***** *There are instances where a segment designated as a Category 5 may identify additional parameters in this table not included on the 2010 303(d) List. This is largely due to the fact that a TMDL has been written and approved but the segment is still not attaining water quality standards. The Assessment Database continues to track these parameters until the segment attains standards for these particular pollutants.*

This may also happen on segments where there are parameters included on the M&E List for this same segment.

APPENDIX B

Appendix B is the entire use support table for lakes and reservoirs.

Waterbody ID, name, size, uses, causes, sources, and IR category are included.

* *There are instances where a segment designated as a Category 5 may identify additional parameters in this table not included on the 2010 303(d) List. This is largely due to the fact that a TMDL has been written and approved but the segment is still not attaining water quality standards. The Assessment Database continues to track these parameters until the segment attains standards for these particular pollutants.*

This may also happen on segments where there are parameters included on the M&E List for this same segment.

APPENDIX C

Appendix C is the delisting table, which has been added in accordance with the IR guidance for ease in 303(d) list tracking and review.
