Appendix A: PWSs with Health-Based Violations ..... 23

# Introduction

---

The United States Environmental Protection Agency (EPA) established the Public Water System Supervision (PWSS) Program under the authority of the 1974 Safe Drinking Water Act (SDWA). Under the SDWA and the 1986 Amendments, EPA sets national limits on contaminant levels in drinking water to ensure that the water is safe for human consumption. These limits are known as Maximum Contaminant Levels (MCLs). For some regulations, EPA establishes treatment techniques (TTs) in lieu of MCLs. Standards were also set on how often public water systems (PWSs) monitor their water for contaminants and report the sample results. Generally, the larger the population served by a water system, the more frequent the monitoring and reporting (M&R) requirements. In addition, EPA requires select PWSs to monitor for unregulated contaminants to provide data for future regulatory development. The 1996 Amendments to the SDWA require public notification to include a clear and understandable explanation of the nature of each violation, its potential adverse health effects, steps that the PWS is undertaking to correct the violation, and the possibility of alternative water supplies during the violation. The Colorado Department of Public Health and Environment's (CDPHE) Safe Drinking Water Program (SDWP) implements the SDWA, with amendments, pursuant to Regulation 11 (Colorado Primary Drinking Water Regulations) for the State of Colorado.

The Annual Compliance Report (ACR) is intended to provide a total annual representation of the numbers of violations. Violations fall into one of two categories:

1. Health-Based
2. Non-Health-Based

This report was prepared to meet the EPA's reporting requirements and is updated on a yearly basis. This report is available at <https://www.colorado.gov/cdphe/drinking-water-consumer-information>.

# Definitions

---

- Public Water System (PWS): Provides water via piping or other constructed conveyances for human consumption to at least 15 service connections or serves an average of at least 25 people for at least 60 days each year. There are three types of PWSs:
  - Community (e.g. cities, or towns)
  - Non-Transient, Non-Community (e.g. schools, or factories)
  - Transient, Non-Community systems (e.g. restaurants, rest stops, or parks)
- Health-Based: Potential short-term or long-term health risks.
  - Maximum Contaminant Level (MCL): The highest level of a contaminant allowed in drinking water. Note: Under the Lead and Copper Rule, MCLs were not established. For this rule, “action levels” rather than MCLs define the levels at which a public water system must take action to reduce the concentration of lead and/or copper.
  - Maximum Residual Disinfectant Level (MRDL): The highest level of a disinfectant (added for the treatment of water) allowed in drinking water. MRDLs are enforceable in the same manner as MCLs.
  - Treatment Techniques (TT): Unacceptable levels, in lieu of a MCL, for selected water characteristics or a failure to correct an identified issue. Turbidity, for example, which measures the cloudiness of water.
- Non-Health-Based: No health risks or health risks are unknown.
  - Monitoring and Reporting (M&R): To monitor, test, and report for water characteristics (e.g. contaminants) present in drinking water. All minor and major violations are included.
  - Public Notice (PN): A requirement for the PWS to notify their customers of any and all violations. PN requirements take into account the seriousness of the violation (or situation) and any potential adverse health effects that may be involved.
- Variance: A departure from a primary drinking water regulation if the characteristics of the raw water sources available to the PWS do not allow the system to meet the MCL.
- Exemption: Temporarily relieves a PWS of its obligation to comply with an MCL, TT, or both, due to compelling factors (which may include economic factors).

# National Primary Drinking Water Regulations

---

The Safe Drinking Water Act (SDWA) is the federal law that regulates the quality of drinking water. The SDWA sets standards for drinking water quality and stipulates the monitoring requirements for PWSs. The following regulations have been promulgated under the CPDWR:

- Chemical Phase Rule: Provide public health protection through the reduction of chronic risk (e.g. cancer, organ damage, etc.) from the exposure of:
  - Inorganic Chemicals (IOCs)
  - Nitrate and Nitrite (NOX)
  - Synthetic Organic Chemicals (SOCs)
  - Volatile Organic Chemicals (VOCs)
  - Radionuclides (RADs)
- Consumer Confidence Rule (CCR): An annual drinking water quality report distributed by PWSs to their customers by July 1<sup>st</sup>. The report contains information regarding sources used (i.e. rivers, lakes, reservoirs, etc.), detected contaminants, violations, and educational information.
- Cross-Connection Control Rule (CCX): Require PWSs to inspect system for cross-connections and backflow prevention devices.
- Microbial, Disinfection, and Disinfection Byproducts (MICRO, DIS, and DBPs): In general, drinking water must be disinfected to inactivate microbial pathogens (e.g. *E. coli*, salmonella, etc.). To protect against potential microbial contamination, PWSs add disinfectants such as chlorine. However, disinfectants can react with naturally occurring material in the source water and form byproducts, which may pose adverse health risks. PWSs must carefully maintain a balance between addressing potential microbial contamination and byproduct formation. The following rules address this issue:
  - Groundwater Rule (GWR): The purpose of the GWR is to provide increased protection against microbial pathogens in PWSs that utilize groundwater sources.
  - Disinfection (DIS): The purpose of these rules is to provide protection against microbial contamination.
  - Disinfection Byproduct Rules (DBPs): The purpose of these rules is to reduce exposure to disinfection byproducts for customers of PWSs that add a disinfectant to the drinking water during any part of the treatment process.
  - Surface Water Treatment Rules (SWTRs): The purpose of the SWTRs is to prevent waterborne diseases caused by viruses, *Giardia*, and *Cryptosporidium*. The rules require surface water systems to filter and disinfect their water to reduce the occurrence of microbial contamination.
  - Revised Total Coliform Rule (RTCR): The purpose of this rule is to increase public health protection through the reduction of contamination in the drinking water distribution system.
  - Total Coliform Rule (TCR): Provide public health protection by maintaining the integrity of the distribution system and requiring public water systems to

