Dolores County Profile 2005

Adolescent Health Measures Profile

Teen fertility rate 15-17

(National Performance Measure 8)

Numerator	Denominator	County Measure	Colorado Measure	HP 2010 Goal
DS	105	DS	25.2	43.0

The measure is the rate of births per 1,000 teenagers aged 15 through 17 years, for 2001-2003. The numerator is the total number of births to teens in 2001, 2002, and 2003. The denominator is the sum of the estimated population of females ages 15-17 for 2001, 2002, and 2003. The result is multiplied by 1,000 to yield the rate. The rate shown can be viewed as the average rate for each of the three years. Data are calculated by the county of residence of the teen. DS indicates data are suppressed for confidentiality when the numerator or denominator has a value of 1 or 2. The HP 2010 goal refers to pregnancies, not births. The Colorado FY 2005 goal is 28 births per 1,000 teens.

Adolescent Health Measures Profile

Suicide death rate 15-19

(National Performance Measure 16)

Numerator	Denominator	County Measure	Colorado Measure	HP 2010 Goal
0	634	0.0	11.7	5.0

The measure is the rate of suicide deaths per 100,000 teenagers aged 15-19, for 1999-2003. The numerator is the total number of deaths in 1999, 2000, 2001, 2002, and 2003. The denominator is the sum of the estimated population ages 15-19 for 1999, 2000, 2001, 2002, and 2003. The result is multiplied by 100,000 to yield the rate. The rate shown can be viewed as the average rate for each of the five years. DS indicates data are suppressed for confidentiality when the numerator or denominator has a value of 1 or 2.

Source: Numerator: Health Statistics and Vital Records, Colorado Department of Public Health and Environment. Denominator: Demography Section, Colorado Department of Local Affairs.

Adolescent Health Measures Profile

Motor vehicle death rate 15-19

(State Performance Measure 5)

Numerator	Denominator	County Measure	Colorado Measure	HP 2010 Goal
0	393	0.0	29.3	9.2

The measure is the rate of deaths per 100,000 adolescents aged 15-19 caused by motor vehicle crashes for 2001-2003. The numerator is the total number of deaths in 2001, 2002, and 2003. The denominator is the sum of the estimated population ages 15-19 for 2001, 2002, and 2003. The result is multiplied by 100,000 to yield the rate. The rate shown can be viewed as the average rate for each of the three years. DS indicates data are suppressed for confidentiality when the numerator or denominator has a value of 1 or 2.

Dolores County Profile 2005

Adolescent Health Measures Profile

Teen homicide rate 15-19

(State Performance Measure 10)

Numerator	Denominator	County Measure	Colorado Measure	HP 2010 Goal
DS	634	DS	6.8	3.0

The measure is the rate of homicides among teens 15-19 per 100,000 teens, for 1999-2003. The numerator is the sum of all homicides in 1999, 2000, 2001, 2002 and 2003; the denominator is the sum of the estimated population ages 15-19 for 1999, 2000, 2001, 2002, and 2003. The result is multiplied by 100,000 to yield the rate. The rate shown can be viewed as the average rate for each of the five years. DS indicates data are suppressed for confidentiality when the numerator or denominator has a value of 1 or 2.

Child Health Measures Profile

Percent of children who are obese

(State Performance Measure 12)

Numerator	Denominator	County Measure	Colorado Measure	HP 2010 Goal
N/A	N/A	N/A	9.4	5.0

The measure is the percent of WIC participants age 2-5 who are obese, for the year 2003. The numerator is all WIC children (between the ages of 2 and 5) whose weight for height is greater than the 95th percentile. The denominator is all WIC participants between the ages of 2 and 5. County data include all children served by the WIC program in the county, including some who may not be residents of that county. County-level data are provided except where there is no WIC program or where the number of children served is very small (shown as N/A).

Child Health Measures Profile

Child abuse rate

(State Performance Measure 3)

Numerator	Denominator	County Measure	Colorado Measure	HP 2010 Goal
7	409	17.1	9.0	10.3

The measure is the incidence of maltreatment of children younger than 18 (including physical abuse, sexual abuse, emotional abuse, and/or neglect) in Federal Fiscal Year 2004 (October 1, 2003-September 30, 2004). The value shown reflects the number of unique substantiated cases per 1,000 children less than 18 years of age in a county.

