- 2. Eligible and Ineligible Projects and Project Related Costs
- 3A. Summary of Set-Aside and Fee Activity
- 3B. Funds Available to the DWRF
- 4. Loan Summary Report

**STATE OF COLORADO
DWRF INTENDED USE PLAN
JANUARY 1 - DECEMBER 31, 2006**

I. INTRODUCTION

As required by Section 1452(b) of the Safe Drinking Water Act (SDWA) and by Interim Final Regulations 40 CFR 35.3555 published August 7, 2000, an Intended Use Plan (IUP) is to be filed annually with the U.S. Environmental Protection Agency (EPA). The IUP describes how the State intends to use the Capitalization Grant and Drinking Water Revolving Fund (DWRF) program funds to meet the objectives of the SDWA and further the goals of protecting public health. The IUP is made available to the public for review and comment prior to submitting it to the EPA as required by the capitalization grant agreement.

The purpose of the DWRF program is to provide financial assistance to governmental agencies for the construction of water projects for public health and compliance purposes as described in the DWRF Rules (Attachment 1), and to set-aside funds from the capitalization grant to fund a variety of activities that are necessary to accomplish the requirements of the SDWA.

The DWRF may be used for: below market rate loans; loan guarantees; a source of reserve and security for leveraged loans (proceeds of which must be placed in the DWRF loan fund); the purchase or refinancing of existing local debt obligations where the initial debt was incurred and construction started after July 1, 1993; and earning interest prior to disbursement of assistance. Colorado limits this assistance to governmental agencies as defined by statute under C.R.S. 37-95-103 (5)(a) and (b).

The SDWA allows a state to set aside up to 31 percent of any yearly capitalization grant for non-project activities as follows: administration and technical assistance (4%), state program activities (10%), small systems technical assistance (2%), and local assistance (15%). Additionally, up to 30 percent of each grant may be used for loan assistance (including forgiveness of principal) to disadvantaged communities.

This IUP serves as the planning document to describe how the funds allotted for Federal Fiscal Year (FFY) 2006 and the funds remaining from all prior federal fiscal years' capitalization grant appropriations will be used for the DWRF and non-project program set-asides. The DWRF program fiscal year is January 1, 2006 to December 31, 2006. As currently developed, the IUP identifies the specific projects and activities associated with the federal appropriation and funds available from repayments to the program.

The "State" as referenced in this document is comprised of three agencies involved in operating the DWRF under a Memorandum of Agreement - the Colorado Water Resources and Power Development Authority (Authority), the Water Quality Control Division (WQCD) at the Department of Public Health and Environment, and the Division of Local Government at the Department of Local Affairs (DLG). The SDWA, Section 1542(g)(1)(B), expressly places the authority for establishing assistance priorities and carrying out oversight and related activities (other than financial administration) with the State agency having primary enforcement responsibility; the WQCD is the agency that has this responsibility in Colorado. The DLG helps

to evaluate the financial and managerial capacity of loan applicants, identifies potential projects for the program, and provides outreach to raise awareness of the program. The Authority is named administrator under state statute; therefore, it is the grant recipient and provides financial administration for the DWRF.

The requirements of the SDWA that are included in this IUP are as follows:

- ◆ A comprehensive priority list of those projects eligible to be assisted by the DWRF which must include the name of the public water system, the priority assigned to the project, a description of the project (type), the expected terms of financial assistance, the size of the community and an expected funding schedule. The State must identify which projects on the priority list will, or are projected to, receive funding in 2006;
- ◆ A description of the criteria and method established for the distribution of funds;
- ◆ A description of the financial status of the DWRF;
- ◆ A description of the short and long-term goals of the State's DWRF;
- ◆ A description of amounts transferred between the DWRF and the Water Pollution Control Revolving Fund (WPCRF); and
- ◆ A description of the non-project activities to be funded from the DWRF Capitalization Grant including the percentage of such funds allocated to these activities.

The State will prepare and submit a capitalization grant application for FFY 2006 based on this IUP.

II. DRINKING WATER REVOLVING FUND PROJECT LISTS

States are required to develop a comprehensive priority list of eligible projects for funding and to identify projects that will receive funding. In determining funding priority, states must ensure, to the maximum extent practical, that priority for the use of funds be given to projects that: 1) address the most serious risks to human health; 2) are necessary to ensure compliance under SDWA; and 3) assist systems most in need, on a per household basis (i.e. affordability). Projects that are primarily intended to serve future growth are not eligible. Examples of eligible and ineligible projects and project related costs are found in Attachment 2.

Appendix A to this IUP is the 2006 DWRF Project Eligibility List illustrating the various projects and their associated estimated costs as required by Colorado's authorizing statute. The DWRF Project Eligibility List includes, for each individual entry: the name of the public water system, a description of the project, population, the estimated cost of the project and a categorical ranking by priority as described in the DWRF Rules (included in Attachment 1).

Appendix B (DWRP Project Priority / Fundable List) is a list of the projects that have or will have a planning document for a specific project, have been prioritized for funding within each category, and are eligible to receive or have recently received a loan from the DWRP. The supporting documentation covering the assignment of priority points is available from the WQCD. This list includes the anticipated loan terms, interest rate, type of loan and an enumeration of the drinking water problem and project description to correct the problem.

Projects are added and deleted from the DWRP Project Priority / Fundable List during the annual IUP approval process. Deletions to the list are made for those entities that received a DWRP loan and completed the project. In other cases, projects are deleted from the list when the entity is able to secure project funding from sources other than the DWRP.

The DWRP Priority / Fundable List is amended as projects proceed throughout the year by notification to the Board of Health. The Board of Health may amend the DWRP Project Eligibility and DWRP Priority / Fundable lists at any time throughout the year to include public water system projects that it determines and declares to be emergency projects needed to prevent or address threats to public health.

III. CRITERIA, METHODS AND EVALUATION FOR DWRP DISTRIBUTION

Federal regulations require that the IUP include "...the process and rationale for distribution of funds between the fund and set-aside accounts." In accordance with the Memorandum of Agreement, the State has a decision-making team comprised of staff from the three agencies to determine the DWRP projects that are forwarded to the Authority Board for funding.

Regarding the non-project activities, the WQCD prepares the capitalization grant application including the amount of funds to be set aside for activities documented in the IUP. The application is forwarded to the Authority for signature and submission to EPA. Section VII (Non-Project Activities) outlines the WQCD's proposed use of funds from the FFY06 grant to meet various SDWA requirements.

A. Project Priority System

Colorado's project priority system is set forth in the DWRP Rules (Attachment 1). The Rules include the following categories by priority ranking:

Priority 1 Acute Health Hazard:

The WQCD has identified continuous violation of an acute maximum contaminant level (MCL) or a surface water treatment rule (SWTR) treatment technique requirement.

Priority 2 Chronic (Long Term) Health Hazard:

The WQCD has identified a continuous violation of an MCL or an SWTR treatment technique requirement for a chronic contaminant.

Priority 3 Potential Acute Health Hazard:

The public water system (PWS) has periodically exceeded an acute MCL, has levels greater than 50 percent of an acute MCL on a regular basis, or has short term problems meeting an SWTR treatment technique requirement that can be controlled temporarily by operational means.

Priority 4 Potential Chronic Health Hazard:

The PWS has periodically exceeded a chronic MCL, has levels greater than 50 percent of a chronic MCL on a regular basis, or has short-term problems meeting other treatment technique requirements.

Priority 5 Other Future Needs:

The PWS is beyond the useful/design life and is in need of equipment replacement, rehabilitation or repair, in order to maintain compliance or further the public health protection goals of the SDWA.

B. Priority Point Assignments Within Each Category

As provided in the DWRP Rules once a pre-planning, planning, or pre-design document is received, projects within each category will be prioritized by the assignment of points based upon the review of the following factors:

- (1) Population
- (2) Financial Need
- (3) Consolidation
- (4) Water Conservation
- (5) Source Water Protection
- (6) Beneficial Use of Sludge
- (7) Health Risk.