monitor for the presence of microbial contamination. This rule was replaced by the Revised Total Coliform Rule on April 1, 2016.

- Lead and Copper Rule (LCR): Protect public health by minimizing the public's exposure to lead and copper.
- Notification, Record Keeping, and Monitoring Plan (Notification): Require PWSs to notify the state of any drinking water violations or situations that may pose an adverse health risk, retain records, and have a monitoring plan.
- Operator Certification Rule (Op Cert): Require PWSs to have a certified operator.
- Plans and Specifications (P&S): Require PWSs to get approval from the state before making physical modifications to the water system.
- Public Notice Rule (PN): Require PWSs to notify their customers of any drinking water violations or situations that may pose an adverse health risk.
- Sanitary Survey (SS): Require PWSs to correct deficiencies found during an inspection.
- Storage Tanks (Tanks): Require PWSs to perform inspections on finished water storage tanks and fix any issues identified.
- Water Hauler Rule (Hauler): Require PWSs that haul water to meet special requirements.

# Violations

---

## Overview

The number of PWSs in the state changes on a day by day basis. This is due to seasonal operations, new PWSs opening, existing PWSs closing, and changes to the population being served. Table 1 displays a typical number of systems, on any one day, by population and system type.

*Table 1. Number of PWSs by System Type and Population*

Population	Water System Type			
	Community	Transient, Non-Community	Non-Transient, Non-Community	Total
25-500	513	858	133	1504
501-3,300	205	70	29	304
3,301-10,000	79	6	5	90
10,001-100,000	74	0	0	74
>100,000	9	0	0	9
<b>Total</b>	880	934	167	1981

Violations are based on data compiled in June, 2017 from Colorado’s production SDWIS/State database. If a violation: (1) was unresolved as of January 1, 2016, or (2) occurred in calendar year 2016, it was included. M&R violations for PWSs sampling less frequently than annually will be reported in the third, sixth, or ninth year of a compliance cycle. Calendar year 2016 was the third year in a compliance cycle. Table 2 summarizes the number of violations and the number of systems by each drinking water rule and violation type. The subsequent sections provide further details for each of the drinking water rules.

Appendix A identifies the public water systems that were in violation of maximum contaminant levels and/or treatment technique requirements. The final column indicates if the violation was resolved.

## Summary of All Violations

- 351 systems in violation of at least one of the health-based standards.
- 678 systems in violation of at least one of the non-health-based standards.

Table 2. Summary by Rule and Violation Type

Group	Non-Health-Based Violations		Health-Based Violations	
	# of Violations	# of Water Systems with Violations	# of Violations	# of Water Systems with Violations
<b>Chlorite and Bromate (DBP - Other) Totals:</b>	6	5	-	-

## Inorganic Chemical Violations (not including Nitrogen Compounds and Radionuclides)

- Community and Non-Transient, Non-Community PWSs are required to comply.
- 4 systems in violation of at least one of the MCLs.
- 29 systems failed to monitor/report for at least one of the contaminants.

*Table 3. Summary of Inorganic Chemicals*

Inorganics (IOCs)				
Contaminant	Health-Based Violations		Non-Health-Based Violations	
Name	# of Violations	# of Water Systems with Violations	# of Violations	# of Water Systems with Violations
ANTIMONY, TOTAL	-	-	22	18
ARSENIC	-	-	24	20
BARIUM	-	-	22	18
BERYLLIUM, TOTAL	-	-	22	18
CADMIUM	-	-	22	18
CHROMIUM	-	-	22	18

SODIUM	-	-	23	19
THALLIUM, TOTAL	-	-	23	19
<b>Inorganics (IOCs) Totals:</b>	<b>30</b>	<b>4</b>	<b>265</b>	<b>29</b>

## Nitrogen Compound Violations

- All PWSs are required to comply.
- 21 systems in violation of the Nitrate MCL.
- 83 systems failed to monitor/report for Nitrate or Nitrite.

