**NURSE HOME VISITOR PROGRAM
ANNUAL REPORT
JULY 2009 – JUNE 2010**

Submitted by the Prevention Services Division
Colorado Department of Public Health and Environment
November 1, 2010

Colorado Nurse Home Visitor Program Executive Summary

Purpose: The Colorado Nurse Home Visitor Program avails nurse home visitation services to all first-time pregnant women whose incomes are under 200 percent of the Federal Poverty Level and who elect to participate in the program. Research shows that short-term and long-term improvements in the health and the life courses of participating mothers and their children result when specially trained nurses provide home visitation services for low-income, first-time mothers, from early in pregnancy through the child's second birthday.¹ Nurse home visitor program staff address a mother's personal health; provide advice on newborn and children's health care, child development, and home safety; and facilitate access to educational, social and employment resources needed to achieve personal goals and improve the well-being of the family.

Use of Funds: For FY2009-10, \$14,436,684 of Tobacco Master Settlement Agreement (MSA) funds was appropriated in the Long Bill for the Nurse Home Visitor Program. Senate Bill 09-269 reduced the amount by \$982,962, and HB 10-1311, the supplemental bill further reduced the amount by \$5,682, resulting in a final appropriation of \$13,448,040. In FY2009-10, the program provided continuation funding to the 19 local agencies that had received awards in the previous fiscal year. Due to the downward adjustment of the Medicaid reimbursement rate, no funding was available for expansion or new applications. MSA funds were used to provide the match to draw down Medicaid funds and for the Colorado Department of Public Health and Environment's (CDPHE) administration of the Nurse Home Visitor Program.

Medicaid Funding: The Colorado Nurse Home Visitor Program Act directs CDPHE to enable the program, to the extent possible, to receive Medicaid funding. Seventy-five percent of all Nurse-Family Partnership (NFP) program services were estimated to qualify for targeted case management (TCM) reimbursement. Approximately 74 percent of program participants were enrolled in the Medicaid program at the commencement of Medicaid billing. Working through the Department of Health Care Policy and Financing (HCPF), grantee sites began billing Medicaid for TCM reimbursements in FY2004-05. CDPHE originally estimated that FY2009-10 grantees would collect \$3,079,945 in Medicaid funds; however, as a result of the downward adjustment of the Medicaid reimbursement rate, the Medicaid estimate was revised to be \$1,274,413. As of September 2010, HCPF reported paying \$766,256 in TCM claims to local program grantees between July 1, 2009 and June 30, 2010.

Accomplishments: The grants awarded for FY2009-10 funded services in 53 of the state's 64 counties and maintained the number of families served in FY2008-09 of 2,590. The FY2009-10 awards were given to the 19 agencies funded in the previous fiscal year.

A competitive grant application process was conducted to determine FY2009-10 awards. The National Center for Children, Families and Communities (National Center) at the University of Colorado at Denver, or its designee, is responsible for assisting the Colorado State Board of Health (Board of Health) in the selection of the programs to be funded. The Nurse-Family Partnership National Service Office reviewed the applications at the request of the National Center.

¹ Olds DL, Eckenrode J, Henderson CR, Kitzman H, Powers J, Cole R, Sidora K, Morris P, Pettit LM, Luckey D. (1997). Long-term effects of home visitation on maternal life course and child abuse and neglect; Fifteen year follow-up of a randomized trial. *JAMA*, 178, 637-643.

The Nurse Home Visitor Program received level funding from FY2008-09 to FY2009-10. In addition, Medicaid reimbursement rates for the program were significantly reduced effective June 26, 2009 resulting in a need to utilize a higher amount of Nurse Home Visitor Program dollars to keep provider funding whole in FY2009-10. These two factors led to the decision to only provide continuation funding for the 19 current grantees, with no dollars awarded for program expansion or new sites. Funding was provided to serve 2,590 families in 53 counties in FY2009-10.

All of the Nurse Home Visitor Program grantees provided services in accordance with the training requirements, program protocols, program management information system and program evaluation requirements of the NFP. The NFP is the nurse home visitation intervention model developed and tested by Dr. David Olds and colleagues.

The Nurse-Family Partnership National Service Office completed an evaluation of each local program funded in FY2009-10, noting those that have been successful in implementing the NFP model. Data were analyzed for the 12,479 women enrolled in the program from January 2000 through June 30, 2010.

Below are some of the outcome highlights for Colorado NFP sites. The complete 2010 evaluation report is attached.