Dolores County Profile 2005

Child Health Measures Profile

Motor vehicle death rate 0-14

(National Performance Measure 8)

Numerator	Denominator	County Measure	Colorado Measure	HP 2010 Goal
0	983	0.0	5.5	9.2

The measure is the rate of deaths per 100,000 children aged 0-14 caused by motor vehicle crashes, for 2001-2003. The numerator is the sum of all deaths among children age 0 through 14 in 2001, 2002, and 2003. The denominator is the sum of the estimated population of children ages 0 through 14 for 2001, 2002, and 2003. The rate shown can be viewed as the average rate for each of the three years. DS indicates data are suppressed for confidentiality when the numerator or denominator has a value of 1 or 2. The HP2010 goal is for all ages, not specifically for 0-14.

Source: Numerator: Health Statistics and Vital Records, Colorado Department of Public Health and Environment. Denominator: Demography Section, Colorado Department of Local Affairs.

Child Health Measures Profile

Injury hospitalization rate 0-19

(State Performance Measure 14)

Numerator	Denominator	County Measure	Colorado Measure	HP 2010 Goal
14	2,272	616.2	308.6	N/A

The measure is the rate of hospitalization for injuries per 100,000 children age 0 through 19 for the period 1999-2003. The numerator is the sum of all hospitalizations for injuries in 1999, 2000, 2001, 2002, and 2003. The denominator is the sum of the estimated population ages 0 through 19 for 1999, 2000, 2001, 2002, and 2003. The result is multiplied by 100,000 to yield the rate. The rate shown can be viewed as the average rate for each of the five years. While there is no HP 2010 goal for the measure, the Colorado FY 2005 goal is 251.0.

Source: Injury Epidemiology, Prevention Services Division, Colorado Department of Public Health and Environment.

Child Health Measures Profile

Child death rate 1-14

(National Outcome Measure 6)

Numerator	Denominator	County Measure	Colorado Measure	HP 2010 Goal
0	1,536	0.0	21.3	N/A

The measure is the rate of child deaths per 100,000 children aged 1-14, 1999-2003. The numerator is the sum of all child deaths among children ages 1 through 14 in 1999, 2000, 2001, 2002, and 2003; the denominator is the sum of the estimated population ages 1 through 14 for 1999, 2000, 2001, 2002, and 2003. The result is multiplied by 100,000 to yield the rate. The rate shown can be viewed as the average rate for each of the five years. While there is no HP 2010 goal for the measure, the Colorado 2005 goal is 20.3. DS indicates data are suppressed for confidentiality when the numerator or denominator has a value of 1 or 2.

Source: Numerator: Health Statistics and Vital Records, Colorado Department of Public Health and Environment. Denominator: Demography Section, Colorado Department of Local Affairs.

Dolores County Profile 2005

Child Health Measures Profile

Percent of students with access to school-based health care (State Performance Measure 7)

Numerator	Denominator	County Measure	Colorado Measure	HP 2010 Goal
0	280	0.0	11.0	N/A

The measure is the proportion of children and adolescents attending public schools who have access to basic preventive and primary, physical and behavioral health services through school-based health centers, Fall 2003. The numerator is the number of children in schools that have school-based health centers. The denominator is the number of children in public schools. The result is multiplied by 100 to yield a percent. While there is no HP 2010 goal for the measure, the Colorado FY 2005 goal is 8.75 percent.

Source: The Colorado School-Based Health Center Initiative, Prevention Services Division, Colorado Department of Public Health and Environment and the Colorado Department of Education

Children with Special Health Care Needs Measures Profile

Percent of HCP clients with insurance (National Performance Measure 11)

Numerator	Denominator	County Measure	Colorado Measure	HP 2010 Goal
4,960	7,862	N/A	63.1	N/A

The measure is the percent of children with special health care needs in the state Health Care Program for Children with Special Needs Program who have a source of insurance for primary and specialty care, FY 2004. The numerator is the number of children statewide in the program who have insurance; the denominator is the total number of children statewide in the program. While there is no HP 2010 goal for this measure, the Colorado FY 2005 goal is 75.0 percent. No data for FY 2004 are available at the county level on this measure; data are missing in many cases. The HCP program has discontinued direct services, and insurance and payment information are no longer collected. Insurance information that was collected in FY 2004 is by self-report.

