WATER POLLUTION CONTROL REVOLVING FUND AND STATE DOMESTIC WASTEWATER GRANT INTENDED USE PLAN 2010

I. WATER POLLUTION CONTROL REVOLVING FUND

A. INTRODUCTION

Senate Bill 50 in 1988 amended Title 37 of Article 95, C.R.S. establishing a Water Pollution Control Revolving Fund (WPCRF) as an enduring and viable mechanism to fund water quality projects. The statute provides that the WPCRF shall be maintained and be available in perpetuity for providing financial assistance as authorized and defined by the Clean Water Act (Federal Act).

The agencies (hereinafter referred to as the State) having responsibility for administering the WPCRF include: the Colorado Department of Public Health and Environment, Water Quality Control Division ("WQCD"), the Colorado Water Resources and Power Development Authority ("Authority"), and the Colorado Department of Local Affairs, Division of Local Government ("DLG"). The State agrees to submit to EPA, as part of its annual application for a capitalization grant under Title VI of the federal Act, an Intended Use Plan (IUP) that meets the requirements of Section 606(c) of the federal Act and C.R.S. 37-95-107.6. The annual IUP is approved by the Water Quality Control Commission (WQCC) in an Administrative Action Hearing as specified in WPCRF Rules (Appendix A).

The 2010 IUP will serve as the planning document for the operations of the WPCRF. Upon approval by the WQCC this IUP will become effective January 1, 2010. The IUP describes the specific projects and activities associated with the federal appropriation and other funds available to the WPCRF (e.g., state match, leveraged funds, and repayments). Funds allotted to the State for federal fiscal year (FFY) 2010 and the funds remaining from prior federal fiscal years capitalization grants are available to the WPCRF.

The WPCRF provides leveraged loans (those loans over \$2 million) at an interest rate of 80% of the market rate of the "AAA" – rated Clean Water Revenue Bonds. On August 21, 2009 the Colorado Water Resources and Power Development Authority's Board lowered the leveraged loan interest rate to 2.5% for all leveraged loan borrowers approved in 2010. The Authority Board also approved the 2010 direct loan rate at 2%. On or before December 31st of each year the Colorado Water Resources and Power Development Authority's Board determines the interest rate for direct loans (\$2 million or less) that will apply in the following year.

The requirements of the Federal Act specify that the IUP include the following:

- A list of projects for construction of publicly owned treatment works and projects/activities eligible for assistance under sections 319 and 320 of the federal act. This list must include the name of the community, permit number or other applicable enforceable requirements (if available), the type of financial assistance, and the projected amount of eligible assistance.
- The criteria and method established for the distribution of funds.
- Information on the types of activities to be supported by the WPCRF including the eligible cost categories, types of assistance to be provided (e.g., loans, guarantees, insurance, etc.), terms of financial assistance, types of communities to be served by the fund, and administrative costs.
- A description of the short and long-term goals of the State's WPCRF.

B. LIST OF WATER POLLUTION CONTROL REVOLVING FUND PROJECTS

States are required to develop a comprehensive list of eligible projects for funding and to identify projects that will receive funding. Attached to the IUP, as Appendix B, is the 2010 WPCRF and Domestic Wastewater Treatment (DWWT) grant project eligibility list. The list shows the current construction needs for all identified eligible water quality projects including point source wastewater treatment, nonpoint source ("NPS"), storm water and Source Water Assessment Projects (SWAP).

Appendices B1 and B2 summarize the additions and deletions that were made from the 2009 project eligibility list. Appendix C to the IUP is a table depicting projects that are likely to be funded with WPCRF loans in 2010. If more projects apply for WPCRF loans and sufficient funds are not available, projects will be funded in a priority order as outlined below.

C. CRITERIA AND METHODS FOR DISTRIBUTING WATER POLLUTION CONTROL REVOLVING FUNDS

In accordance with the WPCRF Rules (Appendix A), the IUP, which includes the project eligibility list (Appendix B) and projected loans list (Appendix C), provides a clear and objective system for identifying projects that will improve or benefit water quality in the state. This system uses the following criteria:

1. Project Eligibility List Categories

<u>Category 1</u> includes those projects that improve, or benefit public health or that will remediate a public health hazard as defined in the WPCRF Rules.

Category 2 includes those projects that enable an entity to achieve permit compliance.

<u>Category 3</u> includes those projects that contribute to the prevention of a public health hazard; enable an entity to maintain permit compliance; or enables an entity to address a possible future effluent limit or emerging issue.

<u>Category 4</u> includes those projects that implement a watershed/nonpoint source management plan.

<u>Category 5</u> includes those projects that implement a source water protection plan.

Note: Project eligibility list categories are determined based on information provided by the applicant during the annual project eligibility list survey process. Based upon receipt and review of the preliminary engineering report and a loan application, the assigned project eligibility list category may be revised during the prioritization process to more accurately reflect the proposed project.

2. Application Deadlines

In order to prioritize projects, two application deadlines of **January 15th** and **June 15th** have been implemented. Applications will be accepted throughout the year based on the following Authority board meeting schedule. However, loans will not be executed until all direct and leveraged loan applications have been prioritized and it is determined that sufficient funds are available. If sufficient funds are not available to cover all requests, those projects not funded will be included in the next prioritization of applications. Authority board meetings and application submittal dates are as follows:

- November 15 for consideration at the Authority's January board meeting.
- January 15 for consideration at the Authority's March board meeting. This is also the last application deadline for inclusion into project prioritization (if project prioritization is necessary) funding for the spring bond issue, and for all direct loan consideration. (For 2011, the date of this application deadline will change to

December 15, 2010 in order to allow additional time for processing funding requests. Therefore, applications submitted for the Authority's March, 2011 board meeting will be due to the WQCD no later than December 15, 2010.)

- February 15 for consideration at the Authority's April Board meeting.
- April 15 for consideration at the Authority's June Board meeting.
- June 15 for consideration at the Authority's August Board meeting. This is also the last application deadline for inclusion into project prioritization (if project prioritization is necessary) funding for the fall bond issue and for all direct loan consideration.
- August 15 for consideration at the Authority's October Board meeting.
- October 15 for consideration at the Authority's December Board meeting.

If after January 15th and June 15th there are more funds available than request for funds and it is not necessary to prioritize projects then direct loan applications may be submitted and approved at subsequent board meetings until the next prioritization deadline. These direct loan application approvals are valid for eighteen months. These loans will not be subject to future prioritization deadlines as long as they execute their loan within that time frame.

All loan approvals are valid for 18 months. However, leveraged loans that have been prioritized and that have received Authority board approval after January 1, 2010, but do not execute their loan will be reprioritized upon the next application deadline. An exception will be made if a leveraged loan project prioritizes, but is unable to execute its loan due to technical difficulties (as determined by WQCD), that project will then have one calendar year to execute the loan prior to being reprioritized.

Applicants should coordinate with a Project Manager from the WQCD to determine the appropriate application submittal schedule to ensure board action and loan execution in a timely manner.

3. Funding Priorities

If it is determined that the WPCRF lacks sufficient funds to cover loans for all eligible projects that are ready to proceed within the funding year, Category 1 projects will be funded prior to Category 2 projects, which will be funded prior to Category 3 projects, which will be funded prior to Category 4 projects, which will be funded prior to Category 5 projects - until all funds are obligated. Within each category, the following criteria will be applied in the following order to further prioritize the projects:

 Projects serving a small community. Population priority points will be assigned based on the following schedule:

Up to 1000 Population	20 Points
1,001 to 5,000 Population	15 Points
5,001 to 10,000 Population	10 Points
Over 10,000 Population	5 Points

- Entities that have a greater financial need as outlined in the following procedures. Financial need is determined by using a priority point system that ranks projects based on estimated monthly user charges as a percentage of median household income (Ability to Pay) and project cost per tap (Local Burden). The financial data used are from the most recently audited financial statements available to and interpreted by the DLG. Points are assigned based on the following criteria:
- Ability to Pay (total annual sewer cost per single family equivalent as a % of median household income)

Over 3%	20 Points
Over 2% up to 3%	15 Points
Over 1% up to 2%	10 Points
1% and under	5 Points

Local Burden (total project cost per equivalent residential tap)

Over \$5,000	20 Points
Over \$3,500	15 Points
Over \$2,000	10 Points
\$2,000 and under	5 Points

- Projects of any governmental agency that is under an enforcement action, as defined in 5 CCR 1002-51.5, will be assigned 10 points.
- Projects of any governmental agency that will result in a reduction in the discharge of pollutant(s) to a segment impaired for the relevant pollutant(s) will receive 10 points.
- Projects that implement the "Green Infrastructure / Sustainable Measures" will be assigned 5 points.

The rationale for funding projects in an order other than that shown shall be due to one or more of the following reasons:

- Certain governmental agencies do not wish to participate in the WPCRF;
- Certain governmental agencies are not ready to proceed with the project; or
- Certain governmental agencies do not have the financial capability to repay a loan.
- Projects that have an existing WPCRF loan and need additional funding to complete the original project as approved by the WQCD.
- Federal requirements mandate that a certain percentage or amount of capitalization grant funds be used for a specific purpose or to satisfy specific criteria.

The WQCC may amend the project eligibility list at any time throughout the year to include wastewater treatment system projects that it determines and declares to be emergency projects needed to prevent or address threats to public health or the environment. In cases where the WQCC determines the amendments will result in substantial changes to the project eligibility list, public notice and opportunity for comment on the proposed inclusion shall be provided.

4. Fiscal Year 2010 Appropriations Bill Requirements

For fiscal year 2010, consistent with the 2010 Appropriations Bill for the U.S. Environmental Protection Agency, the following requirements apply to each State receiving capitalization grants under the federal Clean Water Act:

• To the extent there are sufficient eligible project applications, not less than 20% of the funds shall be used for projects to address green infrastructure, water or energy efficiency improvements, or other environmentally innovative activities.

- Not less than 30% of the funds shall be used by the State to provide additional subsidy to eligible recipients in the form of forgiveness of principal, negative interest loans, or grants (or any combination of these), except that for the Clean Water Revolving Fund capitalization grant appropriation, this requirement shall only apply to the portion that exceeds \$1,000,000,000 (this equates to approximately 15% of the capitalization grant).
- The requirements of section 513 of the Federal Water Pollution Control Act (33 U.S.C. 1372) regarding prevailing wage rates shall apply to the construction of treatment works carried out in whole or in part with assistance made available by a State Water Pollution Control Revolving Fund.

The above requirements are subject to further interpretation by the U.S. Environmental Protection Agency and will be implemented consistent with any formal guidance issued by the agency.

5. Allocation of Loan Proceeds

In addition to the WPCRF Rules (Appendix A), the following policies will be applied to the allocation of loan proceeds and administrative fee revenue:

i. Planning and Design Grants

The intent of planning and design grants is to assist WPCRF applicants with costs associated with complying with program requirements. To be eligible for a planning and/or design grant, a governmental agency must meet the following criteria:

- Project is on the current year project eligibility list or is being added to the subsequent year's project eligibility list, and
- Population is 10,000 or less, and
- Median household income (MHI) is less than the statewide MHI (the 2000 MHI for the state is \$47,203) or
- Current or post project monthly sewer rates are greater than the state average municipal rate as calculated by DLG.

On October 1, 2009 the Authority Board, authorized \$150,000 for planning and/or design grants which will be made available on January 1, 2010. This change reflects a \$50,000 increase. One grant in the amount of \$10,000 will be awarded per community. However, if planning and design grant funds are available on September 1 of each year, an additional grant of up to \$10,000 (maximum of \$20,000 total per community) may be made to communities that have met criteria in demonstrating progress towards receiving funding through the program.

Grants will be awarded on a first come, first served basis. If the entity does not seek funding through the WPCRF, they may be requested to repay the grant or seek a waiver of the repayment requirement from the Authority Board.

Grant funds may be used to support a variety of project development activities including, but not limited to: preliminary engineering reports, environmental assessments, engineering design documents and legal fees (including costs associated with the formation of a legal entity capable of receiving WPCRF assistance.)

These funds are provided from the administrative fee account from income received from WPCRF loans.

In 2010 the Authority board may also approve additional grant funding from the administrative fees account for special projects.

ii. Disadvantaged Communities Loans

In accordance with the Federal Act, states are authorized to provide "loans at or below market interest rates, including interest free loans, at terms not to exceed 20 years" to disadvantaged communities.

- A disadvantaged community is defined as a governmental agency that has a population of 5,000 or less with a median household income that is 80 percent or less of the statewide median household income.
- WPCRF re-loan funds will be the primary source of capital used to provide reduced interest rate loans under this program.
- To the maximum extent practical (based on available data), projects eligible to receive the reduced interest rate will be identified on the projected loans list (Appendix C.)
- Median household income as a percentage of the statewide median household income (as determined by the most current Census data) will be used to distribute funding to governmental agencies that are disadvantaged in accordance with two categorical affordability tiers:

Category 1 - Disadvantaged communities with median household income levels that range from 61 percent to 80 percent of the statewide median household income qualifies for loans up to \$2 million per project. The loan interest rate is established at 50 percent of the direct loan rate (as set annually by the Authority Board) for qualifying governmental agencies.

Category 2 - Disadvantaged communities with median household income levels that are less than 61 percent of the statewide median household income qualify for loans up to \$2 million per project. The loan interest rate is established at 0 percent for qualifying governmental agencies.

Note: All loan requests exceeding the \$2 million direct loan limit will not be eligible for a Disadvantaged Communities Loan.

iii. Re-Loan Funds

Re-loan funds will be provided in the following priority order:

- i Disadvantaged Communities Loans
- ii Direct Loans
- iii Leveraged loans

If there are more applications than funds available, projects will be funded in the order in which they prioritize, until there are no more funds available. Projects may be partially funded based on the availability of funding.

6. Miscellaneous Information

Projects that do not conform to a State-approved plan, (for example, Water Quality Management Plan, NPS Management Plan, etc.) as updated from time to time, may not be considered for assistance through the WPCRF.

Communities receiving assistance from federal capitalization grant funds shall comply with all applicable federal requirements.

Governmental agencies distributing or supplying 2,000 acre feet or more of water per year must have an approved (by the Colorado Water Conservation Board) and <u>updated</u> water conservation plan as defined by Section 37-60-126, CRS.

On February 17, 2009 President Obama signed into Public Law the American Recovery and Reinvestment Act (ARRA). Colorado received over \$30 million dollars for wastewater infrastructure needs. All funds must be under contract or construction no later than February 17, 2010. On May 29, 2009 the Commission approved the plan for distribution of the funds as Addendum #1 to the approved 2009 Intended Use Plan.

The 2009 ARRA Intended Use Plan has been incorporated into the 2010 IUP by Addendum #1.

D. WATER POLLUTION CONTROL REVOLVING FUND LONG-TERM GOALS

The long-term goal of the WPCRF is to ensure that WPCRF funds are expended on treatment, nonpoint source, and stormwater pollution control projects that result in demonstrated improvement to water quality for priority water bodies. This goal is in furtherance of the following WQCD Strategic Plan Goals (2009-2012):

- 1. Protect all designated uses by fully attaining water quality standards through improved implementation of the federal Clean Water Act and Colorado Water Quality Control Act and their associated regulations;
- 2. Restore impaired water quality to attainable standards through improved implementation of the federal Clean Water Act and Colorado Water Quality Control Act and their associated regulations; and
- 3. Assist with Colorado's economic recovery by providing increased funding to water infrastructure and non-point source projects
- 4. Provide affordable financial assistance for eligible applicants while maintaining a perpetual, self- sustaining revolving fund program.
- 5. Maintain compliance with state and federal laws and the provisions of the State/EPA Operating Agreement.

E. WATER POLLUTION CONTROL REVOLVING FUND SHORT-TERM GOALS

The short term goals of the WPCRF are to continue to preserve and improve the quality of the State's waters (surface and ground), to meet the wastewater treatment needs of the State, and to eliminate any public health hazards related to discharges of inadequately treated wastewater. To achieve these goals the following objectives were developed for 2010:

- 1. Evaluate the system of prioritizing projects for funding to ensure that WPCRF funding provides maximum benefit to meet water quality goals including restoring impaired water bodies and implementing water quality standards through wastewater treatment and stormwater pollution control infrastructure projects.
- Provide technical assistance to governmental agencies for facilitating effective planning, design, financing, construction, and ongoing operations of point source and nonpoint source projects;

- 3. Provide affordable financial assistance to eligible applicants while maintaining a perpetual, self- sustaining revolving fund; and
- 4. Maintain compliance with state and federal laws and the provisions of the State/EPA Operating Agreement.
- 5. Within ninety (90) days of receipt of the EPA allotment formula, the Authority in conjunction with the WQCD, will submit an application for the 2010 capitalization grant funds.
- 6. Conduct an availability analysis of Disadvantaged Business Enterprise firms in order to establish the FFY 2011-2013 Disadvantaged Business Enterprise goals.
- 7. By May 1, 2010 the WQCD will initiate the annual project eligibility list survey process to identify projects for the 2011 IUP.
- 8. The Authority, in conjunction with the WQCD and DLG will submit a 2009 Annual Report to EPA by April 30, 2010.
- 9. In conformance with EPA's required reporting of WPCRF "Output/Outcomes" the WQCD will document, and include in the 2009 Annual Report, environmental benefits of all 2009 WPCRF loan awards. Environmental benefit tracking will also be done in July 2010 using the EPA approved "CWSRF Benefits Reporting" web-based tracking system.
- 10. The State Revolving Fund Policy Committee, consisting of staff from WQCD, DLG, and Authority will work toward implementing the following program improvements (including any necessary programmatic rule changes):
 - a. Continue to meet periodically with the Funding Coordination Committee, to coordinate the financial needs of communities that are planning projects identified in the 2010 IUP. The Funding Coordination Committee includes staff from the WQCD, Authority, DLG, Colorado Water Conservation Board, USDA Rural Development and the Rural Community Assistance Corporation.
 - b. Improve coordination between state and federal agencies to facilitate the use of multiple sources of capital financing when appropriate.
 - c. Seek a treatment works project with an eligible nonpoint source project within a financial assistance agreement to a municipality. The municipality could receive a loan with a reduced interest rate that would compensate for undertaking a nonpoint source project, which would address a pressing watershed restoration or protection area(s) of the community's service area.
- 11. The Authority will leverage funds in the WPCRF to accommodate the amount of eligible costs projected for loans in 2010 as described in Appendix C.
- 12. The WQCD in partnership with the Authority will continue to utilize the shared Access database for tracking project milestones.
- 13. The DLG will conduct 4 to 8 training events in 2010 to help build financial and managerial capacity of public water and wastewater systems.
- 14. The WQCD, the Authority and DLG will attend conferences such as Rural Water, Colorado Municipal League, and the Special District Association's annual conferences to provide program information to potential borrowers.
- 15. The WQCD, Authority and DLG will host training events throughout the year to provide consulting engineers and others with information about the funding process and program requirements.