Projects on the DWRP Project Priority / Fundable List (Appendix B) will be financed in priority order to the maximum extent practical. Exceptions for funding out of priority order shall be due to one of the following reasons:

- A) Governmental agencies are not ready to proceed with the project.
- B) Governmental agencies do not wish to participate in the DWRP or they have received funding from other sources.
- C) Governmental agencies (on the DWRP Project Eligibility or DWRP Priority / Fundable List) had an emergency situation during the funding year.
- D) Certain governmental agencies are not approved for funding because of technical, financial or managerial deficiencies. (The WQCD will attempt to work with the governmental entity to resolve any deficiencies through the capacity development program).

C. Allocation of Loan Proceeds

In addition to the DWRP Rules, the following policy will be applied to the allocation of loan proceeds:

1. Direct Loan Program

An \$8 million minimum set-aside will be reserved for small projects (\$2 million or less); there will not be an application deadline for these loans. Of the \$8 million set-aside, up to

\$6 million will be reserved for loans to qualified disadvantaged communities as defined below. In September of each year, loan repayments are deposited into the fund. These deposits can be made available for additional small system loans if the \$8 million set-aside is not adequate. Loan applications are currently accepted on a continuous basis. However, a discussion of the merits of instituting an application deadline for direct loans will occur during 2006. If this policy change is made, it will potentially become effective in 2007 and will be incorporated in the 2007 IUP.

2. Leveraged Loan Program

All leveraged loan projects must submit applications by February 1st. Depending upon demand and available loan capacity, a second application date may be set by the WQCD and the Authority for a fall bond issue.

3. Planning and Design Grant Program

The intent of the Planning and Design Grant Program is to assist DWRF applicants with costs associated with complying with program requirements. To be eligible for a Planning and/or Design grant, a governmental agency must meet the following criteria:

- Project is on the current year DWRF Eligibility List,
- Population is under 10,000,
- Median household income (MHI) is less than the state average (the 2000 MHI for the state is \$47,203) or post project water/sewer monthly rates are equal to or greater than the state average as calculated by DLG.

Up to \$100,000, upon approval by the Authority Board, will be made available in 2006 for Planning and/or Design grants. One grant in the amount of \$10,000 will be awarded per community. However, if Planning and Design Grant funds are available on September 1 of each year, additional grant funds of up to \$10,000 (maximum of \$20,000 total per community) may be made to communities that have met criteria in demonstrating progress towards receiving funding through the program.

Grants will be awarded on a first come, first served basis. If the entity does not borrow project funds through the DWRF, the grant is reimbursable. The entity may seek a waiver of the requirement from the Authority Board.

Grant funds may be used to support a variety of project development activities including, but not limited to: preliminary engineering reports; technical, managerial and financial reviews; environmental assessments; legal fees (including costs associated with the formation of a legal entity capable of receiving DWRF assistance) and engineering design and project construction specifications.

These funds are provided from the administrative fee account from income received from DWRF loans.

4. **Disadvantaged Communities Program**

In accordance with federal statutes C.F.R 35.3525 (b) and EPA's final "Drinking Water State Revolving Fund Program Guidelines" dated February 1997, Colorado's Disadvantaged Communities Program description is as follows:

a. The definition of a disadvantaged community

A governmental agency that has a population of 5,000 or less with a median household income that is 80 percent or less of the statewide median household income average.

b. The total amount of the capitalization grant that may be used for providing additional subsidies

DWRF re-loan funds are funds that are paid back by borrowers in the form of debt service payments on outstanding debt obligations will be the primary source of revenues used to provide reduced interest rate loans under the program. The loan pool amount for all DWRF direct loans is established at a \$8 million minimum. Of this direct loan pool amount, up to \$6 million will be reserved for loans to qualified disadvantaged communities. EPA capitalization grant funds in an amount not to exceed 30 percent of the annual capitalization grant may also be considered to underwrite loans in the event re-loan funds are not sufficient to meet demand.

c. To the maximum extent practical, an identification of systems that will receive additional subsidies and the amount

Governmental agencies operating PWS that have populations of 5,000 or less with a median household income that is 80 percent or less of the statewide median household average may qualify as a disadvantaged community. Drinking water projects will be prioritized pursuant to DWRF rules. Reduced interest rate loans in an amount not to exceed \$2 million per project will be authorized on a tiered basis as described in Provision 4 below.

d. A description of the affordability criteria that the state will use to determine the level of disadvantaged assistance

Median household income as a percentage of the statewide median household income average will be used to distribute funding to governmental agencies that are disadvantaged in accordance with two categorical affordability tiers:

Category 1 - Disadvantaged communities with median household income levels that range from 80 percent to 61 percent of the statewide median household income average qualifies for loans up to \$2 million per project. Loan terms up to 30 years, but not to exceed the project's design life, are permitted. The loan interest rate is established at 50 percent of the direct loan rate (as set annually by the Authority Board) for qualifying governmental agencies.

Category 2 - Disadvantaged communities with median household income levels that are 60 percent or less of the statewide median household income average qualifies for loans up to \$2 million per project. Loan terms up to 30 years, but not to exceed the project's

design life, are permitted. The loan interest rate is established at 0 percent for qualifying governmental agencies.

In 2006 the DWRF Disadvantaged Community Program's criteria will be re-evaluated, and if necessary, amended in the 2007 DWRF IUP.

D. Emergency Procedures

The Board of Health may amend the DWRF Project Eligibility and DWRF Priority / Fundable Lists at any time throughout the year to include PWS projects that it determines and declares to be emergency projects needed to prevent or address threats to public health.

In cases where the Board of Health determines the amendments will result in substantial changes to the DWRF Project Eligibility or DWRF Priority / Fundable Lists, public notice and opportunity for comment on the proposed inclusions shall be provided.

E. Small Systems Funding Goal

To the extent that there are a sufficient number of eligible projects to fund, the State shall use at least 15 percent of all funds credited to the DWRF account on an annual basis to provide loan assistance to systems serving 10,000 persons or fewer. It is anticipated that 15 small systems will be funded in 2006.

To further the small system funding goal in 2006, Planning and/or Design grants will be made available (See VI. Short Term Goals; No. 7) to assist small systems meet some of the requirements of the DWRF. In addition, the DLG is planning to conduct a series of training workshops in 2005 to help build financial and managerial capacity of small rural public water and wastewater systems. For 2006, the focus of the workshops is targeted at financial management issues, with special attention devoted to rate setting techniques and asset management. DWRF set-aside funds may be used to partially support this effort. All funding agencies meet periodically to coordinate the financial needs of communities that are planning water quality improvement projects. The funding coordination committee includes staff from the WQCD, Authority, DLG, Colorado Water Conservation Board, USDA Rural Development and the Rural Community Assistance Corporation. The committee uses a web page on the DLG website to keep the public aware of the projects it is helping to arrange funding and to raise awareness of funding opportunities. Surveys are conducted to identify and update the needs of all public water systems including small systems.

F. DWRF ENVIRONMENTAL RESULTS

The following activities will occur in 2006 to ensure Colorado achieves the national goals:

1. It is the goal to fund nine projects through the Colorado DWRF of this amount, at least six projects will be funded through the state's Disadvantaged Communities Program.
2. In calendar year 2004, the Colorado DWRF fund utilization rate was 89 percent. The 2004 national DWSRF average rate was 83 percent. It is the goal of the State to maintain the utilization rate at or above the national level.

3. In calendar year 2004, the rate at which the Colorado DWRF projects progressed as measured in fund disbursements as a percent of assistance provided was 92 percent. It is the goal of the State to maintain this construction pace.

ANTICIPATED 2006 OUTCOMES:

1. Six projects are anticipated to initiate construction. (Three of the six projects will be Disadvantaged Communities Program loans).
2. Four projects, funded prior to January 1, 2006 are anticipated to initiate operations.

