EXECUTIVE SUMMARY

The Jail Based Behavioral Health Services (JBBS) Program Annual Report provides a review of the program's fiscal information, goals, services and outcomes for Fiscal Year 2016-2017 (FY 17 or FY 16-17).

The JBBS Program was originally implemented in October 2011 to support county sheriffs in providing screening, assessment and treatment for substance use disorders and co-occurring substance use and mental health disorders to people who need such services while they are in jails. The program is funded by two funding streams:

- 1. The Correctional Treatment Cash Fund created by the passage of SB 12-163. The Correctional Treatment Board oversees and allocates funds in pursuant to C.R.S. 18-19-103.
- 2. SB 2013-215 Recreational Marijuana Tax Revenue Funds
 In FY 16-17 the Office of Behavioral Health (OBH or the Office) reprocured contracts for a five year term, to be renewed annually with County Sheriff's Departments. As of July 1, 2016, JBBS programs are in forty five (45) county jails across the state of Colorado. New programs

The Office expended \$4,326,232 of the \$5,100,000 allocation for the program. Statewide, programs screened a total of 4,368 individuals for mental illness, substance use disorders, trauma, and traumatic brain injuries. In FY 17, 3,159 individuals were admitted to JBBS programs and received treatment and transition services.

were implemented in Archuleta, Pitkin and Moffat counties in FY 16-17.

Introduction

The JBBS program funds provision of evidence-based behavioral health services, with continuity of care extending into the community. Sheriff departments are recipients of these funds, either individually, or as a multiple-county sheriff department partnership. In accordance with the legislation, all funds are used to provide behavioral health services for adults (18 years of age and older) with substance use disorders or co-occurring substance use and mental health disorders.

OBH contracts with sheriff departments to partner with local community provider(s) who are currently licensed by the Office to provide substance use disorder services. Treatment providers offer services within the jail, and have the capacity to provide free or low cost services in the community to clients upon their release. Most programs have at least one clinician position to offer screenings, assessment and treatment in the jail and a case manager position dedicated to transitional care and a seamless re-entry into treatment services in the community. Treatment providers screen all inmates referred to the program for presence of substance use disorders, mental health disorders, trauma, and traumatic brain injury.

The table below shows the contract amounts for programs and the funds expended by each program for FY 17.

FUNDED COUNTY SHERIFFS AND AWARD AMOUNTS

COUNTY SHERIFF	FY 2017 AWARD AMOUNTS	FY 2017 UNEXPENDED
Alamosa (partnering with Conejos County)		
	\$120,000	\$17,107

PROGRAM GOALS

The goal of the JBBS Program is to provide appropriate behavioral health services to inmates while supporting continuity of care within the community after release from incarceration. This approach should result in shorter jail sentences and decreased recidivism through better identification and treatment of behavioral health needs.

COUNTY SHERIFFS AND TREATMENT PROVIDER PARTNERSHIPS

COUNTY OFFICIAL TO AND INCAT	
COUNTY SHERIFF AND FUNDING START DATE	TREATMENT PROVIDER(S)

Weld July 2013	Behavioral Treatment Services North Range Behavioral Health		

Table 2. JBBS County Sheriffs, Partnering Providers and Funding Start Dates

CLIENTS SERVED

ADMISSIONS AND DISCHARGES

In FY 17, 876 females and 2,283 males were admitted in JBBS programs across the state for a total of 3,159 admissions. The total number of discharges from programs in FY 17 was 2,910. Discharges are broken into two categories: successful and unsuccessful. A discharge is considered successful when the client is in compliance with JBBS treatment recommendations at the time of discharge. For example, if a client is transferred to another facility while they are in compliance with treatment, this would be reported as a successful discharge. A discharge is considered unsuccessful when the client is discharged while not in compliance with JBBS treatment recommendations or the client is removed from the JBBS program as a result of disciplinary action.

Criteria:

- 1. The client must have substance use disorder and a mental health diagnosis.
- 2. The client must be incarcerated for at least 1 month following the intake.
- 3. The client must want services and voluntarily engage in programming.

