COMMISSIONERS' REPORT.

OFFICE OF BOARD OF COMMISSIONERS, }
COLORADO STATE PENITENTIARY, }
December 1st, 1882. }

To His Excellency F. W. Pitkin, Governor of Colorado :

SIR :—In compliance with the law, we herewith have the honor to submit the following biennial report of the management of the penitentiary for the two years ending November 30th, 1882 :

The reports of the warden, physician and clerk, herewith transmitted, give the details ; we confine ourselves to a general review of the accomplishments of the term, together with an estimate of our needs for the next two years, and also some suggestions as to the necessity of various changes in the law governing the institution.

The improvements made during the two years have been many, and of such a character that the Colorado penitentiary, although much smaller than many others, now compares favorably with the best institutions of the kind, as to its appointments, its government and its discipline. The convicts have been constantly at work during the whole term, either upon work earning money to help bear the expense of their keeping, or upon permanent improvements for the benefit of the State. The cash earnings for the two years have been, in round numbers, sixty thousand dollars, which is about three times the earnings of the two preceding years, and double what it was estimated two years ago, that they would be.

The inventory of supplies, building material, &c., and of material in use, on hand November 30th, 1882, shows,

that we have on hand property of that character, to the value of \$37,873.26. The inventory of two years ago amounted to \$22,026.83, showing a gain, during the two years, of \$14,846.43. In establishing our lime trade (to which we will refer more at length further on), we have invested in permanent improvements, horses and wagons, and other necessary tools, &c., \$30,000, which we have on hand as working capital in that business. The expenses for the two years have been much larger than was anticipated two years ago, amounting to \$204,736.04, from which however should be taken the amount of our gain in property, as shown by inventory, viz., \$14,846.43, and \$30,000 worth of property invested as capital in the lime business, the total of these two items being \$44,846.43, and which amount taken from the total expenses, leaves \$159,889.61 as the actual expenses for the two years.

The cash earnings of the institution for the two years was \$59,787.14, and other earnings, being pork raised and fed to the convicts, as follows: 16,847 pounds at 10 cents per pound, amounting to \$1,684.70, making the total earning \$61,471.84. Taking that amount from the \$159,889.61 and we have the sum of \$98,417.77, as the expense to the State for the maintenance of the prison, and the permanent improvements made to the prison.

IMPROVEMENTS MADE.

The first improvement made during the present term was the laying of mains and the necessary laterals, for supplying the institution with water from the Canon City water works, and early in January, 1881, the connections were completed. Since that time we have enjoyed the luxury and convenience of the water works. Previous to that time the supply of water used at the institution had to be hauled from the river in a water wagon during the winter, and taken from the ditch running through the penitentiary grounds during the balance of the year. We have a double hydrant in the yard, and have hose and a hose cart to use in connection therewith, which, with the almost fireproof nature of the buildings, together with the fact that nearly all the buildings are heated by steam, and that guards are on duty night and day, make it next to impossible for any serious damage to be done to the institution by

fire. A constant supply of pure water in all parts of the institution has been of great sanitary advantage to the institution. Two steam boilers have been put in for the purpose of furnishing steam for heating the institution and for doing the cooking. All the cooking, except baking, is done by steam, which is a great improvement over the old method of cooking by stoves. It is more cleanly and more economical, the expense for fuel being much less, and none of the provisions are destroyed by burning or otherwise. All of the buildings except the shoe shop and stable are heated by steam. The expense for fuel since the introduction of the steam heating apparatus has been less than half what it was by stoves, although we now have more than double the space to heat. In connection with the steam boilers we have a hot water boiler, which affords hot water for the kitchen, for bathing and for other purposes. Since the introduction of water and steam, we have put in twelve bath tubs, which are supplied with hot and cold water, and in which all the convicts take a bath once a week.

The same amount of money could have been spent in no other way that would have been of such substantial benefit to the institution.

In December, 1880, the building designated as the "office building" was commenced, and was completed in the month of May, 1881. It is a stone building, forty-four feet square, two stories high, and walls being two feet thick.

On the first floor is the warden's office, the clerk's office, in which is a capacious fire-proof vault for the books and records of the institution, the armory, which also has a fire-proof vault for the fire-arms, and a sleeping room for the turnkey, who is on duty at front gate night and day. The second story is occupied by the deputy warden and his family. This building is supplied with hot and cold water is heated by steam, and is a substantial, comfortable building, answering well the uses for which it was built.

Previous to December 1st, 1880, an extension to the east wing of the prison had been commenced. The walls were up and roof on, and the construction of cells had just commenced on that date. The construction of cells was continued, and they were all (114 in number) completed early in the summer of 1881. About one million of brick was used in the construction of these cells, together with a

large amount of iron for the cell doors, and for supports for the walks for the second and third tiers of cells. The iron doors for the cells were made by convict labor, and are much better than the doors before used at the institution, which were purchased at the east, already made.

During the summer of 1881, an addition was built to the warden's residence, and various improvements made to the building and the grounds thereof.

The last session of the general assembly authorized the purchase of some land from the Colorado Coal and Iron Company. The land was purchased by agreement in the spring of 1881, but it has not been paid for, as the general assembly neglected to make the necessary appropriation. Upon the land so purchased is a lime ridge, and in the spring of 1881 we commenced the erection of lime kilns, and made preparations for engaging in the lime business. Additional kilns were constructed as the trade increased, and we now have twelve kilns, with capacity of a daily output of about 1,250 bushels of lime per day. The amount of lime sold by the institution previous to June 1st, 1881, amounted to \$602.30. Since that date, covering a period of eighteen months, we have sold lime to the amount of \$27,862.63, making a total sale of lime of \$28,464.93,

It has proved to be the most profitable industry upon which the labor of the convicts has ever been engaged. As the lime business increased, we were obliged to continue to buy additional teams to do the team work incident to the business. We now have on hand 15 horses, with necessary wagons, carts, harnesses, &c., which cost \$5,830.50. With so many horses, a stable adequate for their accommodation became a necessity, and we have built a brick stable 75 × 40 feet, three stories high. The lower story is occupied by the horses, the second story is used for hay and grain, and the third story is used for sleeping quarters for the guards.

Adjoining the stable a small building was constructed, the lower story of which may be used as a stable in case of necessity for more stable room, and the other story is used as sleeping apartments for the night guards. This building cost \$500. A shed has been put over the stone-cutters, which cost \$300. Theretofore they had no protection from the heat in summer, or the cold or storms of winter. While the erection of this cover was demanded as a matter of

humanity to the convicts, the expense attending it has been more than repaid by the additional amount of work its protection has enabled them to do.

The rapid increase in the number of convicts, and the necessary corresponding increase in the number of guards, made it necessary to provide larger dining rooms and kitchens for both the convicts and guards. The institution has never had a hospital or chapel. In order to provide for all these wants, the building which may be designated as the "main building" was commenced in February last, and is now nearly ready for occupancy. It is a stone building, 190×43 feet, two stories high—one 16 feet high and the other 20 feet high—with basement under the front portion, which is 10 feet high. The basement is to be used for a kitchen and bakery. The first story will contain the convicts' and guards' dining rooms, and two other rooms which will be used as shall be found most advisable. The second story will contain the hospital and chapel. The chapel and convicts' dining room are each 117×43 feet in the clear, and will be large enough for the purposes for which they will be used, for many years to come. The rooms of this building are ceiled with corrugated iron, and the roof is covered with iron shingles. Every precaution has been taken to make the building as near fire-proof as possible, and as it is heated by steam, there is but little chance for damage by fire. The rooms heretofore occupied as kitchens, dining rooms and bakery can be utilized for workshops. A stone wall 16 feet high, 4 feet thick, and between three and four hundred feet long, has been built, and grading in the yard done to correspond, which has added greatly to the appearance of the yard. The dirt taken from excavations for new buildings, &c., has been utilized in grading, up and improving the street fronting of the institution. Last spring 66 cottonwood trees were set out on the street front of the penitentiary grounds, which will in a short time afford a welcome shade, and be an ornament to the institution. A stone wall has been commenced for the purpose of taking in more ground into the enclosure. The present enclosure now contains, or will when the addition to the west wing cell building, for which excavation is now being made, about all the buildings it will be possible to erect in the present enclosure. There is no sewerage to the insti-

tution, and it is not practicable, owing to the fact that any sewerage must run into the Arkansas river just about the town of Canon City. We have abandoned the old method of pouring the excrements into cesspools, and have substituted an iron exhaust wagon, which is hauled away and emptied every day, or every other day, as it becomes filled. The cost of the wagon was \$750.

RECAPITULATION OF IMPROVEMENTS AND THEIR COST.

Main Building	50,000
Office "	12,500
Stable "	10,000
12 Lime kilns	12,000
Putting in water and steam and all their appliances	20,000
Building 114 cells	15,000
Addition to warden's house and improvement to grounds	2,000
Stone cutters' shed	300
Stone wall	2,000
Small stone building	500
Excavations and grading	2,500
Turning ditch in yard, and walling sides	1,200
Trees and piping for irrigating same	300
Extension to wall (commenced)	600
	<hr/>
	\$128,900

Twenty-two thousand dollars of the above amount was included in our statement of the amount of capital invested in the lime business.

PRISON POPULATION.

There were in confinement, December 1st, 1880	226	prisoners
Number received from Dec. 1st, 1880, to Dec. 1st, 1881.	287	"
Number retaken who had escaped prior to Dec. 1st, 1880	2	"
	<hr/>	
Whole number during term	515	prisoners
Number Discharged on expiration of sentence	166	
" Removed by order of Court	7	
" Pardoned	11	
" Died	3	
" Killed while attempting to escape	1	
" Escaped	3	
" Removed to Insane Asylum	2	193 prisoners
" On hand December 1st, 1882	322	prisoners
	<hr/>	
Minimum number during term	191	prisoners
Maximum " " "	322	"
Average " " "	251	"

One of the convicts reported above to have escaped was retaken Dec, 5th, 1882. So there are but two out that escaped during the term, and two have been retaken

during the term, who had escaped during the previous term, which makes the count for this term even. One of the convicts—E. E. Wight—escaped September 19th, 1873, and was retaken at Boston, Mass., August 4th, 1881, having been absent nearly eight years; the other—Chas. Mills—escaped July 31st, 1880, and was retaken at Chicago, Ill., on the 16th January, 1881. As will be noticed elsewhere, the expense during the term on account of escaped convicts has been quite large, being \$2,863.45. The fact that a large proportion of the convicts at all times work outside of the walls of the prison, affords them unusual facilities for attempting to escape, and no watchfulness on the part of the officers and guards can altogether prevent such attempts. We have, however, instructed the warden to leave no stone unturned in his efforts at retaking those who get away, and he has been very successful in his efforts in that direction. It has been our policy to make the pursuit so vigorous, and their recapture so sure, that the feeling would become general among the convicts that it is useless to escape, for they would be almost certain to be recaptured. Of the \$2,863.43 only \$543.85 has been used during the last nine months.

Average number of convicts on hand per day, 251.

In January, 1881, the contract with the Colorado Boot and Shoe Company was cancelled by mutual consent.

Owing to violation of the prison rules and the terms of the contract, by the employes of said Boot and Shoe Company, they were expelled from the prison grounds, and the contractors notified of the fact, and requested to furnish other men to attend to their business within the prison. The contractors replied that their contract had only till October to run, and as they intended to make a change in their business at the expiration of their contract, that they would like to cancel it. They were working but forty convicts under the contract, and would not take more, and we had been unable to contract with other parties to engage in the same business. We thought that by cancelling their contract we could make one with other parties for a larger number of men, and we agreed to cancel the contract. We have entered into a contract with Messrs. Herriman and Hirsch, and they commenced work under it in October. They employ as the minimum number under the contract, eighty convicts in the manufacture of boots and shoes, and they say that within a year they will increase the number of convicts to about one hundred and fifty. The cancellation of the contract with the Colorado Boot and Shoe Company made our cash earnings for this term somewhat less than they otherwise would have been, but will be of great advantage for the future. The price for the labor is the same under the new contract as under the old, viz., 50 cents per day.