IV. FINANCIAL STATUS OF THE DWRF

The DWRF was created by State statute in 1995 prior to the enactment of the 1996 Amendments to the SDWA. Under this legislation, the Colorado General Assembly directed the transfer of \$7,253,915 to the DWRF. The final transfer occurred in March 1998. The State has made seventeen (17) direct loans for \$5,818,692 with State funds, which are kept separate from the federal portion of the DWRF so that repayments from these loans may be available for State match in the future.

A federally capitalized DWRF was authorized by the 1996 Amendments to the SDWA and was established in Colorado with the receipt of the first capitalization grant in September 1997. This program requires the state to match the total amount of each federal grant with a 20 percent contribution of state funds. This state match amount must be deposited entirely into the loan fund, which must be maintained in perpetuity. As of June 30, 2005, \$9,542,987 is available for State match.

The DWRF provides both direct loans and leveraged loans to finance projects. Direct loans are generally made for smaller projects. This allows the program to provide low interest loans to small public water systems without going to the bond market and incurring those associated costs. Direct loans (up to \$2 million) are funded from re-loan funds. Based on an effort to keep the rates for direct loans at or below the leveraged loan rate, the interest rate will be set by the Authority's Board of Directors each December.

Leveraged loans are generally provided to investment grade borrowers with larger projects. A leveraged loan (composed of grant funds, state match funds and bond proceeds) uses the reserve fund concept, whereby grant funds and re-loan funds in the DWRF are used as the source of security for bonds that are sold to increase the loan capacity. The leveraged loan interest rate is 80 percent of the market rate on the bonds and includes the administrative fee of eight tenths of a percent per year. The market rate on the bonds is determined on the day of pricing (sale) as the "all-in bond yield" (all costs considered) of the "AAA" rated drinking water revenue bonds.

The administrative surcharge on all loans, eight tenths of a percent, ensures long-term administration of the DWRF and provides potential opportunities for grant assistance to small public water systems. The administrative fee supplements the 4 percent administrative set-aside from the capitalization grant. The administrative fee income is deposited into an account separate from the DWRF and is used for costs associated with the DWRF (i.e., Authority, WQCD and DLG staffing and expenses and other operations expenses of the DWRF). Administrative fee income will continue to be used to fund a planning and/or design grant program in 2006

(\$100,000). Additionally, administrative fee income, as available, will be used beginning with the FFY2006 DWRF capitalization grant to reimburse the authority for state match funds (state match loan) deposited to the DWRF.

Administrative fees received from DWRF loans for 2006 are estimated to be \$1,728,000. These funds will be used to fund direct program costs including legal and accounting fees, trustee fees, and other consultant fees, in addition to labor and overhead allocations of the Authority, WQCD and DLG. Total costs for administration of the DWRF are estimated to be \$1,900,000 a portion of which will be paid from DWRF set aside grant monies available.

Following is a table showing the administrative fee account activity since inception:

For Year Ending	Loan Admin Fee Revenue	Cap. Grant Draw For Admin Expenses	Investment Income	Other Income / (Expenses)	(Admin Expenses)	(PWSS Set Aside Payouts)	Planning & Design Grants Paid	Annual Net Income / (Loss)
12/31/1997	23,408	84,411	24		(214,301)			(106,458)
12/31/1998	251,210	205,130	1,817	178,807.84	(559,680)			77,285
12/31/1999	609,066	287,502	5,852	90,900.17	(735,077)			258,243
12/31/2000	931,797	302,679	23,115		(769,629)			487,962
12/31/2001	1,029,413	260,092	29,145		(898,512)			420,138
12/31/2002	1,172,059	321,794	17,119		(980,321)		(7,457)	523,194
12/31/2003	1,494,366	351,245	14,794		(1,041,963)	(120,912.80)	(66,860)	630,669
12/31/2004	1,632,181	320,302	32,436		(953,920)	(112,743.00)	(101,027)	817,229
TOTALS	7,143,5006	2,133,155	124,304	269,708	(5,607,006)	(233,656)	(175,344)	3,108,263

Leveraging the fund is appropriate where financing needs significantly exceed available funds; however, it impacts the DWRF by reducing the interest rate subsidy provided or reducing future loan capacity. Each year the DWRF Eligibility List needs (currently over \$850 million) are compared against the loan capacity of the DWRF. Even though demand for loans (DWRF Priority / Fundable List) in the year 2006 is less than the projected loan capacity, it is in the best interest of the program to continue leveraging in order to maintain the flexibility to meet anticipated future needs. By continuing to leverage, the program will be able to assist more communities currently on the DWRF Project Eligibility List and help those communities achieve compliance with the SDWA. To date, the leveraged loan rates have been in the range of 3.03 and 4.60 percent. Although no interest income on the grant funds and state match funds accrue to the DWRF from the leveraged loans, the long-term or perpetual nature of the DWRF remains in place.

Through August 31, 20045, the State has received a total of \$111,338,300 in federal capitalization grants (includes the \$6,666,667 transfer back to the WPCRF in 2003). Of this amount, \$22,695,171 has been set aside for non-project activities. The State anticipates receiving a FFY06 capitalization grant of \$14,960,000 with \$3,849,208 set aside for non-project activities. This amount may change based on final federal appropriations. (See Attachments 3a and 3b.)

Under the federal portion of the DWRF, twenty- five (25) direct loans (which includes two Disadvantaged Community loans totaling \$483,000) for \$14,453,999 and twenty-five (25) leveraged loans for \$186,857,963 have been made to-date from the DWRF utilizing the federal capitalization grants (See Attachment 4).

The attached Appendix B (Priority / Fundable list) identifies 26 projects totaling \$75,263,940. In addition to these 26 projects, it is anticipated that Forest View Acres Water District (\$465,000), Mountain Water and Sanitation District (\$1,250,000), Cuchara Water and Sanitation District (\$350,000), the Cities of Rifle (\$5.5 million) and Evans (\$1 million) and the Towns of Georgetown (\$100,000), Platteville (\$2.2 million), Hotchkiss (\$900,000), Hudson (\$522,000), Ordway (\$1.1 million) and DeBeque (\$850,000) will be added to the Priority / Fundable list upon completion of an eligibility assessment and will receive a DWRF leveraged or direct loan during 2006. In addition, a transfer of an amount up to \$10 million (as discussed below) would reduce the 2006 DWRF loan capacity to \$58.9 million.

A. Transfer Activities

As authorized by Congress, up to 33 percent of the drinking water capitalization grants for FFY 1997 through FFY 20045 (total drinking water grants at \$111.3 million) may be reserved from the DWRF and transferred to the WPCRF. The following table itemizes (in \$ millions) the amount of net SRF funds available for transfer between the two programs.

Year	Transaction	Banked Transfer Ceiling	Transferred from WPCRF - DWRF	Transferred from DWRF - WPCRF	WPCRF Grants Available for Transfer	DWRF Grants Available for Transfer
1997	CG Award	\$5.6	-----	-----	\$5.6*	\$5.6*
1998	CG Award	8.8	-----	-----	8.8	8.8
1999	CG Award	12.1	-----	-----	12.1	12.1
1999	Transfer	12.1	\$6.7**	-----	5.4	18.8
2000	CG Award	15.6	-----	-----	8.9	22.3
2001	CG Award	19.1	-----	-----	12.4	25.8
2002	CG Award	23.6	-----	-----	16.9	30.3
2003	CG Award	28.0	-----	-----	21.3	34.7
2003	Transfer	28.0	-----	\$6.7**	28.0	28.0
2004	CG Award	32.2	-----	-----	32.2	32.2
2005	CG AWARD	36.7	-----	-----	36.7	36.7

**Transfers could not occur until one year after the DWRF had been established.*

*** \$6.7 million capitalization grant funds and \$1.3 million state match funds*

The authorization to transfer funds for FY 2006 and thereafter has been approved in the 2006 EPA appropriations bill. Since several water pollution projects are expected to request funds in 2006, the WPCRF loan demand is expected to exceed available loan capacity. A stakeholders group will be convened to evaluate the feasibility of transferring funds from the DWRF to the WPCRF. Based on approvals from the WQCC, the Board of Health, and the Governor, a transfer of no more than \$ 10 million dollars (including the State match) will be made from the DWRF into the WPPCRF in 2006. The exact amount of the transfer will be determined after the February 1 application deadline when DWRF loan demand is determined. The following two

tables provide a comparison of loan capacity impacts if a transfer of \$10, \$7 or \$5 million is made from the DWRF. None of these funds will be used for administrative purposes.