For a breakdown of FY 17 admissions and discharges by program see Appendix A.

Figure 1 below provides a demographic breakdown of the clients admitted to the JBBS programs in FY 17.

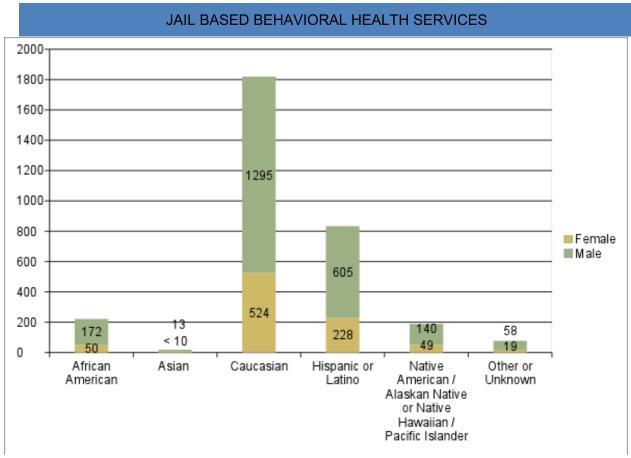

Figure 1. JBBS Admission Demographics for FY17

A successful discharge is defined as one in which the client completes the program according to the treatment plan or is transferred or released from jail while they are fully compliant with treatment requirements. An unsuccessful discharge is defined as a discharge for non-compliance, disengagement from treatment, or disciplinary sanctions within the jail.

Figure 2 below shows the trend of Admissions and Discharges in the six fiscal years since the program's inception in FY 11-12.

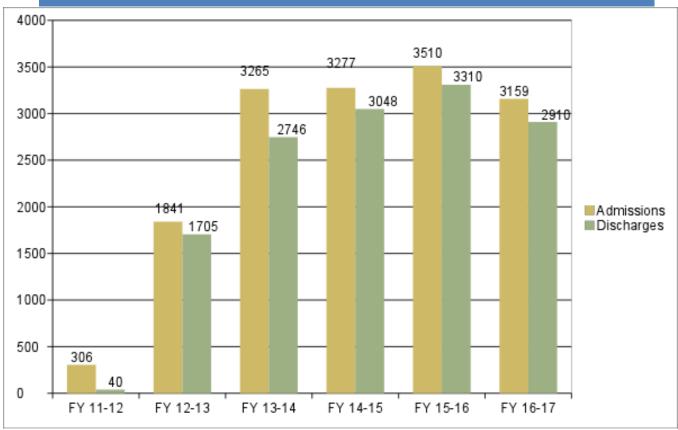

Figure 2. JBBS Admissions and Discharges Trends FY 11-12 through FY 16-17

Figure 3 below compares successful discharges and unsuccessful discharges during the six fiscal years since the program's inception in FY 11-12. A successful discharge is defined as one

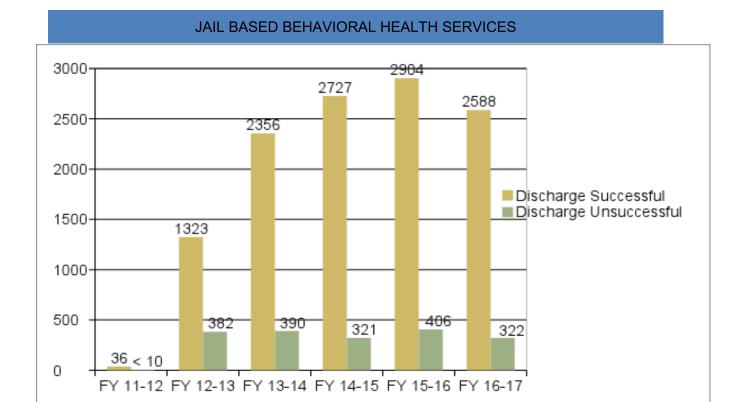

Figure 3. JBBS Successful and Unsuccessful Discharges, FY 12 through FY 17

SERVICES PROVIDED

ADMISSION CRITERIA

All JBBS programs are contractually required at a minimum to offer services to clients with a Substance Use Disorder diagnosis in the jails. The programs can also admit clients who have a co-occurring mental illness.

