NATIONAL PARKS AND NATIONAL MONUMENTS

TOP OF THE NATION is a designation properly belonging to Colorado because it is the highest of the 48 States and contains 75 per cent of all the area in the United States which is 10,000 feet or more above sea level. Colorado has 1,143 mountains and peaks which rise to an elevation of 10,000 feet. Of these, 830 peaks tower between 11,000 and 14,000 feet, and 52 peaks — all but 15 of the 67 highest in North America — are 14,000 feet high, or more. Colorado's average altitude is 6,800 feet.

THE WORLD'S HIGHEST AUTO ROAD climbs to the top of Mount Evans, 14,260 feet high, which is 56 miles west of Denver. State Highway 103 runs from Idaho Springs to Echo Lake, which also may be reached by a paved road which leaves U.S. 6-40 at Bergen Park and goes over Squaw Pass. From enchanting Echo Lake, the highway lifts to Mount Evans and breathtaking views far across the plains or over the tops of row upon row of mountain ranges. During the summer of 1955, the Colorado Department of Highways will charge a toll of 50 cents per person, with half price for children, for the 14-mile stretch from Echo Lake to Mount Evans.

THE TOP OF PIKES PEAK, 14,110 feet high, may be reached by an auto road which is owned by the City of Colorado Springs. Toll charge is 50 cents a person.

THE TRAIL RIDGE ROAD, on U.S. 34, through Rocky Mountain National Park, rises to 12,183 feet and is the highest continuous auto road in the world. A fee of $1 a car is charged by the Federal Government.

All three of these highways usually are open from early June through October.

ROCKY MOUNTAIN NATIONAL PARK, embracing 405 square miles of spectacular scenery, is easily accessible the year around over broad, paved roads. The Park contains 14 massive peaks, including 14,255-foot Longs Peak. In the wildlife sanctuary are hundreds of species of flowers and animals, including elk and deer. The Hidden Valley Winter Use Area offers excellent skiing, and shuttle buses operate throughout the area in the winter sports season, usually from December to May. The town of Estes Park, beside Lake Estes, at the Park's eastern entrance, is a well-equipped, year-around resort area; served by U.S. 34 and State Highways 7 and 66. The western Park entrance is on U.S. 34, which goes past Granby Reservoir and Shadow Mountain Lake to Grand Lake. In the Grand Lake-Estes Park areas is located the mammoth Grand Lake-Big Thompson water diversion project of the U.S. Bureau of Reclamation which brings water from the Western to the Eastern Slope through a 13-mile tunnel piercing the Continental Divide.

BLACK CANON NATIONAL MONUMENT near Montrose is truly one of nature's impressive masterpieces. The monument area embraces a 10-mile strip of the most spectacular section of a 50-mile canon cut through granite by the Gunnison River. Scientists say that 400 million years were required by nature to carve out this narrow canon with its sheer walls 3,000 feet high. The canon is reached by State Highway 347, leading from U.S. 50 a few miles east of Montrose, or from a local road leading from State Highway 92, a few miles south of Crawford.

COLORADO NATIONAL MONUMENT, a half-hour's drive west from Grand Junction, is a high-walled mesa of red and white sandstone formations that overlooks the Colorado River and its broad, fertile valley of orchards and farm lands. Buffalo, deer and elk roam the region, protected by the National Park Service. Nearby are great dinosaur beds from which have been excavated skeletons of 75-foot-long reptiles. An excellent highway, built by the National Park Service, winds through the Park area.

DINOSAUR NATIONAL MONUMENT, in northwestern Colorado and northeastern Utah, includes 234,720 acres of primitive country untouched by the works of man. Impressive scenic features have been fashioned by the Green and Yampa Rivers, which flow through deep, narrow canons with precipitous, quarry-carved, delicately tinted sandstone cliffs. These canons are dark and forbidding, with sheer walls which reach a height of 3,000 feet. At Jensen, Utah, a local road from U.S. 40 takes the motorist to the western section of the area where great beds of dinosaurs may be seen.

GREAT SAND DUNES NATIONAL MONUMENT is reached via State Highway 17 and a county road from Alamosa, on U.S. 160. The area includes 46,034 acres of vari-colored sand, a thousand feet high, that lie in ever-shifting waves and rolls in the San Luis Valley, just west of the Sangre de Cristo mountains.

HOVENWEEP NATIONAL MONUMENT, on the Utah border west of Cortez, contains groups of ancient cliff dwellings.