F. WATER POLLUTION CONTROL REVOLVING FUND PROGRAM ACTIVITIES

1. Financial Activities

As of June 30, *2009*, 54 WPCRF direct loans totaling \$38,706,883 and 89 WPCRF leveraged loans totaling \$706,957,368 were administered or are currently being administered by the State. In addition, as of June 30, 2009, sixteen (16) disadvantaged community loans totaling \$11,568,891 were administered by the State. The total loan amount for the 159 loans is \$757,233,142.

The Federal Fiscal Year (FFY) 2009 capitalization grant was awarded on May 28, 2009. The EPA allotment was \$5,398,200 and the State Match was \$1,079,640 for a total of \$6,477,840. The amount of grant funds to be allocated to the State in FFY 2010 is anticipated to be \$18,400,000.

The total amount of Federal capitalization grant awards through FFY2009 available for loans and program administration is \$222,591,723. Of this amount, \$210,571,699 has been obligated through June 30, 2009 for loans (see Appendix D and Appendix E) and \$7,548,692 has been allocated for program administration. The amount of unobligated grant funds as of June 30, 2009 is \$4,471,332.

Re-loan funds of approximately \$36,263,803 are expected to be available for the remainder of the 2009 calendar year and during the 2010 calendar year. Approximately \$53,927,803 of grant and re-loan funds will be available for loans for the remainder of 2009 and in the year 2010. Because Colorado leverages the fund, and after subtracting the funds used for the Clean Water 2009A fall bond issues, the 2010 loan capacity of the WPCRF should be approximately \$40,319,128 (see Table I below). To leverage the available grant and re-loan funds for 2010, the Authority would anticipate issuing up to \$35,000,000 in Clean Water Revenue Bonds for a term of twenty years plus the construction period at estimated interest rates of 4% to 5% to provide loan rates of 2.5%.

TABLE I

Calculation of Water Pollution Control Revolving Fund Loan Capacity for 2010 as of June 30, 2009

Capitalization grants through 2009 Obligated for loans and admin through 6/30/09	\$ 222,591,723 \$ 218,120,391
Remainder	\$ 4,471,332
Expected 2010 capitalization grant	
0.8% of \$2.3 billion	\$ 18,400,000
Less 4% Administrative Fee	\$736,000
Total 2010 Grant	\$ 17,664,000

Total Grant Funds Available	\$22,135,332		
Re-loan funds as of 6/30/09	\$ 22,884,285		
plus: Deallocation on 9/02/09	\$ 16,931,173		
plus: Deallocation on 9/02/10	\$ 16,062,174		
less: Re-loan funds used for direct loans remainder 2009	\$19,613,829		
Total Re-Loan Funds Available	\$36,263,803		
Loan Capacity for 2010 (includes 9/2/10 deallocation)			
Leveraged Loans from Grants X 2.0	\$44,270,664		
Leveraged Loans from Re-Loan Funds X 1.70	\$61,648,46		
Less: 2009A Clean Water			
Bond Issue	\$65,600,000		
2010 WPCRF Loan Capacity	\$ 40,319,128		

The WPCRF currently charges a 0.8% administrative fee on all loans based on the original principal amount of the loan. In the first year or two and in the last two or three years of leveraged loans the administrative fee may be less than 0.8%. In order to leverage the EPA grant amounts further the Authority Board waved Admin Fees for leveraged loan borrowers in 2009. On direct loans, more of the fee is front-loaded because there are not enough interest charges on the backend to charge a full 0.8% on the original principal. It is estimated that 5,875,583 will be generated in loan fees in 2009 and \$5,827,488 in 2010. Beginning in 2008, up to \$1,000,000 of WPCRF administrative fees collected from loans may be transferred to the DWRF to pay for administrative costs of the DWRF.

Appendix F identifies the revenues and expenses from the administrative fee account that are outside of the revolving loan fund. The values in this table may not reconcile differences between cash and accrual accounting methods. At the end of 2008, the State match loan balance was at \$158,503. Also at the end of the 2008, the cash balance in the administrative fee account was approximately \$1,800,977.

In consultation with the WQCC and the Authority Board, the WQCD intends to pursue the option of using funds generated from the loan fee to fund eligible water quality activities as provided for in EPA's CWSRF 06-01 Policy Memo regarding "Guidance on Fees Charged by States to Recipients of Clean Water State Revolving Program Assistance." These activities may include, but are not limited to water quality monitoring, developing total maximum daily loads, water quality restoration plans and management of other State financial assistance programs for water quality related purposes. Additionally, administrative fee income will be used to fund planning and/or design grants.

The proposed payment schedule using FFY 2010 WPCRF funds will be included in the application for the capitalization grant. The payment schedule identifies the anticipated

amount of EPA Automated Clearinghouse (ACH) draws from the capitalization grant and State dollars to be deposited into the WPCRF.

2. General Activities

All funding agencies meet periodically to coordinate the financial needs of communities that have water quality improvement projects. The "Funding Coordination Committee" includes staff from the WQCD, Authority, DLG, Colorado Water Conservation Board, and USDA Rural Development and Rural Community Assistance Corporation.

The State will provide the necessary assurance and certifications as part of the capitalization grant Agreement and Operating Agreement between the State of Colorado and the EPA.

3. Transfer Activities

As authorized by Congress, up to 33 percent of the cumulative drinking water capitalization grants for FFY 1997 through FFY 2009 (total drinking water grants at \$169 million) may be reserved from the DWRF and transferred to the WPCRF. The following Table II itemizes (in millions) the amount of net SRF funds available for transfer between the two programs:

Year	Transaction	Banked Transfer Ceiling	Transferred from WPCRF – DWRF	Transferred from DWRF- WPCRF	WPCRF Funds Available for Transfer	DWRF Funds Available for Transfer
1997	CG Award	\$5.6			\$5.6*	\$5.6*
1998	CG Award	8.8			8.8	8.8
1999	CG Award	12.1			12.1	12.1
1999	Transfer	12.1	\$6.7**		5.4	18.8
2000	CG Award	15.6			8.9	22.3
2001	CG Award	19.1			12.4	25.8
2002	CG Award	23.6			16.9	30.3
2003	CG Award	28.0			21.3	34.7
2003	Transfer	28.0		\$6.7**	28	28
2004	CG Award	32.2			32.2	32.2
2005	CG Award	36.7			36.7	36.7
2006	CG Award	41.5			41.5	41.5
2007	CG Award	46.3			46.3	46.3
2008	CG Award	51.0			51.0	51.0
2009	CG Award	55.8			55.8	55.8

Table IINet Funds Available for Transfer

* Transfers could not occur until one year after the DWRF had been established.

** \$6.7 million capitalization grant funds and \$1.3 million state match funds.

The authorization to transfer funds for FY 2006 and thereafter, has been approved in the 2006 EPA Appropriations Bill. Since a number of WPCRF projects are expected to request funds in 2010, the WPCRF loan demand may exceed available loan capacity. If a transfer is pursued a stakeholders group will be notified of the State's intent to transfer funds from the DWRF to the WPCRF. Based on the WQCC and the Governor's approvals, a transfer of no more than \$10,000,000 will be made from the DWRF into the WPCRF in 2010. The exact amount of the transfer will be determined after either the January 15 or June 15 application deadlines and the WPCRF and DWRF loan demands are determined. The following tables (Table III & Table IV) provide a comparison of loan capacity impacts if a transfer of \$10, \$7 or \$5 million is made from the DWRF. None of the transferred funds will be used for administrative purposes.

TABLE III

Calculation of Ioan capacity for the 2010 Water Pollution Control Revolving Fund

As of June 30, 2009

Assuming Various transfer from the DWRF to the WPCRF

			0\$ Transfer	\$	10 million	<u>\$7million</u>	-	<u>\$5 million</u>
Capitalization grants through 2009			222,591,723	\$	222,591,723	\$ 222,591,723	\$	222,591,723

Grant \$ Available	\$ 39,280,515	\$ 29,280,515	\$ 32,280,515	\$ 34,280,515
Re-loan funds as of 06/30/09	\$ 5,585,193	\$ 5,585,193	\$ 5,585,193	\$ 5,585,193
plus: Deallocation on 9/1/09	\$ 5,960,182	\$ 5,960,182	\$ 5,960,182	\$ 5,960,182
plus: Deallocation on 9/1/10	\$ 6,533,180	\$ 6,533,180	\$ 6,533,180	\$ 6,533,180
less: Re-loan funds used Remainder of 2009	\$ 14,185,753	\$ 14,185,753	\$ 14,185,753	\$ 14,185,753
Total Re-Loan Funds Available	\$ 3,892,802	\$ 3,892,802	\$ 3,892,802	\$ 3,892,802
Loan Capacity for 2010				
2009A Drinking Water Bond Issue	\$ 17,420,000	\$ 17,420,000	\$ 17,420,000	\$ 17,420,000
Leveraged Loans from Grants X 1.3	\$ 51,064,669	\$ 38,064,669	\$ 41,964,669	\$ 44,564,669
Leveraged Loans from Re-Loan Funds X 1	\$ 3,892,802	\$ 3,892,802	\$ 3,892,802	\$ 3,892,802
2010 DWRF Loan Capacity	\$ 37,537,471	\$ 24,537,471	\$ 28,437,471	\$ 31,037,471

It is estimated that a transfer of \$5 - \$10 million from the DWRF to the WPCRF will reduce the DWRF revolving level \$1 - \$2.5 million/year over the next 20 years. The DWRF setasides would not be affected and the remainder of the allocation would be deposited into the revolving fund. All identified and eligible drinking water projects that are ready for construction in 2010 will be funded out of the expected 2010 DWRF loan capacity.

Any transfer would be deposited in the WPCRF and will only be available for loans. With the statutory language approved by the Colorado State General Assembly in 2002, any transfers can be made from one account to the other with all of the appropriate approvals.

4. Cross-Collateralization Activities

Beginning in the calendar year commencing on January 1, 1999, the WPCRF, along with the DWRF, was able to cross-collateralize or pledge moneys on deposit in one fund to act as additional security for bonds secured by moneys on deposit in the other fund. This mechanism was utilized for both programs in 1999 and, as a result, the bond ratings for both programs were upgraded to "AAA" by all three bond-rating agencies. This upgrade translates to lower interest rates and thereby more savings to the borrowers of both programs.

II. STATE DOMESTIC WASTEWATER TREATMENT GRANTS

A. INTRODUCTION

Sections 25-8-202(1) (e) and (g), and C.R.S. and Section 25-8-703, C.R.S., as amended, of the Colorado Water Quality Control Act provide authority for the State Domestic Wastewater Grant Program. The purpose of the Domestic Wastewater Treatment (DWWT) grant program is to provide financial assistance to governmental agencies and counties on behalf of unincorporated areas for planning, design and construction of eligible DWWT projects serving a population of not more than 5,000 persons. Funding is dependent upon appropriations from the State Legislature.

Each year that funds are appropriated, in accordance with Appendix G, the DWWT Grant Funding System Rules, Regulation No. 53, the WQCD shall prepare an IUP. The IUP includes a list of eligible DWWT projects, a description of the use of funds from the previous year and the intended use of funds for the current year, the criteria and methods for distributing funds, program goals and activities.

B. LIST OF STATE DOMESTIC WASTEWATER TREATMENT GRANT PROJECTS

The WQCD is required to develop a comprehensive list of eligible projects for funding and to identify projects that will receive funding. Attached to the IUP, as Appendix B, is the 2010 WPCRF and Domestic Wastewater Treatment (DWWT) project eligibility list. The list shows the current construction needs for all identified eligible water quality projects. Note: Nonpoint source, storm water and source water protection projects are not eligible for DWWT grant funding. If more projects apply for DWWT grant funding during 2010 and sufficient funds are not available, projects will be funded in a priority order as outlined below.

C. CRITERIA AND METHODS FOR DISTRIBUTING FUNDS

In accordance with the DWWT Grant Funding System Rules (Appendix G), the IUP, which includes the project eligibly list (Appendix B) provides a clear and objective system for identifying projects that will improve or benefit water quality in the state. The system uses the following criteria

1. Project Eligibility List Categories

<u>Category 1</u> includes those projects which improve or benefit public health or that will remediate a public health hazard as defined in this regulation.

Category 2 includes those projects that enable an entity to achieve permit compliance.

<u>Category 3</u> includes those projects that contribute to the prevention of a public health hazard; enable an entity to maintain permit compliance; or enables an entity to address a possible future effluent limit or emerging issue.

Project eligibility list categories are determined based on information provided by the applicant during the annual project eligibility list survey process. Based upon receipt and review of a preliminary engineering report and grant application, the assigned project

eligibility list category may be revised during the prioritization process to more accurately reflect the proposed project.

a. Application Deadlines

In order to prioritize projects, an application deadline of **September 1st** has been implemented. Applications will be accepted throughout the year however, grants will not be executed until all applications received by the application deadline have been prioritized and it is determined that sufficient funds are available. Those projects not receiving funding may reapply the following September 1st by submitting an updated DWWT grant application.

b. Funding Priorities

- The governmental agency's project is identified on the current years project eligibility list, and
- The governmental agency is ready to proceed with the project, and
- A complete grant application is submitted to the WQCD, and
- The Division obtains a certificate of financial need issued by DLG, and
- Funds are available.

If it is determined that the DWWT grant program lacks sufficient funds to cover grants for all eligible projects that are ready to proceed, Category 1 projects will be funded prior to Category 2 projects, which will be funded prior to Category 3 projects, which will be funded prior to Category 5 projects - until all funds are obligated. Within each category, the following criteria will be used to further prioritize the projects:

• Projects serving a small community. Population priority points will be assigned based on the following schedule:

Up to 1000 Population	20 Points
1,001 to 5,000 Population	15 Points

- Entities that have a greater financial need as outlined in the following procedures. Financial need is determined using a priority point system that ranks projects based on estimated monthly user charges as a percentage of median household income (Ability to Pay) and project cost per tap (Local Burden). The financial data used are from the most recently audited financial statements available to and interpreted by the DLG. Points are assigned based on the following criteria:
- Ability to Pay (total annual sewer cost per single family equivalent as a % of median household income)

Over 3%	20 Points
Over 2% up to 3%	15 Points
Over 1% up to 2%	10 Points
1% and under	5 Points

• Local Burden (total project cost per equivalent residential tap)

Over \$5,000	20 Points
Over \$3,500	15 Points
Over \$2,000	10 Points
\$2,000 and under	5 Points

- Projects of any governmental agency that is under an enforcement action, as defined in 5 CCR 1002-51.5, will be assigned 10 points.
- Projects of any governmental agency that will result in a reduction in the discharge of pollutant(s) to a segment impaired for the relevant pollutant(s) will receive 10 points.
- Projects that implement the "Green Infrastructure / Sustainable Measures" will be assigned 5 points.

Grant funds cannot be used to reimburse for costs related to fees and/or penalties assessed by the WQCD.

Appendix G - Regulation 53 (53.4.(b and c)) authorizes the WQCD to provide assistance to governmental agencies that were not identified on the current years project eligibility list and yet still need to move ahead with a project or make adjustments in an emergency situation. The focus is on providing funds for project planning or for an emergency and then ensuring that those projects are identified on a subsequent approved IUP. This approach provides flexibility while preserving the credibility of the process.

c. Planning Grants

Upon receipt of the annual allocation, up to 10% percent of the appropriation may be reserved for planning grants. The intent of the planning grant is to assist DWWT grant applicants with costs associated with preparing a preliminary engineering report. Applications will be considered on a first come first service basis.

D. DOMESTIC WASTEWATER TREATMENT GRANT PROGRAM ACTIVITIES

The legislature allocated \$1.5 million to the DWWT Grant Program for FY 2006-2007. This has been the only appropriation to this fund since 2002. This fund did not receive an appropriation for 2009-2010. Appendix H is reserved for future DWWT appropriations. As provided for in Section 25-8-703(II) (2) C.R.S. the WQCD will utilize up to five (5) percent of the annual appropriation for administration and management. These funds may be used to support other Division programs and activities including, but not limited to, personal services and work performed through contracts or by temporary employees to develop and/or maintain information system infrastructure necessary for the WQCD to perform its overall duties.

E. DOMESTIC WASTEWATER TREATMENT GRANT PROGRAM GOALS

The goals for 2010 are listed below:

- 1. Throughout the year, the WQCD will work with eligible projects that are ready to proceed and assist communities with funding alternatives.
- 2. The 2010 IUP will be submitted to the WQCC for their approval at an Administrative Action Hearing.

III. PUBLIC REVIEW AND COMMENT

Each year, after public notice and comment period, the WQCC will hold an Administrative Hearing for approval of the IUP. After considering all pertinent comments, the WQCC shall approve the IUP and adopt additions and modifications to the project eligibility list no later than December 31 of each year.

The WQCC held the Administrative Hearing on December 14, 2009_at which time the State's 2010 WPCRF and DWWT Grant IUP was adopted. Each year, the IUP will be amended to include additional projects and the State will seek public review and comment.

During the annual project eligibility list survey process the WQCD contacted governmental agencies (including systems listed on the State's 2009 WPCRF and DWWT Project Eligibility List) to identify potential projects for the 2010 IUP.

IV. EMERGENCY PROCEDURES

The WQCC may amend the project eligibility list (Appendix B) at any time throughout the year to include wastewater treatment system projects that it determines and declares to be emergency projects needed to prevent or address threats to public health or environment. In cases where the WQCC determines the amendments will result in substantial changes to the project eligibility list, public notice and opportunity for comment on the proposed inclusion shall be provided.

