Because cash funded programs also pay indirect cost recoveries, these employees are paid from the Retirement line as well, to the extent that the Department has the spending authority to do so. "Health disparities" refer to gaps in the quality of health and health care across racial and ethnic groups. The Health Disparities Grant Program provides grants for the prevention, early detection, and treatment of cancer and cardiovascular and pulmonary diseases among African Americans, Latinos, Native Americans, and other groups. A share of Amendment 35's tobacco tax revenues, a reappropriated funds funding source, supports the Health Disparities program. ## **(B) Special Purpose Disease Control Programs**

### **(1) Immunization**

The immunization program works to decrease preventable illnesses in the State of Colorado through the utilization of vaccines. In recent years, funding for this line has been dramatically increased through two primary sources. In 2004, the Legislature appropriated additional funding to this line item in response to the comparatively low full-immunization rate observed in Colorado’s children. In addition, this section has received additional funding due to the passage of Amendment 35, which provided additional revenue to the State through a tobacco tax.

### *Operating Expenses*

The Department's FY 2008-09 request was \$23,219,060 and the final appropriation was \$23,194,235. The final appropriation represented an increase of \$1,264,401 over the FY 2007-08 request.

Three bills introduced and subsequently passed during the 2007 Legislative Session had a substantial impact on the FY 2008-09 appropriation. The first bill, SB 07-97 focused on the statewide distribution of Tobacco Master Settlement Agreement (MSA) funds amongst a number of different programs. This bill originally appropriated an additional \$900,000 in funding above the FY 2007-08 final appropriation to facilitate the Department's immunization strategies for FY 2008-09. However, with the passage of HB 07-1359, \$214,845 in funding was removed from the \$900,000, bringing the net effect of both bills to an increase of \$685,155.

The last piece of legislation that affected the operating appropriation was HB 07-1301. Senate Bill 07-97 and HB 07-1359 together contain a \$685,155 FY 2007-08 appropriation from the Colorado Immunization Fund to the Department for general immunization activities. The moneys in the Immunization Fund derive from tobacco-settlement payments. House Bill 07-1301 reduces this general immunization appropriation by \$233,395, substituting the following appropriations from the Immunization Fund: (1) a \$42,600 appropriation to the Department's Cervical Cancer Immunization Program, (2) a \$100,000 appropriation to the Department for a cervical cancer immunization awareness campaign, and (3) a \$90,795 appropriation to the Department of Health Care Policy and Financing for cervical cancer immunization costs of the Children's Basic Health Plan. Appropriation (2) only becomes effective if, by January 1, 2008, the department has not received \$800,000 in gifts, grants and donations for its cervical cancer immunization awareness campaign. The bill also appropriates \$225,000 in reappropriated funds to the department out of moneys received as gifts, grants, and donations for a cervical cancer immunization awareness campaign.

The last action to affect the line item was the Department's DI #2 "Operation and Expansion of the CIIS." That request removed \$110,774 from operating funds.

After all actions are taken into account, the Department's FY 2008-09 appropriation for the line item was \$23,194,235. This amount included \$697,885 in General Fund, \$1,375,175 in reappropriated funds, and \$21,121,175 in federal funds. The reduction for cash funds exempt is a diversion to HCPF for the Children's Basic Health Plan to cover the HPV vaccine for eligible girls.

The Department's operating request for FY 2009-10 was \$23,183,635, a reduction of \$10,600 over the FY 2008-09 appropriation of \$23,194,235. The requested reduction represents the annualization of FY 2008-09 DI #2 "Operation and Expansion of the CIIS."

The final 2009-10 appropriation was \$22,746,733 or a decrease of \$436,902 over the original FY 2009-10 request. Of the reduction, \$415,468 was due to the updated forecast of Master Settlement Agreement payments and the remaining \$21,434 was due to SB 09-269 "Adjust Tobacco Settlement Moneys Allocation."

The FY 2010-11 request was \$12,746,733, a decrease of \$10,000,000 over the FY 2009-10 appropriation of \$22,746,733. The requested reduction was due to an allowable base adjustment to reflect anticipated changes in how federal funds are distributed. This reduction will not impact programs. The FY 2010-11 appropriation was \$12,618,249.

The FY 2011-12 request is for continuation of the \$12,618,249 FY 2010-11 appropriation.