- A statistically significant reduction of 21 percent in smoking during pregnancy (16 percent national NFP average).
- A statistically significant reduction of 3.5 in the number of cigarettes smoked per day for those who continued to smoke (2.6 national NFP average).
- A statistically significant reduction of 65 percent in marijuana use during pregnancy.
- A statistically significant reduction of 35 percent in alcohol use during pregnancy.
- A statistically significant reduction of 47 percent in experience of violence during pregnancy.
- 8.8 percent preterm birth rate (9.7 percent national NFP average); rates for predominant ethnic groups were: 8.2 percent for Hispanics (8.5 percent for the national NFP); 8.7 percent for Non-Hispanic Whites (9.3 percent for the national NFP); 7.4 percent for multiracial/others (9.5 percent for the national NFP).
- 9.1 percent low birth weight rate (9.4 percent national NFP average); rates for predominant ethnic groups were: 8.9 percent for Hispanics (8.1 percent for the national NFP); 9.0 percent-Hispanic White (8.2 percent national NFP); 8.7 percent multi-racial/others (9.3 percent for the national NFP).
- The largest proportion of toddlers (27 percent) scored between the 26th and 50th percentiles for language development; 9 percent scored below the 10th percentile, compared to 10 percent of NFP toddlers nationwide. Scoring below the 10th percentile may indicate a delay in language skills. (Note: prior to 10/1/2006, all toddlers were assessed with the English version of the Language Assessment Form.)
- At 12 months of infant age, 83 percent of infants were fully immunized (85 percent for national NFP). By 24 months of child's age, 90 percent were fully immunized (91 percent for national NFP). Full immunization rates were tracked beginning October 1, 2006.

- 89 percent of clients initiated breastfeeding (national NFP average: 76 percent); 35 percent of clients were breastfeeding at 6 months (27 percent national NFP average); 19 percent of clients were breastfeeding at 12 months of infancy (16 percent national NFP average).
- At 12 months postpartum, 12 percent of clients reported a subsequent pregnancy (13 percent national NFP average); 32 percent of clients reported subsequent pregnancies within 24 months of the birth of their child (32 percent national NFP average).
- Of those who entered the program without a high school diploma or GED, 42 percent completed their diploma/GED by program completion (42 percent for national NFP) and 13 percent were continuing their education beyond high school (14 percent for national NFP); an additional 17 percent were still working toward their diploma/GED (20 percent for national NFP).
- 59 percent of Colorado NFP clients 18 years or older at intake (vs. 56 percent for the national NFP sample) and 46 percent of those 17 years or younger (vs. 42 percent for the national NFP sample) were employed at program completion.
- Clients worked an average of 6.5 months during the first postpartum year (6.4 national NFP average), and 8.7 months during the second postpartum year (8.3 national NFP average).

Conclusion: The Nurse Home Visitor Program enabling legislation declared that new mothers may benefit from receiving professional assistance and information concerning adequate prenatal care and care for their newborns and young children. The Colorado General Assembly recognized that a nurse home visitation program that provides educational, health and other resources for new mothers has proven to significantly reduce detrimental behaviors, such as drug, tobacco and alcohol use. Such a program has also been proven to reduce subsequent births, increase the time between subsequent births, reduce the mother's need for public assistance and increase the learning and functioning of young children. CDPHE and the University of Colorado at Denver administer the Nurse Home Visitor Program with the goal of reaching all first-time, low-income mothers in the state who consent to participate.

Since the program's inception in January 2000, the number of mothers annually served increased from 1,150 in FY2000-01 to 2,590 in FY2010-11. The Nurse-Family Partnership National Service Office reported the total participants to date as 12,479. The target population eligible for services under the Nurse Home Visitor Program is estimated to be between 12,115 and 13,704 women per year, according to the 2008 estimate derived from the Prenatal Risk Assessment Monitoring System (PRAMS). While there are more mothers yet to reach, the Nurse Home Visitor Program has made progress in serving some of Colorado's most high-risk first-time mothers and children. These mothers and babies have benefited greatly from the care and education provided by the nurse home visitors resulting in healthier pregnancies and better early childhood outcomes.

I. ADMINISTRATIVE REPORT

A. Amount of Tobacco Master Settlement Agreement monies received.

For FY2009-10, \$14,436,684 of Tobacco Master Settlement Agreement (MSA) funds was appropriated in the Long Bill for the Nurse Home Visitor Program. Senate Bill 09-269 reduced the amount by \$982,962, and HB 10-1311, the supplemental bill, further reduced the amount by \$5,682, resulting in a final appropriation of \$13,448,040.

B. Description of program.

The Nurse Home Visitor Program funds services for nurse home visitors who work with low-income, first-time pregnant women from early in their pregnancy through the child's second birthday. Participants receive educational and health services designed to promote healthier pregnancies and birth outcomes, improve child health and development, and enhance the self-sufficiency of the young families. Services are provided through home visits that occur weekly or biweekly. Topics addressed in the home visits focus on maternal and prenatal health care, including the reduction or cessation of smoking and substance abuse, care giving for newborns, child health and development, and home safety. In addition, information regarding access to needed health, social, educational and employment resources is provided. Through the relationships that are established, the nurse home visitors help young mothers develop knowledge, skills and confidence to provide for their children's needs and achieve their personal goals.

