Commissioners' Report

OF THE

Colorado State Penitentiary

Canon City, Colorado, November 30, 1906.

To His Excellency,

JESSE A. McDONALD,
Governor of Colorado.

Sir—We beg leave to submit herewith for your consideration our report, dealing with the conditions and workings of the Colorado State Penitentiary, at Canon City, for the biennial period ending November 30, 1906.

You will also find attached reports from the Warden, Chief Clerk, Mail Clerk, Physician, Matron and Chaplain, which are so comprehensive and complete that they give all data and details desired. Those portions of the reports dealing with financial and statistical matters have been carefully checked and found correct.

Two years ago we called attention to the betterment in the conditions in all departments of the prison, and we now wish to say that the same policy followed by the management during the former two years has prevailed, even in a more marked degree, ever since, until at this time nearly every department of the whole institution is in almost perfect running order, and we fail to see where much improvement could be made under existing conditions.

We wish at this time to call the attention of your Excellency to the following recommendations relative to the appropriations desired at the hands of the next Legislature:

Maintenance	\$220,000
Hospital and Insane Ward	35,000
General Improvements and Repairs....	30,000
Cold Storage and Ice Plant.....	5,000
New Bakery.....	5,000
Purchase of Land.....	2,500

Maintenance is always a most important item at this institution, because at the best our earning capacity is curtailed to the minimum, and we must depend almost entirely upon this appropriation to defer the expenses of the prison. We have, in years past, leased considerable land upon which we have raised alfalfa, hay and some grain. This land has now become too valuable for this purpose, has passed to new ownership, and we can not obtain the use of it any longer. Hence, a curtailment of our earnings and a consequent increase in the required appropriation.

IMPROVEMENTS AND REPAIRS.

During the next two years nearly every roof on nearly every building must be renewed; new floors of either wood or cement must replace the old ones throughout the institution, and all of the intricate lines of pipes used in the steam and sewer systems of the prison must be replaced. This condition is due to the ravages of time and the usual wear and tear, which are as sure and inevitable as time itself.

It is a very difficult matter with present appliances to keep potatoes and other vegetables and meats in a good, wholesome manner for any length of time. The appropriation asked for covering a cold storage and ice plant, which will entirely overcome this obstacle, and will pay for itself in a few years, is earnestly recommended.

Our present bakery, which has been in constant use for many years, is almost out of commission, and we are compelled to construct a new one. This is one of the most important of all the departments, as every day, aside from Sunday, nearly 1,000 pounds of flour are consumed in the products of the bake shop. It is therefore important that when a new bakery is built it be thoroughly modern and well constructed.

It has been a subject for general discussion for a long time as to what was the best thing to do with the sick and invalid portion of our population, as well as the insane prisoners. It is now proposed to erect at an isolated spot near the prison, but entirely shut off and removed from it, a hospital, sanitarium for tubercular inmates, and an insane ward. These prisoners, owing to the present crowded arrangements, are thrown among the healthy prisoners at all times, and no other means can be employed in their care until special quarters are prepared for them. In our opinion this is the crying need of the institution. The health of the strong is constantly endangered through enforced association with the afflicted tubercular prisoners, while the unfortunate insane are denied the care and attention which could be given them under suitable conditions.

We have an agreement with the land department of the Colorado Fuel and Iron Company to purchase from it 14.5 acres of land lying adjacent to our grounds for \$2,500. This piece of land enters our present acreage in a V shape at a point just north of

the prison proper, and takes in a portion of our quarries. The price is considered reasonable, and we urge the appropriation to purchase it before the price becomes higher.

We are in hearty accord with the suggestions made by Warden Cleghorn looking to the employment of the inmates of the prison, and would suggest that legislation relative thereto, carrying a sufficient appropriation to satisfactorily install the needed reforms, be enacted as soon as possible. In the matter of making the clothing and other apparel used by other institutions, an outlay sufficient to cover the cost of additional machinery, tools, etc., would be all that was needed to inaugurate the work.

We wish to commend the able and effective administration of Warden Cleghorn, and the splendid record he has made and is making. His careful attention to the details pertaining to the management and welfare of the institution has taken much of the burden from our shoulders. To his able corps of assistants, and particularly those in charge of the different departments, we also wish to extend our thanks and appreciation for their uniform courtesy and consideration. To each and every one of them is due credit for assistance in the successful work of the past two years.

