
State of Colorado
EXECUTIVE CHAMBERS
DENVER

RICHARD D. LAMM
GOVERNOR

Dear Highway User:

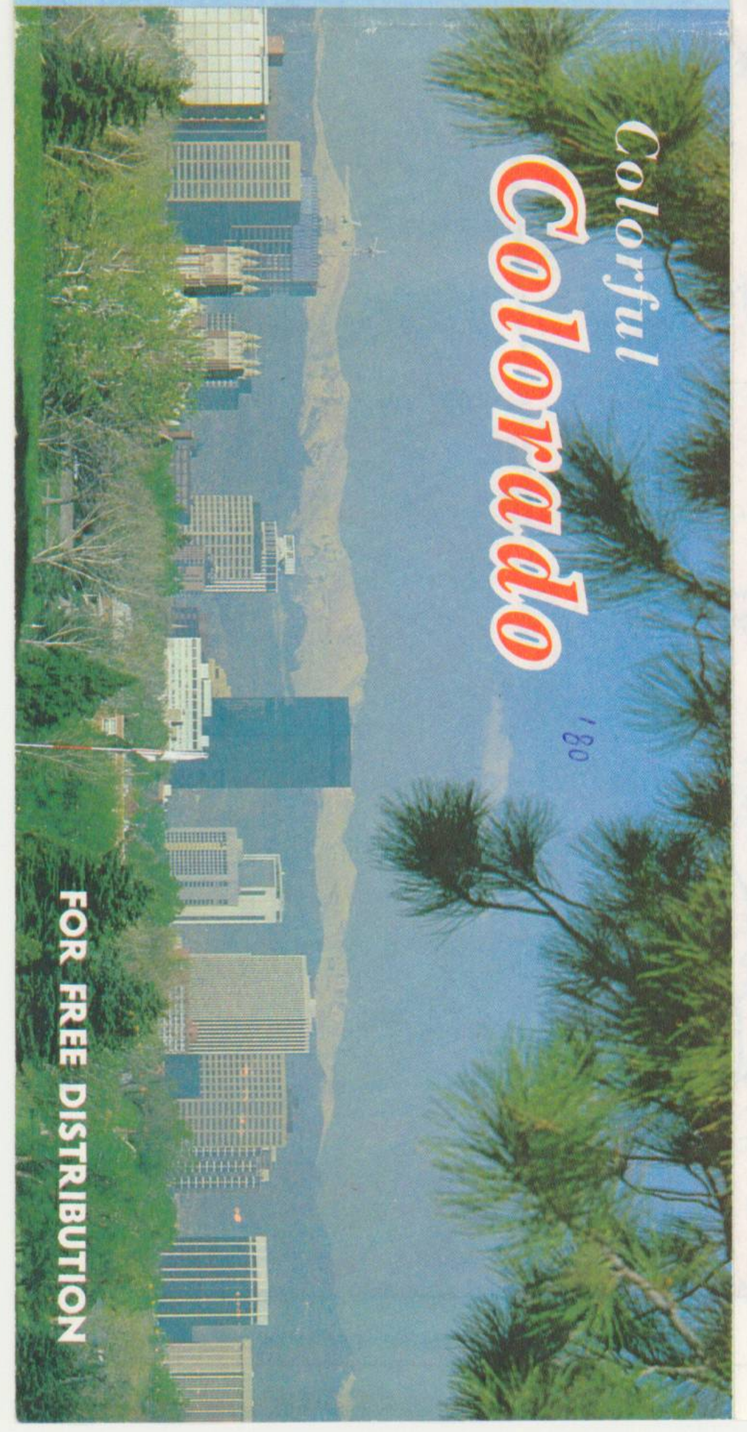
Welcome to "Colorful Colorado." I hope this map will be a useful guide to your travels in Colorado.

The supply of motor fuel is extremely tight in Colorado as it is in the rest of the Country. This is not a temporary situation but rather one that we will have to learn to live with for a long time. So, before you begin your trip, please use the information on this map to carefully plan your travels. That way you may be able to avoid needless driving while taking advantage of Colorado's numerous amenities. Also, please make sure that your vehicle is operating at its peak efficiency, and do not drive in excess of the national speed limit of 55 m.p.h. Colorado strictly enforces that law.

Finally, please practice safe and courteous driving at all times. Best wishes for a safe and pleasant visit in "Colorful Colorado."