Research has substantiated that short-term and long-term improvements in the health and the lives of mothers and their children have resulted when specially trained nurses provide home visitation services for low-income, first-time mothers.² Improved outcomes include reduced tobacco and alcohol use during pregnancy, reduced rates of subsequent pregnancies, reduced incidences of child abuse and neglect, reduced arrests of mothers, reduced arrests among the children when reaching adolescence, reduced cigarette and alcohol consumption among the children when reaching adolescence, reduced reliance on public assistance and increased workforce participation by the mothers.

Goal of the program

As outlined in statute, the Nurse Home Visitor Program is charged with serving – beginning with a limited number of participants in FY2000-01 – all low-income, first-time mothers in the state who consent to participate. House Bill 04-1421 changed the level of funding from the MSA dollars such that for FY2005-06 the Nurse Home Visitor Program was appropriated nine percent of the total amount of MSA funds received by the state. Beginning with FY2005-06 through FY2013-14, the amount appropriated will increase by one percent each year unless otherwise appropriated by legislative action. In FY2014-15 and each year thereafter the appropriation will be 19 percent of the MSA funds received by the state, not to exceed \$19 million in any fiscal year.

² Olds DL, Eckenrode J, Henderson CR, Kitzman H, Powers J, Cole R, Sidora K, Morris P, Pettit LM, Luckey D. (1997). Long-term effects of home visitation on maternal life course and child abuse and neglect; Fifteen year follow-up of a randomized trial. *JAMA*, 178, 637-643.

Target population

The target population for services from the Nurse Home Visitor Program is first-time pregnant women whose incomes are less than 200 percent of the Federal Poverty Level. Services are provided from the time of enrollment during pregnancy, or within one month postpartum, through the child's second birthday. Enrollment in the program is encouraged as early in pregnancy as possible. The number of women in the target population is estimated to be between 12,115 and 13,704 per year. This 2008 estimate is based on data from the Prenatal Risk Assessment Monitoring System (PRAMS), an annual survey conducted since 1997 by the Center for Health and Environmental Information and Statistics at the Colorado Department of Public Health and Environment (CDPHE).

Actual numbers served

Since the inception of the Nurse Home Visitor Program through June 30, 2010, there have been 12,479 participants enrolled in the program and 3,230 clients have graduated from the program. Graduated refers to those clients that completed and exited the program upon their child's second birthday. In FY2009-10, 19 local entities were funded to serve a total of 2,590 families. "Families" refers to the pregnant woman or to the mother, her child and the father of the baby, if present. At the point of enrollment the median age of the women served was 19 years old, 50 percent of participants completed high school/General Educational Development (GED), non-high school graduates had a median education of 10 years, 80 percent of mothers were unmarried, 64 percent were unemployed, and 70 percent reported using Medicaid at program intake. The largest proportion of participants identified themselves as Hispanic (47 percent) or non-Hispanic White (41 percent). The attached Nurse-Family Partnership National Service Office evaluation report includes more complete details of client characteristics.

Services provided

The nurse visitors conducted home visits at weekly or biweekly intervals depending on the stage of pregnancy, age of the child and/or the needs of the mother. The visits averaged 68 to 72 minutes in length. Nurses followed specific visit guidelines that focused on six domains: personal health, environment health, life course development, maternal role, and family and friends. The nurse home visitors reviewed such topics as the physical and mental health of the mother and the child; safety of the home and community environment; development of social support systems through friends and family; child development; parenting skills and planning for the desired future, including future pregnancy planning; and education and employment goals.

The Nurse-Family Partnership National Service Office is responsible for monitoring and evaluating program effectiveness by the local sites and has submitted a detailed program implementation and evaluation report. The 2010 evaluation report is attached as the second part of this report.

C. Evaluation of the program operation.

Grant award process

The Nurse Home Visitor Program was initiated in FY2000-01. Rules were written and adopted by the Colorado State Board of Health (Board of Health) and a competitive grant application process was established by CDPHE. The first set of grants was awarded for January through June 2001. Subsequent grant application processes have been administered annually in the spring with grants funded for the state fiscal year beginning July 1.

The grant application process enables CDPHE to award funds to entities that provide nurse home visitor services in alignment with the program protocols and requirements established by the Board

of Health. All funded entities implement the Nurse-Family Partnership (NFP) model developed by Dr. David Olds and associates of the National Center for Children, Families and Communities (National Center) at the University of Colorado at Denver.

The grant application process, as established in the statute, allows applicants to propose the implementation of alternative nurse home visitor program models provided they have been in existence in Colorado for a minimum of five years, as of July 1, 1999. Alternate models must also have achieved significant reductions in infant behavioral impairments due to alcohol, drugs and nicotine use; child abuse and neglect; subsequent pregnancies; the receipt of public assistance; and criminal activity by the mothers and by their children upon reaching adolescence. However, in the eleven grant application cycles thus far, no applications have been funded for an alternative nurse home visitor program because the criteria for an alternative program were not met.