In closing we wish to extend to your Excellency our thanks for your kind consideration of all matters pertaining to the Penitentiary, and to assure you of our utmost confidence and respect.

Respectfully submitted,

THOS. M. BOWEN, President.

CHARLES MUNN, President pro tem.

H. L. WHITE, Secretary.

WARDEN'S REPORT.

Canon City, Colorado, November 30, 1906.

To the Honorable Board of Commissioners of the Colorado State Penitentiary, Canon City, Colorado:

Gentlemen—I have the honor to submit herewith my report for the two years ending November 30, 1906, together with reports covering the same period from subordinate officers of the institution.

PRISON POPULATION.

In prison November 30th, 1904.....	699		
Received by sentence of court.....	497		
Received by escaped prisoner returned.....	1		
Returned for violation of parole.....	15		
	—	1212	
Discharged by expiration of sentence.....	113		
Discharged by order of court.....	1		
Pardoned.....	22		
Paroled.....	446		
Escaped.....	6		
Died.....	17		
Executed.....	4		
Transferred to Buena Vista.....	1		
	—	610	
In prison November 30th, 1906.....			602

The decrease of 97 in the prison population during the past two years can be readily accounted for. There were received at the institution 104 less prisoners from all sources and released 23 less during the two years just closed than during the former

WARDEN'S RESIDENCE.

period. In addition to this difference nearly 100 more were released on parole.

DISCIPLINE.

The general behavior and conduct of the inmates has been very good during the term just closed, as the following table of reports, filed against them for infractions of the rules, will show :

HOW OFTEN REPORTED	Prisoners Reported	Total No. Reports
First time reported	207	207
Second time reported	85	170
Third time reported	47	141
Fourth time reported	23	92
Fifth time reported	11	55
Sixth time reported	10	60
Seventh time reported	2	14
Eighth time reported	2	16
Total	387	755

IMPROVEMENTS AND REPAIRS.

The appropriation made by the last Legislature for improvements and repairs in and about the prison was \$30,000, which has been expended for the following purposes :

Completion of Cell House No. 4	\$9,442.93	
Laundry and shower bath equipment	4,651.16	
Pumps and machinery in boiler house	2,604.08	
Improvements in culinary department	1,505.00	
New lime stone and improvements at kilns	1,119.00	
Horses, vehicles and equipment	1,556.00	
New library building	1,200.00	
Farming implements and equipment	979.83	
Cement floors	372.50	
Painting and house furnishings	343.50	
Roof painting and weather strip	295.56	
Completion of ice house	195.55	
General improvements and repairs	5,734.89	
		\$30,000.00

Cell house No. 4 has been finished in every detail, and was occupied in December of 1905. Its occupancy has not only relieved the congestion which prevailed at the prison, but has given very comfortable quarters to those of the prisoners who conduct themselves in such a manner as to entitle them to first grade privileges. The cell house capacity is 110, and every cell is filled.

One of the greatest improvements of a permanent nature made, both from an economic and sanitary standpoint, was the installation of a complete steam laundry and shower bath department. These two departments, both in the same building, are modern in every detail and greatly facilitate the work. The saving in material used in the laundry alone will pay the expenditure made for the machinery in a few years.

New roasters, boilers, coffee urn, etc., have been installed in the kitchen department, adding a very much needed permanent improvement to that part of the prison.

Cement floors were laid in the corridor of the main building and also in the waiting room. This has been so satisfactory that we hope to extend the improvement to all parts of the prison.

The completion of the new stone ice house, built into the hill back of the prison, makes it convenient to store without waste a sufficient supply of pure lake ice for use during the entire year.

In order to accommodate the constantly increasing number of volumes in our Reynolds library, a new building was erected and fitted with shelving, etc. This creates additional space in the hospital section, from which the library was removed, and has provided a room that has been fitted up as an operating department.

The purchase of additional lime rock and the improvements made at the lime kilns, the purchase of new machinery, etc., for use on the ranches, new teams, vehicles and equipment necessary to carry on the business of the institution, and the repairs and minor improvements constantly being made, have used up the balance of the appropriation. Taken as a whole, we feel that the amount has been judiciously expended and the work accomplished very satisfactory.