APPENDIX A

COLORADO DEPARTMENT OF PUBLIC HEALTH AND ENVIRONMENT WATER QUALITY CONTROL COMMISSION REGULATION NO. 51

WATER POLLUTION CONTROL REVOLVING FUND RULES

5 CCR 1002-51

EMERGENCY	EFFECTIVE:	March 8, 1999 April 30, 1999 May 8, 2000 June 30, 2000 May 10, 2004 June 30, 2004 October 11, 2005 November 30, 2005 August 11, 2008 January 1, 2009 March 9, 2009
	AMENDED: EFFECTIVE:	March 9, 2009 March 9, 2009 April 30, 2009

DEPARTMENT OF PUBLIC HEALTH AND ENVIRONMENT

Water Quality Control Commission

5 CCR 1002-51

REGULATION NO. 51

WATER POLLUTION CONTROL REVOLVING FUND RULES

51.1 AUTHORITY AND PURPOSE OF THE WATER POLLUTION CONTROL REVOLVING FUND

The Water Pollution Control Revolving Fund ("WPCRF") was authorized by Congress in Title II and Title VI of the 1987 Amendments to the Clean Water Act ("Federal Act").

Senate Bill 50 (1988) authorized the State to participate in the WPCRF by amending the Colorado Water Resources and Power Development Authority Act, Title 37 of Article 95, C.R.S. ("Authority Act"); this allows the Colorado Water Resources and Power Development Authority ("Authority") to provide funds for the State's twenty percent match required by the Federal Act. §§ 37-95-103 and 37-95-107.6, C.R.S.

Sections 25-8-202 (1)(e) and (g), C.R.S., of the Colorado Water Quality Control Act ("State Act") also provides the Water Quality Control Commission ("Commission") and the Water Quality Control Division ("Division") with the authority to promulgate, implement, and administer this regulation.

The purpose of the WPCRF is to provide financial assistance to governmental agencies for the construction of any project as defined herein that appears on the Project Eligibility List included in the annual Intended Use Plan.

51.2 DEFINITIONS

See the State Act, the Authority Act, and the Federal Act for additional definitions.

- (1) "Beneficial Use" The use or reuse of treatment works effluent or the use of biosolids to act as a soil conditioner or low grade fertilizer for the promotion of vegetative growth on land. Also means a use of water, including the method of diversion, storage, transportation, treatment and application; that is reasonable and consistent with the public interest in the proper utilization of water.
- (2) "<u>Biosolids</u>" The accumulated residual product resulting from processing waste materials from a wastewater and water treatment plant.
- (3) "<u>Collection System</u>" A system of sewers used to collect wastewater and convey the wastewater by gravity or pressure flow to a common point.
- (4) "<u>Governmental Agencies</u>" Departments, divisions, or other units of state government, special districts, water conservation districts, metropolitan water districts, conservancy districts, irrigation districts (as approved by a district court to enter into a contract to accept funding for a wastewater related project under the WPCRF), municipal corporations, counties, cities and other political subdivisions, the United States or any agency thereof, and any agency commission or authority established pursuant to an interstate compact or agreement.
- (5) "<u>Green Infrastructure</u>" Natural or engineered systems such as green roofs, rain gardens, permeable pavement, and alternative energy (e.g., solar, wind, etc.) sources that provide energy for the operation of the wastewater treatment facility. Green infrastructure is management

approaches and technologies that utilize, enhance and/or mimic the natural hydrologic cycle processes of infiltration, evapotranspiration and reuse (as defined by EPA's "Action Strategy for Managing Wet Weather with Green Infrastructure" January 17, 2008).

- (6) "<u>Ground Waters</u>" Subsurface waters which are or can be brought to the surface of the ground or to surface waters through wells, springs, seeps, or other discharge areas.
- (7) "Interceptor Sewer" (Intercepting sewer) For purposes of this regulation, a sanitary sewer that receives flows from a number of collector sewers or outlets and transports such wastewater to a point for treatment or disposal.
- (8) "<u>Management Agency</u>" Any public agency designated for wastewater management responsibilities in a certified area wide Water Quality Management Plan prepared under Section 208 of the Federal Act. Such designation shall be considered final only upon the agency's acceptance of its responsibilities as outlined in the appropriate 208 plan.
- (9) "<u>Nonpoint Source ("NPS")</u>" A diffused pollution source that is not regulated as a point source, including but not limited to sources that are often associated with agriculture, inactive or abandoned mining, silviculture, urban runoff, or runoff from construction activities. NPS pollution does not emanate from a discernible, confined, and discrete conveyance (such as a single pipe) but generally results from land runoff, precipitation, atmospheric deposition, or percolation.
- (10) "<u>Nontraditional Project</u>" A project for which the primary purpose is other than water quality, but which has an additional purpose that is clearly related to the improvement or protection of water quality (e.g. the liner portion of a new landfill is intended to protect water quality).
- (11) "<u>NPS Project Implementation Plan</u>" A plan which describes proposed improvements to lessen a NPS pollution problem. At a minimum, the plan shall describe existing conditions, proposed improvements, anticipated benefits, project costs, financial arrangements and ongoing project maintenance and monitoring.
- (12) "<u>NPS Education Program</u>" A project which raises public awareness of a prevalent NPS problem and has a primary purpose including disseminating information to the public. As a minimum, a project description shall include a plan which describes the intent, proposed information for dissemination, project cost, financial arrangements and anticipated benefits.
- (13) "Point Source" Any discernible, confined, and discrete conveyance, including, but not limited to, any pipe, ditch, channel, tunnel, conduit, well, discrete fissure, container, rolling stock, concentrated animal feeding operation, or vessel or other floating craft, from which pollutants are or may be discharged. "Point source" does not include agricultural stormwater discharges and return flows from irrigated agriculture.
- (14) "<u>Pollution</u>" Activities or events that degrade the physical, chemical, biological, and radiological integrity of water.
- (15) "Project" A specific improvement to a water quality management system, phase or segment.
- (16) "<u>Project Eligibility List</u>" The list of projects eligible for financial assistance from the Authority through the WPCRF or its other funding capabilities, as adopted and modified in accordance with section 37-95-107.6(4).
- (17) "<u>Public Health Hazard</u>" Any contamination of ground or surface waters, caused by inadequate treatment works or disposal of inadequately treated sludge, which potentially endangers public health through contamination of drinking water supplies or direct public exposure. To qualify as a

public health hazard, the contamination must be documented by means of a sanitary survey or engineering report submitted by a governmental agency to the Division.

- (18) "<u>Refinance Project</u>" Refinancing of debt obligations for eligible projects where the initial debt was incurred and construction began after March 7, 1985.
- (19) "<u>Regional Project</u>" A water quality management system project that will combine and/or eliminate one or more existing treatment works or water quality management systems. An intergovernmental agreement or contract shall be signed or a resolution adopted by the project participants of the regional project.
- (20) "Sewage Sludge" Solid, semi-solid, or liquid residue generated during the treatment of domestic sewage in a treatment works. Sewage sludge includes, but is not limited to, domestic septage; scum or solids removed in wastewater treatment processes; and any material derived from sewage sludge. Sewage sludge does not include ash generated during the firing of sewage sludge in a sewage sludge incinerator or material generated from preliminary treatment of domestic sewage in a treatment works.
- (21) "Significant Non-Compliance" Violation of limits in a discharge permit, issued under section 402 of the Federal Act and/or Part 5 of the State Act to the extent that: any 2 or more exceedances of a non-toxic parameter which are 40% or more over the permit limit or 4 marginal violations (less than 40% over the permit limit) of the permit occur within a 6 month period. For toxic parameters, significant non-compliance is determined by 2 or more exceedances of a permit limit which are 20% or more over the limit or 4 marginal violations (less than 20% over the permit limit or 4 marginal violations (less than 20% over the permit limit) of the permit violations (less than 20% over the permit limit) of the permit within a 6 month period. Significant non-compliance is determined within the 12 month period prior to the time the Project Eligibility List is prepared.
- (22) "<u>Small Communities</u>" Identified specifically for funding from the WPCRF and State Construction Grants Programs, are defined as those governmental agencies with an existing population of not more than 5,000 persons.
- (23) "<u>State Waters</u>" Includes any and all surface and subsurface waters which are contained in or flow in or through this state, but does not include waters in sewage systems, waters in treatment works or disposal systems, waters in potable water distribution systems, and all water withdrawn for use until use and treatment have been completed.
- (24) "Sustainable Measures" Implementation of a management system approach that identifies, implements, measures, and improves energy efficiency and renewable opportunities for wastewater treatment facilities (EPA's "Energy Management Guidebook for Wastewater and Water Utilities" January 2008).
- (25) "<u>Traditional Project</u>" A project for which the primary purpose is water quality protection.
- (26) "Treatment Works" Any devices and systems used in the storage, treatment, recycling or reclamation of municipal sewage, sewage sludge, and biosolids, or industrial wastes of a liquid nature, or necessary to recycle or reuse water or biosolids, including intercepting sewers, outfall sewers, sewage collection systems, pumping, power, and other equipment; extensions, improvements, remodeling, additions, and alterations thereof; elements essential to provide a reliable recycled supply such as stand-by treatment units and clear well facilities; and any works, including site acquisition of the land that will be an integral part of the treatment process (including land used for the storage of treated wastewater in land treatment systems prior to land application) or is used for ultimate disposal of residues resulting from such treatment. In addition, treatment works means any other method or system for preventing, abating, reducing, storing, treating, separating, or disposing of domestic wastewater, including stormwater runoff, or industrial waste, or waste in combined stormwater and sanitary sewer systems.

- (27) "Water Conservation Project" Any structural or nonstructural water conservation measure that achieves a reduction in wastewater flow for a publicly-owned treatment works. Structural measures shall include but are not necessarily limited to: installation of interior low-flow plumbing fixtures which are distributed and/or installed by a governmental agency or which are funded in whole or in part by the governmental agency, and water meters which are funded and owned by the governmental agency. Nonstructural measures shall include but are not necessarily limited to: incentives for previously installed low-flow fixtures, leaking or I/I detection programs, public awareness, public education, and incentive wastewater and water service charges and treatment works effluent reuse.
- (28) "<u>Water Quality Management Plan</u>" The plan for managing the water quality, including consideration of the relationship of water quality to land and water resources and uses, on an areawide basis, for each planning area designated pursuant to sections 208(a) and 303(e) and 319 of the Federal Act.
- (29) "<u>Water Quality Management System</u>" Any treatment works or any other system for disposal of sewage, biosolids, and industrial waste, or NPS pollution control, stormwater protection, ground water protection and treatment operated by a governmental agency.
- (30) "<u>Water Quality Management System Phase or Segment</u>" Any portion of a water quality management system described in an approved planning document which can be identified as a contract, sub-item or subcontract. Completion of building of a system phase or segment may, but need not in and of itself, result in a complete system.
- (31) "<u>Watershed</u>" A geographical area in which activities may significantly impact a water body (or segment of concern) or an underlying aquifer. There are several considerations in defining the geographical scope of a watershed: hydrology, political boundaries, uses to be protected, nature of the water quality problem, manageability, available resources, and public interest.
- (32) "<u>Watershed Protection Approach</u>" An integrated, holistic strategy to protect or attain the desired beneficial uses within a watershed, including protection of human health and aquatic ecosystems.

51.3 INTENDED USE PLAN

- (1) The Division, in cooperation with the Division of Local Government (DLG) and the Authority, shall submit to EPA as part of its application for a capitalization grant an annual Intended Use Plan ("IUP"), which shall include the Project Eligibility List and information about how the State will assist communities with their water quality needs. The Division shall recommend the IUP to the Commission each year for final agency action after a public hearing, and shall also provide for public notice and an opportunity to comment in order to comply with the Federal Act.
- (2) The IUP shall include as a minimum:
 - (a) A list of projects for construction of publicly owned treatment works and projects/activities eligible for assistance under sections 319 and 320 of the Federal Act. This list must include the name of the community, permit number or other applicable enforceable requirement (if available), the type of financial assistance, and the projected amount of eligible assistance. (Permit numbers and other applicable enforceable requirements will be made available upon request);
 - (b) A description of the short and long-term goals of the State's WPCRF;
 - (c) Information on the types of activities, as opposed to project level details, to be supported by the WPCRF including the eligible cost categories, types of assistance to be provided

(e.g., loans, guarantees, insurance, etc.), terms of financial assistance, types of communities to be served by the fund, and administrative costs;

- (d) Assurances and specific proposals on how the State intends to meet the requirements of the Federal Act; and
- (e) The criteria and method established for the distribution of funds.

51.4 GENERAL POLICIES

- (1) The Commission will consider protection of public health and water quality when determining the Water Quality Management System projects eligible for WPCRF participation.
- (2) The Commission will maintain and improve water quality in the State by providing accessibility to the WPCRF.
- (3) The Commission will support traditional and nontraditional approaches to meet water quality needs.
- (4) The Commission will encourage regionalization of Water Quality Management Systems where practicable. It is the policy of the Commission to encourage good local planning within the concept of an Areawide Water Quality Management Plan. Projects shall conform to a stateapproved plan, (for example, Water Quality Management Plan, NPS Management Plan, etc.) as updated from time to time, or they may not be considered for assistance through the WPCRF.
- (5) The Commission and the State Board of Health will promote biosolids disposal methods for beneficial use as opposed to other sludge disposal methods. The Commission will also promote water conservation and reuse measures.
- (6) The Commission intends to identify projects for the Project Eligibility List that will address the long term water quality needs in Colorado.

51.5 <u>PROCEDURES FOR IDENTIFYING PROJECTS ESTABLISHING THE PROJECT ELIGIBILITY</u> <u>LIST, AND DISTRIBUTING FUNDS</u>

(1) Each year the Division shall (after consultation with interested persons and entities, including but not limited to the DLG, the Authority, designated regional water quality planning organizations, watershed planning organizations and Nonpoint Source Management interests) review, update, and compile a Project Eligibility List that contains a project description that will improve or benefit water quality which may include, but are not limited to, the following examples: Impact on public health; Impact on fish and wildlife; Impact on the ecosystem; Improving water quality to meet applicable standards for streams, lakes, and ground water; Protection of classified uses.

This Project Eligibility List shall be included in the IUP as Appendix A and, after a public notice and comment period, shall be presented to the Commission for final agency action after a public hearing.

- (2) The Project Eligibility List shall be comprised of six categories:
 - (a) Category 1 includes those projects that improve or benefit public health or that will remediate a public health hazard as defined in this regulation.
 - (b) Category 2 includes those projects that enable an entity to achieve permit compliance.

- (c) Category 3 includes those projects that contribute to the prevention of a public health hazard; enable an entity to maintain permit compliance; or enables an entity to address a possible future effluent limit or emerging issue.
- (d) Category 4 includes those projects that implement a watershed/nonpoint source management plan.
- (e) Category 5 includes those projects that implement a source water protection plan.
- (f) Category 6 includes those projects that seek funding only under the American Recovery and Reinvestment Act of 2009 and that were not already on the Project Eligibility List as of January 1, 2009. Categories 1-5 will be given consideration prior to funding of Category 6 projects.

Note: Eligibility List Categories are determined based on information provided by the applicant during the Annual Eligibility List Survey process. Based upon receipt and review of the Preliminary Engineering Report and a loan application, the assigned Eligibility List Category may be revised during the prioritization process to more accurately reflect the proposed project.

- (3) All loan projects shall submit applications by deadlines established in the annual IUP. If it is determined that the WPCRF lacks sufficient funds to cover loans for all eligible projects that are ready to proceed within the funding year, Category 1 projects will be funded prior to Category 2 projects, which will be funded prior to Category 3 projects, which will be funded prior to Category 4 projects, which will be funded prior to Category 5 projects, which will be funded prior to Category 6 projects until all funds are obligated. Within each category, the following criteria will be used to further prioritize the projects:
 - (a) Projects serving a small community. Population priority points will be assigned based on the following schedule:

Up to 1000 Population	20 Points
1,001 to 5,000 Population	15 Points
5,001 to 10,000 Population	10 Points
Over 10,000 Population	5 Points

- (b) Entities that have a greater financial need as outlined in the following procedures. Financial need is determined using a priority point system that ranks projects based on estimated monthly user charges as a percentage of median household income (Ability to Pay) and project cost per tap (Local Burden). The financial data used are from the most recently audited financial statements available to and interpreted by the DLG. Points are assigned based on the following criteria:
 - (i) Ability to pay (total annual sewer cost per single family equivalent as a % of median household income)

Over 3%	20 Points
Over 2% up to 3%	15 Points
Over 1% up to 2%	10 Points
1% and under	5 Points

(ii) Local burden (total project cost per equivalent residential tap)

Over \$5,000	20 Points
Over \$3,500	15 Points

Over \$2,000	10 Points
\$2,000 and under	5 Points

- (c) Projects of any governmental agency that is under an enforcement action and/or compliance schedule relating to water quality standards, as long as the enforcement action does not relate to administrative requirements of the program, will be assigned 10 points.
- (d) Projects of any governmental agency that will result in a reduction in the discharge of pollutant(s) to a segment impaired for the relevant pollutant(s) will receive 10 points.
- (e) Projects that implement the "Green Infrastructure/Sustainable Measures" will be assigned 5 points.
- (4) The rationale for funding projects in an order other than that shown shall be due to one or more of the following three reasons:
 - (a) Certain governmental agencies do not wish to participate in the WPCRF;
 - (b) Certain governmental agencies are not ready to proceed with the project; or
 - (c) Certain governmental agencies do not have the financial capability to repay a loan.
- (5) To be eligible to receive assistance from the WPCRF, governmental agencies must complete a planning document, identifying a specific project that is cost-effective, environmentally acceptable, and consistent with applicable local, state and federal regulations and guidelines. The Division will review those projects that environmental assessments and public participation requirements apply in accordance with the EPA-approved State Environmental Review Policy.
- (6) Eligible projects include: publicly owned treatment works, nonpoint source and stormwater control projects, water conservation projects, reuse and biosolids projects. However, funding for nontraditional projects shall be limited to that portion of the project that is related to water quality (e.g. the liner for a new landfill).
- (7) The Project Eligibility List will identify the governmental agency that will enter into the loan agreement and repay the loan. Before receiving WPCRF funding, the governmental agency must develop and/or maintain a user charge and fee system or other financial mechanism to ensure operation, maintenance and replacement needs are met and to ensure repayment of any WPCRF loan and existing debt. The WPCRF criteria for the financial capability review of applicants are included in the State/EPA Operating Agreement, which is available from the Division for review.
- (8) Each year, after a public notice and comment period, the Commission will schedule a public hearing for approval of the IUP. Each governmental agency on the proposed Project Eligibility List will receive notification of the hearing. After considering all pertinent comments, the Commission shall approve the IUP and adopt additions and modifications to the Project Eligibility List no later than December 31 of each year. The Division will establish a date each year for finalization of its proposal to the Commission for the IUP and Project Eligibility List. After that date, any requests for changes must be transmitted directly to the Commission.
- (9) The Commission may amend the Project Eligibility List at any time throughout the year to include wastewater treatment system projects that it determines and declares to be emergency projects needed to prevent or address threats to public health or environment. In cases where the Commission determines the amendments will result in substantial changes to the Project Eligibility List, public notice and opportunity for comment on the proposed inclusion shall be provided.