For each of the grant cycles, CDPHE conducted a technical review of the applications to ensure that all basic elements were addressed. The applications were forwarded to the Nurse-Family Partnership National Service Office, the entity designated by the National Center to assist the Board of Health in selection of the local entities to be funded, for the content review. A three-member panel from the Nurse-Family Partnership National Service Office conducted the review of the applications, including proposals from current grantees requesting continuation funding. The recommendations for funding were presented to the Board of Health and were subsequently approved during their April meeting.

Nurse Home Visitor Program funds have been used to provide:

FY2000-01 – Awards totaling \$2,375,744 were granted to 12 local entities to provide services for 1,150 families in 33 of the state's 64 counties. As this was the first year of the program, the grants were for only a six-month period, from January through June 2001, following the writing and adoption of the program's rules and the implementation of the competitive grant application process in the first half of the fiscal year. Each of the 12 local programs was funded to serve 100 families, with the exception of one multi-county coalition funded to serve only 50 families, due to the sparse populations in the service area.

FY2001-02 – Awards totaled \$4,532,835 and included continuation of funding to the 12 original local entities, plus grants to two new local agencies, bringing the number of counties with available services to 38 and the number of families to be served to 1,300. One of the newly funded programs was approved to serve 100 families and the second to serve only 50 families, due to the sparse population in its four-county rural area.

FY2002-03 – Awards totaled \$6,066,055 expanding program availability to a total of 1,562 families in 49 of the state's 64 counties. This was accomplished through continuation of funding to the 14 local entities that provided services in FY2001-02, an expansion grant for an additional 100 families to one of the grantees; and the provision of grant awards to three new local agencies, two of which served multi-county areas. One of the newly funded programs did not begin program implementation until January 2003, due to insufficient funds to support services for the full 12-month period.

FY2003-04 – Continuation of funding for the 17 grantees selected in FY2002-03 totaled \$6,587,324 expanding the program availability to 1,637 families in 49 of the state's 64 counties. The FY2003-04 program list indicates 17 grantees, instead of 18, because in FY2003-04 two Jefferson County programs merged into one. Due to funding limitations no new grant applications were recommended for awards.

FY2004-05 – Beginning with FY2004-05, funding for the program became a combination of MSA funds and Medicaid revenue generated by sites directly billing and receiving Medicaid reimbursements for targeted case management (TCM) services. FY2004-05 MSA awards for the same 17 grantees selected in FY2003-04 totaled \$5,584,965, expanding program availability to 1,962 families in 49 of the state’s 64 counties. Estimated Medicaid revenue for the sites was set at \$2,478,059 for an overall funding amount of \$8,063,024 for FY2004-05. As of August 2005, Department of Health Care Policy and Financing (HCPF) reported paying \$2,469,800 in Medicaid claims.

FY2005-06 – Awards totaled \$7,051,543 and included funds for the 17 FY2004-05 grantees plus two expansion grants and one new award for 18 grantees to serve 2,162 families in 50 of the state’s 64 counties. Estimated Medicaid revenue for the sites was set at \$2,358,419, for a combined funding amount of \$9,409,962 for FY2005-06. As of August 2006, HCPF reported paying \$2,721,774 in Medicaid claims.

FY2006-07 – Awards totaling \$7,350,203 were granted to the 18 entities funded in FY2006-07, including one expansion grant, for services to 2,187 families in 51 of the state’s 64 counties. Medicaid revenue for the sites was estimated at \$2,576,284, for a combined funding amount of \$9,926,487 for FY2006-07. As of August 2007, HCPF reported paying \$2,735,407 in Medicaid claims.

FY2007-08 – Awards totaling \$8,193,180 were granted to the 18 grantees funded in FY2006-07, including three expansion grants, for services to 2,358 families in 52 of the state’s 64 counties. Medicaid revenue for the sites was estimated at \$2,773,430, for a combined funding amount of \$10,966,610 for FY2007-08. As of August 2008, HCPF reported paying \$2,875,461 in Medicaid claims.

FY2008-09 – Awards totaled \$9,895,501 and included funds for the 18 grantees funded in FY2007-08, including three expansion grants and a new grant award, for services to 2,590 families in 53 of the state’s 64 counties. Medicaid revenue for the sites was estimated at \$2,838,736, for a combined funding amount of \$12,734,237 for FY2008-09. As of August 2009, HCPF reported paying \$3,104,604 in Medicaid claims.