The DWRF set-asides would not be affected by the transfer amount. The remainder of the allocation would be deposited into the revolving fund. All identified and eligible drinking water projects that are ready for construction in 2006 will be funded out of the expected 2006 loan capacity. The transfer of funds from the DWRF to the WPCRF is not expected to cause any eligible drinking water projects to be delayed over the next few years.

This transfer, which is a combination of capitalization grant and state match will be deposited in the WPCRF and will only be available for loans. With the statutory language approved by the Colorado General Assembly in 2002, any transfers can be made from one account to the other with all of the appropriate approvals.

**Drinking Water Revolving Fund
Calculation of Loan Capacity for 2006
As of June 30, 2005**

	\$0 Transfer	\$10 Million Transfer	\$7 Million Transfer	\$5 Million Transfer
Capitalization grants for loans through 2005	\$ 88,643,129	\$ 88,643,129	\$ 88,643,129	\$ 88,643,129

B. Cross-Collateralization Activities

Beginning in the calendar year commencing on January 1, 1999, the WPCRF, along with the DWRF, may cross-collateralize or pledge moneys on deposit in one fund to act as additional security for bonds secured by moneys on deposit in the other fund. This mechanism was utilized for both programs in 1999 and, as a result, the bond ratings for both programs were upgraded to AAA by all three bond-rating agencies. This upgrade translates to lower interest rates and thereby more savings to the borrowers of both programs.

C. Operator Certification

The 1996 Amendments to the Federal Safe Drinking Water Act required that states develop certification programs for operators of water treatment plants and distribution systems. House Bill

00-1431 adopted by the Colorado General Assembly revised the existing Colorado operators certification program, in part to meet the new federal requirements. The WQCD and the Water and Wastewater Facility Operators Certification Board have developed a program to implement the federal requirements, in accordance with the revised state statute. EPA has approved the program.

V. LONG TERM GOALS

The State continues to develop long-term goals that will protect public health and ensure the integrity of the DWRF. To achieve these goals the following objectives were developed for 2006:

1. Provide affordable financial assistance for eligible applicants while maintaining a perpetual, self- sustaining revolving fund program.
2. Provide technical assistance to governmental agencies for facilitating effective planning, design, financing, and construction of facilities to comply with the provisions of the Colorado Primary Drinking Water regulations.
3. Maintain compliance with State and Federal laws and the provisions of the State/EPA operating agreement.

VI. SHORT TERM GOALS

In an effort to continually improve the DWRF program, the State will pursue the following short-term goals throughout the 2006 calendar year:

1. WQCD will prepare and the Authority will submit a Capitalization Grant application based on the FFY 2006 allotment for the DWRF by April 2006.
2. The WQCD will continue to make revisions to the Handbook of Procedures to conform to regulations/guidance and submit it to EPA for approval.
3. The WQCD will initiate the process for identifying projects in the FY 2007 Intended Use Plan by April 2006.
4. Submit the Annual Audit to EPA by April 30, 2006.
5. The program partners will work with the funding coordination committee and the SRF policy committee to implement program improvements including:
 - a) Continue coordination with all funding agencies to complete drinking water projects identified in the 2006 IUP.
 - b) Evaluate the impacts of implementing a pre-application form, through the funding coordination committee, that could be available statewide for water and wastewater entities interested in receiving funding through the State Revolving Fund Program (SRF), Energy Impact Assistance Fund (EIAF), Community Development Block Grant (CDBG), and Rural Development Program.
 - c) Review the areas of current flexibility with DWRF loan covenants and identify areas that may provide additional flexibility.
 - d) Evaluate the potential/impacts of increasing set-a-sides for Planning and Design grants.

6. Leverage funds in the DWRF to accommodate the estimated demand for eligible projects in 2006 and thereafter.
7. The program will continue to provide funds (up to \$100,000 upon approval by the Authority Board) for Planning and/or Design grants for communities with populations under 10,000. The WQCD will review and revise as necessary the “Guidance For Preparing Preliminary Engineering Reports” and update the “State Environmental Review Policy” specific to the DWRF.
8. The DLG is will conduct a series of 4 to 8 training workshops in 2006 to help build financial and managerial capacity of small rural public water and wastewater systems.
9. The Authority will submit a summary report to EPA by April 30, 2005 reporting on the program’s activities, outputs and outcomes.
10. The WQCD will develop a 5 year strategic plan for the Financial Assistance Program.
11. The program partners will consider the appropriateness of introducing legislation in 2006 that would change the “planning” experience requirement for one of the Authority board positions to one that would have experience in “public health issues” and/or “water quality matters,”
12. The WQCD in partnership with the Authority will continue to utilize the shared access database for tracking project milestones. During 2006, Authority and WQCD staff will work together to implement database improvements.

VII. DESCRIPTION OF NON-PROJECT (SET-ASIDE) ACTIVITIES TO BE SUPPORTED BY THE DWRF

A. Introduction

The State may set aside portions of each capitalization grant for non-project (set-aside) activities. As described in the introduction, these set-asides are to be used to fund those activities necessary to accomplish the requirements of the SDWA. The WQCD has identified in this plan, the maximum amounts of set-aside funds the WQCD currently believes appropriate to best meet the goals of the safe drinking water act. Since these amounts represent the maximum amount of funding that would be devoted to each of the set-asides for this capitalization grant, no further public notification would be made by the WQCD if lesser amounts than those proposed herein are actually used.

The purpose of the set-asides are to provide the funds needed for the administration of the DWRF (4% administration), as well as to meet overall drinking water program requirements of the 1996 Amendments to the SDWA and to conduct targeted activities specified in the SDWA. The authority will provide the required 20 percent up-front state match to receive the federal capitalization grant, from which the set-asides are drawn. Beginning with the FFY02 grant, the 20 percent match for the set-aside portion has come from the loan administrative fee account. A list of the set-asides and the percentage of allocation is as follows:

- ◆ Administration (4 %)
- ◆ Small System Training and Technical Assistance (2%)
- ◆ State Drinking Water Program Management (10%)
- ◆ Local Assistance and Other State Programs (15%):
 - Land/Conservation Easement Acquisition for SWAP

- Assistance to a Community Water System to Implement Voluntary, Incentive-Based Source Water Protection Measures
- Provide Assistance to Any Public Water System as Part of a Capacity Development Strategy
- Source Water Assessment and Protection Program (SWAP)
- Wellhead Protection Program

A description of each set-aside and the funding earmarked from the FFY06 capitalization grant for each activity are described below. The FFY06 capitalization grant amount is estimated to be \$14,960,000. It is the responsibility of the WQCD to determine the amount of funds necessary under each set-aside and to meet the obligations of the SDWA. The financial status of the set-asides is summarized in Attachment 3a. The State must develop, and EPA approve, work plans that describe the activities to be accomplished to be able to use those funds.

B. Administration Set-Aside

Set-Aside	Amount	Purpose
Administration	\$598,400 (4%) for FFY06	To cover the cost of (1) administering the DWRf, and (2) providing technical assistance to public water systems (PWSS). Administration is an on-going activity.

FFY06 Request: Colorado is entitled to set aside up to 4 percent (\$598,400) from the capitalization grant for this set-aside. Based on project needs identified by the WQCD, the WQCD intends to set aside the full \$598,400.

Additionally, the State deposited the FFY01 and FFY02 administrative set-aside funds (\$420,000 and \$561,000, respectively) into the DWRf project account and reserved the right to draw these funds from a future capitalization grant. These funds were withdrawn from the 2003 capitalization grant.

