NATIONAL PARKS AND NATIONAL MONUMENTS

THE TOP OF THE NATION is easily reached in Colorado over America's highest auto highways. Several roads provide access to altitudes which inspire bold dreams amid long vistas of cloud-swathed, snow-capped mountains. One scenic highway lifts to the summit of Mount Evans, west of Denver, 14,260 feet above sea level. Another swings upward to the top of Pikes Peak, rising from Manitou, just west of Colorado Springs. Pikes Peak, probably the most famous mountain in the nation, is 14,110 feet high. This is a toll road, owned by the city of Colorado Springs, and a charge of 50 cents per passenger is made. Trail Ridge Road, through Rocky Mountain National Park, rises to 12,183 feet and is the highest continuous auto road in the nation. A fee of $1 a car, good for the season, is charged by the U. S. Government. These highways usually are open from early June through October.

HIGHEST STATE in the nation, with an average altitude of 6,800 feet, Colorado contains 75 per cent of all the area in the United States which has an elevation of 10,000 feet or more above sea level.

ROCKY MOUNTAIN NATIONAL PARK is the vacation center for thousands of Colorado's visitors. Embracing 405 square miles of rugged beauty, the Park contains 14 massive peaks, including Longs peak, 14,255 feet high. Trail Ridge Road through the Park is one of America's outstanding mountain highways. Estes Park village and Lake Estes at the eastern entrance, are reached via U.S. 34 and Highways 7 and 66. From the West the park is reached via U.S. 40 to Granby, then via U.S. 34 through Grand Lake, site of Grand Lake and, nearby, Shadow Mountain Reservoir. This region is the location of the Grand Lake-Big Thompson water diversion project on which the U. S. Bureau of Reclamation is spending $128,000,000.

TO ALL MOTORISTS: On some construction projects slight delays are unavoidable. Follow instructions to slow down and drive carefully through construction or repair jobs. Highway building never will be completed in Colorado or in any other state, while the motoring public is asked to be patient with the road builders. Today's construction job means a safer highway in future years.

COLORADO NATIONAL MONUMENT, a half-hour's drive west from Grand Junction, is a high-walled mesa of red and white sandstone formations that overlooks the Colorado River and its broad, fertile valley of orchards and farm lands. Buffalo, deer and elk roam the region, protected by the National Park Service. Nearby are great dinosaur beds from which have been excavated skeletons of 75-foot-long reptiles.

GREAT SAND DUNES NATIONAL MONUMENT is reached via State Highway 17 and a county road from Alamosa, on U.S. 160. The area includes 46,034 acres of variicolored sand, a thousand feet high, that lie in ever-shifting waves and rolls in the San Luis Valley, just west of the Sangre de Cristo mountains.

MESA VERDE NATIONAL PARK, in southwestern Colorado, is the largest tract of land in the United States set aside for the antiquities it contains. The Park, 80 square miles in area, embraces a high-walled mesa that rises abruptly 2,000 feet above Montezuma Valley. Deep, time-worn canons with sheer cliff walls pierce the mesa. In these canons, clinging like swallow nests under the lips of the huge cliffs, are the deserted villages of a bygone race, the small-statured Cliff Dwellers. Tree-ring records tell scientists that the Cliff Dwellers inhabited the area as early as 700 A.D., and as late as 1276 A.D. Where they came from, where they went, what happened to them — all is shrouded forever by the mysterious veil of centuries of ghostly silence. An excellent hard-surfaced highway and trails make the ruins easily accessible. Lodge and cabin accommodations and meals are available at reasonable rates at Park headquarters near Spruce Tree Ruin. Park entrance fee, $1 per car. Season, May 15 to October 15 . . . The area adjacent to Mesa Verde includes the last remaining Indian Reservation in Colorado, that of the Southern Ute Indians.

DINOSAUR NATIONAL MONUMENT, in northwestern Colorado and northeastern Utah, includes 254,720 acres of primitive country untouched by the works of man. Impressive scenic features have been fashioned by the Green and Yampa Rivers, which flow through deep, narrow canons . . . At Jensen, Utah, a local road from U.S. 40 takes the motorist to the western section of the area where great beds of dinosaurs may be seen.