FY2009-10 – Awards totaled \$11,668,449 and included funds for the 19 grantees funded in FY2008-09 for services to 2,590 families in 53 of the state’s 64 counties. Medicaid revenue for the sites was reduced from previous years’ estimates to \$1,274,413 as a result of the new, lower Medicaid reimbursement rates effective June 26, 2009. The combined funding amount for FY2009-10 was \$12,942,862. As of September 2010, HCPF reported paying \$766,256 in Medicaid claims during FY2009-10.

FY2010-11– Awards totaled \$11,593,603 and included funds for the 19 grantees funded in FY2009-10 for services to 2,590 families in 53 of the state’s 64 counties. Medicaid revenue for the sites is estimated to \$1,262,411 for a combined funding amount of \$12,836,014 for FY2010-11. A second round of funding in the amount of \$350,000 is expected to be distributed for the period of December 2010 through June 30, 2011.

Please see Attachment A for a listing of the programs funded, the counties served, the years for which they have received funding and the amounts of the grant awards, and Attachment B for a map of the FY2009-10 counties served.

Effectiveness in achieving goals of the program

The Nurse Home Visitor Program has been successful in establishing the infrastructure for the distribution and use of the Nurse Home Visitor Program funds, expanding the number of counties with available services from 33 counties in the first year to 53 counties for FY2009-10. CDPHE administers the contracts with the local entities and cooperates with the National Center, the Nurse-Family Partnership National Service Office, and Invest in Kids, a private, not-for-profit organization providing site development assistance, program implementation and quality improvement consultation to the local agencies in their program oversight duties. From the inception of the Nurse Home Visitor Program through June 30, 2010 the number of participants enrolled in the program has grown to 12,479.

The amount of Nurse Home Visitor Program MSA funds by local agencies and the state for the administration of the program since the inception through June 30, 2010 was \$78,189,790 as detailed below. The cost to the state per family financed by MSA dollars through June 30, 2010 was \$6,266. This amount is derived by taking the total MSA funds used (\$78,189,790) divided by the number of participants enrolled in the program (12,479).

Total Nurse Home Visitor Program MSA Expended Funds

FY2000-01	\$ 1,340,566
FY2001-02	\$ 4,288,525
FY2002-03	\$ 5,560,660
FY2003-04	\$ 6,694,354
FY2004-05	\$ 7,573,845
FY2005-06	\$ 8,662,974
FY2006-07	\$ 8,974,714
FY2007-08	\$ 9,995,394
FY2008-09	\$ 12,361,408
FY2009-10	\$ 12,737,350
TOTAL	\$ 78,189,790

Beginning July 1, 2004, funding for Nurse Home Visitor Program sites became a combination of state Nurse Home Visitor Program MSA dollars and Medicaid revenue. Local sites submitted TCM claims to Medicaid with reimbursements being paid directly to the local Nurse Home Visitor Programs. It was estimated that FY2009-10 grantees would collect \$1,274,413 in Medicaid funds. As of September 2010, HCPF reported paying \$766,256 in claims between July 1, 2009 and June 30, 2010.

As noted earlier, the Nurse-Family Partnership National Service Office is responsible for monitoring and evaluating the effectiveness of local program implementation. These duties are partially carried out by its subcontractor, Invest in Kids. The Nurse-Family Partnership National Service Office provides training for local nurse home visitors, nurse supervisors and clerical data staff as well as prepares the annual Colorado evaluation report. Invest in Kids offers site development and nurse consultation.

In the attached 2010 evaluation report, the Nurse-Family Partnership National Service Office identifies the outcomes achieved by local grantees. They include:

- A statistically significant reduction of 21 percent in smoking during pregnancy (16 percent national NFP average).
- A statistically significant reduction of 3.5 in the number of cigarettes smoked per day for those who continued to smoke (2.6 national NFP average).
- A statistically significant reduction of 65 percent in marijuana use during pregnancy.
- A statistically significant reduction of 35 percent in alcohol use during pregnancy.
- A statistically significant reduction of 47 percent in experience of violence during pregnancy.
- 8.8 percent preterm birth rate (9.7 percent national NFP average); rates for predominant ethnic groups were: 8.2 percent for Hispanics (8.5 percent for the national NFP); 8.7 percent for Non-Hispanic Whites (9.3 percent for the national NFP); 7.4 percent for multiracial/others (9.5 percent for the national NFP).
- 9.1 percent low birth weight rate (9.4 percent national NFP average); rates for predominant ethnic groups were: 8.9 percent for Hispanics (8.1 percent for the national NFP); 9.0 percent-Hispanic White (8.2 percent national NFP); 8.7 percent multi-racial/others (9.3 percent for the national NFP).
- The largest proportion of toddlers (27 percent) scored between the 26th and 50th percentiles for language development; 9 percent scored below the 10th percentile, compared to 10 percent of NFP toddlers nationwide. Scoring below the 10th percentile may indicate a delay in language skills. (Note: prior to 10/1/2006, all toddlers were assessed with the English version of the Language Assessment Form.)
- At 12 months of infant age, 83 percent of infants were fully immunized (85 percent for national NFP). By 24 months of child's age, 90 percent were fully immunized (91 percent for national NFP). Full immunization rates were tracked beginning October 1, 2006.
- 89 percent of clients initiated breastfeeding (national NFP average: 76 percent); 35 percent of clients were breastfeeding at 6 months (27 percent national NFP average); 19 percent of clients were breastfeeding at 12 months of infancy (16 percent national NFP average).
- At 12 months postpartum, 12 percent of clients reported a subsequent pregnancy (13 percent national NFP average). 32 percent of clients reported subsequent pregnancies within 24 months of the birth of their child (32 percent national NFP average).
- Of those who entered the program without a high school diploma or GED, 42 percent completed their diploma/GED by program completion (42 percent for national NFP) and 13 percent were continuing their education beyond high school (14 percent for national NFP); an additional 17 percent were still working toward their diploma/GED (20 percent for national NFP).