Source: Health Care Program for Children with Special Needs, Prevention Services Division, Colorado Department of Public Health and Environment.

Children with Special Health Care Needs Measures Profile

Family participation degree (National Performance Measure 14)

Numerator	Denominator	County Measure	Colorado Measure	HP 2010 Goal
N/A	N/A	18	15	N/A

The measure is the degree to which the state assures family participation in program and policy activities in the state CSHCN program in FY 03-04, on a scale of 0 to 18 points. Data shown under County Measure are for HCP regions, and are not available for individual counties. Colorado's 64 counties are divided into 14 HCP (Health Care Program for Children with Special Needs) Regions. (These regions are not the same as the 14 State Planning and Management Regions.) While there is no HP 2010 goal for this measure, the Colorado FY 2005 goal is 18 points.

Source: Health Care Program for Children with Special Needs, Prevention Services Division, Colorado Department of Public Health and Environment.

Dolores County Profile 2005

Infant Health Measures Profile

Percent of newborns screened for hearing

(National Performance Measure 10)

Numerator	Denominator	County Measure	Colorado Measure	HP 2010 Goal
19	21	90.5	97.2	N/A

The measure is the percent of newborns who were screened for hearing impairment before hospital discharge in calendar year 2003. The numerator is the number of newborns that underwent the newborn hearing screen at birth; the denominator is the number of live births to residents of the county. The numerator refers to births to residents of the county, not to the location of the hospital of birth. While there is no HP 2010 goal for this measure, the Colorado FY 2005 goal is 95.0 percent.

Source: Numerator: Newborn Hearing Screening Program, Prevention Services Division, Colorado Department of Public Health and Environment. Denominator: Health Statistics and Vital Records, Colorado Department of Public Health and Environment.

Infant Health Measures Profile

Percent of births that are very low birth weight

(National Performance Measure 15)

Numerator	Denominator	County Measure	Colorado Measure	HP 2010 Goal
0	62	0.0	1.3	0.9

The measure is the percent of very low birth weight live births (births weighing less than 1500 grams, or 3 pounds, 4 ounces or less) for 2001-2003. The numerator is the total number of very low birth weight births in 2001, 2002, and 2003. The denominator is the sum of all live births in 2001, 2002, and 2003. The result is multiplied by 100 to yield the rate (percent). Births with unknown weights are excluded. The rate shown can be viewed as the average rate for each of the three years. Data are calculated by the county of residence of the mother. DS indicates data are suppressed for confidentiality when the numerator or denominator has a value of 1 or 2.

Source: Health Statistics and Vital Records, Colorado Department of Public Health and Environment.

Infant Health Measures Profile

Percent of births that are low birth weight

(State Outcome Measure 1)

Numerator	Denominator	County Measure	Colorado Measure	HP 2010 Goal
DS	62	DS	8.9	5.0

The measure is the low birth weight rate for 2001-2003. The numerator is the sum of the low birth weight (under 2500 grams or 5 pounds, 8 ounces, or less) live births in 2001, 2002, and 2003; the denominator is the sum of all of live births in 2001, 2002, and 2003. The result is multiplied by 100 to yield the percent. Births with unknown weights are excluded. The rate shown can be viewed as the average rate for each of the three years. DS indicates data are suppressed for confidentiality when the numerator or denominator has a value of 1 or 2.

Source: Health Statistics and Vital Records, Colorado Department of Public Health and Environment

Dolores County Profile 2005

Infant Health Measures Profile

Percent of very low birth weight births born in Level III hospitals (State Performance Measure 17)

Numerator	Denominator	County Measure	Colorado Measure	HP 2010 Goal
DS	DS	DS	73.7	90.0

The measure is the percent of very low birth weight infants delivered at facilities considered to be appropriate for high-risk deliveries and neonates (Level IIIs). Data are calculated by the county of residence of the mother (not the county where the birth occurred). DS indicates data are suppressed for confidentiality when the numerator or denominator has a value of 1 or 2.