51.6 DISADVANTAGED COMMUNITIES PROCEDURES

Under the Federal Act, states are authorized to provide "loans at or below market interest rates, including interest free loans, at terms not to exceed 20 years." The following procedures describe the approval and amendment process for Colorado's annual IUP as it relates to the administration of its Disadvantaged Communities Program. The Division, Authority and the DLG may recommend Program changes based on actual program implementation and the results of periodic reviews conducted hereunder. The Division shall recommend the IUP to the Commission each year for final agency action after a public hearing, and shall also provide for public notice and an opportunity to comment in order to comply with the Federal Act.

- (1) The WPCRF may provide additional loan subsidies for governmental entities that are determined to be "disadvantaged." The definition/criteria of a disadvantaged community and the nature of the loan subsidies to be made available thereto shall be recommended for inclusion in the IUP by the Division and the Authority in consultation with the DLG.
- (2) While compiling projects on the Priority / Fundable List (utilizing the procedures listed in Section 51.5 above), the Division will identify the community projects that qualify for assistance under the Disadvantaged Communities Program in accordance with program definition/criteria.
- (3) The Division, the Authority and the DLG will conduct periodic reviews, as appropriate, of the Disadvantaged Communities Program. The reviews may result in recommended program changes relative to the nature of available subsidies to be incorporated into the IUP. In conducting such reviews and preparing recommendations, the following factors may be examined:
 - (a) The overall financial condition of the communities participating in the program, including but not limited to:
 - (i) The total utility system fee and tax burden upon rate payers;
 - (ii) Post project utility charges;
 - (iii) Utility indebtedness;
 - (iv) Median household income.
 - (b) The impact of the subsidy upon the continued financial viability of the WPCRF.
 - (c) The merit of utilizing all financial assistance options allowed under the Federal Act to finance water quality projects that protect public health and the environment.

51.7 - 51.19 <u>RESERVED</u>

51.20 STATEMENT OF BASIS AND PURPOSE

In accordance with the requirements of Sections 25-8-202(1)(e) and (g), 25-8-308(1)(d), and 25-8-703, C.R.S., the Commission adopts this Statement of Basis and Purpose.

These regulations will be used concurrently with the Construction Grant regulations, 5 CCR 1002-15, and will eventually replace them once the Grant Program has ended. The purpose of these new regulations is to bring the State into conformity with Title VI of the 1987 Clean Water Act Amendments. Title VI allows the State to establish a permanent Water Pollution Control Revolving Fund (WPCRF) to provide continuing sources of financing (except grants) needed to maintain water quality.

Since this is a water quality program, the priority list will still be developed by awarding points to governmental agencies discharging to "threatened" or "impaired" waters and severity of pollution as defined in the regulations. In addition, a subcategory has been included to promote regionalization and a new category has been developed for assigning points to projects based on financial need.

This program will allow the State to fund out of priority order and, once all enforceable requirements of the Act are met, the State will be allowed to fund nonpoint source and ground water projects as well.

Fiscal Impact Statement

The shift in the program from grants to loans will create more of a financial burden on local governments. The individual user charges and fee structures will have to be sufficient to operate and maintain their wastewater management systems as well as to repay any WPCRF loan, and existing debt.

The Authority through the WPCRF will provide loans below market interest rates which will benefit small communities. In some cases where a Governmental Agency would have to bond its share of a grant project, a low interest loan from the WPCRF for up to the entire amount of the eligible project would be less costly than the grant and bond combined.

The conversion from a grant program to a revolving fund program is mandated by Title VI of the Federal Act.

51.21 STATEMENT OF BASIS AND PURPOSE

In accordance with the requirements of Sections 25-8-202(1)(e) and (g), 25-8-308(1)(d), and 25-8-703, C.R.S., the Commission adopts this Statement of Basis and Purpose.

These regulations have been amended to meet the needs of the Water Pollution Control Revolving Fund (WPCRF) as it evolves. The majority of the changes are being recommended since significant issues surfaced during the first attempt at developing the WPCRF Priority List. These changes included: 1) Improvements to the water quality priority points, 2) revisions and clarification to the financial need points, 3) clarification to the eligibility list procedures, and 4) inclusion of the nonpoint source priority list procedures.

Because of the Involvement of the Division of Local Government (DLG) in performing the financial analyses of the Governmental Agencies as authorized by Senate Bill 50, the DLG will assist in the preparation of the point source priority list by assessing the points for financial need. DLG will use the most current monthly user charge information and the most recent data on median household income and persons per household. DLG will access information regarding total existing debt from the Governmental Agencies' annual audit. Additional documents and information referenced by DLG includes: construction cost estimates from the Division, the Colorado Municipal League "Water and Sewer Utility Charges in Colorado", and census data from the State Demographer's Office.

The nonpoint source revisions to the regulations allows funding of nonpoint source management programs, as defined by Section 319 of the Federal Clean Water Act, through the WPCRF.

Section 5.2.5 has been revised to create procedures and a priority system for nonpoint sources. The procedures (5.2.5.3) set forth the requirements for nonpoint source projects to be considered for funding and the methods for assigning priority points to projects interested in funding. The priority system (5.2.5.4) delineates ranking criteria and rating factors for comparing the relative priority of nonpoint sources, projects. The point system is based upon impacts to beneficial uses caused by nonpoint sources, potential for restoration of beneficial uses and reduction of severity of nonpoint sources. This system then emphasizes the severity of nonpoint source impacts and the ability of proposed improvements to restore water quality. The system also allows education programs to be considered for funding. These educational programs may be funded by the Commission if they present an opportunity to raise public

awareness of a prevalent nonpoint source problem area and these programs are weighted against the need for demonstration projects to advance the state of knowledge of best management practices.

The Colorado Nonpoint Source Task Force, an organization recognized in Colorado's nonpoint source management program, is identified as a review agency of the Division's yearly submittal of the Nonpoint Source Project Priority List. The Colorado Nonpoint Source Task Force is comprised of a broad spectrum of Governmental agencies and interest groups involved in and affected by nonpoint source decision making.

51.22 <u>STATEMENT OF BASIS, SPECIFIC STATUTORY AUTHORITY, AND PURPOSE (1989</u> <u>REVISIONS)</u>

The provisions of Sections 25-8-202(1)(e), and (g); 25-8-308(1)(d); and 37-95-107.6(4) C.R.S., provide the specific statutory authority for adoption of the attached regulatory amendments. The Commission also adopted, in compliance with Sections 24-4-103(4) C.R.S., the following Statement of Basis and Purpose.

BASIS AND PURPOSE

Section 5.2.2(4) is the definition for the use of the term "Equivalent Residential Taps (ERT'S)." The equation used to determine ERT'S has been revised to correctly state "Average Daily Organic Loading."

Section 5.2.4(7) of the regulation has been revised to clarify that point source wastewater treatment projects must complete facility planning requirements. The term "environmentally acceptable" relates to the Federal requirements of the national environmental policy act "NEPA", which requires that federally funded or assisted projects must be shown to have no adverse environmental impacts or that such impacts will be mitigated. An environmental review must be conducted for each wastewater treatment facility plan in order to meet Federal regulations.

Section 5.2.5.2(1)(B) has been revised to delete reference to tap restrictions as a condition for receiving severity of pollution points. The intent of the Commission is that any municipal wastewater treatment facility that is at or in excess of 95% of plant capacity be given priority points so that they can be considered for loan assistance. Tap restrictions are rarely imposed by a municipality or the Division and are not relevant to the assignment of priority points; therefore, the phrase "and is under a tap restriction" has been deleted. The terms "hydraulic" and organic capacity have been added to clarify that if a facility reaches 95% of either type of treatment capacity, the 20 points shall be assigned.

51.23 <u>STATEMENT OF BASIS, SPECIFIC STATUTORY AUTHORITY, AND PURPOSE (1990</u> <u>REVISIONS)</u>

The provisions of sections 25-8-202(1)(e), and (g); 25-8-308(1)(d); and 37-95-107.6(4) C.R.S., provide the specific statutory authority for adoption of the attached regulatory amendments. The Commission also adopted, in compliance with sections 24-4-103(4) C.R.S., the following statement of basis and purpose.

BASIS AND PURPOSE

Section 5.2.5.1(2) and 5.2.6(2) of the regulation has been revised to allow the division and the commission the flexibility to compile and adopt the priority and eligibility lists at anytime during the year with final action being completed by December 31. Currently, the process is initiated in April with approval by the commission at the August hearing. The eligibility list then goes to the legislature in January for joint resolution by April; therefore, the funding of projects is delayed by an entire year. This change will allow the process to be compatible with the legislation and reduce delays by 2-3 months.

Section 5.2.5.2(1)(b) has been changed from 95% of capacity to 80%. Since state law requires a community to start facilities planning when capacity is at 80%, this revision will allow those communities to receive priority points for financial assistance during the planning process.

Other changes in this regulation were due to typographical errors.

51.24 <u>STATEMENT OF BASIS, SPECIFIC STATUTORY AUTHORITY, AND PURPOSE (1991</u> <u>REVISIONS)</u>

The provisions of Sections 25-8-202(1)(e), and (g); 25-8-308 (1)(d); and 37-95-107.6(4) C.R.S. provide the specific statutory authority for adoption of the attached regulatory amendments. The Commission also adopted, in compliance with Sections 24-4-103(4) C.R.S., the following statement of basis and purpose.

BASIS AND PURPOSE

Many changes were incorporated into the point source priority system (5.2.5.2) to allow additional projects that are eligible under this program to receive funding. Categories were added for potential health hazards, facilities that are beyond the design life and in need of repair and sludge disposal. Categories for potential health hazards and facilities beyond the design life and in need of repair were added to assist communities in pollution prevention to limit initiation of compliance and enforcement measures. The sludge disposal category was added to assist communities with meeting State/EPA sludge management regulations.

The order of these categories was also changed to utilize one priority system for all state priority lists. This system will accommodate the State grant program, the Sewer Needs List for Division of Local Government Funding and any future federal grant program. New definitions were added to 5.2.2 for beneficial use, sludge, sludge disposal as a health hazard, potential health hazard, and refinance project. The point source priority system procedures (5.2.5.1) were revised to include a system for awarding points to projects requesting refinancing. Minor changes were also made to the nonpoint source priority point system (5.2.5.4) by replacing the word beneficial with the word classified. This change will provide more accuracy when describing Commission actions. The changes were made throughout the document with regards to nonpoint source information and will assist in differentiating between beneficial uses for sludge disposal and the new classified use for nonpoint source.

51.25 <u>STATEMENT OF BASIS, SPECIFIC STATUTORY AUTHORITY, AND PURPOSE (1992)</u> <u>REVISIONS</u>

The provisions of Sections 25-8-202(1)(e), and (g); 25-8-308 (1)(d); and 37-95-107.6(4) C.R.S. provide the specific statutory authority for adoption of the attached regulatory amendments. The Commission also adopted, in compliance with Sections 24-4-103(4) C.R.S., the following statement of basis and purpose.

BASIS AND PURPOSE

Proactive changes are incorporated into the WPCRF Rules which will allow (1) small communities to be eligible for funding without going through an extensive 201 facility planning process; and, (2) water conservation measures are being promoted by the State. A definition of water conservation projects is included in section 5.2.2, as well as a point system category in section 5.2.5.2. The change allowing feasibility studies for small communities is located in 5.2.6 "Eligibility List Procedures."

Assignment of points for interceptor projects is changed to the governmental agency responsible for the interceptor since repair work is now eligible and the receiving plant may not have a severity of pollution problem. This will also direct the financial capability and loan agreement to the appropriate agency.

51.26 <u>STATEMENT OF BASIS, SPECIFIC STATUTORY AUTHORITY, AND PURPOSE (1993)</u> <u>REVISIONS</u>

The provisions of Sections 25-8-202(1)(e), and (g); 25-8-308 (1)(d); and 37-95-107.6(4) C.R.S. provide the specific statutory authority for adoption of the attached regulatory amendments. The Commission also adopted, in compliance with Sections 24-4-103(4) C.R.S., the following statement of basis and purpose.

BASIS AND PURPOSE

The WPCRF rules that were adopted in October, 1992 are revised to correct three typographical errors on page 1, 11 and 22.

The definition of "small communities" 5.2.2 (28) has been expanded to clarify that for all intents and purposes a small community is under 10,000 existing population. The exception is funds from the State Grant or Feasibility Studies Programs are only awarded to small communities under 5,000 existing population.

5.2.4(8) was reworded for clarification.

5.2.6(3) was rewritten for simplification but did not change the content.

51.27 <u>STATEMENT OF BASIS, SPECIFIC STATUTORY AUTHORITY, AND PURPOSE (1997</u> <u>REVISIONS)</u>

The provisions of sections 25-8-202(1)(e), and (g); 25-8-308 (1)(d); and 37-95-107.6(4) C.R.S. provide the specific statutory authority for adoption of the attached regulatory amendments. The Commission also adopted, in compliance with section 24-4-103(4) C.R.S., the following statement of basis and purpose.

BASIS AND PURPOSE

The Federal Clean Water Act and the Environmental Protection Agency have authorized flexibility to state revolving fund programs by encouraging states to fund expandable uses and integrate other water quality eligibilities into their priority systems and plans for distributing funds. The Water Quality Control Commission authorized a critical review team to review and propose revisions to the existing Water Pollution Control Revolving Fund (WPCRF) Rules 5.2.0 (5 CCR 1002-21) to assist communities that are proactive with compliance issues and encourage pollution prevention. With these broad directions in place, the Interim WPCRF Rules with expanded eligibilities were proposed.

The existing WPCRF Rules have separate priority ranking systems for point source (wastewater projects defined by Section 212 of the Federal Act) and nonpoint source projects. The nonpoint source priority system has not been utilized since 1992. The point source priority system required points to be compiled for each project; first for severity of pollution problems, then for quality of receiving waters, financial need, regionalization, water conservation and beneficial use.

The Interim WPCRF Rules provide for a list of all projects that improve or benefit water quality with emphasis on public health, and proactive and long range planning of water quality approaches and/or pollution prevention methods. A more detailed prioritization will be assembled if there is a shortage of funds available.

This interim rule provides two major benefits:

Even though traditional wastewater projects are still a priority and will be identified as such, this rule will allow communities to receive low interest loans for other water quality concerns in their area, such as: stormwater, biosolids, water reuse, landfills, etc.

The effort of compiling the project list will be more strategic with planning and watershed efforts, more accurate with addressing actual water quality needs, less subjective and less resource intensive as far as collecting data to prioritize each project (which would be very difficult with such diverse types of projects).

In subsection (a) of section 5.2.9(6), Procedures for Identifying Projects and Establishing the Project Eligibility List, the Commission has included broader language regarding consultation than appears in the existing rule. The purpose of this language is to further strengthen the WPCRF program by broadening community involvement. The Commission is hopeful that this will result in more timely and accurate needs assessment information, improved coordination between different funding sources, and ongoing feedback on the WPCRF program.

The critical review team recommended that the Commission adopt an interim rule to assess the outcome of such a radical change in prioritizing water quality projects in Colorado before permanently changing this regulation. Therefore, this rulemaking has not repealed the existing regulatory provisions, but rather provides that the new Interim Rules will apply for purposes of developing a FY98 Intended Use Plan. It is anticipated that this Interim WPCRF Rule will be reviewed in an informational hearing in November, 1997, to receive input on the operation of the Interim Rules and whether they should be modified, repealed, or made permanent.

51.28 <u>STATEMENT OF BASIS, SPECIFIC STATUTORY AUTHORITY AND PURPOSE; JULY, 1997</u> <u>RULEMAKING</u>

The provisions of sections 25-8-202 and 25-8-401, C.R.S., provide the specific statutory authority for adoption of the attached regulatory amendments. The Commission also adopted, in compliance with section 24-4-103(4) C.R.S., the following statement of basis and purpose.

BASIS AND PURPOSE

The Commission has adopted a revised numbering system for this regulation, as a part of an overall renumbering of all Water Quality Control Commission rules and regulations. The goals of the renumbering are: (1) to achieve a more logical organization and numbering of the regulations, with a system that provides flexibility for future modifications, and (2) to make the Commissions internal numbering system and that of the Colorado Code of Regulations (CCR) consistent. The CCR references for the regulations will also be revised as a result of this hearing.

51.29 <u>STATEMENT OF BASIS, SPECIFIC STATUTORY AUTHORITY AND PURPOSE; APRIL, 1998</u> <u>RULEMAKING</u>

The provisions of Sections 25-8-202(1)(e), and (g); 25-8-308 (1)(d); and 37-95-107.6(4) C.R.S. provide the specific statutory authority for adoption of the attached regulatory amendments. The Commission also adopted, in compliance with Sections 24-4-103(4) C.R.S., the following statement of basis and purpose.