- 59 percent of Colorado NFP clients 18 years or older at intake (vs. 56 percent for the national NFP sample) and 46 percent of those 17 years or younger (vs. 42 percent for the national NFP sample) were employed at program completion.
- Clients worked an average of 6.5 months during the first postpartum year (6.4 national NFP average), and 8.7 months during the second postpartum year (8.3 national NFP average).

CDPHE worked with the National Center, the Nurse-Family Partnership National Service Office, and Invest in Kids to develop and implement methods to monitor operational effectiveness and promote improved fiscal and program performance. The 2010 evaluation report prepared by the Nurse-Family Partnership National Service Office is attached.

D. Costs incurred by the program.

The annual Long Appropriations Bill appropriated \$14,436,684 of Tobacco Master Settlement Agreement (MSA) funds for FY2009-10 for the Nurse Home Visitor Program. Senate Bill 09-269 reduced the amount by \$982,962 and furlough savings further reduced the amount by \$5,682 resulting in a final appropriation to \$13,448,040.

Table 1

Description:	FY2009-10 Amount:
FY2009-10 Long Bill, Nurse Home Visitor Program (NHVP)	\$14,436,684
Tobacco Master Settlement Agreement (MSA)	
FY2009-10 Adjustments to the NHVP: Senate Bill 10-269 restricted the amount by \$982,962	\$-982,962
FY2009-10 Adjustment for furlough savings Supplemental Bill 10-1311	\$ -5,682
Total NHVP Spending Authority	\$13,448,040
Less FY2009-10 Expenditures:	
Local Agencies	\$ 11,745,585
University of Colorado at Denver, National Center	
Medicaid match to the Department of Health Care Policy and Financing	\$242,400
Medicaid claims processing fee to Department of Health Care Policy & Financing	\$383,128
MSA Oversight	\$2,347
HCPF Administration	\$4,030
Total FY2008-09 Expenditures	\$359,860
	\$12,737,350
Reverted Spending Authority in FY2009-10	\$ 710,690

The reversion results from a combination of the local grantees billing less than budgeted, and the department and local grantees being very conservative with expenditures. The lower expenditures were due to caution surrounding the Medicaid reimbursement rate reduction, in which rates went from \$99.25 to \$10.14. Agencies were also conservative with expenditures pending the outcome of the revised Centers for Medicare and Medicaid (CMS) billing structure.

The statutory allowance for program administrative costs is limited to five percent of the total appropriation. The program administrative costs for FY2009-10 totaled \$393,395 or 2.9 percent of the appropriation. The \$393,395 in program administrative expenses includes the contract with the University of Colorado at Denver related to administration (\$27,158), MSA oversight (\$4,030), HCPF processing fee (\$2,347) and CDPHE's administrative costs (\$359,860). A maximum of 4.0 full time equivalent (FTE) positions are approved for administration of the program. Only 3.6 FTE were utilized, as follows: 1.0 FTE program director, .6 FTE for accounting and clerical support, 1.0 FTE for contracts monitoring, and 1.0 FTE for fiscal staff. This year, costs for the University of Colorado at Denver were allocated between administration and program expenses based on the University's billings rather than the historical basis. As a result, much more of University of Colorado at Denver's costs show up as programmatic rather than administrative. Next year, 100 percent of these costs will be administrative due to the passage of SB 10-073, which now re-defines all of the University's costs as administrative.

