REPORT OF WARDEN

TO THE HONORABLE EDWIN C. JOHNSON AND THE THIRTIETH GENERAL ASSEMBLY:

It is my privilege to submit herewith the twenty-ninth Bienial Report of the affairs of the Colorado State Penitentiary.

The information and recommendations contained herein, together with copies of statements and reports, will, I trust, give to you the integral data of the Institution and its requirements for the ensuing Biennial.

IMPROVEMENTS AND REPAIRS

Among the various improvements and repairs made during the period were the following:

The Store Room has been remodeled; painted, with additional shelving, and the installation of a refrigeration plant together with a Butcher Shop and two coolers; one for meat, the other for dried fruits, etc., the latter being made possible by special appropriation by the 1933 Legislature.

This building has been rewired in accordance with the Underwriter's specifications, which reflects later in this report.

The Automobile license plate factory has been installed in the lower basement floor of building number four and the 1935 license plate contract has been completed, with the total production of 617,990 plates to cover the sixty-three counties of the State of Colorado, produced at a cost of \$39,707.08, or six and two-fifths cents per plate. This production, while being 20% greater than that of 1934, was produced for \$15,293.00 less, which was a direct saving to the State, or 61% of the actual cost of the installation.

The Penal benefits derived from this industry have been many, the main factor being the rehabilitation and facilities of working men who are not permitted outside the walls.

On the first floor of this building is the Carpenter Shop, to which has been added several new pieces of machinery. This enables us to do mill work, etc., which formerly had to be purchased from the outside, again instructing men to the higher and more useful levels of life. On this same floor is our paint shop, where paints for the entire Institution are mixed and made ready for use.

The second or top floor is our tailoring department, where several new machines have been installed by the appropriation made by the last Legislature, this new equipment has greatly facilitated the making of better garments for the inmates.

Also on this floor is our shoe department, where worn shoes are reclaimed and repaired for further use. This building is fireproof, has been rewired, with steel stairways substituted for old wooden stairways.

Due to the overcrowded condition, a request is made further on in this report for an Industrial Building.

The interior of cell houses one, two, and three were painted and new wiring installed.

The Administration Building roof was repaired, offices redecorated, rewired and safety switch panels and the fuse boxes placed within the turnkey's cage, thereby assuring proper control and eliminating the possibility of outside interference.

New electric wiring was installed in the laundry, bath room, garage, soap house, blacksmith shop, vegetable room, gas chamber and cell house five. This wiring was strictly in accordance with the Underwriter's specifications and materially reduced the cost of insurance, which is explained more in detail elsewhere in this report.

A new transformer station was installed and inclosed in woven wire fence and is now located outside the walls, under observation of number eight tower.

A new tower was erected southwest of the Administration Building and equipped with bullet-proof glass.

A new tower was also erected between towers six and seven and is now known as six-A, number fifteen tower was moved to a new location and rebuilt for better observation purposes. On tower number three, which is east of the Administration Building, extensive improvements were made, a cat walk built on top of the wall for a distance of 120 feet. The wall at this point was raised four feet and an iron railing with wire netting, together with three steel shields, were mounted for protection. On tower eight, which is located east of cell house one, a cat walk, iron railing, wire netting, together with protection shields, were also installed.

The interior of the boiler house has been considerably improved by repainting and by the elimination of partitions, together with new roof and the installation of a two-hundred-horse-power boiler which is now in operation.

✓ The Bake Shop was reroofed with four-ply Asbestos roofing.

✓ The new addition to the Hospital, which was not finished at the close of the last Biennial Period, has since been completed. This addition is strictly fireproof and covered with built-up type of roofing which carries a fifteen-year guarantee. The entire Hospital, new and old, was completely rewired and the old building reinforced throughout the entire basement. New beds were installed in the surgical wing, an X-Ray Machine purchased, which is now in operation. In addition, a Dental Shop, fully equipped, was installed. Statistics thereof appear in the Prison's Physician's Report.

