Market Rate Survey of Child Care Providers Summary and Methodology

Introduction

Qualistar Colorado developed a market rate survey of licensed child care centers, family child care providers, and school age child care facilities in January of 2013 for the Colorado Department of Human Services. Qualistar Colorado manages a network of child care resource and referral (CCR&R) partners that serve all 64 Colorado counties. CCR&Rs collect costs of child care on a semi-annual basis in a networked database called NACCRRAware. Data from Colorado's NACCRRAware database were used to complete this survey.

Methodology

the child care program as full time weekly rates are converted to full time weekly rates according to the following standardized formulas: Monthly rates are divided by 4.33. Daily rates are multiplied by 5. Hourly rates are multiplied by 45. Hourly rates for before & after school programs are multiplied by 17.5.

Survey Target Facilities - The target population for this survey was child care centers, family child care homes, and school age child care facilities that serve children full time during the entire year or during the school year. "Full time" is defined as 25 hours per week or more for children younger than school age, and 17.5 hours or more per week for before and after school care for school age children. Child care programs that meet those criteria and that had reported their rates between June 1, 2012 and December 31, 2012 were included in the survey.

Rates for the following age groups were pulled: Infants (0-12 months), Toddlers (12 - 24 months), Preschoolers (2 years to School Age), and School Agers (attending school). For School Agers, both full day out of school rates and before and after school rates were pulled.

Survey Target Facilities Refinement - After the data were compiled from NACCRRAware, all of the records that had incomplete data, and those without a market price (such as Head Start and other subsidized programs), were taken out of the survey.

The final response rate was 91.8%.

Response Rates				
License Type	# of Licensed Facilities	# of Facilities Full Time, Charge Fees (see Survey Target Facilities above)	# of Facilities Included in Final Survey (see Survey Target Facilities Refinement above)	Survey Response Rate
Child Care Centers	1154	970	841	86.7%
Family Child Care	2843	2606	2559	98.2%
School Age Facilities	845	692	518	74.9%
Total	4842	4268	3918	91.8%

The average, median, minimum, maximum, 75th percentile, and mode were calculated for each county according to type of care and age group. Counties were grouped by County Designation as defined below.

Summary

Market Rate Survey of Child Care Providers Summary and Methodology

Significant changes were made to the County Designation structure for this 2013 MRS.

As in 2011, this MRS calculates the true 75th percentile at the County Designation level. All rates for each rate category within the County Designation were ordered and the 75th percentile was calculated. New for this 2013 MRS is the addition of the average rates at the County Designation level.

Due to the significant changes in the County Designation structure, comparing the rates of the 2011 Market Rate Survey to the 2013 Market Rate Survey is not possible.

State Recommended Provider Reimbursement Rates

The State Recommended Provider Reimbursement Rates are determined to address the federal Child Care Development Fund (CCDF) regulation that requires states to certify that the payment rates for subsidized child care services are sufficient to ensure equal access to child care services for eligible and non-eligible families. The methodology used is the following –

In each county designation category (see information below regarding county designation categories of Level 1, Level 2, Level 3, Level 4 and Level 5), the 75th percentile of all rates in that category is calculated to reach the State Recommended Provider Reimbursement Rates. These Recommended Rates are daily rates that are calculated by dividing the weekly rates found on the Level Summary sheets by 5.

Under Colorado’s welfare reform legislation, county departments of social services/human services have the flexibility to set their own rates. Therefore, the State Recommended Provider Reimbursement Rates are for informational and reference purposes to be used by counties as guidance to provide equal access as described above.

County Designation Procedure or Information:

Market Rate Survey results were aggregated into five market areas called "Designations."

Market Rate Survey of Child Care Providers Summary and Methodology

County Designation is determined by the following Criteria:

Each county fits into a designation by applying the following standards:
