**Note:** All CBMS caused errors have been manually removed from the county Error Rate (last column) and the state is taking the responsibility of correcting CBMS caused issues. However, the county must still correct the individual case.

**It is critical that counties with a payment error rate in excess of 3% take measures to reduce the payment error rate in the county in order to ensure payment accuracy as incorrect benefits have a negative impact on the households served and cause unnecessary hardship on these households with either providing less benefits that are much needed or claims in addition to additional workload for county workers.**

# SNAP QA Active Error Rates

(October 2012 through September 2013)

Food Nutrition Services (FNS) required states to collect and report all payment errors as of October 1, 2011 (FFY12) for tracking, trend analysis and reports to congress of the suitability if the current threshold amount. All states must be at or below the Above Threshold National Average to avoid liability and/or sanctions. At this time, there is no goal or standard for below threshold errors or the (overall) active payment error rate. SNAP QA reports the Payment Error Rate (PER) on active cases for improved trend analysis and to achieve a more accurate understanding of causes and areas-of-risk. These are: 1) payment errors at or below \$50 and 2) all payment errors regardless of amount (PER). The PER should reflect error trends found at the local level through SNAP Case File Reviews and this figure should be used at the local level to implement program integrity activities.

## State Below the Threshold Payment Error Rate:

Active Payment Error Rate (below) =

- Total Cases Reviewed = 1009
- Total Cases with Errors = 166
- Total Issuance = \$295,846
- Total Misspent = \$3,796
- Active Case Error Rate = **16.45%**

## State Payment Error Rate:

Active Payment Error Rate = **6.79%**

Target Goal = 3%

- Total Cases Reviewed = 1009
- Total Cases with Errors = 281
- Total Issuance = \$295,846
- Total Misspent = \$20,088

Active Case Error Rate = **27.85%**