The installation of an entire new water system was made possible by an appropriation of \$15,000.00, made by the last Legislature and with lease of land belonging to The Southern Colorado Power Co., located approximately one-half mile southwest of the Prison main buildings. The enormous amount of water used throughout the Penitentiary annually and the prohibitive cost thereof prompted this development. On the above land were drilled several test wells and one in particular was discovered to meet more than the requirements. This well has an exceptionally good grade of water with a flow of six hundred gallons of water per minute. A Pamona Turbine Pump was installed, having a rating of twenty-five horsepower, seventeen hundred sixty R. P. M. and regulated to pump four hundred gallons of water per minute. A water meter was installed and a pump house erected, including sleeping quarters for the men in charge. Two thousand two hundred and six feet of eight-inch cast iron pipe was laid to convey the water to a hundred thousand-gallon retaining tank, which is located on a high hill north of the Prison, sufficiently high to provide gravity flow and with pressure available in all or any part of the Institution.

An automatic control was added, whereby water reaching a certain level in said tank shuts off the turbine at the pump house; in addition to the above, seventy-five feet of six-inch water main was laid and six double head standard fire hydrants were installed at strategic points of the Institution, which have materially reduced the cost of insurance and is further explained in another part of this report. This well has had a thorough test during the extremely dry year of 1934 and has never at any time during that period shown a decrease in its production.

Heretofore the water was purchased from the City of Canon City at a cost of eight cents per thousand gallons; our present cost for a better grade of water, which has been made possible by this method, is 1½¢ per thousand gallons.

	Average Consumption	Present Cost	Former Cost	Difference in Cost
Monthly	8,768,338 Gals.	\$ 135.91	\$ 701.47	\$ 565.56
Yearly	105,220,056 Gals.	1,630.92	8,417.64	6,786.72
Biennial	210,440,112 Gals.	3,261.84	16,835.28	13,573.44

These figures show that the saving obtained in this Biennial period is approximately the cost of the entire project.

A new gate was erected at tower number nine, which is north of cell house six, and a new wall built east of that point which, when completed, will join with the present east wall. The latter was raised and extended several hundred feet; in all, there were five hundred and seventy feet of main wall built during this period.

The appropriation of \$27,379.23 for the new Female Building has been used to exceptional good advantage, there being

erected a two-story building having a reinforced concrete foundation throughout. The first, or basement floor, is constructed of steel columns, reinforced concrete floor and the side walls and ceiling plastered. This basement will be used for a Dining Room, Kitchen, Storeroom, Coal Supply, Lock-up Cells, Laundry, Drying Room, etc.

The second story is also reinforced and contains thirty individual cells with modern equipment, together with office rooms and two hospital rooms, shower baths, toilets, etc. The front porch of this building, of which 50% will be used as a sun porch for consumptives, is glass enclosed and properly ventilated; all exterior openings are protected with three-quarter-inch bars and windows throughout the entire building are steel frame and sash. The roof is a four-ply Asbestos Fibre roofing with necessary skylights and ventilation provided for; all the plumbing, heating and electric equipment conforms strictly to the Underwriter's Code.

This building, being outside the main walls and situated east of the east wall, will be enclosed partly by stone wall and link belt wire fencing with steel posts fourteen feet high, together with necessary iron gates and electrical devices.

The flood lighting system has been considerably improved with additional new poles, reflectors and searchlights; the distribution of the light at the present time is more advantageous and capable of illuminating the entire Prison yards and its surroundings.

The heating system was found to be in a more serious condition than was first anticipated, the appropriation of \$15,000.00 did not cover the necessary requirements for repairs, however; the amount to complete this work will be taken out of the general improvements and repairs fund of the ensuing period, we therefore refrain from requesting additional appropriation at this time.

As aforesaid, the changes of electrical wiring, fireproofing and installation of new water system has materially reduced the cost of insurance, for example, the total insurance coverage three years ago was \$193,000.00 and covered fire only at a cost of \$1.155 per \$100.00 per annum, the present coverage is \$490,000.00 fire and \$490,000.00 riot, the cost \$.624 per \$100.00 per annum; a saving of \$.531 per \$100.00 per annum, or a total saving of \$2,601.90 per year.

The Riot coverage has since been added still leaves a net saving of \$1,220.90 per year with more than double the original amount of insurance for fire and the additional coverage of \$490,000.00 riot. The present rate of \$.624 per \$100.00 may be further reduced by the fireproofing of buildings which are enumerated in our appropriation requests for the ensuing period.