Sincerely,

Richard D. Lamm
Governor



DEPARTMENT OF HIGHWAYS—STATE OF COLORADO

DIVISION OF TRANSPORTATION PLANNING
IN COOPERATION WITH THE U.S. DEPARTMENT OF TRANSPORTATION FEDERAL HIGHWAY ADMINISTRATION

THE STATE HIGHWAY COMMISSIONERS

CHARLES L. HANAVAN, JR., Cheyenne Wells, Chairman

Laurence L. Bitner, Walsh
Andra Schmidt Bookman, Greeley
C. W. Brennan, Rifle
Joseph A. Fortino, Pueblo

James Golden, Grand Junction, Vice Chairman
King H. Harris, Denver
Jerome K. Nagel, Denver (at large)
Bill E. Roundtree, Durango

JACK KINSTLINGER
Executive Director

E. N. HAASE
Chief Highway Engineer

HOMER L. BRUTON
Commission Secretary

4201 EAST ARKANSAS AVENUE, DENVER, COLORADO 80222

INFORMATION FOR MOTORISTS

COLORADO, Gateway to the Rocky Mountain West, was admitted to the Union in 1876 and is known as the Centennial State. Colorado is the eighth largest state in area and is the highest in average elevation except Alaska.

THE HIGHEST ALTITUDE is reached by Mount Elbert's 14,433 feet and the peak is one of 53 which soar to 14,000 feet or more. The Nation's highest paved auto road climbs 14,264 feet to the top of Mount Evans near Denver. Lowest elevation is 3,350 feet near Holly.

THE CONTINENTAL DIVIDE, running from north to south, separates the Atlantic Ocean from the Pacific Ocean drainage.

SPECTACULAR SCENERY provides backdrops for National and State Parks and their summer and winter playgrounds which afford boating, camping, fishing, hunting, or relaxation. More than a score of ski areas have won the State the title of "Ski Country U.S.A."

POPULATION of Colorado in 1970 was 2,207,259. Denver, the capital, was 514,678 and the Standard Metropolitan Statistical Area of Denver 1,227,529.

SPEED LIMITS are posted for the benefit of the motorist on practically all State Highways. The lawful speeds are displayed on black-and-white signs. Advisory speeds for road curves or other locations where extra driving care is needed are shown on black-and-yellow signs. In the absence of posted speeds, the following limits established by statute are applicable: 20 miles per hour on narrow, winding mountain highways and blind curves; 25 miles per hour in any business district; 30 miles per hour in any residence district; 40 miles per hour on open mountain highways. Where no special hazard exists or where a reduced speed limit is not posted, a top limit of 55 miles per hour has been set by state law to conform to the national maximum speed limit. This 55-mile-per-hour limit includes interstate highways.

ACCIDENTS outside incorporated cities and towns are to be reported immediately to the Colorado State Patrol or to the office of the County Sheriff having jurisdiction. Within an incorporated city or town the local police are to be notified at once. Drivers involved in traffic accidents are required by law to exchange information with respect to license and registration and also to render reasonable assistance to any person injured.

SCHOOL BUSES are equipped to display flashing warning and regulatory lights. Flashing yellow lights are displayed as a school bus approaches a loading point for receiving or discharging school children. Once the school bus has stopped, flashing red lights are displayed. In addition to the flashing red lights, a red signal arm in the shape of an octagon, and equipped with flashing red lights, is extended from the left side of the bus. A motorist traveling in either direction on a two-way roadway is required to stop before reaching a school bus whenever the flashing red lights are in operation. On a four-lane highway with separate roadways for each direction of travel, a driver is required to stop for the flashing red lights only when traveling in the same direction as the school bus. "Separate Roadways" means a highway that is divided into two or more roadways by a depressed, raised, or painted median or other intervening space serving as a clearly indicated dividing section or island.

COLORADO has many miles of important connecting county roads that in numerous cases are the only access to communities, to scenic and recreational areas. Motorists planning travel in remote areas, particularly on unimproved roads, are advised to make local inquiry concerning road conditions. During the winter months when traveling in remote areas it is advisable to carry an emergency supply of food, water and blankets as well as tire chains. During storms or when roads are icy or snow-covered, the Department of Highways may require the use of these tire chains or snow tires.

CONSERVATION STICKER or permit is required for use of most National Forest Campgrounds and National Parks. There is also a permit required for the State Recreational Areas.

