*FT/PT status is based on the number of credit hours a student was taking during their first term in the 2012-2013 academic year, with the exception of summer, unless a student was only enrolled in the summer term. Please note that the increase in the percentage of full-time students (and the corresponding decrease in part-time students) compared to previous years is a data correction and not a change in student enrollment practices. Contrary to the note, prior years' fact books had actually depicted data for the first term enrolled, even if it was summer.
