SPECIAL NOTES

The WQCD is revising its practice of not allowing project managers to be Responsible Officials under the COG0400000. Rather, consistent with EPA practice, WQCD will allow project managers to be Responsible Officials for a corporation, provided they are responsible for the overall operation of the facility from which the discharge described in the application originates and have the authority to make management decisions which govern the operation of the facility. Please see <https://www.colorado.gov/pacific/cdphe/cor400000-stormwater-discharge> for more details.

D. WATER QUALITY CERTIFICATIONS (Section 401)

Water Quality Certifications, under Section 401 of the Clean Water Act, provide for Division determinations that federally issued permits and licenses will comply with the Basic Standards and Methodologies for Surface Water, the Basic Standards for Ground Water, surface and ground water classifications and water quality standards, and all other applicable water quality requirements for the affected waters.

- For the purposes of the antidegradation requirements found in Section 31.8 of the Basic Standards and Methodologies, the following projects have been reviewed to make a preliminary determination of the significance of such projects and a draft certification determination. Public comment on these preliminary determinations will be received for thirty days following the date of publication of this newsletter. More information on the specific projects can be obtained from Scott Garncarz (scott.garncarz@state.co.us), (303) 692-2374 or Trevor Klein (trevor.klein@state.co.us), (303) 691-7809.. The U.S. Army Corp of Engineers (COE) may also review these projects, under Section 404 of the Clean Water Act, and a list of their current public notice can be found on their web site.