It is the intention of the Board to let the labor of convicts to responsible parties as fast as they increase in numbers and can be spared from state work. At present, however, so much labor is required for making additions to, and enlargements of our limited accommodations, that comparatively few can be spared.

SANITARY.

The physician's report gives the detail of the matters under his charge, and shows that the sanitary condition of the prison during the past two years has been remarkably good. With an average prison population of 251, but two men have died during the two years from natural causes. One prisoner, Theodore Pryce, starved himself to death, and one man was killed while attempting to escape. The sanitary condition of the prison has been everything that could have been desired.

IMPROVEMENTS NEEDED.

We have ample accommodations for present purposes, except in the matter of cells. We have 90 double cells, which accommodate 180 convicts, and 114 single cells, making altogether cell accommodations for 294 convicts. We have on hand 322 convicts, and the number will rapidly increase. At present time we have to double up, by putting two convicts in the single cells. The size of these cells is $4 \times 7\frac{1}{2}$ feet, and it will readily be seen that it is too close quarters for two men, except under an emergency.

We have commenced work upon the foundation for an extension of the west cell building, said extension to be 40×102 feet, and to contain 102 double cells. We shall require \$20,000 for material to build and complete said building. Before the close of the incoming term another cell building will have to be built, for which we shall require \$30,000. Another building for convicts to work in under contract will have to be built, which will require \$15,000. The building now occupied by convicts' dining room and kitchen, guards' dining room and kitchen, and bakery, which is about 350 feet long and 20 feet wide, and will soon be empty, can be utilized for shop room for the state shops, or for convicts to work in, should a contract be let for a small number of men. To fit it for such purposes it should be raised ten feet, new roof put on, and more windows put in. It would also require new floors. It will take \$10,000 to put the building in proper shape. An appropriation of \$2,500 is necessary to pay for the land purchased in spring of 1881, of the Colorado Coal and Iron Company, by authority of the last general assembly, but for which it neglected to make the necessary appropriation. We have agreed to purchase $9\frac{1}{4}$ more acres of the same Company for \$3,000. We need an appropriation to cover that amount. The land is absolutely necessary to the state. It has a street frontage of 452 feet, and also contains a lime ledge of three times the amount of lime rock as the one purchased last year, from which we have already sold about \$30,000 worth of lime. More land will need to be enclosed by the outside prison walls, which will not cost much for material, but will require a large force of convicts, much stone, sand and lime, team work, etc., etc. It will require about \$1,000 for gates, etc., for said wall. The above amounts to \$81,500,

that we shall need for building purposes, and it is probable that still other building expenses will become necessary before the term expires. We cannot contract the labor of the institution unless we have good work rooms for the convicts and contractors to occupy. As we have no room now but what is occupied, and have men to contract, it will be seen that shop room must be provided; or many of the convicts will have to be kept in idleness. The average number of men during the last two years was 251, and the average number for the ensuing two years will not be less than 400. To maintain 400 convicts for two years, at the same cost per man as it was the last two years, will amount to \$223,380.00
and for permanent improvements 81,500.00

	304,880.00
Earnings estimated for two years	100,000.00
	<hr/>
Actual appropriation required	\$204,880.00

THE INVESTIGATION.

During the last session of the General Assembly, a joint committee, composed of members of the Senate and of the House, was appointed to investigate the financial affairs and government of the penitentiary. Said committee visited the penitentiary, bringing with them two expert bookkeepers. The bookkeepers were set to work upon the books of the institution, and the committee commenced an investigation, with closed doors, all officers of the penitentiary being excluded therefrom. All the officers of the penitentiary cheerfully afforded the committee every facility for making their investigation as thorough and complete as possible. It is a pleasure to us to be able to report to you, that not a single irregularity was discovered, and that not one word of condemnation against the management of the institution was embodied in their report to the General Assembly.

No charges were made against either of the commissioners, but had any malfeasance been discovered on the part of Ex-Warden Megrue, it would, more or less, according to the nature of the offense, have reflected upon the

commissioners, who have the general management of the institution.

In justice to Mr. Megrue, we desire to report officially to you at this time (our first opportunity since the investigation), that nothing whatever was discovered that in the slightest degree reflected upon his management of the financial affairs or government of the institution, and to add, as our opinion, that his administration as warden, which extended over a period of nearly four years, was honest and economical, a credit to him and to the state. In this connection we desire to state, that, in our opinion, it would be well to have an investigation of our public institutions every two years; that the members of such investigating committees should be neither friends nor enemies of the officers of the institution, but should be composed of fair, impartial business men of both political parties. Such investigations as above indicated would be a protection to the State against the mismanagement of its institutions, and afford an opportunity for commending such officers as have been true to their official trusts. We would be pleased to have such an investigation into the management of the penitentiary for the past two years, and the warden joins us in this request.

NEEDED LEGISLATION.

We desire to call your attention to needed legislation.

We need a law authorizing the transportation of discharged convicts to the place from which they were sentenced, or to some other point not more distant, as they may determine. As the law now stands, convicts are turned loose in the streets of Canon City, with ten dollars in their pockets, where they are well known, and the consequence is, that in a great majority of cases, they fall under the temptation thrown in their way by designing persons, and, lured into dens of vice and iniquity, they soon return to their former ways of crime, whereas, if they were given a fair chance, they might become good, law-abiding citizens.