Use of Funds in 2006 and Expected Accomplishments: These funds will be used to cover administrative expenses related to projects and activities authorized under the SDWA, including the provision of technical assistance to public water systems.

The outputs/activities and the anticipated outcomes (short-term/long-term) for the DWRf administration are described above in Part F. “DWRf Environmental Results” under Section III. “Criteria, Methods and Evaluation for DWRf Distribution.”

C. Small System Training and Technical Assistance (SSTTA)

Set-Aside	Amount	Purpose
SSTTA	\$299,200 (2%) for FFY06	To provide (1) training, (2) technical assistance, and (3) provide Planning and Design Grants to small systems. SSTTA is an on-going activity.

FFY06 Request: Colorado is entitled to set aside up to 2 percent (\$299,200) from the capitalization grant for this set-aside. Based on project needs identified by the WQCD, the WQCD intends to set aside the full \$299,200.

Use of Funds in 2006 and Expected Accomplishments: Currently, training programs are being designed for 2006 and the WQCD will use funds from the 2001, 2002, and 2003 SSTTA set asides for technical assistance and Planning and Design grants for water system serving 10,000 or less in population.

Outputs/Activities

- Number of systems receiving technical assistance.
- Number of systems receiving planning and design grants.

Anticipated Outcomes (short-term/long-term)

- Improved operational and/or financial efficiency for participating systems.
- Improved compliance for systems receiving SSTTA.

D. State Drinking Water Program Management

Set-Aside	Amount	Purpose
State Program Management	\$1,496,000 (10%) for FFY06	To administer the State Public Water Supply Supervision (PWSS) Program, which includes regulations development, compliance monitoring, data management, compliance assistance and enforcement. Can also be used to: --Administer or provide technical assistance for SWAP, --Develop and implement a capacity development strategy, --Administer and implement operator certification program. PWSS program implementation and the other activities are on-going.

FFY06 Request: Colorado is entitled to set aside up to 10 percent (\$1,496,000) from the capitalization grant for this set-aside. The act requires that this set-aside be matched one-for-one with available State expenditures as described below. Based on the qualifying expenditures, the WQCD intends to set aside the full \$1,496,000.

In addition to the up-front 20 percent match required for the State to qualify for the full capitalization grant, a dollar-for-dollar match must be provided by the State. The dollar-for-dollar federal match requirement will be met by utilizing drinking water program general funds, drinking water operator certification fees, drinking water related expenditures from the State laboratory, and 1993 Drinking Water Grant matching funds from the WQCD. The laboratory contribution includes analyses of drinking water samples. According to the Act, State program match funds that were expended in 1993 can be used to provide up to 50 percent of the set-aside match. Current year State funds in excess of the minimum required for the PWSS Program grant included in the Department’s Performance Partnership grant may also be used. The program funding sources that qualify as match (program general funds in excess of PWSS grant match requirements, operator certification program fees, drinking water related laboratory expenditures, and 1993 Drinking Water Program State expenditures) allows the WQCD to take \$1,496,000.

Based on the above information the State intends to submit an amendment to the 2005 grant award requesting the full 10% of the State Program Management set aside (\$1,370,860). The amendment will request an additional \$409,756.

Currently, a portion of this set-aside is being used to fund 8.6 full time equivalents (FTE) for implementation of the many new program requirements associated with the 1996 reauthorization of the SDWA. The staffing for the Drinking Water Program is spread among the program core staff, the Technical Services Unit, and the Compliance Assurance and Data Management Unit.

Use of Funds in 2006 and Expected Accomplishments: For 2006, the efforts initiated and accomplished in prior years will be continued. New efforts will include increased focus on compliance assurance through the Systems of Concern process, improved data management and enhanced communication with drinking water systems.

Outputs/Activities

- Number of systems identified for compliance assurance and enhanced communication.
- Data management system upgrades/maintenance.

Anticipated Outcomes (short-term/long-term)

- Improved system communication resulting in drinking water compliance progress and attainment.
- Improved data quality demonstrated through data verification.

E. Local Assistance and Other State Programs

Set-Aside	Amount	Purpose
Local Assistance Set-Asides:	15% total (no more than 10% for any one of the following activities)	Consists of the following five activities:
SWAP Land Acquisition (PWS Loan)	See below for funding requests	See below for set-aside descriptions
SWAP Implementation (PWS Loan)		
Capacity Development		
Source Water...(SWAP)*		
Wellhead...*		

**The Wellhead Protection Program (for groundwater systems) was created by the Safe Drinking Water Act Amendments of 1986. The Colorado Wellhead Protection Program Plan was issued in 1994. The Source Water Assessment and Protection Program (SWAP) was created by the SDWA Amendments of 1996. The Colorado Source Water Assessment and Protection Plan was issued in 2000. Programmatically, SWAP combines both groundwater and surface water activities (although the original Wellhead Protection Program has some features which are somewhat different from SWAP). For budgetary purposes, however, SWAP set-aside funds were required to be dedicated to surface water systems and Wellhead set-aside funds to groundwater systems. Once all the SWAP assessments are complete, the two programs will be integrated into one program plan.*

FFY06 Request: Colorado is entitled to set aside up to 15 percent (\$2,244,000) from the capitalization grant for these five combined activities. However, no more than 10 percent (\$1,496,000) may be used for any one of the individual local assistance set-asides. The specific amounts indicated below are based on project needs identified by the WQCD and total \$1,914,880. The five set-asides are described as follows:

1. Loans to public water systems to acquire land or conservation easements for source water protection purposes.

Set-Aside	Amount	Purpose
Local Land Acquisition for SWAP	\$0 for FFY06	To provide loans to PWSS to acquire land or conservation easements to protect source water areas

FFY06 Request: None. The WQCD is not setting aside any funds for this purpose from its FFY06 capitalization grant.

2. Loans to community water systems to implement voluntary, incentive based source water quality protection measures.

Set-Aside	Amount	Purpose
Local SWAP Implementation	\$0 for FFY06	To provide loans to PWSS to implement source water protection measures.

FFY06 Request: None. The WQCD is not setting aside any funds for this purpose from its FFY06 capitalization grant.

3. Capacity Development

Set-Aside	Amount	Purpose
Capacity Development	\$1,496,000 (10%) for FFY06	To implement the capacity development strategy to assist new and existing systems to achieve and maintain technical, managerial, and financial capacity. A portion will be used to support the SWAP activities described below.

FFY06 Request: Colorado is entitled to set aside up to 10 percent (\$1,496,000) from the capitalization grant for this activity. Based on the Authority match described below, the WQCD intends to set aside the entire \$1,496,000. A portion of this (\$170,380) will be used to support the SWAP activities described below.

Rollover of SWAP Funds: As indicated above, completion of the SWAP surface water assessments funded by the SWAP set-aside was required to be completed by August 17, 2003. As of this date, an approximate balance of \$17,000 remained in the SWAP account. These funds will be rolled over into the Capacity Development set-aside account.

Use of Funds in 2006 and Expected Accomplishments: For 2006, the efforts initiated and accomplished previously will be continued. Additional output activities included in the EPA approved work plan to be expanded or initiated are as follows:

- ◆ Development of a performance enhancement program for surface water systems of Colorado to ensure plants are operating at peak capabilities to ensure continuously safe drinking water.
- ◆ Preparation of a series of informational booklets for public water systems on the applicable drinking water regulations and guidelines.
- ◆ Continued improvements to the CDPHE drinking water web site to include access to new information and operator training.
- ◆ Continued implementation of a “Systems of Concern” program to identify and provide technical assistance to selected water systems in violation of regulations, including those either on the significant non-compliance (SNC) list or soon to be on the SNC list. This effort will utilize WQCD staff and contractors with the goal of both resolving the violation and ensuring the water system has technical, managerial, and financial capacity.
- ◆ Continued implementation of the Colorado Strategy for Arsenic Reduction (CO-STAR) project to assist public water systems to comply with the revised arsenic standards.
- ◆ Continuation of operator training to conduct analyses required for compliance with the recently promulgated disinfectants/disinfection by-products (DDBP) and interim enhanced surface water treatment rules.
- ◆ Continuation of operator training for the DDBP (i.e., surface water treatment rule) at various locations throughout Colorado.
- ◆ Implementation of an electronic sanitary survey for the WQCD’s Technical Services Unit to use with handheld devices. EPA, on behalf of the WQCD, will develop Colorado specific sanitary survey software for use in the field while conducting sanitary surveys.

Anticipated Outcomes (short-term/long-term):

- Improved performance based on implementation of enhancement program for surface water systems.
- Improved compliance associated with the drinking water regulations and guidelines booklets provided to public water systems.
- Improved CDPHE drinking water web site to access new information and operator training schedules.
- Enhanced system compliance for “Systems of Concern” by identifying and providing technical assistance to water systems either on the significant non-compliance (SNC) list or soon to be on the SNC list.
- Enhanced system compliance with revised arsenic standards for public water systems participating in the Colorado Strategy for Arsenic Reduction (CO-STAR) project.
- Enhanced system compliance through operator training with the disinfectants/disinfection by-products (DDBP) and interim enhanced surface water treatment rules.
- Improved DDBP (i.e., surface water treatment rule) compliance at various locations throughout Colorado based on operator training.
- Improved management efficiency and effectiveness through the use of electronic sanitary surveys in the field by WQCD’s Technical Services Unit by using handheld devices and software developed by EPA.

4. Source Water Assessment and Protection Program (SWAP)

Set-Aside	Amount	Purpose
SWAP	\$0 for FFY06	To delineate and assess source water areas for surface and ground water systems. SWAP assessment reports were completed in December 2004.

FFY06 request: N/A. The WQCD set-aside the full FFY97 allotment of \$1,678,410, based on project needs identified by the WQCD. The SWAP allotment was a one-time allotment.

Outputs/Activities

- Conduct follow-up activities on surface water systems assessment reports.
- Integrate new SWAP data and revise reports as necessary.
- Make improvements to the analytical toolset as necessary.
- Data management system upgrades/maintenance.

Anticipated Outcomes (short-term/long-term)

- Improved follow-up activities on surface water system assessment reports through follow-up activities to improve compliance.
- Improved integration of new SWAP data and report revisions.
- Enhanced analytical toolset.
- Enhanced SWAP data management system.

5. Wellhead Protection Program (WHP)

Set-Aside	Amount	Purpose
Wellhead Protection	\$397,500 (2.6 %) for FFY06	To delineate and assess source water areas for ground water systems. Produce new WHP assessment reports as necessary. Support development and implementation of local ground water protection plans.

FFY06 Request: The WQCD intends to use \$397,500.

Use of Funds in 2006 and Expected Accomplishments: The Wellhead Program will work towards implementation of the following output activities:

- Completion of revised or new ground water susceptibility assessments.
- Development and implementation of ground water protection plans.
- Public water system data improvement.
- Public water system community information and education.
- Compilation and reporting of the national source water protection measures to EPA.

Anticipated Outcomes (short-term/long-term)

- Enhanced ground water susceptibility assessments to improve compliance.
- Improved ground water protection plans.
- Enhanced WHP data management.
- Enhance community information and education.
- Improved data compilation and reporting.

VIII. MISCELLANEOUS INFORMATION

The State will provide the necessary assurance and certifications as part of the Capitalization Grant Agreement and Operating Agreement between the State and EPA.

The proposed payment schedule using FFY 2006 Drinking Water funds will be included in the application for the capitalization grant. The payment schedule identifies the anticipated amount of EPA Automated Clearinghouse (ACH) draws from the capitalization grant and state dollars to be deposited into the DWRF.

The State legislation (SB 95-083) established the DWRF as an enduring and viable fund. The DWRF shall be maintained and be available in perpetuity for providing financial assistance as authorized and limited by the SDWA.

IX. PUBLIC REVIEW AND COMMENT

The Colorado State Board of Health published this information and held a public meeting on November 16, 2005 at which time the State's 2006 IUP including the 2006 DWRF Eligibility List and Project Priority / Fundable List were approved. There were no comments from the public.

Each year, the IUP will be amended to include additional DWRF projects and other appropriate changes. The WQCD will continually seek public review and comment for the proposed list of eligible projects and IUP brought before the State Board of Health for annual approval.

APPENDIX A

APPENDIX A
FY 2006
Drinking Water Revolving Fund Project Eligibility List

Project Number	Elig Cat	Entity	Project Name	City	County	Project Description	Project Cost (\$)	Pop
030001D	5	Academy WSD	Pleasant View Estates	Colorado Springs	El Paso	Distribution / Transmission Lines Construction / Rehabilitation	\$75,000	750
960001D	4	Aguilar, Town of		Aguilar	Las Animas	Improvement / Expansion Of Water Treatment Facility; Distribution / Transmission Lines Construction / Rehabilitation; Water Storage Facilities	\$2,282,100	547
050001D	2	Akron, Town of		Akron	Washington	Improvement / Expansion Of Water Treatment Facility	\$1,000,000	1,785
000001D	2	Alamosa, City of		Alamosa	Alamosa	New Regional Water Treatment Facilities; Improvement / Expansion Of Water Treatment Facility; Distribution / Transmission Lines Construction / Rehabilitation; Water Storage Facilities	\$16,500,000	8,300

DEPARTMENT OF PUBLIC HEALTH AND ENVIRONMENT

Water Quality Control Division

5 CCR 1003-3

STATE BOARD OF HEALTH DRINKING WATER REVOLVING FUND RULES

A. Authority

In Senate Bill 95-083, the Colorado General Assembly created the Drinking Water Revolving Fund to provide financial assistance to certain drinking water projects in the State of Colorado. The fund is held and administered by the Colorado Water Resources and Power Development Authority (the Authority), which is authorized to issue bonds to finance the program. Moneys in the fund may be used to provide financial assistance to projects included on a Project Eligibility List, which is part of the annual Intended Use Plan. Codified at sections 37-95-103 and 37-95-107.8, C.R.S., the statutes direct the State Board of Health (Board of Health) to submit additions and modifications to the Project Eligibility List annually for adoption by the General Assembly by Joint Resolution signed by the Governor. This regulation complies with 40 CFR part 35, subpart I, and provides for the Board of Health's approval of the Intended Use Plan including additions and modifications to the Project Eligibility List and the Priority / Fundable List.

The 1996 amendments to the federal Safe Drinking Water Act (SDWA) include authorization of a state revolving fund program similar to that included in the Clean Water Act for wastewater projects. The Drinking Water Revolving Fund established by Senate Bill 95-083 meets the requirements of the SDWA concerning revolving fund financing programs and allows for federal funding of Colorado's revolving fund financing program.

Section 25-1.5-203, C.R.S., also provides authority for this regulation.

B. Definitions

Section 1.2.2 of the Colorado Primary Drinking Water Regulations 5 CCR 1003-1, contains additional definitions that apply to this rule.

- (1) "Beneficial Use" - The use of water treatment plant sludge in conjunction with wastewater treatment plant sludge to act as a soil conditioner or low grade fertilizer for the promotion of vegetative growth on land and that meet the requirements of the state Biosolids Regulations.
- (2) "Consolidation" - A proposed new construction or expansion of a drinking water supply system that will eliminate one or more existing water supply

or treatment works. A letter of intent or a resolution adopted by the project participants must be provided to the Water Quality Control Division (Division) to guarantee the facilities will consolidate.

- (3) "Emergencies" - Situations or occurrences of a serious nature, developing suddenly and unexpectedly that cause a treatment facilities to be in noncompliance with drinking water standards and require immediate action.
- (4) "Governmental Agencies" - Departments, divisions, or other units of state government, special districts, water conservation districts, metropolitan water districts, conservancy districts, irrigation districts, municipal corporations, counties, cities and other political subdivisions, the United States or any agency thereof, and any agency, commission, or authority established pursuant to an interstate compact or agreement.
- (5) "Health Hazard" - A situation where the Division has identified a maximum contaminant level (MCL) violation or a treatment technique violation. Funding for these projects must result in compliance with existing standards.

