Beginning in fall 2001, institutions submitted the first data files.

A. Methodology and Data

- **Methodology:** Student cohorts are based on: 1) entering degree seeking and non-degree seeking undergraduates assessed by a Colorado public institution of higher education for the specified year; or 2) a recent Colorado public high school graduate¹. DHE produced the calculations by linking student data from ACT and the College Board with DHE's Student Unit Record Data System (SURDS) enrollment and applicant files.
- **Report Format:** Section V. Part B. (page 5) of this report is a summary of all assessed undergraduate students. Section V. Part C. (page 10) presents demographic information by gender and race/ethnicity. Section V. Part D. (page 10) lists recent graduates from Colorado public high schools assigned to remediation. Data are organized by school district and high school, reporting on the number of students from each high school being assigned for remediation and by subject. Section VI. Part A. (page 13) is a summary of end of term completion of remedial coursework. Section VI. Part B. (page 13) shows the general fund cost for fall 2006 and spring 2007.
- **Data Limitations:** In reviewing the following tables, please note that the data do not include recent graduates who enrolled in an out-of-state college, delayed entry into higher education for at least one year after completing high school, were not assessed, or were reported by institutions with missing data (e.g., year of high school graduation, age, high school code, or assessment status).

As is often the case with an undertaking of this magnitude, some issues remain to be addressed by the higher education institutions that have affected rates from year to year and limit interpretation over multiple years. While data collection has improved over the five years, colleges and universities continue to implement new assessment processes which subtly influence who is included in the population reported on. At the state level, revisions to the remedial policy made in fiscal year 2005 caused significant changes in the population reported on with the inclusion of non-degree seeking students. Three years of data are now available which include the non-degree population. DHE believes that the summary is a

¹ Recent high school graduates are defined as students who a) have graduated from a Colorado public or private high school (or its equivalent) during the previous academic year; or b) are 16, 17, 18, or 19 years of age. Age will be calculated as of September 15 of the specified fiscal year.

reasonable representation of remedial needs of the students entering higher education during fiscal year 2007.

B. Remedial Data Summary for All Assessed Undergraduates

In FY 2007 approximately 30% of all students were assigned to remediation in at least one discipline (Table 1, page 6). At the two-year institutions the overall remediation rate in 2007 was approximately 55%, with a low of 41.7% at Pueblo Community College and a high of 69.3% at Community College of Denver. At the four-year institutions the overall remediation rate was approximately 20%, with a low of 0.4% at UCCS and a high of 64.8% at Adams State College.

At both two-year and four-year institutions, the subject with the highest number of students assigned for remediation was mathematics (figures 1 & 2).

Figure 1 illustrates the percentage of recent high school graduates at two-year public institutions assigned to remediation by discipline. Approximately 18% of entering students at two-year institutions were assigned to remediation in all three subjects, mathematics, reading and writing.

Figure 2 illustrates the percentage of recent high school graduates at four-year public institutions assigned to remediation by subject area. Approximately 2% of entering students at four-year institutions were assigned to remediation in all three subjects, math, reading and writing.