We also desire a law authorizing the appointment of a chaplain for the institution. This is a matter that has been suggested to former legislatures, without action having been taken. It has now become a reproach to our great state, that we have in confinement over three hundred men, who require all moral aid that can be given, to accomplish

the ends of the law, and yet they are refused the benefits to be derived from the teachings of Christianity, except such as is voluntarily offered. Penal institutions like this are no longer considered as places of punishment only, but are also expected to be made the means of reformation. If reformation is to begin only upon the discharge of a convict, the probability is that it will never be begun, so every means should be used to encourage reformation while in confinement. It is the universal testimony of like institutions in the older states, that the office of chaplain is almost indispensable to their proper government, both as a means of reformation, and as an aid to discipline.

The institution has grown to such dimensions, that, in the opinion of the Board, it would be better to have their meetings held monthly instead of quarterly. Much of the work that should be done by the commissioners is now necessarily thrown on the warden and other officers, and it is impossible for us to properly attend to our duties when we meet only four times a year. It would also be a saving of expense to the state, as bills could then be audited and paid monthly, which would enable us to make purchases upon more favorable terms, than where payments are made only every three months.

We have thirty-four convicts in the penitentiary for life, and our experience with them has excited our sympathy in their behalf. We find that, as a rule, they are the best behaved prisoners under our charge. We heartily endorse the following recommendation, which was made by the commissioners of the Joliet penitentiary of Illinois, in their report to the Governor of that state, dated October 1, 1880. They have expressed our sentiments in better language than we could do, and therefore quote them, as follows: "But there is a class of prisoners committed to our custody for whom we feel the deepest sympathy, and for whose welfare our best efforts should be made—those whose terms are for the period of their natural lives. Such a species of imprisonment, if fulfilled to the letter of the law, is worse than punishment—it is torture. If the life prisoner was compelled to undergo absolutely solitary confinement, coming in contact with no fellow prisoners, but living on from day to day with only his work to attract (or distract) his thoughts from his forlorn and pitiable condition—

even then one can imagine how, in time, he could become inured to his fate, and learn to bear it with fortitude and resignation ; but under the system of convict labor which now prevails, the life prisoner is surrounded by other prisoners, the majority of whom are here only for a brief term, and scarcely a day goes by that he does not see one or more of the number preparing to go out again into the world he has left behind. To him the days come and go, and bring no hope, for he cannot say to himself as he awakes in the morning, or lies down to sleep at night, that he is one day nearer the time of his discharge, for, alas, he is one of those for whom there is no release save through the valley of the shadow of death. Is it strange that so many life prisoners become insane after the lapse of a few years ? Their brain gives way under the constant strain to which it is subjected by such a life, for they have no hope in the present nor encouragement for the future. Surely such a form of punishment is little in keeping with the spirit of this age, and does not deserve the name of justice, for it is a species of torture more in keeping with the age of barbarism, when men were punished to gratify the anger of a ruler rather than for the purpose of meting out justice in the name of the law. There are crimes for the punishment of which the law requires the taking of human life ; but in all cases where capital punishment is not imperatively demanded by law, let the punishment be for a definite term of years, however long." Under our law in murder trials it is optional with the jury whether they bring in a verdict that will hang or send to the penitentiary for life. In many cases where under the law the verdict should be for hanging, some one or more of the jury will stand out for imprisonment for life, and a compromise verdict is the result, and we receive another lifetimer. Thirty-four lifetimers out of three hundred and twenty-two is a larger proportion than any other penitentiary has. The jurors who stand out for a verdict that will send a man to the penitentiary for life undoubtedly believe that they are leaning toward mercy, but, in our opinion, in such cases, mercy leans towards capital punishment as the lesser punishment.

AUDITOR'S AND PENITENTIARY REPORTS.

There is (and always will be under the present system

of making the reports) an apparent difference between the auditor's report and our report.

The difference arises from the fact that both are made out up to the same date. The fiscal year ends on the 30th November of each year. The expenses of the penitentiary are settled quarterly by issuing vouchers at the close of each quarter, consequently the vouchers issued for the last quarter of the two years term, comprised in each biennial report, have not been received by the auditor at the time he makes his report, and are not included in his report. The result is, that the auditor's report shows the transactions of the penitentiary for two years ending August 31st, while our report shows the transactions for two years ending November 30th. It sometimes happens, however, that some vouchers are issued early in the last quarter of a term, and in such cases, those vouchers are included in the auditor's report, and, to arrive at an agreement between the reports, the amount of such issue should be known. For instance, the penitentiary expenses for the quarter ending November 30th, 1880, were \$20,286.64, but of that amount \$2,967.91 had been issued early in the quarter, had reached the auditor, and were included in his report for the two years ending November 30th, 1880, and the balance of that quarter's expenses, viz., \$17,318.73, was not included in said report, but will be accounted for in his report ending November 30th, 1882, while that amount was included in the penitentiary report for the term ending November 30th, 1880. Of the expenses of the last quarter of the term ending November 30th, 1882, which were \$27,074.78, only \$979.09 had been issued and received by the auditor in time to be incorporated in his report of even date with this. As to the receipts of money arising from convict earnings the same discrepancy must occur, as the final payment for the term cannot be made by the warden, until after November 30th, when the quarterly settlement is made. It would seem advisable to have the date of the making of the financial report of the institution so changed, that the two reports would correspond. The last report of the auditor showed that there was an unexpended balance to the credit of the penitentiary of \$14,478.72, while the fact was there were penitentiary vouchers to the amount of \$17,318.73, which were issued for the quarter ending November 30th,

1880, that had not reached the auditor at the time he made his report. There are also \$3,153.59 of convict earnings for the term ending November 30th, 1880, which had not been received by the auditor, making the actual balance to the credit of the penitentiary on the 30th November, 1880 (after all the accounts of the two years term ending on that date had been settled), just \$315.54, and that is the sum used in this report, as being the unexpended balance in the hands of the State Treasurer at the commencement of this term. In our ledger account with the State Treasurer, there is an error in the opening entry of \$499.32, said entries showing that there was a balance against the penitentiary of \$223.88, instead of a balance in our favor of \$315.54, which makes a difference of \$499.32. In explanation of the error would say, that owing to the uncertainty in the mind of the auditor as to the exact effect of two somewhat conflicting acts of the last Legislature relative to unexpended balances, one sum was deemed to be the true one, until the decision of the Attorney-General changed it somewhat. The above is given, to show the difficulty under the present system of making the reports, in ascertaining whether the reports agree or not, to show a reason why a change should be made ; to show that although there may be great difference in the reports, they may both be correct, and to show our reason for taking the sum of \$315.54 as the unexpended balance in the hands of the Treasurer at the commencement of this term.