BASIS AND PURPOSE

The Commission has determined the Interim Rules For FY98 Intended Use Plan (51.11) shall be extended to the FY99 Intended Use Plan (IUP). The Critical Review Team and the Water Quality Control Division has not yet been able to assess the benefit of the new system for identifying water quality projects; it would therefore be premature to adopt permanent revisions to the prioritization system at this time. The watershed efforts now being implemented by the Division as part of the process for identifying projects should be better utilized in the FY99 IUP.

It is anticipated that the Interim WPCRF Rules will be reviewed and the system for identifying eligible projects be assessed by the Critical Review Team prior to August, 1998. The Commission may then decide to schedule a Rulemaking Hearing in January, 1999 to determine whether the Rules should be modified, repealed or made permanent.

51.30 <u>STATEMENT OF BASIS, SPECIFIC STATUTORY AUTHORITY AND PURPOSE; February,</u> <u>1999 RULEMAKING</u>

The provisions of Sections 25-8-202(1)(e), and (g); 25-8-308 (1)(d); and 37-95-107.6(4) C.R.S. provide the specific statutory authority for adoption of the attached regulatory amendments. The Commission also adopted, in compliance with Sections 24-4-103(4) C.R.S., the following statement of basis and purpose.

BASIS AND PURPOSE

The Federal Clean Water Act and the Environmental Protection Agency have authorized flexibility to state revolving fund programs by encouraging states to fund expandable uses and integrate other water quality eligibilities into the Intended Use Plans. The Water Quality Control Commission authorized a critical review team to review and propose revisions to the existing Water Pollution Control Revolving Fund (WPCRF) Rules, No. 51 (5 CCR 1002-51) to assist communities that are proactive with compliance issues and encourage pollution prevention. The Interim WPCRF Rules with expanded eligibilities were adopted as a pilot to be tested on the 1998 and 1999 Intended Use Plan (IUP), project and eligibility lists.

The previous WPCRF Rules have been deleted and the Interim WPCRF Rules are now final with a few changes. Definitions for Traditional and Nontraditional projects have been added as recommended by EPA; a new policy has been added to encourage nontraditional projects as well as traditional projects to meet water quality needs; a description of eligible projects was included; a deadline for the Division to finalize the IUP will be publicized early in the process and any subsequent changes from communities will have to be requested directly to the Commission; the project categories and the subcriteria for further prioritization in case there is a lack of funds have all been grouped together in one area of the rules; and the priority for small communities has been deleted since it is already considered by the Division of Local Government when determining financial need.

The WPCRF Rules provide for a list of all projects that improve or benefit water quality with emphasis on public health, and proactive and long range planning of water quality approaches and/or pollution prevention methods.

This rule provides two major benefits:

- 1. Even though traditional wastewater projects are still a priority and will be identified as such, this rule will allow communities to receive low interest loans for other water quality concerns in their area, such as projects relating to: stormwater, biosolids, water reuse, ground water quality, etc.
- 2. The effort of compiling the project list will be more strategic with planning and watershed efforts, more accurate with addressing actual water quality needs, less subjective and less resource intensive as far as collecting data to prioritize each project (which would be very difficult with such diverse types of projects).

A representative from the Denver Regional Council of Governments requested that the Commission broaden the definition of "governmental agencies" to include unincorporated associations and other entities recognized in water quality management plans. The Commission chose to conform the definition in this regulation to the terminology in the Colorado Water Resources and Power Development Authority Act, Title 37, Article 95, C.R.S., since that statute determines which entities qualify for funding under this program. To change which entities can receive funding would require a statutory change by the Colorado General Assembly. In the absence of any such change, the Commission notes that creative options are

available under the current definition to the extent that multiple entities that qualify as "government agencies" choose to work cooperatively on a project.

51.31 <u>STATEMENT OF BASIS, SPECIFIC STATUTORY AUTHORITY AND PURPOSE; May, 2000</u> <u>RULEMAKING</u>

The provisions of Sections 25-8-202(1)(e) and (g); 25-8-308 (1)(d); and 37-95-107.6(4) C.R.S. provide the specific statutory authority for adoption of the attached regulatory amendments. The Commission also adopted, in compliance with Section 24-4-103(4) C.R.S., the following statement of basis and purpose.

BASIS AND PURPOSE

These regulations were amended to simplify the Water Pollution Control Revolving Fund (WPCRF) Intended Use Plan process along with some minor editing. The Intended Use Plan previously contained two lists. The Project List identified all projects including long term needs. The Project Eligibility List contained projects extracted from the Project List that had prepared or anticipated preparing a facility plan during the funding year. Based on recommendations from stakeholders, the two lists were combined into one Project Eligibility List. Additions and modifications to this list will be submitted to the legislature each year for approval.

The Drinking Water Revolving Fund (DWRF) Intended Use Plan also contains a comprehensive Project Eligibility List that identifies all projects, including long term needs. Additions and modifications to the Project Eligibility List are submitted to the legislature each year; this approach has been very successful.

The Water Quality Control Division requested the change to the WPCRF process to be consistent with the DWRF. This simplified approach will alleviate several problems. Having a similar format for both the WPCRF and DWRF Intended Use Plans will make the processes easier for program personnel and communities to understand. Compressing the process to one list will also alleviate the possibility of potential data transfer errors. Finally, by submitting a comprehensive list of projects for legislative approval, projects that were not ready to proceed during the funding year, but later become ready for funding, will not have to wait until the next legislative session.

51.32 <u>STATEMENT OF BASIS, SPECIFIC STATUTORY AUTHORITY, AND PURPOSE (MAY 2004</u> <u>RULEMAKING)</u>

Sections 25-8-202(1)(e) and (g); 25-8-308 (1)(d); and 37-95-107.6(4), C.R.S. provide the specific statutory authority for adoption of the attached regulatory amendments. The Commission also adopted, in compliance with section 24-4-103(4), C.R.S., the following statement of basis and purpose.

BASIS AND PURPOSE

Recent statutory amendments necessitated changes to the Water Pollution Control Revolving Fund (WPCRF) Rules, Regulation No. 51. The Division and the Attorney General's Office took this rulemaking opportunity to reexamine the regulation for consistency with federal requirements. The Attorney General's Office, along with the Division and a stakeholders group, also discussed options to simplify the process for the Commission's annual approval of the "Intended Use Plan."

In order to accomplish these objectives, the Commission made the following changes to Regulation No. 51:

Section 51.3 - This section was amended to specifically include the federal requirements for developing the annual Intended Use Plan. The section (along with section 51.5(8)) was also amended to make the process for annual changes to the Intended Use Plan more flexible by authorizing the Commission to approve of the Plan in a public forum after a public notice and comment period, while deleting the requirement for a rulemaking process.

Section 51.5(2) - Category 1 and 2 were explained further to assist staff in categorizing projects on the Project Eligibility List.

Section 51.5(3) - Language was added to specify that applications for leveraged loan projects must be submitted by a deadline established in the Intended Use Plan. This process allows staff to prioritize projects when the WPCRF lacks sufficient funds to provide loans to all eligible applicants ready to proceed.

Section 51.5(9) - This provision was included to reflect recent amendments to the Colorado Water Resources and Power Development Authority Act that allow emergency projects to be added to the Project Eligibility List for funding throughout the year with approval by the Commission.

51.33 <u>STATEMENT OF BASIS, SPECIFIC STATUTORY AUTHORITY, AND PURPOSE (OCTOBER</u> 2005 RULEMAKING, EFFECTIVE NOVEMBER 30, 2005)

Sections 25-8-202(1)(e) and (g); 25-8-308 (1)(d); and 37-95-107.6(4), C.R.S. provide the specific statutory authority for adoption of the attached regulatory amendments. The Commission also adopted, in compliance with section 24-4-103(4), C.R.S., the following statement of basis and purpose.

BASIS AND PURPOSE

Under the Clean Water Act, States are authorized to provide "loans at or below market interest rates, including interest free loans, at terms not to exceed 20 years." These regulations have been amended to include Section 51.6 that allows for a Disadvantage Community Loan program. The section also outlines the procedures that will be used during the approval and amendment process of Colorado's annual IUP as it relates to the administration of its Disadvantaged Communities Program. The Division, Authority and the Division of Local Government worked with a stakeholders group to identify eligibility criteria that is outlined in the annual IUP. This program is being implemented in response to the growing needs of small community systems faced with implementing water quality infrastructure projects.

51.34 <u>STATEMENT OF BASIS, SPECIFIC STATUTORY AUTHORITY, AND PURPOSE (JULY 2008</u> <u>RULEMAKING, EFFECTIVE JANUARY 1, 2009</u>)

Sections 25-8-202(1)(e) and (g); 25-8-308 (1)(d); and 37-95-107.6(4), C.R.S. provide the specific statutory authority for adoption of the attached regulatory amendments. The Commission also adopted, in compliance with section 24-4-103(4), C.R.S., the following statement of basis and purpose.

BASIS AND PURPOSE

Federal funding for Water Pollution Control Revolving Loan Fund has been significantly reduced over the last 5 years. This reduction in federal funds has resulted in limited loan capacity available for Colorado's wastewater treatment projects. In order to assure that the limited loan funds are directed to projects that have the most environmental and public health benefits, this rule has been revised to replace the current three-category system.

This proposed categorization system is anticipated to provide greater discrimination among the projects than the existing categorization system. In addition, the Rules have been revised to include changes to the prioritization point system that will be used to rank projects within each category. The categories will still dictate what types of projects will be funded before others. However, the revisions to the Rules expand the prioritization point scheme to encompass more projects with a potential environmental benefit. Points will be provided to communities based on their population and financial need, whether the facility is currently under an enforcement action, whether the project will reduce the discharge of pollutant(s) to a segment impaired for the relevant pollutant(s), and/or whether the project will implement green infrastructure/sustainable measures technology and/or practices.

The Division has sought input from an internal stakeholders' group comprised of Division staff from the permitting (surface water, ground water, stormwater), enforcement, non-point source, source water protection, and total maximum daily load programs. Input was also sought from the DLG, the Authority and the Wastewater Utility Council.

51.35 FINDINGS IN SUPPORT OF EMERGENCY REVISIONS TO REGULATION #51, WATER POLLUTION CONTROL REVOLVING FUND RULES [5 CCR 1002-51] (MARCH 9, 2009)

The Commission conducted this rulemaking hearing to add a sixth category of projects for inclusion on the Water Pollution Control Revolving Fund Project Eligibility List. The addition of this category will ensure that Colorado will be able to use all funds that may become available under the American Recovery and Reinvestment Act of 2009 (ARRA). Projects added to the existing 2009 Project Eligibility list will receive funding only if necessary to fully utilize existing loan capacity and new federal funding that may become available in 2009. Consistent with the existing structure for prioritization, Category 6 projects will only be considered for funding after all other projects designated under Categories 1-5 have been given an opportunity to proceed. Category 6 projects will be subject to the eligibility requirements and intra-category ranking system outlined in Section 51.5 of this regulation.

The Commission intends that terms and conditions specific to the administration of grant monies received under the ARRA will be memorialized in an addendum to the 2009 Water Pollution Control Revolving Fund and State Domestic Wastewater Treatment Grant Intended Use Plan (IUP). Such terms and conditions may include additional criteria for funding eligibility and priority ranking to comply with the requirements of the ARRA and to maintain consistency with EPA's final ARRA guidance document. Interim deadlines or milestones to ensure that projects are proceeding expeditiously to meet the 12-month deadline in the ARRA may also be included in the IUP Addendum. To the extent that any of the terms and conditions in the IUP Addendum may differ from the original 2009 IUP or these Regulations, the Commission intends that the provisions of the IUP Addendum will govern with respect to the details of administering ARRA funds among the six funding categories. The Commission will utilize its administrative action hearing process, including opportunity for public review and comment, for approval of any IUP Addendum(s) as developed by the Water Quality Control Division, the Division of Local Affairs, and the Colorado Water Resources and Power Development Authority, consistent with Section 606(c) of the federal Clean Water Act.

The Commission adopted these revisions on an emergency basis, with the intent that such revisions become effective immediately. The Commission found that immediate adoption of these revisions to Regulation #51 is imperatively necessary to preserve public health, safety or welfare and that compliance with the requirements of section 24-4-103, C.R.S. would be contrary to the public interest.

The Commission found that immediate effectiveness of these regulatory revisions was necessary to ensure timely addition of new projects to the Project Eligibility List contained within the 2009 IUP. To that end, the Commission conducted an administrative action hearing immediately after the Regulation #51 rulemaking hearing for the purpose of considering appropriate additions to the IUP (in the form of an addendum) and addition of specific projects to the Project Eligibility List contained in the IUP. The Commission determined that the projects added to the Project Eligibility List are emergency projects needed to prevent or address threats to public health or the environment. The Commission intends that the revised Project Eligibility List be submitted to the General Assembly for action by the April 1, 2009 statutory approval deadline.

51.36 <u>STATEMENT OF BASIS, SPECIFIC STATUTORY AUTHORITY, AND PURPOSE (MARCH 9,</u> 2009 RULEMAKING, EFFECTIVE APRIL 30, 2009)

Sections 25-8-202(1)(e) and (g); and Section 37-95-107.6(4), C.R.S. provide the specific statutory authority for adoption of the attached regulatory amendments. The Commission also adopted, in compliance with section 24-4-103(4), C.R.S., the following statement of basis and purpose.

BASIS AND PURPOSE

The Commission conducted this rulemaking hearing to add a sixth category of projects for inclusion on the Water Pollution Control Revolving Fund Project Eligibility List. The addition of this category will ensure that Colorado will be able to use all funds that may become available under the American Reinvestment and Recovery Act of 2009 (ARRA). Projects added to the existing 2009 Project Eligibility list will receive funding only if necessary to fully utilize existing loan capacity and new federal funding that may become available in 2009. Consistent with the existing structure for prioritization, Category 6 projects will only be considered for funding after all other projects designated under Categories 1-5 have been given an opportunity to proceed. Category 6 projects will be subject to the eligibility requirements and intra-category ranking system outlined in Section 51.5 of this regulation.

The Commission intends that terms and conditions specific to the administration of grant monies received under the ARRA will be memorialized in an addendum to the 2009 Water Pollution Control Revolving Fund and State Domestic Wastewater Treatment Grant Intended Use Plan (IUP). Such terms and conditions may include additional criteria for funding eligibility and priority ranking to comply with the requirements of the ARRA and to maintain consistency with EPA's final ARRA guidance document. Interim deadlines or milestones to ensure that projects are proceeding expeditiously to meet the 12-month deadline in the ARRA may also be included in the IUP Addendum. To the extent that any of the terms and conditions in the IUP Addendum may differ from the original 2009 IUP or these Regulations, the Commission intends that the provisions of the IUP Addendum will govern with respect to the details of administering ARRA funds among the six funding categories. The Commission will utilize its administrative action hearing process, including opportunity for public review and comment, for approval of any IUP Addendum(s) as developed by the Water Quality Control Division, the Division of Local Affairs, and the Colorado Water Resources and Power Development Authority, consistent with Section 606(c) of the federal Clean Water Act.

The Commission adopted these revisions on both an emergency and permanent basis, with the intent that the permanent amendments become effective April 30, 2009.

Borrower Abbreviations Clarification:

GID = General Improvement District LID = Local Improvement District MD = Metropolitan District SD = Sanitation District S&WD = Sanitation & Water District WWA = Wastewater Authority W&SD = Water and Sanitation District WWRD = Wastewater Reclamation District

Type of Loan

LL = Leveraged Loan - Funded, in part, from bond proceeds

- DL = Direct Loan Funded from available sources: (1) Authority state funds, (2) Grant Funds or (3) Reloan funds.
- DC = Disadvantage Communities Direct Loans = Funded from available sources: (1) Authority state funds, (2) Grant Funds or (3) Reloan Funds
- In 1999, the WPCRF program began funding all direct loans and some leveraged loans with Reloan Monies.

Explanation of CW SRF Loan Funding and/or Subsidization

- (a) CW SRF Funds = Clean Water State Revolving Fund Received from EPA Capitalization Grant Awards
- (b) State Match Funds = (Required 20% match for Each Dollar Received From EPA Grants from State Funds) Provided Mainly from Authority Funds

(c) Reloan Monies = Recycled CW SRF funds - No State Match Required

Notes / Comments:

* Totals may not reconcile because some loans used both reloan and federal funds.

(a) Loan was defeased before any project funds were requisitioned, thus no federal funds were liquidated. However, state match provided remained in the program.

* fka: Pagosa Springs SD ~ fka: Roxborough Park Metropolitan District

** fka: Bayfield Sanitation District

^ fka: Breckenridge Sanitation District

> Fiscal Year 2010	\$	6,000,000	\$	1,000,000	\$	(2,250,000)	\$	(3,800,000)	\$	(3,000,000)	\$	(1,160,000)	\$ 3,982,004

a) Prior to 2005, the 20% state match required for federal funds drawn for grant administrative expenses was provided directly from funds in the administrative fee account at the time of the draw. In 2005 and 2006, the state match for each grant administration expense draw was transferred to the administrative fee account from the Authority account that is restricted for such purpose. Beginning in 2007, the state match requirement for the total amount of grant funds allocated for grant administration from each grant is transferred, when the grant is awarded, to the program's reloan account directly from the Authority account that is restricted for such purpose.

(b) State Surcharge source: In 1999 and in 2001, administrative fee account funds were used to call state match bonds issued in 1989, 1990, and 1991 to provide the required state match. The borrowers continued to pay this portion of their loan repayment as scheduled which was then reimbursed to the administrative fee account. As a result of this investment, the administrative fee account earned a very attractive interest rate varying between 4.80% - 7.30%. Final payment of state surcharge from the borrowers occurred in 2006.

(c) Advanced Admin Fee source: This source of funds is received at the closing of the issuance of refunding bonds to cover the cost of current and future administration of refunding bond issues.

(d) Beginning in 2008, certain DWRF grant administrative costs incurred by the Authority are being paid from funds transferred from the WPCRF administrative fee account.