MOUNT OF THE HOLY CROSS may be viewed to good advantage by driving over a county road from U.S. 6 near Vail Pass to Redcliff.

BLACK CANON NATIONAL MONUMENT near Montrose is truly one of nature's impressive masterpieces. The monument area embraces a 10-mile strip of the most spectacular section of a 50-mile canon cut through granite by the Gunnison River. The canon is reached by a local road leading from U.S. 50 a few miles east of Montrose, or from a local road leading from State Highway 92, a few miles south of Crawford.

YUCCA HOUSE NATIONAL MONUMENT, southwest of Cortez, contains ruins of the Cliff Dwellers which are of great archaeological value.

HOVENWEEP NATIONAL MONUMENT, on the Utah border west of Cortez, contains groups of ancient cliff dwellings.

INFORMATION FOR MOTORISTS

COLORADO'S HARD-SURFACED HIGHWAYS total nearly 6,000 miles (shown in red on highway map) and there are more than 2,000 miles of gravel surfaced roads (shown in yellow). Colorado's State Highway System comprises approximately 8,000 miles, about equally divided between Federal-aid primary and secondary roads. These roads, which include 21 mountain passes, are kept open throughout the year, are constructed and maintained by the Colorado Department of Highways. County roads are constructed and maintained by the respective counties from their share of highway user revenues and road taxes. Highways in the National Parks, built by the U. S. Bureau of Public Roads, are maintained by the National Park Service.

SPEED LIMITS: On open highways, 60 miles per hour; on open mountain highways, 40 miles per hour; on winding mountain highways and blind curves, 20 miles per hour, unless otherwise posted by the Department of Highways. Inasmuch as such postings are made as a result of engineering and traffic investigations, they constitute the legal speed limits and are the SAFE speeds at which roads may be traveled. More than 3,500 miles of the State Highway System are covered by posted speeds. Speed limit on the Denver-Boulder Turnpike is 65 miles an hour, and it is the only road in the state where a speed in excess of 60 miles an hour is lawful.

AS YOU DRIVE, observe the white and yellow center-stripes on curves and hills — keep in the right-hand lane and do not pass the car ahead while yellow lines is on your lane. "Curve," "Safe Speed" and other caution signs are placed along the highways for your guidance and protection . . . Carburetors adjusted for low altitude driving must be adjusted again, in some cases, for the higher altitudes in Colorado. When stopping for any purpose, park on the shoulder of the highway and side the line of traffic . . . Avoid accidents — drive at a moderate speed and enjoy Colorado's mountain vistas and scenery.

State Patrol Officer Is Motorists' Friend

THE MAN IN THE DISTINCTIVE FRENCH-GRAY is one of 176 uniformed officers of the State Patrol who keep watch on Colorado's highways. His purpose is to make your trip safer. Feel free to consult him.

COLORADO MOUNTAIN PEAKS OVER 14,000 FEET ELEVATION

Fifty-two Colorado peaks — all but 15 of the 67 highest in North America — are 14,000 feet high or more. The state has 830 other peaks more than 11,000 feet in altitude.

NATIONAL FORESTS • SCENIC AREAS • SPECIAL EVENTS

COLORADO'S MOUNTAIN REGION includes 12 National Forests containing 13,697,257 acres administered by the U. S. Forest Service. These National Forests, known as "Green Mountain Reserves" or "Highway Forests" were set aside by the Federal Government for the protection of watersheds, as a source of irrigated farming land, for the conservation of timber, and for the development of these great forest resources for all the people in perpetuity. Game refuges, administered by Colorado's Game and Fish Department, are established for the conservation of elk, deer, mountain sheep, beaver and wild turkeys. Only required made of visitors in the forest areas is that they respect property and be cautious with their campfires, matches and cigarettes.

THOUSANDS OF SPORTSMEN visit Colorado each year to fish and hunt. Hundreds of tons of trout are placed annually in the streams and lakes by Colorado's Game and Fish Department. Season, May 15 to October 31 . . . Deer are plentiful, the annual crop being about 75,000 head. Open season for deer and elk begins October 15. Write Colorado Game & Fish Department, Denver, for information as to license fees.