EMPLOYMENT FOR PRISONERS.

For many years the unfortunate complications that have existed concerning labor conditions in Colorado have so moulded public sentiment as to render it impossible to give employment to the inmates of the Penitentiary to any considerable extent. To such a degree does this condition prevail that not only is practically the whole expense of maintaining the institution borne by the taxpayer, but it is impossible to give to the prisoners the benefits that should accrue to them as a reward for honest effort and services well performed while engaged in some labor that would at least partially pay for their maintenance. Hampered thus, it

has been a very difficult matter for the management of the prison to accumulate anything in the way of prison earnings, and absolutely impossible to estimate, with any degree of certainty, what could be relied on as financial assistance from the work of the prisoners. The earnings of the Penitentiary for the past two years have been larger than ever before in the history of the prison, but this has only been attained by the constant efforts of the Warden to increase the revenue from every quarter possible, more particularly in the departments of the ranches and quarries. This condition of affairs can not be relied on in the future with any degree of certainty, as the conditions which have made it possible to bring about this result may not extend over any given period, and, in fact, may never prevail again. It is, therefore, of the utmost importance, not only to the State at large, but to the inmates of the prison, that some means be devised whereby steady employment may be provided for all able bodied men within these walls. The means of employment most commonly considered in connection with prisons is the contract system, whereby the inmates are hired out to some firm or individual at so much per day, the work being done within the prison. To this system there is much objection, and in several like institutions where it is in vogue the management is seriously considering its abandonment. The manufacture of certain things for market has also been considered, but the expense necessary to the installation of the machinery necessary to commence the work, and the large amount of investment necessary to successfully carry on a manufacturing business of any magnitude, have rendered this method anything but practicable. Many other plans have been suggested from time to time, but a careful study of the existing conditions and an experience covering several years' incumbency as Warden of this institution, has convinced me that at this time the most feasible and available method of solving this problem is along the following lines:

We now manufacture for own use clothing, underclothing, shoes, etc. Let some legislation be enacted whereby all of this class of goods used by the institutions of the State could be manufactured here and purchased by the other institutions at a price that would make them cost each place much less money, and at the same time leave a profit to this institution sufficient to pay for the work of the men. This would afford employment at a price sufficient to pay for their keep of that portion of the prison population which it is necessary to keep within the walls, and at the same time enable other institutions to procure wearing apparel of a good quality at a very low rate. This would result in a saving of thousands of dollars annually, and at the same time provide a solution for the very serious problem of labor for this class of prisoners.

Again, the question of good roads is now a very important one in Colorado, and it is becoming more so each day as the popu-

lation increases. New cities are springing up in all sections of the country and the necessity for good roads becomes more apparent. Anything that tends to better the condition of the public highways at once appeals to the great mass of people throughout the State, more especially those located away from the larger cities, and as this movement gains strength from the increased interest being taken in the matter by all classes of people, the proposition of how best to attain the desired end and secure improvements in the public thoroughfare becomes more generally discussed. It could be arranged, I think, without much inconvenience, to work from 100 to 250 prisoners on work of this nature, and in such a manner as not to interfere with free labor. In a great many instances the vast amount of labor to be accomplished before a desirable road can be constructed through some desirable part of the State renders it impossible to be built because of the enormous cost if built with free labor. Consequently the road is not built; but if prison labor could be employed at a much less cost the road might be constructed, and the community benefited thereby without injuring anyone. Certainly no objection could be made to that. Under the provisions of the Lewis Road Law, which is now in vogue to a certain extent, the prisoners engaged in road work are allowed additional good time for each day employed. This is sufficient incentive to secure faithful service and good conduct, and would make it possible to employ the prisoners on similar work in almost any portion of the State, at a reasonable rate of expense and with scarcely any danger of escape. For more than a year past some prisoners have been performing this kind of service. One gang of more than 75 men was employed for several months in the construction of a road at as great a distance as three miles from the prison, while another gang of 25 have been working ten miles from the prison, remaining there during the entire week and living in tents. Several other smaller gangs have also been employed from day to day at similar work. During all this work there has not been a single attempt to escape, and very few breaches of discipline; while the prisoners have all been anxious to secure a place with these gangs. The total number of prisoners who have been employed on road work at various times is 183; total number of days' labor performed, 25,533; total number of days additional good time allowed prisoners, 8,511; average number of days additional good time allowed, 46; 9 prisoners, with a total credit of 292 days' additional good time, have been discharged; 93 prisoners, with a total credit of 4,150 days' additional good time, have been paroled; 81 prisoners, with a credit of 4,069 days' additional good time, have not yet reached the limit of their time. I consider the Lewis Road Law as being the greatest step toward the solution of this troublesome question so far advanced, but numerous changes will have to be made in it before it will entirely cover the field desired, the principal one being the adoption of some measure providing for the maintenance

of the prisoners while away from the prison, as well as taking care of the other expense incurred. Of course some additional expense will be incurred, as prisoners can not be transported and cared for outside the prison as cheaply as they can be provided for inside, but the additional cost would be little as compared with the results obtained.

There are so many things to be urged in favor of the employment of prisoners that there is in reality but one side to the proposition, and I feel that the methods I have suggested present the best solution to this much mooted question. To put it into practice would not require a large appropriation; nothing as compared with what would be required to establish a manufacturing plant and maintain it, even were such a plan deemed advisable. Neither would such employment of the convicts interfere in any sense with free labor. On the contrary, the plan could be put in active operation within a very short time, a saving in the expense of maintaining the prison under existing conditions would be effected, and the benefits to the public generally, as a direct result of the road work accomplished, would be of a vast and permanent nature.

PAROLES.

Total number out on parole November 30th, 1904.....	305	
Number paroled during two years ending Nov. 30th, 1906.....	446	751
Less number discharged from parole.....	190	
Pardoned while serving on parole.....	7	
Returned for violation of parole.....	21	218
No. on parole November 30th, 1906.....		533
No. of paroles violated by failure to report as required.....		143

CIVIL SERVICE.

With additional years to my credit in an official capacity to be guided by, I am more than ever satisfied that civil service should be adopted in State penal institutions. The paramount qualification of an employe should be his ability to fill his position in a creditable manner, and when he once reaches a point where he is considered worthy because of his fitness and industry, he should have the knowledge that he can retain his office as long as he desires. With this knowledge better men could be found to fill many of the departments, and better service would be the result. A law having for its object the placing of all penal institutions on a civil service basis should be introduced at this session of the Legislature.

PAROLE AGENT.

I wish to earnestly recommend the enactment of some legislation providing for a parole agent, whose duty it will be to have full charge of all prisoners released on parole from this Penitentiary and the State Reformatory, and also to assist in caring for discharged prisoners. As the law now stands, a prisoner is released from these institutions with a little clothing and what money he can provide himself with, turned out into the world to make his way as best he can, and bound by no restriction other than his written report to the Warden once each month. It can not be ascertained for a surety, from his written report, whether the man is even in the country, much less anything about his conduct. A parole agent would take him in hand upon his release from the prison, procure employment and look after him personally, giving him all necessary assistance so long as he behaved, and should he break his parole the agent would be on hand to return him promptly to the prison. This agent should be appointed by, and be at all times under the direction of, the Board of Commissioners and Wardens of the Penitentiary and Reformatory.

CONCLUSION.