REGULATION NO. 53

DOMESTIC WASTEWATER TREATMENT GRANT FUNDING SYSTEM

AMENDED:October 13, 1998EFFECTIVE:November 30, 1998AMENDED:November 8, 1999EFFECTIVE:December 30, 1999AMENDED:November 13, 2001EFFECTIVE:December 30, 2001AMENDED:May 10, 2004EFFECTIVE:June 30, 2004AMENDED:August 11, 2008EFFECTIVE:January 1, 2009

DEPARTMENT OF PUBLIC HEALTH AND ENVIRONMENT

Water Quality Control Commission

5 CCR 1002-53

REGULATION NO. 53

DOMESTIC WASTEWATER TREATMENT GRANT FUNDING SYSTEM

53.1 <u>AUTHORITY</u>

Section 25-8-202(1) (e) and (g), C.R.S., and section 25-8-703, C.R.S., as amended, of the Colorado Water Quality Control Act provide authority for this regulation.

53.2 PURPOSE

The purpose of the Domestic Wastewater Treatment (DWWT) Grant Program is to provide financial assistance to governmental agencies as well as to counties representing unincorporated areas for planning, design and construction of eligible DWWT projects serving a population of not more than 5,000 persons. This grant is not intended to reimburse DWWT grant recipients for any fees or penalties assessed by the Water Quality Control Division (Division).

The funding system is intended to identify those governmental agencies with wastewater treatment problems and financial needs and to allocate funds for the most beneficial program of public health protection and water quality improvement.

53.3 **DEFINITIONS**

See the Colorado Water Quality Control Act and the Water Pollution Control Revolving Fund (WPCRF) Rules (Regulation #51) for additional definitions.

- (1) "<u>Domestic Wastewater</u>" A combination of liquid wastes which may include chemicals, household wastes, human excreta, animal or vegetable matter in suspension or solution.
- (2) "<u>Governmental Agency</u>" Any regional commission, county (or county on behalf of unincorporated areas), metropolitan district offering sanitation service, sanitation district, water and sanitation district, water conservancy district, metropolitan sewage disposal district, other special district used for funding a domestic wastewater treatment works project, service authority, city and county, city, or town.
- (3) "<u>Management Agency</u>" Any governmental agency appropriately designated by the Governor for wastewater management responsibilities in a certified area wide Water Quality Management Plan prepared under Section 208 of the federal Clean Water Act.
- (4) "<u>Pollution</u>" Activities or events that degrade the physical, chemical, biological, and radiological integrity of water.
- (5) "<u>Project</u>" A new wastewater treatment system or a specific improvement to an existing wastewater treatment system, phase or segment.
- (6) <u>"Public Health Hazard"</u> Any contamination of ground or surface waters, caused by inadequate treatment works or disposal of inadequately treated sludge, which potentially endangers public health through contamination of drinking water supplies or direct public exposure. To qualify as a

public health hazard, the contamination must be documented by means of a sanitary survey or engineering report submitted by a governmental agency to the Division.

- (7) "Significant Non-Compliance" Violation of limits in a discharge permit, issued under section 402 of the federal Act and/or Part 5 of the state Act to the extent that: any 2 or more exceedances of a non-toxic parameter which are 40% or more over the permit limit or 4 marginal violations (less than 40% over the permit limit) of the permit occur within a 6 month period. For toxic parameters, significant non-compliance is determined by 2 or more exceedances of a permit limit which are 20% or more over the limit or 4 marginal violations (less than 20% over the permit limit or 4 marginal violations (less than 20% over the permit limit) of the permit within a 6 month period. Significant non-compliance is determined within the 12 month period prior to the time the Project Eligibility List is prepared.
- (8) "<u>Small Community</u>" A governmental agency and counties representing unincorporated areas with an existing population of not more than 5,000 persons or an unincorporated area (represented by its county) existing on January 1, 2001 that serve populations of not more than five thousand persons.
- (9) "<u>Treatment System</u>" Any devices and systems used in storing, treating, neutralizing, stabilizing, disposing, recycling or reclamation of domestic wastewater and biosolids; the term also includes appurtenances such as intercepting sewers, outfall sewers, sewage collection systems, pumping, power, and other equipment, extensions, improvements, remodeling, additions, and alterations thereof.

53.4 PROJECT IDENTIFICATION PROCEDURES

- (1) Each year that funds are appropriated, the Water Quality Control Commission (Commission) will schedule a hearing for public review and comment on the grant fund Intended Use Plan (IUP) that will include a list of eligible DWWT projects, a description of the use of the funds from the previous year and the intended use of the funds for the current year. Governmental agencies that are included in the IUP will be notified of the public hearing. After a public notice and comment period, the Commission shall approve the IUP at a public hearing by December 31 of each year.
- (2) In formulating and revising the IUP each year, the Division shall:
 - a. Utilize the current WPCRF Project Eligibility List to select potential projects that serve a population of not more than 5,000 persons and are eligible to receive DWWT grants. One of the following categories will be assigned to each project listed:

<u>Category 1</u> includes those projects that improve or benefit public health or that will remediate a public health hazard as defined in this regulation.

<u>Category 2</u> includes those projects that enable an entity to achieve permit compliance.

<u>Category 3</u> includes those projects that contribute to the prevention of a public health hazard; enables an entity to maintain permit compliance; or enables an entity to address a possible future effluent limit or emerging issue.

Note: Nonpoint source, storm water and source water protection projects are not eligible for DWWT grant funding. Eligibility List Categories are determined based on information provided by the applicant during the Annual Eligibility List Survey process. Based upon receipt and review of the Preliminary Engineering Report and a grant application, the assigned Eligibility List Category may be revised during the prioritization process to more accurately reflect the proposed project.

b. Provide a status on how the funds were actually utilized from the previous year.

- c. Provide a description of how the funds are anticipated to be expended during the current year.
- (3) Throughout the funding year, the Division may provide assistance:
 - a. To projects listed in the Project Eligibility List that are ready to proceed;
 - b. In the form of a planning grant from the DWWT Grant Program to eligible projects listed in the Project Eligibility List, when the governmental agency notifies the Division that it is ready to proceed with its facility plan.
 - c. To an eligible governmental agency that is not identified in the Project Eligibility List when there is an unforeseen emergency situation.
 - d. Grant funds cannot be used to reimburse for costs related to fees and/or penalties assessed by the Division.

Under c above, the governmental agency will then be included on a subsequent Project Eligibility List for the Commission's approval.

53.5 FUNDING CRITERIA

Funding is dependent upon appropriations from the State Legislature and will be provided for planning, design and/or construction to eligible projects. Funding for a project will be provided when:

- (1) The governmental agency's project is identified in the Project Eligibility List approved by the Commission or can be added to the Project Eligibility List in conformance with section 53.4(3) above;
- (2) The governmental agency submits an application by the deadline established in the annual IUP;
- (3) The Division obtains a certificate of financial need issued by the Division of Local Government (DLG); and
- (4) Funds are available. If it is determined that the DWWT Grant Program lacks sufficient funds to cover grants for all eligible projects that are ready to proceed within the funding year, Category 1 projects will be funded prior to Category 2 projects, which will be funded prior to Category 3 projects. Within each category, the following criteria will be used to further prioritize the projects:
 - (a) Projects serving a small community. Population priority points will be assigned based on the following schedule:

Up to 1000 Population	20 Points
1,001 to 5,000 Population	15 Points

- (b) Entities that have a greater financial need as outlined in the following procedures. Financial need is determined using a priority point system that ranks projects based on estimated monthly user charges as a percentage of median household income (Ability to Pay) and project cost per tap (Local Burden). The financial data used are from the most recently audited financial statements available to and interpreted by the DLG. Points are assigned based on the following criteria:
 - (i) Ability to pay (total annual sewer cost per single family equivalent as a % of median household income)

Over 3%	20 Points
Over 2% up to 3%	15 Points
Over 1% up to 2%	10 Points
1% and under	5 Points

(ii) Local burden (total project cost per equivalent residential tap)

Over \$5,000	20 Points
Over \$3,500	15 Points
Over \$2,000	10 Points
\$2,000 and under	5 Points

- (c) Projects of any governmental agency that is under an enforcement action and/or compliance schedule relating to water quality standards, as long as the enforcement action does not relate to administrative requirements of the program, will be assigned 10 points.
- (d) Projects of any governmental agency that will result in a reduction in the discharge of pollutant(s) to a segment impaired for the relevant pollutant(s) will receive 10 points
- (e) Projects that implement the "Green Infrastructure/Sustainable Measures" will be assigned 5 points.
- (5) Grant funds cannot be used to reimburse for costs related to fees and/or penalties assessed by the Division.

53.6 – 53.9 <u>RESERVED</u>

53.10 STATEMENT OF BASIS AND PURPOSE REGARDING STATE GRANT PRIORITY SYSTEM

In accordance with the requirements of 24-4-103(4), the Commission makes these findings and adopts this Statement of Basis and Purpose.

The subject regulations are in implementation of the requirements of the Colorado Water Quality Control Act, C.R.S., 25-8-101., <u>et seq.</u> Section 202 of the Act requires that the Commission administer construction grants for municipal waste treatment facilities for the State. In particular, C.R.S., 1973, 25-5-202(1)(e)(g) provide as follows: The Commission shall develop and maintain a comprehensive and effective program for prevention, control, and abatement of water pollution and for water quality protection throughout the entire state and, in connection therewith, shall:

- (e) Perform duties assigned to the Commission in part 7 of this article with respect to the location, design, construction, financing, and operation of domestic wastewater treatment plants
- (g) Promulgate regulations and adopt priority ranking for the administration of federal and other public source construction loans or grants which the Commission or the Division administers which loans or grants shall not be expended for any purpose other than that for which they were provided.

These regulations provide a format for determining which eligible projects should receive funds. The priority system is in five parts as follows:

- 5.5.1 Authority
- 5.5.2 Purpose

- 5.5.3 Priority System
- 5.5.4 Prioritization within Categories
- 5.5.5 Determination of Project Funding
- 5.5.6 Update of Categorization and Ranking List

53.11 <u>STATEMENT OF BASIS SPECIFIC STATUTORY AUTHORITY, AND PURPOSE (1991</u> <u>REVISIONS)</u>

The provisions of Sections 25-8-202(1)(e), and (g); 25-8-308(1)(d); and 37-95-107.6(4) C.R.S., provide the specific statutory authority for adoption of the attached regulatory amendments. The Commission also adopted, in compliance with Sections 24-103(4) C.R.S., the following statement of basis and purpose.

BASIS AND PURPOSE

Many changes were incorporated into the priority system procedures (5.5.3) to allow additional projects that are eligible under this program to receive funding. The categories added were for potential health hazards, facilities that are beyond design life and in need of repair and sludge disposal. Categories for potential health hazards and facilities beyond design life and in need of repair were added to assist communities with pollution prevention to limit initiation of compliance and enforcement measures. The sludge disposal category was added to assist communities with meeting State/EPA sludge management regulations. The changes were also made to coincide with the Water Pollution Control Revolving Fund (WPCRF) 5.2.5 priority system procedures. The changes made will allow the Division to utilize one priority point system for all State priority lists. This system will accommodate the State grant program, the Sewer Needs List for the Division of Local Government, the WPCRF and any future federal grant program.

53.12 <u>STATEMENT OF BASIS, SPECIFIC STATUTORY AUTHORITY, AND PURPOSE (1992</u> <u>REVISIONS)</u>

The provisions of Sections 25-8-202(1)(e), and (g); 25-8-308(1)(d); and 37-95-107.6(4) C.R.S. provide the specific statutory authority for adoption of the attached regulatory amendments. The Commission also adopted, in compliance with Sections 24-4-103(4) C.R.S., the following statement of basis and purpose.

BASIS AND PURPOSE

The FY93 State Sewage Construction Grant Priority List is presented to the Water Quality Control Commission for agency action and public comment. The regulations under 5.5.4 provide for projects to be listed in a priority basis for funding dependent upon appropriations from the State Legislature. Because of lottery sales, it is possible this program will receive \$2 million for funding in FY93-94.

53.13 <u>STATEMENT OF BASIS, SPECIFIC STATUTORY AUTHORITY, AND PURPOSE (1993)</u> <u>REVISIONS)</u>

The provisions of Sections 25-8-202(1)(e), and (g); 25-8-308(1)(d); and 37-95-107.6(4) C.R.S. provide the specific statutory authority for adoption of the attached regulatory amendments. The Commission also adopted, in compliance with Sections 24-4-103(4) C.R.S., the following statement of basis and purpose.

BASIS AND PURPOSE

The FY94 State Sewage Construction Grant Priority List is presented to the Water Quality Control Commission for agency action and public comment. The regulations under 5.5.4 provide for projects to be listed in a priority basis for funding dependent upon appropriations from the State Legislature. The Division has received \$2 million for funding in FY93-94.

53.14 <u>STATEMENT OF BASIS, SPECIFIC STATUTORY AUTHORITY, AND PURPOSE (1994)</u> <u>REVISIONS)</u>

The provisions of Sections 25-8-202(1)(e), and (g); 25-8-308(1)(d); and 37-95-107.6(4) C.R.S. provide the specific statutory authority for adoption of the attached regulatory amendments. The Commission also adopted, in compliance with Sections 24-4-103(4) C.R.S., the following statement of basis and purpose.

BASIS AND PURPOSE

The FY95 State Sewage Construction Grant Priority List is presented to the Water Quality Control Commission for agency action and public comment. The regulations under 5.5.4 provide for projects to be listed in a priority basis for funding dependent upon appropriations from the State Legislature. The Division has received \$2 million for funding in FY94-95.

53.15 <u>STATEMENT OF BASIS, SPECIFIC STATUTORY AUTHORITY, AND PURPOSE (1995)</u> <u>REVISIONS)</u>

The provisions of Sections 25-8-202(1)(e), and (g); 25-8-308(1)(d); and 25-8-703 C.R.S. provide the specific statutory authority for adoption of the attached regulatory amendments. The Commission also adopted, in compliance with Sections 24-4-103(4) C.R.S., the following statement of basis and purpose.

BASIS AND PURPOSE

The FY96 State Sewage Construction Grant Priority List is presented to the Water Quality Control Commission for agency action and public comment. The regulations under 5.5.4 provide for projects to be listed in a priority basis for funding dependent upon appropriations from the State Legislature. The Division has received \$2 million for funding in FY95-96. The Division will be utilizing 5% (\$100,000) for Administration of the program.

53.16 <u>STATEMENT OF BASIS, SPECIFIC STATUTORY AUTHORITY AND PURPOSE: JULY, 1997</u> <u>RULEMAKING</u>

The provisions of sections 25-8-202 and 25-8-401, C.R.S., provide the specific statutory authority for adoption of the attached regulatory amendments. The Commission also adopted, in compliance with section 24-4-103(4) C.R.S., the following statement of basis and purpose.

BASIS AND PURPOSE

The Commission has adopted a revised numbering system for this regulation, as a part of an overall renumbering of all Water Quality Control Commission rules and regulations. The goals of the renumbering are: (1) to achieve a more logical organization and numbering of the regulations, with a system that provides flexibility for future modifications, and (2) to make the Commission's internal numbering system and that of the Colorado Code of Regulations (CCR) consistent. The CCR references for the regulations will also be revised as a result of this hearing.

53.17 <u>STATEMENT OF BASIS, SPECIFIC STATUTORY AUTHORITY AND PURPOSE: FEBRUARY,</u> <u>1998 RULEMAKING</u>

The provisions of sections 25-8-202(1)(e) and (g); 25-8-308(1)(d); and 25-8-703, C.R.S., provide the specific statutory authority for adoption of the attached regulatory amendments. The Commission also adopted, in compliance with section 24-4-103(4) C.R.S., the following statement of basis and purpose.

BASIS AND PURPOSE

The FY98 State Sewage Construction Grant Priority List has been approved by the Water Quality Control Commission. Regulation # 53 provides for projects to be listed in a priority basis for funding dependent upon appropriations from the State Legislature.

The Division has received \$3 million for funding in FY96-97 and \$3 million for FY97-98. The Division will be utilizing up to 5% of each grant for administration of the program.

The Commission received comments from the Denver Regional Council of Governments Water Resource Management Advisory Committee. There appear to be three concerns by DRCOG, that are addressed as follows.

The Division has always in the past and will continue in the future (by means of the site approval process and Commission policy established in the Water Pollution Control Revolving Fund Rules) ensure that projects are identified in the appropriate water quality planning documents prior to the award of funds to construct the project. The Division has committed to aggressively involve DRCOG as well as other water quality management agencies with the WPCRF Intended Use Plan and the State Construction Grant List as they are developed.

The Clear Creek/Arapahoe MHP and the Clear Creek/Herman Area are two distinct projects.

The Box Elder Water and Sanitation District is a community of approximately 40 homes near the Tomahawk Truck Stop in Adams County; however, the address listed with Special Districts to send correspondence is in the City of Englewood. The Division is willing to include both the location of the District and the address where they send correspondence.

53.18 <u>STATEMENT OF BASIS, SPECIFIC STATUTORY AUTHORITY, AND PURPOSE (1999)</u> <u>REVISIONS</u>

The provisions of Sections 25-8-202(1)(e), and (g); 25-8-308(1)(d); and 25-8-703 CRS. provide the specific statutory authority for adoption of the attached regulatory amendments. The Commission also adopted, in compliance with Section 24-4-103(4) C.R.S., the following statement of basis and purpose.

BASIS AND PURPOSE

The FY99 State Sewage Construction Grant Priority List is presented to the Water Quality Control Commission for agency action and public comment. Regulations No. 53 provide for projects to be listed in a priority basis for funding dependent upon appropriations from the State Legislature.

The Division has received \$3 million for funding in FY97-98 and \$3 million for FY98-99. The Division will be utilizing up to 5% of each grant for administration of the program.

53.19 <u>STATEMENT OF BASIS, SPECIFIC STATUTORY AUTHORITY, AND PURPOSE (2000)</u> <u>REVISIONS</u>

The provisions of sections 25-8-202(1)(e) and (g); 25-8-308(1)(d); and 25-8-703 C.R.S. provide the specific statutory authority for adoption of the attached regulatory amendments. The Commission also adopted, in compliance with Section 24-4-103(4) C.R.S., the following statement of basis and purpose.