To Warden Felton, Deputy Warden Dueber, Dr. J. W. Dawson and W. F. Baker, Clerk, is due much credit for the faithful and efficient manner in which they have conducted the several departments of the institution.

With acknowledgment of the harmony and co-operation that has at all times existed among all the officers of the institution, from your Excellency down, and thanking you for the interest you have ever manifested in our work, this report is respectfully submitted.

W. S. McCUTCHEON,
D. H. NICHOLS,
FRANK A. TAYLOR,
Commissioners.

WARDEN'S REPORT.

CANON CITY, November 30th, 1882.

To the Honorable the Board of Commissioners of the Colorado State Penitentiary:

GENTLEMEN:—In pursuance of law, I herewith submit to your Honorable Board a report of the condition of the prison, together with a detailed statement of receipts and expenditures for the two fiscal years, commencing December 1st, 1880, and ending November 30th, 1882.

At the commencement of the term the institution was very much crowded, and the increase of prisoners during the term has been very great, consequently the term has been marked by unusual improvements, made necessary in order to accommodate our constantly enlarging family. The following table shows the number of convicts during the term:

Number of prisoners December 1st, 1880.....	226
Received (including two escaped prisoners retaken).....	289
Whole number here and received during the two years.....	515
Number discharged by expiration of term.....	166
Pardoned by the Governor.....	11
Transferred to Insane Asylum by order of Governor.....	2
Number taken out by order of Courts.....	7
Number escaped.....	3
Number killed while attempting to escape.....	1
Number died.....	3
	<hr/> 193
Whole number December 1st, 1882.....	322

The increase during the two years was $42\frac{1}{2}$ per cent. There has not been a female convict in the penitentiary during the two years.

I quote the following from the last biennial report:

“The probable average number of prisoners during the next two years will not be less than 250. At a cost, per man, the same as the last two years, an appropriation of \$117,500 will be required for their maintenance.

Total appropriation necessary :

For Improvements.....	\$ 8,000
Ground for Penitentiary.....	2,500
Maintenance.....	17,500
Total	\$128,000

The probable earnings for the next two years will be \$30,000. Actual appropriation required, \$98,000."

It will be seen that the average number of prisoners has been somewhat in excess of my predecessor's estimate, and the cost of maintenance has been greater, owing to the increase in the price of provisions. The average cost of flour for the past two years has been $52\frac{3}{4}$ cents per sack of 100 pounds greater than the average cost for the two preceding years ; beef has cost $\$1.11\frac{1}{3}$ per hundred pounds, and shoulders $23\frac{3}{4}$ cents per pound more than for the preceding two years. The increase of expense upon the amount purchased for the two years, upon these three articles alone, has been nearly \$5,000 more than if the average price had been the same as for the two preceding years. There has been more or less increase in price of nearly every article used, and a slight decrease in only four articles, viz., dried peaches, coffee, vinegar and rice.

In the estimate above quoted but \$8,000 was asked for improvements, whereas the actual cost of material used in improvements has been \$45,813.68, and the improvements made, including material and labor, amount to \$128,900.

The earnings, instead of being \$30,000, have been \$59,787.14. The Legislature made an appropriation of only \$90,000, instead of \$98,000 asked for. From the expenses for the two years should properly be taken the sum of \$25,500, which was the cost of lime kilns, stable, horses, wagons, harness, scales and tools necessary in establishing a lime business, which affords profitable employment for quite a number of convicts. The amount of lime sold during the two years has been \$28,464.93, and the business, now fully established, will help very materially in paying the expenses of the institution for the next two years, and probably for many years to follow.

FINANCIAL STATEMENT.

Expenditures for two years	\$204,736.04
----------------------------------	--------------

CREDIT OF THE INSTITUTION.

Earnings by convict labor.....	\$59,787.14
Balance on inventory.....	14,846.43
Cash paid for material for permanent improvements and repairs.....	45,813.68
Labor on improvements and repairs.....	83,086.32
	\$203,533.57
Cost to State of maintenance above earnings and improvements.	\$1,202.47

The following distribution of the expenses show the amount used for the different accounts :

Officers and guards.....	\$54,156.21
Stationery.....	690.99
Provisions.....	49,855.33
Soap, Brooms, Matches, etc.....	1,346.82
Clothing, Bedding, Shoes, etc.....	11,868.79
Drugs and Medicine.....	1,092.91
Tobacco.....	1,835.45
General Expenses.....	1,604.00
Furniture and Fixtures.....	3,487.61
Arms and ammunition.....	402.20
Library.....	386.52
Forage and Team expenses.....	12,615.08
Discharged convicts.....	1,820.00
Escaped ".....	2,863.45
Improvements and Repairs.....	45,813.68
Lime Kilns and Quarry.....	5,963.94
Fuel and Lights.....	4,490.66
Freight and Drayage.....	2,973.52
Water Rent.....	1,058.80
Photographs of convicts.....	410.10
	\$204,736.04

EARNINGS FOR TWO YEARS.