*Table 4. Summary of Nitrogen Compounds*

Nitrogen (NOX)				
Contaminant	Health-Based Violations		Non-Health-Based Violations	
Name	# of Violations	# of Water Systems with Violations	# of Violations	# of Water Systems with Violations
NITRATE	107	21	95	82
NITRITE	-	-	8	5
<b>Nitrogen (NOX) Totals:</b>	<b>107</b>	<b>21</b>	<b>103</b>	<b>83</b>

## Radionuclide Violations

- Community PWSs are required to comply.
- 27 systems in violation of at least one of the MCLs.
- 9 systems failed to monitor/report for at least one of the contaminants.

*Table 5. Summary of Radionuclides*

Radionuclides (RADs)				
Contaminant	Health-Based Violations		Non-Health-Based Violations	
Name	# of Violations	# of Water Systems with Violations	# of Violations	# of Water Systems with Violations
COMBINED RADIUM (-226 & -228)	264	21	13	7
COMBINED URANIUM	56	7	6	4
GROSS ALPHA, EXCL. RADON & U	94	11	11	6
<b>Radionuclides (RADs) Totals:</b>	414	27	30	9

## Volatile Organic Chemical Violations

- Community and Non-Transient, Non-Community PWSs are required to comply.
- Zero systems in violation of at least one of the MCLs.
- 27 systems failed to monitor/report for at least one of the contaminants.

*Table 6. Summary of Volatile Organic Chemicals*

Volatile Organics (VOCs)				
Contaminant	Health-Based Violations		Non-Health-Based Violations

VC - EQUIPMENT VERIFICATION OR CALBRATON	CHLORINE	-	-	11	11
<b>Disinfection (DIS) Totals:</b>		214	99	520	262

## Disinfection Byproducts Rule Violations

### Chlorite and Bromate Rule Violations

- PWSs using chlorine dioxide or ozone are required to comply.
- Five systems failed to monitor/report for at least one of the contaminants.

Table 11. Summary of the Chlorite and Bromate

Chlorite and Bromate (DBP - Other)					
Violation		Health-Based Violations		Non-Health-Based Violations	
Type	Name	# of Violations	# of Water Systems with Violations	# of Violations	# of Water Systems with Violations
27 - MONITORING, ROUTINE (DBP), MAJOR	BROMATE	-	-	4	4
	CHLORITE	-	-	2	1
Chlorite and Bromate (DBP - Other) Totals:		-	-	6	5

### Total Trihalomethanes and Haloacetic Acids Rule Violations

- Community and Non-Transient, Non-Community PWSs are required to comply.
- 14 systems in violation of at least one of the MCLs.
- 43 systems failed to monitor/report for at least one of the contaminants or failed to complete evaluation report.

Table 12. Summary of Total Trihalomethanes and Haloacetic Acids

TTHM and HAA5 (DBP - TTHM and HAA5)					
Violation		Health-Based Violations		Non-Health-Based Violations	
Type	Name	# of Violations	# of Water Systems with Violations	# of Violations	# of Water Systems with Violations
02 - MCL, AVERAGE	TOTAL HALOACETIC ACIDS (HAA5)	7	2	-	-
	TTHM	31	8	-	-

## Public Notice Rule Violations

- All PWSs that incurred a violation or posed an adverse health risk are required to comply.
- 122 systems failed to provide public notice to their customers.

*Table 18. Summary of the Public Notice*

Public Notice (PN)					
Violation		Health-Based Violations		Non-Health-Based Violations

## Revised Total Coliform Rule (Microbial) Violations

- All PWSs are required to comply.
- 48 systems in violation of at least one of the health-based standards.
- 211 systems in violation of at least one of the non-health-based standards.

*Table 19. Summary of the Revised Total Coliform*

Revised Total Coliform (RTCR)

<b>Storage Tanks (Tanks) Totals :</b>		2	2	6	6

## Surface Water Treatment Rule Violations

- Surface Water and Groundwater-Under-the-Direct-Influence-of-Surface-Water PWSs are required to comply.
- 43 systems in violation for either inadequate filtration resulting in high turbidity (cloudiness) of the water, inadequate disinfection, or failure to filter.
- 72 systems failed to monitor/report/calibrate for turbidity or perform raw water source monitoring.
- Three systems in violation for inadequate total organic carbon removal.
- Two systems failed to monitor/report for total organic carbon or alkalinity.

## Variations and Exemptions

---

Colorado's Safe Drinking Water Program did not issue any variations or exemptions to any public water system.

## Report Availability and Contact Information

---

The summary report is available at <https://www.colorado.gov/cdphe/drinking-water-consumer-information>.

For further information concerning this report, or with specific violations associated with public water systems, you may contact Phillip Stanwood with the Safe Drinking Water Compliance Assurance Section at (303) 692-3502 or by email at [Phillip.Stanwood@state.co.us](mailto:Phillip.Stanwood@state.co.us).

## Appendix A: PWSs with Health-Based Violations

PWS ID	Water System Name	Violation Type	Contaminant Name	Resolved as of 12/31/2016?
