Data Source: enhanced HIV/AIDS Reporting System (eHARS). PLHIV=People living with HIV; dx=diagnosis/diagnosed; N/A=Not applicable. All percents are column percents unless otherwise indicated and may not equal 100% due to rounding. ¹For events reported by September 30th, 2024. ²HIV diagnosed concurrently with AIDS (within 30 days of HIV diagnosis). ³Row percent is percent of total HIV diagnoses that were concurrent with AIDS diagnoses. ⁴AIDS=Stage 3, diagnosed with a cd4 count <200 or in the absence of a cd4 count, a cd4 percent <14. Includes concurrent AIDS diagnoses and those that progressed to AIDS. ⁵Includes those labs from the previous 12 months. Suppressed includes a viral load ≤200 cells/mL. ⁶Row percent of PLHIVdx as of 06/30/24. ⁷Sex at birth used when gender identity was unknown. ⁸NH=Non-Hispanic. ⁹For HIV and AIDS diagnoses, age at diagnosis; for PLHIVdx and vl suppression, age as of June 30, 2024. ¹⁰For HIV and AIDS diagnoses, residence at diagnosis; for PLHIVdx and vl suppression, residence as of June 30, 2024. ¹¹Includes Adams, Arapahoe, Broomfield, Denver, Douglas, and Jefferson counties. ¹²Includes Boulder, El Paso, Larimer, Mesa, Pueblo, and Weld counties. ¹³Pediatric cases are individuals under age 13 years at the time of diagnosis. ¹⁴No Identified Risk will be reduced over a 12 month period after diagnosis as new risks are reported. The Colorado Department of Public Health and Environment acknowledges that social, economic and environmental inequities result in adverse health outcomes and have a greater impact than individual choices. Reducing health disparities through systems change can help improve opportunities for all Coloradans.