That portion of the Prison formerly known as the dump grounds, located at the north of the Prison and under the observa-

tion of tower sixteen, has been converted into a salvaging grounds where inmates unsuitable for laborious work are employed in the segregation of old lumber, pipe, scrap iron, etc., and materials that have any value other than for scrap are carefully stacked and are used where suitable. The scrap materials are sold and revenue derived therefrom, the saving attributable to this procedure amounts to a great deal at the end of the year.

The Tin Shop, formerly in conjunction with the Blacksmith Shop, is now a separate department and with the addition and installation of a sheet metal brake and other small tools a complete Tin Shop is now in operation, tin and iron work such as gutters, down pipes, etc., heretofore purchased on the open market, are now made within the walls.

Many other improvements and repairs have been made, namely: the erection and installation of the Gas Chamber, Powder House, Lime House, Harness Repair Shop, Truck Garage, and Dog Kennels added to the Horse Barn.

The entire hill north of the Prison was cleared and new roads built. Several hundred feet of retaining wall and dikes for drainage and flood protection, also fourteen hundred feet of eight-foot fencing east of tower number six-A continuing to tower number seventeen as a further prevention of escape of men working on hill.

RANCHES AND GARDENS

Farming activities provide work for a large number of prisoners which, incidentally, is the result of our discipline system within the walls, as all prisoners working on these farms are known as trusty prisoners.

Even with the low prices of 1933 and the drought of 1934 the products derived from our farm operations disclosed an income equal to the money expended for that purpose.

Ranch number five experienced a very peculiar condition during this period. In 1933 a heavy frost killed the entire cherry crop and part of the apple crop, in 1934 the cherry crop was entirely satisfactory but, unfortunately, the prices were low; a light frost later in the 1934 season damaged a part of the apple crop; a yield of 60% of a normal crop was received. Notwithstanding these conditions existing the Ranch was able to pay part of the interest on its indebtedness in the amount of \$3,000.00.

POULTRY FARM

The Poultry Farm was completely renovated during the year of 1933 and was placed in shape for a new breed of poultry which was purchased in the spring of 1934. The present stock is in healthy condition and the future results therefrom should prove highly satisfactory.

CANNING PLANT

The Canning Plant, which is operated by the Prison, is one of the most satisfactory activities we have from a financial standpoint. This industry is somewhat handicapped in this Biennial due to the passage of the Hawes-Cooper Bill, therefore the profits derived are not as great as in former years.

The entire plant and contents have been reconditioned and painted, worn machinery parts and belting replaced and the entire building rewired in accordance with the Underwriter's Code.

RANCH NUMBER ONE

This has been formerly known as the New State Owned Ranch. In March, 1934, our Dairy herd was transferred to this Ranch. The herd now consists of 126 head of Registered and Grade Holstein Cattle. We milk on an average of 53 cows daily. The balance of the herd is three Registered Bulls and young stock which we are developing. These cows average about 200 gallons of milk per day and the records of the State Agricultural College at Fort Collins in their Cow Testing Department claim and show that this herd is equal to the best in the State of Colorado.

The Dairy barn is of reinforced concrete construction with four-ply Asbestos roofing, which is listed under class A in the Fire Underwriter's specifications. The Dairy barn is modern in every respect, thoroughly sanitary and includes a high pressure boiler and refrigeration system for the milk house. There is also attached to this barn a 150-ton Silo. There are ten corrals 75x100 feet with sheds capable of housing 200 head of cattle. These corrals and sheds are of stone construction; the stone being quarried and cut on the premises. Within these corrals there are accommodations for the hospitalization, calving and weaning of cattle; each corral being equipped with stock water troughs.

The Turkey industry, formerly connected with the Poultry Farm, has been transferred to this ranch and is located in a section which is ideal for raising turkeys. A bunk house has been constructed for the herdsmen, also brooder houses, granary, etc.; all being made of stone, adobe and frame. There are four large enclosures three hundred feet square, which have been built of woven wire, to care for these turkeys. The herd at this time totals 980 of the bronze variety.