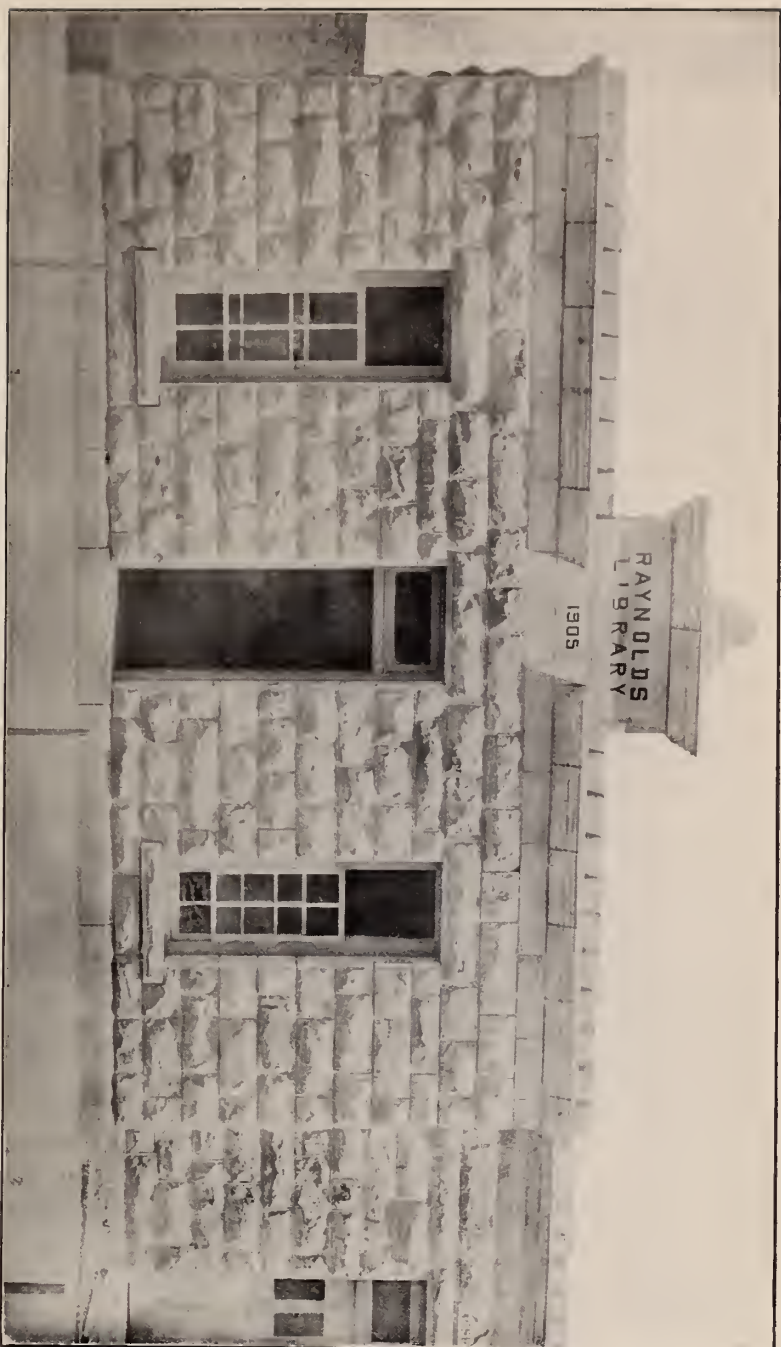

In conclusion, permit me to say that the past term has been one of the most successful in the history of the institution.

To you, gentlemen, I wish to return my thanks for your continued courtesy and kindness. Harmony has prevailed at all our meetings, and our consultations have always resulted beneficially.

To his Excellency, Governor McDonald, I also wish to express my appreciation for his uniform courtesy and assistance. He has ever been ready to act for what he considered the best interests of the institution, and his counsel and assistance have been valuable.

Respectfully submitted,

JOHN CLEGHORN,
Warden.

REPORT OF THE CHIEF CLERK.

To Hon. John Cleghorn, Warden :

I have the honor to present herewith, for your consideration and approval, the biennial report of the Chief Clerk's office of the Colorado State Penitentiary, together with tabulated statements and other data, for the two years ending November 30, 1906.

Respectfully submitted,

A. R. FRISBIE,

Chief Clerk.

TABLE NO. 1.

SURGEON'S REPORT.

Hon. Jno. Cleghorn, Warden :

Dear Sir—I hereby submit the following biennial report for the hospital of this institution.

The present sanitary condition of the entire prison is excellent.

The number of seriously ill in the last two years has been very small compared to the number of prisoners and as compared to the previous years.

A large number of operations have been performed, much to the benefit and relief of the suffering prisoners. Men who have been suffering for years are now well and strong. All this has been done owing to your assistance in giving and furnishing for me a small operating room, such a place not being known previously in this institution.

I have but one recommendation to make—the building of a separate hospital building, with suitable wards for the tubercular and the insane prisoners.

F. N. CARRIER,
Surgeon, Colorado State Penitentiary.

INTERIOR VIEW—CELL HOUSE 3.