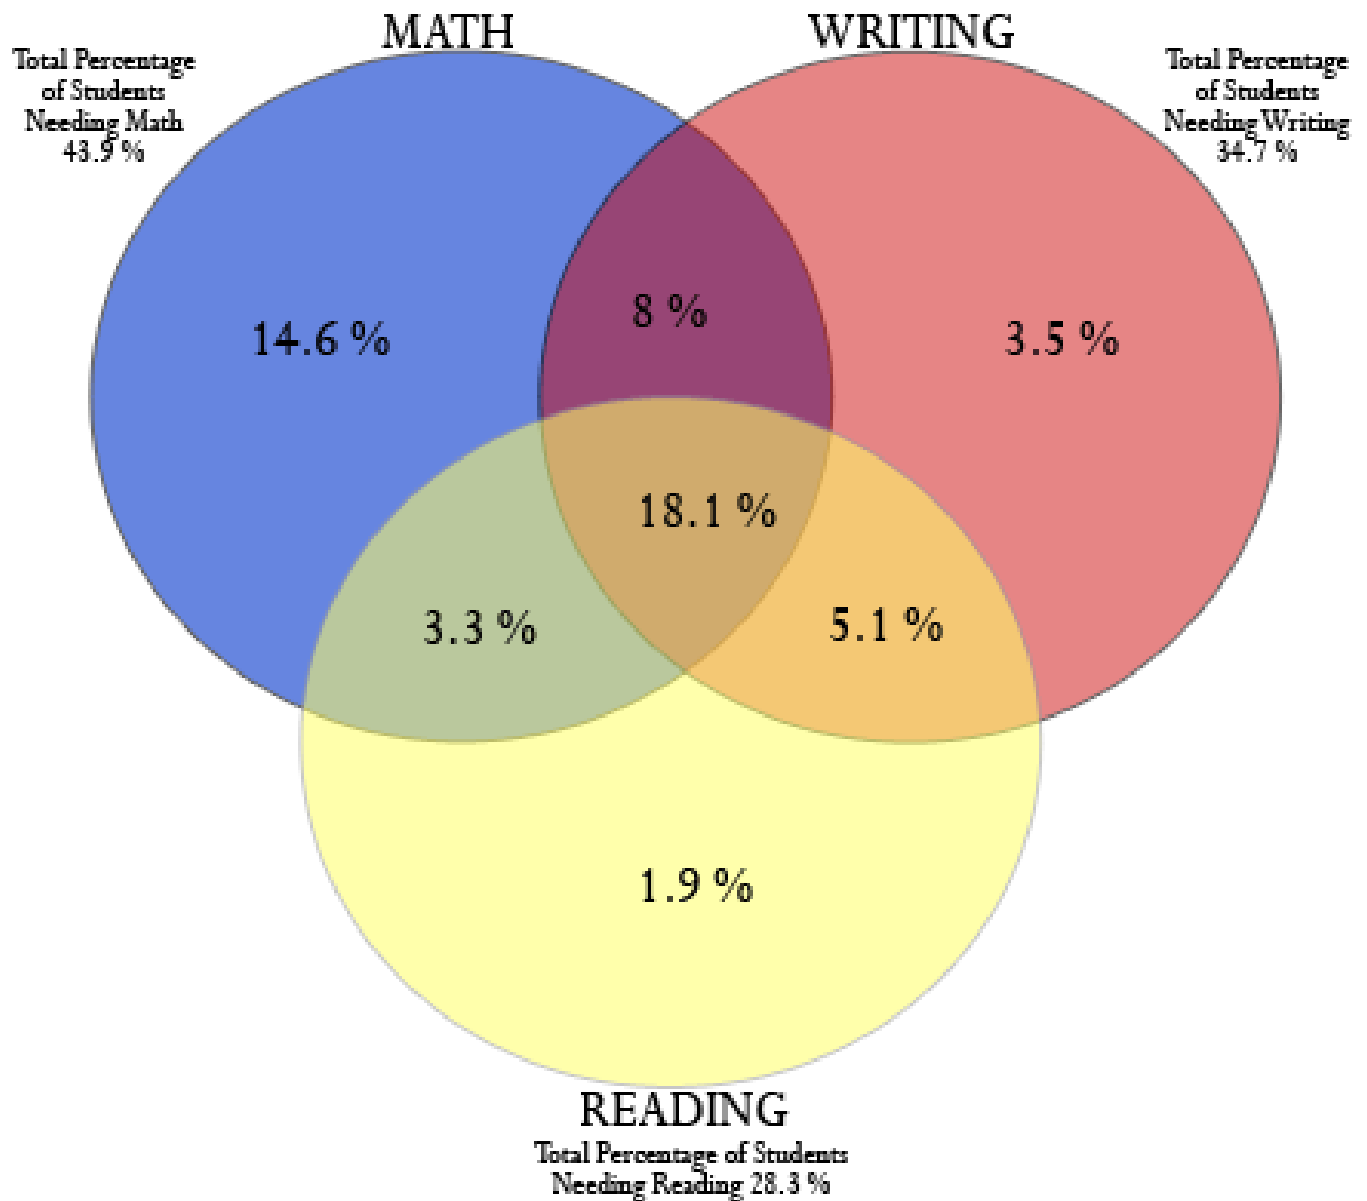

Table 2 (page 9) is an overview of assessment activity for FY 2005, 2006, and 2007. For both two-year and four-year institutions, the overall remediation rates over the three years are nearly constant at approximately 55% and 19%, respectively.

C. Remedial Data Summary for Recent High School Graduates

Demographics of Recent High School Graduates Assigned to College-Level vs. Remedial Coursework

Tables 3 & 4 (see pages 11 and 12) compare the demographic characteristics of recent high school graduates assigned to remediation by gender and by race/ethnicity.

By gender, a slightly higher proportion of females was assigned to remediation in both institutional sectors. At two-year institutions, over the last three years, 57%, 58% and 56% of females were assigned to remediation, compared to 53%, 54%, and 53% for males.

At four-year institutions, over the last three years, approximately 20%, 21%, and 22% of females were assigned to remediation compared to 16%, 18%, and 17% for males.

By race/ethnicity, at two-year institutions the range of students assigned to remediation was 62% for Hispanics, 76% for Black, non-Hispanic students, 62% for Native American, and 64% for Asian/Pacific Islander. Over the last fiscal year, the number of students assigned to remediation increased for Asian/Pacific Islanders and Black, non-Hispanic students, and decreased for Hispanic and Native American students.

At four-year institutions, the range of students assigned to remediation was 18% for Asian/Pacific Islander, 47% for Black, non-Hispanic students, 35% for Native American students, and 37% for Hispanic students. Over the last fiscal year, the number of students assigned to remediation increased for Black, non-Hispanic and Hispanic students, and decreased for Asian/Pacific Islanders and Native American students.

D. Remedial Data Summary for High Schools

Recent High School Graduates Assigned to Remediation by High School and School District

Table 7 (see pages 16 – 22) shows data on the number of student assigned to remediation by high school and school district. The remediation rates of high schools will have more meaning for school district superintendents and principals who have a better understanding of the high schools in their districts. Data from high schools with less than 25 recent high school graduates are not displayed but the number of students who were assigned to remediation is included in the total number of students assigned to remediation.

VI. DATA ON ASSESSMENT AND REMEDIATION

Beginning with FY 2005, institutions that offer remedial course work submitted files on enrollments and end of term completion rates. Based on the enrollment information, CCHE staff calculate estimated costs associated with these enrollments.

A. Remedial Summary by End of Term Completion

Table 5 (page 14) shows the enrollment in remedial courses by headcount and credit hours. Also shown is the end of term completion status of students enrolled in remedial courses.

B. Remedial Summary by End of Term Completion

Table 6 (page 15) shows the general fund cost for fall 2006 and spring 2007, two-year and four-year institutions that are authorized to offer remedial instruction reported that 4,276 FTE students were enrolled in remedial courses. The estimated general fund cost associated with these enrollments is \$11 million. Added to the cost of remedial instruction would be an additional \$10 million in tuition paid by students. Not included in the cost tables is remedial course work taken in cash funded courses, or remedial course work taken during the summer.