One of the activities on Ranch One is the making of adobe brick, of which some seventy-five thousand have been made within the past year and used for construction work. A bunk house capable of housing 75 men has been completed and is now occupied. At this time horse barns, granaries and corrals are being erected, they being made of stone which is being quarried on this Ranch.

Many gravel pits have been found on this property and the product is used for building purposes and roads.

The water for domestic use is obtained from wells drilled on the place and pumped to a concrete water storage tank with a capacity of forty thousand gallons located at a convenient point sufficiently high to give gravity flow. The system is capable of taking care of all requirements, but owing to the alkali nature of this water we are asking for an appropriation under ranch requirements for a water softener.

The ranch in general is now beginning to show progress and by the end of the ensuing Biennial Period it will compare favorably with the best Dairy Ranch in the State of Colorado.

RECOMMENDATIONS

My recommendations in connection with the financial requirements for the Colorado State Penitentiary for the Biennial Period beginning July 1, 1935, and ending June 30, 1937, are as follows:

For your convenience I have grouped the appropriations under four general headings:

Regular Appropriations—Coming Biennial Period.

Appropriations for the Segregation of Prisoners and for Vocational Training.

Appropriations Necessary for Immediate Repairs and Additions to Equipment.

Appropriations to Complete Projects Now Under Way.

A tabulation of these appropriations is found immediately below. Following this tabulation will be found an explanation and reasons for asking for these appropriations.

Regular Appropriations—Coming Biennial Period

Maintenance	\$487,945.56	
Salaries	440,051.00	
Repairs and Improvements.....	15,000.00	\$942,996.56

Appropriations for the Segregation of Prisoners and for Vocational Training

Remodeling Old Female Building.....	\$ 50,000.00	
New Building Industrial Section.....	65,000.00	
New Cell House.....	250,000.00	
Highway Sign Plant.....	28,000.00	
Shoe Factory.....	15,000.00	
Hospital Extension Tubercular Quarters	10,000.00	\$418,000.00

Appropriations Necessary for Immediate Repairs and Additions to Equipment

Hydro Plant.....	\$ 30,000.00	
Laundry	17,500.00	
Farm Equipment.....	8,000.00	
To Sanitize by Cementing Gravel Walks	8,250.00	
Reserve Officers Special Quarters.....	25,000.00	
Sanitize Cell Houses One, Two and Three	20,000.00	
Graduating Chapel Floor.....	3,500.00	
Residence and Dormitory Repairs and Alterations.....	7,500.00	
Bullet-Proof Glass-in Towers.....	2,500.00	\$122,250.00

Appropriations to Complete Projects Now Under Way

Fireproofing Cell Houses.....	\$ 10,000.00	
Reroofing and Fireproofing Store Room	8,500.00	
Completing of Dormitories on Ranch Number One.....	15,000.00	
Purchase of Real Estate.....	8,500.00	
Purchase of Ranch Number Five, Remainder of Purchase Price.....	15,000.00	
Purchase of Carlton Mortgage on Ranch One.....	6,000.00	\$ 63,000.00

Total of all Appropriations Requested..... \$1,546,246.56

In connection with the Budget outlined above I herewith offer discussion and recommendations.

REGULAR APPROPRIATIONS—COMING BIENNIAL PERIOD Maintenance

In computing the amount required for maintenance for the two years ending June 30, 1937, it was necessary to take into consideration the increase in Prison population and advance in price of commodities over the years of 1933-34, which figures were taken as actual. The expenditure of 1934-35 was estimated.

I am requesting \$487,945.56; this amount is arrived at as follows:

Actual Maintenance Expenditures for the Year Ending June 30, 1934.....	\$151,952.75
Estimated Maintenance Expenditures for the Two Years Ending June 30, 1935, based on above.....	354,276.35
Amount Required for Estimated Increase of Population and Estimated Increase in Prices of Commodities.....	133,669.21
Total Estimated Requirements.....	\$487,945.56

REPAIRS AND IMPPROVEMENTS

The amount requested for this appropriation is \$15,000.00. This fund is used for necessary repairs of equipment and buildings resulting from ordinary wear and tear.

APPPROPRIATIONS FOR THE SEGREGATION OF PRISONERS AND FOR VOCATIONAL TRAINING

The subject of segregation and vocational training is of supreme importance. It was my privilege to attend the National Convention of Wardens held at Houston, Texas, and a special meeting was devoted to this subject.