Programs can opt to implement further admission criteria based on the facility's needs and size. Table 3 shows each facility's admission criteria.

County	Admission Criteria		
Adams	 Must have a substance abuse issue and score higher than a 2 on the SSI. Client must want services and voluntarily engage in programming 		
Alamosa/Conejos	Clients must score for needing treatment on the MMS or MSSI SA.		

JAIL BASED BEHAVIORAL HEALTH SERVICES			
Arapahoe	 Participants incarcerated in the ACSODF over the age of 18 Participants who are sentenced to a minimum of four months when accepted in the program Participants will be entering into the community upon release from ACSODF Participants do not have to be sentenced but the goal is that they will be in custody for a minimum of four months to complete the program) Presence of a DSM-V diagnosis for substance abuse or dependence and who may also meet DSM-V criteria for a co-occurring mental illness There is an expectation that participant will make progress toward treatment goals while receiving this level of care (if progress is not being made or client is disruptive in treatment, they may be removed from the program based on JBBS team judgment) Participants with sex offenses are may be excluded from the program Participants with violent felonies in his/her recent past will be discussed on a case by case basis. Acceptance into the program will be agreed upon by the entire JBBS treatment 		
Boulder	 Must be present in facility for at least 45 days Not anticipating a DOC sentence Must want services and voluntarily engage in programming Substance use disorder or dual diagnosed 		
Clear Creek	Must have a substance use disorder and/or mental health health diagnosis		
Delta, Ouray, Gunnison, Hinsdale, Montrose and San Miguel	 The client must have a SUD diagnosis and score higher than four on the substance use disorder screen The client must want services and voluntarily engage in programming the SA screen. The client must want services and voluntarily engage in programming. 		
Denver	Must be post conviction Must have substance use disorder		

JAIL BASED BEHAVIORAL HEALTH SERVICES			
	 Clients must have a substance use issue as self-reported Must be in jail for a minimum of 30 days 		
El Paso	 Participants must have a minimum of a 60-90 day sentence or referral from the courts or probation/parole No sex offense charges, violent offenders (F2 or greater) 		
Garfield, Eagle, Grand, Moffat, Mesa, Pitkin and Summit	Submit request for services if client has substance use disorder		
Jefferson	1.Clients must have a substance use issue and screen positive for SPMI for JCMH and positive for trauma for BTS 2. Clients must have 90 days remaining in the jail from the screening date		
La Plata, Archuleta, and Montezuma	 The client must be diagnosed with a Substance Use Disorder or Mental Health and a Substance Use Disorder. The client will voluntarily attend services provided in the jail. 		
Larimer	 A desire to voluntarily enroll and participate in treatment while incarcerated at the jail The likelihood for being in the facility for at least 6 weeks from date of enrollment A self-reported history of substance use disorder Previous mental health diagnosis/history of treatment or high probability of meeting criteria for a mental health disorder. 		
Logan, Elbert, Lincoln, Morgan, Washington and Yuma	 Must have substance use concerns within the past year Client must be willing to engage in either SUD and/or dual services 		

JAIL BASED BEHAVIORAL HEALTH SERVICES			
Otero, Bent, Baca, Prowers and Crowley	 The client must report a substance abuse problem within the past twelve months The client must request and willingly engage in SUD treatment and/or mental health services The client has a likelihood of remaining in the jail for at least 30 days 		
i debio	 Must be in jail for a minimum of 90 days from the time they are placed in the program Client must have a risk score of 4 or higher on the MRT assessment Must have history of substance abuse or mental health Must have DUI or DWAI for Level II 		
Weld	 Individual must have a Substance Use Disorder Must not be sentenced to DOC 		

Table 3. JBBS Program Admissions Criteria

SCREENING

All programs are required to screen for mental health disorders, substance use disorders, trauma and traumatic brain injury. Clients who screen positive for a substance use disorder or a co-occurring mental health disorder and substance use disorder are eligible for services in the JBBS program. The clinicians and case managers then complete a full assessment designed to assist with diagnosis, determine treatment needs and offer appropriate services.

In FY 17 all JBBS programs were required to utilize one of the screening tools listed in Table 4 below to meet contract requirements. This was implemented to create similar requirements to meet program eligibility criteria across the state.

Substance Use Disorder Screening	Mental Health Disorder Screening	Trauma Screening	Traumatic Brain Injury Screening
Standardized Offender Assessment- Revised	Colorado Criminal Justice Mental Health Screen – Adult (CCJMHS-A)	PTSD Checklist	HELPS Brain Injury Screening Tool
Addiction Severity Index	Brief Behavioral Health Screen	Trauma Symptom Inventory	Traumatic Brain Injury Screening Tool

Simple Screening Instrument- Revised

Table 4. JBBS Programs Screening Tool Options

Figure 4 shows the JBBS program statewide total number of client screenings completed for mental health disorders (MH), substance use disorders (SUD), trauma, and traumatic brain injuries (TBI). The chart also shows the total number of positive screens for the screenings completed. For mental health – positive screen indicating presence of a mental health disorder – 2,539 clients screened positive; 3,733 screened positive for substance use disorders; 4,086 had both a mental health and substance use disorder positive screen. The number of positive screens for experiencing a traumatic brain injury was 1,327 and the number of positive screens for experiencing a traumatic event was 2,338. The number of positive screens for both TBI and trauma was 980. Appendix C shows a breakdown of the screenings for each program.

Each program has different criteria and processes for which inmates are selected to be screened. Some programs are able to screen all inmates who are booked into the county jail. Other programs screen upon the offender's request or based on responses on classification/booking screenings. As a result of this, the number of screenings completed by each program may vary and screening results presented in this report should not be viewed as an indication of the actual number of offenders with mental health issues, substance use disorders, trauma or traumatic brain injuries in the jails across the state.

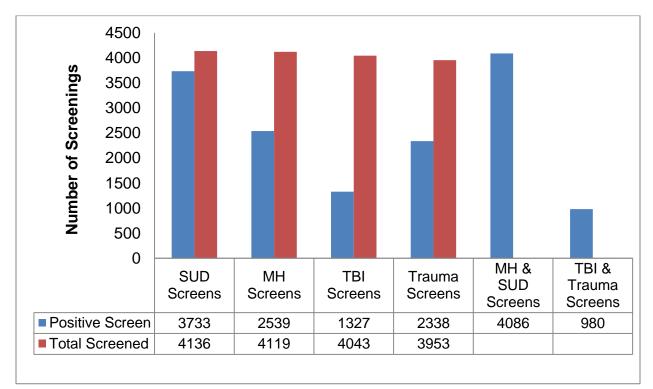

Figure 4. JBBS FY 17 Statewide Screening Data

TREATMENT SERVICES

Figure 5 below shows the services offered to date in the JBBS programs statewide. See Appendix D for a breakdown of the services offered at each program.

The major categories of services are:

- Assessments/Evaluations
- Total Group Services
- Individual Therapy for substance use disorders, mental health disorders, co-occurring disorders, trauma, and psychoeducation
- Transition Tracking following up with clients after release from facilities
- Case Management Services including assistance or referrals for benefit acquisition, housing, vocational needs, employment acquisition, meeting legal obligations and transportation
- Substance Use Disorder treatment services including assistance with placement or referral to community-based treatment services
- Mental Health treatment services including crisis intervention and medication management

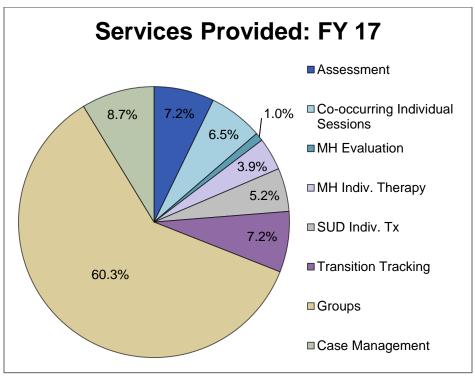

Figure 5. JBBS Services provided in FY 17

Program Outcomes

TRANSITION TRACKING

Programs are required to follow-up with all clients who are successfully discharged from the program and released to the community at 1, 2, 6 and 12 months after release. Clinicians are required to either call the client or track treatment engagement at the community-based treatment provider to which the client was referred.