Summary of cases treated in hospital during the two years ending November 30, 1906.

SPECIAL CASES.

Morphomania.....	1	Tuberculosis.....	17
Melancholia.....	8	Typhoid Fever.....	12
Tape Worm.....	5	Pneumonia.....	6
Syphilis.....	74	Erysipelas.....	1
Apoplexy.....	1	Bronchitis.....	4
Gonorrhoea.....	4	Gall Stone.....	1
Partial Dementia.....	1	Asthmatic.....	3

SURGICAL OPERATIONS.

Resection of Ribs.....	1	Circumcision.....	1
Phymosis.....	1	Knife wounds.....	1
Amputated toe.....	1	Tumor removed.....	1
Amputated finger.....	1	Appendicitis.....	1
Urethral fistula.....	1	Eye removed.....	1
Abscess Perineum.....	1	Fistula.....	1
Fractured foot.....	1	Broken ribs.....	2
Hemorrhoids.....	7		

MINOR SURGERY.

6581	Caldwell	Nov. 8, 1906		5	13	Internal injuries from accident.
6628	Cohen	Nov. 15, 1906		1	15	Tuberculosis

There were four executions under the law providing for capital punishment. One death by accident, 3 from tuberculosis, 5 from pneumonia, 3 from typhoid fever, 2 from syphilis, 1 from paralysis and syphilis, 1 from meningitis, 1 from Bright's disease.

Total for two years ending November 30, 1906—21.

Respectfully submitted,

F. N. CARRIER, M. D.,
Prison Physician.

MATRON'S REPORT.

Hon. John Cleghorn, Warden, Colorado State Penitentiary:

Sir—I have the honor to submit report of the female department for the biennial term ending November 30, 1906.

In prison December 1st, 1904.....	13	40
Prisoners received during term.....	27	
Number of prisoners pardoned during term.....	2	40
Number of prisoners discharged during term.....	6	
Number of prisoners paroled during term.....	17	
In prison November 30, 1906.....	15	40

The discipline in this department has been most excellent. The female prisoners are employed in keeping the prison in a state of cleanliness, doing the cooking and laundry work, and mending and darning socks for the male prisoners. While work of this kind keeps them employed, it fails to teach them any occupation that will be of benefit upon their release from prison. I believe it would be advisable to provide some industry that would teach them to do such work as would help them to earn an honest living after they are discharged.

Respectfully submitted,

MRS. SUE ANDERSON,
Matron.

CHAPLAIN'S REPORT.

To the Honorable Board of Penitentiary Commissioners:

Gentlemen—It is with pleasure that I submit herewith my second biennial report, which is a synopsis of the religious and educational work done in this institution during the two years ending November 30, 1906.

No one can compute or properly measure the work done, or the results that follow from the Chaplain's ministry in an institution of this kind, for it is largely a seed sowing time—the harvest for good comes later on.

However, I desire to call your attention to some of the lines of work that go to make up the ministry and duties of a chaplain.

CHAPEL SERVICES.

The Chaplain conducts services every Sunday morning at 9:30, except the first Lord's day in each month. The first Sunday in each month the Catholic and Christian Science people have services, the local Catholic priest conducting service at 8:30 a. m. and the Christian Science people at 2 p. m. The attendance upon any and all of these services is voluntary on the part of the prisoners. The average attendance upon the services during my ministry has been about 6.7 of the prison population, with an additional attendance of 50 to 100 visitors from the city. With a well organized choir and a well drilled band, together with congregational singing—all furnished by the convicts—the preaching and the music create a spirit of cheerful obedience and a willing submission to the rules of the institution during the following week, and it is therefore a wholesome aid to discipline as well as helpful to their spiritual welfare.

THE PRISON LEAGUE.

Another moral and religious force which has been and is helpful in the institution is the Prison League. It has a present membership of over 200, and is auxiliary to the State Christian Endeavor Society, and is based upon a similar pledge, and rules adapted to the inmates of this institution. It is recognized by the management as a wholesome factor in the regulation of prison

discipline and affords mutual helpfulness and instruction to its members.

THE LIBRARY.