Space does not permit enumerating the many benefits derived from this meritorious system. The necessity of segregating hardened criminals and moral degenerates from those who are serving their first sentence is very necessary as the latter are very susceptible to influences around them. In the matter of vocational training it is obvious that the rehabilitation of the individual gives greater opportunity to apply himself when released to society.

It is for these problems that I am requesting the appropriations in this group.

Remodeling Old Female Building

This building is ideally located for hardened criminals but its present construction is not satisfactory inasmuch as it contains outside cells which should be dismantled and a cell block built in the center for proper guarding facilities.

The amount required for this is estimated at \$50,000.00.

Industrial Section

I recommended that a new building be constructed to house our vocational training. The present building space is insufficient and at the present time is very much overcrowded. The merits of this vocational training are of such importance that I strongly recommend and urgently request the appropriation of \$65,000.00 for this project.

New Cell House

The appropriation of \$250,000.00 needs no introduction as the present overcrowded condition and the ever-growing population of the Penitentiary make imperative the erection of a New Cell House.

I recommend that a New Cell House similar to that built in 1930, known as Cell House six, be constructed.

Equipment for Vocational Training

I earnestly request the appropriation for the purchase of a Shoe Factory, estimated at \$15,000.00, also a Highway Sign Plant,

estimated at \$28,000.00, the latter being in conformity with an Act passed by the last Legislature, Chapter 135 (Motor Vehicle License Plate and Highway Signs).

The installation of these two enterprises would serve a dual purpose as it would furnish vocational training for inmates, reduce cost and would be an actual saving of money to the State.

Hospital Extension Tubercular Quarters

I recommend the appropriation of \$10,000.00 for the erection of an extension for tubercular patients in our hospital. The present space is inadequate and we are confronted with a very serious proposition in controlling the spreading of this dreadful disease.

Laundry

The outstanding and most necessary request I have made is the appropriation of \$17,500.00 for laundry equipment. The present machinery is completely worn out and in wretched condition; it has been a source of considerable expense during the past years. Appreciating the value of sanitation and cleanliness where the laundry of twelve hundred men is involved and which at the present time is an utter impossibility, I therefore stress and strongly recommend that this appropriation be allowed.

Hydro Plant

The sum of \$30,000.00 should be appropriated to effect the necessary changes and replacements in the Hydro Electric Plant. The present equipment is a 30 cycle plant of 100 KW capacity. It was purchased second hand and with the growth of the Penitentiary this Plant is not only inadequate in size but obsolete in type. Under existing conditions it necessitates the purchase of additional electricity to run the Institution.

An engineering survey of this Plant discloses that immediate overhauling and converting into a 60 cycle unit would bring it up to standard. This change, together with the purchase of Diesel equipment of 150 KW capacity, which would synchronize with our Hydro Plant, would eliminate the purchase of electricity that the Institution uses so heavily in the summer time when the flow of water is so low, and in the winter when the river is choked with ice.

In the event of a breakdown of our present plant we would be compelled to purchase electricity from the local Power Company and would cost approximately \$1,500.00 per month. Should the unforeseen happen and we have a breakdown on our present system there would be no funds available to rectify same and I therefore urge that this appropriation be allowed.

Farm Equipment

Our present Farm equipment on the ranches is in dire need of replacing; the mowing machines, cultivators, rakes, wagons, etc., have been in use for so long that they are beyond repair.

The pipe lines and pumps must be repaired; a water softener to rectify the alkali condition in our domestic water supply on Ranch One is imperative.

It is necessary to purchase four pair of mules to carry on the work at Ranch One.

A purebred herd Bull is necessary to keep up the standard of our cow herd.

These are some of the outstanding requirements needed on our ranches. I therefore recommend the appropriation of \$8,000.00 be allowed.

Sanitize Gravel Walks

The sum of \$8,250.00 is requested for the cementing of the gravel walks within the walls of the Institution. The expectoration and filth which accumulates in the gravel walks in the small space allotted to the Institution is amazing. This request is made purely for sanitation and cleanliness and I recommend that the appropriation be made.