The following outcomes are tracked for transition tracking:

- 1. In Treatment: Client is engaged in community-based treatment services as recommended on the transition plan
- 2. Not In Treatment- Client is tracked via the community-based treatment agency or the client reports to not be in treatment services as recommended on the transition plan
- 3. New Crime/Regressed- Client returned to jail for violations or committed a new crime
- 4. Status Unknown- Client cannot be reached or tracked
- 5. Not Applicable- Client sentenced to Department of Corrections or client not tracked
- 6. Treatment Completed- Client completed treatment as recommended at release from jail Table 5 below shows statewide tracking outcomes. See Appendix E for a breakdown of outcomes by program.

Tracking Status	Time Period	Number of Clients	Percentage of Clients
In Treatment	Month One	2099	40.3%
	Month Two	2088	40.3%
	Month Six	1958	39.9%
	Month Twelve	1398	37.7%
Treatment Completed	Month One	52	0.01%

Table 5. JBBS Transition Tracking Outcomes FY 17

One of the main program outcomes currently being measured for the JBBS program is successful transition and continuity of care. The transition tracking data shows which programs show consistency in follow-up with clients upon release. In the FY 17, 40.3% (2,099 of 5,213) of clients were engaged in treatment services as recommended in their transition plan 1 month after release; after 2 months the percent of clients engaged in services remained the same at 40.3% (2,088 of 5,176). At the 6 month follow-up, 39.9% (1,958 of 4,904) of clients tracked were still engaged in treatment services. At 12 months, 37.7% (1,398 of 3,706 clients) were still engaged in community-based treatment services.

RECOVERY SUPPORT SERVICES

In order to address immediate needs and basic necessities for individuals releasing from jail; all programs are able to utilize funds to assist clients with a variety of services such as transportation options to include bus tokens or taxi cab vouchers in areas with no or limited public transport, funding to pay for obtaining identification, basic hygiene items, medication, food and emergency housing. To be eligible for these funds, clients must be successfully discharged from the jail program and transitioned to community based treatment services as recommended at discharge from the jail. A list of allowable Recovery Support Services can be found under Appendix B.

OPIATE ADDICTION SPECIALTY SERVICES

Due to the heroin and opioid use prevalence in the state and across the country, OBH has encouraged jails in making Medication Assisted Treatment available to individuals. The new contracts for the JBBS program offers guidance on policies Sheriff's Department to consider implementing in response to the needs of opiate using individuals.

In FY 16, OBH funded 4 pilot projects to distribute Narcan nasal kits (a FDA approved overdose reversal medication) at jails in the metro area. OBH partnered with The Harm Reduction Action Center to train medical staff at jails to identify individuals who are at high risk of overdosing on heroin post release. Due to the success in the implementation of the pilots; the FY 17 contracts provided funding for the purchase of Narcan nasal kits for all JBBS contracts. These kits may be distributed to any individuals deemed high risk for opiate overdose at discharge from the jail facility.

FUTURE DIRECTIONS

PROGRAM EVALUATION AND RECIDIVISM STUDY

OBH received funding from the Correctional Treatment Board to contract with Health Management Associates- an independent consultant to evaluate the JBBS program. The evaluation is intended inform future directions in the following areas: program improvement, best practices, data collection, expansion of the program, standardizing program elements, screening protocols, resource needs, behavioral health outcomes, and recidivism and criminal justice system outcomes. The program evaluation has been underway since October 2016, a final report is anticipated to be available in the June 2018.