Our library, consisting of over 4,000 volumes, systematically arranged, labeled and catalogued, with additional monthly periodicals, religious magazines and papers, is now located on the ground floor of a neat and commodious building, erected specially for this purpose during the past year, and is known as the Raynold's Library. It furnishes the prisoners with a great variety, quality and quantity of wholesome reading matter, which is greatly appreciated by them, as the following tabulated statement will show:

Total number of books delivered during the biennial period.	55,356
Average daily delivery.	70
Average number of inmates using library.	59½
Papers received and distributed	12,772
Number of magazines bound and placed in library	7
Number of books repaired.	1,200
Number of books rebound.	525
Number of books mutilated and unfit for use	40
Number of books added to library.	225
Total number of books in library, all classes.	4,313
Deliveries are made every day in the year except Sunday.	
The average daily circulation is	70
There are now outstanding (volumes).	411

By the aid of a binder the books are kept in as perfect condition as possible. The visitors' admission fee furnishes a fund for the purchase of new books.

THE SCHOOL.

Night school has been conducted in the chapel five nights in each week, from October to May of each year. The average daily attendance during the year 1904 and 1905 was 135 out of an enrollment of 146.

There are many more who would like to take advantage of school privileges, but it is thought advisable by the Warden that the present enrollment should not be increased.

The prisoners receive instruction only in the common school branches, and the interest manifested and the progress made by them is remarkable.

Books, slates, writing material, blackboards, etc., are furnished by the State for the use of the prisoners. The school is conducted somewhat after the order of a Sunday school—that is,

a teacher for each class of six to ten pupils. These teachers are selected from among the convicts who are qualified to instruct, and both teacher and pupil are under the censorship of the Warden and the general supervision of the Chaplain.

LECTURES.

During the past year Rev. W. E. Collett, State Superintendent of the Colorado Society for the Friendless, inaugurated a lecture course, whereby the prisoners were favored with several lectures by noted men and women of our State, which were very much appreciated, and very interesting and instructive.

This will probably become a feature of the institution hereafter.

MISCELLANEOUS.

Special services have been conducted during the past two years by the Canon City W. C. T. U. and other church societies, also by noted prison reformers, ministers and lecturers, all of which have been full of encouragement and helpfulness.

Believing, as I do, that

“There is no woe so evil,
Nor an evil so abysmal,
But a golden bridge of glory
Spans the yawning chasm o’er;”