Sanitize Cell Houses One, Two and Three

On the recent tour of inspection by Plumbing and Health Officers we were severely criticized on the existing condition in the above cell houses. These are the oldest cell houses in the Institution. The plumbing and sewage laid at the time of erection have long since served their purpose and should be replaced.

It was explained to the officers that an appropriation was being made to make necessary changes and I strongly recommend that the amount of \$20,000.00 be allowed for same.

Graduating Chapel Floor

The Chapel or Auditorium floor located in the central building, which is used for various purposes, is so arranged that the men sitting in the rear of this Auditorium have slight observation of the platform and we recommend that the appropriation of \$3,500.00 be allowed to graduate the floor.

Reserve Officers Special Quarters

The appropriation of \$25,000.00 is requested for the erection of quarters for Special Reserve Officers. These officers are subject to call at all times and it would prove a convenience if they were housed at the Institution. An adjoining piece of property is available, the purchase of which is recommended later in this report. With our present supply of adobe brick these quarters could be built very inexpensively.

Residence and Dormitory Repairs and Alterations

The residence and dormitories connected with the Prison are in need of repair and several alterations are necessary.

I recommend the appropriation of \$7,500.00 for the same.

Bullet-Proof Glass in Towers

The amount of \$2,500.00 is required for bullet-proof glass in towers, as some of the towers are not equipped with this protection, and others where the glass has been checked should be replaced.

I recommend that this appropriation be made.

APPROPRIATIONS TO COMPLETE PROJECTS NOW UNDER WAY

Fireproofing Cell House and Reroofing

I strongly recommend the appropriation of \$18,500.00 for the fireproofing of cell houses, blacksmith shop, laundry, peeling room, boiler house and store room. While every precaution is taken to guard against fires we have no assurance that we are free from same. The destruction of this property mentioned above would amount to many times the amount of the appropriation suggested.

The reroofing of the store room is also a precaution against fire. Inasmuch as this building is the warehouse for supplies this above all should be taken care of, considerable inconvenience would be caused by fire, besides damage to property and the supplies would be extremely detrimental to the Institution. Our report on insurance shows that the present rate, while considerably lower than that paid in former years could be further reduced by the fireproofing of these buildings.

Completing of Dormitory on Ranch Number One

Owing to the increased number of inmates and the crowded condition within the Penitentiary, shacks had to be erected when the men were removed to the ranches. These shacks are now being replaced by dormitories or bunk houses which are under construction and the amount of \$15,000.00 is required to complete same.

Purchase of Real Estate

We urge the appropriation of \$8,500.00 for the purchase of two pieces of property, both adjoining the Institution. One located on the east and now known as the Rockafellow Home.

This is to be used, as aforesaid, for Special Reserve Officers Quarters.

The other, located west of the Institution, is a triangular shape on the main highway. This ground is to be used for further research for water supply. It is true that our present

water supply is adequate, but the State does not own the ground on which the well is sunk. We are informed by good authority that a similar supply of water could be found on this tract and, if so, it would prove very beneficial to the State and the Penitentiary.

The amount requested is a very low figure considering the usefulness of the property and I recommend the appropriation.

Purchase of Ranch Number Five

At the close of the last Biennial Period there was a total of \$23,000.00 due on this ranch and, owing to crop failures through frost and low prices, the ranch has been very much handicapped. The owners of this obligation feel that the amount should be met and have contacted us accordingly. I have explained the existing conditions; and they have consented to reduce the amount of indebtedness to \$18,000.00 providing we can pay \$3,000.00 and I recommend the balance of \$15,000.00 be appropriated by the next Legislature. Revenue derived from this property this year placed us in a position whereby the \$3,000.00 was paid the owners.

I feel that the balance of \$15,000.00 should be paid, inasmuch as it eliminates interest payments and secures for the State and the Penitentiary an excellent investment at this figure.

Purchase of Carlton Mortgage on Ranch Number One

On May 15, 1932, ranch number one was purchased and the obligation of \$35,000.00 was assumed, at that time, being made up of a \$25,000.00 amortization loan and \$10,000.00 due A. E. Carlton.

Since the time of purchase the amortization loan has been automatically reduced and \$4,000.00 has been paid on the Carlton loan.