CDPHE is directed to expend 95 percent of the total amount appropriated on program-related expenses. Programmatic expenses totaled \$12,343,955 for FY2009-10. As summarized in Table 1, programmatic expenditures included local agency costs (\$11,745,585), a portion of the University of Colorado at Denver contract (\$215,242), and Medicaid Match to HCPF (\$383,128)

II. ADDITIONAL INFORMATION REQUESTED OF THE NHVP

A. Evaluation of the implementation of the program and the results achieved.

The National Center is the agency designated by the University of Colorado at Denver to assist the Board of Health in administering the Nurse Home Visitor Program. The National Center has subcontracted most of these responsibilities, including nurse training, local program evaluation and annual reporting to the Nurse-Family Partnership National Service Office. Data collection and reporting processes for program evaluation are managed by the Nurse-Family Partnership National Service Office. These data are used to inform the local program evaluation and to produce the annual outcome report. A number of the reports generated from the data are directly accessible to local program staff from the web-based data system. Nurse supervisors are encouraged to use these reports in the supervision of the nurse home visitors and the management of the local program operations. In addition, the Nurse-Family Partnership National Service Office produces comprehensive reports for all funded sites on a quarterly basis.

The attached 2010 Nurse Family-Partnership evaluation report represents analyses of data available from all sites from program initiation through June 30, 2010. Throughout the report, outcome indicators for Colorado NFP families are compared to the national sample of NFP participants.

B. Changes in training requirements, protocols, management information systems or evaluation criteria.

Newly revised Infancy Visit Guidelines by the Nurse-Family Partnership National Service Office were distributed to all agencies this year. The revised Toddler Guidelines will be distributed by September of 2010, joining the revised Pregnancy Guidelines and making the full revision of the Guidelines complete. The new Nurse-Family Partnership National Education Center was completed this year. This new center is housed in the same building as the Nurse-Family Partnership National Service offices and is equipped with multimedia capabilities to enhance the nurses' education experience. Nursing Education has been revised and updated and includes more opportunities to practice and build skills during the sessions.

The current data management system used by NFP implementing agencies has undergone a major revision and the new system will launch in November of 2010. While the current system has served programs well in the past, the new information system will address the shortfalls of the current system and meet the new demands as the program grows and expands. This updated system will modify and refocus data collection protocol to better support decision-making of multiple stakeholders working within and for NFP programs at the local, state and national levels. A large component of developing and implementing the new data system has involved coordination with local and state agencies to ensure technical solutions will address identified needs. As with the current system, the new data system will be utilized to collect data about client services and outcomes, as well as provide online reporting and stakeholder access to program information. A major improvement of the new data system is its design to fit with the nurse home visitor workflow – both for entering data and for retrieving information about clients.

An expanded focus by the Nurse-Family Partnership National Service Office on policy and government affairs, program development, and marketing and communications has produced substantial results over the past year. On March 23, 2010, President Obama signed into law healthcare reform legislation that included \$1.5 billion in funding to states over five years for evidence-based home visitation. Nurse-Family Partnership is providing consultation to states that want to access these funds to serve vulnerable families.

The Nurse-Family Partnership National Service Office continues to provide Invest in Kids and local agencies with education, marketing, and advocacy resources. These resources included a Community PowerPoint presentation, fact sheets, brochures, and written client success stories aimed at increased public relations, and public policy initiatives to secure new federal funding and protect existing state and local dollars. Additionally, the Nurse-Family Partnership National Service Office website has undergone a complete redesign to better engage and serve all key NFP constituents with information and other resources.

C. Extent to which the program serves Medicaid-eligible persons and provides services that may be provided in part through Medicaid funding.

The target population eligible for services under the Nurse Home Visitor Program is estimated to be between 12,115 and 13,704 women per year, according to the 2008 estimate derived from PRAMS. The Colorado Medicaid program provides coverage to low-income pregnant women up to 133 percent of the Federal Poverty Level. Therefore, many of the women eligible for services under the Nurse Home Visitor Program are also eligible for Medicaid coverage. Analysis of the most recent PRAMS data suggests that 63 percent of the first-time, pregnant women with incomes under 200 percent of poverty level are Medicaid-eligible. Reports submitted by local agencies indicate that a higher percentage of Medicaid-eligible clients are currently being enrolled. This is because the agencies have established referral systems with community agencies and health care providers that

are effective in referring Medicaid-eligible, first-time pregnant women to the program. For FY2009-10, the Nurse-Family Partnership National Service Office reported the percentages of women using Medicaid between intake and 24 months of their child's age as 71 percent at intake, 64 percent at 6 months, 55 percent at 12 months, and 47 percent at 24 months. These figures are noteworthy because agencies are permitted to bill for Medicaid services under the Nurse Home Visitor Program until the child's second birthday.

CDPHE, in accordance with the Nurse Home Visitor Program statutory directive, worked with HCPF to identify the best method to obtain Medicaid funding for Nurse Home Visitor Program services. It was determined that the most feasible method was to obtain Medicaid payment for those services that qualified as targeted case management (TCM). TCM includes four core activities:

- Assessment of the first-time pregnant woman and her first child's needs for health, mental health, social services, education, housing, childcare and related services;
- Development of care plans to obtain the needed services;
- Referral to resources to obtain the needed services, including medical providers who provide care to a first-time pregnant woman and her first child; and
- Routine monitoring and follow-up visits with the women where progress in obtaining the needed services is monitored, problem-solving assistance is provided and the care plans are revised to reflect the woman's and child's current needs.