THE DENVER MOUNTAIN PARKS AREA, a 15-minute drive west from Denver, is a great recreation area in both summer and winter. Short scenic drives include: Lookout Mountain, the grave of "Buffalo Bill" Cody and Pahaska Tepee, a museum of his trophies; Red Rocks and open-air amphitheatre; Bear Creek Canon and Evergreen. The new U.S. 6 highway, through historic Clear Creek Canon, leads to the mining districts of Idaho Springs, Georgetown, Silver Plume, Blackhawk and Central City; and the drive via Echo Lake to summit of Mount Evans . . . In Denver a few of the many points to visit include: Colorado Museum of Natural History and the Zoo, in City Park; night lighting on City Park lake; State Capitol (mountain-view from dome) and State Historical Museum near by; U. S. Army Air School at Lowry Field; Stapleton Airport; Civic Center, and the U. S. Mint.

THE PIKES PEAK REGION, centering around Colorado Springs and Manitou, has long been an outstanding mecca for tourists and those seeking recreation is available. Thrilling scenic drives include Pikes Peak highway (a toll road); Garden of the Gods; Rampart Range, Woodland Park and Ute Pass; Gold Camp highway to the mining town of Cripple Creek and Victor; Palmer Park; Seven Falls; Cheyenne Mountain with its Will Rogers Shrine and Mountain Zoo.

SOUTHWEST FROM PUEBLO, via Highway 76 or Highway 165 through Rye, is a great vacation area in San Isabel National Forest . . . The industrial city of Pueblo is known as the "Steel City of the West" and is Colorado's second city in population.

GRAND MESA, near Grand Junction and Delta, is a two-mile high tableland of vast extent (largest flat-topped mountain in U.S.) that overlooks the fertile valleys.

MINERAL HOT SPRINGS, many of them of high curative qualities, are located on every highway route through Colorado's mountains. The largest group is at Seamboat Springs, on U.S. 40. Others are on Route 40 are located at Idaho Springs and at Hot Sulphur Springs. The famed pool at Glenwood Springs is on U.S. 6 and 24. The springs at Manitou, at Hartsel, and the Cottonwood and Mount Princeton Springs near Buena Vista are all on or adjacent to U.S. 24. Others are located at Canon City and Salida, on U.S. 50; Pagosa Springs, on U.S. 160; Ouray, Trimble and Pinkerton Springs, on U.S. 550; Poncha Springs, on U.S. 285; and Wagon Hot Springs, near Gunnison.

ROOSEVELT NATIONAL FOREST embraces the great mountain region of north-central Colorado adjacent to Boulder, Longmont, Loveland and Fort Collins. A wide variety of scenery and all types of recreation are available in the Arapahoe Glacier area.

THE STATE FLOWER is the mountain Columbine. The State seal carries the latin words "Nil Sine Numine" (Nothing without Providence) . . . The State flag consists of a large red C, with its inside circle colored a golden yellow, and three horizontal stripes, one white, two blue. Blue is for the skies, gold for the sunshine, white for snow-capped mountains, and red for Spanish interpretation of "Colorado" . . . State bird is the lark bunting.

MILEAGE TABLE

AND KEY TO LOCATIONS OF TOWNS IN COLORADO NOT LISTED IN MILEAGE TABLE

TO FIND THE MILEAGE BETWEEN TWO CITIES: Find the two cities on the mileage chart below. Follow down the vertical column under one city until that column intersects the horizontal line of figures running across the table opposite the other city. The figure in the intersection of the two columns is the mileage between the two cities. • In the example printed in red, suppose you want to determine the distance between Estes Park and Lamar on the table. Follow down the vertical column of figures under Estes Park until it meets the horizontal line of figures from Lamar. The two columns meet at the figure 270, which is the distance between the two cities. Mileage figures in the table are tabulated by using the shortest route between the two cities. • The letter-figure designations opposite each city is to aid you in locating the city on the highway map, the letters referring to letters printed vertically on the two sides of the map, and the figures referring to figures printed horizontally at the top and bottom of highway map.