I recommend that you at this time make an appropriation to take care of the balance of \$6,000.00 due A. E. Carlton.

In General

In making the request for appropriations to operate and handle the affairs of the Colorado State Penitentiary I am mindful of the perplexing financial problems in this State and therefore desire to co-operate with the budget commissioner, the Legislature and State Officials.

I have refrained from listing in the budget many items that are necessary and should be included.

The appropriations requested are those which I feel are absolutely essential.

To His Excellency, Edwin C. Johnson, Governor of the State of Colorado, I wish to express my appreciation and thanks for his kind and helpful co-operation in all undertakings of this Institution during the past two years.

Respectfully submitted,

ROY BEST, Warden.

REPORT OF THE CHIEF CLERK'S OFFICE

HON. ROY BEST, Warden,
Colorado State Penitentiary,
Canon City, Colorado.

Dear Sir:

I herewith submit, for your consideration and approval, the financial and statistical report of the Colorado State Penitentiary, together with tabulated statements and other data, for the two years ended November 30, 1934.

Respectfully submitted,

D. G. HAYES,
Chief Clerk.

FINANCIAL STATEMENT

Two Years Ended November 30, 1934

Table No. 1**TOTAL MAINTENANCE EXPENSE**

Vouchers Issued—Maintenance Fund.....	\$331,136.21
Vouchers Issued—Salary Fund.....	325,001.25
Vouchers Issued—Convict Labor Fund (Maintenance Fund).....	10,000.00
Products of Ranches and Gardens Consumed.....	8,458 32
Total Maintenance Cost.....	\$674,595.78

Table No. 2**MAINTENANCE APPROPRIATION****FUNDS AVAILABLE**

Balance December 1, 1932 (Overdrawn).....	\$ 9,248.26
Appropriation Available—May 31, 1933 (Emergency Appropriation). .	5,000.00
Appropriation Available—July 1, 1933 (Proportion applicable to 17 months ended November 30, 1934).....	247,916.61

DISBURSEMENTS

\$252,916.61

Vouchers Issued.....	\$331,136.21
Excess of Disbursements over Available Funds.....	\$ 87,467.86

Note—This excess of disbursements over available funds does not represent an overdraft on the books of the State Treasurer. It reduces the balance to be used during the remainder of the Biennial Period ending June 30, 1935.

Table No. 3**SALARY APPROPRIATION****FUNDS AVAILABLE**

REPORT OF THE MATRON

HON. ROY BEST, Warden,
Colorado State Penitentiary,
Canon City, Colorado.

Dear Sir:

I desire to submit herewith for your consideration the Bien-
nial Report as Matron for the two years ending November 30,
1934.

During this period we have received twenty-two prisoners
from the State of Colorado.

I wish to express my sincere appreciation for the co-opera-
tion and assistance rendered me at all times by the officials of the
institution.

Respectfully submitted,

MARY FITZGERALD,
Matron.

REPORT OF PRISON PHYSICIAN

HON. ROY BEST, Warden,

The Colorado State Penitentiary, Canon City, Colorado.

Dear Sir:

It is with a great deal of satisfaction that I submit the following report as Prison Physician for the Biennial Period ending November 30th, 1934.

First, I must express my appreciation for the splendid co-operation you have given us which has been so instrumental in obtaining an adequate hospital building, with the necessary room, and sufficient suitable equipment for the proper handling of all health problems and the rendering of efficient medical and surgical care of the inmate population.

Our new drug room has enabled us to keep our drug stock in much better condition and to compound many of our own preparations. It also has given us room to do a limited amount of laboratory work so necessary to the proper diagnosis of certain ailments.

You will notice the marked increase in number of major operations during the past two years. The new operating rooms and surgical ward has enabled us to handle these cases as well as all of the minor operations in a most efficient and successful manner.

Since the completion of the new hospital addition we have been able to initiate a systematic treatment of all venereal diseases and handle in a much more advantageous manner the daily office calls.

I wish to call your special attention to the Dental department. Our only epidemic during this period was one of Vincent's Angina which was handled in a most pleasing and satisfactory manner through the efforts of this department. In addition to this work all inmates have received a thorough dental inspection and their needs are rapidly being cared for.