#### **(B) Genetics Counseling**

Three to five percent of newborns have a clinically significant health problem evident at birth. Another group of infants have a variety of congenital diseases that are not evident at birth, but detectable by screening blood tests taken from newborns in the first few days of life. If these rare diseases are not detected early in life, they can result in death or serious disability such as mental retardation. The Health Care Program's genetic screening follow-up coordinator assures follow-up of screening results through diagnosis and treatment services. Congenital defects are the second leading cause of infant mortality. In addition, other genetic conditions present in infancy or childhood cause or contribute to significant mortality and morbidity, including mental retardation. The clinical evaluation and care of

these individuals is complex. Ongoing clinical management is time-intensive and requires genetics professionals who emphasize counseling for families to understand and cope with genetic illness. Most families with these disorders are unable to finance the needed care on their own and most health insurance providers do not cover the service completely, if at all. Intense, specialized clinical management of these disorders helps to prevent disability and premature death. This program provides these needed services by contracting with genetics professionals in the State of Colorado.

Three additional bills were passed during the 2008 legislative session that affected the FY 2008-09 personal services appropriation. SB 08-153 “License Home Care Agencies” added \$167,543 and 2.9 FTE. The purpose of the legislation was to protect home care

consumers by establishing licensure requirements for all home care agencies including home health and personal assistance services. SB 08-154 "Requirements Occupancy Contiguous" added \$3,210. A reduction of \$11,071 and 0.2 FTE was also included due to the passage of HB 08-1234 "Deemed Status Ambulatory Surgical Center."

Finally, the legislature passed a supplemental reduction in the amount of \$90,920.

The final FY 2008-09 appropriation was \$985,752 and 16.4 FTE.

The FY 2009-10 request was \$2,215,639 and 34.9 FTE, an increase of \$1,229,887 and 18.5 FTE over the final FY 2008-09 appropriation. The request included common policy increases including \$41,595 for salary survey and \$15,667 for 80% of the appropriated performance pay. The request also included \$645,795 and 11.1 FTE for annualization of SB 08-153 "License Home Care Agencies" and \$90,920 for annualization of the FY 2008-09 supplemental reduction. The increase was partially offset by a decrease of \$1,054 for annualization of SB 08-154 "Requirements Occupancy Contiguous."

The Department also requested an increase of \$436,964 and 7.4 FTE, \$65,476 General Fund and \$371,488 Cash Funds for Decision Item #3 "Health Facilities License Fees." This decision item requested funding necessary for license processing and enforcement for the remaining facility types not addressed in SB 08-153 "License Home Care Agencies." Pursuant to that legislation, fees have been established to fund increased inspections. The General Fund portion of the request was for expenses associated with facilities that are exempt from license fees such as government owned facilities.

The final FY 2009-10 appropriation was \$0 due to a JBC recommended consolidation to combine personal services and operating expenses into a program line. The combine personal services and operating appropriation is shown below in the consolidated program line.

Due to the consolidation there is no personal services request for future years.

The FY 2009-10 request was \$110,514, an increase of \$72,089 over the final 2008-09 appropriation. The requested increases resulted from the following annualizations related to prior year legislation: an increase of \$72,420 for SB 08-153 "License Home Care Agencies" and a reduction of \$331 for annualization of SB 08-154 "Requirements Occupancy Contiguous."

The Department also requested \$154,996, \$21,099 in General Fund and \$133,897 in Cash Funds for Decision Item #3 "Health Facilities License fees."

#### **Assisted Living Facilities (formerly (2) Assisted Living Facilities)**

This section of the Department is responsible for the oversight of assisted living facilities within the State of Colorado. These facilities provide a number of supportive services, including meals, laundry, and protective oversight, to individuals that cannot provide it for themselves, but do not require a nursing home level of care. The Assisted Living Facilities section inspects these facilities to ensure that health standards are met and the appropriate level of safety is attained at each facility. In addition to initial inspections, this section also does re-inspections, complaint investigations, plan reviews, and delivers technical assistance and training to providers and the public.

### *Personal Services*

With the passage of HB 08-1038 "Assisted Living Residence Regulation" during the 2008 legislative session the Board of Health was authorized to increase the fees charged to assisted living residences. Therefore, the \$166,175 and 2.2 FTE was restored to the final FY 2008-09 appropriation.

The personal services request for FY 2009-10 was \$877,646 and 11.4 FTE an increase of \$126,155 and 1.5 FTE over the final 2008-09 appropriation. ### **(B) Emergency Medical Services (formerly (C) Emergency Medical Services)**

There are a number of programs within the (B) Emergency Medical Services section that work toward planning and implementing a Statewide Emergency Medical and Trauma Services System. This system is intended to perform a number of functions including:

- Training and certifying emergency medical technicians (EMT);
- Providing technical and operational assistance for regional planning and local provider agencies;

- Licensing air ambulance services;
- Establishing minimum standards for ground ambulance services;
- Designating local health facilities as Level I through V trauma treatment centers.

The goal of the program is to provide emergency trauma care to individuals 24 hours per day, 365 days per year without exception. To do this, the program must coordinate a number of providers: (nurses, hospitals, physicians, EMTs, etc.), law enforcement, counties, and various other localities.
