Market Rate Survey of Child Care Providers Summary and Methodology

Attachment 2.7.4
Market Rate Survey
Colorado State Plan for CCDF Services
Plan Period FFY 2012 - 2013

Introduction

Qualistar Colorado developed a market rate survey of licensed child care centers, family child care providers, and school age child care facilities in January of 2011 for the Colorado Department of Human Services, Division of Child Care. Qualistar Colorado manages a network of child care resource and referral (CCR&R) partners that serve all 64 Colorado counties. CCR&Rs collect costs of child care on a semi-annual basis in a networked database called NACCRRAware. Data from Colorado's NACCRRAware database was utilized to complete this survey.

Methodology

The rate information collected and maintained by CCR&Rs is entered into the NACCRRAware database as a full time weekly rate. Rates not reported by the child care program as full time weekly rates are converted to full time weekly rates according to the following standardized formulas: Monthly rates are divided by 4.33. Daily rates are multiplied by 5. Hourly rates are multiplied by 45. Hourly rates for before and after school programs are multiplied by 17.5.

Survey Target Facilities - The target population for this survey was child care centers, family child care homes, and school age child care facilities that serve children full time. Child care programs that meet those criteria and that had reported their rates between July 1, 2010 and December 31, 2010 were included in the survey.

Rates for the following age groups were pulled: Infants (0-12 months), Toddlers (12 - 24 months), Preschoolers (2 years to School Age), and School Agers (attending school). For School Agers, both full day out of school rates and before and after school rates were pulled.

Survey Target Facilities Refinement - After the data were compiled from NACCRRAware, all of the records that had incomplete data, and those without a market price (such as Head Start and school-district run programs), were taken out of the survey.

The final response rate was 83.0%.

Response Rates				
License Type	# of Licensed Facilities	# of Facilities Full Time, Charge Fees (see Survey Target Facilities above)	# of Facilities Included in Final Survey (see Survey Target Facilities Refinement above)	Survey Response Rate
Child Care Centers	1198	884	718	81.2%
Family Child Care	3271	3102	2626	84.7%
School Age Facilities	819	428	321	75.0%
Total	5288	4414	3665	83.0 %

The average, median, minimum, maximum, 75th percentile, and mode were calculated for each county according to type of care and age group. Counties were grouped by County Designation as defined below.

Market Rate Survey of Child Care Providers Summary and Methodology

(Summary and Methodology continued)

Summary

No changes were made to the Market Rate Survey methodology from the 2009 Market Rate Survey.

As in 2009, this MRS calculates the true 75th percentile at the County Designation level. All rates for each rate category within the County Designation were ordered and the 75th percentile was calculated.

In comparing the rates of the 2009 Market Rate Survey to the 2011 Market Rate Survey (see *Comparison to Previous MRS* worksheet for details), it was found there were some increases and some decreases by age of child and by county designation. Within child care center license type providers statewide there was an average increase of 6.34%. For family child care license types providers statewide there was an average increase of only .026%. For school age child care license type providers there was a decline of rates by .03%; however this is a small number of providers total in the state and changes of any type impact the percentage more dramatically than in other categories.

State Recommended Provider Reimbursement Rates

The State Recommended Provider Reimbursement Rates are determined to address the federal Child Care Development Fund (CCDF) regulation that requires states to certify that the payment rates for subsidized child care services are sufficient to ensure equal access to child care services for eligible and non-eligible families. The methodology used is the following –

In each county designation category (see information below regarding county designation categories of A, B, C, D), the 75th percentile of all provider rates in that category is calculated to reach the State Recommended Provider Reimbursement Rates.

Under Colorado's welfare reform legislation, county departments of social services/human services have the flexibility to set their own rates. Therefore, the State Recommended Provider Reimbursement Rates are for informational and reference purposes to be used by counties as guidance to provide equal access as described above.

State Recommended Provider Reimbursement Rates					
Child Care Centers License-Type					
	0-12 Months	12-24 Months	2 Years to School Age	School Age (Full Day)	School Age (Before and After)
Designation A	\$ 59.80	\$ 52.00	\$ 45.00	\$ 39.90	\$ 24.00

Designation C				\$ 37.25	\$ 16.00
Designation D				N/A	\$ 18.00

Market Rate Survey of Child Care Providers Summary and Methodology

(Summary and Methodology continued)

County Designation Procedure or Information:

Market Rate Survey results were aggregated into four market areas called "Designations."

County Designation is determined by the following Criteria:

- (1) Population (over 35,000 and under 35,000) as determined by census reporting;
- (a) County combined average child care provider market rate;
- (b) Household income as determined by census reporting; and,
- (c) The Basic Industries Group Tourism Commuter Index.

Each county fits into a designation by applying the following standards:

Designation A: County has population greater than 35,000 and is higher than the median in two of three categories (a - c).

Designation B: County has population greater than 35,000 and is NOT higher than the median in two of three categories (a - c).

Designation C: County has population below 35,000 and is higher than the median in two of three categories (a - c).

Designation D: County has population below 35,000 and is NOT higher than the median in two of three categories (a - c).