BASIS AND PURPOSE

The subject regulations are in implementation of the requirements of the Colorado Water Quality Control Act, C.R.S., 25-8-101. <u>et seq.</u> Section 25-8-202 of the Act requires that the Commission promulgate regulations for the administration of grants for domestic wastewater treatment facilities for the State. In particular, C.R.S., 25-8-202(1)(e) and (g) provide as follows: "The Commission shall develop and maintain

a comprehensive and effective program for prevention, control, and abatement of water pollution and for water quality protection throughout the entire state and, in connection therewith, shall:

- (e) Perform duties assigned to the Commission in part 7 of this article with respect to the location, design, construction, financing, and operation of domestic wastewater treatment plants.
- (g) Promulgate regulations and adopt priority ranking for the administration of federal and other public source construction loans or grants which the Commission or the Division administers, which loans or grants shall not be expended for any purpose other than that for which they were provided.

A stakeholders group with members from the Southeast Council of Governments, Clear Creek Watershed Forum, a consulting engineering firm, the State Environmental Information Center, the Water Quality Control Division and the Division of Local Government of the Department of Local Affairs met to create new regulations to provide a format for determining which eligible projects should receive funds under the Domestic Wastewater Treatment (DWWT) Grant Program.

The need for revising Regulation No. 53 came about when the previous priority system that was used for both grants and loans under Regulation No. 51 (Water Pollution Control Revolving Fund (WPCRF) Rules) was deleted and replaced with a system that could fund water quality projects beyond wastewater treatment. Since Colorado's Water Quality Control Act only allows grants to small community domestic wastewater treatment projects, separate regulations had to be established to provide criteria for eligible grants. It is the Division's intent to continue to utilize the list of projects developed under the WPCRF Rules by extracting the projects that would meet the criteria for DWWT Grant Program established under this regulation.

Section 53.4(3) allows the Division to provide assistance to governmental agencies that were not identified in the Intended Use Plan and yet still need to move ahead with a project or make adjustments in an emergency situation. The focus on providing funds for planning or a quick fix in an emergency and then ensuring that those projects are identified on a subsequent approved plan provides flexibility while preserving the credibility of the process.

The timing of the public rulemaking hearing for this regulation will not accommodate approval of the Intended Use Plan for the year 2000 by December 31, 1999. The 2000 Intended Use Plan will be developed as Regulation No. 54 for the Commission's approval in February 2000 after adoption of these regulations. Until this process is complete, the Division will continue to award grant contracts from the Commission's approved 1999 State Construction Grant Priority List.

The new system as proposed will provide categories of eligible projects, provide mechanism for funding throughout the year, identify the use of the grant funds and allow for prioritization as necessary. The proposed system is still similar to the WPCRF and can accommodate this DWWT Grant Program, the Sewer Needs List for the Division of Local Government, and any future federal grant program.

53.20 <u>STATEMENT OF BASIS, SPECIFIC STATUTORY AUTHORITY, AND PURPOSE (2001)</u> <u>REVISIONS</u>

The provisions of sections 25-8-202(1)(e) and (g); 25-8-308(1)(d); and 25-8-703 C.R.S. provide the specific statutory authority for adoption of the attached regulatory amendments. The Commission also adopted, in compliance with Section 24-4-103(4) C.R.S., the following statement of basis and purpose.

BASIS AND PURPOSE

With the passage of HB 1246, the scope of the DWWT Grant Funding System has been expanded to enable the program to fund counties on behalf of unincorporated areas with populations of not more than

5,000. This change is incorporated into this Regulation #53 and involves expanding the definition of "governmental agency" to include "counties on behalf of unincorporated areas" and the definition of a "small community" to include unincorporated areas of not more than 5,000 population.

The body of the regulation does not need to be changed because it has always been broad enough to identify the needs in counties. The Domestic Wastewater Treatment Grant Program funds were not made available to counties on behalf of unincorporated areas until the statutory change was made and approved March 20, 2001. Paragraph (1)(b)(l) of 25-8-703 gives the Division authority to enter into contracts with counties on behalf of unincorporated areas and it will be repealed July 1, 2006.

53.21 <u>STATEMENT OF BASIS, SPECIFIC STATUTORY AUTHORITY, AND PURPOSE (MAY 2004</u> <u>RULEMAKING)</u>

Sections 25-8-202(1)(e) and (g); 25-8-308(1)(d); and 25-8-703, C.R.S. provide the specific statutory authority for adoption of the attached regulatory amendments. The Commission also adopted, in compliance with Section 24-4-103(4), C.R.S., the following statement of basis and purpose.

BASIS AND PURPOSE

Recent statutory amendments led to changes to the regulations governing another of the Division's funding programs, the Water Pollution Control Revolving Fund Rules, Regulation No. 51. Since the Commission was planning to consider changes to Regulation No. 51, the Attorney General's Office also examined Regulation No. 53, focusing on streamlining certain provisions of the two regulations. The Attorney General's Office, along with the Division and a stakeholders group, also discussed options to simplify the process for the Commission's annual approval of the program's "Intended Use Plan."

In order to accomplish these objectives, the Commission made the following changes to Regulation No. 53:

Section 53.3 - Detailed definitions of a public health hazard and significant non-compliance were added to assist staff in determining under which category a project should be listed.

Section 53.4(1) - A change was made to indicate that the Domestic Wastewater Treatment Grant Program Intended Use Plan will be approved annually by the Commission in a public forum after a public notice and comment period, but not through a rulemaking process.

Section 53.4(2) - Category 1 and 2 were explained further to assist staff in categorizing projects on the Project Eligibility List.

53.22 <u>STATEMENT OF BASIS, SPECIFIC STATUTORY AUTHORITY, AND PURPOSE (JULY 2008</u> <u>RULEMAKING, EFFECTIVE DATE JANUARY 1, 2009</u>)

The provisions of sections 25-8-202(1)(e) and (g); 25-8-308(1)(d); and 25-8-703 C.R.S. provide the specific statutory authority for adoption of the attached regulatory amendments. The Commission also adopted, in compliance with Section 24-4-103(4) C.R.S., the following statement of basis and purpose.

BASIS AND PURPOSE

Changes to the Rules have been made to streamline the Intended Use Plan process. The categorization and prioritization system that are included in the Water Pollution Control Revolving Loan Fund Rules have been incorporated into the Domestic Wastewater Treatment Grant Rules. These revisions and will enable the Division to develop one Intended Use Plan and Project Eligibility List, that will be used for both the grant and loan funds.

2009/2010 Intended Use Plan AMERICAN RECOVERY AND REINVESTMENT ACT (ARRA) OF 2009

A. INTRODUCTION

The purpose of this addendum is to provide public notice of Colorado's implementation criteria for the American Recovery and Reinvestment Act of 2009 (ARRA) funds, and to provide the United States Environmental Protection Agency (EPA) with an amended 2009 Intended Use Plan (IUP) and a List of ARRA Projected Loans for 2009 in order to seek a federal grant award under the ARRA. The initial 2009 IUP was approved by the Colorado Water Quality Control Commission (WQCC) on November 10, 2008 with an effective date of January 1, 2009.

This addendum supplements and amends the initial 2009 IUP that took effect on January 1, 2009. This addendum adds new clean water capital projects that may be eligible for funds that have been appropriated to Colorado under the ARRA. Any conflict between the initial 2009 IUP and this addendum, if such conflict relates to ARRA funds, shall be resolved in favor of this addendum. The amended 2009 IUP will serve as the planning document for the operations of the Water Pollution Control Revolving Fund (WPCRF) (including the ARRA funds), and will become effective immediately upon WQCC approval.

Final EPA guidance concerning ARRA funds indicates that States' amended IUPs should include the following:

- A list of projects for construction of publicly owned treatment works and projects/activities eligible for assistance under section 606(c)(1) of the federal Clean Water Act (CWA). This list should include the name of the community, permit number or other applicable enforceable requirements (if available), the type of financial assistance, and the projected amount of eligible assistance.
- A list of the non-point source and national estuary protection activities under sections 319 and 320 of the CWA that the State expects to fund from its State Revolving Fund (SRF).
- A description of the intended uses of the 50% additional subsidization reserve and the 20% provision for "green infrastructure" projects. The list included in the IUP must contain eligible projects where the total cost of assistance requested is at least equal to the amount of the grant being applied for before a grant can be awarded.
- The criteria and method established for the distribution of funds.

B. LIST OF ARRA PROJECTS

States are required to develop a comprehensive list of eligible projects for funding and to identify projects that will receive funding. The 2009 WPCRF and State Domestic Wastewater Treatment Grant Project Eligibility List (PEL) was previously approved by the WQCC on November 10, 2008. The previously approved list includes Categories 1-5, and illustrates the current construction needs for all identified eligible water quality projects, including point source wastewater treatment, nonpoint source, storm water, and source water assessment projects.

To further ensure that all additional funds appropriated to Colorado under the ARRA are fully utilized, the WQCC held a rulemaking hearing on March 9, 2009. The WQCC amended WQCC Regulation #51 (5 CCR 1002-51) and established an additional category (Category 6) of eligible projects for potential funding. The projects being added are listed as Category 6 projects in the Additions to the 2009 Project

Eligibility List (Appendix I). Category 6 additions include those projects that are seeking funding under the ARRA and that were not already on the PEL as of January 1, 2009. Projects in Categories 1-5 that qualify for ARRA funds will be given consideration prior to funding of Category 6 projects.

Based on the information received by May 14, 2009, including Preliminary Engineering Reports, Loan Applications, and Site Applications the WQCD will develop Appendix J - ARRA Projected Loans for 2009.

C. CRITERIA AND METHODS FOR DISTRIBUTING ARRA FUNDS

1. Application and Other Administrative Deadlines

In accordance with the ARRA, priority for ARRA funds shall be given to projects on the PEL that are ready to proceed to construction within 12 months of the date of enactment of the ARRA. Colorado has chosen to identify an earlier date of September 30, 2009. Thus, in Colorado, projects that are ready to proceed to construction by September 30, 2009 will receive priority for ARRA funds. Applicants for ARRA funding must indicate in their application whether they have a ready-to-proceed-to-construction date on or before September 30, 2009.

The State must demonstrate that it can fully utilize its ARRA appropriation, in order to avoid the possibility of EPA reallocating such funds to other States. It is therefore imperative that recipients of ARRA funds consistently demonstrate that they are on track to commence construction by September 30, 2009. Colorado has adopted interim milestones to achieve this objective. If an applicant for ARRA funds fails to meet any of these milestones, it will not receive ARRA funding, and any funds available to that project will go towards the next project on the Projected Loan List. The State will not execute a loan for any ARRA project that has not received all required WQCD approvals. The milestones are as follows:

March 23, 2009: Submit an approvable Preliminary Engineering Report (PER) planning document along with a completed PER checklist.

April 27, 2009: Submit a stimulus loan application and a complete/approvable Site Application (as described in Regulation No.22.)

http://www.cdphe.state.co.us/regulations/wqccregs/100222wqccdomesticwwtworks.pdf). The Site Application must be received with all associated fees. The Site Application must be approved by the WQCD prior to submittal of the Process Design Report or Engineering Report.

May 31, 2009: Submit a complete/approvable Process Design Report or Engineering Report (as described in WQCC Policy 96-1.)

<u>http://www.cdphe.state.co.us/op/wqcc/StatutesRegsPolicies/Policies/96-1_07.pdf</u> The Report must be received with all associated fees. The Process Design Report or Engineering Report must be approved by the WQCD prior to submittal of Plans and Specifications.

June 30, 2009: Submit complete/approvable Plans and Specifications and Environmental Assessment Report, or proof that the project qualifies as a Categorical Exclusion from the environmental process.

July 31, 2009: Fully respond to any WQCD questions and comments.

September 30, 2009: Complete bidding process, issue Notice to Proceed, and begin construction.

Should a project fail to meet the construction start date of September 30, funds will be reallocated, or the WQCD reserves the right to determine if there is sufficient cause for the delay and that the delay will not preclude use of the ARRA funds by the federal statutory deadline. The WQCD would need to approve any change order associated with the delay. If the ARRA funds are reallocated any Category 1-5 projects will be eligible for prioritization for SRF funding.

The funding agreements entered into between the Authority and the initial recipients of ARRA principal forgiveness and loans contain a deadline that may result in some funds ultimately being reallocated to other projects. The relevant language is as follows: "The Governmental Agency acknowledges that the loan is to fund actual engineering, equipment, and construction contracts, and other eligible cost for the project. Any ARRA funds not obligated for actual engineering, equipment and construction contracts, and other eligible cost by December 31, 2009 may be reduced accordingly." If recipients cannot obligate all funds as required by this provision thus rendering such funds available for other projects, the WQCD will reallocate the funds as follows:

- The WQCD will proceed down the ARRA Projected Loan List (Appendix J) in priority ranking order to provide additional ARRA funds to initially-funded governmental agencies whose project bids came in high, thus necessitating a scaling back of their original projects in order to meet the September 30, 2009, construction deadline.
- If all of the original projects as referenced in the paragraph above receive full funding and funds are still available, the WQCD will continue to proceed down the ARRA Projected Loan List in priority ranking order to obligate the remaining funds to a governmental agency or agencies who are ready to proceed.
- The WQCD reserves the right to establish new milestones and/or deadlines for such projects in order to ensure that all ARRA-funded projects are under contract for construction by the February 17, 2010, deadline.

If after February 17, 2010, additional funds become available as the result of a national reallocation of unused funds from other States, the WQCD will continue proceeding down the ARRA Projected Loan List (Appendix J) in order to fund additional projects. In such case, the WQCD reserves the right to establish new milestones and/or deadlines to meet any new deadlines set by the ARRA Act and the EPA Administrator.

2. Funding Categorization and Prioritization

Colorado uses a categorization and prioritization system to ensure the efficient and appropriate allocation of federal SRF monies. The State will employ this system in connection with ARRA funds, and projects will be funded in a priority order as outlined below. The State's existing PEL consists of six categories, with Category 6 recently added:

<u>Category 1</u> includes those projects that improve, or benefit public health or that will remediate a public health hazard as defined in the WPCRF Rules.

<u>Category 2</u> includes those projects that enable an entity to achieve permit compliance.

<u>Category 3</u> includes those projects that contribute to the prevention of a public health hazard; enable an entity to maintain permit compliance; or enable an entity to address a possible future effluent limit or emerging issue.

<u>Category 4</u> includes those projects that implement a watershed/nonpoint source management plan.

Category 5 includes those projects that implement a source water protection plan.

<u>Category 6</u> includes those projects that seek funding only under ARRA and that were not already on the PEL as of January 1, 2009. Projects in Categories 1-5 that qualify for funding under ARRA will be given consideration prior to funding of Category 6 projects.

The State will use its existing point system within WQCC Regulation #51 to prioritize projects within each category. See 5 CCR 1002-51, § 51.5(3). If it is determined that the State lacks sufficient ARRA funds to cover loans and loan subsidization for all eligible projects, Category 1 projects that are ready to proceed to construction will be funded prior to Category 2 projects, which will be funded prior to Category 4 projects, which will be funded prior to Category 5 projects, which will be funded prior to Category 6 projects - until all funds are obligated.

D. ARRA INTEREST RATES AND LOAN/LOAN FORGIVENESS TERMS

The following ARRA loan/loan forgiveness terms have been adopted by the Colorado Water Resources and Power Development Authority (Authority) Board:

<u>Background:</u>	Pursuant to the ARRA, not less than 50% of the ARRA funds will be applied to principal forgiveness as set forth below. It is the intention of this IUP that the balance of ARRA funds beyond approximately 50% will be made available through loans without principal forgiveness.
Loan Term:	Up to 20 Years plus the construction period.
Interest Rate ARRA Loans:	ARRA loans will be issued at an interest rate of 0%.
Administrative Fees on ARRA Loans:	No administrative fees will be charged on ARRA funded loans.
Principal Forgiveness:	Principal forgiveness of up to \$2,000,000 per project will be provided to the highest prioritized projects until such time as the amount of ARRA funds so applied is not less than 50% of the total ARRA funds available; recognizing, however, that depending upon the costs and priority list order of individual projects funded by ARRA funds, the total applied to principal forgiveness may slightly exceed 50%. Project cost in excess of \$2,000,000 for individual projects funded by ARRA funds will not be eligible for principal forgiveness.

For unobligated capitalization grant funds and re-loan funds, additional subsidization from the current loan program terms, including lower direct loan interest rates and lower leveraged loan interest rates, will be considered by the Authority, Department of Local Affairs, the WQCD, and the WQCC.

E. GREEN INFRASTRUCTURE, WATER OR ENERGY EFFICIENCY IMPROVEMENTS, AND OTHER ENVIRONMENTALLY INNOVATIVE ACTIVITIES

The ARRA requires that, to the extent there are sufficient eligible project applications, not less than 20% of the ARRA funds appropriated to a State shall be used for projects to address green infrastructure, water or energy efficiency improvements, or other environmentally innovative activities.

The State will rely upon the definitions of the terms "green infrastructure," "water efficiency," "energy efficiency," and "environmentally innovative projects" as found in Attachment 7 to EPA's ARRA Guidance dated March 2, 2009, to guide its administration of the ARRA's green projects component. The general terms "green projects" and "green components of projects" as used herein are intended to include all of these categories of projects. The WQCD will rely upon the project descriptions and examples of qualifying projects contained in Attachment 7 to EPA's Guidance in determining whether certain projects meet EPA's green project criteria. The WQCD will also consider any subsequent policy and/or guidance provided by

EPA in making green project determinations. The WQCD will document the bases for each of its determinations that individual projects (or components of projects) meet EPA's green project criteria.

The following is a description of how the State will strive to achieve the ARRA's 20% green projects funding goal within the framework of the category ranking system for projects established in Regulation #51 and this IUP. Upon receipt of the ARRA capitalization grant from EPA, Colorado will reserve 20% of the appropriated funds to finance green projects. This account will be referred to as the "Green Project Reserve Account." The remaining 80% of the appropriated funds may be used to finance both conventional (non-green) projects and green projects. This account will be referred to as the "Unrestricted Account."

The WQCD will begin by offering funding to the highest ranking Category 1 project on the Project Eligibility List (PEL) that is ready to proceed to construction, and will continue down the list in order of project ranking until the Unrestricted Account is entirely utilized. Green projects or green components of projects will be funded from the Green Project Reserve Account, while conventional projects and conventional components of projects will be funded from the Unrestricted Account.

Once the funds in the Unrestricted Account are fully utilized, the WQCD will make a concerted effort to expend any and all remaining monies in the Green Project Reserve Account by funding only green projects or green components of projects. This may lead to certain conventional projects being "skipped over" in an effort to achieve the 20% green infrastructure goal. It may also result in split funding of some projects whereby the green components are eligible for ARRA funding and the conventional components are eligible for other State financial assistance. Entities offered ARRA funding for the green components of their projects must be ready to make an immediate decision as to whether they wish to accept the condition that the ARRA-specific requirements (i.e. the Davis-Bacon wage rate and "Buy American" provisions) will apply to all State-funded components of their projects. If an entity is not willing to accept this condition, then the WQCD will move to the next project on the PEL to offer funding. This process of proceeding down the PEL in priority order to identify green projects or green components of projects will continue until all funds in the Green Project Reserve Account have been utilized.

In the event the State cannot meet the 20% goal due to lack of green projects that are ready to proceed to construction by the September 30, 2009 deadline, then the State will request permission from EPA (through the certification process in Section V.C. of EPA's Guidance) to allow use of any remaining funds in the Green Project Reserve Account for conventional projects. If EPA accepts the State's certification thereby allowing such conversion of funds, the WQCD would offer funding to the first conventional project on the PEL that was skipped after the Unrestricted Account funds were fully utilized, and would proceed down the list from that point.

In the event that the State receives additional ARRA funds in the future, the priority ranking system contained in the Regulations and this IUP, along with any additional formal EPA Guidance, shall serve as the system for administering such funds.

F. ADMINISTRATIVE EXPENSES

A 4 percent administrative allocation from the ARRA funds is being reserved for WPCRF administrative expenses. This revenue supports compliance with all federal requirements (i.e., all reporting requirements, financial reviews, loan approvals, audit requirements, engineering document reviews, environmental document reviews, design review, construction inspection, monitoring, staff salary and other eligible expenses related to ARRA).

A \$31,347,700 capitalization grant was awarded on August 7, 2009 under the American Recovery and Reinvestment Act with \$1,253,908 for 4 percent administration of the funds.

G. ARRA SHORT AND LONG-TERM GOALS

Long-Term Goals:

- Maintain compliance with all state and federal requirements of the ARRA.
- Maintain compliance with the requirement of the 50 percent additional subsidization of the ARRA funds.
- Maintain compliance with the 20 percent utilization of the green infrastructure, water or energy efficiency improvements, or other environmentally innovative technologies provision of the ARRA.
- Maintain compliance with all new reporting requirements of the ARRA.

Short-Term Goals:

- Ensure the funds are prioritized and allocated in a manner that will achieve an overall economic and environmental benefit to the State.
- Allocate all ARRA funds within a time frame that will ensure all funds will be fully utilized.
- Ensure all recipients of the ARRA funds are in construction in a timely manner that will comply with the Act.
- Identify additional ready to proceed projects to utilize additional reallocated ARRA funds should they become available.

H. ADDITIONAL FEDERAL REQUIREMENTS

The ARRA includes a number of new cross-cutting requirements that will apply to projects funded in part or in whole with funds made available by the ARRA. Accordingly, applicants for ARRA funds must certify in their applications that their projects will comply with the following requirements (or submit a justification for a waiver under the ARRA):

1. Davis-Bacon

Section 1606 of the ARRA requires all laborers and mechanics employed by contractors and sub contractors on projects funded directly by or assisted in whole or in part by and through the Federal Government pursuant to the Act shall be paid wages at rates not less than those prevailing on projects of a character similar in the locality as determined by the Secretary of Labor.

The purpose of this language is to apply Davis-Bacon Act wage rules to all assistance agreements made in whole or in part with funds appropriated under the ARRA. The Department of Labor provides all pertinent information related to compliance with labor standards, including prevailing wage rates and instructions for reporting.

2. American Iron, Steel, and Manufactured Goods

Section 1605 of the ARRA requires that none of the appropriated funds may be used for the construction, alteration, maintenance, or repair of a public building or public work unless all of the iron, steel, and manufactured goods used in the project is produced in the United States unless (a) a waiver is provided to the recipient by EPA or (b) compliance would be inconsistent with United States obligations under international agreements. In order to receive a waiver, the State must send a written request to the EPA Administrator. A decision will be made based on the following criteria:

- a. The requirement is inconsistent with the public interest for purposes of the project for which a waiver has been requested,
- b. Iron, steel, and necessary manufactured goods are not produced in the United States in sufficient and reasonably available quantities and of a satisfactory quality, and
- c. Inclusion of iron, steel, and manufactured goods produced in the United States will increase the overall cost of the project by more than 25 percent.

I. Public Review and Comment

- On January 30, 2009, the WQCC filed and posted a notice of a March 9th public Rulemaking Hearing to consider revisions to the WQCC's State Revolving Fund Regulations for inclusion of provisions necessary to implement the ARRA requirements. On the same day, the WQCC posted notice of a March 9th public Administrative Action Hearing to consider approval of revisions to the 2009 IUP for purposes of implementing ARRA funding requirements. On February 2, 2009, these notices were distributed to a list of persons who have requested notification of WQCC rulemaking hearings. The notices were also sent to all persons on the WQCD's Water Quality Bulletin distribution list.
- On February 3, 2009, the WQCD distributed a survey to all entities on the Water Quality
 Information Bulletin distribution list, to all governmental entities listed on the 2009 eligibility list for
 which the WQCD had electronic contact information, to a stakeholder list compiled during recent
 consideration of a potential fee bill, to all Regional Councils of Government, and to the
 Department of Local Affairs, soliciting requests from interested parties to add Category 6 projects
 to the PEL, with a deadline of February 13, 2009. The survey was also posted on the WQCD
 website and the Colorado Water Resources and Power Development Authority website.
- On February 5, 2009, the WQCC posted the proposed revisions to the State Revolving Fund Rules for consideration in the March 9, 2009 Rulemaking Hearing.
- On February 27, 2009, the WQCC filed and posted a notice of an April 13th public Rulemaking Hearing to consider any additional revisions to the WQCC's State Revolving Fund Regulations that may be needed to implement ARRA requirements. On the same day, the WQCC posted notice of an April 13th public Administrative Action Hearing to consider additional revisions to the 2009 IUP for purposes of implementing ARRA funding requirements to be described in forthcoming final EPA Guidance. These notices were distributed in the same manner as the initial January 30, 2009 notices.
- On March 3, 2009, the WQCC posted notice of slight changes to the initial proposal for revisions to the State Revolving Fund Regulations. The WQCC also posted the text of the WQCD's proposal dealing with administration of ARRA funds (Addendum #1 to the 2009 IUP).
- On March 6, 2009, the WQCC posted notice of proposed revisions to the March 3 version of Addendum #1 to the IUP (mainly to include specific funding terms from the Colorado Water Resources and Power Development Authority).
- On March 9, 2009, the WQCC conducted a public Rulemaking Hearing during which it considered and adopted the WQCD's proposal to revise the State Revolving Fund Regulations to include a new Category 6 for projects seeking funding under the ARRA which were not on the PEL prior to January 1, 2009. On the same day, the WQCC conducted a public Administrative Action Hearing during which it approved the WQCD's proposed Addendum #1 to the IUP and addition of the Category 6 projects to the PEL.
- On March 20, 2009, the WQCC posted notice of a May 11th public Administrative Action Hearing to consider approval of proposed additional revisions to 2009 IUP, to identify projects potentially receiving funding.
- On April 13, the WQCC conducted a public Administrative Action Hearing during which it considered and approved the WQCD's additions to Addendum #1 to the IUP (mainly dealing with administration of the Green Project Reserve Fund).
- On May 11, with a continuation to May 29, 2009, the WQCC conducted a public Administrative Action Hearing during which it considered and approved minor revisions to the 2009 Water Pollution Control Revolving Fund and State Domestic Wastewater Treatment Grant Intended Use Plan and Appendix B Project Eligibility List, minor revisions to the Addendum #1 to the IUP, Appendix J – ARRA Projected Loan for 2009 and Appendix K – Project Category Ranking for Potential ARRA Funding.

CLEAN WATER STATE REVOLVING FUND AMERICAN RECOVERY AND REINVESTMENT ACT PROJECTED LOANS (FUNDABLE LIST) 2009 APPENDIX J

		ARRA Grant	\$31,347,700
STATE	Colorado	4% Set Aside	\$1,253,908
Revised Date	5/27/2009	50% Subsidy	\$15,673,850
		20% GPR	\$6,269,540
nount is an estimate. The project must continue to meet all future deadline	s and state and federal requirements associated with ARRA funding	ARRA Funds for Loans	\$14,419,942

* The project award amount is an estimate. The project must continue to meet all future deadlines and state and federal requirements associated with ARRA funding ** Interest rates are estimated based on project amount and MHI (median household income). ARRA loans are at 0% interest. The base SRF interest rates range from 0% to 2.5% for 2009 only. This includes of 0% for populations

of 5,000 or less with a MHI less than 61% of the state average MHI. DACs at 61-80 % of the state average for MHI interest rates are 1%. Direct loans up to \$2 million are 2% and leveredged loans over \$2 million are 2.5%

***Green Project Reserve amount are estimates. Some "Green Projects" require a "Business Case"

PROJECT CATEGORY RANKINGS FOR POTENTIAL AMERICAN RECOVERY & REINVESTMENT ACT (ARRA) FUNDING CLEAN WATER STATE REVOLVING FUND APPENDIX K

Eligibility Category	Project Number	Assistance Recipient	Project Description	Funding Amou Requested	Int	Amount Eligible
1	050025W- 2W	Fremont/North Canon	Install a centralized sanitary sewer collection system that would serve the North Canon area in Canon City, CO		00	\$ 2,000,00
1	030130W	Gunnison County	Collection / Interceptor Construction / Rehabilitation	\$ 474,0		\$ 474,01
1	050034W		Collection / Interceptor Construction / Rehabilitation	\$ 3,900,00		\$ 3,900,00
1	080007W	Monument Sanitation District	Collection / Interceptor Construction / Rehabilitation; Eliminate ISDS	\$ 2,418,00		\$ 2,418,00
1	030228W	Red Cliff, Town of	New Wastewater Treatment Plant	\$ 2,000,00		\$ 2,000,00
1	030239W	Rye, Town of	New Wastewater Treatment Plant; Improvement / Expansion of Wastewater Treatment Plant; Connect Existing Facility; Collection / Interceptor Construction / Rehabilitation	\$ 1,968,00	00	\$ 1,968,00
1	090017W	Widefield WSD	Improvement / Expansion of Wastewater Treatment Plant; Collection / Interceptor Construction / Rehabilitation	\$ 1,728,59		\$ 1,728,59
2	030017W	Bayfield, Town of	Consolidation of the Gem Village wastewater treatment facility with the Town of Bayfield's wastewater treatment facility. Project consist of decommissioning an old lagoon system, replacement of an existing lift station, installation of a backup generator and construction of a force main and a gravity sewer line.	\$ 1,039,5 ⁻		\$ 1,039,51
2	030039W	Burlington, City of	Improvements to an existing aerated lagoon treatment facility including lining, piping and aeration system. Project will increase capacity to 0.9 MGD.	\$ 1,974,00		\$ 1,974,00
2	030049W	Cheyenne Wells #1 SD	The project consists of increasing aeration capacity, changing the gas chlorination to liquid chlorination, and replacement of existing cell liner.	\$ 770,00	00	\$ 770,00
2	080011W	Crested Butte, Town of	The project consists of constructing a new, secondary clarifier and rehabilitation of the collection system.	\$ 2,300,00	00	\$ 2,300,00
2	030114W	Georgetown, Town of	Replacement & Upgrade of sludge process equipment, retrofit aeration basins, new biosolids holding tank, advanced WW treatment and solar electric generator	\$ 5,800,00	00	\$ 5,800,00
2	030118W	Glenwood Springs, City of	Phase 1 - 1.95 MGD of a new 3.9 MGD Regional plant, new lift station and 13,000 ft of force main	\$ 34,600,00		\$ 34,600,00
2	030139W	Hudson, Town of	The project consists of connecting the Town's existing collection system to the new wastewater treatment plant, and abandon and reclaim the existing wastewater lagoon site. The project includes construction of a 0.25 MGD lift station, force mains and gravity mains.	\$ 1,900,00	00	\$ 1,900,00
2	030175W	Mesa County Lower Valley PID (Mack SD)	Improvement / Expansion of Wastewater Treatment Plant; Collection / Interceptor Construction / Rehabilitation	\$ 2,000,00	00	\$ 2,000,00
2	030209W	Pagosa Area WSD	The project consists of decommissioning the existing Highlands Lagoon wastewater treatment facility, constructing 7.5 miles of sewer main, a new lift station, and conveyance of wastewater to the Vista wastewater treatment facility.	\$ 9,322,35	53	\$ 9,322,35
2	070008W	*Pueblo, City of	Improvement / Expansion of Wastewater Treatment Plant; Collection / Interceptor Construction / Rehabilitation	\$ 26,500,00	00	\$ 5,500,00
2	030240W	Saguache, Town of	The project consists of replacing existing gravity sewer lines, manholes and portions of the existing under-drain. The Town also intends to implement solar-voltaic power to offset energy demands at the wastewater treatment facility and Parshall flume building.	¢ 407 -		6 407 F
	1		l	\$ 437,50	00	\$ 437,50

2	030294W	Woodland Park, City of	Replace hand cleaned bar screens with fine mechanical screer and wash press and add vortex grit remove and grit classifier	\$	705,000	\$	705,000
3	030031W	Boxelder Sanitation District	New Wastewater Treatment Plant; Collection / Interceptor Construction / Rehabilitation	\$	4,689,000	\$	4,689,000
3	050009W	Brush, City of	Project consists of replacing a 44-year old deteriorating trickling filter wastewater plant which has exceeded design life, with a new 3-stage biological nutrient removal treatment facility. Project includes new headworks, new primary clarifiers, new bioreactor and new UV disinfection.	\$	11,500,000	\$	11,500,000
3	090009W	Collbran, Town of	Improvements to and replacement of various portions of the wastewater collection system.	\$	1,010,000	\$	1,010,000
3	030083W	Eagle, Town of	Collection system improvements downtown replacing old lines	\$	1,288,966	\$	1,288,966
3	030087W	Empire, Town of	Slip line or replace 10" vcp, manhole repair, replace comminutor	\$	515,742	\$	515,742
3	030088W	Erie, Town Of	Improvement / Expansion of Wastewater Treatment Plant; New Wastewater Treatment Plant; Improvement / New Biosolids Handling Facility; Collection / Interceptor Construction / Rehabilitation; Reuse Facility	\$	15,170,000	\$	15,170,000
3	090019W	Evergreen Metro District	Replace twin t roof, pave parking lot	\$	2,000,000	\$	2,000,000
3		Fruita, City of	Project consists of constructing a new wastewater treatment facility, approximately 2 miles of interceptor mains with one lift station.	\$	30,994,472	\$	30,994,472
3	040022W	Granby Sanitation District	Collection system and transmission mains improvements.	\$	2,000,000	\$	2,000,000
3	030124W	Grand Junction, City of	Project consists of replacement of aging sewer lines throughout the collection system and elimination of septic systems.	\$	3,200,000	\$	3,200,000
3	030158W	Lamar, City of	The project consists of replacing an existing wastewater lift station with the construction of a new lift station and headworks facility.	\$	2,417,266	\$	2,417,266
3	030168W	Lochbuie, Town of	New influent pump station, solids processing building, lab/admin building	\$	6,613,000	\$	6,613,000
3	040032W	Mesa County - Whitewater PID	Connect to Existing Facility; Eliminate ISDS	\$	4,172,250	\$	4,172,250
3	030229W	Redstone WSD	Project consists of constructing a new 0.05 MGD wastewater treatment facility.	\$	2,100,000	\$	2,100,000
3	090001W	Sunset Metropolitan District	New Regional Wastewater Treatment Plant; Collection / Interceptor Construction / Rehabilitation; Reuse Facility	\$	4,393,000	\$	2,753,000
3	030283W	Westminster, City of	Improvement / Expansion of Wastewater Treatment Plant; Reuse Facility; Collection / Interceptor Construction / Rehabilitation	\$	2,000,000	\$	2,000,000
3	090020W	Windsor, Town of	5.75 MGD lift station and headworks, influent screens, screen compactor, wet well, dry pit sewage pumps grit collector and generator.	\$	5,059,508	\$	5,059,508

APPENDIX L

AMERICAN RECOVERY AND REINVESTMENT ACT WATER POLLUTION CONTROL REVOLVING FUND GOVERNOR'S PROJECT CERTIFICATION

AUGUST 25, 2009

ATE OF COLOR

OFFICE OF THE GOVERNOR 136 State Capitol Building Denver, Colorado 80203 (303) 866 - 2471 (303) 866 - 2003 fax

Bill Ritter, Ir. Governor

August 25, 2009

Administrator Lisa P. Jackson **Environmental Protection Agency** Ariel Rios Building 1200 Pennsylvania Avenue, N.W. Washington, DC 20460

Re: ARRA Section 1511 Certification

Dear Administrator Jackson:

Pursuant to Title XV, Subtitle A, section 1511 of the American Recovery and Reinvestment Act (Pub. L. 11-5) ("ARRA"), I hereby certify that the attached drinking water infrastructure investments totaling \$32,290,880 and wastewater infrastructure totaling \$30,093,792, both appropriated by the ARRA under the heading "State Revolving Fund" to the United States Environmental Protection Agency, have received the full review and vetting required by law and that I accept responsibility that such investments are an appropriate use of taxpayer dollars. I further certify that the specific information required by section 1511 concerning each such investment-a description of the investment, the estimated total cost, and the amount of ARRA funds to be used-is provided in the Colorado Drinking Water State Revolving Fund Intended Use Plan and the Water Pollution Control Revolving Fund Intended Use Plan ARRA Addendum #1 and is available to the public at: http://www.cdphe.state.co.us/wq/FinancialSolutions/ARRA.html and linked to recovery.gov.

I understand that my state may not receive ARRA infrastructure investment funding unless this certification is made and posted.

Sincerely,

Authen Bill Ritter, Jr.

Governor