The numerator is the sum of all very low birth weight infants (births weighing less than 1500 grams, or 3 pounds, 4 ounces or less) delivered at a Level III hospital in 1999, 2000, 2001, 2002 and 2003; the denominator is the total number of very low birth weight infants in the same five years. The result is multiplied by 100 to yield

The Level III hospitals include Swedish, Denver Health, Rose, Porter, St. Joseph's, Presbyterian St. Luke's, University Hospital, and Memorial Hospital in Colorado Springs. "N/A" (Not Applicable) is shown for counties that had no very low birth weight births and thus had no very low birth weight deliveries at a Level III facility.

Source: Health Statistics and Vital Records, Colorado Department of Public Health and Environment.

Infant Health Measures Profile

Infant mortality rate (National Outcome Measure 1)

Numerator	Denominator	County Measure	Colorado Measure	HP 2010 Goal
0	104	0.0	6.1	4.5

The measure is the infant mortality rate per 1,000 live births, 1999-2003. The numerator is the sum of all infant (under one year of age) deaths in 1999, 2000, 2001, 2002 and 2003. The denominator is the total number of live births in the same five years. The result is multiplied by 1,000 to yield the rate. The rate shown can be viewed as the average rate for each of the five years. DS indicates data are suppressed for confidentiality when the numerator or denominator has a value of 1 or 2.

Source: Health Statistics and Vital Records, Colorado Department of Public Health and Environment.

Infant Health Measures Profile

Neonatal mortality rate (National Outcome Measure 3)

Numerator	Denominator	County Measure	Colorado Measure	HP 2010 Goal
0	104	0.0	4.2	2.9

The measure is the neonatal mortality rate per 1,000 live births, 1999-2003. The numerator is the sum of all neonatal deaths (deaths occurring in the first 28 days of life) in 1999, 2000, 2001, 2002 and 2003. The denominator is the total number of live births in the same five years. The result is multiplied by 1,000 to yield the rate. The rate shown can be viewed as the average rate for each of the five years. DS indicates data are suppressed for confidentiality when the numerator or denominator has a value of 1 or 2.

Source: Health Statistics and Vital Records, Colorado Department of Public Health and Environment.

Dolores County Profile 2005

Infant Health Measures Profile **Black /White infant mortality ratio** (National Performance Measure 10)

Numerator	Denominator	County Measure	Colorado Measure	HP 2010 Goal
N/A	N/A	N/A	3.2	N/A

The measure is the ratio of the black infant mortality rate to the white infant mortality rate, for 1999-2003. The numerator is the black infant mortality rate. The denominator is the white infant mortality rate. The black rate is then divided by the white rate to yield a ratio. The ratio is based on data for the 5-year time period 1999-2003. A value greater than 1.0 indicates relatively more black infant deaths than white infant deaths. N/A is shown where no black infant deaths occurred among residents of the county. DS indicates data are suppressed for confidentiality when the numerator or denominator has a value of 1 or 2. While there is no HP 2010 goal for the measure, the Colorado goal for 2005 is 1.9.

Source: Health Statistics and Vital Records, Colorado Department of Public Health and Environment.

Infant Health Measures Profile **Postneonatal mortality rate** (National Outcome Measure 4)

Numerator	Denominator	County Measure	Colorado Measure	HP 2010 Goal
0	104	0.0	1.9	1.2

The measure is the postneonatal mortality rate per 1,000 live births, 1999-2003. The numerator is the sum of all postneonatal deaths (deaths occurring after 28 days of life but before one year of age) in 1999, 2000, 2001, 2002, and 2003. The denominator is the total number of live births in the same five years. The result is multiplied by 1,000 to yield the rate. The rate shown can be viewed as the average rate for each of the five years. DS indicates data are suppressed for confidentiality when the numerator or denominator has a value of 1 or 2.

Source: Health Statistics and Vital Records, Colorado Department of Public Health and Environment.