Brick Yard.....	\$3,077.35
Visitors' Fund.....	642.40
Lime sold.....	28,464.93
Labor.....	18,053.37
Quarry.....	4,224.83
Stone Yard.....	2,366.46
Shoe Shop.....	515.90
Tools and Implements.....	16.50
Hogs sold.....	790.90
Supplies.....	179.92
Maintenance of prison.....	1,039.54
Improvements and repairs.....	415.05
	\$59,787.14

Cash receipts	\$55,410.30
Due on accounts	4,376.84
	<u>\$59,787.14</u>

COMPARATIVE EARNINGS.

Earnings for two years, ending November 30th, 1878.....	7,920.04
“ “ “ “ “ “ 1880.....	22,023.05
“ “ “ “ “ “ 1882..	<u>59,787.14</u>

ACCOUNT WITH STATE TREASURER.

Balance in hands of State Treasurer, December 1st, 1880.....	\$ 315.54
Amount cash paid “ “ “ “ 1882.....	43,755.88
Amount cash on hand December 1st, 1882.....	11,654.42
Amount of appropriation by General Assembly.....	90,000.00
	<u>\$145,725.84</u>

Total amount of vouchers issued for two years	\$204,736.04
“ “ appropriation, earnings and balance.....	145,725.84
Amount of vouchers issued in excess of receipts.....	<u>\$59,010.20</u>

ACCOUNTS.

Due on accounts, December 1st, 1882.....	\$6,769.90
“ “ “ “ 1880.....	2,393.06
Gain in accounts in two years, ending December 1st, 1882.....	<u>4,376.84</u>

HOG ACCOUNT.

For the purpose of utilizing the waste material from the kitchen, hogs have been kept, and the result shows quite a fine profit from that source.

Hogs sold during two years ending December 1st, 1882.....	\$ 790.09
Hogs killed and pork fed to convicts to Dec. 1st. 1882, 16,847 lbs @ 10c. per lb.	1,684.70
Value of hogs on hand December 1st, 1882.....	864.00
	<u>\$3,339.60</u>
Value of hogs on hand December 1st, 1880.....	350.00
	<u>\$2,989.60</u>

It has been my aim to earn as much as possible for the institution, and having succeeded in nearly trebling the earnings of the preceding term, I feel that I have been as successful as could reasonably have been expected.

As you will report upon the improvements made during the term, and the necessities for such improvements, I need not say more about them, than that such improvements as I have made during the term, under your direction, I have endeavored to do in the best possible manner

with the means at my disposal, for the present and future benefit of the institution.

SANITARY.

But two deaths from natural causes have occurred during the term, which, with an average prison population of 251, is a most excellent showing. Very many come here debilitated by excesses, or diseased by a dissolute or immoral life, led by the class of criminals that make up the larger proportion of our inmates. Here they labor sufficient for health, but not hard enough to injure; they are kept clean, by being bathed once a week, and having their clothes and bedding washed as often; they have comfortable clothing, clean cells, pure air, plain, but substantial and wholesome diet, regular hours for sleep, and good medical attendance. Under such treatment they soon become healthy. I think it would be difficult to find another place, of equal population, so healthy as the Colorado Penitentiary.

GOVERNMENT.

It is my conviction that prisoners should be treated humanely. It is necessary to punish disobedience of rules, in order to maintain a proper discipline, and when such punishment is not harsh, or disproportionate to the offence committed, no exceptions can be taken to it. There have been no excessive punishments resorted to during the past two years. It may be possible that some have been punished who ought not to have been, as, among so many, the guards might at times be misled as to the person committing an offence, but their instructions are, not to report a convict as having disobeyed a rule, unless they are positive as to the matter.

Justice should be done to a convict if reformation is expected to follow his release. Abuse can but arouse an antagonistic feeling against the law and against society. There have been no riots, outbreaks or turbulence of any character whatever during the term. The law giving convicts a diminution of time from their sentence for good behavior is of great benefit to the convicts, and a great help to the discipline of the institution.

A warden's successful management of the government and discipline of a penitentiary depends very much upon

the deputy warden and the guards. Deputy Warden M. Dueber has been connected with the Colorado Penitentiary nearly the whole time since it was first opened. He is thoroughly acquainted with every detail pertaining to the institution, and is invaluable as an officer of the penitentiary. I desire to acknowledge his efficiency and the great obligations I am under for his faithful service. The guards have performed their duties faithfully and well.

The sanitary condition of the prison is sufficient endorsement of its physician, Dr. J. W. Dawson.

Our clerk, W. F. Baker, has kept the books and records of the institution systematically, neatly and honestly.

I hereby thank you for the unusual trust and confidence you have at all times reposed in me. Our pleasant official and social relations of the past two years, will ever remain in my remembrance as among the pleasanter experiences of my life.

W. B. FELTON,
Warden.

PHYSICIAN'S REPORT.

COLORADO STATE PENITENTIARY, }
CANON CITY, November 30th, 1882. }

To the Honorable Board of Commissioners, Colorado State Penitentiary :

GENTLEMEN :—I have the honor to submit to you my third biennial report of the medical department of this institution for the period ending November 30th, 1882, and am pleased to state that the sanitary condition has been remarkably good, which I attribute in a great degree to the healthy locality of the prison, as well as the manner in which the convicts are cared for. Every attention is paid to their comfort, as far as circumstances will allow. Their food is of good quality, and is carefully prepared; clothing sufficient; cleanliness is enforced, good order and industry prevail.

The diseases that have occurred have mostly been those that would naturally be looked for in a community made up of men, upon many of whom past vices and irregularities had imposed various constitutional taints and tendencies to disease.

Our new building which is in process of erection, when completed, will supply a want long felt; some of the large and well ventilated rooms are to be used for hospital purposes, to which the sick are to be removed when thought best.

The penitentiary not being deemed by law to be the proper place in which to confine and treat the insane, five convicts having been reported to the Governor as insane, were, in accordance with the provisions of the law, ordered before a medical commission and were adjudged insane, and four of them were sent to the insane hospital at Pueblo.