That—

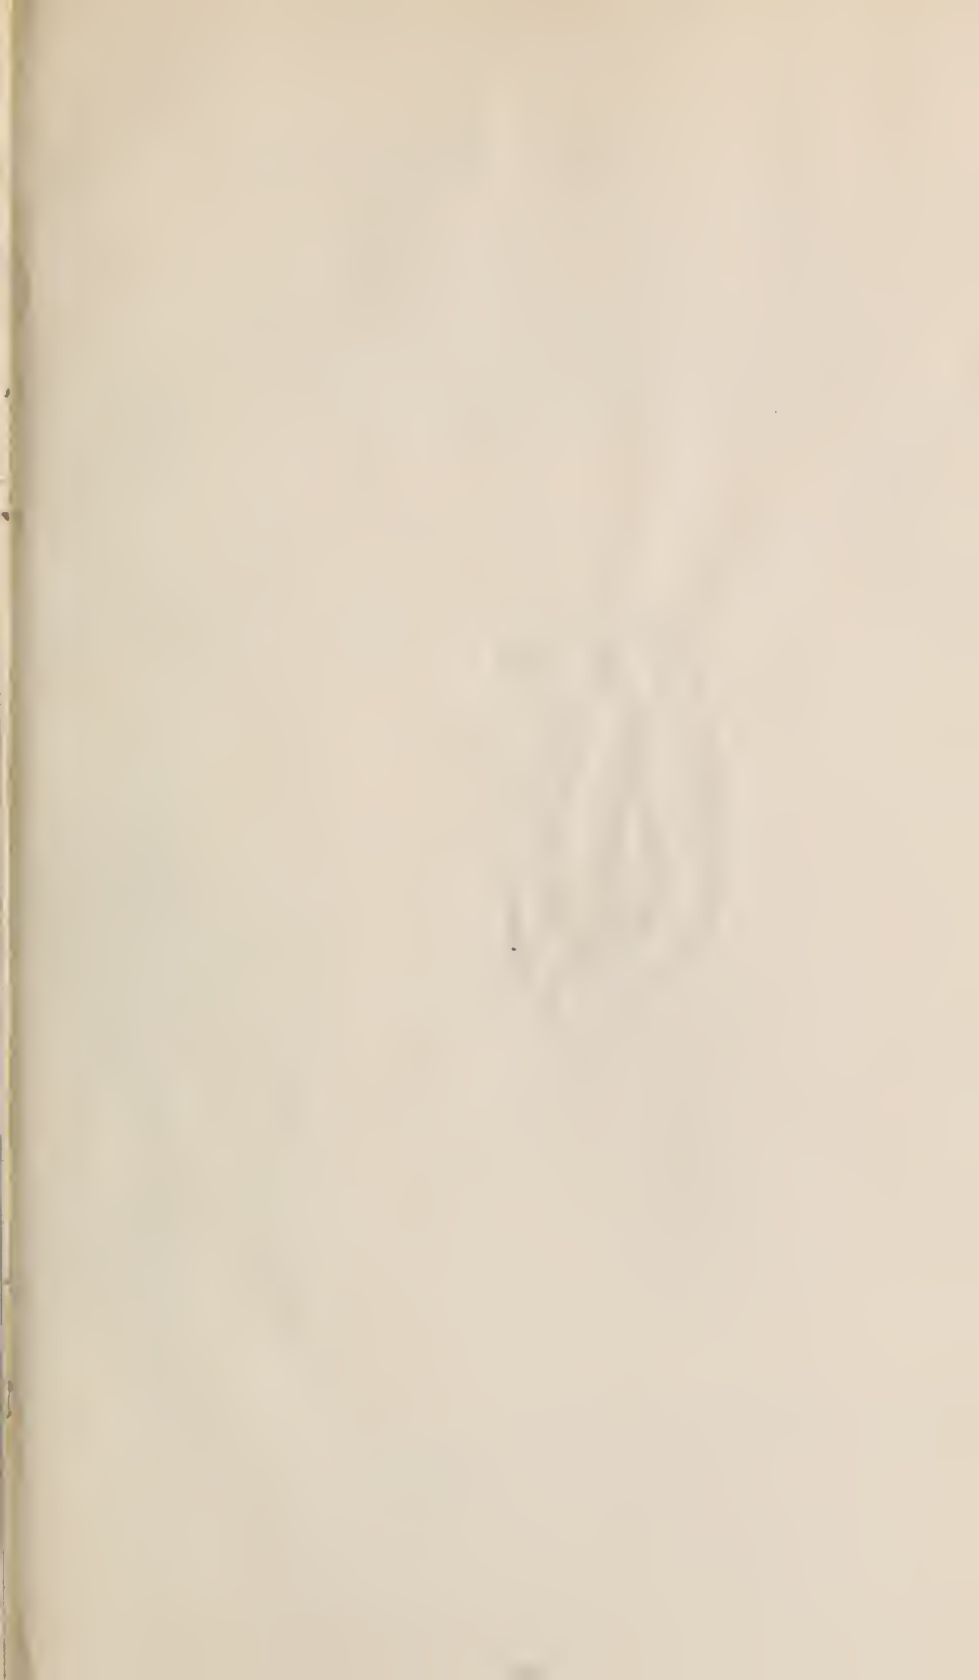

“Down in the human heart,
Crushed by the tempter,
Feelings lie buried that grace can restore;
Touched by a loving heart,
Wakened by kindness,
Chords that were broken will vibrate once more.”

I have sought to bring to these unfortunate ones new ideals, aspirations and new hopes, that they may have strength of character to come into the possession of that liberty that is bounded by law, duty, truth and love.

In conclusion, I wish to thank the Warden for the wisdom, sympathy and helpfulness he has always rendered in every laudable effort to do good; to the Deputy Warden, Yard Master and the entire force of prison officers who have so kindly and courteously co-operated with me at all times in the furtherance of my work; and to you, the Honorable Board of Commissioners, for favors bestowed.

Yours fraternally.

J. P. H. LUCAS,
Chaplain.