An acute health hazard includes violations of SWTR treatment processes, bacteriological standards, and nitrite/nitrate levels. Acute contaminant health effects can occur immediately or within a short period of time.

A chronic health hazard includes violations of all MCLs (other than those listed as acute) and treatment technique requirements. Chronic contaminant health effects occur after years of exposure.

- (6) "Other Future Needs" - Those needs in situations where a facility is beyond the useful/design life and is in need of equipment replacement, rehabilitation or repair in order to maintain compliance or further the public health protection goals of the SDWA.
- (7) "Operational Means" - Temporary managerial or technical steps to protect public health during the time period when the public water system is out of compliance, e.g., boil order or bottled water.
- (8) "Pollution" - The man-made, man-induced, or natural alteration of the physical, chemical, biological, and radiological integrity of water.
- (9) "Potential Health Hazard" – A situation where a public water system has periodically exceeded an MCL, has levels greater than 50 percent of an MCL on a regular basis, or has short term problems meeting a treatment technique requirement.
- (10) "Project Eligibility List" - The list of projects eligible for financial assistance from the Authority through the Drinking Water Revolving Fund (DWRP), as

adopted and from time to time modified in accordance with Section 37-95-107.8(4), C.R.S. The list shall consist of projects that address public health and SDWA compliance issues in the State of Colorado, and shall include only those domestic drinking water supply projects eligible for financial assistance through a state revolving fund pursuant to the terms of the SDWA.

- (11) "Public water system" - (PWS) A system for the provision to the public of water for human consumption through pipes or other constructed conveyances, if such system has at least fifteen service connections or regularly serves an average of at least twenty-five individuals daily at least 60 days out of the year. Such term includes:
 - (a) Any collection, treatment, storage, and distribution facilities under control of the operator of such system and used primarily in connection with such system.
 - (b) Any collection or pretreatment storage facilities not under such control, which are used primarily in connection with such system.
- (12) "Source Water Protection" - Structural or nonstructural source water protection activities done in addition to area delineation and contaminant assessment.
- (13) "Treatment Facilities" - Any devices or systems used in the collection, storage, treatment, transmission, diversion, or distribution of water intended for drinking water purposes.
- (14) "Wastewater Treatment Plant Sludge" - The accumulated solids resulting from treatment of domestic wastewater.
- (15) "Water Conservation" - Any structural or nonstructural water conservation measure that achieves a reduction in water consumption for a PWS or a publicly owned treatment works. Structural measures shall include installation of interior low-flow plumbing fixtures that are distributed and/or installed by a governmental agency or that are funded in whole or in part by the governmental agency and water meters that are funded and owned by the governmental agency. Nonstructural measures shall include but are not necessarily limited to: incentives for previously installed low-flow fixtures, leak detection or infiltration/inflow programs, public awareness, public education, and incentive water service charges.
- (16) "Water Treatment Plant Sludge" - The accumulated solids resulting from treatment of water for domestic use.

C. Purpose

- (1) The purpose of the DWRF is to provide financial assistance to governmental agencies for the construction of treatment facilities for health and compliance purposes as defined above.
- (2) An annual Intended Use Plan (IUP) is required by the SDWA to provide information about how the state will assist communities with their drinking water needs. Included in the IUP is the Project Eligibility List, which is a comprehensive list identifying governmental agencies with drinking water project needs, and the Priority / Fundable List, identifying prioritized PWS projects that are eligible for financial assistance from the DWRF. The project priority system is intended to establish priorities for the DWRF to protect and improve the health, safety, and reliability of drinking water supplies in Colorado. It is the policy of the Board of Health to maintain and improve the existing high quality standards for drinking water in the State by providing accessibility to the DWRF.
- (3) It is also the policy of the Board of Health to encourage consolidation of drinking water systems and to promote water conservation where practicable.
- (4) It is the policy of the Board of Health and the Water Quality Control Commission to promote beneficial use of sludge created by treatment processes of a PWS.
- (5) Any applicant for financial assistance from the DWRF must comply with policies and procedures and other requirements of the Authority.

D. Intended Use Plan Procedures

The Division, in cooperation with the Division of Local Government and the Authority, shall develop an annual IUP. The Division shall recommend the IUP to the Board of Health each year for final agency action at a public hearing, and shall also provide for public notice and an opportunity to comment to comply with the SDWA.

The IUP shall include:

- (1) The Project Eligibility List and Priority / Fundable List of projects.
- (2) Descriptions of:
 - (a) Criteria and method used for distribution of funds
 - (b) Financial status of the DWRF program
 - (c) Short and long term goals of the DWRF program
 - (d) Amounts transferred between the DWRF and the Water Pollution Control Revolving Fund

- (e) Set-aside activities and the percentage of the capitalization grant to be used
 - (f) How a state disadvantaged community program will be defined and utilized, if applicable; and
- (3) Any other material that may be required by the SDWA.

E. Project Eligibility List and Priority / Fundable List Procedures

- (1) The Project Eligibility List is the comprehensive list of projects showing current and future needs of PWS improvements. Each year the Division shall (after consultation with the Division of Local Government and the Authority) review, update, and compile additions and modifications to the Project Eligibility List and recommend such additions and modifications to the Board of Health for final agency action at a public hearing. The list shall be forwarded to the General Assembly each year on or before January 15; once approved by the General Assembly, the Authority is able to provide assistance to the governmental agencies with projects on the Project Eligibility List.
- (2) As required by federal regulations, all projects, except projects funded on an emergency basis, shall be prioritized before receiving assistance from the DWRP. The Priority / Fundable List includes projects from the Project Eligibility List that are ready for funding and have been prioritized by the Division based on information provided by the PWS. The Priority / Fundable List shall include:
- (a) The name of the public water system;
 - (b) Priority points and rank assigned to the project;
 - (c) A description of the project;
 - (d) The expected terms of the financial assistance; and
 - (e) Population of the PWSs service area
- (3) Projects on the Priority / Fundable List will be financed in priority order; however, exceptions for funding out of priority order shall be allowed due to one or more of the following reasons:
- (a) Certain governmental agencies are not ready to proceed with the project;
 - (b) Certain governmental agencies do not wish to participate in the DWRP, or they have received funding from other sources;
 - (c) Certain governmental agencies (on the list) had an emergency situation occur during the funding year; or
 - (d) Certain governmental agencies are not approved for funding because of technical, financial, or managerial deficiencies. (The Division will attempt to work with the governmental entity to resolve the issue through the capacity development program.)

F. Priority System

- (1) All PWSs with identified water quality problems related to health and compliance issues may be included in one of the categories listed below.
- (2) All PWS projects that fall into one of the categories listed below and have a pre-planning, planning, or pre-design document that describes a project to correct the water quality problem, shall be prioritized as ready for funding on the Priority / Fundable List.
- (3) Funding for the projects under each category shall result in the PWSs complying with existing regulatory requirements.
- (4) Eligible Project Criteria

Categories were developed to emphasize the most immediate public health and compliance issues. Projects on the Project Eligibility List will be classified by category 1, 2, 3, 4, or 5 below, with "1" being the highest priority. Once a planning document is received, projects within each category will be further prioritized by the assignment of points from the priority point listings under each category. No consideration will be given to governmental agencies that have violations caused by poor operation and maintenance procedures or are under an administrative order for violating reporting requirements.

- (5) Categories By Priority Ranking
 - (a) 1 - Acute Health Hazard. The Division has identified continuous violation of an acute maximum contaminant level (MCL) or a surface water treatment rule (SWTR) treatment technique requirement.
 - (b) 2 - Chronic (long term) Health Hazard. The Division has identified a continuous violation of an MCL or an SWTR treatment technique requirement for a chronic contaminant.
 - (c) 3 - Potential Acute Health Hazard. The PWS has periodically exceeded an acute MCL, has levels greater than 50 percent of an acute MCL on a regular basis, or has short term problems meeting an SWTR treatment technique requirement that can be controlled temporarily by operational means.
 - (d) 4 - Potential Chronic Health Hazard. The PWS has periodically exceeded a chronic MCL, has levels greater than 50 percent of a chronic MCL on a regular basis, or has short term problems meeting other treatment technique requirements.
 - (e) 5 - Other Future Needs. The PWS is beyond the useful/design life and is in need of equipment replacement, rehabilitation or repair, in

order to maintain compliance or further the public health protection goals of the SDWA.

(6) Priority Point Assignments Within Each Category

Once a pre-planning, planning, or pre-design document is received, projects within each category will be prioritized by the assignment of points from the following:

- (a) Population. Points shall be assigned to PWSs based on the following schedule of population served by the project, with emphasis given to small communities:

25 to 1,000	20 points
1,001 to 3,300	15 points
3,301 to 10,000	10 points
Over 10,000	5 points

- (b) Financial Need. Points shall be assigned to PWSs in accordance with the following “financial need criteria:”

- (i) Ability to pay (annual water service fee as a percentage of median household income):

over 3 percent	20 points
over 2 percent; up to 3 percent	15 points
over 1 percent; up to 2 percent	10 points

- (ii) Local burden (total project cost per equivalent residential tap):

Over \$5,000	20 points
Over \$3,500	15 points
Over \$2,000	10 points

- (c) Consolidation. Fifteen points shall be assigned to a PWS if the project includes consolidating two or more PWSs.

- (d) Water Conservation. Five points shall be assigned to a PWS if the PWS implements a water conservation measure.

- (e) Source Water Protection. Two points shall be assigned to a PWS if the governmental agency implements source water protection measures.

- (f) Beneficial Use of Sludge. Two points shall be assigned to a PWS if the governmental agency intends to utilize water treatment plant sludge for a beneficial use as defined herein.

- (g) Health Risk. To further clarify the ranking of PWS projects, the Division shall assign up to twenty points for a PWSs health risks. Determination of the health risk will be made based upon the type and level of contaminant present within categories.

G. Disadvantaged Communities Procedures

Under the SDWA, states are authorized to establish Disadvantaged Communities Programs. The following procedures describe the approval and amendment process for Colorado's annual IUP as it relates to the administration of its Disadvantaged Communities Program. The Division, Authority and the Division of Local Government may recommend Program changes based on actual program implementation and the results of periodic reviews conducted hereunder. Approval of any and all changes in the IUP is subject to final agency action by the Board of Health.

- (1) The DWRF may provide additional loan subsidies for governmental entities that are determined to be "disadvantaged." The definition/criteria of a disadvantaged community and the nature of the loan subsidies to be made available thereto shall be recommended for inclusion in the IUP by the Division and the Authority in consultation with the Division of Local Government. Subsidies, such as extended loan repayment terms and reduced interest rates at or above zero percent, are not subject to the thirty percent cap of the federal capitalization grant.
- (2) While compiling projects on the Priority / Fundable List (utilizing the procedures listed in Section E above), the Division will identify the community projects that qualify for assistance under the Disadvantaged Communities Program in accordance with program definition/criteria.
- (3) The Division, the Authority and the Division of Local Government will conduct periodic reviews, as appropriate, of the Disadvantaged Communities Program. The reviews may result in recommended program changes relative to the nature of available subsidies to be incorporated into the IUP. In conducting such reviews and preparing recommendations, the following factors may be examined:
 - (a) The overall financial condition of the communities participating in the program, including but not limited to:
 - o The total drinking water utility system fee and tax burden upon rate payers;
 - o Post project drinking water utility charges;
 - o Drinking water utility indebtedness;
 - o Median household income.
 - (b) The impact of the subsidy upon the continued financial viability of the DWRF.

- (c) The merit of utilizing all financial assistance options allowed under the SDWA to ensure a safe drinking water supply for all citizens.
- (4) Upon receipt of comment from the Division, Authority and/or Division of Local Government, the Board of Health shall render final agency action upon the Disadvantaged Communities Program provisions of the IUP.

H. Emergency Procedures

- (1) The Board of Health may amend the project eligibility and Priority/Fundable Lists at any time throughout the year to include PWS projects that it determines and declares to be emergency projects needed to prevent or address threats to public health.
- (2) In cases where the board determines the amendments will result in substantial changes to the project eligibility or Priority / Fundable Lists, public notice and opportunity for comment on the proposed inclusions shall be provided.

ATTACHMENT 2

ATTACHMENT 2
FY 2006
Eligible and Ineligible Projects and Project-Related Costs
Under the Drinking Water State Revolving Loan Fund (DWRf) Program

EXAMPLES OF ELIGIBLE PROJECTS AND PROJECT RELATED COSTS

- ◆ Projects that address present Safe Drinking Water Act (SDWA) exceedances
- ◆ Projects that prevent future SDWA exceedances (applies only to regulations in effect)
- ◆ Projects to replace aging infrastructure
 - Rehabilitate or develop drinking water sources (excluding reservoirs, dams, dam rehabilitation and water rights) to replace contaminated sources
 - Install or upgrade drinking water treatment facilities if the project would improve the quality of drinking water to comply with primary or secondary SDWA standards
 - Install or upgrade storage facilities, including finished water reservoirs, to prevent microbiological contaminants from entering the water system
 - Install or replace transmission and distribution piping to prevent contamination caused by leaks or breaks, or to improve water pressure to safe levels
 - Install meters
- ◆ Projects to restructure and consolidate water supplies to rectify a contamination problem, or to assist systems unable to maintain SDWA compliance for financial or managerial reasons (assistance must ensure compliance)
- ◆ Projects that purchase a portion of another system's capacity, if such purchase will cost-effectively rectify a SDWA compliance problem
- ◆ Land acquisition
 - ◆ Land must be integral to the project (i.e., needed to meet or maintain compliance and further public health protection such as land needed to locate eligible treatment or distribution facilities)
 - ◆ Acquisition must be from a willing seller
- ◆ Note: The cost of complying with the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (the Uniform Act) is an eligible cost.
- ◆ Planning (including required environmental assessment reports), design, and construction costs associated with eligible projects.

ATTACHMENT 2
FY 2005
Eligible and Ineligible Projects and Project-Related Costs
Under the Drinking Water State Revolving Loan Fund (DWRf) Program
(continued)

EXAMPLES OF INELIGIBLE PROJECTS AND PROJECT RELATED COSTS

- ◆ Dams, or rehabilitation of dams
- ◆ Water rights, except if the water rights are owned by a system that is being purchased through consolidation as part of a capacity development strategy
- ◆ Reservoirs, except for finished water reservoirs and those reservoirs that are part of the treatment process and are located on the property where the treatment facility is located
- ◆ Drinking water monitoring costs
- ◆ Operation and maintenance costs
- ◆ Projects needed mainly for fire protection
- ◆ Projects for systems that lack adequate technical, managerial and financial capability, unless assistance will ensure compliance
- ◆ Projects for systems in significant noncompliance under the SDWA. Unless funding will ensure compliance
- ◆ Projects primarily intended to serve future growth

Type of Loan:

LL = Leveraged Loan - Funded from bond proceeds
DL = Direct Loan - Funded from available sources: (1) Authority state funds, (2) Grant Funds or (3) Drinking Water SRF Reloan funds.
DC = Disadvantaged Communities Direct Loans - In 2005, the DWRf program began funding low or 0% interest direct loans to qualifying entities.
In 2002, the DWRf program began funding all direct loans with DW SRF Reloan Monies->

Explanation of DW SRF Loan Funding and/or Subsidization

(a) DW SRF Funds = Drinking Water State Revolving Fund - Received from EPA Capitalization Grant Awards
(b) State Match Funds = (Required 20% match for Each Dollar Received From EPA Grants from State Funds) - Provided Mainly from Authority Funds
(c) Reloan Monies = Recycled DW SRF funds - No State Match Required