Oral Health Measures Profile **Percent with caries experience**

Numerator	Denominator	County Measure	Colorado Measure	HP 2010 Goal
N/A	N/A	55.8	57.0	42.0

The measure is the estimated percent of children in grade 3 in 2004 with caries history. Caries experience, represented by a missing tooth or presence of a cavity or a filling, indicates that opportunities for primary prevention may have been missed. Dental caries is the single most common chronic disease of childhood. The data come from the Oral Health Surveillance System. Numerators and denominators are not provided. Estimates are based on the oral health of children examined in a number of Colorado counties and the proportion of schools in each county with students eligible at varying levels for the free and reduced lunch program.

Source: Oral Health Program, Rural and Primary Health Section, Prevention Services Division, Colorado Department of Public Health and Environment.

Dolores County Profile 2005

Oral Health Measures Profile **Percent with dental sealants** (National Performance Measure 9)

Numerator	Denominator	County Measure	Colorado Measure	HP 2010 Goal
N/A	N/A	36.7	34.9	50.0

The measure is the estimated percent of children in grade 3 with a dental sealant on at least one tooth in 2004. Dental sealants are plastic coatings applied to decay-susceptible tooth surfaces (the pits and fissures). The data come from the Oral Health Surveillance System. Numerators and denominators are not provided. Estimates are based on the oral health of children examined in a number of Colorado counties and the proportion of schools in each county with students eligible at varying levels for the free and reduced lunch program.

Source: Oral Health Program, Rural and Primary Health Section, Prevention Services Division, Colorado Department of Public Health and Environment.

Oral Health Measures Profile **Percent with untreated decay**

Numerator	Denominator	County Measure	Colorado Measure	HP 2010 Goal
N/A	N/A	28.4	25.9	21.0

The measure is the estimated percent of children in grade 3 with untreated tooth decay in 2004. For children, untreated decay can result in chronic pain and early tooth loss, inability to concentrate at school or absence from school, reduced self-esteem, and psychosocial problems. The data come from the Oral Health Surveillance system. Numerators and denominators are not provided. Estimates are based on the oral health of children examined in a number of Colorado counties and the proportion of schools in each county with students eligible at varying levels for the free and reduced lunch program. This measure is not a national or state performance measure at this time, but all states are collecting data.

Source: Oral Health Program, Rural and Primary Health Section, Prevention Services Division, Colorado Department of Public Health and Environment.

Oral Health Measures Profile **Medicaid dental services rate** (State Performance Measure 8)

Numerator	Denominator	County Measure	Colorado Measure	HP 2010 Goal
2,062	6,149	33.5	31.1	57.0

The measure is the percent of children on Medicaid who received dental services during FY 04. Data are available for eight counties only: Adams, Arapahoe, Denver, Douglas, Larimer, Mesa, Pueblo, and Weld. All other data shown are for regional groups (see below). The numerator is the number of children on Medicaid who obtained dental services, and the denominator is the total number of children that received Medicaid. The result is expressed as a percent.

Data available by regional groups: Garfield, Moffat, Rio Blanco / Eagle, Grand, Jackson, Pitkin, Routt, Summit / Delta, Montrose, Ouray, San Miguel / Archuleta, Dolores, La Plata, Montezuma, San Juan / Chaffee, Custer, Fremont, Gunnison, Lake, Park / Alamosa, Conejos, Costilla, Hinsdale, Mineral, Rio Grande, Saguache / Baca, Bent, Crowley, Huerfano, Kiowa, Las Animas, Otero, Prowers / El Paso, Teller / Logan, Morgan, Phillips, Sedgwick, Washington, Yuma / Cheyenne, Elbert, Kit Carson, Lincoln / Boulder, Broomfield / Clear Creek, Gilpin, Jefferson.

Dolores County Profile 2005

Perinatal Health Measures Profile **Percent of births that are unintended** (State Performance Measure 2)

Numerator	Denominator	County Measure	Colorado Measure	HP 2010 Goal
N/A	N/A	41.0	39.4	30.0

The measure is the proportion of all births (not pregnancies) that are unintended, for the combined period 1998 to 2002. The data derive from five years of surveys of all births. The data shown under County Measure are regional data, grouped according to the 14 State Planning and Management Regions except data are provided for the following 13 counties: Adams, Arapahoe, Boulder, Denver, Douglas, Eagle, El Paso, Garfield, Jefferson, Larimer, Mesa, Pueblo, and Weld. Numerators and denominators are not provided.