PUBLIC ACCOMMODATIONS LAW in Colorado requires that the places of public accommodation shall be open to all persons alike, regardless of race, creed, or ancestry.

KEEP OUR HIGHWAYS CLEAN by using a litterbag in your car and by depositing trash in the litter barrels that are provided along the highways. The Colorado Litter Control Act prescribes a penalty of fine and/or imprisonment for littering the highways.

A TIGHTLY CLOSED AUTOMOBILE can be a particular hazard in high altitude where the lack of oxygen causes motor vehicles to emit more carbon monoxide than at sea level. Yet, the human body can tolerate much less carbon monoxide at high altitude because of the lack of oxygen. The presence of carbon monoxide is not normally detected by the motorist until critical levels have developed. An air vent should be kept slightly open at all times, both summer and winter. If you get a headache or become drowsy, open all windows and breathe fresh air for several minutes. The same advice applies when running the motor in a parked vehicle.

POINTS OF INTEREST

SELECTED HISTORIC DISTRICTS

1 **CENTRAL CITY HISTORIC DISTRICT**—The richest square mile on earth, Colorado's first boom town following discovery of gold in 1859 by John Gregory. Miners from all over the world brought a love of culture and beauty, which is still evident in the Victorian facades of the buildings and the Central City Festival during the summer months F-15

2 **CRIPPLE CREEK HISTORIC DISTRICT**—Colorado's greatest gold camp—the "Bowl of Gold," rests beneath an ancient volcano, Mt. Pisgah. The hills above the town are covered with the remains of the mines, headframes, shaft houses, hoists and tailings piles, while off to the southwest one may enjoy a spectacular vista of the Sangre de Cristo Range J-16

3 **GEORGETOWN-SILVER PLUME HISTORIC DISTRICT**—The oldest silver mining region in the state of Colorado. The Silver Queen of the Rockies hosts some of the finest examples of Victorian architecture in the United States. Georgetown is one of the few towns originally built of wood that did not suffer a major fire. This was due to the efforts of the fire brigades known across the United States for their efficiency, organization and trophies won in competition F-14

4 **INTER-LAKEN HISTORIC DISTRICT**—Visitors to the Inter-Laken Resort came via railroad and transferred to stagecoach, for a "roughing it" experience. The resort had electricity, telephone service and its own water system. The resort consisted of a hotel, riding stables, billiard hall, dance hall pavillion, lake dock and assorted small buildings H-11

5 **LAKE CITY HISTORIC DISTRICT**—Settled in 1875, this community became the chief distributing point for the mining industry in the San Juans. The oldest Presbyterian Church on the western slope is situated in Lake City. In 1883, Lake City was the site of the trial of Alferd Packer, the only person to stand trial for cannibalism L-8

6 **LEADVILLE HISTORIC DISTRICT**—"Cloud City" or the carbonate camp called Leadville, the highest incorporated city in the United States. At one time surpassed all Colorado communities, except Denver, in population H-12

7 **MORRISON HISTORIC DISTRICT**—The townsite land was homesteaded by George Morrison in the 1860's. The Morrison area was a popular picnic area for Sunday excursion trains of the Denver South Park and Pacific Railroad 1

8 **NORTH FORK HISTORIC DISTRICT**—Settled by the Denver South Park and Pacific Railroad in the late 1800s, the North Fork Historic District was a popular resort and picnic area. The district had a thriving timber business in the early years, as almost 30 car loads of lumber per day were shipped to Denver from Buffalo. As late as 1890, the good timber within 15 miles of Buffalo had been harvested G-15

9 **SILVERTON HISTORIC DISTRICT**—The Gem of the Rockies, terminus for the "Silverton" railroad, a monument to man's engineering skill, audacity, and pioneering spirit. Silverton at one time had the distinction of being the only town in the United States served by four narrow gauge railroads M-6

10 **TELLURIDE HISTORIC DISTRICT**—Located in the majestic San Juan Mountains of southwestern Colorado, Telluride got its start from the mining activities in the area. From the nearby Ames power plant, the community was supplied with electricity from the first long distance-high voltage alternating current line in the world M-6

SKI AND WINTER SPORTS AREAS

11 **ARAPAHOE BASIN**—Ski and Winter Sports Area F-13
12 **ASHCROFT**—Winter Sports Area H-9