The nurse home visitors provide TCM by conducting a needs assessment and developing a life plan with the mother; providing education and counseling so the mother may learn to access services or meet needs herself; and by monitoring and reinforcing progress toward achieving her plan. Medicaid reimbursement is claimed for the TCM services provided for those families that are Medicaid-eligible. MSA dollars are used to pay 50 percent of the state Medicaid costs and federal funds cover the other 50 percent.

III. CHANGES TO THE NURSE HOME VISITOR PROGRAM TO ENABLE IT TO RECEIVE MEDICAID FUNDING

As directed by the Colorado Nurse Home Visitor Program Act, CDPHE staff, in conjunction with HCPF, established the necessary infrastructure for local grantees to obtain Medicaid reimbursement for TCM services (approximately 75 percent of all services qualify as TCM). Beginning July 1, 2004, funding for Nurse Home Visitor Program sites became a combination of state MSA funds and Medicaid revenue. Local sites submitted TCM claims to Medicaid with reimbursements being paid directly to the local Nurse Home Visitor Programs. CDPHE estimated that FY2009-10 grantees would collect \$1,274,413 in Medicaid funds. As of September 2010, HCPF reported paying \$766,256 in claims to local program grantees.

During FY2008-09, two major changes occurred related to Nurse Home Visitor Program Medicaid reimbursements. First, a review by CMS determined that a recalculation of reimbursement rates was necessary, resulting in significantly lower reimbursement rates for all local agencies effective June 26, 2009 for claims dated back to July 16, 2008. Medicaid estimates for all local agencies have been adjusted downward using the new, lower reimbursement rates, and the Nurse Home Visitor Program portion of local funding was increased to keep provider funding whole in FY2009-10.

In January 2009, CMS requested that HCPF reconcile claims paid for TCM provided through the Nurse Home Visitor Program for FY2004-05 through FY2007-08 to ensure that the payments did not exceed the providers' costs of rendering TCM to Medicaid clients and to further verify that HCPF did not overdraw federal funds for the Nurse Home Visitor Program. In December 2009, HCPF received written confirmation of a decision from CMS to close the reconciliation matter without further action.

IV. CONCLUSION

The Nurse Home Visitor Program enabling legislation declared that new mothers may benefit from receiving professional assistance and information concerning adequate prenatal care and care for their newborns and young children. The Colorado General Assembly recognized that a nurse home visitation program that provides educational, health and other resources for new mothers has proven to significantly reduce detrimental behaviors, such as drug, tobacco and alcohol use. Such a program has also been proven to reduce subsequent births, increase the time between subsequent births, reduce the mother's need for public assistance and increase the learning and functioning of young children. CDPHE and the University of Colorado at Denver administer the Nurse Home Visitor Program with the goal of reaching all first-time, low-income mothers in the state who consent to participate.

Since the program's inception in January 2000, the number of mothers annually served increased from 1,150 in FY2000-01 to 2,590 in FY2010-11. The Nurse-Family Partnership National Service Office reported the total participants served from January 2000 to June 30, 2010 as 12,479. The target population eligible for services under the Nurse Home Visitor Program is estimated to be between 12,115 and 13,704 women per year, according to the 2008 estimate derived from the Prenatal Risk Assessment Monitoring System (PRAMS). While there are more mothers yet to reach, the Nurse Home Visitor Program has made progress in serving some of Colorado's most high-risk first-time mothers and children. These mothers and babies have benefited greatly from the care and education provided by the nurse home visitors, resulting in healthier pregnancies and better early childhood outcomes.

Nurse Home Visitor Program Grant Recipients

Boulder County Health Department

Counties to be Served:	Boulder
Families to be Served:	100
FY2002-03 Award:	\$395,614
FY2002-03 Reduced Award:	\$321,674
FY2003-04 Award:	\$384,279
FY2004-05 Award:	\$305,050 (Plus \$101,979 in estimated Medicaid revenue)
FY2005-06 Award:	\$327,918 (Plus \$101,979 in estimated Medicaid revenue)
FY2006-07 Award:	\$317,765 (Plus \$133,627 in estimated Medicaid revenue)
FY2007-08 Award:	\$326,791 (Plus \$146,991 in estimated Medicaid revenue)
FY2008-09 Award:	\$358,045 (Plus \$155,734 in estimated Medicaid revenue)
FY2009-10 Award:	\$491,232 (Plus \$47,839 in estimated Medicaid revenue)
FY2010-11 Award:	\$499,350 (Plus \$47,839 in estimated Medicaid revenue)