Now with the installation of the X-Ray equipment we have realized ambitions of long standing and even though our work has almost doubled our accomplishments have been very satisfactory.

In my previous reports I have called your attention to the criminal insane, who are housed on the lower floor of the hospital building. These unfortunates need both mental and occupational treatment which we are unable to give and I suggest that our next task be the development of a definite program for their relief.

Our present facilities for the care of our increasing number of tubercular inmates is now entirely inadequate and a building program for this purpose is urgently recommended.

We urgently recommend the consideration of a sterilization law affecting special types of criminals.

Trusting that these few suggestions may have favorable consideration.

Respectfully submitted,

R. E. HOLMES, Prison Physician.

CHAPLAIN'S REPORT

HON. ROY BEST, Warden,
Colorado State Penitentiary,
Canon City, Colorado.

Dear Sir:

The field of the Chaplain's duties at the Colorado State Penitentiary is three-fold, described under the headings: Religion, Education, and Recreation. In exercising this jurisdiction, it is obvious that the names should receive the greater personal attention. In fact the second and third spheres of activity are only indirectly accounted for by the Chaplain, as an especial appointed officer Mr. Earl A. Stowe, efficiently administers these fields. Let us consider briefly each of these departments.

Religion:—The weekly Chapel services have been regularly held each Sunday morning from 9 to 10. These services with a voluntary attendance of from 400 to 600 have been exceptionally helpful. Many favorable comments are received during the week from the men themselves, and it is very gratifying to report an increasing interest in these public services of worship. A high type of service and program has been made possible through the very generous response of local clergy and other out-of-town speakers, who have made valuable contributions to these services during the past biennial. Nearly all of the local pastors have been speakers at these services, and once each year a special service under the auspices of the Ministerial Alliance of Canon City is a noteworthy occasion.

A volunteer choir augmented by members of the band and orchestra renders the music for these occasions. Once each month the fourth Sunday, the Rev. Albert Schaller, Catholic Chaplain, conducts services. And again on the third Sunday immediately after the regular Chapel hour, the Christian Scientists conduct a special service for their members.

The more important phase of the Chaplain's work is probably to pastoral work. This work corresponds to the same type of work each minister does among his own flock, opportunities to serve are too numerous to be mentioned. Suffice to say, that a very important phase of this work is among the condemned men. A real opportunity is offered for service and comfort among these unfortunate ones.

Education:—The beginning of a fine prison Library has been started through the generous donations of friends and publishers, and through the several advantageous purchases out of the

Library Fund. This work is under the direction of Mr. Earl A. Stowe. A card and index system is used based upon a modified form of the Dewey plan so widely used in small libraries throughout the country.

Books are issued to the cell houses three days a week, but to the Hospital patients and condemned men daily, the average daily issue is well over 400.

Band:—The Military Concert Band of 34 pieces, and the 10-piece Orchestra have attained a very high standard of efficiency, under the direction and baton of Prof. Earl A. Stowe. Twenty-two band concerts were presented to the public Sunday afternoons during the summer months. The band playing from the porch in front of the Administration building. These concerts have been attended by large crowds, who have shown their appreciation by generous applause and public acclaim. The band also entertains the men every noon hour while they are at dinner, also at all social and entertaining functions. The orchestra on several occasions donated their services for charitable events.

Recreation:—Good clean wholesome sports are strongly encouraged, and many classes of sports are indulged in—boxing, wrestling, baseball, basketball, etc. All of these endeavors have a favorable reaction on the morale of the men, and make a strong appeal to the right mind of spirit of sportsmanship. In addition entertainments are given in the Auditorium, sometimes these

affairs take the nature of home talent minstrel shows, and sometimes they are provided through the thoughtful generosity of outside friends. In all instances they are appreciated by the men within. No report in this department would be complete without reference to the new movie equipment, recently installed, a weekly movie of high order is now regularly enjoyed by the men.

In conclusion it is desired to leave an optimistic note as the true summary of the work in this department. The character of the work does not greatly change. The chief objective is the creation of confidence and interest among the men.

This we believe is being accomplished, and our whole-hearted appreciation is voiced to all those officers and men, who make contributions from time to time in the development of this important program.

Respectfully submitted,

REV. L. A. CRITTENTON,
Chaplain.