A reference to the mortuary statement submitted herewith, will show the number of deaths and cause of same.

MORTUARY STATEMENT FOR THE TWO YEARS ENDING
NOVEMBER 30TH, 1882.

No.	Name.	Age	Cause of Death.	Date of Death
1	James Williams.....	48	Enteritis.....	April 4, 1881.
2	John D. Boyle.....	24	Perforation of bowels.	Oct. 23, "
3	Theodore Pryce.....	36	Starved himself.....	May 19, 1882.
4	Bazel Wallace... ..	30	Shot while attempting to escape..	Nov. 16, "

In concluding my report, I beg leave to tender my thanks to Warden Felton and Deputy Warden Dueber for their uniform kindness and courtesy, and valued aid in the performance of my duties, and also to Dr. E. C. Gray, who has on several occasions kindly assisted me, and acted in my place when I have been unavoidably absent; and for the courtesies accorded me by your Board, I am duly grateful.

Respectfully submitted,

J. W. DAWSON, M. D.,
Physician C. S. P.

RULES

For the Government of the Officers and Employes of the Colorado State Penitentiary.

All persons entering upon or retaining any position as an officer or employe of this institution, must do so with a full understanding that they are to lend a prompt, willing and positive obedience to the rules of the institution and the instructions of its officers, and devote their best energies and abilities industriously and faithfully, to the performance of the duties to which they may be assigned; and all who cannot do so cheerfully, must neither accept nor expect to retain a position here.

1. The first and most important duty of guards, at all times, is to maintain a safe custody of the convicts, and to that end the rules of the Penitentiary require, and the laws of the State (vide Sections No 16-17 penitentiary act, session 1876-1877) justify the shooting of convicts attempting to escape, or of any person aiding or abetting the same.

2. While within the penitentiary grounds the guards and employes shall refrain from singing, whistling and scuffling, immoderate laughter, boisterous conversation, exciting discussions, and all other acts calculated to disturb the harmony and good order of the penitentiary.

3. In their intercourse among themselves the officers, guards and employes are at all times to treat each other with that mutual respect and kindness that becomes gentlemen and friends, and are required to avoid all collisions, jealousies, separate and party views and interests among themselves, and are strictly forbidden to treat each other with disrespect, or use any ungentlemanly epithets.

4. They shall not, while on duty, hold conversation with each other, nor with contractors or their foremen, except such as may be necessary in the discharge of their duties.

5. All guards while on duty are strictly prohibited from reading books, papers, letters or communications of any kind, except as the nature of their duties require.

6. Armed guards must allow no convicts or other persons, except officers of the prison, to approach nearer than ten paces.

7. They must keep their arms clean and in perfect order, constantly ready for use; and neither cut, mark or deface them in any manner.

8. They shall not allow any convict to speak to them upon any subject not immediately connected with their duty, employment or wants; and all familiarity between convicts and officers is strictly prohibited.

9. They shall not allow any convict under their charge to leave their work without permission, nor shall they allow them to speak or gaze at visitors.

10. They shall not punish or strike a convict unless it be in self-defence, or to quell an insurrection or prevent an escape; nor shall they use any profane or indecent language to them or in their presence, but shall uniformly treat them in a kind and humane manner.

11. No guard or other employe shall on any pretence whatever receive from any convict any sum of money, emolument or reward whatever, or any article of value as a gift, under penalty of being discharged from the service of the penitentiary and forfeiting all moneys due them from that institution, and being disqualified from ever holding a position in said service (vide Section 30, penitentiary act, session 1876-1877.)

12. Guards or employes will not be allowed to give convicts papers, books, letters or anything whatever, except such as pass through the office.

13. They must speak to convicts in a firm, mild tone, using no offensive terms, and at the same time with positive, dignified demeanor, which almost invariably commands obedience without resort to punishment. After giving an order officers will not bandy words with convicts, but

quietly and mildly explain it, so as to be confident it is understood, and then if the convict does not immediately obey, report him at once to the warden or deputy.

14. All officers and employes are prohibited from discussing within the limits of the prison, the manner in which any officer or employe performs his duty, and from making any remarks which might tend to reflect upon the character or management of such officer or employe. They are also prohibited from discussing in the presence of convict's matters relating to the discipline or management of this or similar institutions. *This rule will be rigidly enforced.*

15. Officers and employes will not be permitted to receive visits of any character while on duty.

16. All regular guards will wear their uniforms while on duty, and will receive pay only when they do so.

17. All guards must appear for duty promptly, and when unfit for duty and unable to appear in person, must report by letter.

18. Guards and employes must not permit convicts to address officers, contractors or foremen by their given names, and the title of Mister must not be applied to a convict. The convict must not be permitted to forget his position, and it is due to the discipline of the institution that officers and employes uphold the dignity of their official stations.

19. No officer or employe will be permitted to divulge information of an official character to outside parties, or in any manner gossip about the affairs of the penitentiary.

20. Discipline is the first and highest consideration in a prison, and the officer who maintains it with the lowest number of punishments, will receive the highest commendation from the authorities.

21. Officers will take special care to secure uniformity in marching their men, and, as far as practicable, should maintain a position at the left and near the foot of the column, that they may have constantly in view the convicts under their charge. The men should be formed in close line, single file, before the order of "march" is given, and

care should be taken that the men keep step, and that the column maintain its position of close order during the march. No straggling should be permitted under any circumstances.

22. All officers and employes lodging at the prison must be within the walls at 10:30 p. m., and the captain of the night watch is hereby ordered to admit no one after that hour, unless they have permission in writing from the warden or deputy.

23. Guards must never leave the post of duty assigned to them until relieved, and no exchange of duties will be permitted without the permission of the warden or deputy.

RULES

To be observed by Contractors, their Agents and Employes.

1. Contractors, their agents, foremen and employes, shall hold no intercourse with any convict other than those employed or superintended by them, nor upon any subject whatever other than the business carried on by them.