MESA VERDE NATIONAL PARK, in southwestern Colorado, is the largest tract of land in the United States set aside for the antiquities it contains. The Park, 80 square miles in area, embraces a high-walled mesa that rises abruptly 2,000 feet above Montezuma Valley. Deep, time-worn canons with sheer cliff walls pierce the mesa. In these canons, clinging like swallow nests under the lips of the huge cliffs, are the deserted villages of a bygone race, the small-statured Cliff Dwellers. Tree-ring records tell scientists that the Cliff Dwellers inhabited the area as early as 700 A.D., and as late as 1276 A.D. Where they came from, where they went, what happened to them — all is shrouded forever by the mysterious veil of centuries of ghostly silence. An excellent hard-surfaced highway and trails make the ruins easily accessible. Lodge and cabin accommodations and meals are available at reasonable rates at Park headquarters near Spruce Tree Ruin. Park entrance fee, $1 per car. Season, May 15 to October 15. The area adjacent to Mesa Verde includes the last remaining Indian Reservation in Colorado, that of the Southern Ute Indians.

MOUNT OF THE HOLY CROSS may be viewed to good advantage by driving over a county road from U.S. 6 near Vail Pass to Redcliff.

YUCCA HOUSE NATIONAL MONUMENT, southwest of Cortez, contains ruins of the Cliff Dwellers which are of great archaeological value.

INFORMATION FOR MOTORISTS

SPEED LIMITS: On open highways, 60 miles an hour, except the Denver-Boulder Turnpike on which the speed limit is 65; on open mountain highways, 40 miles an hour; on winding mountain highways and blind curves, 20 miles per hour, unless otherwise posted by the Colorado Department of Highways. More than 5,800 miles of the State Highway System are posted.

HIGHWAY CONSTRUCTION may cause slight delays, and motorists are asked to follow instructions, to slow down and to drive carefully through such projects. Today's construction job means better roads for the future.

AS YOU DRIVE, observe the white and yellow center-stripes on curves and hills — keep in the right-hand lane and do not pass the car ahead while yellow line is in your lane. "Curve," "Slippery," "Speed Limit" and other caution signs are placed along the highways for your guidance and protection. In some cases, carburetors adjusted for low altitude driving must be adjusted again for higher altitudes in Colorado . . . When stopping for any purpose, park on the shoulder of the highway outside the line of traffic . . . Avoid accidents . . . drive at a moderate speed and enjoy Colorado's mountain vistas and scenery.

State Patrol Officer is Motorists' Friend

THE MAN IN THE DISTINCTIVE FRENCH-GRAY is one of 231 uniformed officers of the State Patrol who keep watch on Colorado's highways. His purpose is to make your trip safer. Feel free to consult him.

COLORADO MOUNTAIN PEAKS

Fifty-two Colorado peaks — all but 15 of the 67 highest in North America — are 14,000 feet high or more. The State has 830 other peaks more than 11,000 feet in altitude.

NATIONAL FORESTS • SCENIC AREAS • SPECIAL EVENTS

COLORADO'S MOUNTAIN REGION includes 12 National Forests containing 13,715,332 acres administered by the U. S. Forest Service. These National Forests, known in green on State Highway maps, include areas set aside by the Federal Government for the protection of water resources of cities and irrigated farming land, for the conservation of timber, and for the development of these great forest resources for all the people in perpetuity. Game refuges, administered by Colorado's Game and Fish Department, are established for the conservation of elk, deer, mountain sheep, beaver and wild turkeys. Every request made of visitors in the forest areas is that they respect property and be cautious with their campfires, matches and cigarettes.

THOUSANDS OF SPORTSMEN visit Colorado each year to fish and hunt. Hundreds of tons of trout are planted each year in the streams and lakes by Colorado's Game and Fish Department. Season, May 21 to October 31 — Deer are plentiful, the annual crop being about 75,000 head. Open season for deer and elk begins about the middle of October. Write Colorado Game and Fish Department, Denver, for information on license fees.

THE DENVER MOUNTAIN PARKS AREA, a 15-minute drive west from Denver, is a great recreation area in both summer and winter. Short scenic drives include: Lookout Mountain, the grave of "Buffalo Bill" Cody and Pahaska Tepee, a museum of his trophies; Red Rocks amphitheater; Beor Creek Canon and Evergreen. The new U.S. 6 highway, through historic Clear Creek Canon, leads to the mining districts of Idaho Springs, Georgetown, Silver Plume, Blackhawk and Central City; and the drive via Echo Lake to summit of Mount Evans. In Denver a few of the many points to visit include: Denver Museum of Natural History and the Zoo, in City Park; night lighting on City Park lake; State Capitol (mountain view from dome); and State Historical Museum nearby; U. S. Army Air School and Lowry Field; Stapleton Airport; Civic Center; and the U. S. Mint.

THE PIKES PEAK REGION, centering around Colorado Springs and Manitou, has long been an outstanding vacation area. Every kind of recreation is available. Thrilling scenic drives include Pikes Peak highway (a toll road); Garden of the Gods; Rampart Range, Woodland Park and Ute Pass; Gold Camp highway to the mining towns of Cripple Creek and Victor; Pioneer Days; Fourth Cheyenne Mountain with its Will Rogers Shrine and Mountain Zoo, and Cave of the Winds.

SOUTHWEST FROM PUEBLO, via Highway 96 or Highway 165 through Rye, is a great vacation area in San Isabel National Forest . . . The industrial city of Pueblo is known as the "Steel City of the West" and Colorado's second city in population. Near Canon City, world's highest suspension bridge spans the Royal Gorge.

GRAND MESA, near Grand Junction and Delta, is a two-mile high tableland of vast extent (largest flat-topped mountain in U. S.) that overlooks the fertile valleys.

MINERAL HOT SPRINGS, many of them of high curative qualities, are located on every highway route through Colorado's mountains. The largest group is at Steamboat Springs, on U.S. 40. Others on Route 40 are located at Idaho Springs and at Hot Sulphur Springs. The famed pool at Glenwood Springs is on U.S. 6 and 24. The springs of Manitou, at Fairplay, and the Cottonwood and Mount Princeton Springs near Buena Vista are all on or adjacent to U.S. 24. Others are located at Canon City and Salida, on U.S. 50; Pagosa Springs, on U.S. 160; Ouray, Trimble and Pinkerton Springs, on U.S. 550; Poncha Springs, on U.S. 285; and Mountain Hot Springs, near Gunnison.

ROOSEVELT NATIONAL FOREST embraces the great mountain region of north-central Colorado adjacent to Boulder, Longmont, Loveland and Fort Collins . . . a wide variety of scenery and all types of recreation are available . . . Estes Park is one of the gateways.

THE STATE FLOWER is the mountain Columbine. The State seal carries the Latin words "Nil Sine Numine" (Nothing without Providence) . . . The State flag consists of a large red C, with its inside circle colored a golden yellow, and three horizontal stripes, one white, two blue. Blue is for the skies, gold for the sunshine, white for snow-capped mountains, and red for Spanish interpretation of "Colorado" . . . Short for the ruby coloring.

MILEAGE TABLE

AND KEY TO LOCATIONS OF TOWNS IN COLORADO NOT LISTED IN MILEAGE TABLE

TO FIND THE MILEAGE BETWEEN TWO CITIES: Find the two cities on the mileage chart below. Follow down the vertical column under one city until that column intersects the horizontal line of figures running across the table opposite the other city. The figure in the intersection of the two columns is the mileage between the two cities. ● In the example indicated in red, suppose you want to determine the distance between Estes Park and Lamar on the table. Follow down the vertical column of figures under Estes Park until it meets the horizontal line of figures from Lamar. The two columns meet at the figure 269, which is the distance between the two cities. Mileage figures in the table are computed using the shortest route between the two cities. ● The letter-figure designation opposite each city is to aid you in locating the city on the highway map, the letters referring to letters printed vertically on the two sides of the map, and the figures referring to figures printed horizontally at the top and bottom of the highway map.

Historical Highlights

1541-1776: Spaniards, from the south, including Coronado and Escalante, explored southern and western Colorado.

1803: U. S. acquired most of eastern Colorado from France in Louisiana Purchase.

1806-1860: U. S. Army officers — Pike, Long, Fremont and others — explored many sections of Colorado; traders, trappers and frontiersmen, including Kit Carson, Jim Baker, Jim Bridger, Bent Brothers, St. Vrain, Dick Wootton, Ashley, Robidoux and Vasquez, operated in this area.

1848: Mexico ceded to U. S. great portion of Colorado not included in Louisiana Purchase.

1858-1859: Gold discoveries on Cherry Creek, near present Denver, and at Idaho Springs, and Central City, precipitated the rush of gold-seekers, emigrants and adventurers to the Rockies.

1861: Colorado Territory established, population 25,311. Denver chosen capital, 1867.

1876: Colorado admitted to the Union as 38th state; also known as "Centennial State."

1880-1920: Era of American activity in the "Hills," fortunes made and lost; mining towns budded, bloomed and faded, many miles of mountain railroads built. Coal mining industry developed.

1900-1920: Metal mining operations leveled off; agricultural, livestock and industrial activities further developed.

1920-1941: Many miles of mountain railroads abandoned; state system of highways developed and improved roads built to all sections of Colorado.

1941-1945: The War years. Over 100,000 Coloradans entered the Armed Forces. Industry, agriculture and mining stepped up production for the needs of war.

1945-1955: Period of greatest increase in population, industry, business, and resources development begins, along with State's largest road-building program.
