¹ Heterosexual contact with a person who is HIV infected or at increased risk for HIV.

² "Risk not identified" refers to persons whose mode of exposure to HIV is unknown. This includes persons under investigation; persons who died, were lost to follow-up or declined interview; and persons whose mode of exposure to HIV remains unidentified after investigation.

³ Percentage of total diagnosed with AIDS in each year.

⁷ Includes 4645 deaths among AIDS cases and 323 deaths among persons with HIV infection. To calculate the number of living cases, subtract the number of deaths from the sum of the AIDS and HIV columns.

* In counties with less than 15,000 population, total HIV and AIDS cases will be reported; race, exposure category, age and mortality status will not be reported.