Source: Pregnancy Risk Assessment Monitoring System (PRAMS) survey data, Health Statistics and Vital Records, Colorado Department of Public Health and Environment.

Perinatal Health Measures Profile **Percent of births with first trimester care** (National Performance Measure 18)

Numerator	Denominator	County Measure	Colorado Measure	HP 2010 Goal
12	15	80.0	79.3	90.0

The measure is the percent of infants born to pregnant women receiving prenatal care beginning in the first trimester; the data are for calendar year 2003. The numerator is the number of live births in which the mother began prenatal care during the first trimester; the denominator is the number of live births. The result is multiplied by 100 to yield the percent. Births with unknown trimester care began are excluded. DS indicates data are suppressed for confidentiality when the numerator or denominator has a value of 1 or 2.

Source: Health Statistics and Vital Records, Colorado Department of Public Health and Environment.

Perinatal Health Measures Profile **Percent of mothers who initiate breastfeeding** (National Performance Measure 9)

Numerator	Denominator	County Measure	Colorado Measure	HP 2010 Goal
N/A	N/A	91.6	84.3	75.0

The measure is the percent of all mothers who initiate breastfeeding with their newborns, for the period 1998-2002. The data derive from five years of surveys of all births. The data shown under County Measure are regional data, grouped according to the 14 State Planning and Management Regions, except data are provided for the following 13 counties: Adams, Arapahoe, Boulder, Denver, Douglas, Eagle, El Paso, Garfield, Jefferson, Larimer, Mesa, Pueblo, and Weld. Numerators and denominators are not provided. Since the National HP2010 goal of 75.0 percent has been met by Colorado, the Colorado FY 2005 goal is set at 85.0 percent.

Source: Pregnancy Risk Assessment Monitoring System (PRAMS) survey data, Health Statistics and Vital Records, Colorado Department of Public Health and Environment.

Dolores County Profile 2005

Perinatal Health Measures Profile

Percent of women with inadequate weight gain during pregnancy (State Performance Measure 13)

Numerator	Denominator	County Measure	Colorado Measure	HP 2010 Goal
N/A	N/A	27.1	23.3	N/A

The measure is the percent of women who gain an inadequate amount of weight during pregnancy, for the period 1998-2002. The data derive from five years of surveys of all births. The data shown under County Measure are regional, grouped according to the 14 state Planning and Management Regions except data are provided for the following 13 counties: Adams, Arapahoe, Boulder, Denver, Douglas, Eagle, El Paso, Garfield, Jefferson, Larimer, Mesa, Pueblo, and Weld. Numerators and denominators are not provided. While there is no HP 2010 goal for this measure, the Colorado FY 2005 goal is 20.0 percent.

Inadequate weight gain is defined as less than the recommended number of pounds according to a woman's body mass index (BMI). A woman with a low BMI (< 19.8) should gain 28-40 pounds; a woman with a normal BMI (19.8-26.0) should gain 25-35 pounds, and a woman with a high BMI should gain 15-25 pounds.

Source: Pregnancy Risk Assessment Monitoring System (PRAMS) survey data, Health Statistics and Vital Records, Colorado Department of Public Health and Environment.

Perinatal Health Measures Profile

Perinatal mortality rate (National Outcome Measure 5)

Numerator	Denominator	County Measure	Colorado Measure	HP 2010 Goal
0	105	0.0	6.5	4.5

The measure is the perinatal mortality rate per 1,000 live births, 1999-2003. The numerator is the sum of all perinatal deaths (fetal deaths occurring at 28 weeks of gestation or later and infant deaths occurring under 7 days of age) in 1999, 2000, 2001, 2002, and 2003. The denominator is the total number of live births plus all fetal deaths in the same five years. The result is multiplied by 1,000 to yield the rate. The rate shown can be viewed as the average rate for each of the five years. DS indicates data are suppressed for confidentiality when the numerator or denominator has a value of 1 or 2.

Source: Health Statistics and Vital Records, Colorado Department of Public Health and Environment.
