

Overweight (Percent) State Performance Measure 7

Colorado FY 2010 Goal: Reduce the proportion of children in Colorado ages 2-14 whose BMI (body mass index) is at or below 85 percent of normal weight for height to 25.0% or less.

County rates combine two years of results from 2004 and 2005. The Colorado rate is 14.5 percent.

Counties categorized as close to the goal are within 20 percent of the goal; counties at some distance from the goal are more than 20 percent away but less than double the goal; and counties far from the goal are at least double the desired goal.

**Overweight