2. They are to confine themselves strictly to their business, and are not to leave the shops where their business is carried on, to visit any other part of the prison.

3. They are to report to the guard, having charge of the convicts in their departments, all violations of the "rules and regulations" of the prison.

4. They are not to use any harsh or opprobrious epithets to the convicts, or use any profane language in their presence.

5. They shall not give a convict any newspaper, book, writing-paper, envelopes, postage-stamps, money, or anything whatever; neither shall they deliver or mail any letter or newspaper for a convict; nor shall they purchase from, or sell anything to, a convict.

6. No smoking will be allowed inside of shops.

7. Any contractor, agent, foreman or employe, violating these rules, shall be expelled from the penitentiary and not again permitted in it as a contractor, agent, foreman or employe.

It shall be the duty of all guards to report any violation of the above rules.

W. B. FELTON, Warden.

RULES

To be Observed in Shops.

1. No prisoner is allowed to leave his bench or place of work for any purpose, unless by permission of the shop officer. Such permission is obtained by raising the hand and indicating, by pointing, where he desires to go.

2. No communication of any kind between prisoners will be permitted at any time, either by talking, whispering, or by any signs.

3. Prisoners will not be permitted to pass tools or work from one prisoner to another, or from one bench to another, or instruct each other, unless ordered to do so by the shop officer.

4. Only one prisoner at a time will be permitted to go to the water closet or to the water bucket.

5. No prisoner will be permitted to carry anything into or out of the shops, unless he has the permission of the shop officer to do so.

6. They must at all times be constant at work, do all work well, pay strict attention to any instructions or orders given them by the officers or foremen, and not gaze about the shop, out of windows, at visitors, or at whatever might be going on in the shop, unless they are spoken to by the officer or foremen to pay attention.

7. All requests or complaints will be made to the officer in charge.

8. A prisoner may speak to the warden or deputy, if they pass by their bench or place of work, but if it is necessary to leave their bench or place of work, each prisoner must first get the permission of the shop officer by raising the hand.

9. Loud, or any unusual noises of any kind, are positively forbidden.

10. The tools and benches must at all times be kept in order, and when quitting work at noon or night, all tools must be put in place and benches cleaned up.

11. At first ring of shop bell each prisoner must wash and get ready to leave shop. At second bell ring they must fall into line, with arms folded across the breast, ready to march. Each one must keep at work until shop bell rings to wash up, or by order from the officer.

12. For instructions about tools or work, application must be made to the foreman by sign to the officer or foreman.

13. Any prisoner coming into shop must make signal to shop officer by holding up his hand and indicating, by pointing, where he wants to go or what is wanted, or go to the officer's stand and report what may be wanted.

14. No prisoner will be permitted to give any present of any kind to any officer or foreman, or to receive any present of any kind from them. Nor will prisoners be permitted at any time to tinker, or do any other work than what properly belongs to that which they are set at by foreman or officer.

15. Prisoners must not engage in any conversation with foreman or superintendents, except what may be absolutely necessary in doing their work properly.

W. B. FELTON, Warden.

RULES

For the Government of Convicts.

THE FIRST DUTY OF THE CONVICT IS "OBEDIENCE," AND IT WILL BE FOR HIS INTEREST TO OBEY ALL RULES.

1. All conversation between convicts, and familiarity between convict and guards, are strictly prohibited, and all unnecessary noise must be avoided.

2. They are not to exchange a word with each other under any pretence, nor to communicate any intelligence to each other in writing. They are not to exchange looks, winks, laugh with each other, or make use of any signs, except such as are necessary to convey their wants.

3. They shall not, at any time or under any pretence, without leave, speak to any person who does not belong to the institution, nor receive from them any letter, paper, tobacco or anything whatever. They are not to leave the place where they are put to work, nor the work which they are set to do, without the special permission or order of the proper officer. They are not to suffer their attention to be taken from their work to look at them when unemployed.

4. No convict is wilfully or carelessly to injure his work, tools, wearing apparel, bedding or anything belonging to or about the prison, nor will any convict be suffered to mark, injure, or in any way deface the walls or any part of his cell, nor is he to execute his work badly when he has the ability to do it well.

5. No convict shall receive or transmit any letter or paper, except under the inspection of the warden or deputy.

6. At the general ring of the bell in the morning they will immediately get up, make their beds neatly, and put every article in their cells in complete order without making any unnecessary noise.

7. At the ringing of the bell at 9 o'clock, p. m., they will immediately (but if they choose, may go previously) go to bed, taking off all clothing except the shirt.

8. Laziness and inattention to work will be considered a violation of the rules.

9. Profane, obscene or indecent language or conduct, are at all times strictly forbidden.

10. When at meals or at work, if anything may be needed, they will signify by holding up the hand or cup.

11. Convicts will be permitted to subscribe for and receive such papers and magazines as are represented by "Harper's Weekly" and "Monthly," "Leslie's Weekly," "Atlantic Monthly," "Scribner's Monthly," "Scientific American," and all religious papers, but "political" papers will not be permitted in or about the prison.

12. Books and papers will not be permitted to be carried out of cells or loaned to others without permission.

13. When sick and unable to work, it must be made known to the warden or deputy, and all excuses must come from them or the physician.

14. All wants must be made known to the officer in charge or to the warden or deputy.

15. Night buckets must at all times be kept covered when in the cell.

16. The receiving of tobacco, use of library, writing and receiving of letters, will depend upon the conduct of the convict.

17. No smoking will be allowed outside of cell, and convicts violating this rule will be severely punished and deprived of their tobacco.

18. No convict will be allowed to approach nearer than fifteen paces to an armed guard, nor nearer than three paces to an unarmed guard or officer, before making his wants known and touching his hat as he approaches.

A faithful compliance of the above rules will merit the many privileges allowed, shorten the sentence, and make prison life comparatively easy.

W. B. FELTON, Warden.
